has reached a certain point, the indigo leaves are removed and the liquor is poured into earthen vessels and churned for about half an hour; then there is added to it a solution of the bark of the jaumoon tree, eugenia jambolana, lamk. [common jaumoon], for the purpose of separating the dye from the water; the indigo liquor is then allowed to stand until the product deposits itself at the bottom of the vessels, when the water is gently poured off and the deposit poured into moulds to harden; these moulds are simply holes dug in the ground lined with a piece of cloth or gunny; the indigo remains in the mould for one night, by which time it becomes a solid mass, but sufficiently soft to allow of its being cut up into small pieces; after these have been well dried they are packed in chests and are ready for the market. The indigo product does not exist in the raw plant, but is generated by the fermentation from the principle called indican or indigo-blue; the maceration is to produce fermentation and oxydization. Commercially the product is found in cubic cakes of a deep blue color, which when rubbed by a smooth hard body assumes a coppery or bronze hue; commercial indigo only contains from 50 to 60 per cent. pure, the remainder consisting of a number of products; the indigo product is odourless and tasteless when pure; it is insoluble in water, cold alcohol, ether, dilute acids [poolipp, tezaub] and alkalies [cauram], and in cold fixed and volatile oils [yennay]; see later as to its application in dyeing; hot alcohol and fixed oils dissolve indigo in small quantities, but again deposit it on cooling. The indigo plant is reckoned by veidyans [q.v.] as an antidote for poison; leaf considered alterative and prescribed in pakkashoolay [q.v.] or hepatitis; the juice of the young branches mixed with honey [shahad] is used for aphthæ of the mouth in children; manufactured indigo itself is applied to reduce swellings of the body; powdered indigo is employed in epilepsy and erysipelas, and sprinkled on foul ulcers to cleanse them. The chief use is that of the dye product; indigotine or the tinctorial principle, and by consequence the ordinary indigo cake of commerce, is as above mentioned perfectly insoluble in any of the ordinary solvents; when however from any source it takes into its composition two additional atoms of hydrogen it changes to a white color, and then as white or hydrogenised indigo is readily soluble in alkaline compounds, in which state it is applied to textile substances; by subsequent exposure it quickly again oxidises to its blue color, and so becomes a very fast permanent dye; this is the theory of indigo dyeing, the most ancient dye process in the world. The following is the native method; to make a dyeing vat take ten seers of indigo, ground with a little water to a fine powder; put it into a pot capable of containing fifty seers; add a decoction of seed of tagaray or cassia tora, linn. [chakondah], and the boiled seed as well; then add ten seers of powdered sowdoo [q.v.], or impure soda, twelve seers of quicklime, and two seers of a ley of potash [jharkanamak]; the whole is then stirred with a stick, and the mouth of the pot is covered up; every evening and morning, for four days, three seers more of the ley must be added, and in the last portion must be put about the size of an apple [seb] of quicklime [choonam]; the vat now rests for three days, when four or five seers of boiling water must be added to it, and the vat is then ready for dyeing; the ley of potash above-named is prepared as follows; burn to ashes the branches of the cully or euphorbia tirucalli, linn. [round milk hedge], or of the ootreyena or achyranthes muricata; of these ashes put two seers into a pot, in the bottom of which there is a small hole; the hole is covered with a small inverted cup, and that by some rice husks or chaff; above these are put the ashes, and on them are poured by degrees twenty-five seers [q.v.] of water, which filters through the hole and forms the ley. For every seer weight of cotton [q.v.] thread pass a seer measure of water first through the pot containing the ashes, and in this weak ley dip the seer of cotton; wash it well, and then wring out the water; the thread is next dipped, by seers weight at a time, in the solution of indigo, till the color therein is exhausted; the color given by one dip is called mye, and is a sky blue; that which is given by five dips is nearly approaching to black. The above process with soda, quicklime, and ley of potash are for the purposes of clearing the color; and are not properly mordant [cauram] processes; the mordant is the air, which alone is sufficient to make the blue color perfectly fast; in the simplest native dyeing, the indigo is merely got into solution by the seeds of some plant which produces a ferment, and then the cloth is dipped. The following is a Hindostany by-word :—نیل کا ٹیکا an indigo mark, that is to say an indelible stain on character. Indigo dyes blue with alum [padicauram], green with turmeric [country saffron], and black with iron [auhan]. In concentrated sulphuric acid [gandhac tezaub] it forms a deep blue liquid by name of saxon blue; when submitted to dry distillation it yields a considerable quantity of aniline; these uses are not here known.——*Croton indigo* (सूर्यावर्त - súryávarta, San.). Dye of Crozophora plicata, mueller [round pepper].——*False indigo* (காட்டவுரி - káttavuri, Tam.). Dye of Baptisia tinctoria, h. k., the wild indigo of the United states. Perennial herbaceous deciduous plant, 1½ feet high; leaves ternate, stalked; leaflets roundish ovate; stipules setaceous, obsolete; flowers yellow.——*Large zanzibar indigo* (పెనువెంపలి - penuvempali, Tel.). Tel. from (penu, tel. large + vempali, tel. tephrosia purpurea, pers.). Title otherwise Hairy-leaved indigo plant. Botanically Indigofera [neely] hirsuta, linn., leguminosæ [vricsham, 48]. Erect, covered except the leaves with soft hairs; leaves pinnated; leaflets opposite, two to five pair, oblong-obovate, the terminal one the largest; upper surface slightly, under densely clothed with silky hairs; stipules long, bristly; racemes dense, peduncled, usually longer than the leaves; calyx deeply five-cleft; segment hairy; legumes imbricately reflexed, straight, four-angled, mucronate, villous, four to six-seeded; seeds four-sided, truncated at both ends; flowers small, deep rose-colored; flowering nearly all the year.——*Manilla indigo* (മണിലാനീലം - manilánílam, Mal.). Dye of Anona reticulata, linn. [netted anona].——*Paula indigo* (हयमारक - hayamáraka, San.; काळाकुडा - kálákudá, Mahr.; لسان العصافير الحلو - lisánulasáfírulhalo, Ar.; درخت اندرجو شیرین - darakhtiindarjavishírín, Pers.; میٹھا اندرجو کا پیڑ - mítháindarjaukáper, Hind.; میٹھا اندرجو کا جھاڑ - míth____indarjaukájhár, Dec.; ಹಲ್ಲುನೋವುಮರ - hallunóvumara, Can.; పాలనీలి - pálanîli, Tel.; കൊടകപ്പാല - kotakappála, Mal.; வெட்பாலை - vedbálai, Tam.). Title from white wood yielding indigo. San. from (haya, san. horse + máraka, san. destroyer) [gannair]. Mahr. from (kálá, mahr. black + kudá, mahr. holarrhena antidysenterica, wall.). Ar. from (lisán, ar. tongue + asáfír, ar. sparrows + halo, ar. sweet). Pers. from (darakht, pers. tree + indarjau, hind. holarrhena antidysenterica, wall. + shírín, pers. sweet). Hind. from (míthá, hind. sweet + indarjau, hind. holarrhena antidysenterica, wall. + per, hind. tree), bark and seed being similar to look at, but not bitter. Dec. from hindostany. Can. from (hallu, can. tooth + nóvu, can. pain + mara, can. tree). Tel. from (pála, tel. white + níli, tel. indigo plant). Mal. from (kutaku, mal. coorg + pála, mal. milk plant). Tam. from (vel, tam. white + pálai, tam. milky plant). Ar. also (lisánulasáfír), meaning sparrow's tongue. Pers. also (indarjauishírín), meaning indra's sweet barley, hordeum vulgare, linn.; (darakhtiahari-shírín), meaning sweet ash tree; (darakhtizabánikunjashkishírín), meaning tree of sweet sparrow's tongue. Can. also (beppále), meaning white + milky tree. Tel. also (chittiankudu), meaning small + the plant; (tellapála), meaning white + milky plant; (ankudu) [gambier, tellicherry bark]. Tam. also (pálai), meaning milky plant [dita, edible paulay, eve's apple, ground paulay, monkey-face paulay, nakchiknee silk cotton, nauga champak, pauchonty, paulay silk cotton, tellicherry bark]; (pálainílam), meaning milky plant + indigo. Title otherwise Blue dyeing rosebay, Dyer's oleander, Dyer's wrightia, Sparrow's tongue, Sweet inderjow. Botanically Wrightia [veppaulay] tinctoria, r. br., apocynaceæ [vricsham, 87]. Alias Nerium tinctorium. Shrub, 10–15 feet; leaves elliptic-lanceolate or ovate-oblong, acuminated, glabrous; panicles terminal, branches and corymbs divaricate; tube of corolla twice as long as the calyx; follicles distinct, but united at the apex; flowers white, fragrant, 1½ inches in diameter when expanded. The pale green soft leaves deciduous in cold weather; plant flowers in march and april, with white follicles in pairs, from 12–18 inches long, the lower extremities of which unite as they ripen; seeds have pleasant taste, not unlike that of oats [vilauyaty jow], which they also resemble in appearance. Is less dependent than common indigo plants on rain and irrigation. When used to give a blue dye, the leaves are boiled in a pot, and on temperature or consistency becoming suitable the liquid is poured off into another pot and worked with a paddle, a small infusion of naugamaram [common jaumoon], bark being added; when the water clears it is poured off, and the sediment being dried, is fit for the market; manufacture is common in coimbatore. The inert bark and seeds are sold in bazaar [q.v.] for real inderjow [tellicherry bark]; the bark is readily distinguished by its darker color, and by its not exfoliating in patches. The fresh leaves when chewed are pungent, and remove toothache; the coagulated milky juice forms a kind of caoutchouc [pauchonty]. The wood is white and close-grained, somewhat resembling ivory [dant]; it cuts like soap [sauboon] on the lathe, and is much used for ornamental and useful purposes; the turners call it doodhy or milk-wood. There is a glabrous variety more common than the variety with puberulous leaves.——*Sylhet indigo* (نیل سلہٹ - nílisilhet, Hind.). Dye of Marsdenia tinctoria, r. br.——*West indian indigo* (विषशोधनी - vishashódhaní, San.; النيل - annîl, Ar.; ولایتی نیل - viláitínîl, Hind.; ಶೀಮೆನೀಲಿ - shíme-níli, Can.; సీమనీలి - símanîli, Tel.; சீமைநீலி - shímainîli, Tam.). San. from (visha, san. poison + shudh, san. to clear), root reckoned an antidote to poison. Hind. from (viláití, hind. foreign + nîl, hind. indigo plant). Can. from (shíme, can. foreign + níli, can. indigo plant, indigofera tinctoria, linn.). Tel. similar. Tam. similar. Title otherwise Foreign indigo. Botanically Indigofera [neely] anil, linn., leguminosæ [vricsham, 48]. Specific name from arabic. Herb or undershrub ever green, biennial; height 3 feet; leaves pinnate, oblong, of three pairs; racemes shorter than leaf; flowering in july-august. Found wild at philip's island in spain and in the west indies; also along the gambia in africa; a larger plant than the indian; its pod sickle-shaped, short, compressed; differs thus also from tinctoria; the spaniards manufactured indigo from this species in mexico and the portuguese in brazil; it was from this plant that aniline, used for the production of the pigments [rangh] mauve and magenta, was first obtained.——*Wild indigo* (कालक्रीतक - kálaklítaka, San.; سرمائی نیل - surmáínîl, Hind.; ಕಾರುನೀಲಿ - kárunîli, Can.; కారునీలి - kárunîli, Tel.; காட்டவுரி-

káttavuri, Tam.). San. from (kála, san. black + klítaká, san. indigo plant, indigofera tinctoria, linn.). Hind. from (surmá, hind. antimony + níl, hind. indigo); from color. Can. from (káru, can. black + níli, can. indigo plant). Tel. from (káru, tel. wild + níli, tel. indigo plant, indigofera tinctoria, linn.). Tam. from (kádu, tam. forest + avuri, tam. indigo plant). Botanically Indigofera [neely] argentea, linn., var. cærulea, leguminosæ [vricsham, 48]. Alias Indigofera cærulea. An erect shrub, covered with whitish pubescence; leaves pinnated; leaflets four to five pair, obovate, the terminal largest; all hairy underneath; racemes solitary, shorter than the leaves; upper flowers deciduous; legumes short, deflexed, and falcate upwards; slightly torulose, three to four-seeded; flowers small, yellowish-red; flowering nearly all the year. Commonly met with on barren and uncultivated ground; a dark green, handsome bush with flowers in large pendulous racemes of delicate pink or rose color; from its leaves, which are about one or two inches long and three-quarters of an inch broad, a light indigo can be extracted in large quantities.——*Zanzibar indigo* (शरपुङ्खा - sharapunkhá, San.; उन्हाळी - unhálí, Mahr.; سر پھوںکا - sarphonká, Hind.; جنگلی کلتھی - janglíkulthí, Dec.; ಪೊಂಗಿಡ - p'hankigida, Can.; వెంపలి - vempali, Tel.; കൊഴിഞ്ഞിൽ - kozhiññil, Mal.; ගම්පිලි - gampili, Singh.; கொள்ளுக்காய்வேளை - kollukkáyvélai, Tam.). San. from (shara, san. arrow + punkha, san. pinion); from pinnate leaf. Mahr. from (unhála, mahr. hot season). Hind. from sanscrit. Dec. from (janglí, hind. wild + kulthí, hind. gram, dolichos biflorus, linn.). Mal. from (kozhi, mal. to wither). Tam. from (kollu, tam. gram, dolichos biflorus, linn. + káy, tam. pod + vélai, tam. gynandropsis pentaphylla, dec.). San. also (punkhá), meaning pinion. Hind. also (hunnálí). Can. also (empaligida). Tel. also (bontavempali), meaning large + the plant; (tellavempali), meaning white + the plant. Title otherwise Fish poison, Galega, Goat's rue, Jungle gram, Purple galega, Purple tephrosia, Vempully, Wild indigo. Botanically Tephrosia purpurea, pers., leguminosæ [vricsham, 48]. Generic from persian. Alias Galega cœrulea, clouila, lanceæfolia, purpurea, sericea, tinctoria; Tephrosia galegioides, lanceæfolia, lanceolata, lobata, stricta, taylorii, tinctoria. A somewhat erect, much-branched shrub; branches glabrous, pubescent or villous; leaflets cuneate-oblong or lanceolate, under side more or less pubescent; racemes leaf-opposed, often longer than the leaves; flowers on pedicels longer than the bracts, two to three together; calyx pubescent; corolla three times as long as the calyx-tube; vexillum silky, bent back from near its base; legumes spreading, linear, slightly falcate, obtuse with a short point, pubescent or glabrous; flowers small, purple; flowering in the rainy season. A small wild shrub with a leaf resembling that of the tamarind [q.v.]; flowers disposed in a loose spike. Roots bitter; a decoction [kwautam] considered good in dyspepsia. There are varieties maxima and pumila. Other species of tephrosia are:—Fusca, whole plant of a dark or dirty grey color; Hookeriana, diffuse shrub; Senticosa, flowers dull-reddish; Spinosa; root, in succulent state, has pleasant taste and somewhat fragrant smell; used in rheumatism; and with ginger [q.v.] in dyspepsia; Tenuis, flowers bluish, in rocky places; Tinctoria, shrub; flowers small dull red; dindigul hills, neilgherries, mysore; flowering in the cold season; gives a dye [shauyam]; there is a variety of this, incana. Compare in other genera where transl. is of first term:—Indigofera hirsuta (penuvempali), large; Mundulea suberosa (kondavempali), hill. See gloss. paragraphs.

INDOO (इन्दु - indu, *San.*). From (und, san. to wet). A name of the moon [chundran], corresponding with Arcan for sun [arcaindoo sangamam, sooryan].

INDRAN (इन्द्र - indra, *San.*). From (id, san. to possess supreme wealth). Otherwise Devendran [q.v.]. The highest of the Vedic gods, the god of the firmament and the regent of the east [ashtadic]. He presides over Swargam [q.v.], or the hindoo paradise. He is the king of the gods, in many respects corresponding with the grecian Zeus, or the Jupiter fulminator of the romans. The Supreme being, according to the Vedauntam [q.v.]. He possesses the Vajram [q.v.] or thunder-bolt as the god of battle. His wife is Indrauny [q.v.]. He rides on the white elephant Eirauvatam [q.v.]. He is depicted like Argus covered with eyes, the consequence of the curse of the Rishy gowtaman [q.v.], whose wife Ahalyay he seduced [matam]. As lord of clouds, rain, seasons and crops he is still worshipped at the time of sowing and reaping. Compare Pongal. For regent star of the eighteenth lunar mansion see Nacshatram. In composition the title signifies supreme or excellent. Suffix in Canarese and Teloogoo proper names as Raghavendra row. Plant first term; ex., where transl. is of second term:—Holarrhena antidysenterica (indravrikshamu), tree, (indrayava), barley; Terminalia arjuna (indradru), tree; Thunbergia fragrans (indratíga), creeper; Vitex negundo (indrasurasa), basil; see gloss. paragraphs. See vol. I (73), (78), (86).——*Inderjow* (اندر جو - indarjau, Hind.). Means indra's barley. Bitter inderjow is same as Tellicherry bark. Sweet inderjow is same as Paula indigo.——*Indra jaulam* (इन्द्रजाल - indrajála, San.). From (above + jála, san. net). Deception. A stratagem in war. Also a short trance in which a long train of circumstances is supposed to pass.——*Indra locam* (इन्द्रलोक - indralóka, San.). From (above + lóka, san. world). Swargam.——*Indra's creeper* (ఇంద్రతీగ - indratíga, Tel.). Title from showy flowers. Tel. from (indra, san. the god + tíga, tel. creeper). Tel. also (jímandáratíga). Botanically Thunbergia fragrans, r., acanthaceæ [vricsham, 101]. Alias Thunbergia roxburghia. Climbing; leaves oblong, acute, cordate, angular and somewhat hastate at the base, slightly scabrous; calyx twelve-cleft; peduncles axillary, solitary, one-flowered, round downy; capsule flat and beaked; flowers large, pure white, or white with sulphur-colored bottom. Herbaceous plant, with slender stems, and rough, small, heart-shaped leaves; bears nearly always snow-white flowers, size of rupee [q.v.]; very ornamental; there is a variety lævis. Other common species of thunbergia are:—Alata, climbing annual; round, flat flowers of moderate size, and of a great variety of shades of color, white, yellow, buff, and orange, with and without a dark purple eye. Coccinea, climbing shrub; flowers largish, deep red, with a yellow throat; flowering in cold season. Grandiflora, flowers very large, light blue, with a white tube. Hawtayneana, flowers deep purplish blue, with a yellow throat. Mysorensis, flowers large, showy, either of a golden-yellow throughout, or with the limb of an orange or blood-red color. Tomentosa. Wightiana.——*Indrauny* (इन्द्राणी - indrání, San.). The wife of Devendran; represented as an ever blooming virgin, and whilst the dignity of the king of the gods passes from one to another, she remains the wife of every succeeding Devendran. Indrauny is not worshipped, but paintings of her are met with.——*Indravally* (इन्द्रवल्ली - indravallí, San.). See sep. title.——*Indriyam* (इन्द्रिय - indriya, San.). Belonging to indran; what belongs specially to indran as god of all enjoyment. Power of the senses. Faculty of sense.—"*a*" An organ of sense, divided into three classes, Nyaunendriyam, Carmendriyam, and Antarendriyam. The Nyaunendriyam or Punchendriyam are the eye, ear, nose, tongue, and skin. The Carmendriyam are the organs of speech or larynx, hand, foot, anus, and parts of generation. The Antarendriyam are Manas, the mind or organ of thought; Booddhy, the organ of intellect; Ahancauram, the organ of selfishness or emotion; and Chittam, the organ of volition. By mystical interpretation the seven rishies [q.v.] are said to be the seven senses, making Manas or inner sense the sixth, and Vidyay, knowledge or wisdom, the seventh.—"*b*" The organic world of plants and animals. For category, see Padaurtam; for elementary substance, see Dravyam; for matter, see Bhootam; for organic and inorganic, see present head and Anindriyam; for organic kingdom, see Ganam [jantoo, vricsham]; for organic class, see Vargam; for organic order, see Santaunam; for organic family, see Coolam; for organic genus, see Jauty; for organic species, see Bhaidam. Oopa prefixed to either of the above means a sub-head. For inorganic minerals, see Dhautoo.

INDRA VALLY (इन्द्रवल्ली - indravallí, *San.*). From (indra, san. the god + vallí, san. creeper). Water melon. Botanically the Citrullus genus, cucurbitaceæ [vricsham, 62]. Climbing herbs, hispid or scabrous; leaves stalked, palmately lobed, usually deep; flowers tolerably large, solitary; fruit globose or ellipsoid, smooth, fleshy; seeds many, oblong, compressed, smooth. The species best known to the natives are shown below.——*Bitter water melon* (इन्द्रवारुणी - indravárunī, San.; इंद्रावण - indrávana, Mahr.; कावंडलि - kávandali, Conc.; حنظل - hanzal, Ar.; هندوانهٔ تلخ - hindavánahitalkh, Pers.; اندراین - indráyan, Hind.; اندراون - indrávan, Dec.; ಹಾವುಮೆಕ್ಕೆ - hávumekke, Can.; ಕಕ್ಕೆಂಡೆಲ - kakkendel, Too.; వెర్రిపుచ్చ - verriputtsa, Tel.; പേക്കുമ്മട്ടി - pékkummatti, Mal.; යකොමඩු - yakkomadu, Singh.; பேய்க்கொம்மட்டி - péykkommatti, Tam.). San. from (indra, san. the god + vri, san. to cover); covered with flowers as indran [q.v.] is with eyes, applies to a large variety. Mahr. from sanscrit. Ar. means bitter. Pers. from (hindavánah, pers. water melon, citrullus vulgaris, schrad. + talkh, pers. bitter). Hind. and dec. from sanscrit. Can. from (hávu, can. snake + mekku, can. to eat). Tel. from (verri, tel. mad + puttsa, tel. cucumis trigonus, roxb.). Mal. from tamul. Singh. from (yak, singh. devil + komadu, singh. citrullus vulgaris, schrad.). Tam. from (péy, tam. devil + kommatti, tam. citrullus vulgaris, schrad.). San. also (indráhvá), meaning called indran; (chitrá), meaning variegated, from color of fruit [chitramoolam]; (góvandaní), meaning cow + adorer; (gavákshí), meaning bull's eye, from the flowers; (vishálá), meaning broad is a large variety. Ar. also (alkam). Pers. also (kharbúzahitalkh), meaning bitter water melon; (kabísitalkh), meaning bitter cucumber; (kharbúzahirúbáh), meaning fox's melon; (kharbúzahibújahl), meaning stupid + water melon, meaning the fruit preferred by a stupid person. Hind. also (mákal). Tel. also (chittipápara), meaning small + colocynth; (kárkárukamu); (puttsa); (páparabudama), meaning colocynth + cucumis trigonus, roxb.; (étiputtsa), meaning river + cucumis trigonus, roxb. Mal. also (káttuvellari), meaning forest + cucumis sativus, linn. Singh. also (tiktiká), meaning bitter; (tittakomadu), bitter + citrullus vulgaris, schrad. Tam. also (varikkommatti), meaning stripe + citrullus vulgaris, schrad.; (péthingári), meaning purgative; (áttuttummatti), meaning river + the plant; (péyttummatti), meaning devil + the plant; (tummatti); (varittummatti), meaning stripe + the plant. Greek κολοκυνθὶς ἀγρία. Title otherwise Bitter apple, Bitter cucumber, Bitter gourd, Bull's-eye

melon, Colocynth, Colocynth gourd, Coloquintida, Devil water melon, Fox melon, Pakkoth of the bible, River cucumber, River gourd, Striped gourd, Vine of Sodom, Wild gourd. Botanically Citrullus [indravally] colocynthis, schrad., cucurbitaceæ [vricsham, 62]. Alias Cucumis colocynthis. Annual; stems scabrous; leaves smooth above, muricate beneath, with small white tubercles, many-cleft, obtuse-lobed; tendrils short; female flowers solitary; calyx tube globose and hispid; fruits globose, glabrous, streaked; flowers yellow; flowering in the rainy season; common on coromandel in sandy situations in neighbourhood of sea. The fruit is nearly globular, of the size of an orange [q.v.], smooth, marbled with green and yellow when fresh, yellowish brown when dry, and contains a scanty greyish-white pulp in which a number of brown seeds are embedded; this pulp in the fresh fruit is spongy and juicy, and occupies the whole of the interior of the fruit; the seeds are disposed in vertical rows on three thick parietal placentæ, which project to the centre of the fruit, then divide and turn back, forming two branches directed towards one another; the seeds are of flattened ovoid form, 3-10ths of an inch long by 2-10ths broad, not bordered; the testa is hard and thick, with a finely-granulated surface, and is marked on each side of its smaller end by two furrows directed towards the hilum; the leaves are glabrous and nearly smooth above, muricated beneath, with small, white, hair-bearing tubercles, many cleft and lobed, the lobes obtuse; the root is fibrous, tough and stringy, of a yellowish-white color; all parts of the plant are very bitter, and the dust when dry very irritating to the eyes and nostrils. The fruit was familiar to the greeks and romans. Gives to pharm. colocynth pulp, the dried decorticated fruit freed from seeds, colocynthidis pulpa, active principle, a bitter resinoid substance, colocynthin; hydragogue cathartic; officinal; very useful, particularly in combination with other drugs of similar nature, in constipation, hepatic and visceral congestions, dropsical affections and other diseases requiring purgatives; substituted for british jalap [q.v.] and scammony [q.v.]. Sheep [aud], goats [vellaud], jackals [q.v.], and rats [ely] eat colocynth apples readily; they are made into preserves with sugar [q.v.]; the gypsy tribes eat the kernel of the seed, freed from the seed skin by a slight roasting. Oil [yennay] from seeds used in lamps. Cucumis trigonus, roxb. [country cucumber] resembles the colocynth gourd and has been mistaken for it. Cucumis sativus, linn. [common cucumber], hill colocynth, has oval oblong bitter fruits. There is a Hindostany proverb :—اندراین کا پهل دیکهنے هی کا هے چکهنے کا نهین— "The fruit of the colocynth is only to look at, not to taste;" said of a person of good appearance, but bad disposition.——*Sweet water melon* (तरम्बुज - tarambuja, San.; तरबूज - tarabúja, Mahr.; बचंग - baççanga, Conc.; هندوانه - hindvánah, تربز - tarbuz, Pers., Hind. and Dec.; سامنكا - sámangka, Malay; ಬಚ್ಚಂಗಾಯಿಗಿಡ - baççangáyigida, Can.; ಬಚ್ಚಂಗಾಯಿ - baççangáyi, Too.; దర్బూజ - darbúji, Tel.; വത്തക്ക - vattakka, Mal.; කොමඩු - komadu, Singh.; சர்க்கரைக்கொம்மட்டி - sharkkaraikkommatti, Tam.). San. from persian. Mahr. from hindostany. Pers. from (tar, pers. wet + buz, pers. goat). Tel. from hindostany. Mal. from (pateca, port. water melon). Tam. from (sharkará, san. sugar + kommatti, tam. the plant). Hind. also (samáka); (halinda); (kharbúz), meaning melon. Malay also (mándiki); (pátaka); (támiki). Can. also (karabúju); (kollangadi); (kálenga). Tam. also (piççi); (kommatti); (vattákku), from the portuguese pateca, water melon. Greek πέπων. Title otherwise Goat melon. Botanically Citrullus [indravally] vulgaris, schrad., cucurbitaceæ [vricsham, 62]. Alias Citrullus edulis, pinnatifida; Cucumis citrullus; Cucurbita anguria, citrullus. Flower large yellow; cultivated in river beds and in alluvial deposits of tanks, &c., where abundance of water can be had for; fruit large, ovoid, green, and smooth; flesh whitish yellow or red; seeds compressed and variable in shape and color. The distinction between this and the cultivated form of citrullus colocynthis [bitter water melon] is very small. The four so called cold cucurbitaceous seeds sold in the bazaars are those of cucumis melo, var. utillissimus [country melon], benincasa cerifera [wax gourd], cucumis melo [common melon], and present article; these seeds are in constant demand, and are kept decorticated and ready for use; the natives always use them together, and consider them to be cooling, diuretic, and strengthening. Fruit used as a dessert; though not much flavor, refreshing, and in request amongst natives during hot season; seeds are sometimes dried and the kernels eaten. Oil from seeds.

INDUM PODY (ഇന്തിന്പൊടി - íntinpoti, *Mal.*; இண்டம்பொடி - indambodi, *Tam.*). From (íntu, mal. cycas + poti, mal. flour). Flour from kernel of Cycas circinalis, linn., cycadaceæ [indian sago palm].

INGRES (انگریز - angrez, *Hind.*). An Englishman.

INK NUT (కరక - karaka, *Tel.*). Title from use. Tel. means black color. Same as Chebulic myrobalan.

INNESPETT (ఇన్నిస్పేట - innispéta, *Tel.*). Named after Mr. Innes, a former judge. Suburb of Rajahmundry.

INSAUF (انصاف - insáf, *Hind.*). From (nisf, ar. half). Decision of a cause [feisal, teerp].

INTIZAUM (انتظام - intizám, *Ar.*). From (nazama, ar. to arrange) [nizam]. Regulation. Part of lacab; as Intizaum ool moolk, the regulator of the state [ism]. This was title of the third Prince of Arcot from 1879 to 1881.

INZARAM (ఇంజరము - indzaramu, *Tel.*). From (intsu, tel. pleasant + pura, san. town). Zemindarry, Village, Port; Godavery dist., Cocanada division; lat. of village 16° 44′; long. 82° 13′; from Cocanada S.S.W. 15 miles; from Coringa S.S.W. 7 miles; from Madras N.N.E. 278 miles; from Neelapully W. 4 miles. Peshcush Rs. 2,957. Near the mouth of Godavery, on Golcondah coast [q.v.]. Factory founded 1708, established 1722, captured by French under Bussy 1757, part of territory ceded by Nizam's treaty with Colonel Forde 1759, grant confirmed by the Moghul's firmaun [q.v.] 1765. Continued as a mercantile station till 1829. Formerly celebrated for manufacture of long cloth [q.v.] and for its trade in general. An irrigation canal takes its name from town. The place and neighbourhood suffered greatly from a cyclone in 1839.

IPAR (نمام - nammám, *Ar.*; اپار - ípár, *Pers.* and *Hind.*). Title from hindostany. Ar. also (basha), meaning a garden of palm trees. Greek θύμος. Title otherwise Garden thyme, Thyme. Botanically Thymus vulgaris, linn., labiatæ [vricsham, 103]. Erect plant, sometimes procumbent at the base, or clothed with a hairy pubescence; has a pungent aromatic odour and taste; imported from persia. Oil of thyme stimulant, applied to relieve tooth ache; mixed with olive [zeitoon] oil or spirit, stimulating liniment in chronic rheumatism, sprains, bruises, &c.; chief consumption is however in veterinary practice; the odour and taste of the drug is pleasant, like peppermint [poodeenah], but sweeter. Leaves used for culinary purposes. Thymus serpyllum, linn., is wild thyme.

IR (ಇರು - iru, *Can.*; ఇరు - iru, *Tel.*; இரு - iru, *Tam.*). Two. ——*Ibbady* (ఇబ్బడి - ibbadi, Tel.). From (inu, tel. two + madugu, tel. measure). Double. Prohibitory assessment [teervay].——*Ikkairy* (ಇಕ್ಕೇರಿ - ikkéri, Can.). From (eradu, can. two + kéri, can. street). Village in 14° 07′ N. lat., 75° 04′ E. long., in Saugor talook, Shimoga district, 3 miles south of the cusbah [q.v.]. Formerly a local dynasty [raj], otherwise Bednore rajahs, 1560—1763. Declared themselves independent of Vijianugger sovereigns on the breaking up of that empire. Minted money. The sixteenth and the last died without issue in 1763 when Hyder seized the territories [charitram]. See vol. II, 63.——*Immady* (ಇಮ್ಮಡಿ - immadi, Can.). From (eradu, can. two + madi, can. fold). The second. Specially used with rulers, names as Immady krishna rajah.——*Irasa* (ఇరస - irasa, Tel.). From (iru, tel. two + kuntsamu, tel. the measure). Measure of capacity. 2 coonchams = 1 irasa; 2 irasas = 1 toom [alavay, 3b]. About 1,680 cubic inches. Varies with the cooncham and the toom. ——*Irattaiyar* (இரட்டையர் - irattaiyar, Tam.). Means twins. Two Tamul twin poets, excelled in extempore versification, fourteenth century. The elder was a cripple, younger blind. Younger gave out first two lines of a stanza, the elder last two. Example in praise of Paraucrama paundyan [paraucrama tevan] at the expense of Cholans [q.v.]. The answers to the questions are inserted to make the stanza intelligible:—குறுமுனிவன் கொல்லியிலோ தமிழ்ப்பிறந்ததம்மானே ஒப்பரிய திருவிளையாட்டுறையூரோவம்மானே திருநெடுமாலவதாரஞ் சிறுபுலியோவம்மானே சிவன்முடிமேலணிவதுவஞ் செங்கதிரோவம்மானே கரையழிந்த காவிரியோ வுரைதெரிந்தவம்மானே கடிப்பகைக்கு வேம்போ கடுக்கையோவம்மானே பரவைபடிந்ததுஞ் சோழன் பதந்தனிலோவம்மானே பராக்கிரமபாண்டியன்புகழைப்பகரெளிதோவம்மானே—"O father! Was "it from the mount Colly [collimullay] the dwarfish sage "Agastyan [q.v.] produced the Tamul [q.v.] language? No, from "the Pothigay [q.v.] in the Paundyam [q.v.] country. O father! "Did the incomparable sports [tirvilaiyaudal] of Shiva [q.v.] "take place at Warriore? No, at Madura, the metropolis of the "Paundyam country. O father! Was Vishnoo [q.v.] ever "metamorphosed into a tiger? No, into a fish, the device on "the banner of the Paundyam kings. O father! Is it the sun "which Shiva wears over the tuft of hair upon the crown of his "head? No, it is the moon [chundrashekharan] the progenitor "of the Paundyam race. O father! Was it the bank destroying "Cauvery which saw the writing of Sambandhan [q.v.] ascend "up against its stream? No, it was Veigay, the river of Madura. "O father! Which is more heroic, the condray [q.v.] or vemboo "garland? The vemboo [neem], worn by the Paundyam kings, "vowing thereby to conquer or die. O father! Was it at the "feet of the Cholan the sea submitted? No, it was at the feet "of Oogra paundyan. O father! Is it then a light thing "to declare the praise of Paraucrama paundyan?"——*Iricore* (ഇരുക്കൂർ - irukkúr, Mal. irikúr *). From (above + kúr, mal. portion). Town; Malabar dist., Chiracal tal.; lat. 11° 59′; long. 75° 36′; from Calicut N.N.W. 52 miles; from Cannanore N.E. 15 miles; from the sea E. 19 miles. Large Moplah town with mosques [q.v.] on high road from coast leading through Poodiyachooram or Heggal pass [ghaut] towards Coorg and Mysore, on right bank of Belliapatam river. During rains timber and bamboos [q.v.] in rafts are floated down to Belliapatam, &c.,

for sale and for construction of small crafts. Scene of Moplah [q.v.] outrages in 1852. Belliapatam river is navigable for boats throughout year up to this place. Considerable entrepôt of trade.——*Iroobhogam* (இருபோகம் - irubógam, Tam.). Two crops [dofusl].——*Irtalay maniyan* (بالو کا سانپ - bálúkásámp, Dec.; ಹಪ್ಪಟೆಹಾವು - happatehávu, Can.; మొండిపోడ - mondipoda, Tel.; இருதலைமணியன் - iruthalaimaniyan, Tam.). Title from tamul. Dec. from (bálú, hind. sand + sámp, hind. snake). Tel. from (mondi, tel. maimed + poda, tel. spot); stout with blotches. Tam. from (irandu, tam. two + talai, tam. head + maniyan, tam. small black serpent). Dec. also (mattíkásámp), meaning earth snake. Terms co-extensive with the family Erycidæ ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 25], of naturalists [jantoo]. Sand-snakes. The sand-snakes have the body of moderate length, cylindrical, covered with small, short scales; tail very short, with a single series of subcaudals; head with a broad snout of moderate length, or somewhat elongate; eye rather small, with vertical pupil. Adult individuals with a short conical prominence in a groove on each side of the vent; it is the extremity of a rudimentary hind limb. Show similarity to the Pythons and Boas [rock snake]. More or less arboreal, frequenting marshy places with luxuriant vegetation, burrowing with the greatest facility; their prey consists of mice [shoondely], lizards [chipkalee], and other burrowing snakes. Probably semi-nocturnal, able to see in dark places as well as in the night. The following species are found in Southern india:—"*a*" Eryx johnii. Alias Boa johnii; Clothonia johnii; Eryx maculatus. Called by the natives Two-headed viper. Body surrounded by longitudinal series of scales; upper parts reddish olive, uniform or with irregular small black spots and dots; lower parts generally marbled with blackish. Young specimens with three or four broad brownish rings round the hinder part of the body. Common in the plains. Never bites. Frequently found in the possession of serpent-charmers, who mutilate the end of the short, thick tail in such a manner that the scarred extremity somewhat resembles the form of the head. Feeds on young mice. Length nearly 4 feet.—"*b*" Gongylophis conicus. Alias Boa conica; Eryx conicus. Called by the natives small Poodeiyan or Wart-snake. Middle of the body surrounded by short-keeled scales; brownish grey, dorsal series of large quadrangular brown blotches edged with dark brown and whitish; spots frequently confluent form a broad zigzag band; irregular smaller brown spots along the side; lower parts white; oblique brown streak on temple proceeding from behind the eye. Attains a length of more than two feet.

IRAUL (अग्निमत्स्य - agnimatsya, *San.*; झिंगा - jhingá, *Mahr.*; جرادالبحر - jarádulbahr, *Ar.*; ملخ دریائی - malakhidaryáí, *Pers.*; جھینگا - jhingá, *Hind.* and *Dec.*; ಬೆಂಕಿಮೀನು - benkimínu, *Can.*; రొయ్య - royya, *Tel.*; ചെമ്മീൻ - chemmín, *Mal.*; இறால் - irál, *Tam.*). Title from tamul. San. from (agni, san. fire + matsya, san. fish). Ar. from (jarád, ar. locust + bahr, ar. sea). Pers. from (malakh, pers. locust + daryá, pers. sea). Can. from (benki, can. fire + mínu, can. fish). Tel. from (royyi, tel. burning ashes). Mal. from (chem, mal. red + mín, mal. fish). Tam. from (iru, tam. to crumble); from the wrinkled appearance. Prawn. The sub-order Macroura of the order Decapoda of crustaceans [kavachiny], of naturalists [jantoo]. Good on Coromandel coast [q.v.]. Considered by veidyans [q.v.] to be stimulating and aphrodisiac, and to possess virtues in diabetes. Makes good curry [q.v.]. A composition of dried prawns pounded up with salt [ooppoo], spices, &c., is much used. The following are the chief kinds.——*Autt iraul* (ஆற்றிறால் - áttirál, Tam.). From (áru, tam. river). Astacus fluviatilis. The craw fish.——*Caul iraul* (காலிறால் - kálirál, Tam.). From (kál, tam. leg). Astacus jamaicensis. Prawn with long legs.——*Coony iraul* (கூனியிறால் - kúniyirál, Tam.). From (kúni, tam. hump-backed). Crangon vulgaris. Shrimp.——*Karvand iraul* (கருவண்டிறால் - karuvandirál, Tam.). From (karu, tam. black + vandu, tam. beetle). Astacus nigricans. Black prawn.——*Shing iraul* (சிங்கிறால் - shingirál, Tam.). From (shringa, san. horn). Astacus marinus. Lobster.——*Vel iraul* (வெள்ளிறால் - vellirál, Tam.). From (vel, tam. white). Cancer setiferus. White prawn.

IRAVA (ഇറവ - irava, obl., *Mal.*). From (irayuka, mal. to scatter); from dispersed numbers. Basket-makers in Malabar [jauty].

IRON (இரும்பு - irumbu, *Tam.*). Prefix.——*Iron-wood* (இருள்மரம் - irulmaram, Tam.). Title from hard dark red wood. Product of nauga champak [q.v.] and yellow condray [q.v.]. Compare also:—Cassa [q.v.], chowkmaram [q.v.], dark vail [q.v.], deccany deodar [q.v.].——*Iron grass* (هنراج - hunráj, Hind.). Same as Hoonrauj.

IROOL (இருள் - irul, *Tam.*). Darkness.——*Iripa* (मधूक - madhúka, San.; نیامنیام - níamniam, Malay; ಕನಕಮರ - kanakamara, Can.; ഇരിപ്പ - irippa, Mal.; ගල්මඳෝර - galmandóra, Singh.; நாய்ப்புடுக்கன் - náyppudukkan, Tam.). Title from malayalam. San. from (madhu, san. honey). Can. from (kanaka, san. gold + mara, can. tree). Mal. from (irul, mal. darkness). Singh. from (gab, singh. stone + mandóra, singh. vatica roxburghiana, blume). Tam. from (náy, tam. dog + pidukku, tam. testicle.) Tam. also (irapú). Botanically Cynometra ramiflora, linn., leguminosæ [vricsham, 48]. Tree, 60 feet; leaves composed of two to six-opposite leaflets; calyx tube very; short, four-partite, segment reflexed; petals five, oblong-lanceolate; stamens distinct, inserted with the petals into a ring lining the calyx tube; peduncle solitary, few-flowered, springing from the branches among the leaves; flowers white; flowering in cold season; malabar and south canara. Root purgative; a lotion is made from the leaves boiled in cow's milk [paul], which, mixed with honey [shahad], is applied externally in scabies, leprosy [cooshtam] and other cutaneous diseases; oil seeds used for same purposes. Chips of wood infused in water give a dark purple dye [shauyam]. Wood red, hard, close-grained. Another species is cauliflora.——*Iroola* (இருளன் - irulan, Tam.). Tribe, mostly on hills. More primitive than Coorumbar [q.v.], akin to the Beydar or hunters of the peninsula. Speak a rude Tamul. The best known are those living at foot of Neilgherry mountains. These are, like the Mysore beydar, worshippers of Vishnoo [q.v.], a remarkable circumstance considering the almost universal Sheivism of the aboriginal tribes of S. india. Near Rungasawmy's peak, and scattered about the slopes and base of the hills to the south and south-east, there are several Iroola mottas. These villages consist of seven or eight split bamboo [q.v.] huts plastered with mud, and generally built round a square. Patches of raggy [q.v.] and tinay [q.v.] surround them. Near their villages they have large gardens of plantain [q.v.] and lime [q.v.] trees, and cultivate the neighbouring ground in the Cautcaud [q.v.] fashion, changing the field every year. They attend the shandy [q.v.] held at Mettapolliem every week, carrying down jungle produce, such as timber, bamboos and game, &c., to exchange for tobacco [pogauk], salt [ooppoo], and cloths. A few mottas are scattered on the northern and western slopes of the hills, but their inhabitants lead a harder life from the severity of the monsoon [q.v.], and their isolated position. They seldom make any provision for the winter, but subsist on a crop of grain as long as it lasts, and trust for seed and what more they may require to the Badagas, with whom they barter wood, honey [shahad], bees' wax [mom], and other forest produce. They will only eat with Badagas [q.v.]. The Iroola temples of the Neilgherries are only circles of rough stones each enclosing an upright one, with iron tridents fixed in the ground. The poojarry [q.v.] or priest is an Iroolan, and he wears the Vishnoo mark on his forehead. Although the Badagas are for the most part Sheivite, they come in large numbers to these temples once a year about sowing time and make offerings of plantains, milk, &c., to the god. No animals are sacrificed. In a cave at Rungasawmy's peak there is earth regarded as holy, which is much valued by worshippers. The neighbours below the ghauts [q.v.] declare that they possess the power of taming tigers, and that Iroola women, when they go into the woods, leave their children to the care of a tiger [pooly]. Apart from the Neilgherries they are most numerous in North arcot, Chingleput, Salem and Coimbatore. They arrange themselves into two clans, the Oorauly and the Coorootauly, meaning rulers and serfs. See vol. I (35); vol. II, 109. Numbers about 36,000 [jauty].——*Iroolan* (இருளன் - irulan, Tam.). A minor deity in Ancaulamman's pagoda [q.v.].——*Iroombily* (இரும்பிலி - irumbili, *Tam.*). From (irumbu, tam. iron); from dark wood. Same as Neilgherry satinwood.

IRSAUL (ارسال - irsál, *Hind.*). From (rasala, ar. to send message). A remittance of anything, especially money. Irsaulnauma is a statement of money or goods remitted.

ISAY (இசை - isai, *Tam.*). Speech.——*Isaimadanday* (இசைமடந்தை - isaimadandai, Tam.). From (above + madandai, tam. woman.). Saraswaty [q.v.].

ISH (इष - ish, *San.*). To desire.——*Ichapore* (ఇచ్ఛాపురము - içchápuramu, Tel. ichápur*). From (içchá, san. desire + pura, san. town).—"*a*" Deputy tahsildarry; Ganjam district. Pay Rs. 100.—"*b*" Town, Head-quarters of Deputy tahsildar and Sub-registrar, Ganjam dist., Berhampore tal.; pop. 5,528; acres 3,716; lat. 19° 07′; long. 84° 44′; from Balligooda S.S.E. 88 miles; from Berhampore S.S.W. 16 miles; from Chetterpore S.W. 26 miles; from Chicacole N.E. 75 miles; from Madras N.N.E. 500 miles; from Russellcondah S.S.E. 56 miles; from the sea W. 6 miles by short cut. On high road between Berhampore and Chicacole, 6 miles N.E. of Bodagherry hills. The Bauhoodah passes near the town and is spanned by a bridge. During Mussalman occupation of Northern circars [q.v.] from 1560 to 1753, Ichapore was head-quarters of a naib [q.v.]. In 1768 attached to Ganjam. Mosque [musjid] with Persian inscription [shausanam], built by Nawaub mowlvy moostafah about 200 years ago in the suburb of Laulapett. Betel [q.v.] gardens in the neighbourhood. Trig. station in lat. 19° 06′ 15·40″; long. 84° 43′ 04·50″; from Ichapore W. 1¾ miles; from Berhampore S.S.W. 15 miles; from the sea W. 7 miles.——*Ishta devatay* (इष्टदेवता - ishtadévatá, San.). From (ishta, san. favorite + dévatá, san. deity). The patron god selected by any individual.——*Ishtam* (इष्ट - ishta, San.). Desire.

ISHAH (عشا - ishá, *Hind.*). From (ashi, ar. the time of night-fall). Twilight; so prayers [namauz] said at that time.

ISHARMOOL (अर्कमूल - arkamúla, *San.*; सापसंद - sápasanda, *Mahr.*; साप्सिकड्डल - sápsikaddúla, *Conc.*; زراوند - zaráwand, *Ar.* and *Pers.*; اشرمول - isharmúl, *Hind.* and *Dec.*; ಈಶ್ವರೀಬೇರು - íshvaríbéru, *Can.*; ಇಸರಬೇರ್ - isarabér, *Too.*; గోవెల - góvela, *Tel.*; കരൽവേകം - karalvékam, *Mal.*; සක්සඳ - saksanda, *Singh.*; பெருமருந்து - perumarundu, *Tam.*). Title from hindostany. San. from (arka, san. calotropis gigantea, r. br. + múla, san. root). Hind. from (íshvara, san. shiva, the lord + múla, san. root); as an antidote to snake poison. Can. from (íshvarí, san. goddess + béru, can. root). Mal. from (garala, san. poison + véka, mal. to burn); antidote to snake poison. Tam. from (perumai, tam. greatness + marundu, tam. medicine). San. also (sunandá), meaning very + happy plant; (ahigandhá), meaning serpent + smell; (íshvara), meaning protector; (íshvarí); (hari), meaning destroyer. Hind. also (isarbel), meaning lord's creeper; (isharvayal). Can. also (íshvarabéru), meaning god + root. Tel. also (errakalabanda), meaning red + aloe, aloe vulgaris, lam.; (dúlagóvela), meaning itching + the plant. Mal. also (perumarunnu), meaning great medicine; (íshvaramulla), by corr.; (perumkizhannu), meaning big root; (karalékam); (karukappullu), meaning rough grass; (íshvaramúli), meaning divine root. Singh. also (sapsanda). Tam. also (talaiççuruli), meaning head + to curl; (ísuravér), meaning lord + root; (garudakkodi), meaning braminy kite + creeper; (perungizhangu), meaning great + esculent root; (ísura), meaning lord; (íççuramúli), meaning lord root. Title otherwise Braminy kite creeper, Eeshwaran's root, Great medicine, Indian birth wort, Mudar root plant, Raiz de Cobra, Serpent root plant. Botanically Aristolochia [eeshwaram] indica, linn., aristolochiaceæ [vricsham, 117]. Small, shrubby, perennial, twining; leaves stalked, wedge-shaped or obovate three-nerved, pointed, waved; calyx tubular, nearly globose at the base; racemes axillary, shorter than the leaves; flowers erect; corolla purplish; capsule roundish, hexagonal, six-celled, pendulous; seeds numerous; grows in hedges; flowers in rainy season. The drug as sold in the shops consists of the root and stem, the latter in by far the larger proportion; in many parcels the stem only is to be found; it is either in short pieces, or the whole stem may be twisted into a kind of circular bundle; the thickest portion of the stem is $\frac{1}{4}$-$\frac{1}{2}$ an inch or more in diameter, and has a central woody column made up of about ten wedge shaped portions; the bark is thick and corky, marked with longitudinal ridges and numerous small warty projections, it is of a yellowish-brown color, the taste is bitter and camphoraceous, and the odour aromatic and agreeable. Root, leaves, stalks and bark are bitter. Root medicinally stimulant, tonic, emmenagogue, antiperiodic, and antidote to the bites of snakes, &c., internally and externally; expressed juice of leaves the same.

ISHAUK (اسحاق - ishák, *Hind.*). From hebrew meaning laughter. Isaac. Common Mahomedan alam; as Mahomed ishauk, double alam [ism].

ISKAPULLY (ఇసకపల్లె - iskapalle,* *Tel.*). From (isaka, tel. sand + palle, tel. village). On Buckingham canal [q.v.]. Village, Port, Salt factory, Head-quarters of Salt and Abkarry inspector and Sea custom assistant superintendent; Nellore dist., Nellore tal.; pop. 3,127; acres 6,259; lat. 14° 44′; long. 80° 09′; from Madras N. 112 miles; from Nellore N.N.E. 21 miles; from Ponnapoody N. 5 miles; from Zoovvaldinney S. 6 miles. Grain and other produce are largely exported. Frequented by large sailing vessels and occasionally by steamers. Anchorage good. The bar of the salt-water channel in the middle of the port has been closed since 1863. Formerly a very large trade in salt [ooppoo]. Granaries on the beach. Bungalow [q.v.] for captains of ships.

ISKH (عشق - iskh, *Hind.*). Love.——*Ishk allah* (عشق الله - ishkalláh, Hind.). From (above + alláh, ar. god). Form of salutation amongst fakeers [q.v.].

ISLAM (اسلام - islám, *Hind.*). From (salama, ar. submission) [salaam]. Submission to the will of God, the Mahomedan religion. Divided into imaun [q.v.] or faith, and deen [q.v.] or practice. The principal tenets of imaun are that there is only one God; that Mahomet is his last and greatest prophet; that there is a paradise [bheest] for the faithful and a hell [dozak] for the ungodly. Adam, Noah, Abraham, Moses, and Jesus are recognized as prophets who introduced in succession new laws and revelations, till all were finally superseded by those of Mahomet. The deen is of five kinds:—to learn the Kalima [q.v.] and repeat it; to pray [namauz] five times a day; to fast [roza] in the month of Ramzaun [maheena]; to give five per cent. of income to charity [zakaut] if wealthy; to go on a pilgrimage [haj] to Mecca, if wealthy.

ISM (اسم - ism, *Ar.*). The composition of Mahomedan proper names, of which the alam [q.v.] or name given at birth forms the basis, has been explained at vol. I (104), footnote. The names appear practically in one or other of the following different forms:—"*a*" A single and simple alam or personal name; as Ahmed.—"*b*" Two of these, or even three, strung together; as Ahmed ally, Ally moosey razah.—"*c*" Lacab or title name, the commonest kind of which are so familiar that they stand for alams, even at birth; as Abd oollah, Shums ood deen, Bahaudur.—"*d*" An alam + a lacab; as Ibrahim siddeeky.—"*e*" An alam + an alaumat or tribal title prefixed or suffixed; as Ally khan.—"*f*" An alam + a coonyat or genealogical surname; as Abool abbaus ahmed. This Arabic style of nomenclature is not in fashion here.—"*g*" An alam + an ism oon nisbat, or functional title; as Cauzy shahaub ood deen; Agha baukir sheerauzy.—"*h*" A takhalloos or name taken for insertion in poetry; as Haufiz, Saady. See all the above heads in this glossary; see also Khitaub and Oorf.——*Ismdar* (اسم دار - ismdár, Hind.). From (above + dár, hind. holder). Permanent office holder.——*Ism oon nisbat* (اسم النسبت - ismunnisbat, Hind.). From (above + nisbat, ar. relation). Names of relation showing origin, quality, functions, &c., not unlike the agnomen of the Latins.——*Ismwar* (اسمواری - ismwárí, Hind.). From (above + distributive suffix). According to the order of names.

ISMAIL (اسماعیل - ismáíl, *Hind.*). From hebrew meaning heard of god. Ismail who according to Mahomedans was the sacrifice to god and not Isaac as Christians believe. Mahomedan alam; as Syed ismail, alaumat + alam [ism].——*Ismailia* (اسماعیلیہ - ismáíliya, Hind.). From (ismáíl, ar. name of son of sixth imaum). A sub-sect of shiahs [q.v.] who acknowledge only seven imaums [q.v.] ending with ismail. Represented in southern india by Khojas [q.v.] and Bohrahs [q.v.]. All the secret societies of Europe, religious and secular, owe their origin to this sect from whom the crusaders borrowed. Hasan bin sabah otherwise Sheikh ool jabal or the Old man of the mountain was the Grand master of this sect, known in Europe as the Assassins.

ISMAUTHY (عصمتی - ismatí, *Hind.*). From (asima, ar. to guard from sin). Chaste. Ismauthy sanyausy was title of Beschi [veeramaumoony].

ISPAGHUL (اسپغول - isbaghol, *Pers.*). Same as Spogel.

ISRAFEEL (اسرافیل - isráfíl, *Hind.*). The angel [ferishtah] who, according to Mahomedan belief, presides over the wind and will sound the last trumpet at the day of resurrection [izraeel].

ISTIAR (اشتہار - ishtihár, *Hind.*). From (shahara, ar. to publish). Act of publication. Istiar nauma is a proclamation.

ISTIFAH (استعفا - istifá, *Hind.*). From (afu, ar. to be absolved). Relinquishing a charge or land, &c.

ISTIKRAUR (استقرار - istikrár, *Hind.*). From (karra, ar. to rest) [caraur, ikrar]. Confirmation.

ISTIMRAR (استمرار - ístimrár, *Hind.*). From (murur, ar. to continue). Permanent. Istimrar graumam is village permanently settled.

ISTREE (استری - istarí, *Hind.*). Smoothing iron. So plain longcloth. Istree wallah is a cloth-ironer associated with the Dhoby [q.v.].

ISVY (عیسوی - ísví, *Hind.*). From (ísá, ar. jesus christ). The Christian era.

ITCHY (இச்சி - iç// çí, *Tam.*). Same as Tsiela.

ITI (इति - iti, *San.*). Thus, so.——*Itihausam* (इतिहास - itihása, San.). From (above + há, san. indeed + ása, san. it was). Tradition or history [smrity]. The two great Itihausams are Ramayanam [q.v.] and Mahabhaurat [q.v.].——*Ityeh* (इत्येक - ityéka, San.). From (above + éka, san. one). Two syllables added to the name of a lunar [chaundramaunam] month [mausam] when it is an intercalary one [adhicam].

ITIBAR (اعتبار - itibár, *Ar.*). From (ibr, ar. to regard) [ibrat]. Faithful. Part of lacab; as Itibar ood dowlah, faithful to the state [ism].

ITIKAUF (اعتکاف - itikáf, *Hind.*). From (akafa, ar. to restrain oneself). Restraining one's senses. Especially spending the month Ramzaun [maheena] in a mosque [musjid] engaged in prayer [namauz] and meditation.

ITISHAUM (احتشام - ihtishám, *Ar.*). From (hashama, ar. to feel ashamed). Glory. Part of lacab; as Itishaum ood dowla, glory of the empire [ism].

ITTY (ഇത്തി - itti, *Mal.*). From (iru, mal. to shed); from milk. The waved-leaved fig tree, ficus infectoria, willd. [stone banyan].——*Itticara* (ഇത്തിക്കര - ittikkara, Mal.). From (above + kara, mal. village).—"*a*" River; Travancore state, Quilon division, Cottaura cara and Quilon tals. Rises from the low hills above Maunore. Course is variable though generally a little to the south or west. Flows through the Paroor lake into the sea. Length 30 miles. Its banks rise boldly from the bed which is generally rocky. It is interrupted by a small cataract in its course. It is a shallow stream not navigable even for floats

except in the rainy season. Also called Bhawaunipooram.—"b" Village; Travancore state, Quilon division, Quilon talook. Inhabited solely by Nayars of cowherd and shepherd castes. Large Mangalore tiles [wode] are manufactured here. Soil is clayey.

ITWAR (اتوار - itwár, *Hind.*). From (ádityavára, san. sunday). Sunday [shamba]. On this day the angels, especially those supporting the throne of God, were created.

IVICA (അഴിമുഖം - azhimukham, *Mal.*). From (azhi, mal. harbour + mukha, san. mouth) [aye]. Portuguese corruption.—"a" Village, Port; Travancore state, Quilon division, Quilon talook; lat. 8° 57′ N., long. 76° 37′ E.; from Bombay S.S.E. 725 miles; from Cauyancollam S. 16 miles; from Quilon N.N.W. 5 miles; from Trivandrum N.W. 41 miles; from Tungacherry N. 4 miles. On the sea-coast, at the mouth of the river of the same name. Large ships must anchor in the open sea, in six or seven fathoms of water, 3 miles off shore. Formerly with export trade in timber, pepper [q.v.], ginger [q.v.], cardamom [q.v.], lac [q.v.] and turmeric [country saffron]; but now superseded by Quilon.—"b" River; Travancore state, Quilon division, Quilon talook. Estuary by which the back-water communicates with the sea, but shallow, bar. The bar of the same name is the boundary between the Quilon and Caroonaugapully talooks.

IVORY SEED (दन्ति - danti, *San.*). Same as Jamalgota.

IXORA (बन्धूक - bandhúka, *San.*). Title from (íshvarí, san. párvatí, the deity); flower sacred to her. San. from (bandh, san. to bind); from compact corymbs. Jungle geranium. Wild jasmine of W. indies. Botanically the Ixora genus, rubiaceæ [vricsham, 71]. Shrubs or small trees; leaves opposite; flowers, handsome; scarlet, pink or white in colour; fruit succulent. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are :—acuminata, barbata, brachiata, lanceolaria, nigricans, notoniana, polyantha, wallichii.——*Jungle geranium* (बन्धूक - bandhúka, San.; पट्कली - patkalí, Conc.; ಕೇಪಲ - képala, Can.; ಕೇಪುಲದೈ - képuladai, Too.; మన్మథబాణము - manmat'habánamu, Tel.; തെച്ചി - teççi, Mal.; රතඹලා - ratambalá, Singh.; வெட்சி - vedchi, Tam.). San. from (bandh, san. to bind), from compact corymbs [mankena]. Tel. from (manmat'ha, san. cupid + bána, san. arrow [arabian jasmine]. Mal. means red, from bright red flowers. Tam. from (vel, tam. to conquer), flowers made conqueror's wreaths in old days. San. also (bhandhujívaka), meaning group + growing; (raktaka), meaning red [mankena]; (pátalí), meaning red one [common bendy, edible paulay, pauthiry, weaver's beam]. Can. also (kisgáragida), meaning red + plant. Tel. also (mankena) [q.v.]. Mal. also (chetti), meaning red; (chekki), meaning red. Singh. also (ratmal), meaning red + flower. Tam. also (shetti); (vetti), meaning victory; from flowers forming a chaplet of victory. Title otherwise Cupid's arrow, Flame of the woods, Scarlet ixora. Botanically Ixora [ixora] coccinea, linn., rubiaceæ [vricsham, 71]. Alias Ixora bhanduca, grandiflora, obovata, propinqua. Bhanduca from sanscrit. Glabrous shrub, 3-4 feet; leaves nearly sessile, oval or oblong or cuneate-obovate, acute or acuminated, mucronate; corymb nearly sessile, thin; calycine lobes acute, connivent in fruit; segments of the corolla ovate-lanceolate or elliptical, acute; style shortly exserted; berry size of a large pea [calauyam], purple when ripe; flowers bright scarlet, in large compact corymbs, nearly always in blossom, but in perfection during rains; without odour; abundant in jungles of western coast near sea. Flower offered to both shiva [q.v.] and vishnoo [q.v.]. Root branched, ½ inch or more in diameter; bark thick, smooth, brown, marked with small warty prominences, it exudes a yellow juice when cut; wood hard, yellowish, odour rancid and disagreeable, porous with strongly marked medullary rays.——*Large jungle geranium* (रायकुरा - ráyakurá, Mahr.; مشعل کا جهار - mashalkájhár, Hind.; ಗೊರವಿಮರ - goravimara, Can.; ಗೊರಿವಿ - gorivi, Coorg; కొరవిపాల - koravipála, Tel.; ତେଲ୍ଲକୁରବାନ - tellakurvan, Oor.; මහරතඹලා - maharatambalá, Singh.; சுளுந்து - shulundu, Tam.). Hind. from (mashal, hind. torch + jhár, hind. tree). Tel. from (koravi, tel. fire-brand + pála, tel. the milky tree). Singh. from (maha, singh. great + ratambalá, singh. ixora coccinea, linn.). Tam. from (shúl, tam. torch). Mahr. also (lókhandí), meaning iron-like [pappily]. Can. also (hennagorivi), means a long variety; (korgi). Tel. also (puttapála), meaning ant-hill + the tree so called; (teddapála); (kommachettu), meaning branch + tree. Tam. also (kórán); (vellaivedchi), meaning white + jungle geranium; from flowers. Title otherwise Masaul tree, Torch tree. Botanically Ixora [ixora] parviflora, vahl., rubiaceæ [vricsham, 71]. Alias Ixora alba, arborea, decipiens, pavetta; Webera corymbosa. Pavetta from (pávatta, mal. pavetta indica, linn.). Small tree; leaves from linear-oblong to cuneate-obovate, bluntish or short-pointed, coriaceous and hard, shining; stipules with a long subulate point; corymbs or panicles terminal, trichotomous, sessile or peduncled, often with leafy bracts subtending the primary branches; clayx with four small teeth; lobes of the corolla oblong-linear, obtuse, reflexed, forming an oval head during æstivation; style exserted; divisions of the stigma oblong, erect; berry somewhat didymous; flowers very small, numerous white or pink, fragrant; flowering in march and april. Flowers pounded in milk, are given for whooping cough, and at the same time a necklace of the flowers is worn; often planted in gardens, and is ornamental; boughs of the green wood make torches; wood light-brown, smooth, very hard, close-grained; no heart-wood; makes excellent firewood.——*Pink jungle geranium* (சிவப்புவெட்சி - shivappuvedchi, Tam.). Tam. from (shiva, tam. to redden + vedchi, tam. ixora coccinea, linn.). Title otherwise Pink ixora. Botanically Ixora [ixora] stricta, roxb., rubiaceæ [vricsham, 71]. Alias Ixora rosea. Shrub; leaves almost sessile, oblong, acute, contracted at the base and somewhat emarginate, rather downy on the nerves beneath as well as on the branchlets; corymbs terminal, decompound, lax; calycine lobes acute, somewhat ciliated; lobes of the corolla oblong-cuneate, acute; stigma exserted; flowers a pale pink, gradually becomming as they grow old a scarlet-salmon; flowering nearly all the year.——*White jungle geranium* (కోవెలచెట్టు - kóvilechettu, Tel.). Tel. from (kóvela, tel. temple + chettu, tel. tree). Title otherwise White ixora Botanically Ixora [ixora] undulata, r., rubiaceæ [vricsham, 71]. Large ramous shrub; leaves broadly-lanceolate, much waved on the margin; corymbs trichotomous, decompound, open; branches pubescent; calycine-segments short-lanceolate, acute; lobes of the corolla narrow-oblong, reflexed; filaments exserted; style scarcely exserted; divisions of the stigma recurved linear; berries transversely oval; flowers numerous, pure white, fragrant; flowering in march and april.

IYAL (இயல் - iyal, *Tam.*). Natural tamul whether common or poetic, as distinguished from Isay tamul or tamul adapted to music and Nautaca tamul or dramatic tamul; in both of which latter various changes occur in combination, construction, &c. See vol. I (52).

IYAUR (عیار - iyár, *Hind.*). Touch-stone.——*Iyaur e daunish* (عیاردانش - iyáridánish, Hind.). From (above + dánish, pers. wisdom). Persian version of the Punchatantram [q.v.].

IYEN (ஐயன் - aiyyan, *Tam.*). From (ai, tam. lord + an, tam. personal termination) [ayen]. Title [peyar] assumed by Smarta [q.v.] and other bramins [q.v.], and by the Sautauny [q.v.]; also adopted by Christian missionaries. Corresponds to Iyengar among Veishnava bramins. In vocative, ayyah, used by a woman to attract her husband's attention, no Hindoo woman ever allowing herself to pronounce her husband's name. Plural form is Iyer [q.v.] and honorific double plural is Iyengar.——*Iyacunn* (ஐய்யாக்கண்ணு - aiyyákkannu, Tam.). From (above + kan, tam. eye); as dear as the master's eye. Cf. Sawimicunn. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Iyah* (అయ్య - ayya, Tel.). Same as Iyen in Tamul.——*Iyaloo* (అయ్యలు - ayyalu, Tel.). Plural form of iyah. Non-bramin second name. Common among Balijes [balije peyar].——*Iyempolliem* (ஐயம்பாளையம் - aiyambálaiyam, Tam.). From (above + pálaiyam, tam. fortified village).—"a" Cunnivaudy zameen village, Madura dist., Dindigul tal.; pop. 13,544; lat. 10° 13′; long. 77° 48′; from Dindigul S.W. 18 miles; from Madura N.W. 32 miles. The village is surrounded in the north and west by hills. The northern hill is a small one covered with thorny shrubs. The western hill is largely cultivated with coffee [q.v.], cardamoms [q.v.] and plantain [q.v.]. Coffee and cardamoms are its staple crops and exported.—"b" River; Madura district, Dindigul talook. Rises in the Aroongaunal hills. Flows by Tondicoody, when it receives the name of Periyaur. It then winds S. by E., and rushing down the mountains at the head of the Iyempolliem valley is joined by the Shootaur stream. Passing by Poonnacaud, it winds E. by S. in a deep forest to the hamlet of Shadamooppanputty. It passes through an open valley, the banks low, and bed sandy, where it is fringed with cocoanut [q.v.] and mango [q.v.] groves near Iyempolliem. Here a dam crosses it. Thence it runs S.S.E. winding much, with steep banks, through dry cultivation to Iyencottah and Vadiputty. It crosses the high roads N.E. and E. of Batlagoondoo, and passing Tottayan cottay, joins the Veigay river, having a course of twenty-two and a half miles.——*Iyengar* (ஐய்யங்கார் - aiyyangár, Tam.). From (aiyyan, tam. father). Special honorific or double plural of Iyen. Title added to names of Bramins, especially those of the Shreeveishnava [q.v.] or Ramaunoojeeya [q.v.] order. Hindoo 3rd name [peyar].——*Iyer* (ஐய்யர் - aiyyar, Tam.). Honorific plural of Iyen [q.v.].

IZAUFA (اضافہ - izáfah, *Hind.*). From (zaifa, ar. to incline); adjunct. Additional charge imposed on areas in inam [q.v.] lands which are found to be in excess of what they were intended to be.

IZAUR (ازار - izár, *Hind.*). From (ízar, ar. to cover). Long drawers [pyjauma], worn by Mahomedans [sharayee].

IZRAEEL (عزرائیل - izráíl, *Hind.*). The angel of death amongst Mahomedans [israfeel].

IZZAT (عزت - izzat, *Hind.*). From (izza, ar. to value). Respect.——*Izzat asaur* (عزت آثار - izzatásár, Hind.). From (above + ásár, ar. signs). Greeting. A salutation used at the beginning of letters to subordinates of a higher grade.

J (ज - ja, *San.*; ج - jím, *Hind.*). San. a sign of Vishnoo [q.v.]. Hind. in arithmetic 3; represents Tuesday in almanac [punchaungam], the second day of the week [vauram] and Cancer [carcatacam, sartaun] in astronomy [jyotisham], and is also the contraction of the 6th Mahomedan month [maheena].

JABR (جبر - jabr, *Hind.*). From (jabora, ar. to compel). Doctrine of compulsion held by a few who assert that man has no power and is like the feather suspended in the air with respect to his actions [takdeer].——*Jabbaur* (جبار - jabbár, Hind.). From (jabara, ar. to compel). Superior, overbearing. As attribute of God means unattainable, compeller [allah]. Common Mahomedan alam; as Jabbaur khan, alam + pataun alaumat [ism].

JACK (ചക്ക - chakka, *Mal.*). Title through portuguese. Mal. from (chakra, san. round); from fruit. Title otherwise Bread-fruit. Botanically the Artocarpus genus, artocarpaceæ [vricsham, 122]. Evergreen trees; leaves often very large, alternate, leathery, entire or pinnately lobed; flowers densely crowded on globose or oblong solitary axillary receptacles; fruit a large fleshy oblong cylindric globose or lobed receptacle, clothed with the greatly enlarged fleshy perianths and carpels which have hardened spinous or truncate or pyramidal or plane tips. The species best known to the natives are shown below. Term Jack includes also species from the genera ananas, anona, averrhoa, cinnamomum, epica rpurus, garcinia, morinda and stephegyne, from their having round fruits.——*Acid jack* (പുളിഞ്ചക്ക - puliñ-chakka, Mal.). From acid round fruit. Same as Ceylon gamboge.——*Black jack* (കരിച്ചക്ക - kariççakka, Mal.). Title from round fruit which turns black when dry. Same as Blimbing.——*Common jack* (पनस - panasa, San.; फणस - p'hanasa, Mahr.; पणसु - panasu, Conc.; کٹهل - kathal, Hind.; پهنس کا جهار - phanaskájhár, Dec.; نڠك - nangka, Malay; ಹಲಸು - halasu, Can.; ಪೆಲ - pela, Too.; పనస - panasa, Tel.; ପଣସ - ponoso, Oor.; പിലാവു - pilávu, Mal.; කොස් - kós, Singh.; பலா - palá, Tam.). San. from (pan, san. to praise); good fruiting. Dec. from (panasa, san. jack fruit + jhár, hind. tree). Tel. from sanscrit. Mal. from sanscrit. San. also (skandhap'hala), meaning stem + fruit; from fruit issuing from trunk; (kantakip'hala), meaning thorn + fruit; (pashumustá), meaning cow + the grass, cyperus rotundus, linn. Hind. also (chakká). Malay also (támbul), meaning big + jack tree. Can. also (kuvi); (jakamara). Tel. also (vérupanasa), meaning root + jack tree; from fruiting about roots. Mal. also (chakka), cor. of (chakra), meaning round; (varikka), meaning superior fruit. Singh. also (waela). Tam. also (palásam), meaning green, greenish even when ripe; (chírá); (pilá); (vérppila), meaning root + jack tree; from fruiting about roots. Title otherwise Bread-fruit, Bread nut, Chaqui, Hanas, Honey jack, Indian jack, Jaca, Root jack, Trunk fruit, Varaka. Botanically Artocarpus [jack] integrifolia, willd., artocarpaceæ [vricsham, 122]. Alias Artocarpus integrifolius, jaca, heterophylla; Polyphema jaca; Rademachia integra; Sitodium cauliflorum. Jaca from malayalam. Large tree with dense dome of deep dark foliage; young branches hirsute; leaves alternate, petiolate, ovate-oblong, glabrous, pale below and hirsute with stiff hairs; minute flowers male and female on the same branch; peduncle pendulous, arising from the trunk or branches; flower greenish or the male white; amentum of male flowers cylindrical; calyx none; petals two; fruit ovate, muricated. Fruit is produced from the stem and larger branches, and often forms a part of the stem that is covered with earth; it is one of the largest in existence, 12 to 18 inches in length and 6 to 8 inches in diameter, unattractive-looking object; interior of a soft fibrous consistency, with edible portions scattered here and there, possessing rich spicy scent and flavor of the melon [carcauroo]; seeds size and form of a large broad bean; fruit ripens during the rains; kernels contain much oil; gives dark looking true gum [gond], with a resinous fracture. Friar jordanus, the quilon bishop of the fourteenth century, has the following:—"there be always fruits and flowers there, "divers trees, and fruits of divers kinds; for example there "are some trees which bear very big fruit, called chaqui; and "the fruit is of such size that one is enough for five persons; "there is another tree which has fruit like that just named, "and it is called bloqui, quite as big and as sweet, but not of "the same species; these fruits never grow upon the twigs, "for these are not able to bear their weight, but only from the "main branches, and even from the trunk of the tree itself, "down to the very roots;" bloqui is a corruption of varika. In cultivating the jack, red laterite [q.v.] soil near hill sides is most suitable; ground prepared on w. coast in maidom or april and yedavam [mausam] or may, by hand-hoeing, weeding, and pitting; seed first sown in nursery in baskets or bamboo [q.v.] joints filled with soil; when the seedlings are two feet high, transplanted into the pits; watered and manured in south, not necessary on w. coast; yields fruit five years after transplantation; fruit plucked by climbing trees; average price in the south four annas per fruit, on w. coast two annas. Agastyan [q.v.] says that fruit increases secretion of bile [pittam], and in excess produces dyspepsia. Leaves are given to goats [velland] and cattle [maud], very fattening; fruit when unripe cut into small pieces and cooked in curry [q.v.] with shrimps [iraul]; seeds of ripe fruit, when roasted in hot ashes, resemble spanish chestnuts in taste and are eaten by poor. Tree good for avenues [shaulay]; tenacious white juice from fruit makes a good bird-lime and cement [pattoo]; bark yields a fibre [naur]; wood, or its saw-dust, yields on decoction a yellow dye [shauyam], fixed with alum [padicauram] and intensified by turmeric [country saffron]. Wood is like mahogany and makes excellent furniture; heartwood yellow or rich yellowish-brown, darkening on exposure, compact, even-grained, moderately hard, seasons well and takes a fine polish, does not bear great alternations of dryness and moisture.——*Foreign jack* (दींविकडिगि - dívikadigi, Conc.; نڠك - nangka, Malay; ದ್ವೀಪಹಲಸು - dívihalasu, Can.; ದೀವುದಗುಜ್ಜೆ - dívudagujje, Too.; വിലാത്തിപ്പിലാവു - viláttippilávu, Mal.; රටදෙල් - ratadel, Singh.; ஈரப்பலா - írappalá, Tam.). Title as brought into ceylon from maldives and south sea islands. Can. from (dívu, can. island + halasu, can. jack tree, artocarpus integrifolia, willd.). Too. from (dívu, too. island + gujje, too. jack fruit). Mal. from (vilátti, mal. europe + pilávu, mal. artocarpus integrifolia, willd.). Singh. from (rata, singh. foreign + del, singh. bread fruit). Tam. from (íram, tam. moisture + palá, tam. jack tree). Mal. also (dvípupilávu), meaning island + jack tree. Tam. also (vázhaikkáy), meaning plantain fruit, musa paradisiaca, linn., common in ceylon; (shímaippalá), meaning foreign + jack tree; (ásini). Title otherwise Ratadel, South sea jack. Botanically Artocarpus [jack] incisa, linn. f., artocarpaceæ [vricsham, 122]. Alias Artocarpus communis; Rademachia incisa. A tree of slow growth; common in cultivated state on the west coast. Fruit is oval, size of a large melon [carcauroo], in general appearance much resembles common jack-fruit; perfectly scentless; without seeds; is composed of carpels agglomerated on a fleshy receptacle; is gathered before it is perfectly ripe, when it consists of a white and farinaceous flesh produced by the united calyces, and is sliced, slightly baked on cinders, and eaten like bread when it resembles the crumb of a new loaf. The stem yields ratadel gum [gond]. A variety of the tree produces fruit containing seed. Foreign jack is the malayalam term for Netted anona [q.v.] and the canarese term for Ananas [q.v.].——*Honey jack* (میٹها پهنس - míthaphanas, Hind.). Same as Common jack.——*Large jack* (ಹೆಬ್ಬಲಸು - hebbalasu, Can.). Same as Wild jack.——*Monkey jack* (लकुच - lakucha, San.; ओंड - omda, Mahr.; بڑهل - barhal, Hind.; لکوچا - lakúchá, Dec.; ಓಟೆಹುಳಿ - ótehuli, Can.; కమ్మరేగు - kammarégu, Tel.; එතේරලිය - etheraliya, Singh.). Title from inferior fruit. San. from (lak, san. to taste). Dec. from sanscrit. Tel. from (kamma, tel. delicious + régu, tel. jujube tree, zizyphus jujuba, lamk.). San. also (dahu), meaning burning. Tel. also (nakkarénu), meaning fox + zizyphus jujuba, lamk. Title otherwise Lakoocha, Small jack. Botanically Artocarpus [jack] lakoocha, roxb., artocarpaceæ [vricsham, 122]. Specific name from sanscrit. Leaves oval, entire, pointed, smooth above, downy beneath; catkins axillary, male subsessile, female short-peduncled, globular; fruit with a smooth surface, of an irregular roundish form, yellow when ripe. Very large tree, flower minute, internally rose-colored; ill-shapen fruit, size of orange [q.v.], smoothish rind, color of dirty wash leather. Fruit eaten; male spadix acid, astringent, eaten in curries [q.v.]. Whole tree and unripe fruit contain much tenacious, milky juice; stem gives a gum [gond]; root yields a yellow dye [shauyam]. Sapwood large, white, soft, perishable; heartwood yellow, hard; seasons well, takes a good polish; used for furniture and canoes.——*Red jack* (செம்பிலா - shembilá, Tam.). Same as Country cinnamon.——*Sea jack* (കടപ്പിലാവു - katappilávu, Mal.). Same as Dyeing mulberry.——*Small jack* (குட்டிப்பிலா - kuttippilá, Tam.). Same as Indian nettle.——*Sour jack* (புளிப்பலா - pulippalá, Tam.). Same as Prickly anona and Country cinnamon.——*Stunted jack* (शाखोटक - shákhótaka, San.; سيورا - seurá, Hind.; نکچهلنی - nakchhilní, Dec.; ಮಿಟ್ಲಿಮರ - mitlimara, Can.; సుక్కలిచెట్టు - tsukkalichettu, Tel.; തിണ്ടപ്പരുവ - tíndapparuva, Mal.; ගටනිටුල් - gatanitul, Singh.; குட்டிப்பிலா - kuttippilá, Tam.). Title from appearance. San. from (shákha, san. branch + ótan, san. suffix showing spreading). Mal. from (tíndu, mal. to pollute + paruva, mal. creeper). Tam. from (kuttai, tam. dwarf + pilá, tam. jack tree, artocarpus integrifolia, willd.) [indian nettle]. San. also (pisháchadru), meaning demon tree, the haunt of demons. Hind. also (rúsa) [ibbarancoosha, roussa grass]. Can. also (timli). Tel. also (barinika); (barivenka); (barranki); (pakki) [mannajhow]. Tam. also (piráy). Title otherwise Cootty pilah, Demon tree, Pirye, Rough-leaved ramoon, Siamese paper. Botanically Epicarpurus orientalis, bl., moraceæ [vricsham, 121]. Alias Streblus aspera; Trophis aspera. Tree; leaves alternate, short-petioled, obovate, cuspidate, acuminate, serrated towards the apex, very rough above; male flowers capitate, heads axillary, aggregated, short-peduncled; females axillary, one to two together, longish-pedicelled; fruit drupaceous, deep yellow, one-seeded; cotyledons very unequal-sided; flowers small, greenish yellow; a small, rigid, stunted-looking tree; common. Milky juice applied to cracked heels and sore hands; astringent and septic bark in decoction used as a lotion in fevers. Berries eaten by birds; good for hedges; coppices

well; twigs are used as tooth-brushes, and the rough leaves to polish wood and ivory [dant]; a fibre [naur] from the stem. Wood white, moderately hard, no heartwood, no annual rings; tough and elastic; sometimes used for cart-wheels.——*Wild jack* (पातफणस - pátap'hanasa, Mahr.; पाच्पणसा - páchpanasá, Conc.; پھنس - phanas, Hind.; ಹೆಬ್ಬಲಸು - hebbalasu, Can.; ಪೆಜ - peja, Too.; పనస - panasa, Tel.; അഞ്ഞിലി - áññali, Mal.; ආලුදෙල් - aludel, Singh.; அஞ்சலி - añjali, Tam.). Hind. means jack fruit. Can. from (hebbu, can. large + halasu, can. jack tree, artocarpus integrifolia, willd.). Singh. from (alu, singh. ashes + del, singh. wild bread fruit tree). Mahr. also (ránap'hanasa), meaning wild jack. Can. also (kádahalasu), meaning forest + jack tree. Mal. also (ayini); (áyini); (káttupilávu), meaning forest, artocarpus integrifolia, willd. Singh. also (del). Tam. also (akkinimaram); (áyini) [foreign jack]. Title otherwise Anjely, Jungle jack, Large jack. Botanically Artocarpus [jack] hirsuta, lamk., artocarpaceæ [vricsham, 122]. Alias artocarpus pubescens. Large tree; leaves elliptic, obtuse, or rounded at both ends, glabrous, hairy, especially on the nerves beneath; male catkin long, cylindrical, ascending, afterwards pendulous; females oval, size of a hen's egg; fruit globose, echinate, size of large orange [q.v.]; native of malabar forests. Fruit contains a pulpy substance surrounding seeds; also abounds in viscid juice, which flows from the rough rind if touched. The concreted juice forms a waxy, tough, light brown substance, which when melted is used as a cement [pattoo] to join broken earthenware and stoneware; in its simple state is used as bird-lime; the bark gives a brown dye [shauyam]. Wood is strong, tolerably close, evengrained, of a glossy texture, yellowish brown color; much in use for ship-building, house building, furniture, &c.; stands next to teak [q.v.] with ship-builders. Wild jack is in malayalam same as Water cadamba.

JACKAL (शृगाल - shrigála, *San.*; कोल - kólá, *Mahr*; شغال - shaghál, *Ar.* and *Pers.*; گیدڑ - gídar, *Hind.*; کولا - kolá, *Dec.*; چکل - chakal, *Malay*; ನರಿ - nari, *Can.*; ಕುಡಿಕೆ - kudike, *Too.*; నక్క - nakka, *Tel.*; ବିଲ୍ଲୁଅ - billuva, *Oor.*; കുറുക്കൻ - kurukkan, *Mal.*; නරියා - nariyá, *Singh.*; நரி - nari, *Tam.*). Title from persian. San. from (asrik, san. blood + lá, san. to take). Pers. from sanscrit. Dec. from mahratta. Mal. from (kuru, mal. small). Tam. means dim color. Ar. also (ibniává), meaning wolf's son. Hind. also (siyál), from sanscrit. Mal. also (nari). Canis [shwaunam] aureus, canidæ [cookooram], digitigrada, carnivora, mammalia [sastanam, 12], of naturalists [jantoo]. Alias Lupus aureus; Oxygoiis indicus; Sacalius indicus. Fur of a dusky yellowish or rufous gray, the hairs being mottled black, gray, and brown, with the under fur brownish yellow; lower parts yellowish gray; tail reddish brown, ending in a darkish tuft; more or less rufous on the muzzle and limbs; tail moderately hairy. The Bengal black variety is not known in the south of India. In the coffee tracts the jackal devours ripe coffee [q.v.] berries; the seeds pass through and are picked up; these are the best for germination. The jackal is easily run down by greyhounds, but gives sport with fox hounds; the fox [lomree] being too small for hunting. The call of the jackal is familiar. The natives assert that they cry after every watch [jaumam] of the night. Called in Europe the lion's provider and here an old jackal is in constant attendance on the tiger [pooly]. The horny substance which grows on the head of some jackals is of great reputed virtue, ensuring prosperity to its possessor. The jackal digs corpses out of shallow graves and devours them. The domestic dog [nye] is supposed to owe its origin to this species, as well as to the wolf [konye]. Pariah [q.v.] dogs which frequent the villages are like jackals, and the two species will interbreed. Jackals are eaten by poor shikarries [q.v.]. Their nasal bones are enclosed in amulets and used as a talisman. There is a Tamul proverb:—அல்லக்காட்டு நரி பல்லைக்காட்டுகிறதுபோல—"Showing his teeth like "a jackal of the ginger [q.v.] fields;". said of one who shows signs of disappointment. And another:—குழியிற் பிள்ளையை நரி சுற்றுகிறதுபோலே—"Like a jackal going "round the grave of a child."

JACKANAIRY (ಜಕ್ಕಲರೆ - jakkalare, *Can.*). From (jakkal, can. shrubby + arai, tam. rock). Village; Neilgherry dist., Paranginaud division; pop. 1,138; acres 11,479; lat. 11° 24′; long. 76° 55′; from Coonoor N.E. 7 miles; from Ootacamund E. 12 miles. On hill to W. of Kotagherry new ghaut [q.v.] road. Three miles to the W. is the noted Catherine waterfall [aroovy].

JACKATALLA (ಜಗತಾಳ - jagatálá *Can.*). From (jaggu, can. to sink + tala, can. place). Village, Valley; Neilgherry dist., Paranginaud division; pop. 1,105; acres 4,727; lat. 11° 23′; long. 76° 49′; from Coonoor N.W. 3 miles; from Ootacamund E. 5 miles. Badaga [q.v.] village inhabited by Belly caste. Wellington was till 1860 called after this village.

JADOW (جادو - jádo, *Hind.*). From (yadu, san. the king so called). A tribe which established itself about 1000 A.D. at Devagiry afterwards called by the Mahomedans Dowlatabad. Their crest was a golden kite [chillam, yaudava].

JADWAUR (جدوار - jadwár, *Ar.*; ماه پروین - máhparwín, *Pers.*; نربسی - nirbisí, *Hind.*). Ar. from (zadái, pers. purifying + wár, pers. great), great antidote. Pers. from (máh, pers. moon + parwin, pers. pleiades); from blossoming when pleiades [kritticay, sooreiyah] rise with the dawn, viz., at beginning of summer; cf. wild bachnaug. Hind. from (nir, san. not + bis, hind. poison). Hind. also (máfarfín), being pers. corruption. Greek ζέδοαρ. Generic terms for non-poisonous aconites [bish]; see particularly Atees and Wild bachnaug. For poisonous aconites see Bachnaug and Wolf strangler. Title has no connection with Zedoary [q.v.].

JAFFER (جعفر - jafar, *Ar.*). Yellow. Name of the cousin of Mahomet and of the sixth Imaum [q.v.]. Common alam; as Jaffer beg, alam + alaumat; Jaffer hoossain, double alam [ism]. Jaffery was the two-anna coin [naunyam] of Tippoo sultan.——*Jaffer goondy* (अम्लान - amlána, San.; आबोली - ábólí, Mahr.; گل مخمل - gulimakhmal, Pers. and Hind.; جعفری گنڈی - jafarígundí, Dec.; తెల్లపెద్దగోరంట - tellapeddagóranta, Tel.; വാടാമല്ലിക - vátámallika, Mal.; வாடாமல்லிகை - vádámalligai, Tam.). Title from deccany. San. from (a, san. negative prefix + mlai, san. to fade); ever fresh. Pers. from (gul, pers. flower + makhmal, pers. velvet), from its softness and appearance. Dec. from (jafarí, ar. yellow + gundí, hind. button), from color and shape of flower. Tel. from (tella, tel. white + pedda, tel. large + góranta, tel. nail-dye plant, lawsonia alba, lamk.). Mal. from (vátá, mal. not withering + malliká, mal. jasmine, jasminum sambac, ait.). Tam. means unfading jasmine. San. also (mahásahá), meaning enduring long; everlasting color. Hind. also (lálgul), meaning red flower. Tel. also (peddagóranta), meaning large + nail-dye plant. Tam. also (shivappuvádámalligai), meaning red variety; (vellaivádámalligai), meaning white variety. Title otherwise Batchelor's buttons, Everlasting jasmine, Globe amaranth, Immortal amaranth, Red globe everlasting, Velvet flower, Yellow buttons. Botanically Gomphrena globosa, linn., amarantaceæ [vricsham, 106]. Tall dichotomously branched annual; branches stout obscurely four-angled; leaves 2–4 inches, scaberulous, pale green; petiole 0–1 inch; heads 1–1½ inches diameter, peduncled, terminating the branches; bracts under the head ½–1 inch; flowers densely imbricate; branches ½–¾ inch, scarious, lanceolate, much longer than the perianth; sepals lanceolate, densely woolly, shorter than the staminal tube. Flower heads round of white crimson and yellow colors; ornamental annual. Another species is hispida.

JAGAM (జగము - jagamu, *Tel.*). From (gam, san. to go) [gaty, go, gungay]. World [jehaun].——*Jaconet* (जगन्नाथी - jagannát'hí, Mahr.). Title corruption from juggernant [q.v.], the city in orissa [q.v.]; from the cloth bearing impression of the idol [vigraham]. Thin cotton [q.v.] fabric between cambric and muslin [q.v.] used for dresses [sheelay], neckcloths, &c.——*Jagadeeshan* (சகதீசன் - shagathísan, Tam.). From (jagat, san. world + ísha, san. lord). Epithet of Shiva [q.v.], Vishnoo [q.v.] and Bramha [q.v.]. Hindoo 2nd or pers. name [peyar].——*Jaganaick* (జగన్నాయకుడు - jagannáyakudu, Tel.). From (above + náyaka, san. master). Hindoo 2nd or pers. name [peyar].——*Jaganautan* (சகந்நாதன் - shagannáthan, Tam.). From (above + nátha, san. lord). Epithet of Vishnoo. Hindoo 2nd or pers. name [juggernaut, peyar].——*Jagarauz* (జగరాజు - jagarádzu, Tel.). From (above + rádzu, tel. king). Hindoo 2nd or pers. name [peyar].——*Jagaroya* (జగరాయడు - jagaráyadu, Tel.). From (above + ráyadu, tel. king). Hindoo 2nd or pers. name [peyar].——*Jagat* (जगत् - jagat, San.). Uninflected form of Jagam. World. Jagatcurtah is the creator of the world. Jagatpaty is the lord of the world.——*Jangam* (जङ्गम - jangama, San.). From (gam, san. to go). Moveable, as of property. Name for the Lingayets [q.v.]. The image erected in the Sheiva temples being denominated Stauvara lingam [q.v.] or the stable image, Basava [q.v.] denominated this reliquary the Jangama lingam or locomotive image, a phrase borrowed from the vedas [q.v.], where it is used for living being [jeevam]. Hence he and his followers are denominated Jangams, or living images of the deity.——*Jangamrauzpully* (జంగమరాజుపల్లి - dzangamarádzupalli, Tel.). From (dzangamarádzu, tel. proper name + palli, tel. village). Village, Ghaut; Cuddapah dist., Budwail tal.; pop. 1,302; acres 11,062; lat. 14° 46′; long. 78° 56′; from Budwail W. 13 miles; from Cuddapah N. 20 miles. In a valley, well cultivated with dholl [common dholl], raggy [q.v.] and the castor-oil plant [aumanac]. Good hare [mosal] and partridge [teetar] shooting. Lead [eeyam] ore is found in the hills. In the village are the remains of an old fort. The ghaut [q.v.], west of the village, connects Budwail and Proddootore talooks, and passes across the Nullamullays.——*Jangaula* (జంగాల - dzangála, Tel.). Plural form of Jangam.——*Juggayapett* (జగ్గయ్యపేట - jaggayyapéta, Tel. jaggayapet*). From (jaggayya, tel. proper name + péta, tel. suburb). Tel. also (bétavólu), meaning offshoot of a mountain + town.—"*a*" Deputy tahsildarry, Kistna district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station; Kistna dist., Nundigauma tal.; pop. 9,717; acres 8,969; lat. 16° 53′; long. 80° 08′; from Bezwada N.W. 41 miles; from Guntoor N.N.W. 47 miles; from Madras N. 260 miles; from Masulipatam N.W. 83 miles; from

Nundigauma N.W. 15 miles; from Vinoocondah N.N.E. 61 miles. On the Masulipatam road, near Hyderabad border. Rajah Vasireddy vencataudry naidoo, who enclosed it with a wall, called it after his father. Contains Booddhist remains, probably the oldest in Southern india. The stoopam [q.v.], dating B.C., is 66 feet in diameter and has sculptured marbles [shalavay cull] all round. Several stone circles [azhauram] over ancient graves in the neighbourhood, in one of which was found the bones of a horse. Large pots were placed at the four points of the compass. The remains are in the Ashmolean museum at Oxford. Depôt for commerce between Northern circars [q.v.] and Nizam's dominions. Silk [puttoo] cloths are woven from thread brought from Central provinces. Trade in salt [ooppoo], conveyed hither by local merchants. Traders are chiefly Marwar settlers from Hyderabad. The chief staple is opium [aphainam]. Geologically of interest as the extreme north-eastern corner of the Cuddapah-Kurnool rock series, and as the supposed site of a great coal [nilakary] field.——*Juggernaut* (जगन्नाथ - jagnnát'ha, San.). From (jagat, san. world + nát'ha, san. lord). A form of Krishnan [q.v.]. Pooree, near Cuttack, is the chief seat of worship, where he is worshipped with his brother and sister Balabhadran and Soobhadray. At the annual car festival, the three idols [vigraham] are placed on cars [rath] and dragged from the temple to a country-temple a mile distant.

JAGGERY (गुड - guda, *San.*; گڑ - gur, *Hind.*; బెల్లము - bellamu, *Tel.*; ചക്കര - chakkara, *Mal*; வெல்லம் - vellam, *Tam.*). Title from malayalam. San. from (gud, san. to preserve) [good]. Hind. from sanscrit. Mal. from (sharkará, san. sugar) [sugar]. Coarse brown or almost black sugar [q.v.], made by boiling down over a slow fire the fresh sap of various palms [taur], borassus [palmyra], caryota [bastard sago palm], cocos [cocoanut], phœnix [kharjooram]; or of sugar-cane [aulay, sugar, sugar-cane]. In the latter case it is equivalent to molasses. The thick syrup is poured into half cocoanut shells, and there hardens into lumps. The boiling is generally done by the toddy-climber's wife [shaunautty]. The wild date tree is that which chiefly supplies it on the Coromandel coast [q.v.]; the palmyra in Tinnevelly. The cocoanut palm is much drawn for toddy [q.v.] on the west coast, and this is occasionally boiled for jaggery. The caryota or kittal [q.v.] is called the jaggery palm, and is especially used for this purpose in Ceylon. Great quantities are produced in Tinnevelly, where the cakes pass as a kind of currency. Jaggery is the sugar chiefly used by the lower orders. Owing to its imperfect preparation, it is inferior in sweetening and nutritive power. It is however often used to stay the stomach, pending food. It is a general practice to employ vegetable matter of some kind in masonry to increase its adhesive quality, and jaggery is among the substances. The indestructibility of the ancient temples [coil] and other buildings is due chiefly to these mixed cements [cauray, pattoo]. Jaggery is also one of the principal ingredients employed in making arrack [q.v.]. For making jaggery candy [q.v.], pots containing jaggery are set out at night, when some of the jaggery crystallises at the bottom.——*Jaggery palm* (ماری کا جہاڑ - máríká-jhár, Hind.). Title from product. Same as Bastard sago palm.

JAH (جاہ - já, *Hind.*). Place. Jah e namauz is a place of prayer; term applied to the carpet, mat or cloth on which Mahomedans stand while praying [namauz]. Jah also means dignity [staunam]; in this sense, lacab suffix; as Wallajah, high in dignity [ism].——*Jagheer* (جاگیر - jágír, *Hind.*). Means land + holding. A tenure common under the Mahomedan government, by which the revenues of a certain tract of land were made over to a servant of the state, either unconditionally or on the condition of performing some public service such as the levy and maintenance of troops or other specified duty. The assignment was either for a stated term, or more usually for the lifetime of the holder lapsing on his death to the state, although not unusually renewed to his heir on payment of a nuzrauna [q.v.] or fine, and sometimes specified to be a hereditary assignment. A jagheer was liable to forfeiture on failure of performance of the conditions on which it was granted, or on the holder's incurring the displeasure of the emperor. For the jagheer given to the English east india company by the Nawaub mahomed ally, see Jagheer circar below. The British gave a few jagheers in the early part of the administration. Jagheers were treated by the Inam commission as major inams [inam]. See vol. I, 112.——*Jagheer circar* (جاگیرسرکار - jágírisarkár, Hind.). From (above + sarkár, pers. province). Original name of Chingleput district. Granted to the East india company by nawaub Mahomed ally [q.v.] in return for the espousal of his cause against Razah sahib [q.v.] and was their first important territorial possession in S. india. This grant made in 1760 was not confirmed by the Soobahdar [q.v.] of the Deccan [q.v.] till 1763. On the assumption of the direct management of the jagheer by the East india company, it was placed under the charge of the Committee of Assigned revenues, who had been appointed to manage the other possessions of the Nawaub [q.v.] in the Carnatic [q.v.] on the breaking out of the second war with Hyder ally [q.v.] in 1780. This committee found the country divided into sixteen divisions or pergunnahs [q.v.], containing an aggregate of 2,241 villages. The names of the sixteen pergunnahs were Carangooly, Cauvaly, Cauvitundalam, Chingleput, Covelong, Egmore, Great conjeeveram, Little conjeeveram, Manimungalam, Ootramallore, Peddapolliem, Perambaukam, Ponnairy, Poonamallee, Shaulwaukum and Tripassore. With the exception of Cauvaly, which was soon abolished, this division of the district lasted until it was parcelled out into zemindarries [q.v.]. After the collapse of the zemindarry system in 1807–1820 a division into talooks [q.v.] was introduced. See vol. I (186); II, 66.

JAINY (ചേരി - chéni, *Mal.*). Corruption of (chéri, mal. village). Village. Suffix in place names; as Munnanjainy, meaning king's village [chainy, cherry].

JAIR (زیر - zer, *Pers.*). Below.——*Jairtalaub* (زیرتالاب - zertáláb, Hind.). From (above + táláb, hind. lake). Lands under a large tank [q.v.], especially when registered as double-crop [dofusl, iroobhogam] land.

JAKEERY (ذخیرہ - zakhírah, *Hind.*; ಜಕ್ಕೇರಿ - jakkéri, *Can.*). From (zakhara, ar. to hoard). Means a store; once the military depôt. Village; Salem dist., Oossoor tal.; pop. 363; acres 992; lat. 12° 35′; long. 77° 55′; from Oossoor S.S.E. 10 miles; from Salem N.N.W. 67 miles. Has two old forts, on high ground.

JALAM (जल - jala, *San.*). From (jal, san. to be cold). Water [ab, neer].—"*a*" Plant first term often joining two genera. Ex., where transl. is of second term:—Commelyna salicifolia (jalapippalí), piper longum; Cyperus procerus (jalatunga), cyperus rotundus; Cyperus puncticulatus (jalatunga), cyperus rotundus; Herpestes monniera (jalním), melia azadirachta; Nelumbium speciosum (jalaja), born; Trapa bispinosa (jalakantaka), thorn; Vitex trifolia (jalanirgundí), vitex negundo. See gloss. paragraphs.—"*b*" Mammal first term. Ex., where transl. is of second term:—Delphinus perniger (jalashúkara), pig; Halicore dugong (jalanara), man; Lutra vulgaris (jalamáñjara), cat. See gloss. paragraphs.——*Jalaja lochanan* (जलजलोचन - jalajalóchana, San.). From (above + ja, san. born + lóchana, san. eye). Vishnoo [q.v.], the lotus-eyed.——*Jalajay* (जलजा - jalajá, San.). From (above + ja, san. born). Lutchmy [q.v.]; the water born.——*Jalamundalam* (رتیلا - rutailá, Ar.; دلمہ - dulmah, Pers.; بدمکڑو - badmakrú, Hind.; جلمنڈل - jalmandal, Dec.; ಜೇಡರಹುಳ - jédarahula, Can.; புலிமுகச்சிலந்தி - pulimugaççilandi, Tam.). Title from deccany. Hind. from (bad, hind. bad + makrú, hind. large spider). Dec. from (jala, san. water + mandala, san. disc). Can. from (jéda, can. weaver + hula, can. insect). Tam. from (puli, tam. tiger + mukha, san. face + shilandi, tam. spider). A tarantula spider [makree].——*Jalantra* (జలంత్ర - jalantrá, Tel. jalantra *). From (above + antará, san. without). Ancient zemindarry, Village; Ganjam dist., pop. 11,649; pop. of village 1,151; 82 square miles; lat. of village 18° 57′; long. 84° 35′; from Berhampore S.S.W. 29 miles; from Chetterpore S.W. 40 miles. The zemindarry [q.v.] was founded by Shree poorshottama gajapaty deo, who halted in a jungle near the Mahendram [mahendragherry] mountain, when returning to Cuttack after his victory at Conjeeveram. Contains 78 villages. Peshcush Rs. 7,384.——*Jalasand* (जलसन्धि - jalasandhi, San.). From (above + sandhi, san. junction). A strait. The only straits in the Presidency are Palk's strait, a narrow channel between this and Ceylon, so called from a Dutch navigator; and Paumben channel, between Rameshwaram and the mainland.——*Jala tarangam* (जलतरङ्ग - jalataranga, San.). From (above + taranga, san. wave). Thin porcelain [kaolin] cups of sizes, arranged like musical glasses.——*Jaldanky* (జల్దంకి - dzaldaṅki, Tel.). From (above + dá, san. to give + anka, san. mark). Village; Nellore dist., Cauvaly tal.; pop. 3,376; acres 13,729; lat. 14° 52′; long. 79° 57′; from Cauvaly W.S.W. 6 miles; from Nellore N.N.W. 30 miles; from the sea W. 12 miles. Great scarcity of water. Cattle trade. Good tank. Trig. station in lat. 14° 52′ 22·39″; long. 79° 58′ 19·36″; from Bitragoonta N.N.W. 5 miles; from Cauvaly W.S.W. 6 miles; from the sea W. 11 miles.——*Julgar* (ಜಲಗಾರ - jalagára, Can.). From (above + kára, san. personal affix). A caste who sweep streets, or wash refuse, in search of lost money or valuables. A native gold washer.

JALAP (شاتل - shátil, *Ar.*; بیخ جلابہ - bíkhijallába, *Pers.* and *Hind.*; جالب - jálab, *Dec.*; భేదిగడ్డ - bhédigadda, *Tel.*; பேதிக்கிழங்கு - péthikkizhangu, *Tam.*). Title from persian; distinguish from salep [q.v.]. Pers. from (bíkh, pers. root + jallába, pers. jalab). Hind. from persian. Tel. from (bhédi, tel. purging + gadda, tel. root). Tam. from (bhédí, san. cathartic + kizhangu, tam. root). Hind. also (jálabkijar), meaning jalab root; (roshanak). Tam. also (shálappuççedi), meaning jalab plant; (shivathai); properly ipomæa turpethum, r. br., which is a substitute for jalap [indian jalap]. Title otherwise Purgative root, True jalap. Botanically Exogonium purga, benth., convolvulaceæ [vricsham, 93]. Alias Ipomæa purga. Twiner with long crimson flowers; tuberous-rooted; comes from mexico; introduced on neilgherries; root met with in thin transverse slices, solid, hard, weighty, of a blackish color on the outside, and internally of a dark gray, with black circular striæ; taste is nauseous, accompanied by a sweetish bitterness. Gives to pharm. the dried tubercles jalapa; active principle, a resin,

jalapæ resina, cathartic, anthelmintic.——*False jalap* (कृष्णकेलि - krishnakéli, San.; आकाशमोघ्रि - ákáshamógri, Conc.; زهرالاجل - zahrulajl, Ar.; گل عباس - guliabbás, Pers. and Hind.; گلا باش - gulábásh, Dec.; ಮಧ್ಯಾಹ್ನಮಲ್ಲಿಗೆ - madhyáhnamallige, Can.; ಬೈಯ ಮಲ್ಲಿಗೆ - baiyamallige, Too.; చంద్రకాంత - chandrakánta, Tel.; പൈത്തടിപ്പൂ - paittatippú, Mal.; සෙන්දිරික්කා - sendirikká, Singh.; பத்தராசு - pattarásu, Tam.). Title from supposed origin of true jalap. San. from (krishna, san. black + kéli, san. sport). Conc. means sky jasmine. Ar. from (zahr, ar. poison + ajl, ar. death). Pers. from (gul, pers. flower + abbás, ar. red color), from colors of flowers. Dec. from hindostany by corruption. Can. from (madhyáhna, can. midday + mallige, can. jasmine, jasminum sambac, ait.). Too. from (baiya, too. evening + mallige, too. jasmine). Tel. from (chandra, san. moon + kánti, san. brilliance). Mal. from (paittati, mal. ten feet, evening, from long shadow + pú, mal. flower). Singh. means probably moon plant, as flowering in the evening. Tam. from (bhadram, san. auspicious + aksha, san. eye). San. also (sandhyárága), meaning evening + color; (bahubhámí), meaning abounding in brilliancy, from various colors of flowers. Hind. also (sanjí). Can. also (nálkughantehúgida), meaning four + hour + flower + plant; (chandramallige), meaning moon + the plant; (gulamáji); (sanjamallige), meaning evening + the plant; (marianmallige); (vibhútigida), meaning ashes + plant. Tel. also (chandramalle), meaning moon + jasmine; (bhadrákshi), meaning auspicious + eye. Mal. also (antimandáram), meaning evening + the tree, bauhinia; (antimalari), meaning evening blossoming. Singh. also (ratusendirikka), meaning red + the plant. Tam. also (andimandárai), meaning evening + the plant, bauhinia; (pattirádcham); (andimalligai), meaning evening + jasmine. Title otherwise Evening jasmine, Four-o'clock-plant, Garden jalap, Goolabash, Marvel-of-peru, Striped marvel-of-peru. Botanically Mirabilis jalapa, linn., nyctagineæ [vricsham, 105]. Alias Jalappa congesta; Mirabilis dichotoma; Nyctago hortensis, jalapa. Large herbaceous plant constantly in blossom with numerous ipomæa-like [calamby] flowers of moderate size, some dark crimson, some pure yellow, some crimson striped with yellow; flowers of each variety frequently upon the same plant. The root of young plants is cylindrical above and tapering below, but in old plants it becomes napiform or subrotund; the external surface is dark brown and marked with numerous circular rings; internally it is dirty white or greyish; when dry, very old roots become hard, compact and heavy, and deepen in color, but younger roots are of a leathery consistence; it has a faintly nauseous odour, and a sweetish, sub-acrid taste; a transverse section of the root shows numerous concentric rings of a darker color than the intervening substance; it shows numerous acicular crystals when magnified. Root purgative, whence plant was once supposed to be true jalap plant; quoted in pharm.; leaves used as poultice in abscess and boils.

JALAUL (جلال - jalál, *Hind.*). From (jalla, ar. to glorify). Glory, majesty. Attribute of God [allah]. Common alam; as Syed jalaul, alaumat + alam. Also part of lacab; as Jalaul ood deen, glory of religion [ism]. Name of Acbar.——*Jalauly* (جلالی - jalálí, Hind.). Called after acbar. A square silver coin [naunyam] almost equivalent to modern rupee [q.v.] in weight and value issued in Acbar's time. On the four sides of it were stamped names of the four companions of the prophet [mahomed].——*Jalaulya* (جلالیہ - jaláliyah, Hind.). From syed jalaul ood deen bokhaury. An order of fakeers [q.v.].

JALEE (جلی - jalí, *Hind.*). From (jalá, ar. to be clear). Relief or embossed work.——*Jaloos* (جلوس - jalús, Hind.). From (jalá, ar. displayed). Accession to the throne [takht], the date when a reign commences.

JAM (जम् - jam, *San.*). To eat.——*Jamadagny* (जमदग्नि - jamadagni, San.). From (jamat, san. consuming + agni, san. fire). A rishy [q.v.], father of Parshooraman [q.v.]. His wife was Renoocay. Jaumadagnyan, patronymic, is Parshooraman.——*Jambavan* (जाम्बवान् - jámbaván, San.). The king of the bears [ricsham], an ally of Rama [q.v.]. Now applied to any Nestor. Cf. Maudiga.——*Jambeeram* (जम्बीर - jambíra, San.). Title otherwise Orange. Botanically the Citrus genus, rutaceæ [vricsham, 32]. Shrubs or trees, usually spinous; leaves alternate, one-foliolate, more or less serrate, and gland dotted, stalk often winged; flowers axillary, solitary, in bundles or in small cymes, white or pinkish, sweet-scented; fruit a superior berry, with removable rind and separable sections, packed full of pulpy tissue which is composed of large cells. The species best known to the natives are:—Aurantium [orange], aurantium, var. aurantium proper [sweet orange], aurantium, var. bergamia [bergamot orange], aurantium, var. bigaradia [bitter orange], decumana [pummelow], japonica [cumquot], medica [lime], medica, var. acida [sour lime], medica, var. limetta [sweet lime], medica, var. limonum [lemon], medica, var. medica proper [citron].——*Jambolin* (جمبول - jambúl, Hind.). Form from portuguese. Same as Common jaumoon.——*Jamboo* (जम्बु - jambu, San.). From edible fruit. Title otherwise Eugene myrtle, West-indian myrtle. Botanically the Eugenia genus, myrtaceæ [vricsham, 56]. Trees or shrubs natives of hot and tropical regions; flowers white; berry, one or two-celled, and contains one or two seeds; fruits mostly edible; the species group themselves here into cloves [lavangam], jambolins [common jaumoon] and rose apples [q.v.]. The species best known to the natives are:—alternifolia [moy], aquea [red jaumoon], arnottiana [small jaumoon], bracteata [coromandel jaumoon], caryophyllata [lavangam], jambolana [common jaumoon], jambolana, var. caryophyllifolia [clove-leaved jaumoon], jambos [rose-apple], javanica [java jaumoon], malabarica [malabar jaumoon], malaccensis [malacca jaumoon], munronii [water jaumoon], operculata [cherry jaumoon], uniflora [barbadoes cherry], zeylanica [ceylon jaumoon]. Other s. indian species indigenous or naturalized are:—argentea, calcadensis, calophyllifolia, caryophyllæa, cylindrica, floccosa, gardneri, hemispherica, heyneana, jossinia, laeta, microphylla, montana, mooniana, neesiana, rottleriana, rubicunda, uniflora, wightiana, wynaadensis. Parrot jamboo is the same as Bonduc.——*Jamboo dweepam* (जम्बुद्वीप - jambudvípa, San.). From (jambu, san. rose-apple tree + dvípa, san. island). The Eden of the Hindoos. The centre of the seven great insular continents [dweepam]; contains India [q.v.]. In the centre of Jamboo dweepam is the golden mountain Meroo [q.v.]. Jamboo dweepam has itself nine varshams [q.v.] or sub-divisions:—Bhadraushwam, Bharatam, Harivarsham, Hiranmayam, Ilauvritam, which contains Meroo, Kaitmaulay, Kimpooroosham or kinnaram, Oottara cooroo, Ramyacam. According to the Vishnoo pooraunam [q.v.], Bhaurata varsham or India is again divided into nine dweepams or portions:—Casheroomat, Comauraca, Gabhastimat, Gandharvam, Indra dweepam, Nauga dweepam, Sowmyam, Tamravurnam, Vauroonam [charitram]. See vol. I (2). The title name is used especially by Booddhists [bhoogolashastram].——*Jambookeshwaram* (சம்புகேசுவரம் - shambugésuvaram, Tam.). From (jambu, san. rose-apple tree + íshvara, san. shiva, the lord); in reference to the god being placed under a rose-apple [q.v.] tree. Tamul name (tiruvánaikká), meaning holy + elephant + grove; familiarly (tiruvánaikkával). Town; Trichinopoly dist., Trichinopoly tal.; lat. 10° 51′; long. 78° 46′; from Trichinopoly N. 3 miles. Shiva temple, 400 years old, on Shreerungam island; 1½ miles S.E. of the great Shreerungam temple, but rivalling the latter in architectural beauty and interest, and probably exceeding it in antiquity. It contains the ap lingam, one of the five celebrated lingams worshipped in south; for the other four see Lingam.——*Jamboolingam* (சம்புலிங்கம் - shambulingam, Tam.). From (jambu, san. rose-apple tree + linga, san. phallic emblem of shiva; after the god at jambookeshwaram in trichinopoly. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Jaum* (جام - jám, Hind.). Means guava. Plant name common to:—Eugenia jambolana; Psidium guyava. See gloss paragraphs.——*Jaumba* (जांब - jámba, Mahr. and Conc.). Edible. Plant name common to:—Eugenia jambolana; Eugenia jambos; Eugenia malaccensis; Xylia dolabriformis. See gloss. paragraphs.——*Jaumoon* (جامن - jámun, Hind.). See sep. title.——*Jhow* (झावु - jhávu, San.). See sep. title.——*Jumrool* (جمرول - jamrúl, Hind.). Same as Common jaumoon.

JAMAICA (جمیکا - jameka, *Hind.*). Means land of wood and water. One of the w. indian islands; belongs to Great britain. Plant first term. Ex.:—Abrus precatorius, jamaica wild liquorice; Argemone mexicana, jamaica yellow thistle; Asclepias curassavica, jamaica wild liquorice; Canavalia ensiformis, jamaica horse-bean; Chickrassia tabularis, jamaica cedar; Dodonæa viscosa, jamaica switch sorrel; Lantana camara, jamaica mountain sage; Lawsonia alba, jamaica mignonette; Nerium oleander, jamaica south sea-rose; Pimenta officinalis, jamaica pepper; Zingiber officinale, jamaica ginger. See gloss. paragraphs.

JAMALGOTA (जयपाल - jayapála, *San.*; नेपाळ - népála, *Mahr.*; जाफल - jáp'hala, *Conc.*; درخت حب السلاطين - darakhtihabbussalátín, *Ar.*; درخت بید انجیر خطائی - darakhtibedanjírikhatáí, *Pers.*; جیپال گوٹے کا پیڑ - jepálgotekáper, *Hind.*; جمال گھٹے کا جھاڑ - jamálghuttekájhár, *Dec.*; بوری - bori, *Malay*; ಜಾಪಾಳದಮರ - jápáladamara, *Can.*; ಬೇರೆದಮರ - béradamara, *Too.*; నేపాళము - népálamu, *Tel.*; നേർവ്വാളം - nérvválam, *Mal.*; නේපාලය - népálaya, *Singh.*; நேர்வாளம் - nérválam, *Tam.*). Title from deccany [ji]. San. from (jaya, san. victory + pála, san. guardian), from certainty of effect. Ar. from (darakht, ar. tree + habb, ar. seed + salátín, ar. kings). Pers. from (darakht, ar. tree + bedanjír, pers. fruit of ricinus communis, linn. + khatáí, hind. chinese). Hind. from (jayapála, san. the plant + per, hind. tree). Dec. from hindostany by corruption. Can. from sanscrit. Tel. from the country so called. Mal. from (nír, mal. water + vila, mal. to grow). Singh. from (népála, san. the country). Tam. from (népála, san. the country). San. also (népála), meaning the country so called [wild jamalgota]; (danti), meaning ivory-like, from white kernels. Mahr. also (jépála). Ar. also (darakhtidand), meaning purgative tree; (darakhtidátún); (fill), referring to nuts. Pers. also (darakhtihabbikhatáí), meaning the cathay seed tree. Hind. also (jepál). Mal. also (katalávanakku), meaning sea + ricinus communis, linn. Singh. also (jayapála). Title otherwise Chinese castor, Croton oil tree, Ivory seed, King's seed, Molucca grains tree, Nepaul oil tree, Purging croton. Wild aumanac with reference

to which see also baliospermum and jatropha. Botanically Croton [ghantabeejam] tiglium, linn., euphorbiaceæ [vricsham, 118]. Alias Croton jamalgota; Tiglium officinale. Jamalgota from deccany. Small tree, 15–20 feet, trunk crooked, bark smooth, ash-colored, with a few spreading branches; leaves alternate, ovate-oblong, smooth, acuminate, three to five-nerved at base, covered when young with minute stellate hairs; petioles channelled; calyx five-cleft; petals five, lanceolate, woolly; racemes erect, terminal; upper flowers male, lower ones female; seeds convex on one side, bluntly angular on the other, enveloped in a thin shell; flowers small, downy, greenish yellow; flowering in hot season; the leaves have a nauseous taste, and the whole tree smells offensively; indigenous, but not common. Seeds are about the size of a grain of coffee [q.v.], oval, rounded, of an imperfectly quadrangular form, with a thin brittle, light-colored shell, containing a yellowish albuminous kernel, enclosing a large leafy embryo; inodorous; taste at first mild, subsequently acrid and pungent. Fatty oil prepared by grinding seed; the oleum crotonis or oleum tiglii of pharmacy; orange yellow color, soluble in alcohol; the active principle of croton oil also exists in the leaves and wood of the plant, but has never yet been obtained thence in a distinct form. Croton seeds and oil are modern introductions in hindoo medicine; they were known in europe in the seventeenth century, but for a long time were not much used in medicine; the revival of their use in english practice in india was due to madras medical officers. The seeds are one of the most drastic purgatives known; ten or twenty seeds have been known to kill a horse [ghorah] by producing violent diarrhœa. A single drop of the oil applied to the tongue is considered sufficient to insure the full results, especially in incipient apoplexy, paralysis of the throat, or difficulty of breathing arising from these causes, even should the patient be insensible at the time; it is also employed in visceral obstruction and occasionally in dropsy; the oil is often adulterated with olive [zeitoon], castor [aumanac], or purging nut oil. The leaves rubbed and soaked in water are also purgative, and when dried and powdered are a good application to snake-bites. Oil externally applied in rheumatism and indolent tumours. If the leaves are chewed they inflame the mouth and lips, and cause them to swell, leaving a burning sensation. The wood which is bitter tasted is gently emetic and powerfully sudorific. Oil now chiefly used in veterinary medicine. Gives to pharm. seeds, crotonis semina, powerful drastic purgative, in over-doses an acronarcotic poison, externally applied stimulant and rubefacient. Wood white and hard.——*Wild jamalgota* (दन्ती - dantí, San.; नेपाळ - népála, Mahr.; حب السلاطين صحرائی - habbusalátínisahráí, Ar.; حب السلاطين بری - habbussalátínibarrí, Pers.; جنگلی جمال گوٹہ - janglíjamálgotá, Hind.; جنگلی جمال غٹہ - janglíjamálghuttah, Dec.; ಕಾಡುಹರಳು - káduharaḷu, Can.; కొండఆముద - kondaámuda, Tel.; കടലാവണക്ക് - katalávanakku, Mal.; ජාපාල - jápála, Singh.; சீமையாமணக்கு - shímaiyámanakku, Tam.). San. from (danta, san. mountain side); also from seeds like ivory. Mahr. from (népála, san. the country so called). Ar. from (habb, ar. seed + sultán, ar. king + sahráí, ar. wild.). Pers. from (habb, ar. seed + sultán, ar. king + barrí, ar. wild.). Hind. from (janglí, hind. wild + jamálgotá, hind. croton tiglium, linn.). Dec. from hindostany. Can. from (kádu, can. jungle + haralu, can. castor oil seed). Tel. from (konda, tel. hill + ámuda, tel. castor oil tree, ricinus communis, linn.). Mal. from (katal, mal. sea + ávanakku, mal. castor plant), means foreign castor plant. Singh. from (jaya, san. victory + pá, san. to protect). Tam. from (shímai, tam. foreign + ámanakku, tam. castor plant, ricinus communis, linn.). San. also (jayapála), meaning victory + guardian; (népála), meaning produced in nepaul [jamalgota]. Hind. also (jamálghota), meaning croton tree. Tel. also (nélajídi), meaning ground + marking-nut plant, semecarpus anacardium, linn. f.; (erradundiga), meaning red + jatropha glandulifera, roxb.; (adaviámuda), meaning jungle + castor-oil plant; (kanakapáta), meaning gold + cissampelos pareira, linn. Mal. also (shímaávanakku), meaning foreign castor plant; (nágadanti), meaning mountain jamalgota; (nérválam). Tam. also (káttámanakku), meaning wild castor oil plant [wild aumanac]; (nérválam), meaning croton plant; (níradimuttu), meaning water + to strike + pearl; oil from seeds expels serum from body. Title otherwise Foreign castor, Golden pareira, Hydragogue nut, Ivory seed, Lowly marking-nut, Nepaul castor, Red physic nut, Wild castor [aumanac], Wild croton [ghantabeejam], Wild sultan seed. Botanically Baliospermum montanum, muell. euphorbiaceæ [vricsham, 118]. Alias Baliospermum polyandrum; Croton polyandrum, roxburghii; Jatropha montana. Undershrub; upper leaves lanceolate, acute at the base, lower ones broader, ovate, and often cordate at the base, sinuately toothed or deeply three-lobed, marked with long scattered hairs; inflorescence commonly bisexual, males more loose than the females, and longer peduncled, all shorter than the petioles; fruit bearing pedicels deflexed; sterile bracteoles numerous; segments of the male calyx orbicular-ovate, of the female lanceolate; capsules sub-globose, tridymous, puberulous; seeds smooth, at length marbled, exactly like those of castor oil plant, but much smaller. Roots nearly straight, seldom branched, about as thick as the finger; bark brown, scabrous; wood yellowish-white, soft and tough; the outer layer of the bark consists of several rows of brick-shaped brown cells, mostly empty, but some of them containing a dark reddish-brown resin; within this the parenchyma is so loaded with conglomerate raphides that its structure is with difficulty seen; it has many cells filled with resin as in the suber, and very numerous yellow liber cells; the wood is loaded with starch; the seeds weigh about one and a half grains each, and are exactly similar to very small castor seeds; fixed fat oil expressed from seeds. The seeds are medicinally drastic purgative, in overdoses acronarcotic poison, sometimes substitute for croton tiglium, externally as a stimulant and rubefacient; oil powerful hydragogue cathartic, external application in rheumatism; root cathartic, used in dropsy, anasarca, and jaundice; gives to pharm. seeds and oil, non-officinal [yennay].

JAMALY (జమలి - dzamali, *Tel.*). From (yamala, san. twin). Two.——*Jamalavoy droog* (జమలవాయిదుర్గము - jamalaváyidurgamu, Tel.). From (jamali, tel. two + váyi, tel. mouth + durga, san. a hill). Hill, Kistna dist., Vissanapett division; lat. 16° 57′ N.; long. 80° 38′ E.; from Masulipatam N.N.W. 63 miles; from Tirvore S. 11 miles. In Tirvore sub-division. Trig. station in Lat. 16° 57′ 22·17″; long. 80° 38′ 08·19″. Height 1,857 feet.——*Jamdica* (జమలిక - dzamalika, Tel.). From (dzamali, tel. two). A drum [paray], a kind of tabour [sangeetam].

JAMAUDY (جمادی - jamádí, *Hind.*). From (jamad, ar. congealed). Dry month. The fifth and sixth months of Mahomedan year following Rabee [q.v.], distinguished as Jamaudy ool owval, the first, and Jamaudy ool aukhir, the last jamaudy [maheena].——*Jamtee* (पातालगारुडी - pátálagárudí, San.; वासनवेल - vásanavéla, Mahr.; جمتی کی بیل - jamtíkíbel, Hind.; فرید بوٹی کی بیل - farídbútíkíbel, Dec.; ದಾಗಡಿಬಳ್ಳಿ - dágadiballi, Can.; దూసరితీగ - dúsaritíga, Tel.; காட்டுக்கொடி - káttukkodi, Tam.). Title from hindostany. San. from (pátála, san. nether world + gárudí, san. relating to garuda). Mahr. from (vásana, mahr. perfume + véla, mahr. creeper). Hind. from (jamtí, hind. coagulating + bel, hind. creeper), from property of leaves [indian willow]. Dec. from (faríd, ar. name of saint + búti, hind. plant + bel, hind. creeper); from his having lived on water rendered mucilaginous by the leaves shaken in it [elephant nerinjy]. Can. from (dágu, can. screened + balli, can. creeper). Tam. from (kádu, tam. forest + kodi, tam. creeper). San. also (vásantitiktá), meaning fragrant bitter plant. Can. also (dúsari); (yadánibaIli); (sugadigida). Tel. also (chípurutíga), meaning broom + creeper; (katletíga), meaning stick + creeper. Title otherwise Broom creeper, Fareed's creeper, Fragrant creeper, Ink berry, Ink creeper. Botanically Cocculus [vausanavully] villosus, dec., menispermaceæ [vricsham, 5]. Alias Cocculus hastatus, sepium; Menispermum hirsutum, myosotoides, villosum. Twining shrub; leaves on old branches, cordate-orbicular or hastate, three-lobed, obtuse or retuse, mucronulate; on young shoots oblong, cordate or acute at the base, more or less downy; petals about equal to the filaments; racemes axillary, not half the length of the leaves, of male flowers branched and corymbose, of female simple and one to three flowered; nuts of the drupe reniform, compressed; flowers small, greenish; flowering in the rainy season. Root very crooked and twisted upon itself, keeled, seldom branched, but giving off a few thin fibrous rootlets; external surface light brown, nearly smooth, transverse section pale yellow, marked with radiating darker yellow lines; odour peculiar, acrid; taste disagreeable and bitter. Water rendered thick and mucilaginous by agitating briskly the fresh leaves, and sweetened with sugar, is a cool drink; powder of dry leaves mixed with water and sugar [q.v.] has same properties. Dose; of mucilage, from four to eight ounces; of powdered leaves, from one to two drachms. Substituted for pareira brava, sarsaparilla and copaiba. A decoction of fresh root with pepper [q.v.] and goat's [velland] milk is given in rheumatism, laxative and sudorific. Natives make curry [q.v.] of leaves. Juice of ripe berries makes a good durable, bluish-purple ink [mashy].

JAMAUL (جمال - jamál, *Ar.*). From (jamala, ar. to become beautiful). Mahomedan common alam; as Jamaul bee, alam + alaumat [ism].——*Jemalabad* (جمال آباد - jamálábád, Hind.). From (jamál, ar. name of tippoo sultan's mother + ábád, pers. city). Can. name (gadekallu), meaning fort + rock. Ancient name (narasimhangadi), meaning narsimhan, proper name + shop. Village; South canara dist., Ooppinangady tal.; lat. 13° 01′; long. 75° 21′; from Beltangady N. 3 miles; from Mangalore E.N.E. 33 miles; from Poottore N.N.E. 19 miles. Founded by Tippoo on site of a ruined city called Narsimhangady. Destroyed by the Coorg rajah in 1799. Many Mussalmans in neighbouring village.

JAMKHANA (جمخانہ - jamkhánah, *Hind.*). Cotton carpet [satranjee]; generally in blue and white or red and white stripes. Woollen carpet is cumbly [q.v.].

JAN (जन् - jan, *San.*). To be born.——*Ja* (जा - já, San.). From (jan, san. to be born); produced. Suffix. Especially plant second term. showing natural characteristic, the place of growth, &c. Ex., where transl. is of first term:—Anthocephalus cadamba (nadíja), river; Holarrhena antidysenterica (kutajá), curled; Mollugo spergula (gríshmajá), summer; Nelumbium speciosum (ambujá), water, (jalajá), water, (sarójá) tank; Piper nigrum (véllaja), sea coast; Pterocarpus santalinus (malayaja),

malayam mountain; Solanum xanthocarpum (kshétrajá), field; Zingiber officinale (nagarajá), town. See gloss. paragraphs.——*Janacan* (जनक - janaka, San.). A progenitor. The father of Seetay [q.v.] the wife of Ramchendran [q.v.].——*Janacaran* (జనకరుడు - janakarudu, Tel.). From (jana, san. people + kara, san. maker). Creator. Hindoo 2nd or pers. name [peyar].——*Janam* (जन - jana, San.). From (jan, san. to be born). People.——*Jana padam* (जनपद - janapada, San.). From (jana, san. people + pada, san. place). A community or nation. Also an inhabited region, as graumam [q.v.] or naud [q.v.].——*Janardanan* (జనార్దనుడు - janárdanudu, Tel.). From (jana, san. people + ard, san. to agitate). Krishnan [q.v.], the people-agitator. Hindoo 2nd or pers. name. Common among Madhwas [peyar].——*Janavinodiny* (जनविनोदिनी - janavinódiní, San.). From (jana, san. people + vinódiní, san. that which entertains). Vernacular newspaper. Tamul edition first published 1870, Teloogoo 1874.——*Jantoo* (जन्तु - jantu, San.). From (jan, san. to be born). The most general term for an animal. Fauna of a region [desham].—"*a*" For category, see Padaurtam; for elementary substance, see Dravyam; for matter see Bhootam; for organic and inorganic, see Indriyam and Anindriyam; for organic kingdom, see Ganam; for organic class, see Vargam; for organic order, see Santaunam; for organic family, see Coolam; for organic genus, see Jauty; for organic species, see Bhaidam.—"*b*" The kingdom [ganam] of animals [jantoo] is divided into two sub-kingdoms [oopaganam] of invertebrata [nirvamshyam] and vertebrata [vamshyam]. The invertebrata [nirvamshyam] sub-kingdom [oopaganam] includes the classes [vargam] giving the lower forms of animal life. Such as in ascending scale; Sponges [moocabaudal], Corals [moongah], Star-fishes [taurah matsyam], Worms [poochy, keerah], Centipedes [kankhajoor], Spiders [makree], Crustaceans [kavachiny], Insects [poochy], Molluscs [chippy]. The vertebrata [vamshyam] sub-kingdom [oopaganam] includes in ascending scale the classes [vargam] of Fishes [matsyam], Batrachians [bhaicam], Reptiles [sarpy], Birds [pacshy], and Mammals [sastanam].—"*c*" A general conspectus of the Fauna of Southern india was given in vol. II, Appendix IV.—"*d*" Compare Vricsham for plants or flora, and Dhautoo for minerals.——*Jaun* (جان - ján, Hind.). Life. Part of lacab; as Jaun bauz jung, intrepid in war [ism.].——*Jaunaky* (சானகி - shánagi, Tam.). Seetay [q.v.], daughter of the king Janacan [q.v.]. Proper name common to both sexes. As a feminine name it is shortened into Shaunoo, Shauny [peyar]. Counterfeit jaunaky is the same as River blatty.——*Jaunee* (جانی - jání, Hind.). In composition makes a lacab; as Jaunee begum, dear lady [ism].——*Jaunoo* (جانو - jánú, Hind.). In composition makes a lacab; as Jaunoo miyaun, dear lord [ism].——*Jautacam* (जातक - játaka, San.). From (jan, san. to be born). Astrology applied to nativities [varauha mihiran].——*Jautikye* (சாதிக்காய் - sháthikkáy, Tam.). From (játí, san. nutmeg, myristica fragrans, houtt. + káy, tam. fruit). Nutmeg or nut of myristica fragrans, houtt. [common nutmeg].——*Jauty* (जाति - játi, San.). From (jan, san. to be born). Greek *γένος*; Latin gens.—"*a*" Originally race. Jauty bhaidam means the distinctions of race. Varnam, an older word used by the Sanscrit writers, originally meant a difference in color. Gradually these two words, jauty and varnam, came to represent not only varieties of race and color, but also numerous original, hereditary, religious, instituted and conventional distinctions; otherwise Caste. The Portuguese word casta, meaning race or quality, was first applied by the Portuguese, when they arrived, to designate the peculiar system of religious and social distinctions which they observed on the west coast. Thus, Camoens:—"A lei da gente toda, rica, e "pobre de fabulas composta se imagina: andam nús, e sómente "hum panno cobre as partes, quea cobrir natura ensina: dous "modos ha de gente; porque a nobre Naires chamados são; e a "menos dina Poleás tem por nome; a quem obriga alei não "misturar a casta antiqua." As stereotyped under Braminical authority, the word jauty is now applied to the distinctions of birth, tribe and occupation, which separate the Hindoos, and preclude their eating, drinking and smoking together; their using the same vessels; their intermarrying; and then reciprocating other relations of social life. The authority of caste rests partly on written laws, partly on legendary fables and narratives, partly on verbal tradition, partly on the injunctions of instructors and priests, and partly on usage.—"*b*" Bramha [q.v.], according to the mythology, produced the Bramins [q.v.] from his mouth, to pray, to read, to instruct; the Cshatriyas [q.v.] from his arms, to draw the bow, to fight, to govern; the Veisyas [q.v.] from his belly or thighs, to nourish, to provide the necessaries of life by agriculture and commerce; the Shoodras [q.v.] from his feet, for subjection, to serve, to labour, to travel. These four higher castes are in Tamul:—Vediyar, bramins; Munnar, cshatriyas; Veisyar, veisyas; and Oozhavar, shoodras. Another division of seven castes is into Bramin, Cshatriya, Veisya, Shoodra, Anooloma [q.v.] or the offspring of a bramin father and cshatriya mother, Pratiloma or that of a cshatriya father and bramin mother, and Sankara or a mixed class of the first four tribes.—"*c*" There is no indigenous word in any dravidian language to signify caste. The dravidians are naturally attached to tribal institutions, and opposed to caste institutions. The last sootram [q.v.] in the Nunnool [q.v.] is as follows:—பழையன கழிதலும் புதியன புகுதலும் வழு வல கால வகையி னானே.—"Lapsing of old and appearance "of new is no error but happens on change of times." There is a Tamul proverb:—கன்மத்தினாற் சாதியன்றிச் சென்மத்தினால் இல்லை—"Caste arises from action [carmam], it is "not from birth [jenmam]." The Tamul cooral [q.v.] has the following:—மழித்தலு நீட்டலும் வேண்டா வுலகம் பழித்தொழித்து விடின்—"There is no need of a shaven "crown, nor of tangled hair, if the world abstain from those "deeds which the wise have condemned."—குடியென்னுங் குன்றா விளக்க மடியென்னு மாசூர மாய்ந்து கெடும்.—"By the darkness of idleness, the indestructible lamp of caste "rank will be extinguished." The following is an apothegm of Sarwanyan:—ಜಾತಿಹೀನರ ಮನೆಯ ಜ್ಯೋತಿ ತಾ ಹೀನವೇ—ಜಾತಿ ವಿಜಾತಿಯನ ಬೇಡ—ದೇವ ವಲಿದಾತನೇ ಜಾತ ಸರ್ವಜ್ಞ—"Is the fire of a man's "hearth polluted, because he is low born? Do not observe "caste distinctions. He is of the best caste, who has won "God's favor."—"*d*" Non-bramin castes are divided popularly into high or low. They are also right-hand and left-hand; this last distinction represents the agricultural classes on the one side and the artizans, &c., on the other [yidangay].—"*e*" The following are the principal Tamul castes; each can be seen under its own head:—Agambadiyaur, Ambalacauran, Ambattan, Berichetty, Bramin, Caraiyaur, Chuckler, Collan, Coorumba, Coosava, Corava, Culla, Cull tutcha, Cummaula, Cunnaura, Devadausy, Eelavaca, Iroola, Kanakan, Keikkila, Mailacaur, Marava, Ooppilya, Padiyautchy, Pariah, Pulla, Pully, Pundaura, Shauliya, Shaunaur, Sheniya, Shreeveishnava, Tattaur, Tautha, Tutcha, Vauniya, Vellaula, Vulloova, Vunnaur and Yiday.—"*f*" The following are the principal Teloogoo castes; each can be seen under its own head:—Aradhyan, Audapaupa, Balije, Besta, Bhogam, Boy, Bramin, Caupoo, Causalnauty, Chentsoo, Comaty, Coommara, Cumbala, Dausary, Gaundla, Golla, Gowndla, Janapa, Jendra, Jetty, Jogy, Maidary, Maudiga, Maula, Moorkinauty, Mootraucha, Mungala, Niyogy, Pauknauty, Rauz, Saucala, Sauley, Sautauny, Telagaunya, Velama, Velnauty, Wodda, Yanaudy, Yeediga and Yerkala.—"*g*" The following are the principal Canarese castes; each can be seen under its own head:—Acasauly, Agasa, Badaga, Badagy, Banajiga, Basavy, Beyda, Billawa, Bramin, Bunt, Cooroobs, Coraga, Cullwodda, Gauniga, Haleypeik, Haslar, Haurwa, Hebbaura, Holeya, Jeyda, Julgar, Lingayet, Madhwa, Malaicoody, Maudiga, Okkaliga, Ooppaura and Tooloova.—"*h*" The following are the principal Malayalam castes; each can be seen under its own head:—Agapodwaul, Ambalavausy, Bramin, Chaukyaun, Cherman, Covil tumbooraun, Elíad, Ilava, Irava, Malaiyarasa, Moocwa, Mooshaury, Moossad, Moottad, Nayar, Nayaudy, Numboory, Oorauly, Paniyan, Poolaya, Teeyar and Teeyaudy.—"*i*" The following are other castes; each can be seen under its own head:—Arab, Beiraugy, Bondily, Boodboodikey, Brinjarry, Concany, Deshasta, Dombar, Doodey coolam, Gond, Gosain, Goozeratty, Khond, Lohauro, Lubbay, Lumbaudy, Mahratta, Marwarry, Moplah, Ooriya, Pindarry, Putnool, Rajpoot, Soogauly, Sowrah and Todah.—"*j*" For race, see vol. I (30) to (38), and the following foot-notes, &c.:—scientific localization I (30), south indian race movements I (33), hæckel's gen. synopsis, II, 221.—"*k*" For hindoo caste, see vol. I (61) to (70), and the following footnotes:—history of caste I (61), abbé dubois opinion I (64), punchaular I (67); groups of castes II, 225, hindoo proper names II, 239.—"*l*" In composition Jauty denotes superiority or excellence. Jauticauran is a person of good caste, of unmixed descent; commonly applied to a genuine european as distinguished from Parangicauran or east indian and Shattaicauran or eurasian. Jauty adee is the english foot measure.—"*m*" In natural history Jauty is a genus. For category, see Padaurtam; for elementary substance, see Dravyam; for matter, see Bhootam; for organic and inorganic, see Indriyam and Anindriyam; for organic kingdom, see Ganam [jantoo, vricsham]; for organic class, see Vargam; for organic order, see Santaunam; for organic family, see Coolam; for organic genus, see present head; for organic species, see Bhaidam. Oopa prefixed to either of the above means a sub-head. For inorganic minerals, see Dhautoo.——*Jauty* (जाति - játi, San.). Nutmeg; see sep. title.——*Jauty patry* (जातीपत्री - játípattrí, San.). From (játí, san. nutmeg, myristica fragrans, houtt. + pattri, san. leaf). Mace or pulp of myristica fragrans, houtt. [common nutmeg].——*Jenm* (जन्म - janma, San.; ജന്മം - janmam, Mal.). Means birth. Hereditary freehold proprietorship [cawny, mirass], the Sanscrit form of the Malayalam pair [q.v.]. Jenm property is the highest of Malabar tenures, and corresponds to English fee-simple. It may be sold or mortgaged in various ways, and the right to it passes by descent according to law. It can be left to strangers by will only on failure of heirs; if there be no heirs, nor disposal by bequest, it escheats to the rajah. It cannot be sold without the concurrence of the heir at law. The term is applicable to other than individuals, as there may be the jenm lands of a college [sangham] or temple [coil]. For the transfer of property whereby jenm gradually changes hands, see the theoretical system under Caranam, and the more practical system at vol. II, 104. Compare vol. I, 112, 114; II, 289.——*Jenma bhogam* (ജന്മഭോഗം -

janmabhógam, Mal.). From (janma, san. birth + bhuj, san. to eat). The Jenmy's share.——*Jenma coodiyaun* (ജന്മക്കുടിയാൻ - janmakkutiyán, Mal.). From (janma, san. birth + kutiyán, mal. tenant). The modern Jenmy, who has acquired his property by purchase, in contradistinction to the ancient or hereditary Jenmy.——*Jenma lagnam* (जन्मलग्न - janmalagna, San.). From (janma, san. birth + lagna, san. time). The point of the ecliptic [craunty mundalam] which is on the horizon [cshitijam] at the moment of the birth of a child. See Lagnam.——*Jenmam* (जन्म - janma, San.). From (jan, san. to be born). Birth whether past, present or future; transmigration [samsauram].——*Jenma puttricay* (जन्मपत्रिका - janmapatriká, San.). From (janma, san. birth + patrika, san. letter). Horoscope; or record showing year, lunar day [tity] and the aspects and relative positions of other planets [graham] in the heavens [golam] at the moment of one's birth; also the tablet of fortunes through life composed from these particulars. A man's star is with the Hindoos the lunar constellation in which the moon is found at the moment of his birth; many other accessories are added thereto.——*Jenmauntram* (जन्मान्तर - janmántara, San.). From (janma, san. birth + antara, san. different). Transmigration, prior or posterior [samsauram].——*Jenmcaur* (ജന്മക്കാരൻ - janmakkáran, Mal.). From (janma, san. birth + kár, mal. owner, suffix). Same as Jenmy.——*Jenmpanayam* (ജന്മപ്പണയം - janmappanayam, Mal.). From (janma, san. birth + panayam, mal. mortgage). Sanscrit term for Coodimaneer [q.v.] and Neermoothal [q.v.]. The last mortgage [panayam] before loss of jenm [otty].——*Jenmy* (ജന്മി - janmi, Mal.). The hereditary proprietor.——*Jenmy peimash* (ജന്മിപ്പൈമാശി - janmippaimáshi, Mal.). From (janmi, mal. proprietor of land + paimáish, pers. measure). In M.E. 981, every proprietor of land was called upon to furnish under his signature a detailed account of his landed property. The statements so obtained are known as jenmy peimash and were the basis of the kole peimash [q.v.] of M.E. 983.——*Jinjal* (جنجال - janjál, Hind.; జజాలి - jajáli, Tel.). From (jan, hind. man + jál, hind. net). A small piece of ordnance mounted on a swivel.

JANAPA (జనప - dzanapa, *Tel.*). From (dzanumu, tel hemp). The flax-dresser caste. Gunny-weavers. Numbers about 15,000 [jauty].

JANAUB (جناب - janáb, *Hind.*). From (janb, ar. side); the people are a side and the prince is a side. Majesty. Used as a respectful term of address to a person of rank and office whether native or european.

JANAUZA (جنازة - janázah, *Hind.*). From (janaza, ar. to gather up). Funeral among Mahomedans. When a Mahomedan is about to expire, the creed and a particular chapter of the koran [q.v.] are read aloud. The moment the spirit departs, the mouth is closed, the toes are brought together and fastened with a thin slip of cloth, and incense [ood] is kept burning. The body is then washed [ghassaul], and wrapped in a winding sheet of calico [q.v.], and powdered camphor [q.v.] is rubbed on the hands, feet, &c. The body is then placed in a box or on a cot [q.v.] and carried on the shoulders of four persons to the mosque [musjid], where the funeral service is read. Those wishing to depart do so then, and the rest proceed to the grave. The corpse is then placed on its back in the grave with the head to the north and feet to the south, the face being turned towards Mecca. Those present take a clod of earth, and repeating the words 'we created you of earth, and return you to earth,' lay it in the grave. After the grave is closed, it is usual to pour a pot of water over it and to plant a twig of the pomegranate [anaur] tree. Then fautihas [q.v.] are offered for the deceased; and later, at a distance of a 40 yards, for all the dead in that burying-ground. Alms are distributed. On the third day the grave is visited in the morning by friends and relations of the deceased, portions of the koran are recited for the benefit of the departed, and alms are distributed [ziyaurat]. On the tenth, twentieth, and fortieth days food is distributed to the poor in the name of the deceased. During the days of mourning the relatives abstain from wearing any new dress [shaudy]. Cf. Hindoo shavacaud.

JANDIRAM (జంధియము - dzandiyamu, *Tel.*). Short for (dzannamu, tel. sacrifice + dáramu, tel. thread). The sacred thread [janivaura, jaunwah] of the twice-born [dwijan]; see Poonool and Yanyopaveetam.

JANGADA (ചങ്ങാടം - channátam, *Mal.*). From (samghat, san. to unite). Raft; same as Jungar.

JANIVAURA (ಜನಿವಾರ - janivára, *Can.*). From (janna, can. sacrifice + dára, can. thread). The sacred thread [jandiram, jaunwah] of the twiceborn [dwijan]; see Poonool.

JANNAT (جنت - jannat, *Hind.*). From (janna, ar. to conceal). Garden of trees which by their branches conceal the ground beneath. Heaven [bheest].

JAPAM (जप - japa, *San.*; செபம் - shebam, *Tam.*). From (jap, san. to mutter). Muttering prayers, repeating inaudibly passages from the vedas [q.v.], incantation [muntram].——*Jasoon* (جاسون - jásún, Hind.). From (javásuma, san. shoe flower). Same as China rose bendy.

JAPAN (جاپان - japán, *Hind.*; சப்பாங்கி - shappangi, *Tam.*). Means sun-origin-kingdom; so called by the chinese. An empire consisting of four larger and many smaller islands to the east of Asia. Plant first term. Compare:— Cinnamomum camphora, japan camphor plant; Cydonia vulgaris, japan quince; Diospyros kauki, japan date plum; Eriobotrya japonica, japan medlar; Rhus succedanea, japan varnish; Vigna catiang, japan lablab. See gloss. paragraphs.

JARADA (జరడ - jarada, *Tel.*). Ancient zemindarry, Village; Ganjam dist., pop. 6,884; square miles 48; lat. of village 19° 05′; long. 84° 33′; from Berhampore S.W. 24 miles; from Chetterpore W.S.W. 38 miles. Small zemindarry [q.v.] adjoining Soorangy and south-west of Cheekaty. Founded in A.D. 1440 by Veerabhadra sing, son of Vishwambhara sing roya toorye, the possessor of a large tract of country in the Mahendram [mahendragherry] maliahs [q.v.]. Hilly but tolerably well watered by small stream that falls into the Bauhoodah. Contains 29 villages. Peshcush [q.v.] Rs. 2,025.

JARALLEA (జాలరి - dzálári, *Tel.*). Specific name from vernacular. Same as Taloora saul.

JARAT (जरत् - jarat, *San.*). From (jrí, san. to grow old). Old.——*Jauradgavam* (जारद्गव - járadgava, San.). From (above + gau, san. cow). The southern avastaunam [q.v.] or one-third path [cacsham] of the sun and moon [eirauvatam, veishwaunary].

JAREEB (جريب - jaríb, *Hind.*). From arabic. A measuring rope. Before Acbar's time it was a simple rope. He directed that it should be made of bamboo [q.v.] with iron joints, as the rope was in itself very imperfect, and also subject to the weather. Europeans have introduced the chain. As a linear measure 60 guz or yards = 1 jareeb [alavay, le]. Approximate actual value, 1 jareeb = 55 yards. Compare Puggum. Jareebdar is a surveyor.

JARY (ಜರಿ - jari, *Can.*). From (já511ru, can. to slide). Precipice.——*Jarimaley* (ಜರಿಮಲೆ - jarimale, Can.). From (jari, can. a precipice + male, can. a hill). Village; Bellary dist., Coodligy tal., pop. 960; acres 6,187; lat. 14° 49′; long. 76° 31′; from Bellary S.W. 37 miles; from Coodligy S.E. 9 miles. Formerly seat of a poligar [q.v.], descended from Penappa naick. The founder of the family received two jagheers [q.v.] from Atchoota royel of vijianugger. These were attacked at various times by Aurungzeeb and the Rajahs of Beejapore, and in 1752 by the Poligar of Chitaldroog. In 1767 the poligar appealing to Hyder for aid, was put to death by the Poligar of Chitaldroog. His son was afterwards reinstated by Hyder. Tippoo resumed the whole district in 1787. The poligar regained possession in 1791, but was expelled again. When Jarimaley was ceded to the Nizam [q.v.] in 1799, the poligar was allowed to rent the district at its full value. Soon after he fell into arrears and fled to Mysore, where he died. In 1801 the country fell under the dominion of the British, a pension being granted to the members of the ruling family for their support. Their family is now extinct. Jarimaley trig. station is in lat. 14° 49′ 07·57″; long. 76° 31′ 42·65″; height 2,743 feet; from Bellary S.W. 36 miles; from Coodligy S.E. 9 miles; from Jarimaley village E.N.E. ½ mile.

JAS (कांस्य - kámsya, *San.*; جست - jast, *Hind*; جس - jas, *Dec.*; ಸತ್ತು - sattu, *Can.*; సత్తు - sattu, *Tel.*; വെള്ളീയം - velliyam, *Mal.*; வெள்ளீயம் - vellíyam, *Tam.*). Title from deccany. San. from (kamsa, san. copper) [cumsam, cunts]; from copper as an alloy. Tel. means essence. Tam. from (vel, tam. white + íyam, tam. lead). Tam. also (kalliyam), meaning stone + lead, a hard variety [culleeyam]. Pewter [tagaram].

JASMINE (मल्लि - malli, *San.*; ياسمين - yásamín, *Ar.*; ಮಲ್ಲಿಗೆ - mallige, *Can.*; మల్లె - malle, *Tel.*; മുല്ല - mulla, *Mal.*, සමන් - saman, *Singh*; மல்லி - malli, *Tam.*). Title from arabic. San. from (mall, san. to hold); from use as garlands. Botanically the Jasmiuum genus, oleaceæ [vricsham, 85]. Shrubs or climbers, natives of warmer regions; leaves pinnate; flowers white or yellow, and scented; propagated by cuttings. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are:—brevilobum, calophyllum, cordifolium, flexile, malabaricum, rigidum, trichotomum. In anglo-indian usage the term jasmine includes also:—Ægle marmelos, Boerhaavia repens, Gomphrena globosa, Gynocardia odorata, Hemidesmus indicus, Ipomæa quamoclit, Millingtonia hortensis, Mirabilis jalapa, Nyctanthes arbortristis, Polygonum tomentosum, Quisqualis indica, Randia uliginosa, Rhinacanthus communis, Tabernæmontana coronaria, Tagetes sp.——*Arabian jasmine* (मल्लिका - malliká, San.; मोगरा - mógará, Mahr.; मोग्रयाझाड - mógrayájháda, Conc.; ياسمين - yásamín, Ar.; موگرے کا پیڑ - mogrekáper, Hind.; شجرگل سپید - shajarigulisupíd, Pers.; موگرے کا جھاڑ - mogrekájhár, Dec.; ಎಳುಸುತ್ತಿನಮಲ್ಲಿಗೆಗಿಡ - élusuttinamalligegida, Can.; ಮಲ್ಲಿಗೆಡ್ಡ - malligedai, Too.;

malle, Tel.; മുല്ല - mulla, Mal.; පිච්ච - piçça, Singh.; மல்லிகை - malligai, Tam.). San. from (mall, san. to hold), from the garland made of this flower being extensively used. Mahr. from (mudgara, san. the jasmine). Pers. from (shajar, pers. tree + gul, pers. rose + supid, hind. white); cf. indian white rose. Hind. from (mográ, hind. jasmine + per, hind. tree). Dec. from (mográ, hind. jasmine + jhár, hind. tree). Can. from (élu, can. seven + suttu, can. turn + mallige, can. jasmine + gida, can. plant). Tel. from sanscrit. Mal. from sanscrit. Tam. from sanscrit. San. also (anangá), meaning relating to cupid; (bhúpadí), meaning earth fixed; (kaushiká), meaning relating to cooshican [indian bdellium]; (trinashákhya), meaning grass + branch; (várshikí), meaning annual; (ásp'hótá), meaning slightly blossoming [wild jasmine, yercum]; (shítabhíru), meaning cold-fearing; flowers in summer. Ar. also (saman); (vardiabyaz), meaning white rose [indian white rose]; (zambak), meaning white lily. Pers. also (zambak), meaning white lily; (champa), meaning michelia champaca, linn., from similar odour. Hind. also (bela), meaning creeper jasmine; (motiyá), meaning pearl-shaped; (banmallika), meaning forest + jasmine; (batmográ), meaning double-flowered variety; (hazáramográ), meaning double-flowered. Can. also (dundumalligegida), meaning round + jasmine + plant; (iruvantige), meaning two-rowed; double-flowered. Tel. also (bondumalle), meaning round + the plant; (gundumalle), meaning round + the plant; (boddumalle), meaning round jasmine; (manmat'habánamu), meaning cupid + arrow [jungle geranium]; (viradzáji), meaning double jasmine. Mal. also (kutamulla), meaning umbrella jasmine, from the large flowers; (cherupiççakam), meaning small + the plant, jasminum grandiflorum, linn.; (nallamulla), meaning good jasmine; (chírakamulla), meaning cuminum cyminum, linn. + jasmine. Singh. also (bhúmimanda), meaning earth + ornament; (desaman). Tam. also (kudamalligai), meaning pot + jasmine; (iruvádi); (iruvádchi), meaning double petalled; (karumugai), meaning black + opening bud; (pérámalligai), meaning large jasmine. Title otherwise Lily jasmine, Mogara jasmine, Sambac jasmine. Botanically Jasminum sambac, ait., oleaceæ [vricsham, 85]. Specific name from arabic. Alias Jasminum fragrans, plenum; Mogorium sambac; Nyctanthes sambac. Mogorium from mahratta. Dwarf-spreading under-shrub; ash-colored branches; leaves opposite, cordate, ovate or oblong, waved, sometimes scolloped, pointed, smooth, downy on the veins on the under side; calyx segments five to nine; flowers terminal, generally in small trichotomus umbellets, white; flowering in the hot season. Flower religious to vishnoo [q.v.]. The leaves if boiled in oil exude a balsam [q.v.] used for anointing the head in eye complaints; an oil is also expressed from the root, used medicinally. Flower gives mahomedan perfume [attar]. There are two varieties; single-flowered and double-flowered.——*Black jasmine* (नीलमल्लिका - nílamalliká, San.). From greenish flowers. Same as Bael. ——*Cat's jasmine* (ಬೆಕ್ಕಿನಅಜ್ಜೆಬಳ್ಳಿ - bekkinaajjeballi, Can.). Same as Tikry.——*Common jasmine* (जाती - játí, San.; चमेली - chamélí, Mahr.; जायचेमोग्रे - jáychémógré, Conc.; یاسمین - yásamín, Ar. and Pers.; چنبیلی - chambelí, Hind. and Dec.; ಜಾಜಿಮಲ್ಲಿಗೆ - jájimallige, Can.; ಜಾಜಿಪೂ - jájipú, Too.; జాజి - dzáji, Tel.; പിച്ചകം - piççakam, Mal.; සමන්පිච්ච - samanpiçça, Singh.; பிச்சி - piççi, Tam.). San. from (jan, san. to be born) [common nutmeg]; meaning well born and so useful. Conc. means jaujy jasmine. Can. from (játi, can. high caste + mallige, can. jasminum sambac, ait.); from good smell. Tel. from sanscrit. Mal. from (piççu, mal. madness + akam, mal. inside). Singh. from (saman, singh. generic name of jasmine + piçça, sing. jasminum sambac, ait.). San. also (málatí), meaning holding fragrance [madablota, wild jasmine, wild nutmeg]. Mahr. also (jáí), from sanscrit. Hind. also (játi) from sanscrit. Tel. also (dzádi); (adavimalle), meaning jungle + jasmine. Mal. also (piççakamulla). Tam. also (sháthimalligai), meaning superior jasmine; (kodimalligai), meaning creeper + jasmine; (padarmalligai), meaning to spread + jasmine. Title otherwise Catalonian jasmine, Chambalee, Jaujy, Jauty, Large flowered jasmine, Spanish jasmine. Botanically Jasminum grandiflorum, linn., oleaceæ [vricsham, 85]. Shrub with pinnate foliage, the leaflets less than an inch long; in blossom during both the hot and rainy seasons with middling-sized, white, fragrant flowers; most fragrant species of the genus, and is very generally cultivated; flowers used in garlands on all festive occasions; flowers retain their odour when dried; yields the true essential oil [attar] of jasmine.——*Coral jasmine* (शेफालिका - shép'háliká, San.; पारिजात - párijáta, Mahr.; पारिजातक - párijátaka, Conc.; هرسنگار - harsingár, Hind.; کیسر - kesar, Dec.; ಪಾರಿಜಾತ - párijáta, Can.; ಪಾರಿಜಾತ - párijáta, Too.; పారిజాతము - párijátamu, Tel.; ଗଙ୍ଗ - gongo, Oor.; മഞ്ഞപ്പൂമരം - maññappúmaram, Mal.; සේපාල - sépála, Singh.; பவழமல்லிகை - pavazhamalligai, Tam.). Title from color of flower stalks. San. from (shép'ha, san. sleeping + ali, san. beetle); from fragrant flowers attracting beetles. Mahr. from (pári, san. water + jan, san. to be born); from a tradition of its origin from the ocean [coormam]. Conc. from mahratta. Hind. from (hára, san. garland + shringára, san. beauty). Dec. from (káshmíraja, san. saffron, crocus sativus, linn.); from color of flower tube. Can., &c., from sanscrit like mahratta. Mal. from (maññа, mal. yellow + pú, mal. flower + maram, mal. tree); from orange tube of flowers. Singh. from sanscrit. Tam. from (pravála, san. coral + malliká, san. jasminum sambac, ait.). San. also (párijáta), meaning sea-born, that is celestial [common coral tree]. Hind. also (kesarkáphúl), meaning saffron flower. Can. also (hursing), from hindostany. Tel. also (pagadamalle), meaning coral + jasmine; (krishnavénichettu); (shvétasurasa), meaning white notchy, vitex negundo, linn. [notchy]; (káruchíya); (kirsáru), by gonds. Oor. also (seoli), corruption from sanscrit. Tam. also (shútham), meaning mangifera indica, linn.; perhaps from mango smell of flower; (mañjalbúççedi), meaning yellow flower plant. Title otherwise Beetle's love, Harsingar, Indian mourner, Mango jasmine, Night jasmine, Sad-tree, Sorrowful nyctanthes, Sorrowful tree, Square-stalked nyctanthes, Weeping nyctanthes, White negundo, Yellow flower tree. Botanically Nyctanthes arbortristis, linn., oleaceæ [vricsham, 85]. Alias Nyctanthes pariatica; Parilium arbortristis; Scabrita scabra, triflora. Tree, 15–20 feet, young shoots four sided; leaves opposite, short-petioled, cordate or oblong, pointed, entire or coarsely serrate, scabrous; panicles terminal, composed of smaller six-flowered terminal umbellets; calyx campanulate, slightly five-notched, downy; corolla tube cylindric, as long as the calyx, segments five to seven; involucel of four inverse-cordate, opposite, sessile leaflets; flowers numerous; tube orange-colored; border white, fragrant; flowering nearly all year; cultivated in gardens and near temples; the flowers are fragrant during night only; at sunset they open, and before morning ground is covered with fallen corollas. The fruit is a dry, flat, oblong, mucronate capsule, prominently veined, ¾ inch long by ½ inch broad; it is of a brown color when ripe, and is divided into two cells, each of which contains a flat foliaceous seed of a light brown color; the testa of the seed is thin, the kernel white, bitter and very astringent; the leaves have similar properties, and stain the saliva when chewed. Flower religious. Fresh juice of leaves given with honey [shahad] in chronic fever; decoction of leaves specific for sciatica; powdered seeds for scurfy affections of the scalp; antibilious and expectorant. Native women wear corollas as necklaces [maulay], or twine them in hair; bark yields tanning substances [chamrah]; orange tubes of the flowers dye a fine buff or orange color, sometimes used in combination with turmeric [country saffron], not fast color [shauyam]; an essential oil [attar] from flowers. Wood brown, close-grained, used for fuel.——*Creeper jasmine* (கொடிமல்லிகை - kodimalligai, Tam.). Same as Common jasmine. ——*Divine jasmine* (దేవతామల్లె - dévatámalle, Tel.). From white fragrant flowers. Same as Gray emetic nut.——*Double flowered jasmine* (இருவாட்சி - iruvádchi, Tam.). Meaning double petalled. Same as Arabian jasmine.——*Evening jasmine* (அந்திமல்லிகை - andimalligai, Tam.). From bearing jasmine-like flowers in the evening. Same as False jalap.——*Everlasting jasmine* (வாடாமல்லிகை - vádámalligai, Tam.). From unchanging color. Same as Jaffer goondy.——*Golden jasmine* (हेमपुष्पिका - hémapushpiká, San.; कुसर - kusara, Mahr.; పచ్చఅడవిమొల్ల - pattsaadavimolla, Tel.; പൊന്മല്ലിക - ponmallika, Mal.). Title from flowers. San. from (héma, san. gold + pushpa, san. flower), from bright yellow flowers. Tel. from (pattsa, tel. yellow + adavimolla, tel. jasminum auriculatum, vahl.). Mal. from (pon, mal. gold + mallika, mal. jasmine). San. also (suvarnayút'hiká), meaning gold + jasminum auriculatum, vahl. Title otherwise Italian jasmine, Lowly jasmine, Nepaul jasmine, Yellow jasmine. Botanically Jasminum humile, linn., oleaceæ [vricsham, 85]. Alias Jasminum bignoniaceum, chrysanthemum, revolutum, revolutum, var. peninsulare. Erect, not scandent; leaves alternate, pinnated; branches angled; leaflets three, five, seven, eleven-obovate, oblong, narrowed at the base, subacute at the apex; panicles terminal, opposite the leaves, corymbose; calyx acute and acutely denticulate; flowers few, yellow, fragrant; flowering all the year. A stout shrub, from 8–12 feet high, with stems as thick as a man's leg, and foliage of dark green unequally pinnate leaves, bears corymbs of ten to twenty large flowers. Useful in ringworm; wood white, moderately hard, even-grained.——*Large jasmine* (నాగమల్లె - nágamalle, Tel.). Title from size of flowers. Tel. from (nága, tel. large + malle, tel. jasmine). Tel. also (adavimalle), meaning jungle + jasmine. Title otherwise Broad-leaved jasmine. Botanically Jasminum latifolium, r., oleaceæ [vricsham, 85]. Shrubby, climbing; leaves cordate and oblong-acute, glabrous; corymbs terminal, diffuse; calycine lobes five to seven, subulate; lobes of the corolla eight to twelve linear-cuspidate; berries kidney-shaped and oblong; flowers large, white, fragrant; flowering in march and april.——*Lily jasmine* (زنبق - zambak, Ar.). Title from resemblance. Same as Arabian jasmine.——*Mango jasmine* (சூதம் - shútham, Tam.). Title from similar odour of flowers. Same as Coral jasmine.——*Milky jasmine* (دودھ مگرا - dúdhmográ, Hind.). Milky plant with jasmine-like flowers. Same as Adam's apple.——*Moon jasmine* (ಚಂದ್ರಮಲ್ಲಿಗೆ - chandramallige, Can.). From bearing jasmine-like flowers in the evening. Same as False jalap.——*Musk jasmine* (कुन्द - kunda, San.; कस्तूरमोगरा - kastúramógará, Mahr.; कस्तुरिमोग्रे - kasturimógré, Conc.; ಕಸ್ತೂರಿಮಲ್ಲಿಗೆ - kastúrimallige, Can.; ಬೊಳ್ದುಮಲ್ಲಿಗೆ - boldumallige, Too.; గుజరి - gujari, Tel.; കുറുക്കുത്തിമുല്ല - kurukkuttimulla, Mal.; மல்லிகை -

malligai, Tam.). Title from smell. San. from (ku, san. earth + dó, san. to cut) [coo]. Mahr. and conc. from (kastúrí, san. musk + mógará, mahr. jasmine, jasminum sambac, ait.). Can. from (kastúrí, san. musk + mallige, can. jasmine). Too. from (boldu, too. white + mallige, too. jasmine). Mal. from (kurukka, mal. to sprout + mulla, mal. jasmine, jasminum sambac, ait.). San. also (mághyá), meaning produced in the month of maugham [mausam] or february; (atimuktá), meaning surpassing pearl in whiteness [madablota, nemmy]; (vásanti), meaning produced in spring season. Can. also (doddakádumallige), meaning large + wild jasmine. Mal. also (kuruna); (káttuchírakamulla), meaning wild + cuminum cyminum, linn. + jasmine. Tam. also (magarandam), meaning honey of flower. Title otherwise Downy jasmine, Many-flowered jasmine, Pubescent jasmine. Botanically Jasminum pubescens, wild., oleaceæ [vricsham, 85]. Alias Jasminum hirsutum, multiflorum; Mogorium hirsutum, pubescens; Nyctanthes hirsuta, multiflora, pubescens; mogorium from (mógará, mahr. jasminum sambac, ait.). Shrubby; branchlets hirsute; leaves opposite, short-petioled, cordate, mucronate, below and with the petioles tomentose, above afterwards glabrous; flowers congested in terminal umbels, subsessile; calycine lobes six to nine filiform, hirsute; tube of the corolla a little longer than the calyx; lobes oval, mucronate; flowers white, fragrant; flowering nearly all the year. ——*Needle jasmine* (यूथिका - yút'hiká, San.; जुई - juí, Mahr.; سوئی مگرا - suímográ, Hind.; جوهی - júhí, Dec.; ಸೂಜಿಮಲ್ಲಿಗೆ - sújimallige, Can.; సన్నజాజి - sannadzáji, Tel.; බොළිඳ - bolidda, Singh; ஊசிமல்லிகை - úsimalligai, Tam.). Title from long slender flower-stalks. San. from (yút'ha, san. multitude), from multitude of flowers. Mahr. from sanscrit. Hind. from (suí, hind. needle + mográ, hind. jasmine, jasminum sambac, ait.). Dec. from sanscrit. Can. from (súji, can. needle + mallige, can. jasmine). Tel. from (sanna, tel. slender + dzáji, tel. jasminum grandiflorum, linn.). Tam. from (úsi, tam. needle + malliká, san. jasmine, jasminum] sambac, ait.). San. also (súchimalliká), meaning needle + jasmine; (ambasht'há), meaning sound + abiding, from the sound of beetles crowding round fragrant flowers [sour auray]; (mágadhí), meaning produced in magadham [long pepper]; (gaṇiká), meaning attractive like harlot. Hind. also (jutipushpaka), meaning shoe flower. Tel. also (adavimolla), meaning forest + jasminum sp.; (erraadavimolla), meaning red + the plant; (tellaadavimolla), meaning white + the plant; (molla). Title otherwise Eared jasmine, Harlot jasmine, Small jaujy. Botanically Jasminum auriculatum, vahl., oleaceæ [vricsham, 85]. Alias Jasminum ovalifolium. A small, twining shrub, having large, heart-shaped leaves, with a pair of minute leaflets on their foot-stalks, bears numerous middle-sized, white, starlike, very fragrant flowers; flower religious; flower gives mahomedan perfume [attar].——*Night jasmine* (یاسمین شب بو - yásamínishabbo, Hind.). From bearing jasmine-like flowers in the evening. Same as Coral jasmine.——*Rangoon jasmine* (రంగూనుమల్లె - rangúnumalle, Tel.). Same as Rangoon creeper.——*Red jasmine* (ಕೆಂಪುಮಲ್ಲಿಗೆ - kempumallige, Can.). From bright red flowers. Same as Indian pink.——*Rice grain jasmine* (چال موگرا - chálmográ, Hind.). From similar odour and seed like rice grain. Same as Chaulmoogra.——*River jasmine* (ఏటిమల్లె - étimalle, Tel.; සුදුකිඹුල්වන - sudukimbulvanna, Singh.). Title from habitat. Tel. from (éru, tel. river + malle, tel. jasmine). Singh. from (sudu, singh. white + kimbulvanna, singh. polygonum). Botanically Polygonum [water gannair] tomentosum, willd., polygonaceæ [vricsham, 110]. Whole plant covered with adpressed hairs; stem erect, furrowed, thick, glabrescent below; ochreæ long, limb membranaceous, erect, long-bristly-ciliate; leaves oblong-lanceolate, attenuated at both ends; spikes panicled, linear, straight, dense flowered; bracts obtuse; ciliated angles of the achenium not lineate, faces convex; flowers white; flowering in the rainy season.——*Snake jasmine* (यूथिकपर्णी - yút'hikaparní, San.; गजकरण - gajakarana, Mahr.; پالک جوهی - pálakjúhí, Hind.; کبوتر کا جهار - kabútarkájhár, Dec.; ನಾಗಮಲ್ಲಿಗೆ - nágamallige, Can. and Too.; నాగమల్లె - nágamalle, Tel.; പുഴുക്കൊല്ലി - puzhukkolli, Mal.; ඇනිත්ත - anitta, Singh.; நாகமல்லி - nágamalli, Tam.). Title from cure against snake bite. San. from (yút'hiká, san. jasminum auriculatum, vahl. + parna, san. leaf). Mahr. from (gaja, san. elephant + karna, san. ear); epithet for ring-worm; from plant curing ring-worm. Hind. from (pálá, mahr. potherb + júhí, hind. jasminum auriculatum, vahl.). Dec. from (kabútar, hind. pigeon + jhár, hind. tree). Can. and too. from (nága, san. serpent + mallige, can. jasmine). Tel. similar. Mal. from (puzhu, mal. worm + kollu, mal. to kill) [indian worm-killer]. Tam. from (nága, san. serpent + malliká, san. jasminum, sambac, ait.); root cures snake-bite. Hind. also (joípání), meaning river + water, or corrupted from sanscrit. Mal. also (pushpakédal); (nágamalli), meaning serpent's jasmine. Tam. also (uragamalli), meaning snake + jasmine; (aniççai). Title otherwise Nasuta, Nauga mully, Ring-worm root, Tongpang-chong, White-flowered justicia. Botanically Rhinacanthus communis, nees, acanthaceæ [vricsham, 101]. Alias Justicia nasuta, scandens. Shrub, 4–5 feet; stem erect, green, shrubby; young shoots jointed; leaves opposite, broad lanceolate, short-petioled, a little downy below, entire; panicles corymbiform, axillary and terminal, trichotomous; peduncels and pedicles short, round, a little downy; corolla with a long slender compressed tube, under lip broad, three-cleft, upper one erect, linear, sides reflected, apex bifid; flowers small, white; flowering nearly all the year. The leaves when chewed have a pungent taste something like cassia [q.v.] bark; their odour when crushed is disagreeable. Fresh root and leaves bruised, mixed with lime-juice, a remedy in ring-worm and cutaneous affections; seeds similar; milk boiled on the roots is with lime [q.v.] juice and pepper [q.v.] a cure for snake bite; quoted in pharm., non-officinal.——*Spanish jasmine* (یاسمین اسپن - yásamíniispen, Hind.). Same as Common jasmine.——*Tree jasmine* (नवमल्लिका - navamalliká, San.; नेवाळी - néválí, Mahr.). Title from size of plant. San. from (nava, san. new + malliká, san. jasmine, jasminum sambac, ait.). Mahr. from sanscrit. San. also (varakunda), meaning superior jasmine; (saptalá), meaning attracting the seven organs of sense including mind and booddhy; (navamáliká), meaning new jasmine. Mahr. also (thóramógar), meaning large jasmine. Botanically Jasminum arborescens, roxb., oleaceæ [vricsham, 85]. Alias Jasminum arboreum; Nyctanthes grandiflora. Shrub or small tree; branches sub-erect, younger ones with the petioles, peduncles, bracteoles and calyx pubescently hirsute; leaves opposite or ternately verticilled, ovate, subcordate, acute, glabrous above, puberulous below; petioles jointed in the middle; calycine lobes five to six, subulate, short; lobes of the corolla ten to twelve, linear-oblong; stigma two-lobed; flowers numerous, arranged in terminal corymbs, large, snow-white, very fragrant; flowering in march and april. Tree jasmine is in dravidian languages the same as Indian cork [q.v.].——*Turk jasmine* (துலுக்கமல்லிகை - tulukkamalligai, Tam.). Title from use by mahomedans. Same as Gendah. ——*Wild jasmine* (अस्फोटा - ásp'hótá, San.; रानमोगरी - ránamógarí, Mahr.; कुसरि - kusari, Conc.; بیل موگرا - belmográ, Hind.; مالتی - málatí, Malay; ಕಾಡುಮಲ್ಲಿಗೆ - kádumallige, Can.; ಎದ್ರೋಳಿ - edróli, Too.; అడవిమల్లె - adavimalle, Tel.; കാട്ടുമല്ലിക - káttumallika, Mal.; වල්පිච්ච - valpiçça, Singh.; காட்டுமல்லிகை - káttumalligai, Tam.). San. from (á, san. prefix showing slightness + sp'hut, san. to blossom) [arabian jasmine, yercum]. Mahr. from (rána, mahr. wild + mógari, mahr. jasmine, jasminum sambac, ait.). Hind. from (bel, hind. creeper + mográ, hind. jasmine). Malay from (málá, san. garland) [common jasmine, madablota, wild nutmeg]. Can. from (kádu, can. wild + malligegida, can. jasmine plant). Tel. from (adavi, tel. jungle + malle, tel. jasminum). Mal. from (kátu, mal. forest + malliká, san. jasmine). Singh. from (val, singh. jungle + piçça, singh. jasminum sambac, ait.). Tam. from (kádu, tam. forest + malliká, san. jasmine, jasminum sambac, ait.) [indian cork]. San. also (supújá), meaning good + adoration; (kánanamalliká), meaning forest + jasmine; (vanamallí), meaning forest + jasmine; (priyá), meaning pleasing. Hind. also (banmalliks), meaning forest + jasmine. Malay also (málur); (mánur). Tel. also (chirimalle), meaning small + jasminum. Mal. also (káttupiççakam), meaning forest + jasminum grandiflorum, linn.; (káttupiççakamulla), meaning forest + the plant, jasminum grandiflorum, linn.; (vanamallika), meaning forest + jasmine. Singh. also (valsamanpiçça), meaning wild jasminum grandiflorum, linn. Tam. also (vanamalligai), meaning forest + jasmine; (shirumalli), meaning small + jasmine. Title otherwise Aspotah, Narrow-leaved jasmine. Botanically Jasminum angustifolium, vahl., oleaceæ [vricsham, 85]. Alias Jasminum triflorum, vimineum; Mogorium triflorum, vimineum; Nyctanthes angustifolia, triflora, viminea. Small twining shrub; long twig-like stems; leaves opposite, ovate or oblong, finely pointed, smooth, of a shining deep green; flowers terminal, generally by threes; calycine segments acute; segments of corolla 8–9, lanceolate; berries single, ovate; flowers smallish, white with a faint of red, star-shaped, fragrant; grows wild in woods and differs but little from the common jasmine. Flower religious; the bitter root ground small and mixed with lime-juice and vashamboo [q.v.] root is considered a good remedy in ringworm; well adapted for screening windows and covering arbours. Wild jasmine is in arabic the same as Indian sarsaparilla.

JATAY (जटा - jatá, *San.*; சடை - shadai, *Tam.*). From (jat, san. to become twisted together). Matted hair [lomam] worn by Shiva [q.v.] and his ascetics. Also means Jatamansy which see below. Compare, where transl. is of second term:—Acorus calamus (shadaikkóthan), bushy haired; Celosia cristata (jatádharí), wearing; Cyperus rotundus (shadámáñji), flesh; Cyperus tuberosus (jatámámsí), flesh; Eragrostis bifaria (shadaippul), grass; Nardostachys jatamansi (jatámámsí), flesh; Nardostachys jatamansi (shadámánji), flesh; Phaseolus trinervus (shadaippayaru), phaseolus mungo. See gloss. paragraphs.——*Jadabillay* (జడబిళ్ల - jadabilla, Tel.). From (above + billa, tel. plate). Ornament [nagay] worn on top of head.——*Jatamansy* (जटामांसी - jatámámsí, San.; जटामांवसी - jatámámvasí, Mahr.; سنبل الطیب هندی - sumbuluttíbihind, Ar.; سنبل الطیب هندی - sumbuluttíbihindí, Pers.; جتاماسی - jatámásí, Hind.; جهتاماسی - jhatámásí, Dec; ಜಟಾಮಾಂಸಿ - jatámámsí, Can., Too. and Tel.; ജടാമാഞ്ചി - jatámáñchi, Mal.; ජටාමාංස - jatámánsa, Singh.; சடாமாஞ்சி - shadámáñji, Tam.). San. from (jatá, san. matted hair + mámsí, san. the plant); from appearance of root. Mahr. from sanscrit; Ar. from (sumbul, ar. arsenic + tib, ar. fragrant

+ hind, pers. india); from its properties. Pers. from arabic. Hind., &c., from sanscrit [common sedge]. San. also (jatá), meaning matted hair; (naliká,) meaning fragrant; (lómashá), meaning hairy; (tapasviní), meaning ascetic-like; (mámsí), meaning fleshy. Ar. also (sumbululasáfírihindí), meaning indian sparrow arsenic; (múigiyáh), meaning hair + grass. Hind. also (bálchhar), meaning hair + matted; (chahur), meaning matted; (viláitíjhatámásí), meaning foreign jatamansy; (billílotan), meaning cat + valerian, from fondness of cats; compare cooppamainy [q.v.], cat plant. Can. also (sugandhamuste), meaning fragrant + cyperus rotundus, linn.; (ganigilamuste), meaning oleander, nerium odorum, soland + cyperus rotundus, linn.; (jatámávashi). Tel. also (jatámáshi). Mal. also (máñchi), by corruption. Tam. also (namattam). Greek νάρδος ἰνδική, Latin spica narpi. Title otherwise Cat valerian, Fragrant cyperus, Hair grass, Himalayan valerian, Indian spikenard, Sparrow arsenic, Valerian spikenard. Botanically Nardostachys jatamansi, dc., valerianeæ [vricsham, 72]. Generic from root being shaped like ear of corn. Specific from sanscrit meaning as above. Alias Patrinia jatamansi; Valeriana jatamansi. Rootstalk woody, long, stout, covered with fibres from the petioles of withered leaves; stem 4–24 inches, more or less pubescent upwards, often glabrate below, subscapose; radical leaves 6–8 by 1 inch, longitudinally nerved, glabrous or slightly pubescent, narrowed in the petiole; cauline one or two pairs, 1–3 inches long, sessile, oblong or subovate; flower heads usually 1, 3, or 5; bracts ¼ inch, oblong, usually pubescent; corolla-tube ¼ inch, long, somewhat hairy within, as are the filaments below; fruit ⅛ inch long, covered with ascending white hairs, crowned by the ovate, acute, often dentate calyx-teeth. A dwarf, unattractive, herebaceous pot-plant; bears small, dirty white flowers in march, on a long erect spike, in much repute for their fragrance; native of mountains of n. india. The drug consists of a short portion of rhizome about as thick as the little finger, of a dark grey color, surmounted by a bundle of fine reddish-brown fibres, the whole forming an object not unlike the tail of a sable or martin; the fibres are produced by an accumulation of the skeletons of the leaves, and are matted together, forming a kind of network; amongst them the remains of flower stalks may be found; the odour of the drug is heavy and peculiar, like a mixture of valerian and patchouli [q.v.], the taste bitter and aromatic; when the central portion is removed and cut across it is seen to consist of a thin cortical portion connected with the central woody column by four medullary bands, between which are situated large canals which contain the fibro-vascular bundles; the central woody column is of a red-brown color, angular and jointed, having a certain amount of resemblance to the vertebræ in the tail of an animal. Root is of a blackish color and resembles bushy tail of the ermine; as met with in bazaar [q.v.], occurs in the form of short pieces of an underground stem, about the thickness of a goose quill, covered towards its tapering extremity, or almost entirely, with coarse, dark, hair-like fibres; odour, peculiar and fragrant; taste, aromatic and bitterish. Spikenard root is stimulant and antispasmodic; much used in treatment of epilepsy, hysteria, and convulsive affections; veidyans [q.v.] prepare from it, in combination with certain oils, a fragrant and cooling liniment for the head; substituted for british valerian root; in pharm. non-officinal. Has the effect of ordinary valerian on cats [poonay]; believed to have power of promoting growth and blackness of hair.——*Jatauyoo* (जटायुस् - jatáyus, San.). From (jatá, san. matted hair). The vulture [gidh] of mythology [garoodan].

JATRAH (यात्रा - yátrá, *San.*; جاترا - játrá, *Hind.*). From (yá, san. to go). A pilgrimage [yautray] to a place of reputed sanctity; a festival in honor of the tutelary goddess of a village [coloopoo]. Jatree is a pilgrim. Compare mahomedan Haj and Hajee.——*Jautrey* (جاترا - játrá, Hind.; జాతర - dzátara, Tel.). From (yá, san. to go). Pilgrimage; processional festival [pundigay, 6d]. A confluence of people at the feast of any holy place [cshetram].

JAUMA (جامہ - jámah, *Hind.*). A long gown having a very large quantity of cloth, from eleven to thirty breadths, in the skirt, which at the upper part is folded into innumerable plaits, The body part is tied in two places on each side, being double-breasted [sheelay]. Pyjauma [q.v.] is mussulman trousers.

JAUMAM (याम - yáma, *San.*; జాము - dzámu, *Tel.*; சாமம் - sámam, *Tam.*). From (yáma, san. motion). A watch, as measure of time. 7½ nauzhigays or indian hours = 1 jaumam or watch, 2 jaumams = 1 nairam or half daylight [caulam, 1]. Approximate actual valne, 1 jaumam = 3 English hours. Generally applied to the night hours. From 6 to 9 P.M. is Moothalaunjaumam, first. From 9 to midnight is Irandaunjaumam, second. From 12 to 3 A.M. is Moondraunjaumam, third. From 3 to 6 A.M. is Naulaunjaumam, fourth. Midnight is Nadoojaumam, the middle jaumam. Noon is Madhyaunam, or middle day; also Ooroomam [q.v.] or hot hour. Same as San. yaumam, praharam. See vol. I, 609. Jauma cozhy is the cock [moorghy], as indicating the midnight watch by crowing [jackal].

JAUMEEN (ضامن - zámin, *Hind.*). From (zamana, ar. to be responsible). Security, bail [zaumin].

JAUMOON (جامن - jámun, *Hind.*). From (jam, san. to eat) [jam]. A common term for several eugenias [jamboo].——*Ceylon jaumoon* (ಗುಡ್ಡಪನ್ನೇರಳು - guddapannéralu, Can.; ସଗରବଟ୍ନ - sagarabatna, Oor.; വെളുത്തഞാറ - veluttañára, Mal.). Can. from (gudda, can. hill + pannéralu, can. eugenia jambos, linn.). Mal. from (velutta, mal. white + ñára, mal. eugenia jambolana, lamk.). Title otherwise White jaumoon. Botanically Eugenia [jamboo] zeylanica, wight, myrtaceæ [vricsham, 56]. Alias Acmena zeylanica; Eugenia spicata; Myrtus zeylanica; Syzygium bellutta, spicatum, zeylanicum. Belutta from (velutta, mal. white). Arborescent; leaves ovate or oblong, much acuminated, coriaceous, shining on the upper side; flowers shortly pedicillate, forming axillary or terminal compound cymes that are often arranged in a kind of contracted raceme or spike; calyx pruinose, calvate, elongated, repand, five lobed; berry white, globose, one seeded; malabar; affects beds of rivers.——*Cherry jaumoon* (رائی جامن - ráíjámun, Hind.; බටදොඹ - batadomba, Singh.). Title from similar fruit. Hind. from (ráí, hind. mustard seed, small + jámun, hind. eugenia jambolana, lamk.) [common jaumoon]. Singh. from (bata, singh. bamboo + domba, singh. poon, calophyllum inophyllum). Botanically Eugenia [jamboo] operculata, roxb., myrtaceæ [vricsham, 56]. Alias Eugenia cerasoides, nervosa, paniala; Syzygium angkolanum, costatum, nervosum, nodosum. Angkolanum from (ankólam, mal. alangium lamarckii, thw.). Paniala from (pániaunla, hind. water phyllanthus). Large tree; branches sub-terete or four-gonous; leaves three to eight by 2–4 inches, sub-coriaceous, dots often black, rarely pellucid; primary veins eight to twelve, curving into a rather faint intramarginal vein; petiole ⅓–⅔ inch; inflorescence often thyrsoidal; peduncles long, acutely angled; flowers small, greenish, in threes, nearly sessile, odorous; calyx campanulate, with short obtuse lobes or nearly truncate; petals united and falling in one piece, calyptra often apiculate; berry ¼–⅓ inch, rugose, juicy. Low elevations on mountains on west side; fruit eaten; timber similar to jambolana [common jaumoon], reddish grey, hard.——*Clove-leaved jaumoon* (काकजम्बु - kákajambu, San.; جامن - jámun, Hind. and Dec.; ಜಂಬುನೇರಳೆ - jambunérale, Can.; నేరేడు - nérédu, Tel.; கொட்டைநாகம் - kottainágam, Tam.). San. from (káka, san. crow + jambu, san. eugenia jambolana, lamk.); from dark-purple colour of fruit. Hind. from sanscrit. Tam. from (kottai, tam. seed + nágam, tam. jaumoon tree). San. also (shvétajambu), meaning white jaumoon. Dec. also (ujlájámun), meaning white jaumoon. Tam. also (nárunaruvili), meaning to smell + cordia obliqua, willd.; (vellainával), meaning white jaumoon. Botanically Eugenia [jamboo] jambolana, lam., var. caryophyllifolia, myrtaceæ [vricsham, 56]. Alias Calyptranthes caryophyllifolia; Eugenia caryophyllifolia. Leaves ovate-lanceolate with a long acumen, calyx shortly four-toothed, berry size of a large pea [calauyam], globose. Fruit, when ripe, is of a very dark purple color unpleasantly acid, astringent, not eaten; in taste somewhat resembles the sloe, but sweeter.——*Common jaumoon* (जम्बु - jambú, San.; जाम्ब - jámba, Mahr.; जम्ब - jamba, Conc.; جامن کا پیڑ - jámunkáper, Hind.; جامون کا جہاڑ - jámúnkájhár, Dec.; ನೇರಳೆ - nérale, Can.; ನೇರೊಲು - nérolu, Too.; నేరేడు - nérédu, Tel.; ଜାମୁ - jamo, Oor.; ഞാവൽ - ñával, Mal.; මාදං - mádam, Singh.; நாவல் - nával, Tam.). San. from (jam. san. to eat); edible. Mahr., &c., from sanscrit [dark vail, malacca jaumoon, rose apple]. Mal. from tamul. Tam. from (náru, tam. to smell); from fragrant fruit. Hind. also (kálájám), meaning black guava; (jamblú); (ráíjámun), meaning small jaumoon [cherry jaumoon]. Can. also (narala); (náyinéralamara), meaning dog + the tree. Tel. also (peddanérédu), meaning large + the tree; (rátsanérédu), meaning royal + the tree; (allanérédu); meaning noted + the tree. Mal. also (kizhakkaññáral), meaning east + the tree; (periññára), meaning large + the tree. Tam. also (nágam); (takkólam); (kottainával), meaning seed + the tree; (kottainágam), meaning seed + the plant. Title otherwise Black plum, Dark guava, Jambolin, Java plum, Jumrool, Myrtle bloom, Nauwal, Neraid. Botanically Eugenia [jamboo] jambolana lamk., myrtaceæ [vricsham, 56]. Specific name corr. from sanscrit, Alias Calyptranthes caryophyllifolia, jambolana; Eugenia corticosa, fruticosa, jambolifera, moorie, obtusifolia; Myrtus corticosa, cumini, cyminum; Syzygium caryophyllifolium, jambolanum. Not to be confounded with the eugenia jambos or rose-apple [q.v.], which has a larger fruit. Tree, 70–80 feet; leaves oval or oblong, more or less acuminated or obtuse, feather-nerved, coriaceous; cymes panicled, lax, usually lateral on the former year's branches occasionally axillary or terminal; calyx shortly turbinate, truncated; berry olive-shaped, often oblique; flowers small, white, honey smelling; flowering in march; tree attains its full size in 40 years; found almost everywhere throughout plains; much planted in topes [q.v.] and avenues [shaulay], ascends mountains to 4,000 feet. The fruit unless improved by cultivation is about the size and shape of a small olive [zeitoon], of a purple color, and very astringent; within it is a thin white papery shell, which encloses a large green kernel, also very astringent; the bark is grey and fissured externally; internally it is red and fibrous; its minute structure is remarkable in having several rows of very large, pitted, oblong-oval cells, which can be easily seen with the naked eye; the odour is like that of oak [belote] bark, and the taste very astringent; the

leaves are 3 to 6 inches long, ovate or oblong, obtuse, more or less acuminate, coriaceous, smooth, shining, closely nerved, the numerous nerves uniting within the margin; when crushed they have an agreeable terebinthinate odour, and on distillation yield a bright green oil. The proximate composition of dry jaumoon [q.v.] seeds is:—essential oil, a trace; chlorophyll and fat, 0·37; resin soluble in alcohol and ether, 0·30; gallic acid, 1·65; albumin, 1·25; colored extractive soluble in water, 2·70; moisture, 10·00; insoluble residue, 83·73; total 100·00; the bark of the tree contains 12 per cent. of tannin and affords a kino-like gum [gond]. According to the deerghama sootram it is one of the four colossal mythic trees which mark the four cardinal points [ashtadic], standing to the south of mount meroo [q.v.]; four great rivers rise at its foot; the vishnoopooraunam [q.v.] states that the continent of jamboodweepam [q.v.] takes its name from this tree. A vinegar [caudy] prepared from the juice of the ripe fruit is an agreeable stomachic and carminative, it is also used as a diuretic; a sort of spirituous liquor, called jambauva, is prepared by distillation from the juice; the bark is astringent, and is used, alone or in combination with other medicines of its class, in the preparation of astringent decoctions, gargles and washes; the fresh juice of the bark is given with goat's [vellaud] milk in the diarrhœa of children; the expressed juice of the leaves is used alone or in combination with other astringents in dysentery. Fruit eaten by natives, who also eat kernels in times of famine; fruit improved in taste by being pricked and rubbed with salt [ooppoo] and allowed to stand an hour; unimproved it has flavor something like radish. Bark dyes excellent durable browns [shauyam] of various shades according to the mordant [cauram] employed, or the strength of the decoction; gives a gum [gond]; suited for avenues [shaulay]. Wood used for house-building, cart framing, agricultural implements, &c., resists action of water very well, used for well work, is tolerably close and even grained, not very strong or durable except in water, and in color dirty brown, reddish when fresh. There is a Teloogoo proverb:—"నేరేడు పండితే నేలంతా పండు—" If the jaumoon "fruits freely, it foretells a good harvest."——*Coromandel jaumoon* (هجلی مهندی - hijlímhendí, Hind.; అరమండ - aramanda, Tel.; තඹිලිය - tambiliya, Singh.). Tel. also (goragamudi); (aravita). Botanically Eugenia [jamboo] bracteata, j., myrtaceæ [vricsham, 56]. Alias Eugenia roxburghii, zeylanica; Myrtus bracteata, coromandeliana, heynei, latifolia, ruscifolia. Shrub; young parts covered with rusty pubescence; leaves ovate-oblong, tapering or cuneate at the base, obtuse or shortly acuminated, at first slightly downy, afterwards glabrous and shining above; peduncles usually axillary, sometimes terminal, shot, one-flowered, longer than the petioles, one to four-together, with two small bracteoles under the calyx; calyx-segments four, unequal linear-oblong, ciliate; petals four; fruit globose, one to two seeded; flowers white; very common on all the coromandel coast near the sea-shore; flowering nearly all the year.——*Java jaumoon* (جامرول - jámrúl, Hind.). Botanically Eugenia [jamboo] javanica, lamk., myrtaceæ [vricsham, 56]. Alias Jambosa alba. Tree; trunk rarely straight and soon divided, branchlets terete or terete-compressed; leaves 5–6½ by 1¾–2¾ inches, or larger in cultivated examples; nerves indistinct above, slender but prominent beneath and uniting in loops within the margin; calyx-tube turbinate, about ½ inch, slender below; lobes four, rather unequal, membranous at the edges; berry size of the medlar, white or red; flowering in march and april, and fruit ripens in may and june. Berry shining and wax-like [mom]; has a raw, watery, insipid taste, not fit to be eaten.——*Lowly jaumoon* (भूमिजंबु - bhúmijambu, San.; నేలనేరేడు - nélanérédu, Tel.; සිරිබෙක්කු - siribekku, Singh.; பூமிசம்பு - púmisambu, Tam.). San. from (bhúmi, san. ground + jambu, san. eugenia jambolana, lam.). Tel. from (néla, tel. ground + nérédu, tel. eugenia jambolana, lam.). Tam. from sanscrit. Tel. also (gantubhárangi), meaning knotted bhraungy [q.v.]. Tam. also (shiruthékku), meaning small + teak, tectona grandis, linn. f. [knotted bhraungy]. Title otherwise Ground rose-apple. Botanically Premna [jayah] herbacea, roxb., verbenaceæ [vricsham, 102]. Suffruticose, depressed or herbaceous, without a stem; branchlets, cymes and network of the leaves hairy-pubescent; leaves very shortly petioled, obovate or rotund, subacuminate, serratodentate above, villosely ciliated; upper surface at last glabrate, lower somewhat hoary and densely glandular-dotted; cymes terminal and axillary, shorter than the leaf; calyx five cleft, round-lobed, ciliated; flowers small, pale whitish yellow; flowering in february and march. Drupe ¼ inch in diameter, globose; roots about as thick as a crowquill with numerous almost globular woody knots. Juice of root given with juice of ginger [q.v.] and warm water in asthma.——*Malabar jaumoon* (നാട്ടുജമ്പു - náttujambu, Mal.). Mal. from (nátu, mal. country + jambu, san. eugenia jambos, linn.). Botanically Eugenia [jamboo] malabarica, bedd., myrtaceæ [vricsham, 56]. Middling sized tree; branchlets terete; leaves 2–5 by 1–2¾ inches, minutely dotted beneath; petiole ⅛–½ inch; cymes about ½ inch; calyx tube more or lesss truncate in age, about $\frac{1}{12}$ inch diameter; petals orbicular with a slight claw, pointed, very soon deciduous. Common in Wynaud.——*Malacca jaumoon* (जम्बु - jambu, San.; जांब - jámba, Conc.; ملاکا جام - malakakájám, Hind.; ಕೆಂಪುಜಂಬುನೇರಳೆ - kempujambunérale, Can.; జంబునేరేళు - jambunérolu, Too.; നാട്ടുജമ്പു - náttujambu, Mal.; சம்புமலாக்காமரம் - shambumalákkámaram, Tam.). San. from (jam, san. to eat); applies to the edible variety. Conc. from sanscrit [common jaumoon, dark vail, rose apple]. Hind. means malacca + psidium guyava, linn. Can. from (kempu, can. red + jambunérale, can. rose apple tree). Mal. from (nátu, mal. country + jambu, san. eugenia jambos, linn.). Tam. means malacca rose apple tree. Tam. also (shambunával). Title otherwise Kavika, Malacca guava, Malay apple, Malay rose apple, Otaheite cashew. Botanically Eugenia [jamboo] malaccensis, linn., myrataceæ [vricsham, 56]. Alias Eugenia macrophylla; Jambosa domestica, malaccensis, purpurascens; Myrtus macrophylla, malaccensis. Shrub 6–8 feet high, with terete-compressed branchlets; leaves 9-12 by 3½ inches, glossy on both surfaces; dots inconspicuous; nerves indistinct above, the primary ones few prominent beneath and united more or less distinctly within the margin, sometimes in double loopings; petiole stout, channelled above, ¼–½ inch; flowers large, and handsome; calyx-tube ¾ inch; lobes unequal, rounded, with membranous edges, the larger pair ⅜ inch long; petals large, suborbicular, glandular; stamens numerous, about 1 inch in length; style long, persistent, nearly equally the stamens. Small tree, smooth leathery laurel-formed leaves, dense racemes of shortly stalked bright crimson flowers; fruit is of the size and form of a small apple [seb], perfectly smooth, of a pure, translucent white, with a blush of crimson; not worth eating. ——*Red jaumoon* (لال جامرول - láljámrúl, Hind.; වල්ජම්බු - valjambu, Singh.). Title from color of fruit. Hind. from (lál, hind. red + jámrúl, hind. eugenia malaccensis, linn.). Singh. from (val, singh. jungle + jambu, singh. the roseapple tree, eugenia jambos, linn.). Title otherwise Red jumrool, Wild jaumoon. Botanically Eugenia [jamboo] aquea, burm., myrtaceæ [vricsham, 56]. Alias Jambosa aquea. Middling sized tree, 20–30 feet, much branched, variable in the form of its foliage, the shape of the calyx-tube, and the color of the flowers; bark smooth, ash colored; leaves coriaceous, black-dotted, 1½–2¼ by 1–1½ inch; midrib prominent below, primary nerves 8–10 on each side forming inconspicuous loops near the margin; flowers large, white, red, or pale purple; calyx-tube turbinate or cylindrical, about 1 inch. Brilliant-colored fruit, size of small apple [seb], of waxy appearance, somewhat aromatic taste, but hardly eatable. ——*Small jaumoon* (சிறுநாகம் - shirunágam, Tam.). Title from size of plant. Tam. from (shiru, tam. small + nágam, tam. eugenia jambolana, lamk.); distinguish from nauga champak [q.v.]. Botanically Eugenia [jamboo] arnottiana, wight, myrtaceæ [vricsham, 56]. Alias Syzygium arnottianum, densiflorum. Leaves elliptic-oblong, acuminated, folded, coriaceous, dotted; cyme dense, corymbose; peduncles lateral, general and partial, stout, the partial ones short and bearing at the apex an umbel of eight to twelve almost sessile flowers, subtended by oblong-linear caducous bracts; calyx shortly turbinate; limb shortly and bluntly four-toothed or lobed; petals expanded before falling off; flowering in february and march. Tree of low growth, covered in season with thousands of large clusters of cream-colored flowers; found on neilgherries, pulneys and anamullays. Fruit eaten, very astringent.——*Water jaumoon* (நீர்நாவல் - nírnával, Tam.). Title from being found in moist places. Botanically Eugenia [jamboo] munronii, wight, myrtaceæ [vricsham, 56]. Middling sized tree, 12–20 feet in height; leaves 6–9 by 2–3 inches; calyx-lobes somewhat membranous. Flowers white; moist western ghaut forests from canara to cape comorin. ——*Wild jaumoon* (වල්ජම්බු - valjambu, Singh.). Same as Red jaumoon.

JAUN (جان - ján, *Hind.*). Means carrier. Small palankeen [q.v.] carriage used by business men in going to their offices.

JAUN (జేన - jéna, *Tel.*; ചാൺ - chán, *Mal.*; சாண் - shán, *Tam.*). Span. Distance between tips of thumb and little finger extended. 12 ungoolams or finger breadths = 1 jaun; 2 jauns = 1 moolam [alavay, 1a]. Approximate actual value, 1 jaun = 9 inches. Same as San. gocarnam, vitasty, Hind. bilisht, Can. gueno, Tel. jena, Mal. chaun. Compare San. pradesham, Tam. adee, wottay. See vol. I, 609; II, 505.

JAUNWAH (جانوا - jánwá, *Hind.*). From (shana, san. sunn hemp, crotalaria juncea, linn.); originally cshatriyas [q.v.] wore hempen threads. Hindoo sacred thread [jandiram, janivaura, poonool, yanyopaveetam].

JAURAH (జార - jára, *Tel.*; ଫାଟିକି - dhattiki, *Oor.*). Tel. also (putiki); (budamara); (chípudi); (shirijána); (jibilikechettu); (tadakatsuvva). Title otherwise Double-colored grewia, Pootiky. Botanically Grewia [dharmanam] salvifolia, heyne, tiliaceæ [vricsham, 27]. Alias Grewia bicolor, rothii. Leaves oblong, oblique at the base, sharply serrulated, under side hairy with white tomentum; peduncles axillary, solitary, one to three-flowered; pedicels somewhat longer than the peduncle; sepals linear-lanceolate, longer than the petals; drupe globose, two-lobed, glabrous; nuts solitary in each lobe, four-celled. Small tree or shrub, common; leaves very white beneath; fruit small, edible. Wood yellow, heart-wood orange-brown, hard, close-grained, structure similar to grewia tiliæfolia, vahl. [tadda], but medullary rays more numerous, and pores smaller.

JAURY (جاری - jári, *Hind.*). From (jará, ar. to flow). Current. Jaury inam is an inam [q.v.] in actual possession of the inamdar. Jaury mittah is a permanently settled estate, as opposed to amauny [q.v.]. Jaury rupee is a current rupee [q.v.].

JAUSTY (زیادتی - ziyádatí, *Hind.*; జాస్తి - jásti, *Tel.*). From (záda, ar. to augment). Increase, addition. For Fusl jausty see Fusl; for Teervay jausty see Teervay.

JAUTY (जाति - játi, *San.*; जाइफल - jáíp'hala, *Mahr.*). From (játi, san. caste) [jan]; high caste, from grateful aroma. Botanically the Myristica genus, myristicaceæ [vricsham, 112]. Lofty tropical trees or shrubs; most of them aromatic and abound in reddish acrid juice; the leaves are entire, flowers very small clustered in the axils of leaves or in panicles; the fruit is fleshy but divides when ripe into two pieces disclosing seed covered by the mace. The species best known to the natives are shown below. Other species are:—Amygdalina, or almond nutmeg, Attenuata, or tapering nutmeg, Farquhariana, or narrow-leaved nutmeg.——*Common nutmeg* (जाति - játi, San.; जाइफळी - jáíp'halí, Mahr.; जायिफल - jáyip'hala, Conc.; شجرة جوزالطيب - shajratijauzuttíb, Ar.; درخت جوز بویه - darakhtijauzbúyah, Pers.; جائے پہل کا پیڑ - jáiphalkáper, Hind.; جاپہل کا جہاڑ - jáphalkájhár, Dec.; پلا - pala, Malay; ಜಾಜಿಕಾಯಿಮರ - jájikáyimara, Can.; ಜಾಜಿಕಾಯಿ - jájikáyi, Too.; జాజికాయచెట్టు - dzájikáyachettu, Tel.; ജാതി - játi, Mal.; ජාති - játi, Singh.; சாதி - sháthi, Tam.). San. from (jan, san. to be born) [common jasmine]. Mahr. and conc. from sanscrit. Ar. from (shajar, ar. tree + jauz, ar. nut + tíb, ar. odorous). Pers. from (darakht, pers. tree + jauz, ar. nut + búyah, pers. odorous). Hind. from (játip'hala, san. nutmeg + per, hind. tree). Dec. from hindostany. Can. from (jájikáyi, can. nutmeg + mara, can. tree). Tel. from (dzájikáya, tel. nutmeg + chettu, tel. tree). Mal. means excellent. Singh. from sanscrit. Tam. from sanscrit. San. also (ghatast'ha), meaning enclosed in a pot. Hind. also (jauntrí), meaning mace; (jauntrikátel), meaning mace oil. Malay also (buwahpala). Tel. also (játíphalamuchettu), meaning nutmeg + tree; (lavangachettu), meaning clove tree, eugenia caryophyllata, willd. [lavangam]. Singh. also (vasávási), meaning mace. Tam. also (sháthikkáymaram), common usage. Title otherwise False aril, Fragrant nut tree, Jaujy tree, Jautikye tree, Mace tree, Nutmeg tree. Botanically Myristica [jauty] fragrans, houtt., myristicaceæ [vricsham, 112]. Alias Myristica aromatica, moschata, officinalis. Tree 20–25 feet; leaves ovate, elliptic, acute at the base, acuminate at the apex, lateral, nerves on both sides, eight to nine; peduncles supra-axillary, males few-flowered, females one-flowered; pedicels nearly equalling the peduncle; bracteole under the flower broadly ovate, scale-shaped; flower pale yellow nodding; perigonium ovoid, half three-cleft, nearly equalling the pedicel, strigose externately with adpressed hairs; anthers nine to twelve; fruit ovoid-globose, drooping; aril laciniated, red, aromatic, covering the seed. Has aromatic leaves and peach-like [shaft auloo] fruit; cultivated; native of the moluccas. Nutmeg is the kernel of the seed; large, rounded, obtuse at both ends; the size of a small myrobalan [q.v.] nut, smooth, marked with reticulated chinks, those transversely placed being less evident than the longitudinal, grey externally and reddish internally; taste hot. Mace is the oily, membranous, fleshy, pale yellow-colored pulp, extended over the thin, brittle shell that incloses the nutmeg, itself contained within external covering of fruit first disclosed on fruit ripening and bursting; has spicy, aromatic odour of nutmeg, more pungent and bitter; dried produce of nutmeg consists of two parts of mace, five of shell and eight of nutmeg. Oil of mace, wrongly so called, otherwise nutmeg butter, is a fixed or solid oil or butter, expressed from the nutmeg; there are two sorts of this; one is a soft sebaceous kind of substance, yellowish, sub-aromatic odour, somewhat fatty, pungent, and bitterish taste, little used; the other sort is usually brought from europe in flat square cakes, sometimes called in commerce banda soap, weaker in smell, fainter in color than the former. A white volatile oil [yennay] also resides in the kernel of the fruit; oleum nucis moschatæ of chemists; extensively used for flavoring soaps [sauboon]. For preparation, nutmegs are smoked by slow wood fires for three months before they are fit for exportation; mace requires no such trouble, simple exsiccation in the sun rendering it fit for market. Volatile oil is medicinally stimulant and carminative, and in larger doses narcotic, used in atonic diarrhœa and some forms of dyspepsia, chiefly used as an addition to other remedies; nutmeg butter is a useful application in rheumatism, paralysis, and sprains, diluted with a bland oil; infusion of nutmegs quenches thirst of cholera patients; nutmegs are chewed to improve foul breath; made into a paste they are used in neuralgia, lumbago, &c.; officinal in pharm.; nutmegs and mace are closely allied to cloves [lavangam] and cinnamon [q.v.], for which they may be substituted. Nutmegs are very subject to the attacks of a small insect. Mace much used for culinary purposes; used as a masticatory [charvanam] with betel-leaf [betel pepper]. The refuse nuts ground down, steamed and pressed afford a brown fluid, which cools into the so-called nutmeg soap.——*Jungle nutmeg* (అడవిజాజికాయచెట్టు - adavidzájikáyachettu, Tel.; காட்டுசாதி - káttusáthi, Tam.). Tel. from (adavi, tel. forest + dzájikáyachettu, tel. the nutmeg tree, myristica fragrans, houtt.). Tam. from (kádu, tam. forest + sháthi, tam. nutmeg tree) [wild nutmeg]. Title otherwise Wild nutmeg. Botanically Myristica [jauty] laurifolia, h. f. & t., myristicaceæ [vricsham, 112]. Alias Myristigma ceylanica, diospyrifolia. Branches moderately stout; leaves variable, shining above with impressed nerves, pale brown or whitish beneath, base acute rounded or cuneate; nerves sometimes very faint; petiole one to one-and-half; peduncle very stout indeed, $\frac{1}{8}$ inch long or less; flowers densely crowded, sessile or stoutly pedicelled, nearly $\frac{1}{4}$ inch long, silky pubescent, shortly three-lobed; fruit $2\frac{1}{4}$ inches in diameter, globose, apiculate, with a deep longitudinal furrow; aril deeply cut into linear lacerate lobes, nearly enclosing the seed. The commonest wild nutmeg; a handsome tree; nutmeg and mace here of no value.——*Malabar nutmeg* (ಕಂಗಿ - kanagi, Can.; പിണ്ടിക്കായ - pindikkáya, Mal.; பெரியகாட்டுசாதி - periyagáttusáthi, Tam.). Mal. means ball + fruit. Tam. from (periya, tam. big + káttusáthi, tam. the plant). Tam. also (káttusáthi), meaning forest + the nutmeg tree, myristica fragrans, houtt. Title otherwise Bombay mace tree, Poondy oil tree. Botanically Myristica [jauty] malabarica, lamk., myristicaceæ [vricsham, 112]. Tree; leaves narrow-oblong or elliptic-lanceolate, acute at both ends or obtuse, quite glabrous, glaucous beneath; in male, inflorescence axillary, dichotomously cymose, many-flowered, longer than the petiole; female few-flowered, alabastrum globose, pubescent externally, bract very broad, embracing the base; fruit oblong, tawny, hairy; aril lacunose; lobes twisted and folded into a cone at the top. The arillus is of a dark brownish-red color, and on the inside has adhering to it a thin papery membrane of a light-brown color; the shell is hard and brittle, and contains an elongated kernel resembling a nutmeg, and from $1\frac{1}{2}$–2 inches long; when cut in two it is seen to have the same ruminated structure, but the odour is fruity, with hardly any aroma; similarly, the mace is deficient in odour and flavor. This is the ordinary native nutmeg. Kernel, when bruised and subjected to boiling, yields yellowish concrete oil called poondy oil, employed as application to indolent ulcers; for this purpose it requires to be melted down with a small quantity of any bland oil; serviceable as an embrocation in rheumatism; in pharm. non-officinal; like expressed oil of nutmeg. Oil used for burning purposes. Wood reddish-grey, moderately hard; used for building.——*Travancore nutmeg* (ರಾಮನಡಿಕೆ - rámanadike, Can.). From (ráma, san. the hero + adike, can. areca catechu, linn.). Title otherwise Rama's areca. Botanically Myristica [jauty] magnifica, bedd., myristicaceæ [vricsham, 112]. Immense gregarious tree, 100 feet high, having buttressed trunks; most allied to myristica laurifolia, h. f. and t. [jungle nutmeg], but very different looking; the leaves and fruit are very much larger.——*Wild nutmeg* (कामुक - kámuka, San.; काडजायिफल - kádajáyip'hala, Conc.; جنگلی جائے پہل کا پیڑ - janglíjáíphalkáper, Hind.; جنگلی جاپہل کا جہاڑ - janglíjáphalkájhár, Dec.; ಕಾಡುಜಾಜಿಕಾಯಿಮರ - kádujájikáyimara, Can.; ಕಾಟುಜಾಕಾಯಿ - kátujákáyi, Too.; అడవిజాజికాయచెట్టు - adavidzájikáyachettu, Tel.; കാട്ടുജാതിക്കായ - káttujátikkáya, Mal.; காட்டுசாதி - káttusáthi, Tam.). San. from (kam, san. to desire). Conc. from (káda, conc. forest + jáyíp'hala, conc. the nutmeg tree, myristica fragrans, houtt.). Hind. from (janglí, hind. wild + játip'hala, san. nutmeg + per, hind. tree). Dec. from hindostany. Can. from (kádu, can. forest + jájikáyi, can. nutmeg + mara, can. tree). Too. from (kátu, too. forest + jákáyi, too. nutmeg). Tel. from (adavi, tel. forest + dzájikáyachettu, tel. the nutmeg tree, myristica fragrans, houtt.). Mal. from (kátu, mal. forest + játikkáya, mal. nutmeg). Tam. from (kátu, tam. forest + sháthi, tam. nutmeg tree) [jungle nutmeg]. San. also (málati) [common jasmine, madablota, wild jasmine]; (játip'hala), meaning the plant, myristica fragrans + fruit. Can. also (kádujáyimara). Botanically Myristica [jauty] horsfieldii, blum., myristicaceæ [vricsham, 112]. Alias Horsfieldia odorata; Myristica horsfieldia; Pyrrhosia horsfieldii. Tall tree, branches very stout, densely woolly, at length glabrate; leaves $2\frac{1}{4}$–4 inches diameter, pale bright-brown above, rufous at first beneath, or red brown; petiole very stout, $\frac{1}{2}$–1 inch; male panicles 3–6 inches, rachis and branches very stout, heads of flowers $\frac{1}{4}$–$\frac{1}{3}$ inch diameter, quite globose; perianths subsessile, compacted, glabrous, hardly pedicelled; bracteoles orbicular, retained amongst the flowers, but caducous, densely woolly outside; anthers quite confluent to the tips; female panicles short, few-flowered, ovary tomentose; fruit shortly stoutly peduncled, ovoid, 1 inch long, rusty, tomentose; aril fleshy, entire; the mace has not the same virtues as fragrans [common nutmeg].

JAVA (यवद्वीप - yavadvípa, *San.*; யாவத்தீவு - yávattívu, *Tam.*). One of the East indian archipelago. Colonized by Hindoos from Calingam [q.v.] in B.C. 75. Hindoo government continued till fourteenth century when subverted by Mahomedans. Belongs to Holland. Arabs applied the term to the Archipelago generally.——*Java almond* (بادام جاوی - bádámijávai, Hind.). Same as Elemi.——*Java cedar* (کین - kein, Hind.; నలుపుముష్టి - nalupumushti, Tel.; மதகிரிவேம்பு - mathagirivémbu, Tam.). Title from place where first found. Tel. from (nalupu, tel. blackness + mushti, tel. strychnos nux-vomica, linn.). Tam. from (mathagiri, tam. place, so called + vémbu, tam. margosa, melia azadirachta) [chickrassy]. Hind. also (korsa); (iram),

Tam. also (tondi). Title otherwise Black mooshty [q.v.], Red cedar. Botanically Bischoffia javanica, muller, var. genuina, euphorbiaceæ [vricsham, 118]. Alias Andrachne trifoliata, trifoliatus; Bischoffia cumingiana, rœperiana, rœperianus; Microelus rœperianus; Stylodiscus trifoliatus. Leaves subelliptic, obtuse at the base, cuspidate-acuminate at the apex; male panicles almost equalling the leaves, large females commonly reduced to a raceme, branched below; segments of the male calyx suborbicular, brown, densely glandular striolate, at length reflex. Timber tree found in western forests generally; wood red, rough, moderately hard, with a small darker-colored heartwood; one of the best timbers; used by planters in the neilgherries for building; is used for masts, and spars of small vessels.——*Java galangal* (خولنجان جاوي - khulanjánijávai, Hind.). Same as Greater galangal.——*Java honey* (عسل الجاوي - asaluljáwai, Pers.). Same as Benzoin.——*Java pepper* (فلفل جاوي - filfilijávaí, Hind.). Same as Cubeb pepper.——*Java plum* (جامن جاوي - jámunijávaí, Hind.). Same as Common jaumoon.

JAWAUB (جواب - jawáb, *Hind.*). From (jaub, ar. a side). An answer, whether spoken or written [oottaram]. Jawaubdar is a responsible person.

JAWAUDY (జవాది - jevádi, *Tel.*; சவாதி - shaváthi, *Tam.*). Means civet. Hill range; South arcot and Salem districts. For description, see vol. II, 81.

JAWAUN (جوان - jawán, *Hind.*). From (yuvan, san. youth). Literally, a young man. A peon [q.v.]. Same as Buntrote.

JAWAURY (جواري - javárí, *Hind.*). Same as Cholum.

JAWAUSHIR (جاوشير - jawáshír, *Pers.*). Product of Ferula galbaniflua, boiss. and Ferula rubricaulis, boiss. [galbanum]. A yellow or greenish semi-fluid resin [raul], generally mixed with the stems, flower, and fruits of the plant.

JAZAIL (جزائل - jazáil, *Hind.*). From (jazala, ar. to cut). A long matchlock.

JEELAUNY (جيلاني - jíláni, *Hind.*). From (jílán, ar. town near baghdad); birth-place of the saint. Lacab of the chief Mahomedan saint [abdool cawder]. Common alam; as Jeelauny bee, alam + alaumat; Jeelauny miyaun, alam + alaumat [ism].

JEEN (జీను - jínu, *Tel.*). Anchor.——*Jeenboorra* (జీనుబుర్ర - jínuburra, Tel.). From (jínu, tel. anchor + burra, tel. gourd), from the curved form. A reed musical instrument [magady] used to charm snakes [sangeetam].

JEERAH (जीरक - jíraka, *San.*; जिरे - jiré, *Mahr.*; जीरे - jíré, *Conc.*; كمون - kamún, *Ar.*; زیره - zírah, *Pers.*; زيرا - zírá, *Hind.*; جيرا - jírá, *Dec.*; جنتان - jintán, *Malay*; ಜೀರಿಗೆ - jírige, *Can.*; ಜೀರದರಿ - jíradari, *Too.*; జీలకర్ర - jílakarra, *Tel.*; ജീരകം - jírakam, *Mal.*; දුරු - duru, *Singh.*; சீரகம் - shíragam, *Tam.*). Title from deccany. San. from (jrí, san. to digest); from promoting digestion. Mahr. and conc. from sanscrit. Pers., &c., from sanscrit. San. also (jírana), meaning promoting digestion; (hrasvánga), meaning short + body; (ajájí), meaning natural + overcoming, from curing natural indigestion. Hind. also (jírahisufíd), meaning white cumin. Dec. also (sháhzírá), meaning carum carui, linn. Tel. also (jílakara); (jilakara). Singh. also (sududuru), meaning white cumin. Tam. also (narchíragam), meaning good + cummin; (karunjíragaççedi), meaning black + cumin + plant. Greek κύμινον ἥμερον; Latin cuminum. Title otherwise Common cummin, Cummin, Jilacara, Sheeragam. Botanically Cuminum cyminum, linn., umbelliferæ [vricsham, 67]. Alias Cuminum ægyptiacum; Lygusticum cyminum. Herbaceous; leaves multifid, lobes linear-setaceous, acute; calycine teeth five, unequal, persistent; petals with the point inflexed; umbel with three to five rays, involucre longer than the usually pubescent fruit; seeds slightly concave in front, convex on the back; flowers white; roots acrid; seed has a peculiar heavy, strong odour, and warm bitterish taste; of an ash-gray color, smell. Cultivated, but much of what is used is brought from china; comes also from persian gulf. Both seeds and oil possess carminative properties analogous to coriander [cassibor] and dill [sowa]; in pharm. non-officinal; substituted for british caraways [q.v.]; seed used in veterinary practice. Seeds used to flavor curry [q.v.]; and an ingredient of curry powders; particularly prized by mahomedans. Seeds used for preserving books from insects.——*Armenian jeerah* (كمون ارمني - kamúniarmaní, Ar.). Same as Caraway.——*Black jeerah* (कृष्णजीरक - krishnajíraka, San.; काळाजिरे - kálájiré, Mahr.; करिजीरे - karijíré, Conc.; شونيز - shúníz, Ar.; سياه دانه - siyáhdánah, Pers.; كلونجي - kalonjí, Hind.; كالا زيرا - kálázírá, Dec.; ಕರಿಜೀರಿಗೆ - karíjírige, Can.; ಕಪ್ಪಲ್ಜೀರದರಿ - kappaljíradari, Too.; నల్లజీలకర్ర - nallajílakarra, Tel.; കരിഞ്ചീരകം - kariñchírakam, Mal.; කළුදුරු - kaluduru, Singh.; கருஞ்சீரகம் - karuñjíragam, Tam.). Title from color and flavor of seeds. San. from (krishna, san. black + jíraka, san. cumin seed, cuminum cyminum, linn.). Mahr. from (kálá, mahr. blackness + jiré, mahr. cumin seed). Conc. from (kari, can. black + jíre, conc. cumin seed). Ar. from persian. Pers. from (siyáh, pers. black + dánah, pers. seed). Hind. from (kála, san. black + jíraka, san. cumin seed, cuminum cyminum, linn.). Drav. all mean black + jeerah. San. also (upakuñchiká), meaning lessening [cardamom]; (kárabhí), meaning coming from camel; (yónishúlaghná), meaning destroying pain in vulva; (káraví), meaning stimulant [oolinja]; (sushaví), meaning stimulant [caraway, carolah]; (musaví). Ar. also (kamúniaswad), meaning black cumin; (habbatussaudá), meaning black seed; (habbatulkhazrá), meaning blue seed. Pers. also (siyáhbiranj), meaning black rice. Dec. also (kulanjan), meaning alpinia galanga, willd. Can. also (jírige). Tam. also (iruli), meaning that which is black; (vizhuttam); (attulákki). Greek μελάνθιον. Title otherwise Black cumin seed, Colinjy seed, Fennel sibthorp, Nigella seed, Small fennel, Sweet fennel. Botanically Nigella sativa, linn., ranunculaceæ [vricsham, 1]. Annual, foot high, white or light blue flowers, five-celled, capsule containing numerous black seeds; from mediterranean countries, cultivated. Seeds resembling coarse gunpowder are triangular, slightly compressed, obtuse above with oblique bases, rugose, black externally, internally of a greenish white hue; the capsules are polyspermous, oblong, and pointed at the side; the seeds are of strong aromatic odour and flavor, resembling sassafras or cubebs [cubeb pepper]; these properties are due to an essential oil, of which the seeds yield from 5 to 10 per cent. called siyah daunah [q.v.]. Seeds carminative and stomachic; substituted for british fennel [sonf] seeds; also prescribed in external application, mixed with gingelly [q.v.] oil in eruptions of skin; seeds in pharm. non-officinal. Seeds used as spice in curries [q.v.]. Seeds if put within folds of woollen cloths, keep them from being worm-eaten. Another species is hispanica.——*Foreign jeerah* (රටදුරු - ratadurn, Singh.). Same as Caraway.——*King jeerah* (දෙවදුරු - dévaduru, Singh.). Same as Sonf.——*Large jeerah* (ದೊಡ್ಡಜೀರಿಗೆ - doddajírige, Can.). Same as Anise.——*Royal jeerah* (كمون ملوكي - kamúnimulúkí, Ar.). Same as Ajwaun.——*Turkish jeerah* (كمون رومي - kamúnirómí, Ar.). Same as Caraway.——*Wild jeerah* (वाकुची - vákuchí, San.; रानजिरें - ránajirém, Mahr.; काळजीरे - kálajíré, Conc.; اطريلال - átrílál, Ar.; اطريلال - itrílál, Pers.; بكچي - bukchí, Hind.; كالي زيري - kálízírí, Dec.; ಕಾಡುಜೀರಿಗೆ - kádujírige, Can.; ಕಾಳಜೀರದರಿ - kálajírdari, Too.; అడవిజీలకర్ర - adavijílakarra, Tel.; കാട്ടുജീരകം - káttujírakam, Mal.; සන්නිනායන් - sanninâyan, Singh.; காட்டுச்சீரகம் - káttuççíragam, Tam.). San. from (vá, san. to pierce + kuch, san. to contract); as alleviating piercing diseases as cooshtam [q.v.]; also wind destroyer [bawchee, malkangany]. Mahr. from (rána, mahr. wild + jirém, mahr. cumin, cuminum cyminum, linn.). Pers. from arabic. Hind. from sanscrit. Dec. from (kálí, hind. black + zírí, hind. cumin seed). Can. from (kádu, can. wild + jírige, can. cumin seed). Too. from (kála, too. black + jírdari, too. cumin seed). Tel. from (adavi, tel. forest + jílakarra, cumin seed). Mal. from tamul. Tam. from (kádu, tam. forest + jíraka, san. cumin seed). San. also (avalguja), meaning born of the ugly; (sómaráji), meaning shining with delight [gandhalee]; (agnibíjá), meaning fire-seeded; (kánanajíraka), meaning wild cumin; (atavijíraka), meaning wild cumin; (krishnap'halá), meaning black-fruited; (sahadévi), compare lance leaved balah; (pútip'halí), meaning stinking-fruited. Hind. also (somráj), meaning shining with delight. Dec. also (karvízírí), meaning bitter cumin. Can. also (kálajírige), meaning black + cumin seed; (sahadévi); (karchindi). Tel. also (vishakantakálu), meaning poison + thorn + esculent root; (nélavávili), meaning ground + vitex trifolia, linn.; (garitikamma). Mal. also (púvánkuruntala), meaning flower + to become + small + head; (kálajírakam), meaning black cumin. Singh. also (náyan); (monarakudimbiya), meaning peacock + crest; (hinmonarakudimbiya). Tam. also (nírnoççi), meaning water + vitex negundo, linn. [water notchy]; (neyççitti), meaning ghee + small, from leaves; (shittilai), meaning small leaved. Title otherwise Flea-bane [indian absinth], Khatzum oil plant, Kinka oil plant, Purple flea-bane, Wild cumin, Worm seed vernonia. Botanically Vernonia anthelmintica, willd., compositæ [vricsham, 74]. Alias Ascaricida anthelmintica, indica; Baccharoides anthelmintica; Chrysocoma anthelmintica; Conyza anthelmintica; Serratula anthelmintica, elegans. Annual; stem erect, roundish, slightly tomentose; leaves alternate, serrate, narrowing at the base into the petioles, calyx ovate; corolla consisting of twenty or more hermaphrodite florets; flowers in panicles at the end of the branches on long peduncles thickening towards the flowers; a solitary peduncle terminates the stalk; flowers purplish; flowering in cold season; varies in the stem and leaves, being more or less hirsute or glabrous; common everywhere. The dried seeds are dark-brown, covered with whitish scattered hairs, cylindrical, tapering towards the base, marked with about ten paler longitudinal ridges, and crowned with a circle of short brown scales; taste, nauseous and bitter. Seeds powerfully anthelmintic; ingredient of compound powder prescribed in snake-bites; infusion of them given on malabar coast for coughs, and against flatulency; reduced to powder and mixed with lime-juice, they are used to expel pediculi from the hair; of great repute in sanscrit materia medica as a medicine in skin diseases; gives to pharm. seeds, non-officinal; like santonin [absinth]; used in leprosy [cooshtam]. Gives a hard coarse fibre [naur]. Seeds by pressure yield valuable solid green oil [yennay]. The species Cinerea is ash-colored fleabane; whole plant, with tasteless flowers, used in

decoction, to promote perspiration in febrile affections; seeds powerful anthelmintic; all parts very bitter; eaten as greens [keeray] in famine time. Other common species are:—arborea, bracteata, candolleana, chinensis, divergens, elæagnifolia, indica, pectiniformis, salviæfolia, travancorica, volkameriæfolia.

JEETAL (جيتل - jítal, *Hind.*). Copper coin equal to about nine daums [q.v.]. Current in Acbar's time.

JEEV (जीव् - jív, *San.*). To live.——*Jee* (جی - jí, Hind.). Contraction of (jíva, san. life). Particle of respect added to names and titles, as Raghoonaut jee, Sahib jee. Forms the termination of most Parsee names, as Jamsetjee, Cowasjee. Used by the Sikhs [q.v.] in the personification of their church as Khaulsajee, and of their chief prayer as Japjee. Also used in conversation as equivalent to the English sir. Also as the affirmative yes.——*Jeetam* (జీతము - jítamu, Tel.). From (jívita, san. livelihood). Wages. Jeetacaur is a paid servant [nowcar].——*Jeevacan* (சீவகன் - shívagan, Tam.). A man of long life. Hero of the Chintaumany, which see.——*Jeevam* (जीव - jíva, San.). From (jív, san. to live). Life.—"*a*" Plant first term. Ex., where translation is of second term:—Acacia catechu (jívamángalya), auspicious; Alstonia scholaris (jívaní), meaning life-giver; Cephalandra indica (jívaka), meaning living; Putranjiva roxburghii (jívanaputra), son, from nuts, used as garland for children; Sponia wightii (jívaní), and (jívantí), meaning living; Tinospora cordifolia (jívantiká), meaning enlivening. See gloss. paragraphs.—"*b*" Plant second term. Ex., where translation is of first term:—Blepharis mollugínifolia (purushajívi), man; Ixora coccinea (bandhujívaka), meaning living in group; Pentapetes phœnioea (bandhujívaka), meaning living in group; Polyalthia longifolia (putrajíva), son; Putranjiva roxburghii (putrajíva), son, (sutajíva), son. See gloss. paragraphs.—"*c*" In philosophy individuated spirit, that which pervades the members of the body, and is the cause of life or motion, animated being. Jeevautman is the sentient soul, the emanation of the deity, which is incorporated with the animal body; it is opposed to the abstract state of the soul Paramautman [q.v.], in which by meditating upon its own divine nature and origin, the spirit is set at liberty from human feelings and passions. The following is from a Tamul shastram:—*சீவசப்தாவஸ்தைபின் இலக்கணம், தன்னையறியாத அறிவே அஞ்ஞானம், தத்துவ பேதந்தெரியாமல்மறைத்தது ஆவரணம், விஷயபதார்த்தங்களை சுவதந்தரஞ்செய்தல்விட்சேபம், பிரமமொன்றென்பது பரோட்சஞானம், அந்தப்பிரமந்தானென்பதே அபரோட்சஞானம், அந்தஞானத்தால் துக்கம் போனதே சோகநிவிர்த்தி, அந்தத்துக்க நிவிர்த்தியால் வந்த ஆநந்தமே தடையற்ற ஆநந்தம்*—"The characteristics of the "seven stages [avastay] of personal soul are; anyaunam, "ignorance or knowledge which does not know self; auvarnam, "envelopement or that which prevents knowledge of the real "difference; vicshaipam, projection or causing sensible matter "to appear independent; parotcham or perception of bramh "[q.v.] as the only reality; aparotcham or knowledge that self "is same as that bramh; shocanivritty or emancipation from "sorrow by such knowledge and anandam or the limitless joy "that comes out of freedom from such sorrow." Living things are in natural history classed into:—Jeevacam, viviparous, as man and quadrupeds; Andajam, oviparous, as birds and insects; Swedajam, sweat produced, an insects and vermin; Oodbhijjam, germiniparous, as vegetables. They are also classed into:—spiritual intelligences, men, quadrupeds, birds, aquatics, reptiles, vegetables. There is a Tamul saying:—*எறும்புகடை யானைத்தலை யெண்பத்தநான்கு நூறுயிரஞ்சீவ பேதம்*—"From "elephant [q.v.] to ant [choomtee] downwards, there are "8,400,000 varieties of living beings."——*Jeevanaumsham* (जीवनांश - jívanámsha, San.). From (jívana, san. livelihood + amsha, san. portion). Provision for a widow or woman separated from husband.——*Jeevanjeevam* (जीवजीव - jívanjíva, San.). Reduplication of (jíva, san. life). Phasianidæ family, rasores, aves [pacshy, 32], of naturalists [jantoo].——*Jeevapootram* (जीवनपत्र - jívanaputra, Mahr.). From (jíva, san. life + putra, san. child); from necklaces [maulay] of fruits being considered efficacious in preserving health of children wearing the same. Same as Pootran jeeva.——*Jeevautman* (जीवात्मन् - jívátman, San.). From (jíva, san. life + átman, san. soul). The individual soul in the human body [shareeram] as opposed to the supreme soul [paramautman].——*Jeevay* (जीवा - jívá, San.). From (jív, san. to live). The chord of an arc [chaupam, jyotisham].——*Jeevy* (जीवी - jíví, San.). Liver. Suffix in proper names, as Sanjeevy. Familiarly Jeevoo. Hindoo 2nd or pers. name [peyar].

JEHAUD (جهاد - jihád, *Hind.*). From (jahada, ar. to make an effort). A general effort such as Mahomet preached to exterminate unbelievers [caufir]; a holy war against infidels. The Soonnees [q.v.] say a jehaud should be entered on only when there is probability of success; the Shiahs [q.v.] add that the army must be led by the rightful imaum [q.v.].

JEHAUN (جهان - jahán, *Hind.*). World [jagam]. Part of lacab; a Jehaungeer, conqueror of the world; Jehaun shah, king of the world [ism].——*Jehaunabad* (جهانباد - jahánbád, Hind.). From (jahán, hind. shahjahan, the emperor + bád, pers. city). Delhi.——*Jehaungeer* (جهانگیر - jahángír, Hind.). From (jahán, ar. world + gír, pers. seizer). Any emperor. The historical emperor, otherwise known as Selim; fourth Moghul emperor A.D. 1605-1627. Also taken as alam [q.v.], as Jehaungeer shah meaning the king who is the conqueror of the world. Usually taken by fakeers [q.v.] in reference to their ascetic virtues.——*Jehaungeery* (جهانگیری - jahángírí, Hind.). The historic Jehaungeer's silver rupee.——*Jehaungeery tunkam* (جهانگیری تنکہ - jahángírítankah, Hind.). Gold coinage of Jehaungeer with his name on one side and the figure of Zodiacal sign [raushy] corresponding to month of coinage on the other. Various sizes with distinct names. Known also as Selim shahy coinage [naunyam].

JEIMINY (जैमिनि - jaimini, *San.*).—"*a*" Founder of Poorva mimaumsam philosophy [mimaumsam].—"*b*" A more modern poet of thirteenth century. Wrote translation from Sanscrit of Ashwa medha parvam of Mahabhaurat [q.v.], detailing sacrifice of the horse [ashwamedham, ghorah], called Jeiminy bhauratam. Finest specimen of Canarese poetry. 'He has read Jeiminy' is equivalent to he is an accomplished man. The author invented the journey of Arjoonan [q.v.] in Southern india.——*Jeiminy carmam* (जैमिनिकर्म - jaiminikarma, San.). From (above + karma, san. ritual). The ritual philosophy of Jeiminy mimaumsam or Poorva mimaumsam [q.v.].

JELDY (جلدی - jaldí, *Hind.*). From persian. Haste. As an exclamation, quick!

JELLA (जोबन्तोल - jóbantóla, *Mahr.*; జెల్ల - jella, *Tel.*; ചിറാവു - chirávu, *Mal.*). Mal. from (churukku, mal. sharpness). Sphyræna jello, sphyrænidæ, acanthopterygii, teleostei [matsyam, 25], of naturalists [jantoo]. Specific name from teloogoo. Alias Esox sphyræna. Lower jaw the longer; superiorly gray, white on abdomen; on upper part of side festooned band intersects, lateral-line, or a number of short vertical gray bands cross it; ventrals whitish; other fins yellowish with fine black points, most numerous towards margins; sea; 5 feet in length. No other common species here.——*Leaf jella* (ఆకుజెల్ల - ákujella, Tel.; ବଟୁଲି - batulí, Oor.). Title from appearance. Tel. from (áku, tel. leaf + jella, tel. sphyræna jello). Oor. also (bopotassi). Pseudeutropius atherinoides, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Alias Bagrus anguis, atherinoides, exodon, urua; Pachypterus atherinoides, trifasciatus; Pimelodus anguis, urua; Silurus atherinoides. Freshwater; upper jaw a little the longer; median longitudinal groove on the head broad; silvery, greenish along the back, and with three or four bands along the sides formed by black spots; occiput and anterior portion of dorsal fin dark colored; not on w. coast; rarely above 4 or 5 inches. For another species see Dog keliroo.——*Mud jella* (బంకజెల్ల - bankajella, Tel.; ଜେଲମ - jellam, Oor.; குளக்கிழாத்தி - kulakkizhátti, Tam.). Title from habitat. Tel. from (banka, tel. gum + jella, tel. sphyræna jello). Tam. from (kulam, tam. tank + kizhátti, tam. siluridæ or cat-fish family). Pangasius buchanani, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Generic name is probably from (pankeshaya, san. mud dwelling fish). Alias Pangasius djambal; Pimelodus pangasius. Upper jaw the longer; upper surface of the head smooth in small specimens, rather lineated in large ones; silvery, darkest along back and glossed with purple on sides; cheeks and under surface of head shot with gold; air-vessel large, its anterior portion occupies about ½ the length of the abdominal cavity; large rivers and estuaries; upwards of 4 feet; is a foul feeder. No other common species here.

JELLY (జల్లి - dzalli, *Tel.*; சல்லி - shalli, *Tam.*). From (tsallu, tel. to scatter); means pieces. Same as Kankar [q.v.].

JENDA (جھنڈا - jhandá, *Hind.*). Flag.——*Jendamode* (செண்டாமேடு - shendámédu, Tam.). From (above + médu, tam. high ground). Tract of country; Salem district, Ootancaray talook. So called because the chief standard was raised here in the expedition of Hyder and Nizam ally when they were defeated beyond the Shingaurapett pass by Colonel Smith and were driven back into Ootancaray talook.

JENDRA (జేండ్ర - jéndra, *Tel.*, obl.). From (jádu, tel. to shake) [jeyda]; from plying the loom [tarry]. Also called Devaunga [q.v.]. Teloogoo weavers, who worship Shiva. Numbers about 100,000 [jauty]. See vol. II, 230.

JENTA (జంట - jenta, *Tel.*). Neighbourhood. Suffix in place names; as Condajenta, meaning hill neighbourhood.

JERBOA (يربوع - yarbú, *Ar.*). Same as Shevvely [q.v.].

JERRY (జెర్రి - jerri, *Tel.*). Centipede.——*Jerripotoo* (జెర్రిపోతు - jerripótu, Tel.). Means centipede's mate. Fish name common to:—Cynoglossus lingua, Plagusia bilineata, Synaptura commersoniana, Synaptura zebra. See gloss. paragraphs.

JETT (செற்று - shettu, *Tam.*). From (sheru, tam. to narrow). Closeness. Suffix in place names; as Veppanjett, meaning margosa close or spinney.

JETTY (جتهی - jatthí, *Hind.*; జెట్టి - jetti, *Tel.*). In Mysore called Mooshṭiga, meaning fist-men. Wrestlers and boxers. The jetty itself is a sort of cæstus, worn over first phalanges on the right hand; it is made of buffalo [khoolgah] horn [sing] with four sharp projections like knuckles, and the fifth near the little finger, with a greater prominence than the rest; the hitting is by a sharp perpendicular cut. The combatants are clothed in short drawers [ottootchalladam] only. This class also shampoo and rub ointments in to cure pains. They were formerly sometimes employed as executioners and despatched by a twist of the neck; they are still considered skilful in setting dislocated joints. Numbers not more than 1,000 [jauty].

JEW (جهود - juhúd, *Hind.*). Prefix [jonaca].——*Jews's apple* (వంగ - vanga, Tel.). Same as Brinjaul.——*Jew's scent* (بوی جهودان - búijahúdán, Pers.). Same as Mookul bdellium.

JEYDA (ಜೇಡ - jéda, *Can.*; சேடன் - shédan, *Tam.*). From (jádu, can. to shake) [jendra]; as plying the loom [tarry]. A caste [jauty] of weavers. The corresponding terms are:—Tel. jendra, Mal. chauliyan, Tam. keikkila.

JEYPORE (جیپور - jepúr, *Hind.*; జయపురము - jayapuramu, *Tel.*) [jayam]. From (jaya, san. victory + pura, san. town).—— (1) Division, Vizagapatam district; population 116,117; language Ooriya. W. inland of district. Boundaries—E., Coraputt division; S., Coraputt and Pottinghy divisions; W., Mulkangherry division and Bustar; N., Nowrungapore division and Bustar. Places of archæological interest:—Borigoomma, Cotepaud, Jayanagaram, Poycapaud, Ramgherry, Singapore. Principal trig. station:—Bardwar, Motigaum. The leading places, &c., in the division are the following.——*Bardwar* (బారాద్వారము - bárádváramu, Tel.). From (bárá, hind. twelve + dvára, san. gate). Trig. station; lat. 18° 50′ 21·09″; long. 82° 17′ 42·00″; height 2,631 feet; from Jeypore W. 20 miles.——*Battigaum* (బత్తిగ్రామ - battigámu, Tel.). From (batti, tel. a still + gráma, san. village). Town; lat. 19° 07′; long. 82° 35′; from Jeypore N. 18 miles.——*Borigoomma* (బోరిగుమ్మ - boregumma, Tel.). From (bhairava, san. the god + gumma, oor. village). Village; lat. 19° 03′; long. 82° 36′; from Jeypore N. 13 miles; from Vizagapatam N.W. 104 miles. One temple near the village; one in the jungle. Situated at intersection of Jeypore, Nowrungapore and Coraputt-Cotepaud roads. Numerous tanks. A large town once existed here.——*Casoomy* (కసుమి - kasumi, Tel.). From (kasemu, tel. fountain). Town; lat. 19° 41′; long. 82° 23′; from Jeypore N.W. 60 miles; from Vizagapatam N.W. 147 miles.——*Coombacote* (కుంభకోట - kumbakóta, Tel.). From (kumbha, san. pot + kóta, san. fort). Town; lat. 19° 07′; long. 83° 17′; from Jeypore N.E. 48 miles; from Vizagapatam N. 97 miles.——*Cotepaud* (కోటపాడు - kótapádu, Tel.). See sep. title.——*Jeypoor* (జయపురము - jayapuramu, Tel.). See below.——*Motigaum* (మోతిగాము - mótigámu, Tel.). From (mótí, pers. pearl + gám, hind. village). Trig. station; lat. 19° 24′ 17·61″; long. 82° 14′ 42·32″; height 2,259 feet; from Jeypore N.N.W. 44 miles; from Motigaum N.N.E. 2 miles.——*Ramgherry* (రామగిరి - rámagiri, Tel.). From (ráma, san. the god + giri, san. mountain). Village; pop. 105; lat. 18° 47′; long. 82° 17′; from Jeypore W.S.W. 22 miles; from Vizagapatam N.W. 99 miles. Rock cut cave with sculptures dedicated to Goopteshwarasawmy, 8 miles distant.——*Singapore* (సింగపురము - singapuramu, Tel.). From (singamu, tel. lion + pura, san. town). Tel. also (bhairavasingapuramu), meaning bheiravan, the god + the village so called. Distinguish from Calyauna singapooram in Royagada. Town; pop. 999; lat. 19° 03′; long. 82° 43′; from Jeypore N.N.E. 16 miles; from Vizagapatam N.N.W. 102 miles. Head-quarters of Maharajah's ameen [q.v.]. Large granary. Several temples.——*Taurapooram* (తారాపురము - tárápuramu, Tel.). From (tára, san. star + pura, san. town).——(2) Zemindarry; Vizagapatam dist., Jeypore division. For description see foot-note, vol. I, 60. ——(3) Town, Head-quarters of Jeypore zemindarry, Deputy tahsildar's station; pay Rs. 150; Vizagapatam dist., Jeypore division; pop. 4,321; lat. 18° 51′; long. 82° 37′; from Coraputt W.N.W. 11 miles; from Madras N.N.E. 420 miles; from Narsapatam N. 82 miles; from Parvatipore W. 57 miles; from Vizagapatam N.W. 91 miles; from Vizianagram N.W. 73 miles. Contains numerous mutts [q.v.] and temples supported by the zemindar [q.v.]. Two miles north of the northern wall of the upper plateau of the Vizagapatam hills, on the west slope of the Eastern ghauts [q.v.], and on the S.W. frontier of Central provinces. The residence of the Rajah, and a place of rapidly growing importance on route from Central provinces to sea. Excepting one broad main street, consists of a confused mass of mud houses. No building worthy of note, the Rajah's own accommodation being poor. An old rock fort lies within a mile of the town. The Estate manager's head-quarters. See vol. I, 68. The following are the travelling distances by road from Jeypore to different places:—

To	Viâ	Miles and Furlongs.

JHAR (جهاڑ - jhár, *Hind.*). Tree.——*Jharkanamak* (दारुलवण - dárulavana, San.; झाडीचमांठ - jhádíchamít'ha, Mahr.; جوکهار - jaukhár, Hind.; جهاڑ کا نمك - jhárkánamak, Dec.; ಮರದಉಪ್ಪು - maradauppu, Can.; మానుప్పు - mánuppu, Tel.; മരവുപ്പു - maravuppu, Mal.; மரவுப்பு - maravuppu, Tam.). Title from deccany. San. from (dáru, san. wood + lavana, san. salt). Mahr. from (jhádí, mahr. tree + mít'ha, mahr. salt). Hind. from (yava, san. barley + kshára, san. alkali). Dec. from (jhár, hind. tree + namak, hind. salt). Can from (mara, can. tree + uppu, can. salt). Tel. from (mánu, tel. tree + uppu, tel. salt). Mal. from (mara, mal. wood + uppu, mal. salt). Tam. from (maram, tam. wood + uppu, tam. salt). Hind. also (rákkánamak), meaning ashes + salt. Tel. also (búdideuppu), meaning ashes + salt. Mal. also (pappatakkáram), meaning cake + alkali. Tam. also (shámbaluppu), meaning ashes + salt. Potash, Wood ash. Also called Salt of tartar, Salt of worm wood [mara ooppoo]. In one form called Pearl ash. Potassa of chemists. Obtained by the incineration of wood. Natives prepare it from ashes of many burnt vegetables, and call it salt [ooppoo] of each vegetable; thus Vauzhayilay ooppoo, salt of plantain [q.v.] leaf. A Drauvacam [q.v.] or strong liquor, is made by adding certain hot seeds to the potash, and is used as diuretic. On west coast potash is used for bleaching and washing linen, dhoby's earth [q.v.] not being known. Product occurs in hard irregular masses or fragments, of a light bluish gray color, somewhat caustic, alkaline taste, inodorous, and very deliquescent. Carbonate of potash is of great importance in the arts and manufactures, especially in dyeing [shauyam] and bleaching; obtained by passing carbonic acid into a solution of potash, evaporating to dryness, and exposing the dry mass to a red heat. The pharm. has numerous forms and preparations.

JHARTY (جهرتی - jhartí, *Hind.*). Examination [taniky].

JHAUMP (جهانپ - jhánp, *Hind.*). From (jhánpná, hind. to cover). Wicker work or bamboo [q.v.] frame; coarse-matting used as a door [darwaunja] or screen [chick].——*Jhampan* (جهپان - jhappán, Hind.). From (jhánp, hind. a cover). Sedan used by travellers in the Himalaya. Something similar here in rural tracts [dhooly, tonjon].

JHAUNJ (جهانجه - jhánjh, *Hind.*). From (jharjhara, san. tingling sound). Cymbals [sangeetam].

JHAURAN ((جهاڑن - jháran, *Hind.*). From (jhárná, hind to sweep). A coarse cloth for wiping furniture.——*Jhaudmauly* (جهاڑنے والی - jhárnewálí, Hind.). From (jhárná, hind. to sweep + wálí, hind. agent suffix). A sweeper employed in cleaning office rooms.

JHEEL (جهیل - jhíl, *Hind.*). A stream. A lake.

JHINGOOR (तैलपा - tailapá, *San.*; فاسیا - fásiyá, *Ar.*; جل - jul, *Pers.*; جهینگر - jhíngur, *Hind.*; جهنگر - jhungúr, *Dec.*; لیپس - lipas, *Malay*; ಆತೆಹುಳ - átehula, *Can.*; బొద్దింక - boddinka, *Tel.*; ക്കറ - kúra. *Mal.*; කරපොත්ත - karapottá, *Singh.*; கரப்பான்பூச்சி - karappánbúçci, *Tam.*). Title from hindostany. San. from (taila, san. oil + pá, san. to drink). Ar. from (favass, ar. to emit a noiseless wind). Hind. from (jhinghi, san. cricket). Tam. from (karai, tam. to destroy + púçci, tam. insect). Tel. also (bharanipurugu), meaning casket, which is generally painted red + insect. Tam. also (karappu) in colloquial use. Cockroach. Blatta orientalis, blattidæ, orthoptera, hemimetabola, insecta [poochy], of naturalists [jantoo].

JHOOBBA (جبه - jhubba, *Hind.*). From arabic. A loose garment worn by Mahomedans, reaching down to ankles, having two triangular flaps on each side of the skirt [sheelay].

JHOOL (جهول - jhúl, *Hind.*). From arabic (jull). Body clothing of a horse [ghorah], elephant [q.v.], or other domesticated animal.

JHOOM (جهوم - jhúm, *Hind.*). N. indian for Coomry [q.v.].

JHOOMKAH (جهمکا - jhumká, *Hind.*; சிமிக்கி - shimikki, *Tam.*). Literally a cluster. A bell-shaped golden pendant of an earring, the edges of which are furnished with small pearls [moty, zewar].

JHOW (झावु - jhávu, *San.*). From (jham, san. to consume) [jam]. Title otherwise Tamarisk. Botanically the Tamarix genus, tamariscineæ [vricsham, 19]. Shrubs or small trees; leaves minute, scale-like; flowers small, spiked, white or pink; branches twiggy. The species best known to the natives are shown below.——*Cypress jhow* (पिचुल - pichula, San.; लालझाऊ - lálajháú, Mahr.; لال جهاؤ - láljháú, Hind. and Dec.). San. from (pichu, san. cotton + lá, san. to take). Mahr. from (lála, mahr. red + jháú, mahr. tamarix gallica, linn.); from rose-colored flowers. Hind. from sanscrit. Title otherwise Bastard cypress, Cypress tamarisk. Botanically Tamarix [jhow] dioica, roxb., tamariscineæ [vricsham, 19]. Small under-shrub; young branchlets glabrous; leaves sheathing; flower-bearing branchlets about as long as the terminal spikes; flowers diæcious; styles elongated beyond the corolla; flowers very small, rose-colored; flowering nearly all the year. In beds of rivers, highly ornamental; light feather-branches, resembling casuarina [chowkmaram]. Twigs are used in medicine as astringent. Wood moderately hard, red, outer portion white; used mainly for fuel, but also for the supporting sticks of roofs, and for basket [tokrah] work.——*Garden jhow* (డ్జానె - dzáne, Tel.). Tel. also (pabbasachettu). Title otherwise Garden tamarisk, Heath-like trichorus. Botanically Tamarix [jhow] ericoides, rottl., tamariscineæ [vricsham, 19]. Alias Myricaria vaginata; Trichaurus ericoides. Shrub; stems slender, branchlets fastigiate; leaves minute, scale-like, ovate-lanceolate, acuminate; flowers pale rose-pink, in terminal racemes; stamens not exceeding the petals, alternately long and short; capsule ½ inch. Rather large heath-like flowers; beds of rivers; cultivated in gardens. —*Jungle jhow* (جنگلی جهاؤ - janglíjháú, Hind.). Same as Casuarina [chowkmaram].——*Manna jhow* (झावुक - jhávuka, San.; झाऊ - jháú, Mahr.; اثل - asl, Ar.; گز - gaz, Pers.; جهاؤ - jháú, Hind. and Dec.; ప్రక్కె - prakke, Tel.; சிறுசவுக்கு - shirusavukku, Tam.). Title from saccharine product [manna]. San. from (jham, san. to consume). Mahr. from sanscrit. Ar. from (asala, ar. to have a root). Hind. from sanscrit. Tel. from (prakka, tel. side), from its growing on the sides of rivers. Tam. from (shiru, tam. small + shavukku, tam. casuarina equisetifolia, forst.). Ar. also (tarafá). Pers. also (shorgaz). Hind. also (barímáí), meaning the galls. Tel. also (pakke); (pakki) [stunted jack]; (érusaru); (shirisaru); (dzammi) [shamee]. Tam. also (áttuççavukku), meaning river + casuarina equisetifolia, forst.; (kódasavakku), meaning hot season + casuarina equisetifolia, forst. Greek μυρίκη. Title otherwise Burree moy, Indian tamarisk. Botanically Tamarix [jhow] gallica, linn., tamariscineæ [vricsham, 19]. Alias Tamarix articulata, epacroides, indica. Shrub, 6 feet; sepals five; petals five; young branches glabrous; leaves amplexicaul, glabrous; torus ten-toothed, leaves ovate, acute, with white edges; spikes elongated, straight, panicled; capsules attenuated; flowers small, rose-colored; flowering in july-august; sandy beds of rivers especially near sea coast. Feather-like in its growth; numberless spikes of flowers. The galls [mauchicoy] are roundish and very nodular, or knotty excrescences, varying in size from a pea [calauyam] to a soap-nut [q.v.]; the knots are often so numerous and prominent with narrow necks that they give the gall the appearance of a cluster; the galls are generally greyish or yellowish brown in color; the quantity of the tannic and gallic acids they contain is smaller than that in oak [belote] galls, and their action is consequently somewhat weaker than that of the latter. The ashes, when tree grows near the sea, contain a quantity of sulphate of soda, and cannot be used as a ley for washing as they coagulate the soap [sauboon]; when the tree grows in sweet soil in the interior the ashes are free from the soda [munncauram]. A saccharine exudation or manna is produced by the puncture of the insect coccus maniparus. The tree was sacred to osiris amongst the ancient egyptians, and to apollo amongst the greeks. Galls are used medicinally as astringent in place of oak galls; action due to tannic and gallic acid; manna [q.v.] is detergent, aperient, and expectorant. Galls and bark employed as a mordant [cauram] in dyeing [shauyam]; baskets [tokrah] made of the twigs. The wood is coarse-grained and often very red; is used for persian wheels [chuckram], in turning, &c.——*Red jhow* (झावुक - jhávuka, San.; लालझाऊ - lálajháú, Mahr.; اثل الاحمر - aslulahmar, Ar.; گز سرخ - gazisurkh, Pers.; لال جهاؤ - láljháú, Hind. and Dec.; ఎఱ్ఱెరుసరు - erraérusaru, Tel.; சிவப்பாற்றுச்சவுக்கு - shivappáttuççavukku, Tam.). Title from color of galls. San. from (jham, san. to consume). Mahr. from (lála, mahr. red + jháú, mahr. tamarix gallica, linn.). Ar. from (asl, ar. tamarix gallica, linn. + ahmar, ar. red). Pers. from (gaz, pers. tamarix gallica, linn. + surkh, pers. red). Hind. from (lál, hind. red + jháú, hind. tamarix gallica, linn.). Tel. from (erra, tel. red + érusaru, tel. tamarix gallica, linn.). Tam. from (shivappu, tam. red + áru, tam. river + shavukku, tam. casuarina equisetifolia, forst.). Hind. also (chhotímáí), meaning the galls. Tel. also (errashirisaru), meaning red + tamarix gallica, linn. Tam. also (shivappukkódaççavukku), meaning red + hot season + casuarina equisetifolia, forst.; (shivappuççirusavukku), meaning red + small + casuarina equisetifolia, forst. Title otherwise Atlee gall, Choti moy, Red indian tamarix, Red tamarisk. Botanically Tamarix [jhow] articulata, vahl., tamariscineæ [vricsham, 19]. Alias Tamarix orientalis, pharas. Bush or coniferous-looking tree; branchlets fastigiate, elongate, slender, cylindric, jointed; leaves reduced to a very short sheath with a minute tooth; spikes slender, more or less interrupted; bracts sheathing, acute; flowers ⅙ inch in diameter, subsessile; stamens inserted in alternate notches of the ten-lobed disk. Galls smaller than gallica [manna jhow]; not three-angled but round, knotty, of the size of a pea [calauyam], and of a yellowish brown color. Galls employed as an astringent; bark is bitter, astringent and tonic.

JI (जि - ji, *San.*). To conquer.——*Jeina* (जैन - jaina, San.; ஷைனன் - shainan, Tam.). In the later Booddhist [booddha] system, he who has overcome the eight great crimes is called Jinan. These crimes are eating at night; slaying an animal; eating the fruit of those trees that give milk; tasting honey or flesh; taking the wealth of others; taking by force a married woman; eating flowers, butter, cheese; and worshipping the gods of other religions. The same word as Tsin used by booddhists in china. An older name for the followers of this sect was Nirgrantan meaning destitute of wealth; properly the title of jeina ascetics only or Yaties [q.v.].—"*a*" The Jeinas are divided into two principal divisions, Digambarans [q.v.] and Shwetaumbarans [q.v.]. The former word means sky-clad, or naked, but in the present day ascetics of this division wear colored garments and confine the disuse of clothes to the period of their meals. Shwetaumbaran means one who wears white garments. But the points of difference between these two divisions are far from being restricted to that of dress; they are said to comprehend a list of seven hundred topics, of which eighty-four [chowraushy] are considered to be of paramount importance. Amongst the latter are mentioned the practice of the Shwetaumbarans to decorate the images of their saints with earrings, necklaces, armlets, and tiaras of gold and jewels; whereas the Digambarans leave their images without ornaments. Again, the Shwetaumbarans assert that there are twelve heavens and sixty-four indrans [q.v.]; whereas the Digambarans maintain that there are sixteen heavens and one hundred indrans. Jeinas are divided again into clergy and laity, Yaties and Shramanans [q.v.]; the latter being called by Latin writers Germanes, and now by the Tamuls Shamanar. There are some 25,000 in the Presidency; mostly in Canara, they however have a temple at Conjeeveram. The sixteen nagarams built by Keshavanna in Canara are:—Barcore, Cadama, Moodbidry, Caurcal, Basroor, Bungaudy, Padbidry, Yenoor, Caup, Moodraudy, Sooraul, Naurauvy, Yarmaula, Alauvoo, Moondcoor, Beilangady. The sixteen nagarams formed by Basavanna in Canara are:—Mangalore, Cassergode, Moolky, Vittal, Oollaula, Buntwaul, Manail, Oodipy, Panambore, Nellicaur, Manjeshwar, Neranky, Pauney mangalore, Mordala, Valalunkey, Soolya. The history of Jeinism in this Presidency is sketched at vol. I (57), (63), (75). The system was an offshoot of Booddhism with which it has many leading doctrines in common.—"*b*" The doctrines of Jeinism have been very briefly mentioned at vol. I (95), but the following are further particulars. Booddhists deny the existence of the supreme being, the Jeinas admit of one, but deny his power and interference in the regulation of the universe, and pay their devotion to divine objects of their own creation, viz., the twenty-four beatified sages or Teertancarans [q.v.]. Jeinas deny the divine authority of the vedas [q.v.] and nominally disregard distinctions of caste [jauty]. They admit the images [vigraham] of the gods of the vedantic religion into their temples and it is said worship them to a certain extent. Their priests are called Yaties [q.v.], and the laity are termed Shrauvacans [q.v.]. The novitiate of the Yaties is passed with a Gooroo [q.v.] or teacher and they are then his Chelahs [q.v.] or disciples. They say that the world is eternal, and that there is no deity distinct from the world, and that meditation and renunciation of the world will exalt man to the highest state of bliss or Nirvaunam [q.v.]. They inculcate five duties; mercy to all living creatures, alms-giving, venerating sages, confession of sins and fasting. They prohibit five sins [puncha mahapautacam], killing, lying, stealing, adultery, and worldly-mindedness. Abstinence from killing is the chief part of their system. In their books sixty-three special dispositions are named, being of very high and difficult attainment. Any one who has attained Trishashty, is a man of the sixty-three, a perfect man, and becomes after death a Jinan or a Teertancaran. The Jeinas are sometimes called Syaudvaudies [q.v.], assertors of probabilities, or of what may be. These usually form seven categories, or:—a thing is; it is not; it is and it is not; it is not definable; it is, but is not definable; it is not, neither is it definable; it is, and it is not, and is not definable. Hence the Jeinas are also termed Saptavaudies [q.v.] assertors and oppugners of seven propositions. The Jeinas believe god, the vedam, the world, time, soul, action, and virtue, to be eternal. So the Jeina chintaumany [q.v.]:—"அரியுமல்ல அரனுமல்ல அயனுமல்ல அப்புறங் கருமைவெண்மை செம்மையுங் கடந்துநின்ற காரணம் பெரியதல்ல சிறியதல்ல பெண்ணுமாணு மல்லவே திரியமுங் கடந்துநின்ற தூரதூர தூரமே"—"On that side it is neither hary [q.v.], nor haran "[q.v.], nor ajan [q.v.], a standing cause removed from black, "white and red; it is not great, it is not small, neither is it male "nor female; beyond even the fourth state of corporeal being, "it is further, further, further still."—"*c*" The principal point in the Jeina creed is as above said the reverence paid to holy men, who by long discipline have raised themselves to divine

perfection. The Jinan or conquering saint, who having conquered all worldly desires declares the true knowledge of the Tatwams [q.v.], is with Jeinas what the Booddha [q.v.] or perfectly enlightened saint is with Booddhists. He is also called Jineshwaran, chief of Jinans; Arhat [q.v.], the venerable; Teertacaran or teertancaran, the saint who has made the passage of the world; Sarwanyan, omniscient; Bhagavat, holy one. Time [caulam] with Jeinas proceeds in two eternally recurring cycles [chuckram] or periods of immense duration, defying all human calculation:—the Ootsarpiny [q.v.] or ascending cycle; the Avasarpiny [q.v.] or descending cycle. Each of these has six stages. Those of the Ootsarpiny period are bad-bad, bad, bad-good, good-bad, good, good-good time. In the Avasarpiny period the series begins with good-good and goes regularly backwards. In the first cycle the age and stature of men increases; in the other, decreases. The world is now in the fifth stage of the Avasarpiny, i.e., in bad time. When the two cycles have run out, a Yoog [q.v.] or age is accomplished. Twenty-four Jinans or perfect saints raised to the rank of gods have appeared in the present Avasarpiny cycle, twenty-four have appeared in the past Ootsarpiny, and twenty-four will appear in the future. The idols representing them are always, like that of the Booddha [q.v.], in a contemplative posture, but have different animals, plants, and symbols accompanying them, such as a bull, elephant, horse, ape, a lotus, the moon, to serve as distinguishing characteristics. The first Jinan of the present cycle lived 8,400,000 years, and attained a stature equal to the length of 500 bows [dhanoos]. The age and stature of the second was somewhat less, and so in a descending scale. The last two Jinans, Parshwanautan and Mahaveeran, were probably real persons and are those principally revered by the Jeinas of the present day, the first founder of the sect having been Parshwanautan and its first active propagator, Mahaveeran. In the same cycle there have lived twelve Chuckravurties [q.v.], or universal emperors, nine divine personages called Baladevans, nine called Vausoodevans and nine others called Praty vausoodevans, making a list of sixty-three divine persons in all. With regard to the world, the Jeinas affirm that being formed of eternal atoms [anoo, paramaunoo], it has existed and will exist eternally. They believe that it has three divisions, viz., lower, middle, and upper, and that there are numerous hells and heavens. All existing things are arranged under the two great Tatwams [q.v.] of Jeevam [q.v.], living soul, and Ajeevam, inanimate objects. Of living souls there are three kinds:—Nitya siddhan, ever perfect, as the Jinan; Mooctautman, liberated soul; Baddhautman, bound soul, or one bound by works [carmam] and worldly associations. Material objects are sometimes classed under a Tatwam called Poodgalam, and some make seven, others nine tatwams. There are three gems which together effect the soul's Mocsham [q.v.] or liberation, viz.:—right intuition or Samyak darshanam; right knowledge or Samyak nyaunam; right conduct or Samyak chauritram. This last consists in observing five duties or vows of self restraint or vratams [q.v.], thus:—Do not kill or injure; which jeinas carry to such an extreme that they strain water before drinking it, sweep the ground with a brush before treading on it, never eat or drink in the dark, and sometimes wear muslin [q.v.] before their mouths to prevent the risk of swallowing minute insects; moreover, they never eat figs [atty] or any fruit containing seed, nor will they even touch flesh-meat with their hands. Do not tell lies. Steal not. Be chaste and temperate in thought, word, and deed. Desire nothing immoderately.—" *d* " The creed according to its applicability divides itself into the Yaty dharmam and Shramana dharmam. The Yaty dharmam is of ten kinds:—Aurjavam to follow the right way and teach it to others; Maurdavam, to behave with reverence to superiors, and carefully to instruct disciples; Satyam, invariably to speak the truth; Showcham, mentally to renounce hatred, affections, or passion, and evil desire, and outwardly to act with purity; Tyaugam, to renounce all bad conduct; Cshamay, to bear patiently like the earth in time of trouble; Tapas, outward and inward self-mortification; Bramhacharyam, to relinquish all sexual attachment even in word or thought; Akinchanatay, to renounce the darkness of error and to follow the light of truth; Samyamam, duly to celebrate all special periods, festivals, or the like. The Shramana dharmam is of eleven kinds:—Daurshanican, one who relinquishes certain unclean kinds of food, with killing, lying, theft, and all anxious cares; Vratican, one who eats not at night, is faithful to his teacher, to his family, and to his religion; he is self-restrained and keeps silence and zealously renounces the use of all pleasant vegetables; Samaudhican is one, who with the foregoing qualifications, renders homage to the divine being three times a day, morning, noon, and evening; Proshopavausan, one who fasts on certain days, so appointed to be observed; Sanchitavratan, one who, with the foregoing dispositions, renounces certain kinds of food; Rautry bhooctan, one who observes mortification during the day only; Bramhacharry, one always occupied in contemplation of god; Anaurambhan, one who quits cultivation and all other secular occupations; Aparigrahan, one who renounces all kind of earthly gain; Anoomaty pindavratan, one who forbears to eat even that which he had prepared; Ootchishta pindavratan, one who relinquishes dress, except for mere decency; he carries a pot and lives in a wilderness.—" *e* " The Jeinas say that Yellacharry wrote the Cooral [q.v.], though the Sheivas claim it as theirs. The Jeina scriptures are comprised in fifty different works, collectively called the Sootrams [q.v.], and sometimes the Siddhauntams [q.v.] and classed in two different ways; first, under the two heads of Calpa sootram and Augamam [q.v.], five works coming under the former, and forty-five under the latter head; secondly, under eight different heads, viz., eleven Angams; twelve Oopaungams; four Moola sootram; five Calpa sootram; six Chooddams; ten Payannas; Nundy sootram; Anyoga dwaura sootram. Some of them have a four-fold commentary, under the names Teecay, Niryoocty, Choorny, and Bhaushyam, constituting with the original the five-fold or punchaunga Sootram. They are partly in Sanscrit, partly in Maugadhy pracrit, and the total of the fifty works amounts to 600,000 Shlocams. The authorized books now extant and in use are:—Amaram, Chintaumany, Choodaumany, Dharma pareecshay, Dhavalam, Gomatasauram, Maha dhavalam, Maha pooraunam, Meroo mandara pooraunam, Naya chuckram, Neelakeshy vaudam, Padaurtasauram, Ratna carandacam, Shabdabhangy, Shauctauyanam, Soobodhiny, Trilocasauram, Vijaya dhavalam, &c. Books written in Tamul are:—Chintaumany, Choodaumany, Cooral, Manimekhalay, Meroo mandara pooraunam, Naulady, Neelakeshy vaudam, Nigantoo, Nunnool, &c.—" *f* " The following is Strabo's account of Bramins and Shramanas quoting Megasthenes:—" He makes also another division of the philosophers, saying that there are two races of them, one of which he calls the Brahmanes, βραχμâνες, and the Germanes, γερμâνες [shramanan]. Of these the Brahmanes are the more excellent, inasmuch as their discipline is preferable; for as soon as they are conceived they are committed to the charge of men skilled in magic arts, who approach under the pretence of singing incantations for the well-doing both of the mother and child, though in reality to give certain wise directions and admonitions, and the mothers, that willingly pay attention to them, are supposed to be more fortunate in the birth. After birth they pass from the care of one master to that of another, as their increasing age requires the more superior. The philosophers pass their time in a grove of moderate circumference, which lies in front of the city, living frugally and lying upon couches of leaves and skins; they abstain also from animal food and intercourse with females, intent upon serious discourses and communicating them to such as wish; but it is considered improper for the auditor either to speak or to exhibit any other sign of impatience, for, in case he should, he is cast out of the assembly for that day as one incontinent. After passing thirty-seven years in this manner they betake themselves to their own possessions, where they live more freely and unrestrained; they then assume the linen tunic and wear gold in moderation upon their hands and in their ears; they eat also flesh except that of animals which are serviceable to mankind, but they nevertheless abstain from acids and condiments. They use polygamy for the sake of large families, for they think that from many wives a larger progeny will proceed; if they have no servants their place is supplied by the service of their own children, for the more nearly any person is related to another, the more is he bound to attend to his wants. The Brahmanes do not suffer their wives to attend their philosophical discourses, lest if they should be imprudent they might divulge any of their secret doctrines to the uninitiated, and if they be of a serious turn of mind, lest they should desert them; for no one who despises pleasure and pain even to the contempt of life and death, as a person of such sentiments as they profess ought to be, would voluntarily submit to be under the domination of another. They have various opinions upon the nature of death, for they regard the present life merely as the conception of persons presently to be born, and death as the birth into a life of reality and happiness to those who rightly philosophise; upon this account they are studiously careful in preparing for death. They hold that there is neither good nor evil in the accidents which take place among men, nor would men if they rightly regarded them as mere visionary delusions either grieve or rejoice at them; they therefore neither distress themselves nor exhibit any signs of joy at their occurrence. Their speculations upon nature, he says, are in some respects childish: that they are better philosophers in their deeds than in their words, inasmuch as they believe many things contained in their mythologies. However they hold several of the same doctrines which are current among the Greeks, such as that the world is generated and destructible and of a spherical figure, and that the God, who administers and forms it, pervades it throughout its whole extent; that the principles of all things are different, water for instance is the first principle of the fabrication of the world; that after the four elements there is a certain fifth nature, of which the heaven and stars are composed; that the earth is situated in centre of the whole. They add much of a like nature concerning generation and the soul. They have also conceived many fanciful speculations after the manner of Plato, in which they maintain the immortality of the soul and the judgments of Hades and the doctrines of a sirmi description. Such is his account of the Brahmanes. Of the Germanes he says they are considered the most honorable who are called ὑλόβιοι, and live in the woods upon leaves and wild fruits, clothing themselves with the bark of trees and abstaining from venery and wine. They hold communication by messengers with the kings who inquire of them concerning the causes of things, and by their means the kings serve and worship the deity. After the Hylobii the

"second in estimation are the physicians, philosophers, who are "conversant with men, simple in their habits, but not exposing "themselves to a life abroad, living upon rice and grain, which "every one to whom they apply freely gives them and receives "them into his house; they are able by the use of medicines to "render women fruitful and productive either of males or "females, but they perform cures rather by attention to diet "than the use of medicines. Of medicines they approve more "commonly of unguents and plasters, for all others they "consider not free from deleterious effects. These and some "others of this sect so exercise their patience in labors and "trials as to have attained the capability of standing in one "position unmoved for a whole day. There are others also who "pretend to divination and inchantments, and are skilful in "the concerns of the inhabitants and of their laws; they "lead a mendicant life among the villages and towns, but the "better class settle in the cities. They do not reject such "of the mythological stories concerning Hades as appear to "them favorable to virtue and piety. Women are suffered to "philosophise with some of these sects, though they are "required to abstain from venery."——*Jamalgota* (جمال غٹہ - jamálghutta, Dec.). See sep. title.——*Jaugatey* (ಜಾಗಟೆ - jágate, Can.; జేగంట - jéganta, Tel.; சேகண்டி - shégandi, Tam.). From (jaya, san. victory + ghantá, san. bell). Circular gong [q.v.].——*Jaya* (जय - jaya, San.). From (ji, san. to conquer). Victory; used as an exclamation, either singly or with the name or title of a person of distinction, or of a deity, Jaya maharajah, Jayaraman, &c. Epithet of the sun. Hindoo 2nd or pers. name. Common to both sexes. Suffix in proper names as Dhananjayan, Mrityoonjayan [peyar].——*Jayagopaul* (జయగోపాలుడు - jayagópáludu, Tel.). From (jaya, san. victory + gópála, san. cowherd krishna). Hindoo 2nd or pers. name [peyar].——*Jayah* (जया - jayá, San.). From (jí, san. to conquer); useful medicine. Botanically the Premna genus, verbenaceæ [vricsham, 102]. Shrubs or trees with small flowers; fruit is a drupe. The species best known to the natives are:—cordifolia [conjee moonnay], esculenta [curry moonnay], herbacea [lowly jaumoon], integrifolia [moonnay], latifolia [buffalo moonnay], tomentosa [firebrand teak].——*Jayancondacholapooram* (செயங்கொண்டசோளப்புரம் - sheyangondasólappuram, Tam. jayankondacholapuram *). From (jaya, san. victory + konda, tam. achieved + chóla, san. chola king + pura, san. town). Sanscrit name (ámalakavana), meaning emblic myrobalan, phyllanthus emblica, linn. + forest. Town, Tahsildar's head-quarters, General deputy collector's division; Trichinopoly dist., Oodayarpolliem tal.; pop. 3,917; acres 2,824; lat. 11° 13′; long. 79° 26′; from Ariyalore E.N.E. 21 miles; from Oodayarpolliem N.E. 5 miles; from Trichinopoly E.N.E. 53 miles. Two curious Jeina [q.v.] figures. To one outside village on a bund [q.v.], ceremonial observances are performed. It is said, tears drop from its eyes whenever rain is wanted. Superior cloth market every Monday.——*Jayanty* (जयन्ती - jayantí, San.). Means day of success and rejoicing. Originally applied to time of birth of Krishnan [q.v.]; subsequently extended to births of Vishnoo [q.v.] in any of his incarnations [avatar]. Short for Krishna jayanty. Also a form of Cauly [q.v.].——*Jayaraman* (சயராமன் - shayaráman, Tam.). From (jaya, san. victory + ráma, san. the god). Hindoo 2nd or pers. name [peyar].——*Jayaramdoss* (జయరామదాసుడు - jayarámadásudu, Tel.). From (jaya, san. victory + ráma, san. the god + dása, san. slave). Hindoo 2nd or pers. name [peyar].——*Jayashunker* (జయశంకరుడు - jayashankarudu, Tel.). From (jaya, san. victory + shankara, san. shiva, the happiness maker). Hindoo 2nd or pers. name [peyar].——*Jayay* (जया - jayá, San.). Victory. Name of the third eighth and thirteenth lunar days [tity] of either half-month [pacsham]. Cf. Nundy.——*Jeypore* (జయపురము - jayapuramu, Tel.). See sep. title.——*Jinan* (जिन - jina, San.). From (ji, san. to conquer). Teacher of the Jeina [q.v.] doctrines, any one of the twenty-four deified teachers of the system; called also a Teertancaran [q.v.].——*Jineshwaran* (जिनेश्वर - jinéshvara, San.). From (jina, san. jaina teacher + íshvara, san. lord). Chief of Jeinas; the Jinan who declares the true knowledge of the tatwams [q.v.]. The same with the Jeinas as Booddha [q.v.] with the Booddhists.——*Jingan* (جنگن - jingan, Hind.). From (jinginí, san. the plant). Same as Wodier.——*Jiyyangar* (జియ్యంగారు - jiyyangáru, Tel.). From (jiyyaru, tel. vaishnava ascetic + gáru, tel. term of respect). High priest [acharry] among the Veishnavas.——*Jiyyar* (ஜியயர் - shiyyar, Tam.). From (ji, san. to conquer); one who has conquered his passions, a monk. Head of a Veishnava mutt [q.v.]. Such mutts are located at Conjeeveram, Shreerungam, Rameshwaram, Totaudry, otherwise Vaunamamullay [nangoonairy], and Ahobalam. The mutt at the last place has been transferred to Trivellore in Chingleput district.

JIBBREEL (جبرئیل - jibraíl, *Hind.*). Gabriel, said to have been the medium of revelation to Mahomet. The Mahomedans reckon four great angels:—"*a*" Jibbreel the archangel who is God's messenger, the protector of the Mahomedans.—"*b*" Michael the angel who presides over water and rain, the protector of the Jews.—"*c*" Israfeel or the angel who presides over the wind, and will sound the last trumpet at the resurrection.—"*d*" Izraeel or the angel of death.

JID (ضد - zidd, *Hind.*). From (zidda, ar. contrary). Spite.

JIHWAH (जिह्वा - jihvá, *San.*). From (hvé, san. to call). Tongue. Plant second term. Ex., where transl. is of first term:—Elephantopus scaber (gójihvá), cow; Leea sambucina (karkatajihvá), crab; Methonica superba (ahijihvá), snake. See gloss. paragraphs.

JIMIKY (சிமிக்கிப்பூச்செடி - shimikkippúççedi, *Tam.*). Tam. from (shimikki, tam. the ear ornament + pú, tam. flower + shedi, tam. plant). Tam. also (shirubúnaikkáli), meaning small + mucuna pruriens, dec. Title otherwise Granadilla, Passion-flower. Botanically Passiflora leschenaultii, dec., passifloreæ [vricsham, 61]. Climbing; leaves alternate, half-orbicular, rounded at the base, somewhat truncated and tricuspidate at the apex, pubescent beneath; petioles with two glands about their middle; tendrils simple; calyx without an involucre; petals five; peduncles in pairs, in the same axils as the tendrils, simple, one-flowered; fruit purple when ripe; flowers whitish, with purple filaments; flowering nearly all the year.

JIN (جن - jinn, *Hind.*). From (jinna, ar. conceal). Goblin.

JINJEE (செஞ்சி - sheñji, *Tam.* gingee *). Corruption of (shingi, tam. from shringí, san. hill). Sanscrit name (krishnapura), meaning proper name + town. Mahomedan name (nusratgarh), meaning victory + city, after nusrat jung, title of zoolfacar khan.—"*a*" Deputy tahsildarry, South arcot district. Pay Rs. 70.—"*b*" Town; South arcot dist., Tindivanam tal.; pop. 419; acres 953; lat. 12° 15′; long. 79° 27′; from Chidambaram N.N.W. 60 miles; from Cuddalore N.N.W. 44 miles; from Madras S.W. 82 miles; from Tindivanam W. 17 miles; from Tricalore N.E. 24 miles; from Vriddhauchellam N.N.E. 49 miles; from the sea W. 38 miles. On road from Krishnagherry to coast, about half way between Tindivanam and Trinomallee. Site of fine hill fortress. At least six centuries old. Jinjee was once a province. In 1638, Bandoollah khan, the Beejapore general, captured the fort after joining his forces to those of Golcondah, which were then beleaguering the place. The division of the Beejapore army that effected this was commanded by Shahjee, father of Shivajee. In 1677, the fort fell to Shivajee by stratagem, and remained in Mahratta hands for twenty-one years. In 1690, the armies of the Delhi emperor, under Zoolfacar khan, were despatched against Jinjee with a view to the final extirpation of the Mahratta power. The siege was prolonged for eight years, but the fort fell in 1698, and afterwards became head-quarters of standing army in Arcot. In 1750, the French under Bussy captured it by a skilful and daringly-executed night-surprise, and held it with an efficient garrison for eleven years, defeating one attack by the English in 1752. Captain Stephen Smith took the place after five weeks' siege in 1761. In 1780 it was surrendered to Hyder ally, but subsequently it played no part of importance in the wars of Southern india. Jinjee long enjoyed the reputation of being one of the most unhealthy localities in the Carnatic [q.v.]. The french are said by Orme to have lost 1,200 European soldiers during their eleven years' tenancy of it, and their garrison of Europeans rarely exceeded 100 men. The fortress consists of three strongly fortified hills; Chundrayya doorgam, Krishnagherry, and Rajagherry. These are connected by long walls of circumvallation enclosing an area of over 7 miles in circumference. Rajagherry, the highest and most important, is about 600 feet high, and almost impregnable; the only approach being defended by three strong lines of fortification, while the only entrance is by a wooden bridge over a deep natural chasm. It consists of a ridge terminating in an overhanging bluff, facing south. On the summit of the bluff stands the citadel. It is not known who constructed the fort. The site was probably built on by Chola kings. The commencement of the great fort is attributed to a son of Vijayarunga naick, Governor of Tanjore in 1442. The works were completed during the time of the Vijianugger kings. The martello towers and cavaliers show traces of European supervision, and some of the more modern embrasures were the work of the French. The great lines of fortification which cross the valley between the three hills were evidently built at different periods. In their original form, they each consisted of a wall about 5 feet thick, built up of blocks of granite [caroom cull], and filled in with rubbish; but subsequently a huge earthen rampart, about 25 or 30 feet thick, has been thrown up behind these walls, and riveted roughly on the inside with stone, while at intervals in this rampart are barracks or guard rooms. There are several ruins of fine buildings inside the inner fort, two temples, the calyauna [q.v.] mahaul [q.v.], gymkhana [q.v.], granaries, eedgah [q.v.], barracks, mantapams [q.v.], &c., including a great tower of eight storeys. The most noticeable building of all is the Calyauna mahaul [calyauna mantapam]. This consists of a square court surrounded by rooms for the ladies of the Governor's household. In the middle of this court is a square tower of eight storeys, and altogether about 80 feet high, with a pyramidical roof. The first six storeys are all of the same size and pattern, namely an arcaded verandah [q.v.] running round a small room about 8 feet square, and communicating with the storey above by means of small steps. The room on the seventh storey has now no verandah, but there are indications of one having existed formerly. The topmost room is of smaller size than the others. The only other interesting

feature in the building is an earthenware pipe leading to the sixth storey, and brought all the way from a tank 600 yards off, outside the walls of the fort, and carried under the wall to the back of the women's quarters, and thence over the roof to the Mahaul [q.v.]. Of curiosities on the hill may be mentioned the great gun; the rajah's bathing-stone, a large slab of granite 15 feet square and 4 or 5 inches thick near the spot where the palace is said to have stood; and a well in rock, into which prisoners were thrown to die of starvation. The latter is a singular boulder about 15 or 20 feet high poised on a rock near the Chuckracoolam and surmounted by a low circular brick wall. It has a natural hollow passing through it and the bottom is blocked up with masonry and the upper edges plastered with choonam [q.v.]. South of Rajagherry is Chuckly droog, also fortified, but separately. Near the Arcot gate of the Jinjee fort is a stone with an inscription. Several of the handsomely carved pillars of the temples on the Rajagherry were carried by the French to Pondicherry, and are still to be seen there. On the summit of a hill, a mile north of Jinjee, called Tirnautar coondroo are twenty-four Jeina figures carved on a rock. There are two perennial springs of excellent water in the top of Rajagherry. At the foot of the ridge of Rajagherry and between it and Chuckly droog are two tanks, and on the western side of the bluff is a third reservoir constructed to catch the surface drainage. Jinjee rock. Trig. station in lat. 12° 14′ 58·39″; long. 79° 26′ 13·98″; height 968 feet; from Jinjee W. 1 mile; from Tindivanam W. 17 miles; from the sea W. 40 miles [carnautaca rajakkal].

JINKA (मृग - mriga, *San.*; हरण - harana, *Mahr.*; کلویٹ - kalwít, *Hind.*; ہرن - haran, *Dec.*; ಚಿಗರಿ - chigari, *Can.*; ಎರಳೆ - erale, *Too.*; జింక - jinka, *Tel.*; ହରିଣ - horino, *Oor.*; കരിമാൻ - karimán, *Mal.*; கரியமான் - kariyamán, *Tam.*). San. from (mrig, san. to pursue). Mahr. from (harina, san. antelope). Can. from (chigiyu, can. to jump). Tel. from (chimmu, tel. to butt). Mal. from (kari, mal. black + mán, mal. deer). Tam. from (kariya, tam. black + mán, tam. deer). San. also (harina), meaning reddish white; also (krishnamriga), meaning black antelope. Tel. also (irri), meaning butting; also (lédi). Title otherwise Indian antelope. The english Fallow-deer. Antilope bezoartica, antilopinæ, bovidæ, ruminantia, mammalia [sastanam, 23], of naturalists [jantoo]. Alias Antilope cervicapra. Horns long, diverging, with five flexures in old individuals; rings strong at the base, tip smooth; color of adult male rich dark glossy brown color above and on the sides, beneath and inside of the limbs white; hind head, nape, and back of neck hoary yellowish; nose and lips, and a large mark round the eyes white. Length about 4 feet to root of tail which is 7 inches; height at shoulder 32 inches. Horns from 20 to 27 inches long, 9 to 81 inches divergent at tip. The female is somewhat less and is pale yellowish fawn color above, white beneath and inside the limbs, and with a pale streak from the shoulder to the haunch. The buck when adult becomes darker and is called Black buck. Found throughout Southern india in suitable localities, but does not occur in the richly wooded Malabar coast. A large herd is kept in the park round Government house at Madras. Buck-shooting is favorite sport. The venison of this antelope is excellent, that of old bucks is superior to that of young ones. If taken young this antelope becomes very tame. Antelope skins are used by Bramins to sit upon. The skin of the male antelope, in its full shape, is especially valued by performers of yaugams [q.v.]. The intestinal secretion is used in rheumatic pains. The horns [sing] of the male antelope are reduced to powder and used as a medicine for colic and other diseases. The horn-powder is sometimes burnt to keep off scorpions [tail] and mosquitoes [q.v.]. The Jinka is one of the constellations [nacshatram] of the Indian zodiac [raushy] and is sacred to Chundran [q.v.] the moon. Compare:—Gazella bennettii, goat-antelope; Portax pictus, white-footed antelope; Rusa aristotelis (burrajinka), large antelope; Tetraceros quadricornis, four-horned antelope. See gloss. paragraphs.

JINRICKSHAW (جنرکشا - jinrikshá, *Malay*). From japanese meaning man + strength + cart. Japanese chair. Public conveyance of Shanghai introduced into India and now in use at Madras. It is like a small buggy with room inside for one person only; adopted for flat country when roads are good and cooly [q.v.] hire cheap.

JINS (جنس - jins, *Hind.*; దినుసు - dinusu, *Tel.*). From arabic. Kind, sort, article. Hama jins is all articles.

JIROYATY (زرعتی - ziráati, *Hind.*). From (zara, ar. to sow). Cultivation. Cultivated land. Often used for lands ordinarily assessed, as opposed to inam [q.v.].

JITA (जितवृक्ष - jitavriksha, *San.*). Corruption from arabic (zaitún). Olive tree. Botanically the Olea genus, oleaceæ [vricsham, 85]. Trees or shrubs; leaves evergreen, opposite, entire or toothed; flowers small, whitish, frequently fragrant, in axillary or terminal panicles; fruit has an oily flesh and a bony two-celled stone. The species best known to the natives are:—dioica [indian olive], europæa [zeitoon]. Other s. indian species indigenous or naturalized are:—glandulifera, polygama.

JITTA (జిట్ట - jitta, *Tel.*). Means bird [cooroovy, pitta]. Common bird second term. Ex., where transl. is of first term:—Acrocephalus brunnescens (borrajitta), large; Acrocephalus dumetorum (kampajitta), bush; Calobates sulphurea (mudditippudujitta), rump + turning; Cisticola schænicola (vedurujitta), bambusa arundinacea, bamboo; Corydalla rufula (gurrapumárijitta), horse + keeper; Dicæum concolor (chittujitta), small; Drymoipus inornatus (lottakannujitta), hollow-eyed; Dumetia albogularis (pandijitta), pig; Mirafra affinis (flajitta), whistling; Nemoricola indica (uyyálajitta), swing; Orthotomus longicaudus (likkujitta), sickle; Pipastes agilis (likkujitta), sickle; Prinia socialis (rellujitta), reed; Pyctorhis sinensis (errakálijitta), red + leg; Tephrodornis pondicerianus (vadambálajitta), mocking. See gloss. paragraphs.

JIZIA (جزیہ - jiziyah, *Hind.*). From (jazá, ar. compensation). A poll tax levied by Mussalman rulers from all subjects who were not Mussalmans; thirteen rupees yearly for every two-thousand rupees worth of property possessed.

JO (جو - jo, *Hind.*). Which.——*Jo hookum* (جو حکم - johukm, Hind.). From (above + hukm, ar. order). As ordered.

JODE (جوڑ - jor, *Hind.*; ಜೋಡು - jódu, *Can.*; జోడు - dzódu, *Tel.*). Junction. Suffix in place names.——*Jodah* (جوڑا - jorá, Hind.; జోడు - dzódu, Tel.; சோடு - shódi, Tam.). From (jud, san. to join together). Pair. A pair of shoes. A suit of clothes; especially the Mahomedan ceremonial suit, comprising the duster [q.v.], neemah [q.v.], jauma [q.v.], cummerbund [q.v.] and izaur [pyjauma].——*Jody* (ಜೋಡಿಗೆ - jódige, Can.; జోడి - jódí, Tel.). From (jódisu, can. to unite); as combining features of a free and a paying grant. Quit-rent, or something less than ordinary assessment [teervay] payable to Government on an Inam [q.v.]. See vol. I, 112.——*Jooree* (جوڑی - jorí, Hind.). From (jorá, hind. a pair). Scarf in pairs, made with a fag between for convenience of separation.——*Jootee* (جوتی - jútí, Hind.; சூத்தி - shútti, Tam.). Slipper. Kowsh are without heels, the back part being flattened down under the foot. Chinauls are without any back-piece, the quarters terminating under the ankles on each side, with raised heels perhaps an inch high. In Nokdars, the toe part is terminated by a long pointed strip, usually of leather [chamrah] lined with cloth, that curls inwards over the toes.

JOG (योग - yóga, *San.*; جوگ - jog, *Hind.*). From (yuj, san. to join). Union. The practice of religious abstraction [yogam], by which the individual may be united with the universal soul [autmam, sauyoojyam], and acquire similar supernatural powers.——*Jogayya* (ಜೋಗಯ್ಯ - jógayya, Can.). From (jógi, can. sage + ayyá, can. master). Hindoo 2nd or pers. name [peyar].——*Jogy* (योगी - yógí, San.; جوگی - jogí, Hind.). A practiser of Yogam [q.v.]; a pretender to superhuman faculties [siddhy]; in general a religious mendicant, usually sheiva. It is also a caste title.

JOHUR (جوہر - jûhar, *Hind.*). From (yóddhri, san. warrior). The practice of Rajpoots of putting their wives and children to death when unable to resist an enemy. It happened at Bobbily in 1758.

JOLLARPETT (சொலார்ப்பேட்டை - sholárppéttai, *Tam.* jalárpet *). From (dzálári, tel. plant, shorea talura, roxb. + péta, tel. suburb). Village, Railway station; Salem dist., Tripatore tal.; pop. 694; acres 579; lat. 12° 34′; long. 78° 37′; height 1,320 feet; from Salem N.N.E. 69 miles; from Tripatore N. 6 miles. Junction of the S.W. line and Bangalore branch lines of the Madras railway; large number of railway employés are resident.

JONACA (జొనంగి - dzónangi, *Tel.*; ജോനക - jónaka, obl., *Mal.*; சோனக - shónaga, obl., *Tam.*). From (yavana, san. greek). The country Shonagam was Sennar or Arabia. Otherwise Yonaca. Greeks, Jews [q.v.].—"*a*" As to the Greeks, India was invaded by Alexander the Great [secunder] three centuries before Christ; and writers of his life and actions, particularly Arrian and Quintus curtius, give an account of the countries he subdued. An ambassador named Megasthenes was sent to the court of Chundragooptan [q.v.] by Seleucus nicator, about three centuries before Christ, some of whose observations have been preserved by the greek geographer, Strabo. The south of India was visited and described by Arrian in the second century B.C., and many geographical notices and names of people and places occur in Ptolemy and Pliny.—"*b*" The Jews of Malabar are of two different denominations; Black jews, natives of the country, and White jews, bearing in their fair complexions evidence of recent emigration from a more temperate climate. The principal settlement of the Jews is in the southern part of the Malabar district. In Cochin are many White jews, the Black jews for the most part inhabiting a suburb on the northern side of the city. There is preserved in Cochin by a Rabbi a grant of Anjoovannam to Joseph Rabban, by the Permaul bhauscara ravy vurman and attested by the chief rajahs of Keralam [q.v.]; as follows in very ancient tamul akin to malayalam:—ஸ்வஸ்தி ஸ்ரீ - கொகொனைம கொணடான் கோ - ஸ்ரீ பார்கரனஇரவிவனமர் பலநூறுயிரததாணடுமசெந

The king who has taken the supreme rule, Permaul shree "bhauscara ravy vurman, wielding the sceptre and ruling for "many 100,000 years in his time, in the thirty-sixth year against "the second cycle, on the day when he was pleased to sit in "Mooyiricode [q.v.], he was pleased to grant this favor. We "have given to Joseph rabban the principality Anjoovannam, "along with the seventy-two Jenmy [q.v.] rights such as going "with elephants and other conveyances, tribute from subordinate "land-holders, and the possession of Anjoovannam, the light by "day, the spreading cloth, the litter, the umbrella, the drum, "the trumpet, the gateway with seats, ornamental arches and "similar awnings and garlands and the rest. We have remitted "to him the tribute due to the supreme government. Given to "Joseph rabban the owner of Anjoovannam, and to his posterity, "sons and daughters, nephews and son-in-law a hereditary "appendage; for the time that earth and moon exist [achan-"draurcam]. Anjoovannam a hereditary appendage."—"c" Jonangy nye, from (náy, tam. dog) is a greyhound.

JONNA (జొన్న - dzonna, *Tel.*). Same as Cholum.

JOOGADY (జూగది - jugadi, *Tel.*). Intoxicating liquór prepared from rice [q.v.] among Ooriyas [mooskirant, pachwye].

JOOLMAUNA (جرمانہ - jurmánah, *Hind.*). From (jurm, pers. fault). A fine.

JOOLVA (జూల్వ - julva, *Tel.*). A goddess of Sowrahs [q.v.].

JOON (यूक - yúka, *San.*; قمل - kaml, *Ar.*; سپش - supush, *Pers.*; جوں - jún, *Hind.* and *Dec.*; كوتو - kutu, *Malay*; ಹೇನು - hénu, *Can.*; ಪೇನ್ - pén, *Too.*; పేను - pénu, *Tel.*; പേൻ - pén, *Mal.*; උකුණා - ukunná, *Singh.*; பேன் - pén, *Tam.*). Title from hindostany. San. from (yu, san. to fasten). Hind. and dec. from sanscrit. Louse. Synonymous with family pediculidæ, hemitera, hemimetabola, insecta [poochy], of naturalists [jantoo].

JOONAH (جونا - júná, *Hind.*). From (guna, san. thread). A rope of twisted grass or twine, made to support a round-bottomed jar.

JOROW (జొరొ - joro, *Tel.*). From (jhari, san. torrent). Sanscrit name (sarayu), meaning rapid river. River; Ganjam dist., Bodagooda zemindarry and Sooradah tal. Rises in Bodagooda maliahs [q.v.] and flowing southwards drains Bodagooda zemindarry [q.v.] and part of Sooradah talook [q.v.] and joins the Rooshcoolya near Sooradah. Length about 20 miles.

JOVY (జువ్వి - dzuvvi, *Tel.*). Same as Tsiela.——*Red jovy* (ఎఱ్ఱజువ్వి - erradzuvvi, Tel.). Same as Shilandy.

JOW (यव - yava, *San.*; जव - java, *Mahr.*; बाज्रि - bájri, *Conc.*; شعير - shaír, *Ar.*; جو - jau, *Pers.*, *Hind.* and *Dec.*; ಜವೆಗೋಧಿ - javegódhi, *Can.*; యవలు - yavalu, *Tel.*; பார்லி - párli, *Tam.*). Title from sanscrit through deccany. San. from (yu, san. to attach), grain attached to husk [geung]. Mahr., &c., from sanscrit. Can. from (yave, san. barley + gódhi, can. wheat, triticum vulgare, vill.). Tam. from english. San. also (shitashúka), meaning having sharp awns. Conc. also (bárli). Can. also (bírukánji), meaning beer barley; (mullukánji), meaning spiked barley; (akkikánji), meaning rice barley. Tel. also (dzavabiyyamu), meaning jow + grain; (dzavvubiyyamu), meaning jow + grain; (pattsayava), meaning yellow + jow; (báralibiyyamu), meaning barley + grain. Tam. also (káñji), perhaps conjee grain [caunchy, indian elm]; (várgóthumaí), meaning tail + wheat [geung]; (toraigánji), meaning master + barley. Greek κριθὴ λευκή. Title otherwise Barley, Tail wheat. Botanically Hordeum vulgare, linn., graminaceæ [vricsham, 156]. Alias Hordeum cœleste, distichum, hexastichum, hexastochyon, sativum. Cereal; produces many stems, two to three feet high, from a single grain; seeds oval, oblong, straw-colored. Used for manufacture of beer; the corn is first caused to germinate so as to develop sugar [q.v.] at the expense of the starch; the germination is then abruptly checked by turning and heating in a kiln [shoolay]; when dried and ground a mash or infusion is prepared, and this is allowed to ferment till alcohol is formed; the fermented liquor is then strained, and a sufficient quantity of hop is added to impart a bitter flavor; according to the original temperature of the mash, the duration of the fermentation, and the proportion of sugar and hops, are procured pale ale, table beer, and porter. Pearl and scotch barley are formed by the removal of the thin, hard integuments, the grain being hardened by drying. In pharm. pearl barley or the husked seeds, hordeum decorticatum, are officinal; diet for the sick; preparation, decoctum hordei. There are two varieties grown, two-rowed or Distichum and six-rowed or Hexastichum; the last more usual.—"*a*" Jow as the length of a ear of barley is a linear measure. 8 jows = 1 ungoolam [alavay, 1e]. Approximate actual value, 1 jow = ·1 of an inch. Same as San. yavam, Can. yavey, Mal. tora, Tam. nel.—"*b*" Jow as the weight of the same is a goldsmith's weight. 6 zarrahs = 1 jow; 2 jows = 1 dhaun [niray, 3e]. Approximate actual value, 1 jow = $\frac{1}{6}$th of a grain. See vol. I, 609.——*Indian jow* (هند کی جو - hindkíjau, Hind.). Same as Varagoo.——*Vilauyaty jow* (ولایتی جو - viláitíjau, Hind.). Hind. from (viláití, hind. foreign + jau, hind. oat, avena). Greek βρόμος. Title otherwise Cultivated oat, Haver, Oat. Botanically Avena sativa, linn., graminaceæ [vricsham, 156]. Seeds cylindrical, covered with a black or white envelope; groats or cuttlings are the bruised oat seeds freed of the pericarp.

JOW (جاؤ - jáu, *Hind.*). Imperative. Be off!

JOWGADA (జౌగడ - dzaugada, *Tel.*). From (dzau, oor. lac + gada, oor. fort), meaning a fort of which the walls are coated with lac [q.v.] and so made slippery and difficult to scale; cf. the story in the mahabhaurat [q.v.]. Village; Ganjam dist., Berhampore tal.; lat. 19° 31′; long. 84° 53′; from Berhampore N. 14 miles; from Chetterpore N.W. 15 miles; from the sea W. 24 miles. On N. bank of Rooshcoolya, close to Pandiyah, amongst the remains of what was once a large city surrounded by a fort wall. An inscribed rock, one of a group inside the fort in N. lat. 19° 13′ 15″, long. 84° 53′ 55″, contains the only Asoca inscription in S. india. It rises vertically and the inscribed surface faces the south-east. Photographs and copies were taken in 1858 and 1871. There are three smoothed places on the rock each close to the other, about 20 feet by 16, and the letters are about 2 inches in length. The first ten edicts of Asoca are found engraved at Capardagiry or Shahbauzgurh, Khalsy, Girnar, Dhowlee and Jowgada, the first two differing from the last three in a portion of the ninth edict. The eleventh, twelfth and thirteenth edicts are found only at Shahbauzgurh, Khalsy and Girnar. The fourteenth is at all five places. Dhowlee and Jowgada have two separate edicts not given at the other places. The following is summary of the contents of the edicts which are found at Jowgada. The first edict prohibits the sacrifice of animals either for food or in religious assemblies. The second edict provides a system of medical aid for men and animals throughout Priyadarshy's dominions and orders trees to be planted and wells to be dug along the sides of the principal public roads. The third edict enjoins a quinquennial humiliation, certain precepts are to be enjoined on the people by their teachers with arguments and examples. The fourth edict draws a comparison between the condition of the country before and during the reign of the kings. The fifth edict records the appointments of missionaries and enumerates some of the countries to which they are to be deputed; in this edict for the first time occurs the name of the celebrated city of Pautalipootram. The sixth edict appoints Pativaidacan, or Custodes morum, who are to take cognizance of the conduct of the people in their meals, their domestic life, their families, their conversation, their general deportment, and their decease; it also nominates magistrates or officers for punishment and gives an indication of the system of moral administration with which Asoca [q.v.] is credited by Greek and Persian historians. The seventh edict expresses desire on the part of the king that all the diversities of religious opinion may be obliterated and that all distinctions in rank and caste may be harmonised into one system of Bhauva shooddhy or peace of mind. The eighth edict contrasts the amusements patronised by former rajahs with the pious enjoyments prescribed by himself; the dharmayautra or festival of religion is set in opposition to the vihaurayautra or festival of amusement, and is stated to consist in the visits to holy people, in alms-giving, in respect to elders, and similar praiseworthy sources of rational gratification. The ninth edict discourses on the sources of true happiness and inculcates the dharma mungalam, or happiness of virtue, which displays itself in benevolence to dependants, reverence to pastors, charity, and so forth, through which alone the blessings of heaven are to be propitiated. The tenth paragraph

comments upon the glory of renown. The fourteenth edict sums up the foregoing. It appears from this edict that the whole was engraved at one time from authentic copy, issued, under the royal mandate, by a pundit whose name, however, cannot be deciphered. As at Dhowlee, the letters are all of uniform size and the lines are perfectly straight, and altogether the Ganjam inscriptions are as carefully and neatly engraved as any of the rock edicts. The first tablet contained the first five edicts, but about one-half has been lost by the peeling away of the rock. The second tablet comprised the next five edicts, namely six to ten, to which was added the fourteenth or closing edict of the other versions. About one-third of this tablet has been lost by the peeling away of the rock. The third tablet contained the two separate or additional edicts which are found at Dhowlee. The following is a translation of the second edict and it may be taken as a specimen of this form of composition:—"In "all the subjugated territories of the king Priyadarshy, the "beloved of the gods, and also in the bordering countries, as "Choda, Paundya, Satyapootra, Keralapootra, and Tambapunny, "it is proclaimed, and Antiochus the Yavana [q.v.] ruler, and "those princes who are near to or allied with that monarch, "universally, are apprised that two designs have been cherished "by Priyadarshy, one design regarding men and one relating "to animals; and whatever herbs are useful to men are useful "to animals, wherever there are none, such have been every-"where caused to be conveyed and planted; and roots and fruits "wherever there are none such have been everywhere conveyed "and planted and on the roads wells have been caused to be "dug and trees have been planted for the respective enjoyment "of animals and men." Tambapunny is the island of Ceylon, the Taprobane of the Greeks. Satyapootra has been identified with the Andhras on the Godavery.

JOWHAR (جوهر - jauhar, *Ar.*). Persian gowhar. A jewel. Mahomedan servant's name [ism].——*Jawauhir* (جواهر - jawáhir, Hind.). Plural of (jauhar, ar. jewel). Jewels [zewar]; accompaniment of khilat [q.v.].——*Jowhary* (جوهری - jauharí, Hind.). Jeweller. Geologists, are known as Jowhary sahibs, it being supposed that their investigations have for object discovery of precious stones [ratnam].

JOWLY (జవిలి - dzavili, *Tel.*; சவுளி - shavuli, *Tam.*). From (chólí, san. cloths). Cloth, piece-goods.

JOYS (جائی - jái, *Malay*). From the portuguese (joia), a jewel. Jewellery of any kind [nagay, zewar].

JUJUBE (زیزفون - zaizufún, *Ar.*). Same as Bair.

JUMMA (جمع - jama, *Hind.*). From (jama, ar. to collect). Amount, total; the whole revenue [beriz] of a village, or estate. ——*Jamaut* (جماعت - jamáat, Hind.). From (jama, ar. to collect). Mahomedan congregation.——*Jaumy* (جامع - jáme, Hind.). From (jama, ar. to collect). Collection.——*Jemadar* (جمعدار - jamadár, Hind.). From (jama, ar. body of persons + dár, pers. holder). A head peon. An officer in the Native army next below a Soobahdar [q.v.], and corresponding to the English lieutenant.——*Jooma* (جمعه - juma, Hind.). From (jama, ar. to congregate). Congregation. Friday, the day on which Mahomedans assemble in the chief mosque [musjid] for prayers [namauz]. The day on which God created the sun [najm], moon [cumr] and stars and set them in motion; on which he collected the materials of which Adam was created; on which Adam was taken into Paradise [bheest]; and which will be the day of resurrection.——*Joomeraut* (جمعرات - jumarát, Hind.). From (above + rát, hind. night). Friday eve or Thursday [shamba]. The vegetable kingdom was created on this day. ——*Joomla* (جمله - jumlah, Hind.). From (jamala, ar. to collect). Total.——*Jummabundy* (جمعبندی - jamabandí, Hind.). From (above + bandí, pers. a settlement). Annual settlement of fluctuating items in ryotwarry [q.v.] land revenue, coupled with a personal investigation into all manner of subjects connected with the land revenue system. See vol. I, 112.——*Jumma curts* (جمع خرچ - jamakharch, Hind.). From (above + kharch, pers. expense). Account current of receipts and disbursements.—— *Jumma kaumil* (جمع کامل - jamakámil, Hind.). From (above + kámil, ar. entire). Standard assessment [kaumil]. Particularly the assessment of the revenue of the Northern circars [q.v.] made about A.D. 1512–1570, or one subsequently made in the reign of Alumgheer, about 1684–1687, for the whole of the Deccan [q.v.].——*Jummamusjid* (جامع مسجد - jámimasjid, Hind.). The principal or congregational mosque [musjid] of prayer [namauz] in a city.——*Jumma vasool bauky* (جمع وصول باقی - jamavasúlbákí, Hind.). From (above + vasúl, ar. collection + bákí, ar. balance). Account of demand, collection and balance [dowle vasool bauky].

JUMMALMADOOGOO (జమ్మలమడుగు - dzammalamadugu,* *Tel.*). From (dzammu, tel. rushes, typha elephantina, roxb. + madugu, tel. pool).——**(1)** Talook, Cuddapah district. Tahsildar's pay Rs. 200. Area 616 square miles. Population 101,296. Language Teloogoo. Occupies N.W. corner of district. Bounded N. and W. respectively by Coilcoontla talook of Kurnool and Tadpatry talook of Anantapore districts, E. and S. by Proddootore and Poolivendla talooks respectively. Two ranges of hills run from east to west through southern division. Bhauncote hills form natural boundary to Poolivendala talook and Yerramala range, starting from near Proddootore reach their highest point at the gorge where the Pennair flows through Gundicote to Jummalmadoogoo. Neither of these ranges much exceed 1,000 feet and are bare of interest and vegetation. The highest point in the Yerramala hills is 1,660 feet above the sea. The whole talook may be included in black cotton soil [regar] district. The soil in the south is red ferruginous to a great extent. The quality varies from excellence in the north and west to mediocrity in the south; but with the exception of Pennair basin, no other system of soil prevails. Agriculture almost entirely dry crops [dry grain]. The open plains of black soil are divided between cholum [q.v.] and cotton [q.v.]. Indigo [q.v.], grain, and oil seeds [yennay] of varieties make up the sum of the crops generally grown, while water is so scarce that rice [q.v.] and raggy [q.v.] are confined to immediate neighbourhood of Pennair and its channels [q.v.]. Cheap turbans [puggry] are made in Jummalmadoogoo and Taulla proddootore and are exported to the Mahratta country. There is a cotton press at Jangaulapully. Thick cotton carpets [jamkhana] are also made and in Jummalmadoogoo there is some trade in dyeing coarse Tadpatry chintzes [q.v.]. The Pennair and Chitrauvaty join near Gandlore, so that the talook is drained by only one stream over the greater portion of its area. The waters of the Pennair are utilised to a slight extent by irrigating channels, but the upward slope of the country from the river banks precludes any great development of river irrigation. The surface water-supply is in many places most deficient, the deepest wells alone retaining water in the dry season. There are thirty tanks [q.v.]. The Cuddapah Kurnool canal runs through the N.E. of the taleok but is little used. The talook has been always liable to drought, and from time to time to inundations. There are camping grounds at Gandlore, Shettivaurpulley, Taulla proddootore and Yaumavaram. Places of archæological interest:—Bondalcoonta, Chinna comerla, Codoor, Condasoonkesoola, Digoova calavataula, Dommara nundiaul, Goondlacoonta, Gorigenore, Gundicote, Jummalmadoogoo, Nullapully, Ooppalore, Pedda comerla, Peddandlore, Penikelapaud, Pottipaud, Timmapooram, Toorp soongamanchipulley, Velpoocherla, Yaumavaram, Yenoomoola chintala. Principal trig. station:—Gundicote. The leading places, &c., in the talook are the following.——*Bhauncote* (భానకోట - bhánakóta, Tel.). See sep. title.——*Bheemagoondam* (భీమగుండము - bhímagundamu, Tel.). From (bhíma, san. shiva + gundamu, tel. a pit). Village; pop. 1,102; acres 2,794; lat. 14° 58′; long. 78° 25′; from Cuddapah N.W. 44 miles; from Jummalmadoogoo N. 8 miles. Four pools in a rock which supply water. Much fever and dysentery.——*Cawderabad* (قادرآباد - kádirábád, Hind.; కాదరాబాద - kádarábáda, Tel.). From (kádir, ar. proper name + ábád, ar. city). Village; pop. 2,724; acres 4,710; lat. 14° 50′; long. 78° 21′; from Cuddapah N.W. 41 miles; from Jummalmadoogoo W.S.W. 5 miles. Turbans woven. Two mosques [musjid], a pagoda [q.v.] and the shrine [durgah] of a Mussalman saint [walee].——*Chintacoonta* (చింతకుంట - chintakunta, Tel.). From (chinta, tel. tamarind tree, tamarindus indica, linn. + kunta, tel. pond). Village; pop. 1,023; acres 5,584; lat. 14° 42′; long. 78° 23′; from Cuddapah W.N.W. 35 miles; from Jummalmadoogoo S.S.W. 11 miles. Once head-quarters of a Deputy collector. It is feverish. Temple of Lingameeshwaran on hill by village and inscription in the village. On the route from Cuddapah to Bellary. Former seat of a poligar [q.v.].——*Chitrauvaty* (చిత్రావతి - chitrávati, Tel.). See sep. title.——*Codoor* (కోడూరు - kóduru, Tel. kódúr *). From (kóde, tel. bull + úru, tel. village). Village; pop. 2,232; acres 9,989; lat. 14° 52′; long. 78° 09′; from Cuddapah W.N.W. 54 miles; from Jummalmadoogoo W. 19 miles. Vishnoo temple with inscriptions.——*Condaupooram* (కొండాపురము - kondápuramu, Tel. kondápuram *). From (konda, tel. a hill + pura, san. town). Shrotriem village, Railway station; pop. 299; acres 920; lat. 14° 47′; long. 78° 14′; height 722 feet; from Cuddapah W.N.W. 46 miles; from Jummalmadoogoo W.S.W. 14 miles. Large bridge across Chitrauvaty.——*Coondair* (కుందేరు - kundéru, Tel.). See sep. title.——*Dhodiyam* (ధోడియము - dhodiyamu, Tel.). From (dhadi, can. border). Village; pop. 2,257; acres 10,339; lat. 14° 56′; long. 78° 16′; from Cuddapah N.W. 50 miles; from Jummalmadoogoo W.N.W. 12 miles. On Yerramalas. Several springs.——*Gandlore* (గండ్లూరు - gandlúru, Tel.). From (gandi, tel. gorge + úru, tel. village). Village; pop. 1,044; acres 6,005; lat. 14° 47′; long. 78° 16′; from Cuddapah W.N.W. 45 miles; from Jummalmadoogoo W.S.W. 12 miles. At junction of Pennair and Chitrauvaty.——*Gundicote* (గండికోట - gandikóta, Tel.). See sep. title.——*Jangaulapully* (జంగాలపల్లె - dzangálapalle, Tel.). From (dzangama, tel. the sect + palle, tel. village). Village; pop. 1,584; acres 3,922; lat. 15° 01′; long. 78° 33′; from Cuddapah N.N.W. 42 miles; from Jummalmadoogoo N.E. 15 miles. Thriving village on Kurnool-Cuddapah canal. Cotton press.——*Jummalmadoogoo* (జమ్మలమడుగు - dzammalamadugu, Tel.). See below.——*Mooddanore* (ముద్దనూరు - muddanúru, Tel. muddanúr *). From (muddana, tel. proper name + úru, tel. village). Village, Railway station; pop. 1,292; acres 4,403; lat. 14° 41′; long. 78° 26′; height 619 feet; from Cuddapah W.N.W. 32 miles; from Jummalmadoogoo S. 12 miles.——

Mungaputnam (మంగపట్నము - mangapatnamu, Tel.). From (manga, tel. prickly plant, randia dumetorum, lamk. + pattana, san. town). Village, Railway station; pop. 2,012; acres 12,767; lat. 14° 43′; long. 78° 18′; from Cuddapah N.W. 40 miles; from Jummalmadoogoo S.W. 12 miles.——*Peddamoodiyam* (పెద్దముడియము - peddamudiyamu, Tel.). From (pedda, tel. large + mudiya, tel. bundle of straw). Village; pop. 1,646; acres 4,943; lat. 15° 01′; long. 78° 30′; from Cuddapah N.W. 44 miles; from Jummalmadoogoo N.N.E. 13 miles. Important cotton centre.——*Peddapasapoola* (పెద్దపసుపుల - peddapasupula, Tel.). From (pedda, tel. large + pasupu, tel. turmeric, curcuma longa, roxb.). Village; pop. 2,436; acres 12,732; lat. 14° 53′; long. 78° 29′; from Cuddapah N.W. 37 miles; from Jummalmadoogoo E.N.E. 5 miles. Formerly seat of a poligar. Taken by the Cuddapah nawaub [q.v.] and given to Jamaulooddeen khan who built a fort and mosque which is inscribed with his name. Pagoda [q.v.] to Vishnoo [q.v.] and yearly car festival.——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Talamunchiputnam* (తలమంచిపట్నము - talamanchipatnamu, Tel.). From (tala, tel. head + manchi, tel. good + pattana, san. town). Village; pop. 1,328; acres 4,402; lat. 14° 56′; long 78° 21′; from Cuddapah N.W. 46 miles; from Jummalmadoogoo N.W. 8 miles. Old fort.——*Yaitore* (యేటూరు - yétúru, Tel.). From (yéru, tel. river + úru, tel. village). Village; pop. 1,466; acres 3,444; lat. 14° 47′; long. 78° 11′; from Cuddapah W.N.W. 49 miles; from Jummalmadoogoo W.S.W. 17 miles. Allotted by Vijianugger dynasty as a jagheer [q.v.] to the Gundicote temple but sequestrated by Meer joomla.——*Yerramala* (ఎర్రమల - yerramala, Tel.). See sep. title.——**(2)** Town, Talook head-quarters; Cuddapah dist., Jummalmadoogoo tal.; pop. 5,866; acres 3,395; lat. 14° 51′; long. 78° 25′; from Cuddapah N.W. 38 miles; from Madanapully N. 90 miles; from Madras N.W. 177 miles; from Sidhout N.W. 47 miles. On Pennair, a few miles east of Gundicote hills. The houses are mostly built of blue limestone [choonam cull]. A few are thatched but most have flat roofs covered with Sowdoo [q.v.]. Adjoining bazaar [q.v.] stands a small fort built to command the river. The Diwaun [q.v.] khana [q.v.], the place of the Cuddapah pataun [q.v.] governors, and the tomb of Syed khan, brother of Haleem khan, Nawaub of Cuddapah, are near. In a tamarind [q.v.] tope [q.v.] N. of town is temple to Narapooreshwaran. Car festival about 22nd May for ten days. Trade centre for indigo [q.v.] and cotton [q.v.]. Local manufacture of cloth. Turbans [puggry] manufactured and exported to Sholapore. S.P.G. mission station.

JUNG (جنگ - jang, *Hind.*). Means war. Hindoo third name [peyar]. Part of Mahomedan lacab; as Moozuffer jung, victorious in war [ism].

JUNGAR (ചങ്ങാടം - channátam, *Mal.*). From (samghat, san. to unite). Jangada [q.v.] in Portuguese. A double platform canoe made by placing a floor of boards across two boats, with a bamboo [q.v.] railing. Used on rivers of Malabar coast [changauda].

JUNGLE (जंगल - jangala, *San.*; جنگل - jangal, *Hind.*; ಕಾಡು - kádu, *Can.*; అడవి - adavi, *Tel.*; കാട - kátu, *Mal.*; காடு - kádu, *Tam.*). Any tract overrun with bushes or trees, or suffered to be overspread with vegetation.——**(1)** Plant first term often joining two genera. Ex., where translation is of second term:—Abutilon indicum (adavibenda), hibiscus esculentus; Alstonia venenatus (káttarali), nerium odorum; Amomum subulatum (adaviélaki), ellettaria cardamomum; Amorphophallus lyratus (adavikanda), typhonium orixense; Amorphophallus sylvaticus (adavicháma), colocasia antiquorum; Artemisia vulgaris (kátttuchettippú), chrysanthemum indicum; Atalantia monophylla (kåttelumiççai), lime tree; Atylosia scarabæoides (káttukkollu), dolichos biflorus, horse-gram; Baliospermum montanum (káttámanakku), ricinus communis, castor-oil plant; Bauhinia purpurea (adaviavishi), sesbania grandiflora; Bauhinia tomentosa (vanasampagegida), michelia champaca; Blumea lacera (janglíkásní), cichorium endiva, (janglímullí), raphanus sativus; Breynia rhamnoides, var. genuina (kádunuggégida), moringa pterygosperma, horse radish; Buchanania latifolia (káttumá), mangifera indica, mango; Cadaba indica (káttagatti), sesbania grandiflora; Canarium commune (janglíbádam), prunus amygdalus; Canavalia ensiformis, var. virosa (adavichamma), canavalia ensiformis; Canna indica (káttuvázha), musa paradisiaca, plantain; Cassia absus (káttukkol), dolichos biflorus, horse-gram; Casuarina equisetifolia (janglíjháú), tamarix gallica, (janglísaro), cupressus sempervirens; Cerbera odollum (káttarali), nerium odórum, (káttumá), mangifera indica; Chloris barbata (adavigódhuma), triticum vulgare, wheat; Cinnamomum iners (kádulavanga), cloves, eugenia caryophyllata; Citrullus colocynthis (káttuvellari), cucumis sativus; Cleome viscosa (káttukkadugu), brassica juncea, mustard; Clerodendron inerme (vanajai), jasminum auriculatum; Coix barbata (adavigódhuma), triticum vulgare, wheat; Corchorus olitorius (káttuttutti), abutilon indicum; Croton oblongifolius (káttupatólam), trichosanthes anguina; Cryptolepis buchanania (káttupálvalli), chonemorpha malabarica; Curcuma zedoaria (vanárishtá), melia azadirachta; Cycas circinalis (janglímadanmastkájhár), artabotrys odoratissimus; Dillenia indica (kádkanyila), nerium odorum; Dracontium polyphyllum (adavikanda), typhonium orixense, (janglíkandá), colocasia esculenta; Erythroxylon monogynum (adavigóranta), lawsonia alba, nail-dye plant; Fumaria parviflora (kádusabbasige), peucedanum graveolens; Glycine javanica (káduavare), dolichos lablab; Guizotia abyssinica (adavinuvvu), sesamum indicum; Gynandropsis pentaphylla (káttukkatuku), brassica juncea, mustard; Hardwickia binata (káttudugu), acacia pennata; Helmia bulbifera (káttuvalli), dioscorea; Hibiscus abelmoschus (káttupparutti), gossypium herbaceum, cotton; Holigarna longifolia (káttuchér), semecarpus anacardium; Homonoya riparia (káttalari), nerium odorum; Hydnocarpus venenata (janglíbádam), prunus amygdalus; Hymenodictyon excelsum (janglíanár), punica granatum; Jatropha curcas (adaviámuda), ricinus communis; Jatropha multifida (kátttunérválam), croton tiglium; Jussiæa suffruticosa (káttukarayámpú), eugenia caryophyllata; Laggera aurita (adavimullangi), raphanus sativus; Lantana indica (kádujóla), sorghum vulgare, great millet; Lebidieropsis orbicularis, var. collina (kádagargarigida), wedelia calendulacea; Leersia hexandra (janglídál), cajanus indicus; Lepidagathis scariosa (káttuççilandi), ochna squarrosa; Limonia bilocularis (káttelumiççai), lime, citrus; Lippia nodiflora (káttutippali), piper longum; Lobelia nicotianæfolia (adavipogáku), nicotiana tabacum, tobacco; Malva rotundifolia (káttukkadalai), cicer arietinum, bengal gram; Manihot utilissima (kádugenasu), dioscorea aculeata; Melanthesa rhamnoides (káttunírúri), phyllanthus niruri, var. genuinus; Methonica superba (adavinábhi), aconitum ferox; Millingtonia hortensis (káttumalli), jasminum sambac; Mucuna pruriens (kádavare), dolichos lablab; Nasturtium palustre (kádusásive), brassica juncea, mustard; Nauclea purpurea (káttuchakka), artocarpus integrifolia, jack tree; Ormocarpum sennoides (adavimunaga), moringa pterygosperma; Osbeckia aspera (káttukadali), melastoma malabathricum, (káttukkakadalai), cicer arietinum; Panicum crusgalli (kádudabbehullu), eragrostis cynosuroides; Pedalium murex (káttunereññil), tribulus terrestris; Pithecolobium bigeminum (káttukkonna), cassia fistula; Plumeria acutifolia (adaviganněru), nerium odorum, (kádusampige), michelia champaca; Plumeria alba (adaviganněru), nerium odorum, sweet-scented oleander; Randia dumetorum (káttunáranna), citrus aurantium; Rhizophora mucronata (adaviponna), calophyllum inophyllum; Rhynchosia rufescens (kádutogari), cajanus indicus; Salvia plebeia (káttukañjángórai), ocimum basilicum; Sanseviera lanuginosa (káttukappalkizhannu), ipomæa batatas; Sesselia indicum (vanayamání), carum copticum; Sida rhombifolia, var. retusa (janglímethí), trigonella fœnum-græcum; Sonchus oleraceus (káttumullangi), raphanus sativus, radish; Spondias mangifera (janglíám), mangifera indica; Sponia wightii (kádubajagida), acorus calamus; Sterculia fœtida (janglíbádam), prunus amygdalus; Tabernæmontana dichotoma (káttalari), nerium odorum; Tephrosia purpurea (janglíkulthí), dolichos biflorus; Terminalia belerica (káttiluppai), bassia longifolia; Terminalia catappa (janglíbádam), prunus amygdalus; Terminalia chebula (janglíbádam), prunus amygdalus; Terminalia tomentosa (janglíkaranj), pongamia glabra; Thespesia lampas (adavipatti), gossypium herbaceum, cotton; Toddalia aculeata (kádumenasu), piper nigrum; Trewia nudiflora (kátkumbala), cucurbita maxima; Tribulus terrestris (vanashringáta), trapa bispinosa; Urena lobata (vanabhéndá), hibiscus esculentus; Urena sinuata (janglíkapás), gossypium herbaceum; Urginia indica (janglípiyáz), allium cepa; Vernonia anthelmintica (adavijílakarra), cuminum cyminum. See gloss. paragraphs.——**(2)** *Jangaly* (ജാംഗലി - jángali, Mal.). Means jungle-dweller. A snake catcher. He professes to cure snake bites [jungle].——*Jungle carp* (वज्रकीट - vajrakíta, San.; कालेमांजर - kálémáñjara, Mahr.; بجرکیت - bajrkít, Hind.; پانگولنگ - pángguling, Malay; ಅಲಂಕು - alanku, Can.; ఆలువ - áluva, Tel.; ଗଣ୍ଡ - gonda, Oor.; അലങ്ക - alanku, Mal.; කබල්ලෑවා - kaballává, Singh.; அழுங்கு - azhungu, Tam.). Title on account of its arched back in walking. San. from (vajra, san. diamond + kíta, san. reptile); from the dorsal scales. Mahr. from (kála, mahr. black + máñjara, mahr. cat). Hind. from sanscrit. Malay from (guling, malay, to roll); as it rolls itself up in self-defence. Can. from (alanku, can. timid). Tam. means to become dim, from its nocturnal habits. San. also (ghuna), meaning one moving to and fro. Hind. also (banrohú), meaning forest dweller. Title otherwise Indian scaly ant-eater, Pangolin from malay. Manis pentadactyla, manididæ, edentata, mammalia [sastanam, 28], of naturalists [jantoo]. Alias Manis brachyura, laticauda, macroura; Philidotus indicus. Tail shorter than the body, very broad at the base, with sixteen or seventeen scales in each longitudinal line; sixteen scales on the dorsal series in ten or eleven rows; middle nail of the fore feet much stronger than the others. Scales thick, striated at the base, pale yellowish brown or horny clay color; the lower side of the head, body and feet nude, brownish white; nose fleshy; soles of the hind feet blackish; auricles indistinct. The tongue is 12 inches long, flattish or sub-cylindric, extensile, generally covered with a slightly viscid saliva. Most common in hilly districts, but nowhere abundant. It is strictly nocturnal and feeds almost exclusively on white-ants [q.v.]. Its gait in walking is very peculiar, the back arched, the fore feet with their anterior surface bent over and brought into contact with the ground, on which it progresses very slowly. It burrows in the ground in a slanting direction to a depth

of from 8 to 12 feet from the surface, at the end of which is a large chamber, about 6 feet in circumference, in which a pair live, and where they may be found with one or two young ones about the months of January, February, and March. The jungle-carp closes up the entrance of the burrow with earth when in it, so that it would be difficult to find it but for the peculiar track it leaves. Indian species not here found are:—Aurita or eared pangolin, Javanica or javan ant-eater.——*Jungle cat* (अरण्यमार्जार - aranyamárjára, San.; मोटळाबनमांजर - mótalábanamáñjara, Mahr.; گربه کوهی - gurbahikohí, Pers.; جنگلی بلی - janglíbillí, Hind.; ಮಂಟಬೆಕ್ಕು - mantabekku, Can.; జంగుపిల్లి - jangupilli, Tel.; ଭୁବ - bhuva, Oor.; ചെറുപുലി - cherupuli, Mal.; காட்டுப்பூனை - káttuppúnai, Tam.). Title from frequenting jungles. San. from (aranya, san. wild + márjára, san. cat). Mahr. from (móta, mahr. large + vana, san. forest + máñjara, mahr. cat). Pers. from (gurbah, pers. cat + koh, pers. mountain). Hind. from (janglí, hind. wild + billí, hind. cat). Tel. from (janglí, hind. forest + pilli, tel. cat). Mal. from (cheru, mal. small + puli, mal. tiger). Tam. from (kádu, tam. forest + púnai, tam. cat). Can. also (kádubekku), meaning forest + cat; (vellabekku), meaning white + cat. Tel. also (bávuripilli), meaning mewing + cat. Mal. also (kátanpúçça), meaning wild cat. Common wild cat. Felis [marjauram] chaus, felidæ [deeptaucsham], digitigrada, carnivora, mammalia [sastanam, 9], of naturalists [jantoo]. Alias Chaus lybicus; Felis affinis, catalynæ, erythrotis, jacquemontii, kutas. Yellowish gray, more or less dark and unspotted, approaching to rufous on the sides of the neck and abdomen, where it unites with the white lower parts; a dark stripe from the eyes to the muzzle; ears slightly tufted, rufous black externally, white internally; limbs with two or three dark stripes internally, occasionally faintly marked externally also; tail short, more or less annulated with black, most conspicuously in the young. Frequents alike jungles and the open country and is very partial to long grass and reeds, sugar-cane [q.v.] fields, corn-fields, &c. Larger somewhat than the domestic cat [poonay]; will interbreed with it. Indian species not here found are:—Manul or black-chested wild cat, Ornata or desert cat.——*Jungle fowl* (جنگلی مرغ - janglímurgh, Hind.). See sep. title.——*Jungle hare* (கானமுசல் - kánámusal, Tam.). Title from similar motion. See under Battan.——*Jungle parrot* (جنگلی توتا - janglítotá, Hind. and Dec.; ಕಾಡುಗಿಣಿ - kádugini, Can.; అడవిచిలుక - adavichiluka, Tel.). Title from resort and its red bill. Vernacular means same. Tel. also (puttachiluka), meaning ant-hill + parrot; from frequenting white-ant's nests. Title otherwise Southern sirkeer. Taccocua leschenaultii, centropodinæ, cuculidæ [cokam], scansores, insessores [pacshy, 15], of naturalists [jantoo]. Alias Zandostomus sirkeer. Above pale earthy brown; head ashy; throat whitish; fore neck and breast ashy, tinged with ferruginous; belly dark ferruginous; feathers of the head, neck and breast, with the shafts, black, and bill cherry-red, yellowish at the tip; feet plumbeous; irides reddish brown; length 15 to 15½ inches; frequently seen about white-ants' [q.v.] nests. No other common species here.——*Jungle sheep* (न्यङ्कु - nyanku, San.; भेंकर - bhémkara, Mahr.; جنگلی بکرا - janglíbakrá, Hind.; کیجنگ - kijang, Malay; ಕಾಡುಕುರಿ - kádukuri, Can.; కూకగొర్రె - kúkagorre, Tel.; കാട്ടുമാൻ - katumán, Mal.; காட்டாடு - káttádu, Tam.). Title from its gait. San. from (nyañch, san. to bend down); from its stooping. Hind. from (janglí, hind. wild + bakrá, hind. sheep). Can. from (kádu, can. forest + kuri, tam. sheep). Tel. from (kúka, tel. noise + gorre, tel. sheep), from its bark. Mal. from (katu, mal. fierce + mán, mal. deer). Tam. from (kádu, tam. forest + ádu, tam. sheep). Hind. also (kákur). Malay also (mantják). Tel. also (kondaméka), meaning mountain + goat. Title otherwise Baikree in bombay, Barking-deer in bengal, Muntjack in java, Red hog deer in ceylon, Rib-faced deer. Cervulus muntjac, cervidæ [mrigam], ruminantia, mammalia [sastanam, 24], of naturalists [jantoo]. Alias Cervus aureus, tamulicus, vaginalis. Color a bright rufous bay; limbs internally, pubic region, and tail beneath, white; chin and lower jaw, whitish; some white spots in front of the fetlocks of all four legs; facial creases dark brown. Average length of male 3½ feet; tail 7; height 26 to 28 inches; horn 8 to 10 inches. The doe is a little smaller, and has bristly black tufts of hair on a knob in the spot where the horns of the buck are. Its tongue is very long and extensile, and it often licks its whole face with it. Abundant in hilly countries, and a forest animal, only coming to the skirts of the woods morning and evening to graze. It is a solitary animal. It carries its head and neck low, and as its hind quarters are high, its action in running is peculiar, somewhat resembling the pace of a sheep [aud], hence its name in Southern india. It is excellent venison, but rarely carries any fat. Its call, which is a kind of short bark, like that of a fox [lomree] but louder, may be heard in the jungles by day and night.

JUNGLE-FOWL (रज्जुवाल - rajjuvála, *San.*). San. from (rajju, san. rope + vála, san. tail). The sub-family Gallinæ, phasianidæ [jeevanjeevam], rasores, aves [pacshy, 32], of naturalists [jantoo]. The species best known are shown below. ——*Grey jungle-fowl* (جنگلی مرغ - janglímurgh, Hind. and Dec.; ಕಾಡುಕೋಳಿ - kádukóli, Can.; అడవికోడి - adavikódi, Tel.; കാട്ടുകോഴി - káttukózhi, Mal.; காட்டுக்கோழி - káttukkózhi, Tam.). Title from color of head and neck. Hind. from (janglí, hind. wild + murgh, hind. fowl). Can. from (kádu, can. forest + kóli, can. fowl) [indian woodcock]. Tel. from (adavi, tel. jungle + kódi, tel. fowl). Mal. from tamul. Tam. from (kádu, tam. forest + kózhi, tam. fowl). Can. also (kukkuta); (pugulakki), meaning note of a cuckoo + bird. Tam. also (shambangózhi), meaning shamboo sedge, typha angustifolia, linn. + fowl, from feeding on its seeds. Gallus sonneratii, gallinæ [jungle-fowl], phasianidæ [jeevanjeevam], rasores [pacshy, 32], of naturalists. Alias Phasianus gallus. Whole head and neck, with hackles, blackish grey, yellow spots, each feather blackish, with shaft white and two spots, terminal one somewhat square form, as if a drop of yellow sealing-wax [lac]; the other whitish, passing on wing-coverts into oblong spots of glistening wood-brown; ear-coverts pale rufous; rest of plumage above and below blackish grey, feathers white shafted, those on flanks broadly centered and tipped with wood-brown; outermost primaries dusky, with shaft and narrow edge pale; others black, faintly glossed; upper tail-coverts glossy purple; central tail-feathers glossy green, gloss diminishing on lateral feathers; vent dirty brownish; under tail-coverts glossy black, with white shafts. Bill yellowish horny; comb, face and wattles red; irides orange brown; legs and feet horny yellowish. Length 24 inches and upwards. Hen mottled brown above, pale shafts on wing-coverts; beneath blackish brown, feathers broadly centered, pure white passing into plain dull brown on flanks, thigh-coverts, vent, and under tail-coverts; head and neck rufous brown, paler on chin, and throat somewhat yellowish; primaries dark brown, secondaries mottled brown; tail blackish brown, edged mottled brown. Length about 17 inches. Found in S. india only, extending on east coast to a little north of the Godavery, and on west coast to Rajpipla hills, where it meets the Red jungle-fowl [q.v.]. Very abundant on Malabar coast, especially in more elevated districts; constantly brought for sale to Madras market. Particularly partial to bamboo [q.v.] jungles. Call of cock a broken and imperfect kind of crow, quite unlike that of the Red jungle-cock. The principal source of the domestic fowl [moorghy].——*Painted spur-fowl* (ನವಿಲುಬಣ್ಣದಹಕ್ಕಿ - navilubannadahakki, Can.; జిట్టకోడి - jittakódi, Tel.). Title from appearance. Can. from (navilu, can. peacock + banna, can. color + hakki, can. bird). Tel. from (jitta, tel. small + kódi, tel. fowl). Galloperdix lunulosus, gallinæ [jungle-fowl], phasianidæ [jeevanjeevam], rasores [pacshy, 32], of naturalists. Alias Francolinus nivosus. Male, head, face and neck variegated black and white, feathers black with white streaks and triangular spots, head mostly black; upper plumage and wings rich chestnut, with white spots on back, sides of neck, shoulders and wing-coverts; primaries earthy brown; tail dark sepia brown, glossed green in old birds; beneath throat and neck, variegated black and white, changing on breast to ochreous buff, with small triangular black marks, which disappear on abdomen; flanks, thigh-coverts and under tail-coverts dull chestnut. Bill blackish; orbits red; irides red brown; legs horny brown. Length 13 inches. Female has top of head dusky, with forehead, over eye, and nape tinged with chestnut; pale ruff and moustachial line; rest of plumage dull olive brown, changing to ochreous-olive on breast and abdomen. Length 12½ inches. Male has generally two spurs on each leg, occasionally three, hen bird has almost always one, frequently two. Not found on Malabar coast; common along Eastern ghauts [q.v.]; partial to rocky jungles and tangled coverts. Very difficult to flush, short and rapid flight; males have a cackling call like fowls [moorghy].——*Red jungle-fowl* (بن مرغ - banmurgh, Hind.; جنگلی مرغ - janglímurgh, Dec.; అడవికోడి - adavikódi, Tel.; ବଣକୁକୁଡ଼ା - bonokukkuda, Oor.). Title from color of body. Hind. from (ban, hind. forest + murgh, hind. fowl). Dec. from (janglí, hind. wild + murgh, hind. fowl). Oor. means jungle-fowl. Male bird is:—Tel. (geragogor). Tel. also (kuru), from ghond; female bird. Gallus ferrugineus, Gallinæ [jungle-fowl], phasianidæ [jeevanjeevam], rasores [pacshy, 32], of naturalists. Alias Gallus bankiva. Male, colors as in typical Barn-door fowl, viz., rich golden hackles on head, neck, throat and breast, paler on sides of neck and posteriorly; ear-coverts white; back purplish brown in middle, rich orange brown on sides; upper tail-coverts lengthened, also bright orange; wings with lesser and greater coverts black, glossed green; median-coverts rich dull maroon; primaries dusky with pale edges; secondaries chestnut externally, dusky within; tertiaries glossy black; tail with central feathers rich glossy green-black, gloss diminishing on lateral feathers; beneath, from breast, unglossed black; thigh-coverts the same. Bill slaty brown; irides orange red; face, comb and wattles red; legs slaty black. Length about 26 inches; the jungle hen has general color yellowish brown, minutely mottled with dark brown; some feathers, especially of upper back and wing-coverts having conspicuously pale shafts; head dusky above, passing into short hackles of dark brown, edged bright yellow on neck and sides of breast; quills and tail dark brown; central rectrices edged mottled brown; ear-coverts yellowish; line down throat deep bright red-brown ending in point below, and passing up in a line behind the ears to join small supercilium of same hue; breast pale rufous brown, with central pale streaks, lighter on middle of belly and becoming dull brown on flanks,

vent, thigh-coverts, and under tail-coverts; wants the comb and wattles, and has only a small nude red space. Length 16 or 17 inches; tail 7. Partial to bamboo jungle [q.v.], and lofty forests; crow morning and evening, all the year round, but especially at the pairing season, is like that of Bantam cock, but shorter, and never prolonged as in domestic cocks; after breeding season neck hackles of male sometimes fall off, replaced by short blackish grey feathers.——*Red spur-fowl* (چھوٹا جنگلی مرغ - chhotájanglímurgh, Hind. and Dec.; ఎఱ్ఱకోడి - errakódi, Tel.; ବଣକୁକୁଡ଼ା - bonokukkuda, Oor.; சிறகுக்கோழி - shiraguk-kózhi, Tam.). Title from color and spurs. Hind. from (chhotá, hind. small + janglí, hind. wild + murgh, hind. fowl). Tel. from (erra, tel. red + kódi, tel. fowl). Oor. means wild fowl. Tam. from (shiragu, tam. wing + kózhi, tam. fowl); from flight. Tel. also (errajittakódi), meaning red + small + fowl. Galloperdix spadiceus, gallinæ [jungle-fowl], phasianidæ [jeevanjeevam], rasores [pacshy, 32], of naturalists. Alias Polyplectron narthiæ. Male, head and nape dusky olive-brown; forehead and round eye pale whity brown, somewhat buff in some; chin, throat and sides of neck pale brown; rest of body, both above and below, rich brown-chestnut or bay; each feather pale edged; primaries brown; secondaries and tertiaries minutely mottled; tail with central feathers chestnut, others dark-brown, more or less mottled, disappearing with age; lower abdomen, vent and under tail-coverts olivaceous. Bill dusky-horny; orbits red; irides orange brown; legs and feet vermillion red. Length 14 to 14½ inches. Female has crown dusky blackish, neck olive brown, rest of upper plumage pale rufous-brown, each feather with two or three blackish bands, minutely speckled, tip pale; rump and upper tail-coverts minutely freckled; tail mostly blackish, with mottled rufous bars, tending to become obsolete; primaries, coverts and winglet spotless dusky brown; throat albescent; neck olive brown, the feathers becoming rufous in centre, and tipped black; breast and flanks bright ferruginous, with narrow black tips; belly dusky brown; under tail-coverts freckled rufous brown. Length 13 inches. Male bird has usually two spurs on each tarsus, sometimes three on one, occasionally two on one leg and one on another, often long and sharp; hen bird has usually one on each leg, sometimes absent on one leg; occasionally two on one leg and one on the other. Common. Most abundant in Malabar jungles, difficult to obtain without dogs [nye], as it runs before the sportsmen or beaters. Runs with its tail raised.

JUNKAMEER (ചുങ്കക്കാരൻ - chunkakkáran, *Mal.*) [choongam]. From (chunkam, mal. custom + káran, mal. personal suffix). Old Anglo-Indian for a collector of customs [sayer].

JUTE (कालशाक - kálasháka, *San.*; پٹ - patt, *Hind.*; ಸಣಬು - sanabu, *Can.*; జనుము - dzanumu, *Tel.*; பிண்ணாக்குச்செடி - pinnákkuççedi, *Tam.*). Title from (jhóto, ooriya), from sanscrit (jhat), meaning to be tangled. San. from (kála, san. black + sháka, san. herb). Hind. from sanscrit. Tam. from (pinnákku, tam. oil-cake + shedi, tam. plant); from being cooked with sesamum oil cakes. San. also (patta), meaning cloth, perhaps from sackcloth made of fibre. Hind. also (títápát), meaning bitter leaf. Tel. also (gánugapindikúra), meaning oil-cake + greens; (chittontakúra), meaning small + cooking + greens. Greek κόρχορος. Title otherwise Capsular corchorus, Gunny-bag plant, Heart-leaved corchorus, Jews' mallows, Pat fibre. Botanically Corchorus capsularis, linn., tiliaceæ [vricsham, 27]. Slender-stemmed annual, 5–10 feet; calyx deeply five-cleft; petals five; leaves alternate, oblong-acuminate, serrated, two lower serratures terminating in narrow filaments; peduncles short; flowers whitish-yellow in clusters opposite the leaves; capsules globose, truncated, wrinkled and muricated, five-celled; seeds few in each cell, without transverse partitions; in addition to the five-partite cells there are other five alternating, smaller and empty; native of india; flowering in rainy season. Extensively cultivated for the sake of its fibres [naur]; these are soft and silky, and may be used as a substitute for flax [alsee]; are very perishable. Crop takes four or five months to mature; fit for harvesting as soon as flowers appear; fibre of plants in fruit is stronger, though coarse; the plants are cut, bundled, and stacked for two or three days, though this process discolors the fibre; the bundles are then submerged either in rivers, or, as is usually done, in tanks or roadside pools, with sods placed on their tops; the period of maceration lasts from two to twenty-five days, during which time, the bundles are carefully watched, so that they may not become rotten, and thus useless for commercial purposes; the fibre is then separated from the stalks, cleaned, and dried; great care is observed in watching the immersed jute until it almost putrefies, to preserve its silky character. The reeds or dried stems after the bark has been removed are used for a variety of purposes; they are straight, brittle, and readily combustible; largely consumed in the preparation of the charcoal [adoopp kary] used for gunpowder and in the manufacture of fireworks [baunam]; used as tinder in the preparation of native matches; one of the most useful purposes to which the jute cane is put is the burning or charring of the hulls of native boats to destroy or expel the insects which may have commenced their depredations upon the timber; tied in bundles, they are also used for torch-light [masaul, pandam] processions; europeans use them as pea-stakes.——*Wild jute* (नाडीक - nádíka, San.; పెరింటకూర - périntakúra, Tel.; ନାଳିତା - nálitá, Oor.; பெராட்டிக்கீரை - perattikkírai, Tam.). San. from (nála, san. tube). Oor. from sanscrit. San. also (patta), meaning cloth. Tel. also (parinta). Tam. also (pinnákkuççedi), meaning oil cake + plant; (káttuttutti), meaning forest + mallow, abutilon indicum, g. don.; (perumbunnákkukkírai), meaning big + the plant; (kónip-pattai), meaning gunny bark. Title otherwise Bristly-leaved jews' mallow. Botanically Corchorus olitorius, linn., tiliaceæ [vricsham, 27]. Alias Corchorus decemangularis. Annual, 5–6 feet, erect; leaves alternate, ovate-acuminated, serrated, the two lower serratures terminated by a slender filament; peduncles one to two-flowered; calyx five-sepalled; petals five; capsules nearly cylindrical, ten-ribbed, five-celled, five-valved; seeds numerous, with nearly perfect transverse septa; flowers small, yellow; flowering in the rainy season. Fresh or dry herb, after being toasted and reduced to ashes, mixed with honey [shahad], given in obstructions of the viscera; leaves used in infusion as a domestic medicine, being tonic and slightly febrifuge, and hence used as a fever drink. Leaves and tender shoots eaten [keeray]. Fibres, like those of capsularis [jute], substituted for flax [alsee]; makes cloth, gunny [q.v.] bags, and rope.

JUTKAH (جھٹکا - jhatká, *Hind.*). Means quick. The native conveyance of mofussil [q.v.] towns in this presidency; it consists of a box with venetian windows, on two wheels, and drawn by a pony [shigram, tattoo].

JWARAM (ज्वर - jvara, *San.*; சுரம் - shuram, *Tam.*). From (jvar, san. to be hot). Fever [veidyan]. There are seven different classses of fevers according to natives:—Ajeerna-jwaram, from indigestion; Astijwaram, of the bones; Bhoota-jwaram, caused by evil spirits; Dinajwaram, daily fever or quotidian; Pittajwaram, that proceeds from pittam [q.v.]; Sheetajwaram, that proceeds from sheetam [q.v.]; Vautajwaram, that proceeds from vautam [q.v.].——*Jwara hary* (ज्वरहरि - jvarahari, San.). From (above + hri, san. to take away). Febrifuge.

JYAH (ज्या - jyá, *San.*). From (jyá, san. to overpower). Bow string. Sine or chord [chaupam, jeevay]. For Cramajyay and Paramaupama cramajyay see Cramam.——*Jyah pindam* (ज्यापिण्ड - jyápinda, San.). The sines of the twenty-four Pindams of 3° 45′ each into which the quadrant [paudam] is divided.——*Jyeshta* (ज्यष्ठे - jyésht'ha, San.). From (jyá, san. to become old). Eldest. Greatest. y in the algebraic form $ax^2 + b = y^2$.——*Jyeshtaumsham* (ज्येष्ठांश - jyesht'hámsha, San.). From (above + amsha, san. part). Primogeniture.——*Jyeshtay* (ज्येष्ठा - jyésht'há, San.; சேட்டை - shéttai, Tam.). Elder sister, otherwise Moodevy [q.v.]; younger sister being Lutchmy [q.v.].

JYOTY (ज्योतिस् - jyótis, *San.*; சோதி - shóthi, *Tam.*). From (jyut, san. to shine). Splendour. Luminary or star. Epithet of Shiva. Light, one of the five gross elements [bhootam]; the other four being, aucausham or ether, vayoo or air, aupas or water, pritivy or earth.——*Joshy* (ज्योतिषी - jyótishí, San.; जोशी - jóshí, Mahr.; జోసి - jósi, Tel.; சோதிடன் - shóthidan, Tam.). An astronomer, astrologer [jyotisham]. Often a village servant remunerated by inam [q.v.] land. Bramin by caste, and duties are to prepare the calendar [punchaungam], caste nativities [jautacam], and announce the time propitious for any act. He is also the Hindoo artist and paints the idols [vigraham] and pictures of the gods.——*Joty canama* (జోతికనమ - jótikanama, Tel.). From (jyóti, san. brightness + kanama, tel. ravine). Pass; Kurnool district, Nundicotcore talook. In Nullamullays [ghaut].——*Jyotisham* (ज्योतिष - jyótisha, San.). Astronomy.—"*a*" This was title of sixth and last Vedaungam [q.v.], object being to fix the most auspicious days for commencing sacrifices [yaugam]. Among the ancient astronomical ideas there shown are the measure of a day by thirty moohoortams [q.v.] or hours of forty-eight minutes, division of zodiac [raushy chuckram] into twenty-seven parts or lunar asterisms [nacshatram], the first of which is kritticay [q.v.], and a location of the solstitial points [ayanam] differing widely from present. Compare Maunam for some ancient views about the sidereal and solar years. Also Mausam regarding the history of the months. Also Nacshatram for the general theories of sidereal astronomy. The solar signs of the zodiac and much of the later astronomy, with many astronomical terms, such as horah = ὥρα, caindram = κέντρον, dricaunam or the third of a zodiacal sign = δέκανος, liptah or the minute of a degree = λεπτός; were borrowed from the Greeks.—"*b*" The earliest Hindoo astronomer whose name has come down is Aryabhatta [q.v.], who lived about fifth century of the Christian era. He is the author of three works, Arya bhatteeyam, Dasha geeticay, and Aryaushta shatam. He asserted a diurnal revolution [bhaganam] of the earth [bhoomy] on its axis, knew the true theory of the causes of lunar and solar eclipses [grahanam], and noticed the motion of the solstitial and equinoctial points [ayanam]. After Aryabhatta came Varauha mihiran [q.v.] who lived about sixth century of christian era and was born at Oojjein. He wrote a work on nativities called Brihad jautacam, an astrological work called Brihat sambitay, and a summary of the five original siddhauntams [q.v.] called Puncha siddhaunticay. After Aryabhatta and Varauha mihiran

lived Bramha gooptan, towards the end of the sixth century, who wrote the Bramha siddhauntam, containing chapters on arithmetic and algebra [ganitam]. Fourth and last of celebrated astronomers and mathematicians came Bhascaracharry [q.v.], who lived in the twelfth century and composed the Siddhaunta shiromany, containing treatises on algebra and arithmetic.—"*c*" The following are the elements of the old astronomy proper:—Shunk; the gnomon. Chauyay; its shadow. Palabhay or vishama chauyay; the shadow of the gnomon at midday, when the sun is in the equinoctial points. Vishama carnam; the hypothenuse of a right-angled triangle formed by the shunk and the two sides of its shadow under the preceding circumstances. Madhyama chauyay; the midday shadow at any other time of the year. Sama mundala chauyay; the shadow when the sun is east or west of the gnomon. Craunty mundalam; the ecliptic. Craunty bhaugam; the declination of a point of the ecliptic. Naudy mundalam; the equator. Sauyanam; celestial longitude considered in the same manner as that of the europeans, with reference to the pole of the ecliptic. Vicshaipam; celestial latitude. Swadesha paridhy; a circle of longitude in any given latitude. Agram; the amplitude. Nataumsham or nata bhaugam; zenith distance. Cshitijam; the horizon. Lagnam; the arc of the equator which passes over the meridian in the same time with each sign of the ecliptic; answering to right ascension. Madhyama lagnam; mean ditto; that of lunka [q.v.], the same arc which rises above the horizon with each sign of the ecliptic. Oollagnam; the lagnam of any particular place, being the arc of the equator which rises above the horizon of that place in the same time that each sign of the ecliptic rises. Dinaurdham; half the day. Rautryardham; half the night. Jyah; when connected with the name of any element means its sine. Paramaupama cramajyay; the sine of the greatest declination of a planet; as the hindoos take the obliquity of the ecliptic to be constantly 24°, the above term when referred to the sun means the sine of the obliquity.—"*d*" The following extract from Varauha mihiran's Brihat-samhitay summarizes the functions of an astronomer-astrologer of his time. "The Jyotishacan is one who is versed in "Samhitay [q.v.] or Astronomy and Horoscopy. He must be "of noble birth and of agreeable appearance; meek, truthful "and without jealousy; of proportional limbs; of joints well "built and of good growth; have no physical defects; be of fine "hands, feet, nails, eyes, chin, teeth, ears, forehead, eye-brows "and head; of fine physique and of high, sonorous voice; "generally speaking do not virtues and vices follow the body? "The virtues:—He must be of cleanly habits, able, noble-minded, "eloquent and of originality and imagination; must possess "a knowledge of place and time; be meek and without nervous-"ness; must be difficult of conquest by his fellow students; must "be able and devoid of vices; must be learned in matters of "expiatory ceremonies [prauyaschittam], of hygiene, of occult "magic and of ablutions; must be a worshipper of the devas "and an observer of fast and penance [oopavausam, vratam]; "must be of remarkable genius and capable of solving any diffi-"culties save in matters of direct divine interference; and "finally he must be learned in astronomy, natural astrology and "horoscopy. In Astronomy:—He must have studied the "works of poolishan, romacan, vasishtan, sooryan and pitau-"mahan; he must have a correct knowledge of a yoog [q.v.], "varsham [q.v.], ayanam [q.v.], ritoo [q.v.], mausam [q.v.], "pacsham [q.v.], ahorautram [q.v.], yaumam [q.v.], moohoortam "[q.v.], naudy, vinaudy [q.v.], praunam [q.v.], trooty [q.v.] and "parts of a trooty and other divisions of time [caulam] and also "of divisions of space; he must have a clear knowledge of the "causes of solar, sauvanam [q.v.], sidereal and lunar months "as well as of intercalary lunations [maunam, mausam] and "intercalary [adhicam] days [dinam, tity]; he must have a "knowledge of the beginning and end of shashtyaubdam, yoog, "varsham, mausam, dinam [q.v.] and horah [q.v.] and of their "lords; he must know the solar and other divisions of time "[caulam], their similarity and dissimilarity and must be capable "of propounding the fitness or unfitness of each for particular "purposes; these divisions of time are, of men, of devas, of "jupiter, of pitries, of star, of the sun, of the moon, of the "earth and of bramha; if the methods of calculation given in "the five astronomical works mentioned above should produce "different results he must be able to calculate correctly the "places of the sun [sooryan] and planets [graham] by actual "observation, by means of shadow and water level and with the "help of astronomical instruments, of the termination of their "ayanam or northward and southward course, of their being due "east to the observer after rising and of their altitude [avana-"taumsham] at any time; he must know the reason for the "correction required for the conversion of the heliocentric into "geocentric longitude and vice versâ; the causes of the ayanam "of the sun and planets and of their slow and rapid movements "at different times; in solar and lunar eclipses [grahanam], he "must be able to calculate the times of the commencement and "end of the eclipses, the places of first and last contact, the "magnitude and duration of the eclipse; in total eclipses, he "must be able to calculate the time between middle eclipse and "the beginning or end of total phase or vimardam; he must "also know the color of the eclipsed lunar disc; he must be able "to calculate beforehand the times of the moon's conjunction "with the planets as well as of planetary conjunctions; he "must know the length, in yojanams [q.v.], of the daily motion "of each planet in its orbit [cacsham] and of the orbit itself, "and generally the length, in yojanam, in every case; he "must know the earth's revolution [bhaganam] round the sun "and its rotation round its axis, its shape, size and the like, the "latitude [acsham] of a place and its complement, the nature "of the hour circle, the chaura dala calam, the times of the "rising of the zodiacal signs [raushy]; he must also be able to "calculate time from shadow [chauyay] and shadow from time "and to convert longitude into right ascension and right ascension "[lagnam] into longitude [dhroovacam, sauyanam]; he must "be able to meet objections and questions in clear and distinct "language and must be capable of explaining the science in "its purity in just the same way as separating the pure gold "from dross and making it capable of retaining its value "when submitted to the touch stone, to the fire and to the "hammer; how can one, who is incapable of entrapping others "with a hard question or of answering any that is put to "himself or of explaining his views to his students, expect to "become an astronomer? In Horoscopy:—He must know such "divisions of space as raushy [q.v.], horah [q.v.], dricaunam "[q.v.], navaumshacam, dwaudashaumshacam, trimshaumsha-"cam, and their strength or weakness considered horoscopically; "he must know the horoscopic strength of the planets with "respect to their dic [q.v.], staunam, caulam [q.v.], chaishtay "[q.v.]; he must know the temperament of the planets and the "parts of the body lorded over by each; the mineral division of "each; the caste, sex and authority of each and the like; he "must be able to state, from the time of conception or birth of a "person, particulars connected with these occasions so as to "insure belief; he must be able to say in what cases a child will "die in infancy, and to calculate the period of one's existence; "he must be able to divide one's life into planetary divisions "and sub-divisions; he must be able to use the ashtacavargam "tables to a given horoscope; he must know how the several "raja, chundra, dvigraha, and nabhasa yogams affect the for-"tunes of men; he must also know how the fortunes of men are "affected by the position and look of planets; he must be able "to calculate the cause of one's death and discover his future "life; he must be able to discover auspicious periods for "marriages and the like. In Yautray [q.v.]:—he must know "the fitness or unfitness of a tity [q.v.], vauram [q.v.], caranam "[q.v.], nacshatram [q.v.], moohoortam [q.v.], and lagnam [q.v.] "and yogam [q.v.] for particular purposes. He must be able to "interpret natural gestures and dreams; he must be able to "state when a prince ought to start for battle to secure success "in war; he must be learned in rules relating to ablutions and "sacred fire ceremonies in honor of the planets and offerings to "evil spirits; he must be able to interpret phenomena connected "with such sacred fires and with elephants [q.v.] and horses "[ghorah] while mounting the same. A true astrologer is also "one who has thoroughly mastered the science of samhitay; it "treats of the effects of agastya [q.v.] chauram and saptarishy "[q.v.] chauram on particular parts of india, corresponding to "particular portions of the ecliptic [craunty mundalam]; of the "stellar divisions of every substance, animal and plant, and of "their increase or decrease according to the motion of the "planets among the stars; of the formation and interpretation of "various figures presented by the planets when meeting together; "of planetary conjunctions; of planetary years; of indications of "the weather [caulam, caurtey]; of the moon's conjunction with "rohiny [q.v.], swauty [q.v.] and the two ashaudhams [q.v.], on "particular week days of the month of ashaudham and of "predicting the nature of the coming weather and crops [vellau-"may] from the same; it treats of the prediction of immediate "rain [mazhay] from surrounding phenomena; of judging the "nature of the future crops from the growth of plants and "flowers; of the halos round the sun and moon; of lines of "clouds crossing the solar disc at rising and setting; of the "winds; of meteoric falls; of false fires; of earthquakes; of the "red sky immediately before sunrise and after sunset; of the "fanciful shapes of clouds; of dust storms; of thunderbolts; of "the price of food grains; of gardening; it treats of indradhwa-"jam, of the rainbow and of architecture; of the prediction of "events from casual words and gestures and from the cawing of "crows; of the formation of zodiacal circles for purposes of "horary astrology; it treats of the prediction of future events "from phenomena connected with the deer [mrigam], the dog "[nye] and the motions of the wind; of the construction of "temples [coil], towers and palaces; of the casting of images "[vigraham] and of founding the same; of the growth of plants "and trees; of under currents; of certain annual ceremonies to "be performed by princes for success in war; it also treats of "the prediction of events from the flight of the khanjan bird "and from the appearance of various abnormal phenomena, of "expiatory ceremonies; of miscellaneous planetary phenomena; "of ghrita cumbalam; of the royal sword; of puttam [q.v.]; "of the features of a house, cock [moorghy], a cow [pashoo], "a sheep [aud], a horse, an elephant, a man and a woman; it "also treats of the treatment of women; of moles in the body; "of injuries to shoes and clothes; of hairy fans; of walking "sticks; of beds and seats; of lamplight; of tooth-brush and "the like. That bramin jyotishacan who has mastered both "the text and the purport of the entire science deserves to be "respected and fed first on occasions of shrauddham [q.v.] and "he purifies the party of diners; even the mlechas [q.v.] and "the yavanas [q.v.] who have well studied the science are

"respected as rishies; such being the case, if the jyotishacan "should happen to be a bramin, who will deny him respect? "that service, which a single jyotishacan, having a knowledge "of place and time can render to a prince, cannot be rendered "to him by a thousand elephants or by four thousand horses."—"e" At present day even astronomy is made the foundation of a vast system of astrology. The real movements and the relative positions of the planets [graham] are wrought into a systematic connection with a great variety of arbitrary divisions of the signs [raushy] of the zodiac, and of the twenty-seven lunar mansions [nacshatram]. To these bodies are added various mythological appendages, as beasts, birds, trees, &c. The astrological dogmas have an important bearing on all the domestic arrangements and practices of the people. This is seen in the lucky and unlucky months, days and other divisions of time, in the horoscope [jenma puttricay] which has a powerful controlling influence in marriage, and in other matters relating to the settlement of families and in the more general prognostics for the year as given in the hindoo calendar [punchaungam]. See vol. I (108).—"f" The following is a list of the different European astronomical terms with the corresponding native terms [najm]:—Algebra; beejaganitam, catapayaudy, coottacam, prakeerna ganitam. Altitude; avanataumsham. Amplitude; agram. Anomaly; mandam. Aphelion; mandotcham. Apparent; spootam. Apsis of planet's orbit; ootcham. Arc; bhoojam. Arc of circle; chaupam. Arc of one minute; calay. Armillary sphere; golayantram. Ascensional difference; chauracoomoodam. Astronomical table; patacam. Astronomy; jyotisham. Azimuth; agracoty. Chord; chaupam, jeevay. Circle; chuckram, valayam. Circle, centre of; caindram. Circle, great; bhaganam, mundalam. Circle, vertical; drikmundalam. Circumference; paridhy. Circumference of great circle; mundalam. Comet; dhoomkait. Complement of arc; coty. Conjunction; crauntam, sangamam, yoog. Conjunction or opposition of sun and moon; mahacalay. Constellation; nacshatram. Cosine; cotijyay. Cube; ghanam. Culmination of celestial object; oordhwa samcramanam. Cycle, jovian; brihaspaty chuckram. Day; ahas, dinam. Day time; divy. Declination; craunty. Declination, northern of sun; eirauvatam. Declination, southern of sun; jauradgavam. Degree; bhaugam. Denominator; hauram. Diameter; vyausam. Dividend; bhaujyam. Divisor; bhaujak. Earth; bhoo. East; prauchy. Eclipse; grahanam. Ecliptic; craunty mundalam. Elevation; oonnatam. Epicycle; paridhy. Equation, argument of; caindram. Equator, celestial; naudymundalam. Equatorial parts; niracshadesham. Equator, radius of; bhoocarnam. Equator, terrestrial; bhoochuckram, bhooparidhy, niracsham. Equinoctial points; craunty pautam. Equinox; vishoo. Equinox, autumnal; toolauyanam. Equinox, vernal; maishauyanam. Fixed stars, sphere of; bhamundalam, nacshatra chuckram. Fortnight; pacsham. Fortnight, waning; bahoolam. Fortnight, waxing; shooclam. Full moon; poornimay; powrnimay. Geometry; cshetraganitam. Gnomon; shunk. Horizon; cshitijam. Horoscope; grahapatram, jenma puttricay. Hour; horah. Hour-angle; natanaudicay. Hypothenuse; carnam. Inclination; natam. Intercalary; adhicam. Jupiter; brihaspaty. Latitude, celestial; vicshaipam. Latitude, terrestrial; acsham. Line, horizontal; dwijyah maurgam. Longitude, celestial; dhroovacam, sauyanam. Longitude, terrestrial; deshauntaram, raikhauntaram. Lunar time; chaúndra maunam. Lunation; chaundra mausam, pitry dinam. Mansion; griham. Mars; bhowman, coojan, mungalan. Mean; madhyam. Mean solar time; madhyama sowra maunam. Mercury; bhoodhan. Meridian; raikhay. Minus; rinam. Minute; calay. Moon; chundran, indoo, soman. Moon's node, ascending; rahoo. Moon's node, descending; kait. Motion, diurnal; gaty. Multiplicand; goonyam. Multiplier; goonak. New moon; amavausyay, darsham. Night; rautry. Node of planet's orbit; pautam. North; oottaram. Orbit; cacsham. Parallax; acshavalanam, sheeghram. Perehelion; chalotcham, sheeghrotcham. Perpendicular; lambam. Phase of moon; calay. Planet; graham. Plus; dhanam. Pole; dhroovam, meroo. Pole, south; asoora dhroovam, coomeroo. Precessional variation; craunty pautagaty. Precession of equinox; ayanaumsham. Quantity, known; roopam. Quantity, unknown; caulak, neelak. Quotient; labdham. Reduction; shodhanam. Remainder; shaisham. Revolution; bhaganam. Right ascension; lagnam. Rule of three; treiraushy. Saturn; shany. Series; raushy. Series, infinite; anantaraushy, bhauga anoobandham. Shadow; chauyay. Sine; jyah. Solid; ghanam. Solstice, northern; dacshinauyanam. Solstice, southern, oottaranyanam. South; dacshinam. Sphere; golam. Square; vargam. Square root; vargamoolam. Star; nacshatram. Sun; arcan, bhaunoo, ravy, sooryan. Sun's course; ayanam. Terrestrial orb; bhoo golam, meroo. Triangle; mookonam, trikonam. True; spootam. Twilight; sundhyay. Venus; bhrigoo, shoocran. Versed sine; oottarajyay. West; pashchimam. Zenith; ootcham. Zenith distance; nataumsham. Zodiac; raushy chuckram. Zodiac, signs of; raushy.—"g" The following is the above list reversed:—Acsham; terrestrial latitude. Acshavalanam; parallax. Adhicam; intercalary. Agracoty; azimuth. Agram; amplitude. Ahas; day. Amavausyay; new moon. Anantaraushy; infinite series. Arcan; sun. Asooradhroovam; south pole. Avanataumsham; altitude. Ayanam; sun's course. Ayanaumsham; precession of equinox. Bahoolam; waxing fortnight. Beejaganitam; algebra. Bhaganam; great circle, revolution. Bhamundalam; sphere of fixed stars. Bhanga anoobandham; infinite series. Bhaugam; degree. Bhaujak; divisor. Bhaujyam; dividend. Bhaunoo; sun. Bhoo; earth. Bhoocarnam; radius of equator. Bhoochuckram; terrestrial equator. Bhoogolam; terrestrial orb. Bhoojam; arc. Bhooparidhy; terrestrial equator. Bhowman; mars. Bhrigoo; venus. Boodhan; mercury. Brihaspaty; jupiter. Brihaspaty chuckram; jovian cycle. Cacsham; orbit. Calay; arc of one minute, minute, phase of moon. Caindram; argument of equation, centre of circle. Carnam; hypothenuse. Catapayaudy; algebra. Caulak; unknown quantity. Chalotcham; perehelion. Chaundra maunam; lunar time. Chaundramausam; lunation. Chaupam; arc of circle, chord. Chaura coomoodam; ascensional difference. Chauyay, shadow. Chuckram; circle. Chundran; moon. Coojan; mars. Coomeroo; south pole. Coottacam; algebra. Cotijyay; cosine. Coty; compliment of arc. Crauntam; conjunction. Craunty; declination. Craunty mundalam; ecliptic. Craunty pautagaty; precessional variation. Craunty pautam; equinoctial points. Dacshinam; south. Dacshinauyanam; northern solstice. Darsham; new moon. Deshauntaram; terrestrial longitude. Dhanam; plus. Dhoomkait; comet. Dhroovacam; celestial longitude. Dhroovam; pole. Dinam; day. Divy; daytime. Drik mundalam; vertical circle. Dwijyah maurgam; horizontal line. Eirauvatam; northern declination of sun. Gaty; diurnal motion. Ghanam; cube, solid. Golam; sphere. Golayantram; armillary sphere. Goonak; multiplier. Goonyam; multiplicand. Graham; planet. Grahanam; eclipse. Grahapatram; horoscope. Griham; mansion. Hauram; denominator. Horah; hour. Indoo; moon. Jauradgavam; southern declination of sun. Jeevay; chord. Jenmaputtricay; horoscope. Jyah; sine. Jyotisham; astronomy. Kait; moon's descending node. Labdham; quotient. Lagnam; right ascension. Lambam; perpendicular. Madhyam; mean. Madhyama sowra maunam; mean solar time. Mahacalay; conjunction or opposition of sun and moon. Maishauyanam; vernal equinox. Mandam; anomaly. Mandotcham; aphelion. Meroo; pole, terrestrial orb. Mookonam; triangle. Mundalam; circumference of a great circle, great circle. Mungalan; mars. Nacshatram; constellation, star. Nacshatra chuckram; sphere of fixed stars. Natam; inclination. Natanaudicay; hour-angle. Nataumsham; zenith distance. Naudy mundalam; celestial equator. Neelak; unknown quantity. Niracshadesham; equatorial parts. Niracsham; terrestrial equator. Oonnatam; elevation. Oordhwa sancramanam; culmination of celestial object. Ootcham; apsis of planet's orbit, zenith. Ottarajyay; versed sine. Oottaram; north. Oottarauyanam; southern solstice. Pacsham; fortnight. Paridhy; circumference, epicycle. Paschimam; west. Patacam; astronomical table. Pautam; node of planet's orbit. Pitry dinam; lunation. Powrnimay; full moon. Prakeernaganitam; algebra. Prauchy; east. Rahoo; moon's ascending node. Raikhauntaram; terrestrial longitude. Raikhay; meridian. Raushy; series, signs of zodiac. Raushy chuckram; zodiac. Rautry; night. Ravy; sun. Rinam; minus. Roopam; known quantity. Sangamam; conjunction. Sauyanam; celestial longitude. Shaisham; remainder. Shany; saturn. Sheeghram; parallax. Sheeghrotcham; perehelion. Shodhanam; reduction. Shooclam; waxing fortnight. Shoocran; venus. Shunk; gnomon. Soman; moon. Sooryan; sun. Spootam; apparent, true. Sundhyay; twilight. Toolauyanam; autumnal equinox. Treiraushy; rule of three. Trikonam; triangle. Valayam; circle. Vargam; square. Vargamoolam; square root. Vicshaipam; celestial latitude. Vishoo; equinox. Vyausam; diameter. Yoog; conjunction.——*Jyoty shastram* (ज्योतिश्शास्त्र - jyótishshástra, San.). From (above + shástra, san. science). A comprehensive term. May be classified under the following four heads:—"*a*" Mathematics, algebra, astronomy, and general treatises. Soorya siddhauntam is the best-known manual [siddhauntam].—"*b*" Judicial astrology, horoscopes, divination [jautacam].—"*c*" Omens. Punchapacshy shastram is a well-known book on omens from birds, a popular superstition in S. india [shacoonam].—"*d*" Palmistry and physiognomy. These are old arts here. The peculiar marks attributed to Booddha [q.v.] are an early example of this superstition. Samoodricam is the principal title to such works [samoodricam].

K (क - ka, का - ká, *San.*; ک - káf, ق - káf, *Hind.*; க - ka, கா - ká, *Tam.*). San. for the who or the unknown; any chief god [deva]. Arabic ending for the second person singular; as Aleik, on + thee. Diminutive ending in persian words; as in Dastak. Similar in sanscrit. Hind. ک in arithmetic symbol for 20. Hind. ق symbol for 100. Tam. short sign for the numeral 1.

KACHVEE (कच्वी - kachví, *San.*; अळू - alú, *Mahr.*; वेंटि - vénti, *Conc.*; قلقاس - kulkás, *Ar.*; کچو - kachú, *Hind.*; اروی - arví, *Dec.*; ಶಾಮೆಗಡ್ಡೆ - shámegadde, *Can.*; ಕೆಸು - kesu, *Coorg*; ತೇವು - tévu, *Too.*; చేమ - chéma, *Tel.*; ସରୁ - saru, *Oor.*; ചേമ്പ - chémpu, *Mal.*; ගහල - gahala, *Singh.*; சேம்பு - shémbu, *Tam.*). San. from (kachhu, san. itch); from property. Ar. from lat. colocasia. Hind. from sanscrit. Can. from (sháma, can. black + gadde, can. root). Mal. from tamul. Tam.

from (shé, tam. redness + pai, tam. green). San. also (mánaka), meaning garden plant. Conc. also (téró). Ar. also (kur). Hind. also (arví); (goríkachú), meaning white + yam; (bíshkachú), meaning poison colocasia; (mánkachú). Can. also (késhavanagadde), meaning water-lying root; (kádakesugida), meaning wild + colocasia. Too. also (kádutévu), meaning wild + colocasia. Tel. also (balurakkasi), meaning plumpness + she-devil, a large variety [bastard aloe]; (tótabalurakkasi), meaning garden + colocasia; (kondarakkisa), meaning hill + devil, wild variety; (tsárakanda), meaning stripe + yam. Mal. also (nírççembu), meaning water colocasia; (veli), meaning white one. Singh. also (kandala). Tam. also (shémbai), meaning reddish green; (shagudam); (nírççémbu), meaning water + the plant. Greek ἄρον from egyptian. Title otherwise Indian kales. Botanically the Colocasia genus, araceæ [vricsham, 152]. Herbs with tuberous, or stem-like root-stocks; leaves peltate; scapes somewhat solitary or many in the same axil, shortened, sheathed; closely allied to caladium.—"*a*" The species best known is the Bread-and-butter plant, Cocco, Coco, Cocoa root, Eddoes, Egyptian arum, Egyptian gudger, Egyptian wake lôbbin, Egyptian yam, Indian kale, Kachvee, Kolcas, Scratch-coco, Tara plant, Tarow plant. Botanically Colocasia antiquorum, schott. Alias Arum colocasia. Herb, stemless; large heart-shaped leaves, borne on long foot-stalks, rising from a short farinaceous corm; flowering in rainy season; cultivated in wet marshy grounds; tubers resembling jerusalem artichoke [sooryacaunty]; in flavor not unlike salsify. Pressed juice of the petioles styptic, in pharm. non-officinal. Young leaves eaten like spinach [maurisham], but, like the root, require to be well cooked in order to destroy the acridity peculiar to aroideous plants, used as famine food. Ashes used as mordant [cauram]. Many varieties, the outer marks of distinction resting upon the different tinge observable in the corm, leaf, stalks, and ribs of the leaves, white, yellowish, purple.—"*b*" Another is Colocasia indica, roxb. Alias Arum indicum. Cultivated for esculent stems and small pendulous tubers, these being eaten in curries [q.v.]; requires to be cooked, being acrid in the raw state.—"*c*" Another is Colocasia montana, kunth. Alias Arum montanum. Stemless; mountainous parts of the northern circars [q.v.]; root poisonous; flowering in rains; root employed to poison tigers [pooly].—"*d*" Another is the Saura cunda, Water-lily-leaved arum. Botanically Colocasia nymphæifolia, kunth. Alias Arum nymphæifolia; Caladium nymphæifolium. Stemless; malabar; tubers are given in gonorrhœa; leaves used as famine food, and require cooking being acrid in the raw state.——*Water kachvee* (நீர்ச்சேம்பு - nírççémbu, Tam.). Same as Pit nelumbo.——*Wild kachvee* (جنگلی کندا - janglíkandá, Hind.). Same as Wild telinga potato.

KADAM (قدم - kadam, *Hind.*) [cautham]. A foot, linear measure [adee]. Also footstep [dharmarajacull].

KADAR (காட - káda, obl.; காடன் - kádan, pers. sing.; காடர் - kádar, pers. pl., *Tam.*). From (kádu, tam. forest) [caud]. A hill race, occupying the Anamullay hills. They are strong-built and active with woolly hair and something of the African features, and file their front teeth to a point. The women wear enormous circles of pith [solah] in the lobes of their ears, which they distend down to their shoulders. A small number are employed by Government in forest conservancy and in felling timber. Others collect forest produce, which they barter for grain. They also cultivate patches of raggy [q.v.], which they supplement as a food-supply with roots [doompa, gadda], herbs, &c., found on the hills [jauty]. See vol. I (35); II, 52.

KADR (قدر - kadr, *Ar.*). From (kadara, ar. to measure). The power of directing one's own actions without restraint or irresistible fate [jabr].——*Cazah o kadr* (قضا و قدر - kazáwakadr, Hind.). Divine decree existing from all eternity [takdeer]. The belief of the generality of the Mahomedans is that men's actions depend partly on their own free will [ikhtiar], and partly on exterior causes [tafweez], these being due to general laws of nature the sequence of which God alone knows.

KAFFAUSH. (काकपिशाच - kákapishácha, *San.*; خفاش - khaffásh, *Ar.* and *Pers.*; گدل - gadal, *Hind.*; كلونگ - kalong, *Malay*; ಕೀಚಪಾಲ - kíchapála, *Can.*; రక్తకాట్రేడు - raktakátrédu, *Tel.*; പാറയാത്തൻ - párayáttan, *Mal.*; உதிரமாகாளி - uthiramágáli, *Tam.*). Title from arabic. San. from (káka, san. crow + pishácha, san. demon); terror of crows. Ar. from (khafisha, ar. small eye). Can. from (kíchu, can. to squeak + bávala, can. bat). Tel. from (rakta, san. blood + kádu, tel. forest + rédu, tel. king). Mal. from (pára, mal. rock + cháttan, mal. demon). Tam. from (uthiram, tam. blood + má, tam. great + kálí, san. the goddess durgá). Tam. also (kákkáviriççi), meaning crow terror. Family Vampyridæ, cheiroptera, mammalia [sastanam, 4], of naturalists [jantoo]. Vampires. These are bats with a nose leaf either simple or complicated.—"*a*" The first of family is the large-eared Vampire bat, Megaderma lyra. Of a slaty blue or pale mouse-color, albescent or yellowish ashy beneath. Nasal appendage, large, oblong, free at the tip, reaching to the base of the ears with a fold down the centre; muzzle, truncated; under lip, cleft. Frequents old buildings, pagodas [q.v.], caves, roofs of houses, &c. It sucks the blood from other bats, fixing on them behind the ear, sucking the blood during flight, and then devouring the body. It also eats frogs [bhaicam] and fish [matsyam].—"*b*" The next is the Allied leaf bat, Rhinolophus affinis. Ears, large, pointed, emarginate externally, anti-helix well developed; upper leaf triangular, emarginate at the tip, reaching above the base of the ears; varies much in color—above, bright rufous, or ferruginous brown, or brown; paler beneath. Most abundant on the west coast.—"*c*" The next is the Rufous leaf bat, Rhinolophus rouxi. Ears, large, pointed, externally notched; tip of upper nose-leaf triangular, with its sides well emarginate, reaching above the base of the ears; fur short, crisp; color above, smoky brown in some, red-brown in others, and golden rufous in some; beneath, paler. Found near Tellicherry.—"*d*" Next is the Indian horse-shoe bat, Hipposideros speoris. Alias Hipposideros apiculatus, penicillatus; Phyllorhina speoris; Rhinolophus dukhunensis, speoris. Ears, large, erect, acuminate, rounded at the base, emarginate on the outer margin; facial membrane complicated; muzzle short; interfemoral membrane, narrow, square, enclosing the tail, the half of the last joint alone free; body short, thick of variable color; sometimes light mouse color, beneath; at times, fulvous-brown; at other times, bright rufo-ferruginous or golden fulvous. It inhabits old buildings, wells, &c.—"*e*" Next is the Little horse-shoe bat, Hipposideros murinus. Alias Hipposideros fulvus; Phyllorhina aurita, fulva; Rhinolophus fulgens, murinus. Ears, large, erect, rounded; muzzle, short; a transverse frontal leaf and sac; in front a simple membrane round the nostrils; interfemoral membrane, large, including the tail all but the extreme tip; body short and thick; color, dusky brown or mouse color, sometimes light fawn or ferruginous; wing membranes blackish. Almost peculiar to Southern india.—"*f*" The last is the Long-tailed leaf bat, Rhinopoma hardwickii. Muzzle, long, thick, truncated, and surmounted by a small leaf tragus, oblong, biacuminate; forehead, concave, with a fossa or channel down the centre; fur, soft and very fine, dull brown throughout; face, rump, and part of the abdominal region naked. Frequents old ruins, caves, clefts in rocks, &c. This species is very closely allied to R. microphylla, from Egypt, on which the genus was founded.—"*g*" Indian species not here found are:—Cœlops frithii or frith's tail-less bat; Hipposideros armiger or large horse-shoe bat, blythii, cineraceus or ashy horse-shoe bat, larvatus, vulgaris or common malayan horse-shoe bat; Megaderma spasma, spectrum or cashmere vampire; Phyllorhina armigera, bicolor, diadema, galerita, leptophylla, masoni, nicobarensis; Rhinolophus andamanensis, cœlophyllus, garoensis, macrotis or large-eared leaf-bat, minor, mitratus or mitred leaf-bat, pearsonii or pearson's leaf-bat, perniger or luctus or large leaf-bat, petersii, rammanika, sub-badius or day leaf-bat, tragatus or ferrum equinum or dark-brown leaf-bat, trifoliatus.—"*h*" For vespertilions see Vavvaul; for noctules see Chamgadal.

KAH (کاہ - káh, *Hind.*). Straw.——*Kahoo* (خس - khass, Ar.; کاهو - káhú, Pers., Hind. and Dec.; ಸಲಾಡಿ - saládi, Can.; కావుచెట్టు - kávuchettu, Tel.; சல்லாத்து - shalláttu, Tam.). Title from persian. Ar. from (khassa, ar. slender); from long corymbose flower-stems. Pers. from (káh, pers. straw); from dingy brown color of leaves. Can. and tam. are english salad. Tel. from hindostany. Tam. also (kaççu), meaning bitter plant. Greek θρίδαξ. Title otherwise Cabbage lettuce, Drum-head lettuce, Garden lettuce, Lettuce. The long upright kind is Cos lettuce, which is best. Botanically Lactuca scariola, linn., var. sativa, clarke, compositæ [vricsham, 74]. Alias Lactuca sativa. Succulent, quite smooth, leaves spreading pinnatifid or entire, branches of panicle short, with numerous bracts, achenes black. From the sap is prepared a resinous, dry juice known as lactucarium, a quasi substitute for opium [aphainam]; gives to pharm. extractum lactucæ, mild sedative, officinal; young leaves with mild, narcotic, soothing action, used as food chiefly as salad; a clear, transparent, sweet oil, from seeds.——*Karbah* (तृणमणि - trinamani, San.; قرن البحر - karnulbahr, Ar.; کهربا - kahrubá, Pers., Hind. and Dec.; عنبر - ambar, Malay; ತೃಣಗ್ರಾಹಿ - trinagráhi, Can. and Too.; కర్పూరపూస - karpúrapúsa, Tel.; പൊന്നമ്പർ - ponnambar, Mal.; අම්බර - ambara, Singh.; கர்ப்பூரமணி - karppúramani, Tam.). Title from persian. San. from (trina, san. grass + mani, san. gem); straw attracting gem. Ar. from (karn, ar. horn + bahr, ar. sea). Pers. from (káh, pers. straw + rubá, pers. attracting). Can. from (trina, san. grass + gráhi, san. attractor). Tel. from (karpúra, san. camphor + púsa, tel. gem) by corrupt analogy. Mal. from (pon, mal. gold + amber). Tam. from (karpúra, san. camphor + mani, san. gem) by corrupt analogy. Ar. also (misbáhurrúm), meaning light of turkey. Tam. also (ponnambar), meaning gold + amber; as distinguishing from (mínambar), meaning fish + amber or amber-gris. Amber. Succinum or electrum of chemists. A fossil [cull poo] of the resin [raul] yielded by trees chiefly pines [devadauram] which grew during the cretaceous period of geologists; a brittle, light, hard substance, generally almost transparent; commonly yellow; when bruised, exhales aromatic odour; when rubbed becomes electrical. Occasionally met with in alluvial soil in Travancore. The greater part brought from Japan. Copal [q.v.] is occasionally sold in the bazaars [q.v.] under the name of amber; and a substance known as false amber, possibly fossil copal, is exported hence into China. Distilled amber yields the succinic acid, and with it comes over the oil of amber, a valuable stimulant and antispasmodic. Not

employed here as in Europe in preparing varnishes [rangh], but is made into beads [munkah] and other ornaments. The natives generally mean ambergris by Amber [q.v.], that being the most common [ratnam].

KAID (കേട് - kétu, *Mal.*). From (ketu, mal. to be spoilt). Bad.——*Kaid vellam* (കേടുവെള്ളം - kétuvellam, Mal.). From (above + vellam, mal. water). Stinking condition of water in seas and backwaters [cauyal] on Malabar coast [q.v.], at various periods of year, chiefly towards close of rains. Fatal to fishes [matsyam].——*Kedmaney* (ಕೇಡುಮನೆ - kédumane, Can.; கேடு மனை - kédumanai, Tam.). From (kédu, tam. misfortune + manai, tam. house). Funeral house among Todahs [q.v.].——*Kerd* (கேடு - kédu, Tam.). From (kedu, tam. to perish). A Todah [q.v.] funeral, of which there are two kinds:—the Hasy kerd, or green funeral, which is special for each todah, and takes place as soon as possible after death; and the Barla kerd, or dry funeral, which takes place some months later, and may include all the members of the tribe who have died during the year. See vol. II, 237.

KAINY (கேணி - kéni, *Tam.*). From (khan, san. to dig) [gany]. Tank or public well [kinar].

KAIT (केतु - kétu, *San.*). From (chi, san. to observe); appearance, brightness. A ray. Descending node [pautam] of the moon [chundran], or point where the moon in its southward course cuts the ecliptic [craunty mundalam]; ☋ [rahoo]. Represented in arts sometimes by a dragon's tail. Sometimes by the headless trunk of Rahoo riding on a vulture [gidh]. It is imagined to be an actual heavenly body or planet [graham], and to cause the eclipses [grahanam] of the sun [sooryan] and the moon, especially the latter, by seizing them in their course [jyotisham].——*Kaitmaulay* (केतुमाला - kétumálá, San.). From (above + málá, san. succession). One of the nine divisions of Jamboo dweepam [q.v.]. See vol. I (3). It was situated between Gandhamaudanam, not identified, and the sea. Its principal river Chacshoo was the Oxus. The Vayoo pooraunam [q.v.] states that it is inhabited by barbarians of a black complexion, their women being of complexion of lotus [nelumbo]. Romacam according to sooryasiddhauntam [q.v.] is in this region. Kaitmaulay refers plainly to regions west of India.

KAITY (ಕೇತಿ - kéti, *Can.*) [kery]. Village, Valley; Neilgherry dist., Merkoonaud div.; pop. 3,513; acres 8,115; lat. 11° 22′; long. 76° 47′; from Coonoor W.N.W. 5 miles; from Ootacamund S.E. 3 miles. Badaga village in valley of same name below road from Ootacamund to Coonoor. One of the earliest settlements on the Neilgherries. Mr. John Sullivan, Collector of Coimbatore, opened out a Government experimental farm here in 1832. Tea [q.v.] was planted in 1835. The farm was abandoned about 1838. The bungalow [q.v.] was afterwards occupied for some time by the Governor of Pondicherry. In March 1840 Lord Elphinstone, Governor of Madras, fixed his residence here, taking possession of the Government farm buildings. He expended considerable sums of money in building and furnishing a large country house and laying out the grounds ornamentally. The property was subsequently purchased by Mr. Casamajor of the Civil Service, formerly Resident at Mysore, for Rs. 1,50,000. This gentleman established a school for Badaga [q.v.] children. On his death in 1849 he left the greater portion of his property to the Basel mission, who subsequently purchased the houses. Since then this has been the head-quarters of the mission on the Neilgherries and a convalescent depôt for other agents. The mission has three missionaries, and an orphanage and boarding school. The Kaity valley, which forms the upper basin of the Kartairy river, lies to south of Dodabetta range, and is enclosed to N. and W. by that branch of the same range which runs out towards Devasholah. It contains numerous thriving Badaga villages, the greater portion being under cultivation. The soil is so well-suited for the growth of the staple hill crops that even the steepest hill-sides are utilised by the ryots [q.v.].

KAJAUWAH (کجاوہ - kajáwah, *Hind.*). Camel's [ottagam] litter or panier, formed of wooden frames covered with cloth or leather [chamrah].

KAJO (काजू - kájú, *Mahr.*). From brazilian through portuguese. Same as Cashew.

KAKRONDAH (ککروندا - kakrondá, *Hind.*). Plant name common to:—Blumea lacera; Laggera aurita. See gloss paragraphs.

KAL (కలు - kal, *Tam.*). To mix.——*Kalabanda* (కలబంద - kalabanda, Tel.). Mixed with mud. Plant name common to:—Aloe indica, Aloe vulgaris, Phaseolus trilobus. Compare where transl. is of first term:—Agave cantala (pítikalabanda), dung; Aloe indica (chinnakalabanda), small and (errakalabanda), red; Aloe littoralis (chinnakalabanda), small; Aristolochia indica (errakalabanda), red. See gloss paragraphs.——*Kalipauk* (களிப்பாக்கு - kalippákku, Tam.). From (kali, tam. thick paste + pákku, tam. areca-nut). Boiled areca-nut [q.v.] covered with thick paste [pauk].——*Kaly* (களி - kali, Tam.). Thick paste; water in which areca [q.v.] nut has been boiled.

KALADANAH (حب النيل - habbunnil, *Ar.*; گیاہ تخم نیل - giyáhitukhminíl, *Pers.*; کالادانہ کی بیل - kalahdánahkíbel, *Hind.*; کالی زرکی کی بیل - kálízirkíkíbel, *Dec.*; కొల్లి - kolli, *Tel.*; கொடிக்காக்கட்டான் - kodikkákkattán, *Tam.*). Title from hindostany. Ar. from (habb, ar. seed + níl, ar. blue). Pers. from (giyáh, pers. creeper + tukhm, pers. seed + níl, hind. blue), from color of flowers. Hind. from (kálá, hind. black + dánah, pers. seed + bel, hind. creeper). Dec. from (kálá, hind. black + zirkí, hind. the seed + bel, hind. creeper). Tam. from (kodi, tam. creeper + kákkattán, tam. clitorea ternatea, linn.). Hind. also (mirchai), meaning pepper plant, from its acridity [pepper]; (nílkalmí), meaning indigo quill from the stems. Tel. also (jiriki). Tam. also (shirikki), from deccany; (kákkattán), clitoria ternatea, linn. [crow creeper]. Title otherwise Black seed creeper, Gay bine, Kaladanah resin plant, Morning glory, Pale blue ipomæa, Smaller morning glory. Botanically Ipomæa [calamby] hederacea, jacq., convolvulaceæ [vricsham, 93]. Alias Convolvulus hederaceus, nil; Ipomæa cœrulea, nil; Pharbitis cœrulea, hederacea, nil. Annual, 6 to 12 feet long, twining, hairy; stems as thick as crow's quill; leaves alternate cordate, three-lobed, intermediate lobe dilated at the base, downy; peduncles axillary, two to three-flowered, usually longer than the petioles; sepals ovate-lanceolate, hispid at the base; flowers pale blue, expanding in the morning and closing during the day; flowering in rainy season; cultivated and seeds also imported; common. Seeds are black, angular, a quarter of an inch or more in length, weighing on an average about half a grain each, having the form of the segment of an orange [q.v.]; of a sweetish and subsequently rather acrid taste and heavy smell; powder of a grey color. Their use in medicine not known to hindoos in remote times; known however to arab physicians. Gives to pharm. kaladanah seeds, pharbitis semina, active principle, a resin, pharbitisin; safe and effectual cathartic, closely resembling in properties and uses officinal jalap [q.v.], for which it forms substitute, though not so active in operation; officinal. Compare Laldanah.——*False kaladanah* (باریك بہوری - báríkbhaurí, Hind.; කළුඇලඟා - kaluálangá, Singh.; காட்டுத்தாளி - káttuttáli, Tam.). Title from use as adulterant. Hind. from (bárík, hind. less + bhaurí, hind. porana racemosa); from similarity of calyx. Singh. from (kalu, singh. black + álangá, singh. ipomæa bonanox, linn., var. grandiflora). Tam. from (kádu, tam. forest + táli, tam. convolvulus). Botanically Ipomæa [calamby] muricata, jacq., convolvulaceæ [vricsham, 93]. Alias Calonyction bonanox, var. muricata, muricatum; Convolvulus muricatus; Ipomæa bonanox. Annual herbaceous, climbing; root small, tapering, with many slender rootlets; stem branched, covered with soft prickles, not hairy; leaves broadly cordate, acuminate, smooth, on long petioles; flowers axillary, two to four, on long peduncles having prickles like the stem; pedicels large, fleshy and club-shaped, of a light green color, $1\frac{1}{2}$ inches long; calyx divided; sepals five, broadly ovate, mucronate, smooth, persistent; corolla purple, about 2 inches in diameter, expanding at sunset, and closing before sunrise; capsule two-celled, composed of four segments, which separate from the central partition; cells two-seeded; seeds dark brown, smooth, the same shape as those of kaladanah, about $\frac{1}{3}$ of an inch in length, and $\frac{1}{4}$ in breadth; weight about 3 grains each; they can easily be distinguished from kaladanah by their greater size, lighter color and thick testa; their medicinal properties are identical.

KALEELA (کلیلہ - kalílah, *Hind.*). From (karataka, san. name of a jackal in pañchatantra). A jackal [q.v.] so named.——*Kaleela damna* (کلیلہ دمنہ - kalílahdamnah, Hind.). From (above + damanaka, san. name of a jackal in pañchatantra). Arabic version of Punchatantram [q.v.].

KALIMA (کلمہ - kalimah, *Hind.*). From (kalm, ar. a word). The Mahomedan confession of faith:—"There is no God but God, and Mahomet [q.v.] is his prophet." The shiahs [q.v.] add:—"Ally is the caliph of God." Its recital is the first of five pillars of practical religion [deen] in Islam; and when any one is converted to Islam [q.v.] he is required to repeat this formula.

KALY (कलि - kali, *San.*; கலி - kali, *Tam.*). From (kal, san. to do) [cal]. Misery personified as a deity. The ace in dice, and a personification of ill luck [calathy, moodevy]. A name of Shany [q.v.], or regent of the planet [graham] Saturn; as considered to be of malignant influence.——*Kaliyoog* (कलियुग - kaliyuga, San.). See Yoog.——*Kaliyoogaudy* (కలియుగాది - kaliyugádi, Tel.). From (kaliyuga, san. the fourth age + ádi, san. beginning). Lunar [chaundramaunam] festival [pundigay, 6d], subject to intercalation [adhicam]. The thirteenth lunar day [tity] of the waning moon [krishna pacsham] of sixth lunar month Bhaudrapadam [mausam] between 15th September and 13th October; commemorates the beginning of the Kaliyoog.

KAMELA (कम्पिल्लक - kampillaka, *San.*; शेंदरी - shéndarí, *Mahr.*; उंडीरूकु - undírúku, *Conc.*; قنبيل - kinbíl, *Ar.*; کنبیلہ - kambelá, *Pers.*; کمیلہ - kamelá, *Hind.*; کموُد کا جہاڑ - kamúdká-

jhár, *Dec.*; ಕುಂಕುಮದಮರ - kunkumadamara, *Can.*; ପୁନ୍ନ - ponne, *Too.*; వసంతగుండము - vasantagundamu, *Tel.*; ବସନ୍ତଗୁଣ୍ଡି - bosontogundi, *Oor.*; പുന്ന - punna, *Mal.*; කම්පිලිය - kampiliya, *Singh.*; கமேலாமாவுமரம் - kamélámávumaram, *Tam.*). Title from sanscrit through hindostany. San. from (kamp, san. to shake); see below for getting the farina. Mahr. from (sindúra, san. red lead); of the color of sendoor [q.v.], from red scarlet dye. Ar., &c., from sanscrit. Can. from (kunkuma, san. saffron, crocus sativus, linn. + mara, can. tree). Too. from (ponnu, too. gold) [common poon, soora poon]. Tel. from (vasanta, san. spring + gandha, san. fragrance). Oor. like teloogoo. Mal. from (pon, mal. gold); from scarlet dye [common poon, malabar poon, wild mohwah]. Singh. from sanscrit. Tam. from (kamélá, tam. the drug + mávu, tam. flour + maram, tam. tree). San. also (madhuka), meaning sweet [atimathooram, common mohwah]; (punnáma), meaning named poomaun; (punnágakésara), meaning male + messua ferrea, linn.; (kapila), meaning tawny colored [wild date]; (punnága), meaning male, messua ferrea, linn. [common poon, soora poon]; (késara), meaning messua ferrea, linn. [ilanjay, nauga champak, poison bamboo, saffron]; (réchanaka), meaning brightening. Hind. also (kamúd); (kapílá), from sanscrit. Can. also (honne), meaning gold; (punnága), meaning male + messua ferrea, linn.; (munnága), meaning front + messua ferrea, linn., from early flowering; (purushatungamara), meaning male + lofty + tree; (korangumúnji), meaning monkey's face; (suvarnakésari), meaning gold filament; (hulichellu). Tel. also (chendúrapuchettu), meaning red powder + tree; (kunkumapuvvuchettu), meaning saffron + tree; (veligárapuchettu), meaning borax + tree; (kápilapodichettu), meaning the drug + the tree; (tungavrikshamu), meaning tall tree; (peyyarodda), meaning female + the tree. Oor. also (komalagundi); (sundorogundi). Mal. also (ponnakam), meaning gold holding; (pípponnakam), meaning dirty + the tree. Tam. also (kabilappodimaram), meaning the drug + tree; (kámbósam); (shuvarnagésari), meaning gold + filament; (kurangumúñjimaram), meaning monkey-face tree; cf. ilanjy. Title otherwise Capilapody, Dyer's rottlera, Mallata, Monkey's face tree, Ponnagam, Scarlet croton. Botanically Mallotus philippensis, muell., euphorbiaceæ [vricsham, 118]. Alias Croton coccineus, montanus, philippensis, punctatus; Echinus philippensis; Rottlera aurantiaca, tinctoria. Mallotus from nepaulese mallata. Small tree or under-shrub; younger branchlets, petioles, and inflorescences rusty-tomentose; leaves rhomb-ovate, acuminate, acute at the base, entire or slightly toothed, clothed with scarlet tomentum beneath, glabrous above; spikes of either sex axillary and terminal, rusty-tomentose; male bracts three-flowered, female one-flowered; bracts triangular-ovate, acute; segments of the female calyx ovate-lanceolate; stamens twelve to fifteen; ovary densely scarlet; capsules slightly three-cornered, globose, covered with scarlet dust; flowers in cold season; near banks of rivers; common. Kamela is the powder rubbed off the capsules, found to a smaller extent on the leaves and stalks; it has a heavy odour, nearly tasteless; the fine grains consist of a red substance enclosed in a membranous sac; water does not act on this envelope, but it is readily ruptured by alcohol or an alkaline fluid; hence the powder communicates its color to alcohol or an alkaline menstruum, but not to water; alum [padicauram] added to the alkaline infusion renders the color more bright and permanent. For production, the ripe capsules are gathered in march and rubbed together or shaken in bags till the farina separates; exported from malabar. Kamela is medicinally anthelmintic, vermifuge and purgative; the vermifuge action depends on the minute stellate hairs found in the powder; substituted for british santonin [absinth]; gives to pharm. tinctura kamalæ, officinal, also in british; fruit and leaves rubbed with honey [shahad] applied to bites of poisonous animals. Kamela gives an orange dye [shauyam], chiefly to silk [puttoo]; bark used for tanning [chamrah]; powdered bark of casearia tomentosa, roxb. [anavinga] is used as adulterant; also found mixed with red sand [manal]; kamela like lycopodium is inflammable. Wood smooth, grey to light red, hard, close-grained; no heart-wood; warps and shrinks; used only for fuel. Other common species are:—albus, atrovirens, aureo-punctatus, barbatus, distans, lawii, muricatus, repandus, rhamnifolius, stenanthus.

KAMMAL (کمل - kammal, *Hind.*). From (kambala, san. blanket) [cumbly]. Blanket.——*Kammalposh* (کمل پوش - kammalposh, Pers.). From (above + posh, pers. wearer). A fakeer [q.v.].

KANAK (கணக்கு - kanakku, *Tam.*). From (gan, san. to count) [gan]. Accounts or the art of accounting [hisaub, lekka].——*Kanakan* (கணக்கன் - kanakkan, Tam.). An accountant especially village accountant [curnum, shanbogue].——*Kanak choornay* (கணக்குச்சுருணை - kanakkuççurunai, Tam.). From (above + shurunai, tam. scroll). A bundle of accounts kept on palmyra [q.v.] leaves [cadjan] by a village accountant.——*Kanaksauram* (കണക്കുസാരം - kanakkusáram, Mal.). From (above + sára, san. essence). Ancient Malabar work on arithmetic and weights and measures [alavay]; differs materially from Ganita shastram [q.v.]. Author Neelacuntan. Six chapters. First treats of fractions, literally what is below one; second of decimals, what is above one; third Yidangazhy [q.v.], measures of capacity; fourth Cautham [q.v.], measures of length; fifth Calanjy [q.v.], weights; sixth, Caulam [q.v.] or time.

KANAKA (കനക്ക - kanakka, obl.; *Mal.*). From (kanam, mal. grain). Means a tribe on the West coast, till lately in a state of slavery. The Kanakar live together in small clans, each hamlet under the patriarchal rule of headman. They cultivate by Coomry [q.v.]. In the south they speak Tamul, and further north Malayalam [jauty].

KANDAL (کندل - kandal, *Hind.*). From (kanda, san. root); meaning root-colored or whitish brown. Same as Sagapenum. Distinguish from Candel [q.v.].

KANGAN (کنگن - kangan, *Hind.*). From (kankana, san. a wrist ornament). An ornament worn on the wrist [pownchee]. The tying and untying of the Kangan are important parts of marriage [shaudy] ceremonies [zewar].

KANJILY (خنجری - khanjarí, *Hind.*). From (khál, hind. hide + jarí, hind. covered). Small tambourine with bells [sangeetam].

KANNY (കണ്ണി - kanni, *Mal.*). From (kalam, mal. square). A plot of land from eight to fourteen feet long, and five to eight broad, set apart for evaporating or manufacturing salt [alam, ooppoo].

KAOLIN (گل چینی - gilichíní, *Pers.*; කිරිමැටි - kirimati, *Singh.*). Title is a chinese word, meaning high ridge, from the mountain where it is obtained. Pers. from (gil, pers. earth + chín, pers. china). Singh. means milk clay. Cf. Ghil arminy. Fine porcelain clay, derived from the decomposition of felspar [khauk i cheeny, mauvayiracull].

KAPOK (کپوک - kapuk, *Malay*). Fibre of Red-cotton tree.

KAR (کار - kár, *Hind.*). Work [car, caur, kri].——*Kardaur* (کاردار - kárdár, Hind.). From (above + dár, pers. holder). Manager [carbaury].——*Karkhana* (کارخانه - kárkhánah, Hind.). From (above + khánah, pers. house). A workshop, arsenal [caurgah].

KARAFS (अजमोदा - ajamódá, *Mahr.*; کرفس - karafs, *Ar.*; کرفش - karafsh, *Pers.*; اجمود - ájmúd, *Hind.*; اجمود اجوان - ájmúdahajwán, *Dec.*; சல்லரி - shallari, *Tam.*). Title from syriac through persian. Mahr. from (aja, san. goat + móda, san. smell) [ajmood, ajwaun]. Pers. from syriac. Dec. from (ajmúdá, hind. carum roxburghianum, benth. + ajwán, hind. ajowan, carum copticum, benth.). Tam. from english celery. Greek σέλινον. Title otherwise Celery, Small edge. Botanically Apium graveolens, linn., umbelliferæ [vricsham, 67]. Biennial; stem 1–8 feet, erect branched; peduncle 0–¼ inch, leaf-opposed; rays of the umbel five to ten, ½–1½ inches; ridges narrow, vittæ broad, occupying the whole breadth of the furrows; flower, smallish white. Root aromatic, bitter, acrid, aperient. When wild, poisonous; when cultivated, nutritious. The root and blanched petioles are used for food, have exciting qualities. Apium petroselinum, willd., is Parsley. For the carum genus, also called Ajmood in hindostany, see Ajmood.

KARANJ (नक्तमाल - naktamála, *San.*; करंज - karanja, *Mahr.*; कारिंजेर - karinjér, *Conc.*; کرنجه - karanjh, *Hind.*; کرنج - karanj, *Dec.*; ಹೊಂಗೆ - honge, *Can.*; ಪುಂಗು - pungu, *Too.*; కానుగ - kánuga, *Tel.*; କରଞ୍ଜ - koranja, *Oor.*; പുന്നു - punnu, *Mal.*; මගුල්කරඬ - magulkaranda, *Singh.*; புங்கு - pungu, *Tam.*). Title from sanscrit through hindostany. San. from (nakta, san. night + al, san. to decorate). Mahr. from (karañja, san. the plant). Conc., &c., like mahratta. Can. like tamul. Tel. means hard tree [caunooga]. Mal. from tamul. Singh. from (magul, singh. auspicious + karanda, singh. the plant, pongamia sp.). Tam. from (pon, tam. gold + agam, tam. inside); from yellow wood [caunooga, malabar poon]. San. also (karañja), meaning reddening water; (tamála), meaning liked, for shade [cassia cinnamon, ceylon gamboge, yellow mangosteen]; (dhanavriksha), meaning riches + tree, useful tree; (hastijá), meaning born of elephant, a large variety; (mátrivriksha), meaning mother tree; (karaja), meaning reddening water; (chiribilva), meaning curing long standing disease [roodrauck]. Can. also (huligilimara), meaning tiger + threatening + tree; (kanaga); (biti); (thodagatti); (pong). Tel. also (kránuga), meaning hard tree; (kaggera); (króvichettu). Mal. also (unnu), by corruption [variegated mountain ebony]; (mínnári), meaning fish-smelling. Tam. also (karunduvarai), meaning black + dalbergia; (tattaippungu), meaning flat + the tree, from flat pods. Title otherwise Caunooga, Indian beech, Poongam, Smooth-leaved pongamia, Woody dalbergia. Botanically Pongamia glabra, vent., leguminosæ [vricsham, 48]. Pongamia adaptation from tamul. Alias Dalbergia arborea; Dolichos arboreus; Gadelupa arborea, indica, pongam; Pongamia gadelupa; Robinia mitis. Leaves unequally pinnated; leaflets opposite, two to three pairs, ovate, acuminated, glabrous; racemes axillary, many-flowered, about half the length of the leaves; pedicels in pairs; vexillum with two callosities at the base of the limb and decurrent along the claw; legume oblong, nearly sessile, thick and somewhat woody, with a short recurved beak, tumid along both sutures; calyx cup-shaped, red; corolla papilionaceous, white. Erect

tree or climber abundant on banks of streams or near water; generally sheds its leaves at end of cold season; flowers mixture of white and purple produced in hot season; seed ripens towards end of year. Seed compressed, of the shape and size of a broad bean; testa thin, smooth, veined, light-red; cotyledons very oily, bitter. The bark has a thin ashy-grey outer layer, which readily peels off; when this is removed, the surface is seen to be green with white transverse marking; the substance of the bark is tough with a white granular fracture; odour mawkish; taste bitter and somewhat aromatic, with a peculiar pungency; starch and rhomboid crystals are observed under the microscope; the root bark is of a rusty-brown externally, yellow within. All parts of the plant when crushed afford a yellow juice. Poultice of leaves applied to ulcers; juice of root used as wash for sores; oil used medicinally for skin diseases. Leaves eaten by cattle; used as manure to fields. Oil used in lamps; gives fibre; gives also a thick, black, opaque gum [gond]; the dense foliage affords grateful shade. Wood light, tough and fibrous, coarse and even-grained, of light yellowish brown color, not easily worked nor giving a smooth surface; improved in strength and color by being seasoned in water; readily eaten by insects [poochy]. Compare where transl. is of first term:—Derris scandens (kodippungu), creeper; Sapindus trifoliatus (manippungu), bead; see gloss. paragraphs.

KARIVIA (കരിവിവള്ളി - karivivalli, *Mal.*). Meaning waste-land + creeper. Generic. Same as Rama's caper.

KARKAM (कर्क - karka, *San.*). From (kri, san. to injure). Hardness. Crab [carcam].——*Kakrasinghy* (कर्कटशृंगी - karkatashringí, San.; काकडाशिंगी - kákadashingí, Mahr.; کاکڑا سینگی - kákrásingí, Hind.; کاکڑ سنگی - kákarsingí, Dec.; కాకరశింగి - kákarashingi, Tel.; காக்கடசிங்கி - kákkadasingi, Tam.). San. from (karkata, san. crab + shringa, san. horn), from horn-like galls [red lac sumach]. Mahr., &c., from sanscrit. Tel. also (dushtupuchettu), meaning hair-knot plant [hedge cotton]. Title otherwise Crab's horn, Zebra-wood tree [indian zebra wood]. Botanically Pistacia [pistah] integerrima, stewart, anacardiaceæ [vricsham, 45]. Alias Rhus kakrasinghee, specific from hindostany. Nearly glabrous tree, 40 feet and upwards; leaves 6–9 inches, with or without a terminal leaflet; petiole terete, puberulous; leaflets sub-opposite, petiolulate, coriaceous, quite entire, base oblique; nerves many, arched; panicles lateral; male flower compact, pubescent; female flower lax, elongate; flowers pedicelled, with two ovate bracts; stamens five to seven, filaments short; anthers large, dark red; female flower, sepals four, linear, and bracts deciduous; style almost three-partite; drupe ¼ inch, broader than long, glabrous, rugose, grey. Has horn-like excrescences, formed by the deposition of the ova of an insect; these galls [mauchicoy] are generally single, but sometimes lobed, of a purse-like form, and vary much in size; the external surface is of a pale greenish grey, and has a fimbriated appearance; the taste is strongly astringent and slightly bitter; they are tonic, expectorant, and useful in cough, phthisis, asthma, fever, want of appetite, and irritability of stomach. Compound powder; take of the galls of pistacia integerrima, terminalia chebula [chebulic myrobalan], and pistacia terebinthus [turpentine pistah], and of fenugreek seeds [maitee] and cinnamon [q.v.] bark, all in powder and of each five ounces; opium [aphainam], in powder, one ounce; gum [gond] acacia [babool], in powder, six ounces; and prepared chalk [sheemay choonam], eight ounces; mix them well, pass the compound powder through a fine sieve, rub it lightly in a mortar and keep it in a stoppered bottle. Doses; of simple powder, from fifteen to thirty grains; of compound powder, from thirty to sixty grains. Substituted for gummi-rubrum, hæmatoxylum, krameria, pul. cretæ aromaticus cum opio, and pulv. ipecac. compositus. The wood is handsome, yellowish brown, darkly veined, hard, heavy, fine-grained, very durable, takes a good polish and is much esteemed for furniture, &c.——*Kakree* (ککڑی - kakrí, Hind.). From (karkatí, san. the plant). Same as Country melon.——*Kankar* (कर्कर - karkara, San.; کنکر - kankar, Hind.; کریکل - karikil, Malay; కంకర - kankara, Tel.; ചരൽ - charal, Mal.; பருக்கைக்கல் - parukkaikkal, Tam.). San. means hard. Tam. from (parukkai, tam. gravel + kal, tam. stone). Tam. also (shukkángal), meaning fragment + stone; (murambu); (shalli), meaning pieces. Otherwise Sookkaun. Indian gravel. A coarse kind of limestone [choonam cull] found in the soil. Material for road metal. There are two varieties, white and red. The white consists of carbonate of lime, silica, alumina, and sometimes magnesia and protoxide of iron. The red contains a large proportion of peroxide of iron. Kankar is sometimes found in thick stratified beds like the travertine near Rome, and seems in this case to have been formed by calcareous springs. More generally it is met with in clay [calimunn] or alluvial soil, in the shape of small pieces from the size of peas [calauyam] or filberts [finduk] to that of the hand. In the blue clay which stretches along the shores it is found in vast abundance, generally assuming the most fantastic forms; indeed it abounds in every rice [q.v.] field and open soil all over the country. The more recent varieties seem to be formed by the agency of the rains [mazhay]. When the earth abounds with vegetation, the tepid waters are charged with fixed air, and dissolve the lime [choonam] prevailing in the soil everywhere around, the mineral being again thrown down as the advancing season dispels the excess of gas. It in this state absorbs the clayey matter around and cements it into kankar. It contains usually about 70 per cent. of carbonate of lime, 2½ per cent. of carbonate of magnesia, a trace of oxide of iron, and 10 to 20 per cent. of sand and clay. Mixed with half its weight of river sand [manal], it makes an excellent mortar [cauray]. Burnt in pieces of a cubic inch or so in size, and then powdered without slaking, it forms a good water cement [pattoo], setting in a few minutes, and becoming as hard as stone. The finer varieties of kankar are burnt with charcoal [adoopp kary] all throughout the country, in neat pigmy-looking kilns [shoolay], 2½ feet high and about as much in diameter at the base. These hold about a cubic foot of material, or about 36 lb. of charcoal and kankar in equal parts. When burnt and slaked, it is then made up into bricks [shengal], which are sold in the bazaar [q.v.] for whitewashing. The following legend is told of several hillocks of white pebbles in different parts of the country. Two Raucshasans [q.v.], named Vautaupy and Ilvalan, lived there and were accustomed to feast foot travellers. Ilvalan first slew his younger brother Vautaupy, and then cooked him in pots [chatty], out of which he fed the traveller. The meal being finished Ilvalan called on his brother by name, who came forth alive, rending the guest, who died in consequence, and then both giants feasted on his body. Agastyan [q.v.] came by and was given the usual meal. On its being finished Ilvalan called his brother, but Agastyan took up the words, and a Sanscrit muntram [q.v.], in consequence of which the body of Vautaupy dissolved, and passed away without doing Agastyan any mischief. He then cursed Ilvalan who died. The bones of these two Raucshasans having fallen to pieces, and becoming petrified, are now present as white pebbles. The hills are really ancient kankar. Hard particles of matter of yellowish color found imbedded in sores on body of horse [ghorah], which break out in Bursauty [q.v.], are also called Kankar [jelly].

KARNAM (कर्ण - karna, *San.*). From (kri, san. to do), useful. Ear [carnam].——*Kankhajoor* (शतपदी - shatapadí, San.; اربع - arba, Ar.; هزار پا - hazárpá, Pers.; کنکھجور - kankhajúr, Hind.; ಜರಿ - jari, Can.; కాళ్లజెర్రి - kállajerri, Tel.; പൂരം - púram, Mal.; பூரான் - púrán, Tam.). Title from hindostany. San. from (shata, san. hundred + pada, san. foot). Ar. means forty. Pers. from (hazár, pers. thousand + pá, pers. foot). Hind. from (karna, san. ear + kharjúra, san. scorpion), as entering the ear. Can. from (jari, can. to slide). Tel. from (kálu, tel. leg + jerri, tel. worm). Tam. from (púra, san. full), as full of legs. Centipede [poochy].——*Kaniyaur* (कर्णिकार - karnikára, San.; کنیار - kaniyár, Hind.; మత్సకంద - mattsakanda, Tel.; வெண்ணங்கு - vennángu, Tam.). Title from hindostany. San. means resembling an earring [hemp bendy, tirauna]. Hind. from sanscrit. Tel. corruption from (muchukunda, san. the tree). Tam. from (ven, tam. white + nángu, tam. tree, polygala). Hind. also (katháchampá). Title otherwise Maple-leaved pterospermum. Botanically Pterospermum [moch coondam] acerifolium, willd., sterculiaceæ [vricsham, 26]. Alias Pentapetes acerifolia. Tree; leaves entire or coarsely toothed, usually more or less peltate, the underside covered with rough tomentum; pedicels axillary, much shorter than the petiole; involucel leaves very caducous; petals linear-revolute; capsule long, five-angled, covered with scurfy pubescence on the outside; flowers large white, fragrant; flowering from march to may. Dark brown timber as strong as teak [q.v.] or oak [belote].

KARTAIRY (ಕಾಟೇರಿ - kártéri, *Can.*). From (kádu, can. jungle + éri, can. bank).—"*a*" Village, Peak; Neilgherry district, Merkoonaud division; acres 1,454; lat. 11° 20′; long. 76° 46′; from Coonoor W. 5 miles; from Ootacamund S.S.E. 5 miles. A small but rising Badaga [q.v.] village which has sprung up on saddle to the south of the waterfall near junction of roads from Ootacamund, Coonoor, &c. Considerable trade in grain. Group of sculptured cromlechs [paundoocull] on an estate in the neighbourhood.—"*b*" River; Neilgherry dist., Merkoonaud division. Rises near Ootacamund. After flowing through the rich coffee-growing tract of Kartairy, at an elevation of about 6,000 feet, it descends upon the plains in a series of waterfalls near Kartairy village and finally falls into the Bhawauny near Mettapolliem in lat. 11° 20′ N. and long. 76° 47′ E. The principal waterfall is 180 feet in depth [aroovy].—"*c*" Coffee [q.v.] and cinchona [koinah] estates, Merkoonaud, Neilgherries. Below the waterfall. 170 acres.

KARY (अङ्गार - angára, *San.*; कोळसे - kólasé, *Mahr.*; فحم - fahm, *Ar.*; زغال - zughál, *Pers.*; کوئلہ - koilah, *Hind.*; کولسا - kolsá, *Dec.*; ارڠ - aráng, *Malay*; ಇದ್ದಲು - iddalu, *Can.*; ಮಜಿ - maji, *Too.*; బొగ్గు - boggu, *Tel.*; കരി - kari, *Mal.*; අඟුර - angura, *Singh.*; கரி - kari, *Tam.*). Title from tamul. San. from (agni, san. fire). Tam. from (kari, tam. to be burnt). Tel. also (poyiboggu), meaning hearth + charcoal. Mal. also (muttikkari), meaning wood + charcoal. Carbon of chemists. Elementary combustible substance, existing pure and crystallized in the diamond [vajram]. The following are the three kinds of Kary. Carbonic acid is Karipoolipp. For Carbonates see Choornam.——*Adoopp kary* (काष्ठाङ्गार - kásht'hángára, San.;

लकडीकोळसे - lakadíkólasé, Mahr.; فحم الخشب - fahmulkhashb, Ar.; زغال چوبی - zughálichobí, Pers.; کوئلا - koelá, Hind.; کولسا - kolsá, Dec.; ارڠ بارا - arángbara, Malay; ಕಟ್ಟಿಗೆ ಇದ್ದಲು - katti-geiddalu, Can.; - kanakumaji, Too.; కట్టె బొగ్గు - katte-boggu, Tel.; അടുപ്പുക്കരി - atuppukkari, Mal.; - lipaangura, Singh.; அடுப்புக்கரி - aduppukkari, Tam.). Title from tamul. San. from (kásht'ha, san. wood + angára, san. charcoal). Mahr. from (lakadí, mahr. wood + kólasé, mahr. charcoal). Ar. from (fahm, ar. charcoal + khashb, ar. wood). Pers. from (zughál, pers. charcoal + chob, pers. wood). Malay from (aráng, malay, charcoal + bara, malay, live coal). Can. from (kattige, can. firewood + iddalu, can. charcoal). Too. from (kanaku, too. fuel + maji, too. charcoal). Tel. from (katte, tel. firewood + boggu, tel. charcoal). Singh. from (lipa, singh. hearth + angára, san. charcoal). Tam. from (aduppu, tam. hearth + kari, tam. charcoal). Wood charcoal. Carbo ligni of chemists. Artificial coal; consisting of wood charred by exposure to a red heat without access of air; in black brittle porous masses without taste or smell, very light, and retaining the shape and texture of the wood from which it was obtained; easily pulverized; when burned at a high temperature with free access of air, it leaves not more than two per cent. of ash. Manufactured as follows; firewood is cut in the forest and piled in a heap; the heap is then set on fire, and allowed to burn well; when it ceases to burn with a blaze, and burns only with a small flame, the heap is covered 2 inches thick with earth or sand, so that the flame does not penetrate the covering; it is left in that condition for a whole night; when it has cooled, the charcoal is raked out with a long pole. That from particular trees is best suited for particular purposes; goldsmiths [tattaun] in the south prefer it from biswool [q.v.] and tungaid [q.v.]; blacksmiths [collan] in the northern circars [q.v.] take it from sundra [q.v.]; in the south they take it from babool [q.v.] tamarind [q.v.] and satin-wood [q.v.]; for pharmaceutical purposes, that of the shrub yercum [q.v.] is always employed; gunpowder requires charcoal from woods of a hard close grain. Medicinally wood charcoal is antiseptic, deodorizing, and disinfectant; for purifying water an effectual plan is to boil it with a large-sized piece of freshly prepared wood charcoal; also forms an excellent filter, placed in alternate layers with river sand [manal]; charcoal, especially that of the areca [q.v.], forms the best tooth-powder. In the absence of coal [nilakary] all ore-smelting and other processes are dependent on wood charcoal, as well as the goldsmiths' and various other ornamental and useful trades; also used as a common domestic fuel [lukdy]; also in the manufacture of gunpowder.——*Nilakary* (నేల బొగ్గు - nélaboggu, Tel.; കല്ക്കരി - kalkkari, Mal.; நிலக்கரி - nilakkari, Tam.). Title and tam. from (nilam, tam. earth + kari, tam. charcoal). Tel. from (néla, tel. earth + boggu, tel. charcoal). Mal. from (kal, mal. stone + kari, mal. charcoal). Tam. also (vilaigari), meaning natural charcoal. Coal. Result of the mineralization of vegetable remains. That is to say vegetable tissue converted into a substance proportionally poorer in water and volatile ingredients, and richer in carbon. The different kinds are brown coal, pitch or just coal, glance or anthracite coal [cullcary], and others. Lignite is fossil wood, carbonised and altered, but still containing a much larger proportion of volatile ingredients than true coal. ——*Yeloomboo kary* (अस्थ्यङ्गार - ast'hyangára, San.; هڈی کا کوئلا - haddíkákoelah, Hind.; ہڈ کا کولسا - hadkákolsá, Dec.; ಎಲುವಿದ್ದಲು - eluvuiddalu, Can.; ఎముక బొగ్గు - emukaboggu, Tel.; അസ്ഥിക്കരി - ast'hikkari, Mal.; எலும்புக்கரி - elumbukkari, Tam.). Title and tam. from (elumbu, tam. bone + kari, tam. charcoal). San. from (ast'hi, san. bone + angára, san. charcoal). Tel. from (emuka, tel. bone + boggu, tel. charcoal). Mal. from (ast'hi, san. bone + kari, mal. charcoal). Animal charcoal. Otherwise Bone ash, Bone black, Ivory black. Carbo animalis of chemists; alias Os ustum. The residue of bones which have been burned to a white ash in contact with air. Consists chiefly of phosphate of lime, with some carbonate of lime, &c. Is deodorizing and antiseptic. Employed as an antidote in poisoning cases.

KASR (کسر - kasr, *Hind.*). From (kasara, ar. to exceed). Surplus, profit in the exchange of coins [naunyam].

KATAY (कथा - kat'há, *San.*; کتھا - kathá, *Hind.*; கதை - kathai, *Tam.*). From (kat'h, san. to relate). The following is a fair specimen of a Tamul story of the extended class. Veera dhooranḍhara rajah ruled in Vijianugger [q.v.]. He had a muntry [q.v.] named Tatwa pracausha pillay. One day when the king, accompanied by his minister, went out to hunt in the forest, he came to a spring of water named the looking-glass, near which was a writing cut in a stone to the effect that the king who listened to the counsels of his minister would perish. The king consulted with his minister concerning the writing. The minister took counsel within himself, that his own life was in danger. In order therefore to avert such a result, he seized the king, threw him into the spring, and returning to the city usurped the kingdom. The late king's wife Chinnamma devy privately made her escape, being pregnant, went to Chundragherry, and there subsisted in a miserable manner by gathering and selling firewood. The king of Chundragherry designing evil towards her, she left that place, and went to Arsanaupoory where a native chief named Ragha sing treated her hospitably and had a small cottage built for her reception. A child was born to her named Veeramauran. This child, being well instructed, early distinguished himself by killing a tiger [pooly]. Next come in the story details of a literary or poetical contest with the daughter of Veeraraman, king of Cosala [q.v.] desham; by skill in which contest Veeramauran gained her in marriage. These literary disputations are never-ending themes with the story-tellers. The forces of the father being now at the prince's disposal he with them dispossessed and killed the usurping muntry, and then proceeded to the place where his own father had been made away with. He there offered a great sacrifice, as the result of which the celestials [deva] descended and brought with them his father restored to life, who remained with his son while the latter ruled the kingdom.——*Katah munjary* (कथामञ्जरी - kat'hámañjarí, San.). From (above + mañjarí, san. series). A book of fables in Tamul by Villapaukam taundavaroya moodelliar teacher in the College of Fort St. George, Madras. Modern text-book.——*Katah sangraham* (कथासंग्रह - kat'hásangraha, San.). From (above + samgraha, san. collection). Canarese selections. A modern compilation.——*Katah sarit saugaram* (कथासरित्सागर - kát'hásaritságara, San.). Means ocean of rivers of stories. A large collection of tales compiled from Brihat katay [q.v.] by Somadeva bhatt of Cashmere about the commencement of twelfth century. For a smaller collection of tales see Punchatantram.

KATCHAY (कक्ष - kaksha, *San.*; کاچھا - káchhá, *Hind.*; ಕಚ್ಚೆ - kaççe, *Can.*; കച്ച - kaçça, *Mal.*; கச்சை - kaççai, *Tam.*). From (kach, san. to bind). Waist belt; the end of any lower garment gathered up behind and tucked into the part that girds the waist.

KATCHER (वेसर - vésara, *San.*; بغل - baghl, *Ar.*; استر - astar, *Pers.*; کھچر - khaççar, *Hind.*; ಹೇಸರಕತ್ತೆ - hásarakatte, *Can.*; కంచరగాడిదె - kantsaragádide, *Tel.*; കോവർകഴുത - kóvarka-zhuta, *Mal.*; கோவேறுகழுதை - kóvérugazhuthai, *Tam.*). Title from hindostany. San. from (véga, san. rapidity + sri, san. to go). Ar. from (baghula, ar. to affect stupidity). Hind. from sanscrit. Can. from (sanscrit + katte, can. ass). Tel. from (kantsaramu, tel. a sort of carriage + gádide, tel. ass). Tam. from (kó, tam. king + éru, tam. to ride + kazhuthai, tam. ass). Can. also (khachara). The mule; offspring of female horse [ghorah] and male ass [gadhah].

KATEERAH (कतेर - katéra, *Mahr.*; كثيرا - kasírá, *Ar.*; کتیرا - katerá, *Pers.* and *Hind.*; کتیرا گوند - katerágond, *Dec.*; ಬಾದಾಮಿ ಗೋಂದು - bádámigóndu, *Can.*; ಬಾದಾಮಿಅಂಟು - bádámiantu, *Too.*; బాదంబంక - bádambanka, *Tel.*; வாதுமைக்கொட்டைப் பிசின் - váthumaikkottaippisin, *Tam.*). Title from arabic. Can. from (bádámi, can. almond + góndu, can. gum). Tel. from (bádamu, tel. almond tree, prunus amygdalus, baill. + banka, tel. gum). Tam. from (váthumaikkottai, tam. almond + pisin, tam. gum). Ar. also (samaghimiswákulabbás), meaning gum of red tooth-brush tree; (samaghulkattád), meaning gum of the tragacanth tree. Pers. also (samaghikon), meaning gum of astragalus verus, oliv. Title otherwise Bandam gum, Gum dragon to be distinguished from Dragon's blood, Gum of almonds, Gum tragacanth, Tragacanth, True milk vetch, True tragacanth. Product of Astragalus verus, oliver, leguminosæ [vricsham, 48]. Gummy exudation from the stem [gond]; is pale, yellowish or reddish, semi-transparent, smooth, horny, light, brittle, of every shape, in compressed or twisted fragments, often straight, or in vermicular tears, inodorous, tasteless, and unalterable by time; in water it swells very much, and forms a soft mucilage; occasionally found in bazaars [q.v.], brought from alexandria by red sea; more costly than gum arabic [q.v.]. Gives to pharm. tragacantha, emollient and demulcent; ingredient for imparting firmness to lozenges and pill masses. Used in the arts as a substitute for glue [vajram]; also in dyeing [shauyam]. The following gums are used as substitutes for kateerah:—Cochlospermum gossypium, dec., bixineæ [golden silk cotton]; Sterculia urens, roxb., sterculiaceæ [false kateerah]; Prunus amygdalus, baill., rosaceæ [baudam]; hog tragacanth [hog gum], imported from Persia. For sarcocolla of the astragalus genus see Anzeroot.——*Almond kateerah* (بادام کتیرا - bádamkatírá, Hind.). Product of Baudam or bitter almond.——*Babool kateerah* (ببول کتیرا - babúlkatírá, Hind.). Product of Velvail.——*False kateerah* (कावली - kávalí, Mahr.; بلی - balí, Hind.; ಕೆಂಪುದಾಳೆ - kempudále, Can.; - kavile, Tel.; வெள்ளைப்பூத்தாளி - vellaippúttáli, Tam.). Can. from (kempu, can. red + táli, can. borassus flabelliformis, linn.). Tam. from (vellai, tam. white + pú, tam. flower + táli, tam. borassus flabelliformis, linn.); from soft white wood. Hind. also (guler), meaning wild fig [cluster fig]; (katírá) [golden silk cotton, kateerah]. Tel. also (errapuniki), meaning red + gyrocarpus jacquini, roxb.; (tanukumánu); (tabase); (kondatámara), meaning hill + lotus, nelumbium speciosum, willd. [oval-leaved china root]. Title otherwise Country tragacanth, False traga-

canth. Botanically Sterculia [cauvalam] urens, roxb., sterculiaceæ [vricsham, 26]. Alias Cavallium urens; cavallium from malayalam [cauvalam]. Tree; leaves palmately five-lobed, soft, velvety beneath, lobes acuminate, entire; calyx campanulate; panicles terminal; carpels ovate, hispid, with rigid bristly hairs, pubescent within; seeds several in each carpel; flowers small, yellow; flowering in the cold season. Trunk erect, very straight, top large and shady, bark light ash-colored, very smooth; deciduous in cold weather, flowers appear before the leaves; native of coromandel, but common everywhere. The bark yields a gum [gond] resembling tragacanth, and formerly substituted for it; this occurs in large light brown transparent tough masses which immersed in water swell like a jelly, but do not dissolve except by protracted boiling; the solution is not adhesive; the bark is very astringent, and tinges the saliva reddish; leaves and tender branches steeped in water yield a mucilaginous extract; fruits or rather capsules contain each from three to five oblong, chestnut-colored seeds. Gum used in medicine; seeds cathartic; extract from branches is useful in pleuropneumonia in cattle. Seeds roasted and eaten with chestnut flavor; kind of coffee [q.v.] made from them; gum used in making sweetmeats [halwah]. Liber yields a good fibre. Native zithers and toys made of the wood [moochee wood], which is soft and spongy.——*Indian kateerah* (هندی کتیرا - hindíkatírá, Hind.). Product of Golden silk cotton.

KAUMIL (کامل - kámil, *Hind.*). From (kamala, ar. to be complete). Complete. So standard assessment [jumma kaumil]. Also the whole sum raised by a village for the total of its expenses, including the Government demand. See vol. I, 112.

KAV (कव् - kav, *San.*). To paint, to describe.——*Kavay* (कवयी - kavayí, San.). Means clever. Palmyra fish.——*Kavy* (कवि - kavi, San.). From (kav, san. to describe). Means poet [cavy]. Title of the rulers of Calyaunapooram [q.v.]. Cherma permaul made Kavy simha royer of Calyaunapooram chief ruler of Tooloovam [q.v.].——*Kawy* (کوی - kawí, Hind.). Literally narrative. The ancient language of Java [q.v.] and Baly [q.v.]. In Baly it is still the language of law and religion, as it was in Java until the adoption of the Mahomedan religion in the fifteenth century.

KAVACHAM (कवच - kavacha, *San.*). Armour [vurman].——*Kavachiny* (कवचिनी - kavachiní, San.; گهونگا - ghúngá, Hind.; ಚಿಪ್ಪುಹುಳ - chippuhula, Can.; గుల్లపురుగు - gullapurugu, Tel.; ഓട്ടമത്സ്യം - óttumatsyam, Mal.; ஓட்டுமீன் - óttumín, Tam.). Title from sanscrit. San. from (kavacha, san. armour); from crust-like shell covering body and legs. Hind. from (kambuka, san. shell). Can. from (chippu, can. shell + bula, can. worm). Tel. from (gulla, tel. shell + purugu, tel. worm). Mal. from (ótu, mal. shell + matsya, san. fish). Tam. from (ódu, tam. shell + mín, tam. fish). Crustaceans generally [iraul, nundoo, taurahmatsyam]. Crabs, cray fish and prawns are regularly collected as food; generally caught in lagoons [cauyal] or fresh water lakes; there are some land-crabs.

KAVIKAH (کویکا - kaviká, *Hind.*). Same as Malacca jaumoon.

KAWAH (قهوه - kahwah, *Hind.*). Same as Coffee [q.v.].

KAYA (کایا - kaya, *Malay*). Wood.——*Kayoo manis* (کیومنس - kayúmanis, Malay). From (kayú, malay, wood + mains, malay, sweet). Cinnamon.

KAYAM (കയം - kayam, *Mal.*). From (kasi, tam. to ooze). Deep pool in a river [casham, madoogoo]. Suffix in river names; as Anakkayam, meaning elephant + deep pool.

KECHWAH (भूनाग - bhúnága, *San.*; خراطين - kharátín, *Ar.* and *Pers.*; کیچوا - kechwah, *Hind.* and *Dec.*; چچینگ - chaching, *Malay*; ಮಣ್ಣುಹುಳ - mannuhula, *Can.*; నక్కురు - nakkuru, *Too.*; ఎఱ్ఱ - erra, *Tel.*; ഞാഞ്ഞൂൽ - ñáññúl, *Mal.*; நாக்குப்பூச்சி - nákkuppúçci, *Tam.*). Title from deccany. San. from (bhú, san. earth + nága, san. serpent). Ar. from (khará, ar. worm + tín, ar. earth). Hind. from (kiñchilika, san. earth-worm). Can. from (mannu, can. earth + hula, can. insect). Tel. means red. Mal. from (nánguzhu, tam. belly worm). Tam. from (nángu, tam. to shrink + púçci, tam. insect); from shrinking when moving. Earth-worm. For worms generally see Keerah.

KEDAMANAIR (కేదామన్నేరు - kétámannéru, *Tel.*). From (géde, tel. buffalo + mannu, tel. sand + éru, tel. river). River; Nellore dist., Atmacore and Oodayagherry tals. Rises in the Eastern ghauts [q.v.] near Dornaul pass, and falls into the Anantasaugaram tank [aroovy].

KEDAURAM (केदार - kédára, *San.*). From (ka, san. water + dhri, san. to hold) [cam]. A particular part of the Himalayas. Called also Kedaurnath in Garhwal. Has a shrine dedicated to Shiva [q.v.] and a lingam considered one of twelve [lingam].——*Kedaura gowry vratam* (కేదారగౌరీవ్రతము - kédáragaurivratamu, Tel.). From (above + gaurí, san. párvatí, the brilliant goddess + vrata, san. vow); vow to parvaty. Lunar [chaundramaunam] festival [pundigay, 6b], subject to intercalation [adhicam]. Occurs at new moon [amavausyay] of seventh lunar month Aushweejam [mausam] between 15th October and 14th November. One of the three great feasts, which after once celebrated obliges the person to continue the celebration every year [ananta chatoordashy, vara lutchmy vratam]. Women worship Parvaty [q.v.] in their houses, and ask for offspring. Those who keep it observe the demi-fast and tie a yellow string on their right arm. Different from Gowry vratam [q.v.].——*Kedauran* (केदार - kédára, San.). Epithet of Shiva [q.v.].——*Kedaura vanam* (केदारवन - kédáravana, San.). From (above + vana, san. forest). A waste place in the neighbourhood of any town, where a stone lingam [q.v.] is placed.

KEDDY (କେଡ଼ି - keddi, *Oor.*). Meriah [q.v.] sacrifice.

KEDGEREE (کهچڑی - khichrí, *Hind.*). Otherwise Kitcherry. A mess of rice [q.v.] cooked with butter [q.v.], dholl [common dholl], and flavored with spice, shred onion [piyauz], &c.

KEEKAR (کیکر - kíkar, *Hind.*). Acacia [cantalam].

KEEL (قير - kír, *Ar.*; کیل - kíl, *Pers.*, *Hind.* and *Dec.*; ಕೀಲು - kílu, *Can.*; ತಾರು - táru, *Too.*; తారు - táru, *Tel.*; കീൽ - kíl, *Mal.* and *Singh.*; கீல் - kíl, *Tam.*). Ar. also (difl). Pers. also (kitrán). Tam. also (kisil). Tar. Pix liquida of chemists. Obtained by burning pine and fir trees in a close smothering heap, with a channel through which the tar exudes [dammer, zift]. For pitch see Zift.

KEEL (കീഴ് - kízh, *Mal.*; கீழ் - kízh, *Tam.*). Below, or east. Suffix in place names; as Cherankeel, meaning village below the tank. Prefix in place names; as in Keelcherry, meaning eastern village.——*Keelakaray* (கீழக்கரை - kízhakkarai, Tam. kílakarai*). From (kízh, tam. east + karai, tam. coast). Town, Port; Madura dist., Ramnaud zemindarry tal.; pop. 12,396; lat. 9° 14′; long. 78° 50′; from Madras S.S.W. 280 miles; from Madura S.E. 66 miles; from Moottoopett W.S.W. 10 miles; from Ramnaud S.S.W. 10 miles; from Yervaudy E. 5 miles. On the Gulf of Manaar. Chiefly inhabited by Mussalmans. The houses and granaries are finely built on the shore. Small Roman catholic church, contiguous to which are ruins of a Dutch factory. Several Mussalman mosques [musjid] and tombs [gor]. Ancient Shiva temple built by Varagoona paundyan. Thick groves of palmyra [q.v.] trees. Large trade in pathaneer [q.v.], which Mussalmans drink, and in manufacture of fine and coarse long cloths. The port has upwards of 100 boats. The coast abounds with low rugged rocks, which are only seen above water at low tide.——*Keel goottagay* (கீழ்க்குத்தகை - kízhkkuttagai, Tam.). Sub-tenure, under-contract.——*Keel maday* (கீழ்மடை - kízhmadai, Tam.). From (above + madai, tam. channel). Land most distant from the sluice [maday].——*Keelpaloovore* (கீழ்ப்பழுவூர் - kízhappaluvúr, Tam. kílpaluvúr*). From (kízh, tam. east + pazhu, tam. banyan tree, ficus bengalensis, linn. + úr, tam. village). Sanscrit name (vatavana), meaning banyan tree, ficus bengalensis, linn. + forest.—"*a*" Deputy tahsildarry, Trichinopoly district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station, General deputy collector's division; Trichinopoly dist., Oodayarpolliem tal.; pop. 2,219; acres 3,814; lat. 11° 03′; long. 79° 08′; from Ariyalore S. 7 miles; from Jayancondacholapooram S.W. 23 miles; from Laulgoody N.E. 21 miles; from Madras S.S.W. 160 miles; from Moosiry E. 41 miles; from Oodayarpolliem S.W. 19 miles; from Shreerungam E.N.E. 28 miles; from Trichinopoly E.N.E. 29 miles. Good camping ground. Former head-quarters of talook [q.v.]. Deputy tahsildar [q.v.] transferred from Rajendraputnam in 1873. Old Shiva temple elaborately sculptured and with a Chola inscription.——*Kelamungalam* (ಕೆಳಮಂಗಲ - kelamangala, Can.). From (kéla, can. underneath + mangala, san. prosperity); from its hollow situation. Village; Salem dist., Oossoor tal.; pop. 2,277; acres 1,297; lat. 12° 36′; long. 77°; from Oossoor S. 9 miles; from Salem N.N.W. 68 miles. In a hollow near the crossing of the roads to Dencanicottah, Oossoor and Royacottah. Good camping-ground. Frequently mentioned in the wars with Mysore. The weekly fair is the largest in the district. Large trade in grain and oil-seeds [yennay]. Cloths are manufactured.——*Kilanelly* (கீழாநிலை - kízhánilai, Tam.). From (kízh, tam. low + nilai, tam. site). Village; Trichinopoly dist., Foodoocottah state; lat. 10° 10′; long. 78° 54′; from Ariyalore S.S.W. 67 miles; from Madras S.S.W. 219 miles; from Moosiry S.S.E. 60 miles; from Poodoocottah S.E. 14 miles; from Shreerungam S.S.E. 49 miles; from Trichinopoly S.E. 45 miles; from Trimayam S.E. 9 miles. Fort of local importance. Made over in 1830 by Clive to the rajah as a reward for his fidelity to British government. Temple dedicated to Arya nautchy amman. On south bank of Pambaur.——*Kizhakk* (கிழக்கு - kizhakku, Tam.). From (kízh, tam. downward). East.

KEENA (කීන - kína, *Singh.*). Nut of Small poon.

KEERAH (कृमि - krimi, *San.*; कीड - kída, *Mahr.*; دود - dúd, *Ar.*; کرم - kirm, *Pers.*; کیرا - kírá, *Hind.* and *Dec.*; ಹುಳ - hula,

Can.; ಪುರಿ - puri, Too.; పురుగు - purugu, Tel.; പുഴു - puzhu, Mal.; කීට - kíta, Singh.; புழு - puzhu, Tam.). Title from hindostany. San. from (kram, san. to move) [cramam, craunty]. Mahr. from (kíta, san. worm). Pers. from sanscrit. Hind. from (kíta, san. worm). Tel. from (pulaka, san. insect). Singh. from (kíta, san. worm). Worm. Any insect without wings [poochy]. For earth-worms see Kechwah.

KEERAM (कीर - kíra, San.). From (kí, san. the sound + rá, san. to give); imitative word. Psittacidæ family, scansores, insessores, aves [pacshy, 12], of naturalists [jantoo]. Parrots. Divided into sub-families as follow:—Psittacinæ, or true Parrots; Loriinæ or lories [lory]; Palæorninæ or parrakeets [totah]; Platycercinæ, or australian parrakeets; Arainæ or maccaws; Cacatuinæ, or cockatoos of australia.

KEERAY (शाक - sháka, San.; بهاجی - bhájí, Hind.; ಪಲ್ಯ - palya, Can.; కూర - kúra, Tel.; ചീര - chíra, Mal.; கீரை - kírai, Tam.). Terms synonymous with greens of all sorts. Most greens are made by natives into curries [q.v.] and other dishes. Some are made into decoctions [kwautam] or teas [q.v.]. A description of all the plants eaten as vegetables by natives would include nearly the whole of the weeds, except those absolutely poisonous, that are to be met with in the country. The following however are two key-lists of the most common culinary vegetables indigenous or introduced for which vernacular names are known. Further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"a" Achyranthes aspera, indian burr; Ærua lanata, woolly ærua; Æschynomene aspera, solah; Agaricus campestris, mushroom; Allium cepa, onion; Allium sativum, garlic; Amarantus atropurpureus, red spinach; Amarantus blitum, var. oleraceus, common spinach; Amarantus campestris, field spinach; Amarantus gangeticus, garden spinach; Amarantus paniculatus, brown spinach; Amarantus spinosus, thorny spinach; Amarantus tenuifolius, wild spinach; Amarantus viridis, stunted spinach; Amorphophallus campanulatus, telinga potato; Anisochilus carnosus, country lavender; Apium graveolens, celery; Artocarpus integrifolia, bread-fruit; Bambusa arundinacea, common bamboo; Bambusa stricta, male bamboo; Basella cordifolia, heart-leaved malabar night-shade; Basella rubra, red malabar night-shade; Basella rubra, var. alba, white malabar night-shade; Bauhinia purpurea, purple mountain ebony; Bauhinia vahlii, large mountain ebony; Benincasa cerifera, wax gourd; Beta vulgaris, indian beet; Bœrhaavia repens, var. diffusa, spreading hog-weed; Bombax malabaricum, red-cotton tree; Borassus flabelliformis, palmyra; Brassica alba, white mustard; Brassica campestris, sub-sp. campestris, colza; Brassica campestris, sub-sp. rapa, turnip; Brassica oleracea, cabbage; Canavalia ensiformis, hussar bean; Canthium parviflorum, thorny webera; Capparis aphylla, common caper; Capparis zeylanica, ceylon caper; Capsicum annuum, common chilly; Capsicum frutescens, shrubby chilly; Capsicum minimum, bird's eye chilly; Carica papaya, papaw; Carthamus tinctorius, safflower; Cassia sophera, stinking casondy; Cassia tora, chakondah; Cephalandra indica, indian caper; Citrullus vulgaris, sweet water melon; Cocos nucifera, cocoanut; Commelyna communis, calf's grass; Corchorus olitorius, wild jute; Coriandrum sativum, coriander; Cucumis melo, common melon; Cucumis sativus, common cucumber; Cucumis trigonus, country cucumber; Cucurbita maxima, great pumpkin; Cucurbita ovifera, vegetable marrow; Curcuma longa, turmeric; Cyamopsis psoralioides, chinese lablab; Cynodon dactylon, hurrially; Daucus carota, carrot; Dillenia indica, chaltah; Dioscorea aculeata, goa potato; Dioscorea alata, wing-stalked yam; Dioscorea globosa, humped yam; Dioscorea pentaphylla, five-leaved yam; Dioscorea purpurea, pondicherry yam; Dioscorea sativa, common yam; Dolichos lablab, country bean; Dregea volubilis, nakchiknee silk cotton; Emilia sonchifolia, hare's ear; Ficus glomerata, cluster fig; Ficus racemosa, country fig; Flacourtia ramontchi, var. sapida, ceylon plum; Fœniculum vulgare, indian fennel; Gisekia pharnaceoides, sand greens; Gynandropsis pentaphylla, dog mustard; Helmia bulbifera, malacca yam; Hibiscus cannabinus, hemp bendy; Hibiscus esculentus, common bendy; Hibiscus sabdariffa, red hemp bendy; Hydrocotyle asiatica, indian pennywort; Ipomæa aquatica, creeping bind-weed; Ipomæa batatas, sweet potato; Ipomæa reniformis, rat's ear; Ipomæa sepiaria, laldanah; Lactuca scariola, var. sativa, lettuce; Lagenaria vulgaris, bottle gourd; Lepidium sativum, cress; Leucas indica, wild toombay; Luffa acutangula, common luffa; Luffa ægyptiaca, oil-giving luffa; Lycopersicum esculentum, tomato; Mangifera indica, mango; Manihot utilissima, tapioca; Mentha piperita, peppermint; Mentha viridis, spearmint; Meriandra bengalensis, bengal sage; Momordica charantia, balsam apple; Morinda umbellata, small ach root; Moringa pterygosperma, indian horse radish; Mucuna nivea, white cowitch; Murraya kœnigii, curry-leaf tree; Musa paradisiaca, plantain; Mussænda frondosa, moossanda; Nasturtium officinale, water cress; Nelumbium speciosum, sacred lotus; Nymphæa lotus, red indian water-lily; Ocimum basilicum, sweet basil; Ocimum sanctum, var. hirsuta, rough basil; Origanum vulgare, marjoram; Oxalis corniculata, sorrel; Pandanus odoratissimus, screw-pine; Pteroselinum sativum, parsley; Peucedanum graveolens, dill; Phaseolus adenanthus, wild green gram; Phaseolus lunatus, country french bean; Phaseolus vulgaris, french bean; Phyllanthus emblica, emblic myrobalan; Pisum sativum, garden pea; Portulaca oleracea, indian purslane; Portulaca quadrifida, small indian purslane; Premna integrifolia, moonnay; Raphanus sativus, country radish; Rothia trifoliata, jackal green gram; Rumex vesicarius, country sorrel; Sesbania grandiflora, west-indian sesban; Solanum melongena, brinjaul; Solanum nigrum, indian hound's berry; Solanum torvum, hill shoonday; Solanum trilobatum, prickly shoonday; Solanum tuberosum, potato; Solanum verbascifolium, shoonday; Spinacia oleracea, garden spinach; Spondias mangifera, hog plum; Suæda indica, indian salt-wort; Tamarindus indica, tamarind; Trianthema monogyna, shauranay; Tribulus terrestris, land caltrops; Trichodesma indicum, donkey toombay; Trichosanthes anguina, common snake gourd; Trichosanthes dioica, palwal snake gourd; Trigonella fœnum-græcum, fenugreek; Vicia faba, broad bean; Vigna catiang, cow gram; Vitis quadrangularis, piranday; Zea mays, maize; Zingiber officinale, ginger; Zizyphus jujuba, bair.—"b" Ach root, morinda; Bair, zizyphus; Balsam apple, momordica; Bamboo, bambusa; Basil, ocimum; Bean, dolichos, vicia; Beet, beta; Bendy, hibiscus; Bind-weed, ipomæa; Bread-fruit, artocarpus; Brinjaul, solanum; Burr, achyranthes; Cabbage, brassica; Calf's grass, commelyna; Caltrops, tribulus; Caper, capparis, cephalandra; Carrot, daucus; Casondy, cassia; Celery, apium; Chakondah, cassia; Chaltah, dillenia; Chilly, capsicum; Cocoanut, cocos; Colza, brassica; Coriander, coriandrum; Cowitch, mucuna; Cress, lepidium; Cucumber, cucumis; Curry-leaf tree, murraya; Dill, peucedanum; Fennel, fœniculum; Fenugreek, trigonella; Fig, ficus; French bean, phaseolus; Garlic, allium; Ginger, zingiber; Gourd, lagenaria; Gram, phaseolus, rothia, vigna; Hare's ear, emilia; Hog plum, spondias; Hog-weed, bœrhaavia; Horse radish, moringa; Hound's berry, solanum; Hurrially, cynodon; Hussar bean, canavalia; Jute, corchorus; Lablab, cyamopsis; Laldanah, ipomæa; Lavender, anisochilus; Lettuce, lactuca; Lotus, nelumbium; Maize, zea; Mango, mangifera; Marjoram, origanum; Melon, cucumis; Moonnay, premna; Mountain ebony, bauhinia; Mustard, brassica, gynandropsis; Mushroom, agaricus; Myrobalan, phyllanthus; Night-shade, bassella; Onion, allium; Palmyra, borassus; Palwal, trichosanthes; Papaw, carica; Parsley, pteroselinum; Pea, pisum; Pennywort, hydrocotyle; Peppermint, mentha; Piranday, vitis; Plantain, musa; Plum, flacourtia; Potato, amorphophallus, dioscorea, ipomæa, solanum; Pumpkin, cucurbita; Purslane, portulaca; Radish, raphanus; Rat's ear, ipomæa; Red cotton, bombax; Safflower, carthamus; Sage, meriandra; Saltwort, suæda; Sand greens, gisekia; Screw-pine, pandanus; Sesban, sesbania; Shauranay, trianthema; Shoonday, solanum; Silk cotton, dregia; Snake gourd, trichosanthes; Solah, æschynomene; Sorrel, oxalis, rumex; Spearmint, mentha; Spinach, amarantus, spinacia; Tamarind, tamarindus; Tapioca, manihot; Tomato, lycopersicum; Toombay, leucas, trichodesma; Turmeric, curcuma; Turnip, brassica; Vegetable marrow, cucurbita; Water cress, nasturtium; Water-lily, nymphæa; Water melon, citrullus; Wax gourd, benincasa; Webera, canthium; Yam, dioscorea, helmia.

KEERTY (कीर्ति - kírti, San.). From (krít, san. to mention). Fame. Common in royal names [peyar].——Keertanay (கீர்த்தனை - kírttanai, Tam.). From (krít, san. to praise). A species of Tamul verse. It consists of four stanzas, the first of which is preceded by a short intercalary line which is repeated before each of the others. It is reckoned a lower order of poetry, and is much used in dramatic composition.——Keerty lutchmy (कीर्तिलक्ष्मी - kírtilakshmí, San.). From (above + lakshmí, san. the goddess). The goddess of fame [ashta lutchmy].

KEET (கீற்று - kíttu, Tam.). From (kíru, tam. to split). Line. Half of a cocoanut [q.v.] leaf, generally plaited for thatching and screening [cadjan].——Keet naumam (கீற்று நாமம் - kíttunámam, Tam.). From (above + námam, tam. vaishnava mark). Veishnavite tridental mark [naumam].

KEEYAH (قیاس - kiyás, Hind.). From (kása, ar. to compare). Means analogy. Conclusions drawn by analogy from the Koran [q.v.], the traditions [hadees], and the Ijmah [q.v.].

KEI (ಕೈ - kai, Can.; చె - kai, Tel.; കൈ - kai, Mal.; கை - kai, Tam.). From (shey, tam. to do); cf. chey. Hand [caram, hastam].——Kei badil (ಕೈಬದಲು - kaibadalu, Can.). From (above + badala, ar. to change). A loan of money for a short time.——Keicalore (కైకలూరు - kaikalúru, Tel.). From (kaikóla, tel. a weaver + úru, tel. village). Sanscrit name (kainkaryapura), meaning service + town.—"a" Deputy tahsildarry, Kistna dist. Pay Rs. 70.—"b" Village, Deputy tahsildar's station; Kistna dist., Goodivauda tal.; pop. 1,278; acres 2,097; lat. 16° 33′; long. 81° 15′; from Bezwada E. 39 miles; from Goodivauda E.N.E. 16 miles; from Guntoor E.N.E. 52 miles; from Madras N.N.E. 246 miles; from Masulipatam N. 26 miles; from Vinoocondah E.N.E. 103 miles. Near Colair lake. Vencateshwaran temple with inscription. Also Ramalingeshwaran temple with inscriptions.——Kei caunom (കൈകാണം - kaikánam, Mal.). From (above + kánam, mal. property). Property in hand, personal property.——Keicauran (கைக்காரன் - kaikkáran,

Tam.). From (above + káran, tam. possessor). Artificer.——*Keicooly* (കൈക്കൂലി - kaikkúli, Mal.). From (above + kúli, mal. wages). Fee paid by lessee to proprietor upon renewal of lease; also a bribe.——*Keicutty* (கைக்கட்டி - kaikkatti, Tam.). From (above + kattu, tam. to tie). From tyeing red silk or other cord on the upper arm. The accountant caste [kanakan].——*Keikkila* (కైకోల - kaikóla, Tel.; கைக்கிள - kaikkila, Tam.). From (above + kizhavan, tam. master). Weavers. The corresponding terms are:—Can. jeyda, Tel. sauley, Mal. chaulyan. About half the men are employed in the construction of textile fabrics and dress, in which they are aided by their families. Most of the southern weavers profess the Sheiva religion but worship village deities and demons. The women and children all work at the loom [tarry]. Some allow widows to remarry. The weavers of the Chingleput district devote their eldest daughter to the service of the temple [devadausy]. See vol. II, 230. In every large town there are colonies of silk-weavers, Putnool caurar, whose ancestors originally came from Goozerat, their chief men dealing in raw silk [nesavoo, puttoo].——*Keimal* (കൈമൾ - kaimal, Mal.). From (kaima, mal. power). Honorific term applied by lower castes to Nayars.——*Keimany* (കൈമണി - kaimani, Mal.). From (above + mani, mal. bell). Cymbals.——*Keimoothal* (കൈമുതൽ - kaimutal, Mal.). From (above + mutal, mal. capital). Personal property.——*Keipanam* (കൈപ്പണം - kaippanam, Mal.). From (above + panam, mal. money). Ready money.——*Keipidy* (கைப்பிடி - kaippidi, Tam.). From (above + pidi, tam. to catch). A handful [mooshty].——*Keivayipp* (കൈവായ്പ - kaiváypa, Mal.). From (above + váypa, mal. borrowing). Borrowing for a short time on a verbal promise to pay.——*Keividooga otty* (കൈവിടുകഒറ്റി - kaivitukaotti, Mal.). Full form of Keividotty [otty].——*Keiyiroopp* (കയ്യിരിപ്പ് - kayyirippu, Mal.). From (above + iri, mal. to be). Balance in hand.——*Keiyoppam* (கையொப்பம் - kaiyyoppam, Tam.). From (above + oppu, tam. to agree to). Signature [daskat].——*Valangay* (வலங்கை - valangai, Tam.). Right hand. See sep. title.——*Yidangay* (இடங்கை - idangai, Tam.). Left hand. See sep. title.

KEID (قيد - kaíd, *Hind.*). From arabic, meaning a shackle. Imprisonment.——*Keidy* (قيدى - kaídí, Hind.). A prisoner.

KEIDA (കൈത - kaita, *Mal.*). From (kétakí, san. screw-pine). Same as Screw-pine.

KEILAUSAM (कैलास - kailása, *San.*). From (kélása, san. crystal).—"*a*" The residence of Coobairan [q.v.], and favorite heaven of Shiva [q.v.]; supposed amongst the Himalaya mountains. Called also Ganaparvatam and Rajata parvatam. Shiva here holds his court attended by ganams [q.v.] or hosts of celestials. In this situation Parvaty [q.v.] is the name of his consort, not Devy [q.v.] or Doorga [q.v.]. The lake Maunasa sarovaram, deemed sacred, lies near the foot of the mountain, and is the birth place of Soobramanyan [q.v.]. The locality is evidently connected with some early events in the history of mankind [matam].—"*b*" Hindoo 2nd or pers. name. Common among non-bramins [peyar].—"*c*" Hill; Vizagapatam dist., Vizagapatam tal. Suggested at one time as a sanitarium for Bengal; and with that view one or two houses were built, the Maharajah of Vizianagram assisting the project with much liberality. The houses are falling into ruins. The project failed chiefly owing to Waltair, the European station on the coast being itself very cool all the year round. There is an average difference of about 8 degrees between the temperature of Keilausam and that of Vizagapatam and owing to its proximity to the sea, within 3 miles, and the absence of forest growth, the site is singularly free from fever. It is easy of access, and the climate is bracing [hill station].——*Keilausa nautan* (कैलासनाथ - kailásanát'ha, San.). From (above + nát'ha, san. lord). Shiva.

KEISAR (قيصر - kaisar, *Hind.*). Corruption of cæsar. Emperor.——*Keisarehind* (قيصرهند - kaisarihind, Hind.). Emperor or Empress of India.

KEIYOOM (قيوم - kaiyúm, *Ar.*). From (kauma, ar. to stand). Eternal. Attribute of God [allah]. Common alam; as Keiyoom ally, double alam [ism].

KEKUI (කකුන - kakuna, *Singh.*). Same as Lumbang nut.

KELIROO (கெளிறு - keliru, *Tam.*). From (keli, tam. greediness). The genus Macrones, siluridæ [kizhautty], physostomi, teleostei, pisces [matsyam, 35], of naturalists [jantoo]. Fresh-water fish; employed as food by poor, but insipid. The species best known to the natives are:—black, fiddler, golden, snouted, white. Cf. also cat, dog, slippery, variegated, in other genera.——*Black keliroo* (കരി - kari, Mal.). Mal. means black. Macrones [keliroo] armatus, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists. Alias Hypselobagrus armatus. Freshwater; a considerable rise from snout to base of dorsal fin; upper surface of the head roughened, shoulder-bone roughened in lines; leaden or brown superiorly, lighter beneath, with or without a brown band along the side, and a dark blotch at the base of the caudal fin; upper half of dorsal fin darkish, and a dark band along the anal; malabar and wynaud range of hills.——*Cat keliroo* (பூனைக்கெளிறு - púnaik-keliru, Tam.). Title from appearance of face. Tam. from (púnai, tam. cat + keliru, tam. macrones genus). Osteogeniosus militaris, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Alias Ageniosus militaris; Arius militaris; Osteogeniosus cantoris; Silurus militaris. Upper surface of head almost or quite smooth, few granulations generally present; silvery, darkish superiorly, fins tinged with red; sea, estuaries and tidal rivers; no other common species here.——*Dog keliroo* (நாய்க்கெளிறு - náykkeliru, Tam.). Title from appearance of face. Tam. from (náy, tam. dog + keliru, tam. macrones genus). Pseudeutropius sykesii, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Alias Pseudeutropius mitchelli; Schilbe sykesii. Freshwater; upper jaw slightly the longer; median longitudinal groove on upper surface of the head reaches to base of occipital process, which latter is narrow; bluish-silvery along back, silvery-white on sides and below; dorsal and caudal gray, the other fins white; western coast attains about 6 inches; for another species see Leaf jella.——*Fiddler keliroo* (کترنا - katarná, Hind. and Dec.; శాకుజెల్ల - sákujella, Tel.; (କୁଣ୍ଟିଆ - kuntiyá, Oor.; கெளிறு - keliru, Tam.) Title from noise when irritated. Tam. from (keli, tam. greediness). Macrones [keliroo] vittatus, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists. Alias Bagrus affinis; Macrones tengara; Pimelodus carcio, indicus; Silurus vittatus. Tengara from bengalee. Freshwater. Upper surface of head roughened in tubercles hardly forming lines. Colors silvery or golden, old specimens have a light bluish band along middle of side, and narrow light one above and below it, dark shoulder spot, and sometimes another near base of caudal fin. Sometimes these fish appear to be dark. Tips of fins usually dark. When touched on the wet ground, it appears to become very irate, erecting its dorsal fin and making a noise resembling the buzzing of a bee [tainee], evidently a sign of anger. 7 or 8 inches.——*Golden keliroo* (نیلاکترنا - nílákatarná, Hind.; മണലേട്ട - manalétta, Mal.). Title from color. Hind. from (nílá, hind. blue + katarná, hind. the fish, macrones vittatus). Mal. from (manal, mal. sand + étta, mal. the fish, polyacanthus cupanus). Macrones [keliroo] chryseus, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists. Alias Pseudobagrus chryseus. Freshwater; upper jaw slightly longer; upper surface of head, opercles and humeral process with smooth ridges; back greenish-yellow, sides golden; a large round black mark on shoulder surrounded by light yellow ring; dorsal and anal fins yellowish orange, stained with darker at margins; caudal yellow, with black base and dark edges; rivers in canara and malabar, preferring the deepest pools; wounds from their spines are deemed venomous by natives.——*Slippery keliroo* (शिलिन्द - shilinda, San.; వంజు - vandzu, Tel.; ଝିଲଙ୍ଗ - jillang, Oor.; வழுக்கைக்கெளிறு - vazhukkaikkeliru, Tam.). Title from mucous secretion. Tel. from (vandza, tel. stem of the lotus); probably from its being slippery. Tam. from (vazhukku, tam. to slip + keliru, tam. macrones genus). Tam. also (púnattai), meaning flower + snail. Silundia gangetica, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Generic name from sanscrit. Alias Pimelodus silondia; Silonia lurida. Lower jaw the longer, snout rather broad; air-vessel small, with its lateral edges protected by a short osseous process from either side; the air-vessel itself, when opened, is found to consist of two oval chambers, having a communicating canal, and in the young is almost surrounded by high osseous sides; colors bluish along the back, becoming silvery on the sides, fins stained with gray; estuaries, ascending high up larger rivers to nearly their sources; attains 6 feet or more in length, and is called a shark [soorah] by the natives; very voracious; another common species is sykesii.——*Snouted keliroo* (शिंगाळा - shingálá, Mahr.; ముక్కుజెల్ల - mukkujella, Tel.; ଅଲି - alli, Oor.; கொம்புக்கெளிறு - kombukkeliru, Tam.). Mahr. means horned. Tel. from (mukku, tel. snout + jella, tel. sphyræna jello). Tam. from (kombu, tam. tusk + keliru, tam. macrones genus); cf. hammer-headed shark. Macrones [keliroo] aor, siluridæ [kizhautty] physostomi, teleostei [matsyam, 35], of naturalists. Specific name from bengalee. Alias Bagrus aor, aorides, aorinus; Pimelodus aor. Freshwater; snout broad, depressed, upper jaw the longer; air-vessel large and pyriform; colors bluish-leaden superiorly, becoming white beneath; fins yellowish, stained with dark externally in both dorsal and caudal; black spot about equal to diameter of eye on soft dorsal on its posterior and inferior portion; common.——*Variegated keliroo* (नारशिंगाळा - nárashingálá, Mahr.; இரங்குக்கெளிறு - iranguk-keliru, Tam.). Mahr. from (nára, san. water + shingálá, mahr. macrones genus). Tam. from (rangu, tel. color + keliru, tam. macrones genus). Plotosus canius, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Alias Plotosus cæsius, horridus, unicolor, viviparus et multiradiatus. Brown, the vertical fins edged with black; estuaries; attains 3 feet and upwards in length; no other common species here.——*White keliroo* (शिंगटी - shingatí, Mahr.; ముదిజెల్ల - mudijella, Tel. ଗୁଣ୍ଟିଆ - guntiyá, Oor.; வெள்ளைக்கெளிறு - vellaikkeliru, Tam.). Mahr. means horned. Tel. from (mudi, tel. old + jella, tel. sphyræna jello). Tam. from (vellai, tam. white + keliru, tam. macrones genus). Macrones [keliroo] cavasius, siluridæ

[kizhautty], physostomi, teleostei [matsyam, 35], of naturalists. Specific name from bengalee. Alias Bagrus cavasius; Hypselobagrus cavasius; Pimelodus cavasius, seengtee. Seengtee from mahratta. Freshwater; snout rather obtuse, upper jaw a little the longer; upper surface of head slightly roughened; leaden superiorly, yellowish along abdomen and cheeks; maxillary barbels, dorsal and caudal fins dusky; pectoral, ventral, and anal dull white; usually a black spot covering basal bone of dorsal fin; occasionally a bluish band along lateral-line; common, at least 18 inches.

KELVAN (கேள்வன் - kélvan, *Tam.*). From (kél, tam. regard); the husband. Vishnoo [q.v.].

KEMPA (ಕೆಂಪ - kempa, *Can.*). Red [chem, shem]. Common in composition. Kempoo is ruby [laul].

KENDAY (रोहितक - róhitaka, *San.*; بنی - bunní, *Ar.*; سهری - sahrí, *Hind.*; గండుచేప - ganduchépa, *Tel.*; താമ്പര - tambara, *Mal.*; கெண்டை - kendai, *Tam.*). Title from tamul. San. from (róhita, san. red). Tel. from (gandu, tel. male + chépa, tel. fish). Mal. means copper-like. Tam. from (kan, tam. eye + tai, tam. to beautify); from beautiful eyes. Title otherwise Barbel, Carp. The genus Barbus, cyprininæ, cyprinidæ, physostomi, teleostei, pisces [matsyam, 39], of naturalists [jantoo], &c. The largest genus in s. india. The species differ greatly in size, from mahseer [q.v.], 80 lb. to barbus gelius of an inch in length; the mouth opens forwards, the lips are clean, without fringes, or inner folds, or horny covering; the lateral line runs along the middle of the body and tail. The genus may be divided into three groups; having four barbels, having two barbels, without barbels. The species best known to the natives are shown below. Other S. indian species are:—amphibus, dubius, lithopidos, micropogon, pulchellus, stiquia, ticto. The term includes also the Crow carp, Large-eyed carp, and Rock carp, which are separate genera.——*Bitter carp* (शफर - shap'hara, San.; चवळ - chavala, Mahr.; کچا کروا - kaççákarwá, Hind. and Dec.; చేదుపరిగె - chéduparige, Tel.; ପିଟ୍ଟହାକେରୁଣ୍ଡି - pitt'hákerundi, Oor.; പരൽ - perali, Mal.; கருங்கெண்டை - karungendai, Tam.). Title from taste. San. from (shap'ha, san. hoof). Mahr. from (chámara, san. the tail of bos grunniens used to whisk off flies); from white color. Hind. from (kaççá, hind. raw + karvá, hind. bitter); quite bitter. Tel. from (chédu, tel. bitter + parige, tel. sprat, clupea sprattus). Oor. means bitter carp. Tam. from (karumai, tam. blackness + kendai, tam. carp, barbus genus). Mahr. also (kapótachavala), meaning pigeon white. Barbus [kenday] chola, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Specific name from mahratta. Alias Barbus liacanthus, sophoroides, thermalis; Capoeta chola; Cyprinus chola; Puntius perlee; Systomus chola, immaculatus, sophore. Perlee from malayalam; sophore from sanscrit. Freshwater; jaws equal anteriorly; silvery, opercles shot with purple and gold; dark blotch is usually present on the side of the free portion of the tail from the twenty-third to the twenty-fifth scales of the lateral-line; dark mark along base of anterior of the dorsal rays, and a row of dark spots along its centre; from malabar and the wynaad, through madras, orissa; about 5 inches; as food bitter; in burmah oil obtained from it during breeding season.——*Carnatic carp* (گدهی کھولی - gídhíkhaulí, Hind. and Dec.; ಗಿಡ್ಡಪಕ್ಕೆ - giddapakke, Can.; అడుసుగెండె - adusugende, Tel.; பூரிக்கெண்டை - púrikkendai, Tam.). Dec. from (gídhí, dec. dwarf + khaulí, dec. barbus ticto). Can. from (gidda, can. dwarf + pakke, can. bird). Tel. from (adusu, tel. mud + gende, tel. carp, barbus genus). Tam. from (púri, tam. gold + kendai, tam. carp, barbus genus). Tam. also (shérgendai), meaning red carp; (shél), meaning red fish. Barbus [kenday] carnaticus, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Alias Puntius carnaticus. Freshwater; upper jaw the longer; greenish-brown along the back, becoming dull white glossed with gold on the sides and beneath; fins grayish; eyes golden; rivers along the bases of the neilgherries, wynaad, and south canara hills; 25 lbs. in weight; some introduced into ootacamund lake.——*Crow carp* (പള്ളത്തി - pallatti, Mal.; රැලියා - rallia, Singh.; காக்கைச்சேல் - kákkaiççél, Tam.). Title from leaden color of body. Mal. from (pallam, mal. low ground). Tam. from (kákkai, tam. crow + shél, tam. carp, barbus genus). Tam. also (iralliya), from singhalese. Etroplus maculatus, chromides, acanthopterygii, teleostei [matsyam, 33], of naturalists [jantoo]. Alias Chætodon maculatus; Etroplus coruchi; Glyphisodon kakaitsel. Kakaitsel from tamul. Freshwater; profile rises abruptly to dorsal; lower jaw rather longer; yellowish, with greenish back, and about seventeen horizontal lines of deep golden spots; occasionally a few along dorsal fin, back, and abdomen, also on anal; between dorsal spines and rays there are more spots, some being brown and others yellow; along the lateral-line are three black finger marks, central being largest, and darkest; ventral and anal fins stained deep black; common along the coasts in every paddy [q.v.] field, tank [q.v.], or piece of freshwater, and even occasionally found in backwaters [cauyal]; exists some distance inland; eaten by natives; exceedingly pugnacious; it readily takes a worm [keerak]; very small, not exceeding 3 inches. Another species is suratensis.——*Flying carp* (کچا کروا - kaççákarwá, Hind. and Dec.; പരപ്പെരലി - parapperali, Mal.). Hind. from (kaççá, hind. raw + karvá, hind. bitter) or quite bitter. Mal. from (para, mal. flying + perali, mal. the fish barbus chola); from jumping into air. Barbus [kenday] parrah, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Specific name from (para, mal. flying). Alias Puntius parrah. Freshwater; back greenish, divided from a silvery abdomen by a dark-bluish line; cheeks golden red; pectoral, ventral, and anal tinged with yellow; dorsal and caudal dusky; a diffused black spot on the lateral-line extending from the twentieth to the twenty-second scales; eyes golden; malabar, mysore, and madras, at least 6 inches.——*Golden carp* (മണ്ടത്തി - mandatti, Mal.; பூங்காலா - púngálá, Tam.). Title from fins. Mal. from (mandu, mal. to run). Tam. from (pú, tam. flower + kálá, tam. sturgeon, polynemus genus); from golden fins. Barbus [kenday] chrysopoma, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Alias Barbus polydori; Systomus chrysopoma. Freshwater; height of head almost equals its length; profile of back elevated; dark silvery, lightest beneath, opercles shot with purple and gold; dark vertical band behind opercles and a dull spot on the lateral-line just anterior to the base of the caudal fin; upper and lower margins of the caudal grayish; the other fins golden; freshwaters along coasts.——*Gray carp* (कोलशि - kólashi, Mahr.; నిలుసు - nilusu, Tel.). Mahr. from (kólasa, mahr. charcoal). Mahr. also (kapótakólasa), meaning pigeon white + charcoal black. Barbus [kenday] kolus, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Specific name from mahratta. Alias Barbus guentheri; Capoeta kolus; Hypselobarbus kolus; capœta kolus from mahratta. Freshwater; body compressed, considerable rise in the profile; upper jaw the longer, overlapping the lower; silvery, with a tinge of yellow; dorsal, caudal, and anal tipped with gray; deccan, and throughout the kistna, toongabudra, and godavery rivers; upwards of a foot.——*Large-eyed carp* (గుండిగ - gundiga, Tel.; ପୁନ୍ନିକାଉଁ - punnikaun, Oor.; കണ്ണൻ - kannan, Mal.; மோதக்கெண்டை - mótthakkendai, Tam.). Tel. means a broad-mouthed vessel. Mal. from (kan, mal. eye). Tam. from (móda, san. pleasure + kendai, tam. carp, barbus genus). Megalops cyprinoides, clupeidæ, physostomi, teleostei [matsyam, 40], of naturalists [jantoo]. Alias Clupea cyprinoides; Cyprinodon cundinga; Elops apalike, cundinga; Megalops cundinga, curtifilis, filamentosus, indicus, macropterus, macrophthalmus, oligolepis, setipinnis. Lower jaw prominent; caudal deeply lobed; the lobes rather more expanded in the immature than in the adult fish; summit of head dark olive, back bluish-green in the adult, lighter in the immature; abdomen silvery, with bluish reflections; the margins of the scales of a brilliant silver, as are also the lateral-line and the sides of the head; the centre of the jaws black; dorsal and caudal grayish, minutely dotted with black, and the margins blackish, as is also the last elongated dorsal ray; pectoral, ventral, and anal diaphanous, with some black dots, the last anal ray dark; eyes silvery, with the orbital margin having a dark tint; the pupils are oval pointing downwards; freshwaters and estuaries; occasionally captured in rivers, but much more commonly found in tanks. No other common species here.——*Mahseer carp* (मास्ता - mástá, Mahr.; مہاسر - mahásir, Hind.; ಹಲ್ಲಮೀನು - hallamínu, Can.; పెరువల్ - peruval, Too.; മെരുവാൾ - meruvál, Mal.; ලේලු - lélu, Singh.; பூமீன்கெண்டை - púmíngendai, Tam.). Title from hindostany. Hind. from (mahá, hind. large + sir, hind. head). Can. from (halla, can. watercourse + mínu, can. fish); as frequenting perennial rivers. Mal. from (meruku, tam. lustre + vál, mal. sword). Tam. from (pú, tam. flower + mín, tam. fish + kendai, tam. carp, barbus genus). Mahr. also (khádchi), meaning beard fish, from developed lips; (másalí), meaning large scaled; (tóvarí), meaning tender sprout from appearance; (pútitóvarí), meaning small tor. Hind. also (naharam). Can. also (haralemínu); (peruval). Too. also (heragulu). Singh. also (lélukúriyá), meaning mahaseer fish. Tam. also (pommín), meaning gold + fish. Called the salmon of india; a large fish of the carp species, common to all mountain streams. Barbus [kenday] tor, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Specific name perhaps from mahratta. Alias Barbus hamiltonii, macrocephalus, macrolepis, mosal, mussulah, progeneius, megalepis; Cyprinus tor, mosal, putitora; Labeobarbus macrolepis, progenius, tor. Mosal, mussulah, putitora from mahratta. Freshwater; snout pointed; jaws of about the same length; lips thick, with an uninterrupted fold across the lower jaw; lips are largely developed; free portion of the tail longer than high; silvery or greenish along the upper half of the body, becoming silvery shot with gold on the sides and beneath; lower fins reddish yellow. The Red mahseer is barbus thomassi.——*Red carp* (ಕೆಮ್ಮೀನು - kemmínu, Can.; ಚಮ್ಮೀನು - chammínu, Too.; തമിൻ - tamín, Mal.). Title from fins. Can. from (kem, can. red + mínu, can. fish). Too. from (channa, too. red + mínu, too. fish). Barbus [kenday] jerdoni, cyprininæ, cyprinidæ, physostomi, teleosti [matsyam, 39], of naturalists. Freshwater; height of head nearly equals its length; body compressed; mouth narrow; upper jaw the longer; lower labial fold interrupted; silvery, fins which have an orange tint, tipped with black; rivers in canara below the ghauts [q.v.], attaining 18 inches.——

Rock carp (پتھرچٹا - phattarchátá, Hind.; கற்கெண்டை - kargendai, Tam.). Title from being found in rocky streams. Hind. from (phattar, hind. stone + chátá, hind. licker). Tam. from (kal, tam. stone + kendai, tam. carp, barbus genus). Homaloptera brucei, cyprininæ, cyprinidæ, physostomi, teleostei [mastyam, 39], of naturalists [jantoo]. Alias Balitora brucei; Platycara australis. Snout broad and depressed; scales absent from chest and as far as the posterior margin of base of ventrals; colors dark brown with darker blotches; caudal banded; wynaud and bhawauny rivers; no other common species here.——*Sarana carp* (कदलि - kadali, Mahr.; گدھی کھولی - gídhíkhaulí, Hind. and Dec.; ಗಿಡ್ಡಪಕ್ಕೆ - giddapakke, Can.; కన్నాకు - kannáku, Tel.; ଶରଣ - sarana, Oor.; பூங்காலா - púngálá, Tam.). Title from bengalee. Hind. from (gídhí, hind. dwarf + khaulí, barbus ticto). Can. from (gidda, can. short + pakke, can. bird). Tel. from (kannu, tel. eye + áku, tel. leaf), from compressed form of body. Tam. from (pú, tam. flower + kálá, tam. sturgeon, polynemus genus). Mahr. also (pitale), meaning brass-like. Hind. also (darhí); (potah). Barbus [kenday] sarana, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Specific name from bengalee. Alias Barbus caudimarginatus, deliciosus, duvancelli, gardonides, immaculatus, kadoon, kakus, russellii; Cyprinus kadoon, kakoo, kunnamoo, macclellandi, sarana; Puntius sarana; Systomus chrystomus, immaculatus. Fresh-water; profile of back elevated; silvery, darkest superiorly, opercles shot with gold; mostly some dark spots behind the opercle; fins whitish or yellowish-white, and externally stained with gray; at least a foot in length.——*Shell carp* (لمبی کھولی - lambíkhaulí, Hind. and Dec.; ಮರಪಕ್ಕೆ - marapakke, Can.; சேற்கெண்டை - shérgendai, Tam.). Title from tamul. Hind. from (lambí, hind. long + khaulí, hind. fish, barbus ticto). Can. from (mara, can. tree + pakke, can. bird). Barbus [kenday] dorsalis, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Alias Barbus tetraspilus, layardi; Systomus dorsalis, tristis. Freshwater; head conical anteriorly, snout pointed, upper jaw the longer; uniform silvery, frequently the scales in upper two-third of the body with dark bases; a black spot at the posterior portion of the base of the dorsal, which more or less disappears after maceration; found as far south as the cauvery and coleroon; not large.——*Spotted carp* (പാറ്റപ്പെരളി - páttapperali, Mal.). Title from dorsal spots. Mal. from (pátta, mal. moth + perali, mal. the fish, barbus chola). Barbus [kenday] punctatus, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Alias Puntius punctatus; Systomus conchonius. Freshwater; olive-green superiorly, becoming white on the abdomen; a diffused black spot on twentieth and twenty-first scales of lateral-line; anterior half of third or fourth scale from the opercle, in the row next below the lateral-line, black; fins yellowish, dorsal and anal tipped with orange; dorsal with two rows of black spots; malabar and coromandel coasts; does not exceed 3 inches.

KEORA (کیوڑہ - keurah, *Hind.*). Same as Screw-pine.

KERAM (केर - kéra, *San.*; കേരം - kéram, *Mal.*). W. coast mode of pronouncing Cheram [q.v.]. The cocoanut [q.v.] fruit.——*Keracalpam* (കേരകല്പം - kérakalpam, Mal.). From (above + kalpa, san. law). Sanscrit work written in Malayalam. Old institutions about the four oobhayams, viz., cocoanut [q.v.], betelnut [q.v.], jack [q.v.] tree, and pepper [q.v.] vine.——*Kerala anauchauram* (കേരളാനാചാരം - keralaanáchåram, Mal.). From (above + anáchara, san. irregular custom). Sixty-four rules constituting the irregular Braminical customs of Keralam. One tradition alleges that Shuncaracharry [shuncaran] promulgated them at Collam on 25th August 825 A.D., the first day of the first year of the Collam [q.v.] era [saca].——*Keralam* (केरल - kérala, San.; കേരളം - kéralam, Mal.). Sanscrit form for Chera, but applied specially to the coast part of that kingdom or the country between Gocurnam and Cape Comorin. This coast is also called Parshoorama cshetram, or Parshooraman's country. It is also called Carma bhoomy, the land of salvation by works; the opposite coast being called in contradistinction Nyauna bhoomy, land of salvation by faith. The term Shooddhy or pure is applied to the portion lying south of Neeleshwar. The portion from the river Canyarote poya [payashwany], the original southern boundary of Canara to Travancore inclusive, is now called Malayalam, or the country below the ghauts [q.v.] and by the English generally the Malabar coast [q.v.]. There is little to be added to what is said at vol. I (13), (127); II, 100. Keralam was originally divided into sixty-four graumams [q.v.] by Parshooraman [q.v.]. These were subsequently distributed by Aryapermaul into four rajyams [q.v.] or provinces, viz., Tooloovam, Coopam, Keralam proper, and Mooshicam. Further subdivision into seventeen nauds [q.v.] also made by Aryapermaul. The nauds are :—Bettatnaud, Colatnaud, Cooroombranaud, Mooringanaud, Nedoonganaud, Parapnaud, Perimpadappnaud, Polnaud, Pooravyenaud, Ravananaud, Tirmaunicherrynaud, Tooloonaud, Valavanaud, Venaud, Venganaud, Wonanaud, Yernaud. He erected eighteen forts or Cottapadies.——*Kerala mahautmyam* (കേരളമാഹാത്മ്യം - kéralamáhátmyam, Mal.). From (above + máhátmya, san. greatness). History of Malabar. Written in indifferent Sanscrit; contains traditions current among the people regarding the ancient history of the Malabar province. See vol. II, 103.——*Keralapootran* (केरलपुत्र - kéralaputra, San.). From (above + putra, san. son). Greek κηροβόθρος. Title of the Chera ruler.——*Keralopatty* (കേരളോല്പത്തി - kéralólpatti, Mal.). From (above + utpatti, mal. origin). History of Malabar. Written in modern prose Malayalam [q.v.]. As an historical work it is of little use, but as a mine of half-forgotten native usages and customs it is valuable. Ascribed to Shuncaracharry [shuncaran]. It is the only work of the kind in the Dravidian languages. The following is a digest. Parshooraman was born in the family of Bhrigoo in Tretayoog [q.v.]. His father Jamadagny [q.v.] was murdered by the sons of Caurtaveeryan, and Parshooraman to satisfy his widowed mother defeated and slew the Cshatriyas twenty-one times. He then made a gift of the whole world to Bramins as an expiation for the sin committed. Having no place to live he obtained from Varoonan [q.v.] the strip of land from Gocurnam to Comorin. This land was afterwards called Keralam. He then introduced into his new land Bramins from various parts, but they did not remain there from fear of serpents. He then brought Bramins afresh from Aryapooram, divided the country into sixty-four graumams [q.v.] and presented them to these. Some shoodras were also introduced, and changes were made in their social customs that they might not go back to their native place. Among these changes were the introduction of poorvashikhay or front wearing of the coodoomy [q.v.] and maroomakkatoyem [q.v.]. He also built many temples, chiefly dedicated to Bhagavaty [q.v.]. He divided the people into various classes and settled what occupation each was to follow. Having ruled over the country for 50,000 years, he disappeared. Then ensued discord among the Bramins who were entrusted with the government of the country, and they agreed to have a king. Accordingly Keya permaul was brought from Keyapooram and was installed king in A.D. 216. He ruled over them for eight years. Fourth in succession from him was Keralan from Chola mundalam, who ruled for twelve years. He was one of the best of kings and the province was called after him. Then followed others, one of whom Baunapermaul became a convert to the Booddhist faith. He convened a congregation of the Bramins and said to them that they must unite with the Booddhists and follow their system. The bramins were greatly alarmed, and incensed; and on their consulting with a leading individual among them at Tricaroor, he promised to remove their difficulties. Following his advice, the Bramins went to the king, and remonstrated with him, calling for a public disputation, when if they the Bramins were vanquished, their tongues should be cut out, and the like done to the Booddhists if these should be overcome. The dispute was held; terminating favorably to the Bramins, in consequence of a magical influence emanating from the head Bramin at Tricaroor. The tongues of the Booddhists were cut out, and they were banished the country. The king who had adopted their system was dethroned, and some lands were set apart for his support. He is not the Cherma permaul who went to Mecca. His son was crowned; and an oath was taken from him, never to permit the Booddhists or people of any other religion to obtain public sanction. Other details of some subsequent matters are given. At later periods, when the above ban had fallen into desuetude, the Booddhists obtained some footing in different places. The system of Bhattacharry [samayam] obtained in the Malayalam country; and the Vedantists of that class received some endowments in lands. At an assembly of the Bramins of the sixty-four villages, it was determined that only the Bramins of eleven village districts should possess the right of offering a particular species of yaugam [q.v.] or sacrifice, and of performing some other special ceremonies. In process of time the rule of kings had become extinct and some Bramins went to Krishnaroya inviting him to take the rule of the country. He sent two persons named Audy raja permaul and Paundyaraja permaul as his viceroys, each for a period of twelve years. After them Cherma permaul was sent, who was welcomed by some distinguished persons, safely conducted, and duly installed. He ruled thirty-six years, being three times the appointed period, on account of his good qualities. The Royel however was not satisfied with this extension of the term, and determined on hostilities. Cherma permaul took counsel as to the best means of meeting the invasion. In the first place two Bramin ambassadors were sent to the Royel to endeavour to pacify him; but he refused to listen to them. A story is narrated of the manner in which the messengers acquired a magical quill, by looking through which the real nature of any being would be discerned. The Chermaun in connexion with the Calicut rajah, and other subordinates, assembled a great army, and while the multitudes were asleep, by looking at them through the quill it was perceived that 10,000 were men, 30,000 gods, and the rest asoorans. To the 10,000 a distinctive mark was affixed; and with them the Royel was encountered and defeated. The birth of Shuncaracharry is then narrated, with his proceedings as to the different castes of people, and the regulations established by him, accounted for in rather a fanciful manner; but it is stated that his regulations continued to be observed. Cherma permaul continued to rule. A Nayar was killed, who, after death, is represented as instructing the king to attend to the lessons of a Jonaca [q.v.] teacher, according to whose advice he might embark on board ship, and would thereby attain a partial beatification. This is the Cherma

permaul who adopted the Mahomedan religion, and went to Mecca. He divided his whole dominions into eighteen portions, which he gave over to the charge of different chiefs. The two ambassadors by whose means the Royel had been conquered, each received portions of country. He specially gave a shield to the Calicut rajah. Cherma permaul then went away by sea to the country termed Asoo supposed to designate Arabia. The Calicut rajah afterwards waged war with the various petty chieftains, conquering some of them and acquiring superiority. The arrival of the Portuguese at Calicut is noticed, and the Calicut rajah is said to have fought with the captain. The rajah ruled over eighteen forts and seventeen districts. He fought continually with his neighbours, the Travancore and Tellicherry rajahs being excepted; he subdued many countries. He acquired pre-eminence above other kings. The customs of the Calicut kingdom are then narrated with laws regulating interest and profit. The commencement of the Collam era is thus accounted for. The rule of the viceroys of Vijianugger had been fixed at twelve years, corresponding with the revolution [bhaganam] in orbit [cacsham] of the planet [graham] Jupiter [brihaspaty]. But as Cherma permaul exceeded the prescribed time, this mode of reckoning fell into disuse. In a period of great scarcity and drought, when a large reservoir of Collam had become quite dry, the Bramins in a body went to the Calicut rajah, and represented that the cause was his withholding the customary largesses to the gods and the Bramins; the rajah acknowledged his fault and promised to repair it. As a commencement a great number of Bramins were fed in the dry bed of the tank, and before they had finished eating, the water rushed in with such rapidity, that they were obliged to make their escape without having time to take away the leaves on which their food had been eaten. An era was begun to commemorate this event, being the Collam era. Matters relating to the cultivation of cocoanut [q.v.] trees, betel-vines, &c., customs in dealings, buying, selling, &c., rules to regulate hunting. Origin of the Nayars; also of a kind of divinity derived from the fable in the Mahabhaurat [q.v.] of Shiva's appearing to Arjoonan [q.v.] during his penance near Himalaya mountains. The origin of the Ayenaur [ayen] born from Shiva [q.v.] and Mohiny [q.v.]. The names of various local numina in the Malayalam country are given. Names of various fanes in that country. Besides which the thirty-three crores of inferior gods [deva], and the sixty-six thousand asoorans [q.v.], are all said to have been in Malayalam; together with the superior gods, protecting the country. Afterwards the names of the Calicut rajahs and other inferior chiefs are given. The story of a Jonaca who came to this country; the cause of which is narrated, the foreigner extended the dominion of the Calicut rajah. Magnificent things are stated as to the conquests of the Calicut rajah, originating in his devotedness to Shree bhagavaty, and her gifts to him. Notwithstanding the foreign Europeans came and took possession of Calicut; whom however in the end the rajah defeated. The Coorumbar of the hilly district greatly helped and had districts given in consequence. Disputes between this Coorumba chief and the Cochin rajah. Details of the number of Nayars belonging to different parts of the country. Reference to the regulations made by Parshooraman, and confirmed by Shuncaracharry, as to the distance which must be observed by different castes in their approach one towards another, the distance in feet being minutely stated. Bramins and cows are of good birth; other classes of men and other animals not so. With these regulations as to personal distinctions, and caste observances, the account concludes [charitram]. See vol. I (127); II, 103.——*Kelappan* (കേളപ്പൻ - kélappan, Mal.). From (kéralan, mal. native of malabar + appan, mal. father). Hindoo 2nd or pers. name [peyar].——*Keya* (കേയ - kéya, Mal.). Keralam.——*Keya permaul* (കേയപ്പെരുമാൾ - kéyapperumál, Mal.). From (above + perumál, mal. chief). Same as Cherma permaul.——*Keyapooram* (കേയപുരം - kéyapuram, Mal.). Ancient name for Coimbatore.

KEREY (ಕೆರೆ - kere, *Can.*). Tank [cheroo, chira].

KERKAL (श्वव्याघ्र - shvavyághra, *San.*; بوربچه - borbaçça, *Hind.*; ಕೇರಕಾಲ - kérakála, *Can.*; కరింగోల - karingóla, *Tel.*; പട്ടിപ്പുലി - pattippuli, *Mal.*; சிறுசிவிங்கி - shirusivingi, *Tam.*). Title from canarese; distinguish from caracal, the lynx. San. from (shvá, san. dog + vyághra, san. tiger). Mal. from (patti, mal. bitch + puli, mal. tiger). Tam. from (shiru, tam. small + shivingi, tam. pard). Can. also (chiratéhuli), meaning small tiger. Title otherwise Leopard; small variety of Panther [honiga].

KERY (ಕೇರಿ - kéri, *Can.*). Hamlet [cherry, kotah].

KESHAM (केश - késha, *San.*). From (ka, san. head + shí, san. to rest); produced from the head. Hair of head in particular. Hair of body is romam, otherwise lomam [q.v.]; braided hair is vainy [q.v.]; clotted or matted hair is jatay [q.v.]; hair on the neck or mane is kesharam. For wool of animals see Pushm.——*Kesary* (केसरी - késarí, San.; కేసరి - késari, Tel.). From (késara, san. hair); lion, the maned animal.—"*a*" Title of the rulers of Orissa [q.v.] previous to the Gungavamsha line [charitram].—"*b*", also means crocus sativus, linn., saffron [q.v.]. Also a yellow four-month paddy in Godavery, Kistna, Nellore, Anantapore, &c. Pedda kesary is a large variety, Potty kesary a short [paddy].——*Keshavan* (केशव - késhava San.). From (késha, san. hair); long-haired. Vishnoo. Hindoo 2nd or pers name. [peyar]. Common among Madhwas.——*Keshavanna* (ಕೇಶವಣ್ಣ - késhavanna, Can.). From (késhava, san. vishnoo + anna, can. brother, suffix of respect). The name of a learned Jeina [q.v.] said to have built Barcore, &c., in Canara.

——*Keshinee* (केशिनी - késhiní, San.; सांखवेल - sánkhavéla, Mahr.; چورکانٹا - chorkántá, Hind.; కాట్లెచెట్టు - katlechettu, Tel.; കുതിരപ്പുല്ല - kutirappullu, Mal.; යක්බෙරිය - yakbériya, Singh.). San. from (késha, san. hair); from tuft of hair on the flower; also from supposition that it promotes growth of hair. Mahr. from (shankha, san. conch + véla, mahr. creeper). Hind. from (chor, hind. thief + kántá, hind. thorn). Tel. from (katte, tel. stalk + chettu, tel. plant). Mal. from (kutira, mal. horse + pullu, mal. grass). Singh. from (yak, singh. devil + bériya, singh. lumnitzera racemosa, willd.). San. also (chórapushpí), meaning thief + flowering; (shankhiní), meaning having conch-like flower. Tel. also (katlegaddi), meaning stalk + grass; (shankhapushpi), meaning conch + flower. Title otherwise Conch flower, Horse grass, Thief-flower. Botanically Andropogon [beard grass] aciculatus, retz., graminaceæ [vricsham, 156]. Alias Chrysopogon acicularis. Culms erect, rooting at the base, simple or branched, 1–2 feet; nodes, sheaths and leaves smooth, the last somewhat radical and abbreviated, lanceolate, margins rough and prickly; panicle terminal, linear-oblong, branches sub-verticelled, simple, hirsute towards the apex; glumes of the hermaphrodite floret almost equal, upper two-cleft with the awn about twice the length of the floret. Small, coarse spear grass [q.v.], not liked by cattle.

KETAKY (केतकी - kétakí, *San.*). From (kéta, san. desire); from flower in request. Same as Screw-pine.

KETT (കെട്ടു - kettu, *Mal.*). Tie [cutt].——*Kettoovallam* (കെട്ടുവള്ളം - kettuvallam, Mal.). From (above + vallam, mal. boat). Distinguish from Kaidvellam. Sewed boats. Baggage boats which ply on Malabar inland navigable waters. They are built of planks sewn together with coir [q.v.] cordage through holes drilled in the edges; the seams also being caulked to make them water-tight with coir fibre and yarn, round and over which the stitching goes. The general outline is the same as that of a canoe, but they can be made of much larger size.

KETTAY (கேட்டை - kéttai, *Tam.*). From (jyésht'há, san. elder). Moodevy [q.v.]; the goddess of ruin [kaly, calathy]. The elder sister of Lutchmy [q.v.], the goddess of prosperity. Also the eighteenth lunar mansion [nacshatram] in astronomy [jyotisham]. Cf. Jyeshtay.

KHADEEJAH (خدیجه - khadíjah, *Ar.*). From (khadajah, ar. deformed). Name of Prophet's wife. Common female alam; as Khadeejah bee, alam + alaumat [ism].

KHAJOOR (کهجور - khajúr, *Hind.*). Means cleansing. Same as Arabian date.

KHALEEL (خلیل - khalíl, *Hind.*). From (khalla, ar. to penetrate). A true friend. Part of lacab; as Khaleeloollah, friend of god, title of Abraham. Now an ordinary alam [ism].

KHALSA (خالصه khálisah, *Hind.*). From (khális, ar. pure). Revenue department under Mahomedans. Khalsa lands are those in Government amauny [q.v.]. Cf. Havelly.——*Khoolausa* (خلاصه - khulásah, Hind.). From (khalasa, ar. deliverance). Release.——*Khoolausat* (خلاصت - khúlasat, Ar.). From (khalasa, ar. to purify). Essence. Part of lacab; as Khoolausat ool moolk, the essence of the state [ism].

KHAN (خان - khán, *Pers.*). Lord. Title of Tartar kings. Now a Pataun [q.v.] title and title of honor; as Mahomed khan, alam + pataun alaumat; Bahaudur beg khan, alam + title of honor [ism].——*Khanam* (خانم - khánam, Hind.). Any lady of rank. An ordinary Mahomedan suffix for a Pataun lady, as Khadeejah khanam. Khanam, Khautoo, Bee, Begum, Beeby, Nissa are honorific suffix appellations for Mahomedan women. Among Moghuls [q.v.] the title is commonly added to the names of all women; as Hameeda khanam, alam + female alaumat [ism].——*Khandauny* (خاندانی - khándání, Hind.). From persian meaning a family. A title borne by Mahomedan nobles, especially when of Persian or Pataun [q.v.] descent. Applied especially to members of the Carnatic [q.v.] family [anwaroodeen].——*Khan sahib's canal* (கான்சாயப்புவாய்க்கால் - kánsáyappuváykkál, Tam.). From (khánsáhib, hind. name of the constructor of the canal + váykkál, tam. canal). Channel; South arcot district, Chidambaram talook. Flows into Vellaur at its mouth. Connects the Coleroon and the Vadavaur channel with the Vellaur at Porto novo viâ Chidambaram. Length about 25 miles. Irrigates about 7,000 acres. To facilitate the carriage of the iron [auhan] ores, which were brought by water from Salem to Porto Novo, the old canal was made navigable in 1804 by the construction of three locks, one where the canal debouches into the Vellaur, nearly opposite the town of Porto novo; the second where it leaves the Veeraunam tank; and the third a little lower down. Deepened and rendered navigable for small boats in 1854.

KHANA (خانه - khánah, *Pers.*). House. Suffix denoting place [gah], as Lungerkhana, alms + house.—*Khana shoomaury* (خانه‌شماری - khánahshumári, Hind.). From (above + shumári, pers. calculation). Census.—*Khankah* (خانقاه - khánkáh, Hind.). Arabic form of (khánah, pers. house + gáh, pers. place). A monastery; a rest-house.—*Khan saumah* (خانسامان - khánsámán, Hind.). From (above + sámán, pers. effects). A house steward or butler [compradore].—*Tauh khana* (ته خانه - tahkhánah, Hind.). From (tah, pers. floor + khánah, pers. room). A cellar in Mahomedan houses used during midday.

KHANAH (کھانا - khánah, *Hind.*). From (khád, san. to eat). A meal. Mussalmans use three meals a day:—Naushta [q.v.] or Hazree [q.v.] or breakfast, at 9 or 10 A.M.; Khanah or dinner, which they partake of at 3 or 4 P.M., the lower orders generally at 1 P.M.; Rautkah khanah or supper, at 7 or 8 P.M.

KHANCHAH (کھانچا - khánchá, *Hind.*). A marsh.

KHAND (ఖండి - khandi, *Tel.*). Means mountaineer. Another form of Khond [q.v.].

KHAND (खण्ड - khand, *San.*). To cut.—*Khadgam* (खड्ग - khadga, San.). From (khand, san. to cut). A sword. Khadga mrigam is rhinoceros; also tusker or male elephant [elephant, gendah]. Khadga mriga ractam is Dragon's blood [q.v.]—*Khandak* (خندق - khandak, Hind.). Ditch of a fort [kila].—*Khandam* (खण्ड - khanda, San.). From (khand, san. to cut). Section.—*Khandriga* (ఖండ్రిగ - khandriga, Tel.). Means a small hamlet. A large block of land granted as inam, less than a village but much larger than an ordinary inam [q.v.]. See vol. I, 112.—*Khind* (खिंड - khinda, Mahr.). Mountain pass [cundy, ghaut].

KHAR (खर - khara, *San.*; خر - khar, *Pers.*). Means hard, sharp. Also means a thorn. Also an ass.—*Kharam* (खर - khara, San.). Sharp, rough, pungent, hot, hard. Plant first term. Ex.:—Achyranthes aspera (kharamñjari), meaning sharp + flower cluster; Acorus calamus (kharasára), meaning pungent + juice; Celosia cristata (kharáshvá), meaning heat + accumulating; Ficus clenia (kharapatra), meaning rough + leaf; Sanseviera roxburghiana (kharabusa), meaning hard + thread. See gloss. paragraphs.—*Kharboja* (خربزه - kharbuzah, Hind.). Means large + sweet fruit. Same as Common melon.—*Khargosh* (خرگوش - khargosh, Hind.). Means donkey + ear. Same as Mosal.—*Kharmoosh* (خرموش - kharmúsh, Hind.). Means ass + mouse. Same as Bandicoot.—*Kharpoosht* (शल्यकण्ट - shalyakant'ha, San.; सलेंद्र - saléndra, Mahr.; دلدل - dula, Ar.; خارپشت - khárpusht, Pers.; سیہی - síhí, Hind.; لندق - landak, Malay; ಏದು - édu, Can.; ముళ్ళపంజి - mullupanji, Too.; ఏదుపంది - édupandi, Tel.; ଝିଙ୍କୋ - jhinko, Oor.; മുള്ളൻപന്നി - mullanpanni, Mal.; හිතාව - hitava, Singh.; முள்ளம்பன்றி - mullambanri, Tam.). Title from persian. San. from (shalya, san. thorn + kant'ha, san. throat). Mahr. from (shalya, san. thorn + undura, san. rat). Pers. from (khár, pers. thorn + pusht, pers. back). Hind. from (shallakí, san. porcupine). Tel. from (édu, tel. quill + pandi, tel. pig). Tam. from (mullu, tam. bristle + panri, tam. hog). Pers. also (rúbáhiturkí), meaning turkish fox. Hind. also (siyál). Can. also (mulluhandi), meaning thorn + hog. Title otherwise Porcupine. Hystrix leucura, hystricinæ, hystricidæ, rodentia, mammalia [sastanam, 18], of naturalists [jantoo]. Alias Crista indica; Hystrix hirsutirostris, zeylanensis. Procupines are rodents which take their name, signifying spiny-pig [soor], from their large size and grunting voice. The peculiar open tubes of the tail are supported on slender stalks, and they make a rattling noise when shaken. The genus given above is the Indian porcupine. Muzzle clad with short stiff bristly hairs, and a few white spines on the face; spines on the throat short, grooved, some with white points forming a demi-collar; crest full, long, chiefly of black bristles, a few of them only with long white points; the larger quills on the back black; many annulated with white at base and middle, and some with white points; the long thin quills mostly white at tip; the quills on the loins mostly all white, the pedunculated quills of the tail yellowish-white; some of the quills of the sides and lumbar regions flat and striated; whiskers long black, a few tipped white. It forms extensive burrows, often in societies, in the sides of hills, banks of rivers and nullahs [q.v.], and very often in the bunds of tanks, and in old mud walls, &c. Very destructive to crops, potatoes [q.v.], carrots [gaujar], and other vegetables. It never issues forth till after dark. Dogs [nye] take up the scent of the porcupine. It charges backwards at enemies erecting spines at the same time. The porcupine can be eaten. The intestines are used in medicine for dropsy or coughs. Indian allied species not here found are:—Atherura fasciculata or brush-tailed porcupine, Hystrix bengalensis or bengal porcupine, Hystrix longicauda or crestless porcupine, Hystrix yunnanensis. For hedge-hog see Moollely.—*Khaudee* (کھادی - khádí, Hind.). Coarse cloth.

KHAR (کھار - khár, *Hind.*). From (kshára, san. from kshar, san. to flow). Any alkali [cauram].—*Khary matty* (क्षारलवण - kshárílavana, San.; کھارینون - khárínún, Hind.; کھاری مٹی - khárímattí, Dec.). From (kshára, san. saline earth + lavana, san. salt). Impure sulphate of soda. Glauber's salt. Cf. Sujjee matty.—*Paparkhar* (پپڑکھار - papparkhár, Dec.). Dec. from (pappar, hind. thin crisp cake + khár, hind. alkali). Same as Appalacauram.

KHAREEF (خریف - kharíf, *Hind.*). From (kharf, ar. to pluck fruit). Autumnal harvest.

KHAREETA (خریطہ - kharítah, *Hind.*). From (kharata, ar. to render fast). A bag; the ornamental bag used as an envelope for a letter from or to a person of high rank; thence the letter itself.

KHARJOORAM (खर्जूर - kharjúra, *San.*). From (kharj, san. to cleanse); from supposition that it is useful in purifying blood and bile. Date palms. Botanically the Phœnix genus, palmaceæ [vricsham, 149]. Leaves pinnate; some species have scarcely any trunk, while in others the trunk is thickly covered with the scars of fallen leaves; fruit fleshy and one-seeded. The species best known to the natives are shown below. Under term date come also some species of cycas, tamarindus and zizyphus genera.—*Arabian date* (पिण्डखर्जूर - pindakharjúra, San.; खजूर - khajúra, Mahr.; نخل - nakhal, Ar.; درخت خرما - darakhti-khurmá, Pers.; سندولے کا پیر - sandolekáper, Hind.; سندولے کا جھاڑ - sandolekájhár, Dec.; خرما - khurma, Malay; ಖರ್ಜೂರ - kharjúra, Can.; గజ్జిర - gajjira, Too.; ఖర్జూరము - kharjúramu, Tel.; ଖୋଜିରି - khójiri, Oor.; ഈത്ത - ítta, Mal.; ඉඳි - indi, Singh.; ஈச்சமரம் - íççamaram, Tam.). San. from (pinda, san. ball, a morsel + kharjúra, san. phœnix), meaning edible variety. Mahr. from sanscrit. Pers. from (darakht, ar. tree + khurma, ar. date). Hind. from (sandolá, hind. date + per, hind. tree). Dec. from hindostany. Malay from arabic. Tel. and oor. from sanscrit. Tam. from (ínju, tam. date + maram, tam. tree). Ar. also (tamar); origin of tamarind [q.v.]. Hind. also (chuhárá); (khajúr), meaning raw date. Dec. also (pendkhajúr), meaning raw date. Tel. also (íta); (muddakarjúramu), meaning mass + date tree; (périta), meaning large + phœnix sylvestris, rox. Mal. also (téníçça), meaning honey + the tree. Tam. also (íñju), meaning beneficent tree; (péríñju), meaning large date tree. Wherever the palm is mentioned in the bible, the date palm is meant; the greeks called the tree φοῖνιξ from phœnicia, distinguishing the female as ἡ φοῖνιξ βαλανηφόρος and the male as ὁ φοῖνιξ ἔρσην; the male flowers they called ἐλάτη and σπάθη, and the fruit φοινικοβάλανος; hebrew tamar. Title otherwise Common date, Edible date, Large date, True date. Botanically Phœnix [kharjooram] dactylifera, linn., palmaceæ [vricsham, 149]. Diœcious tree; tall; usually unbranched stems, pinnate or fan-shaped leaves, flowers growing on a single or branched spadix, covered by a spathe, fruit being a nut, drupe, or berry, and seeds containing cartilaginous or hard albumen, with a small embryo in a cavity remote from the hilum; the stem exhibits endogenous growth, hardest part being outside. The trees that grow here are very inferior to those brought from persia and arabia; the fruit consists more of seed than of pulp, and altogether is only about one-fourth the size of the arabian kind. Fruits imported dried; these are cylindrical, drupe twelve to eighteen lines long, covered with a thin, smooth, deep brown pellicle, enclosing a rich pulp and bony nut; the pulp is nearly inodorous, the taste sweet, mucilaginous and agreeable. A persian poem celebrates the arabian date and its 360 uses. Fruits used medicinally as demulcents and expectorants; continued use produces soreness of gums. Edible uses of fruit well known.—*Barren date* (ಗೊಡ್ಡು ಈಚಲು - godduíchalu, Can.). From giving neither fruit nor toddy. Same as Indian sago palm.—*Chinese date* (چینی کا سندولا - chínkásandolá, Hind.). Same as Bair.—*Indian date* (خرماہ ہندی - khurmahihindí, Hind.). Same as Tamarind.—*Marsh date* (हिन्ताल - hintála, San.; గిరుకతాటి - girukatáti, Tel.). San. from (hi, san. to grow + tála, san. palm). Tel. from (giraka, tel. short + táti, tel. palmyra tree, borassus flabelliformis, linn.). Title otherwise Dwarf palmyra, Hintaul. Botanically Phœnix [kharjooram] paludosa, roxb., palmaceæ [vricsham, 149]. Stem straight, 6–16 feet, sub-arboreous; pinnæ solitary, ensiform, flaccid, bifarious; embryo in the base of the seed; flowering in the hot season; fruit sessile, on thick knobs pointing downwards, first yellow then red, lastly black purple, oval. The leaves serve for thatch; gives no toddy [q.v.]. The trunks of the smaller trees serve for walking-sticks, and the natives have an idea that snakes get out of the way of any person having such a staff; the larger trees serve for rafters to houses [taur].—*Small date* (सानुइच्लारूकु - sánuichlárúku, Conc.; سندولے کا جھاڑ - sandolekájhár, Dec.; ಸಣ್ಣ ಈಚಲು - sannaíchalu, Can.; చిట్టీత - chittíta, Tel.; ഈന്ത - ínta, Mal.; சிறுயிஞ்சு - shiruyíñju, Tam.). Conc. like canarese. Dec. from (sandolá, hind. wild date + jhár, hind. tree). Can. from (sanna, can. small + íchalu, can. wild date, phœnix sylvestris, roxb.). Tel. from (chiru, tel. small + íta, tel. phœnix sylvestris, roxb.). Tam. from (shiru, tam. small + ínju, tam. phœnix sylvestris, roxb.). Can. also (íchal). Mal. also (chittíntal), meaning small + phœnix dactylifera, linn. Tam. also (ínju), meaning beneficent tree; (índu), meaning beneficent tree. Title otherwise Eenjoo, Eetcha maram. Botanically Phœnix [kharjooram] farinifera, roxb.,

palmaceæ [vricsham, 149]. Alias Phœnix pusilla, pygamæa. Shrub, 2-3 feet; leaves pinnate; leaflets long, narrow, pointed; spathe axillary, one-valved; spadix erect, much ramified; branches simple, spreading; male flowers, calyx three-toothed; petals three; stamens six; female flowers, petals three; berry black, shining; flowers in january and february, fruit ripens in may. A dwarf species; small almost stemless palm of sandy lands. Stem gives a sago [q.v.]; in order to separate it from the numerous white fibres in which it is enclosed, the stem is split into six or eight pieces, dried, beaten in mortars, and then sifted; this is then boiled to a thick gruel; it is not so nutritive as common sago, and it has a bitter taste. Fruit has a small quantity of pulp, sweet and mealy, eaten by natives. The leaf stalks are used for making baskets [tokrah] and for other purposes; the plant also contains a fibre; gives no toddy [taur].——*Stemless date* (جنگلی کھجور - janglíkhajúr, Hind.; پنڈ کھجور - pendkhajúr, Dec.; பேரீஞ்சு - pérínju, Tam.). Hind. from (janglí, hind. wild + khajúr, hind. date). Dec. from (pinda, san. morsel + kharjúra, san. phœnix); edible variety. Tam. from (pér, tam. large + íñju, tam. phœnix). Title otherwise Wild date. Botanically Phœnix [kharjooram] acaulis, roxb., palmaceæ [vricsham, 149]. Fronds radical pinnate, pinnæ plicate, ensiform, arranged in sub-opposite fascicles, lower ones thorny; flowering in november and december; is not absolutely stemless; fruit small, eaten by natives; gives no toddy [taur].——*Wild date* (खर्जूर - kharjúra, San.; खजूर - khajúra, Mahr.; سندولے کا پیڑ - sandolekáper, Hind.; سندولے کا جھاڑ - sandolekájhár, Dec.; ಈಚಲು - íchalu, Can.; ಈಚಲು - íchilu, Too.; ఈత - íta, Tel.; കാട്ടീന്ത - káttínta, Mal.; காட்டீஞ்சு - káttíñju, Tam.). San. from (kharj, san. to cleanse), supposed to purify blood and bile. Mahr. from sanscrit. Hind. from (sandolá, hind. wild date + per, hind. tree). Dec. from hindostany. Mal. from (kátu, mal. wild + ínta, mal. date tree, phœnix dactylifera, linn.). Tam. from (kádu, tam. wild + íñju, tam. date). San. also (kharjúrí), meaning cleaning; (róshana), meaning angry; (kapilá), meaning tawny-colored [kamela]; (parushaka), meaning rough. Mahr. also (shindí). Hind. also (khajúr), meaning date; (sendíkájhár), meaning toddy tree. Can. also (kalluíchalu), meaning stone + the tree. Tel. also (peddaíta), meaning large + the tree. Mal. also (ínta). Tam. also (íççambanai), meaning date + palmyra tree, borassus flabelliformis, linn.; (madal); (karavam). Title otherwise Cautt eenj, Indian wine palm, Khajoor, Sandolah, Shendhy. Botanically Phœnix [kharjooram] sylvestris, roxb., palmaceæ [vricsham, 149]. Alias Elate sylvestris. Height 30-40 feet; fronds 10-15 feet long; petioles compressed towards the apex with a few short spines at the base; pinnæ numerous, densely fascicled, ensiform, rigid; male spadix 2-3 feet long; spathe of the same length, separating into two valves; spikes numerous towards the apex of the peduncle, 4-6 inches long, slender, very flexuose; calyx cup-shaped, three-toothed; petals longer than the calyx, ridged and furrowed on the inside; female spikes 1½ feet long, not bearing flowers throughout, the lower 4-6 inches; flowers distant; petals three, very broad; style recurved; fruit scattered on long pendulous spikes, roundish; wild and cultivated; appears in all soils and situations; flowers at beginning of hot season. When not stunted in its growth by the extraction of its sap or toddy, it is a very handsome tree, with a dense crown of leaves spreading in a hemispherical form on its summit; the leaves are composed of numerous leaflets or pinules about 18 inches long; the fruit is only about one-fourth the size of the arabian variety; when ripe, small, oval-shaped; dark-colored; the palm has the general characteristics of the family, but is inferior to the palmyra [q.v.], cocoanut [q.v.], &c.; a tree is fit for being cut for toddy [q.v.] when ten years old and lasts for this purpose about twenty years more. Natives chew the fruit in the same manner as they do the areca-nut [q.v.] with the betel-leaf [q.v.] and choonam [q.v.]. The juice is extracted as follows:—the lower leaves and their sheaths are removed, a notch is cut into the pith of the tree close to the remaining leaf sheaths, and a thin channelled slip of wood or piece of the date or palmyra leaf is inserted into the notch; the juice issues from the notch, is conducted by the channel and falls into an earthen pot which is tied on to receive it; in the cold season from the end of october to february, the trees are thus tapped in the evening, and the juice is taken before sunrise. It is used in its unfermented fresh state, or in its fermented state. In its fresh state it is used in two ways. In a small proportion it is sold in the early mornings as khajoorras, it is then the sweet juice and is drunk by the natives as such. In a larger proportion, also in the early morning, the sweet juice is collected, generally under some shady tree, in large, open earthen vessels and boiled over wood fire until the juice becomes thick; it is then taken off the fire, and dried by exposure; the substance obtained is jaggery [q.v.] or goor [q.v.], or raw date sugar [q.v.]; the quantity of raw sugar thus made every year is large. A certain quantity of the juice, instead of being used in the two ways above described, is exposed to the sun's influence and soon ferments, and is then known as toddy; toddy is used as an intoxicating drink, and as yeast in making bread. Fibrous leaflets and fibre from petiole made into mats [boriyah], ropes, and baskets [tokrah]; gives gum, little known. Wood light brown, the outer portion hard and durable; sometimes used for building, water conduits, and temporary bridges. There is a Tamul proverb:—ஈச்சங்கள்ளு எதிலும் குளிர்ச்சி—"Date-"palm toddy is the coolest of all beverages [taur]."

KHARNOOB (خرنوب - kharnúb, *Ar.*). Same as Carob.

KHARWAH (کھاروا - khárwá, *Hind.*). From (kahár, hind. member of the boy caste); generally used by them. Coarse red cotton cloth, used to wrap up books, parcels, &c.

KHAS (خاص - khás, *Hind.*). Own, private [khood]. Honorifically for the possessive of the second person.——*Khausa* (خاصه - khásah, Hind.; ఖాసా - khásá, Tel.). From (khás, ar. own). A slave; hereditary bondsman in the families of Teloogoo rajahs.——*Khawaus* (خواص - khawás, Hind.). Plural of (khás). Attendants.

KHASKAS (خشخش - khashkhash, *Dec.*). Seeds of Papaver somniferum [aphainam]. Oil expressed is demulcent and used in cookery.

KHAT (خط - khatt, *Hind.*). From (khatta, ar. to make a mark). An entry in a book; also a letter, especially as used in zemindarry correspondence; also a figure drawn by exorcists.——*Khautadar* (کھاتادار - khátadár, Hind.). A mercantile correspondent.

KHATEEB (خطیب - khatíb, *Hind.*). From (khataba, ar. to read) [khitaub, khootba]. The reader of khootba in a musjid [inam, musjid], who delivers the same standing on the second step of the mimbar [q.v.] with wooden staff in his right hand.

KHATIAN (کتیاں کا گوند - khatiyánkágond, *Hind.*). Gum of Silk-cotton tree.

KHATPAT (کھٹ پٹ - khatpat, *Hind.*). Literally wrangling. Intrigue and corruption.

KHATWAM (खट्वा - khatvá, *San.*). From (khatt, san. to screen). Bedstead.——*Khatwaungam* (खट्वाङ्ग - khatvánga, San.). From (khatvá, san. bedstead + anga, san. limb). A club, shaped like the foot of a bedstead, with a skull at the top; the weapon of Shiva [q.v.] and carried by ascetics.

KHATZUM (کالی زیری - kálízírí, *Dec.*). Means black cummin. Same as Wild jeerah.

KHAUDIM (خادم - khádim, *Hind.*). From (khadama, ar. to serve). A servant, slave, specially person in charge of tombs [goombaz] mosques [musjid], &c. Prefixed to an alam makes a lacab; as Khaudim hoossain, slave of hoossain; mostly Shiah [q.v.] names [ism].

KHAUK (خاک - khák, *Hind.*). From persian. Earth [munn]; clay. Khauk i cheeny, from (chín, pers. china) is Kaolin [q.v.]. Khauk i kirmiz, from (kirmiz, pers. red) is Potter's clay [calimunn]. Khauk i shifah, from (shifá, pers. cure) is earth of the plain of carbalah in arabia, made into rosaries and venerated especially by shiahs [q.v.]. Khauk i zighaul, from (zighál, pers. live-coal) is coal-dust.——*Khauky* (خاکی - khákí, Hind.). A light drab or chocolate colored cloth. Produced by boiling myrobalans [q.v.], gall-nuts [mauchicoy], and sulphate of iron [annabhaidy] together; in many parts of the country, a natural earth is used. Also one of the Veishnava sects of modern origin; they smear the body with ashes, whence the name; they add the worship of Hanooman [q.v.] to that of Vishnoo [q.v.].

KHAUKSEE (خاکشی - khákshí, *Hind.*). Retty seed [indian liquorice].

KHAULY (خالی - khálí, *Hind.*). Vacant.——*Khauly zameen* (خالی زمین - khálízamín, Hind.). From (above + zamín, pers. land). Lands remaining uncultivated.

KHAUM (خام - khám, *Hind.*). Raw, unsettled as an account, gross revenue as distinguished from nett revenue of a village. The settlement made with ryots directly without intervention of at hird party [ryot, ryotwarry, zemindar]. Khaum lekka is a rough account. Khaum vasool are gross collections.

KHAURIJ (خارج - khárij, *Hind.*). From (kharaja, ar. to extract). Dues excluded from the gross crop.——*Khaurjee* (خارجی - khárjí, Ar.). Separatists. A sect of Mahomedans who hold that any man may be promoted to the dignity of caliph [q.v.] even though he be not of the Koresh [q.v.] tribe [soonnee]. They do not reckon Ally [q.v.] among the legal successors of the prophet [mahomed] and consider him as the assassinator of his predecessor Osman [q.v.]; they are therefore opponents of Shiahs [q.v.]. They are strict predestinarians [tafweez]. Their own chiefs according to them are the lawful imaums [q.v.] after Omar.

KHAUTOO (خاتو - khátu, *Hind.*). Female pataun suffix [khanam]; as Fatimah khautoo, alam + alaumat [ism].

KHAUVIND (خاوند - khávand, *Hind.*). From (khudáwand, ar.). Meaning god-like or master.

KHEDDAH (کھیدا - khedá, *Hind.*). From (khedná, hind. to chase). Enclosure to entrap wild elephants [q.v.]. It is made in thick jungle near an elephant cover; it is about a hundred yards in diameter; surrounded by a ditch except at one point,

where a chain-and-log gate is suspended between two trees two guiding trenches converge from the cover to this entrance.

KHEIR (خير - khair, *Ar.*). From (khára, ar. to be favorable). Excellent. Part of lacab; as Kheir ood deen, excellent in religion [ism].——*Kheirauty* (خيراتى - khairátí, Hind.). Charity [inam].——*Kheir khah* (خيرخواه - khairkhwáh, Hind.). From (above + khwáh, pers. wisher). A well-wisher, a common signature to an anonymous petition [arzee]. Cf. Aucausha ramayya.——*Kheiroo* (خيرو - khairú, Hind.). Charitable. In composition make a lacab; as Kheiroo bee, charitable lady [ism].

KHEIR (کير - khair, *Hind.*). From (khadira, san. acacia). Acacia [cantalam]. Plant second term. Ex.:—Acacia ferruginea (pándhrákhair), white acacia; Acacia sundra (lálkhair), red acacia. See gloss. paragraphs.

KHES (کهيس - khes, *Hind.*). Cotton diaper used by natives as a dress; in demand by Europeans for table-linen purposes.

KHET (کهيت - khet, *Hind.*). From (kshétra, san. field) [cshetram]. Field.——*Khetry* (ఖెత్రి - khetri, Tel.). Corruption of cshatriya. Title in zemindarry [q.v.] families in Vizagapatam.

KHETACAM (खेटक - khétaka, *San.*). From (khé, san. to consume). Club of Doorga [q.v.].

KHIDMAT (خدمت - khidmat, *Hind.*). Service. Khidmatgar is a personal servant.

KHILAT (خلعت - khilat, *Hind.*). From (khala, ar. robe of honor). A dress of honor presented by superior authority as a mark of distinction. A complete khilat may include arms [sillah], or a horse [ghorah], or an elephant [q.v.].

KHIRAD (خرد - khirad, *Hind.*). Understanding.——*Khirad afroz* (خرد افروز - khiradafroz, Hind.). From (above + afroz, pers. kindle). Oordoo [q.v.] version of Punchatantram [q.v.] by Hafeez ood deen ahmed published in 1803.

KHIRAUJ (خراج - khiráj, *Hind.*). From (kharaja, ar. to pass out). Tax; applied originally especially to the tribute levied by Mahomedans upon infidels [caufir] after conquest, afterwards to the general land revenue [lakhiraj].

KHIRNY (کهيرنى - khírní, *Hind.*). From (kshíra, san. milk). Same as Monkey-face paulay.

KHITAUB (خطاب - khitáb, *Hind.*). From (khataba, ar. to address) [khateeb, khootba]. Honorific surname, expressive of zeal for faith, political importance, &c., conferred by Caliphs [q.v.] and Mahomedan sovereigns. Ex.:—Ameen ool moolk, Ameen ool oomara, Ameer ood dowla, Asaf jung, Azeem jah, Badrool islam, Cooth ool aulam, Goozaurish khan, Hoomayoon jah, Shums ool oolamah [alam, lacab], Tauj oosh shareeyat. Distinguish from Kitaub.

KHODA (कोद्रव - kódrava, *San.*; كودرو - kodro, *Hind.* and *Dec.*; ಆರಿಕೆ - árike, *Can.*; ఆరికె - árike, *Tel.*; କୋଦ୍ଦି - khoddi, *Oor.*; വരക - varaku, *Mal.*; අමු - amu, *Singh.*; சிறுகூவரகு - shirugúvaragu, *Tam.*). Title from hindostany. San. from (ku, san. prefix of deficiency + udra, san. water); requiring little water, as a dry crop. Hind. and dec. from sanscrit. Mal. from (varaka, san. desirable). Tam. from (shiru, tam. small + kúvaragu, tam. raggy). San. also (kóradúsha), meaning blood spoiling. Hind. also (kodrocháwal), referring to millet rice. Can. also (hárakahullu), meaning panicum semi-verticillatum, rott. + grass. Tel. also (áriga); (állu), pl.; (níráruga), meaning water + the plant; (pátiárige), meaning high ground + the plant; (asakalu); (nallaasakalu), meaning black + the grain. Title otherwise Arikey, Hurreek, Kodo millet, Kora millet, Little millet, Punctured paspalum, Small varagoo. Botanically Paspalum scrobiculatum, linn., graminaceæ [vricsham, 156]. Alias Paspalum commersonii, frumentaceum, kora, orbiculare. Kora from hindostany. Root fibrous; culm branched, erect, 1–2 feet; sheaths glabrous or hirsute at the base, ciliated; ligula very short rounded; leaves linear, sub-acuminate, glabrous; racemes two to three approximated, alternate; spikelets biserial, short-pedicelled, oblong-roundish, acutish; glumes five to seven-nerved, upper one scrobiculate at the sides. A millet found near water edges; grain minute, black and globular; five-month crop; produces a sort of intoxication; straw given as fodder to cattle, whether green or dry; the poorest of millets [q.v.], and only cultivated by those living in the most barren parts of the country; when cooked it tastes somewhat like rice [q.v.]. There is a Teloogoo proverb:—ఆరికె ... —"A crop of arikey sown in ardray "[caurtey] is as safe as food served on a leaf," that being its best season. Paspalum distichum, burm., is silt grass [ghaus].

KHOJA خوجه - khojah, *Hind.*). From (khwájah, pers. master). Tribe of Mahomedans, mostly of the Shiah [q.v.] sect; they have a separate religion of their own consisting of the ten incarnations [avatar] of the Hindoos grafted on the Shiah tenets. They do not go to the Musjid [q.v.], but have a separate place of worship [namauz]. There are some reformers of late among them who have become Soonnees [ismailia].

KHOND (కోడు - kódu, *Tel.*). From (konda, tel. hill). English name for the Kooi [q.v.] dravidian language and people. Also spelt in english Khand. An aboriginal tribe, whose principal habitat now lies in Orissa [q.v.], the eastern parts of the Central provinces, and the northern hill districts of this presidency. Allied to the Gonds [q.v.]. Khonds are wiry and active, have an upright gait, carry their heads erect, have straight noses, narrow nostrils, full but not thick lips, black eyes, cheek-bones somewhat prominent, slightly projecting lower jaw, white and regular teeth, with oval faces, as if of a mixed caucasian and mongolian origin. The eye is quick and brilliant, the general expression of the face intelligent, determined, and good-humoured; the skin is clear and glossy, and it varies little in color from a light bamboo to deep copper; they have little or no beard; the men are of medium height, stout, strong, and not uncomely, with aquiline noses, high cheek-bones, and receding foreheads; the women are short-statured and coarse-featured; they wear a scanty kilt-like piece of cloth reaching from the waist to the middle of the thigh; both men and women wear a profusion of brass rings and armlets. The religion of the Khonds is special to themselves. Their supreme god is called Boorapennoo, the god of light; who created for himself a consort, the earth-goddess, called Taripennoo, the source of evil in the world. They believe that the worship of the earth-goddess by human sacrifice is necessary for their agricultural prosperity. This [meriah] and the destruction of female infants formerly prevailed. The Cottiya or upland Khonds on the Calahundy and Jeypore borders are the most martial. The tribes occupying the hills bordering on Ganjam, with the exceptiom of the Simily khond tribe of Bodagooda, are somewhat more civilized; and in the Goomsore maliahs [q.v.] where many of them speak Ooriya [q.v.], there is not much perceptible difference between the Khond tribes of the hills and those living in the jungle villages at the foot of the ghauts [q.v.]. The Khonds dwell in villages in the forests. Each village consists of two streets composed of a double row of huts, well-built of timber, daubed with mud, and having thatched roofs. In some cases the villages are stockaded. Their agriculture is of the rudest kind; a piece of forest is marked out and the ground cleared by fire; small holes are then chopped in the earth by axes and the seeds are dropped in; after a year or two this is deserted for a fresh piece of forest land cleared in like manner. The family is the basis of their society, and khond sons have no property during their father's life; on failure of male issue, the land passes to the village. Numbers about 250,000 in presidency, almost all in Ganjam and Vizagapatam. See vol. I (36); II, 141.

KHONGAR (ఖొంగర - khongara, *Tel.*). From (khaja, san. killing). A class of professional robbers once employed by the Jeypore chiefs [jauty].

KHOOBAUZY (خبازى - khubází, *Hind.*). From (khubz, ar. bread); from flat round fruit. Mallow. Botanically the Malva genus, malvaceæ [vricsham, 25]. Herbaceous plants, annual or perennial and shrubs of variable height; they all possess tough fibre and abundance of mucilage; flowers frequently showy but of short duration; mainly tropical. The species best known to the natives is rotundifolia [wild bengal gram]. Others are:—sylvestris, verticillata.

KHOOD (خود - khud, *Hind.*). From persian. Self, own [khas]. Honorifically for the possessive of the second person. ——*Khoodadad circar* (خداداد سركار - khudádádsarkár, Hind.). The God-given-rule; the title assumed by Tippoo sultan.——*Khoodah* (خدا - khudá, Hind.). From (khud, pers. self + á, pers. come). God. A Mahomedan alam when followed by suffix denoting devotion; as, Khoodah buksh, alam + alaumat [ism]. ——*Khoodawund* (خداوند - khudáwand, Hind.). From (khudá, pers. god + wand, pers. like). Lord. A form of address to superiors, like your worship.——*Khoodkasht* (خود كاشت - khudkásht, Hind.). From (above + kásht, pers. sown). Self-sown; not let out to a farmer. Also ryots [q.v.] cultivating in their own village, as opposed to strangers [pykasht].

KHOOLFAH (خلفه - khulfá, *Dec.*). Corruption of pers. (khurfah). Same as Indian purslane.

KHOOLGAH (महिष - mahisha, *San.*; جاموس - jámús, *Ar.*; گاوميش - gáumesh, *Pers.*; کلگا - khulgá, *Hind.*; كارباو - kárbau, *Malay*; ಕೋಣ - kóna, *Can.*; ... - erme, *Too.*; దున్న - dunna, *Tel.*; എരുമ - erima, *Mal.*; මීමා - mímá, *Singh.*; எருமை - erumai, *Tam.*). Title from hindostany. San. from (mah, san. to value highly). Ar. from persian. Pers. from (gáú, pers. cow + mesh, pers. sheep). Tel. from (dunnu, tel. to plough). Singh. from (mi, singh. buffalo + má, singh. great). Tel. also (barre), from bellowing. Title otherwise Buffalo [q.v.]. The earlier Anglo-indians gave this name to the common Indian ox [maud], and then present species was called the water-buffalo. Bubalus arni, bovinæ, bovidæ, ruminantia, mammalia [sastanam, 23], of naturalists [jantoo]. Specific is from sanscrit (aranya), wild. The wild buffalo inhabits Thibet, but is domesticated in India. It is the only indigenous ruminant of Ceylon. There is scarcely an animal upon which domesticity has made so little impression,

the wild being only larger and fiercer. Of the Mysore buffalo there are three varieties, the Hoolloo, the Gowzry or Goozerat, and the Chokkatoo [q.v.] which comes from the country bordering the river Kistna; of these the Hoolloo is by far the most common, and is the native breed of the country. The Todah buffalo is well known on the Neilgherry hills, where each Todah [q.v.] mund [q.v.] possesses a herd; they come from Mysore; differ from the kind generally met with on the plains. The common domestic buffalo is extensively used both for draught and milk, and milk is richer than that of the cow [pashoo]. The male buffalo is frequently sacrificed by the aboriginal races. The following is the description. Forehead convex, rounded; horns large, black; general color dark blackish-slaty; hair scanty, black. Length 10½ feet and upwards from snout to root of tail which is short, not exceeding lower than the hock; tuft of hair on the forehead, over the eyes, and on the knees. Height at shoulder up to 6¾ feet. The horns [sing] are of two kinds; the one very long, nearly straight, well thrown back; the other much shorter and well curved, more directed upwards. The horns of the bull are thicker than those of the cow, but the horns of the cow are larger. Alone perhaps of all wild animals in India, the buffalo will charge unprovoked. There is a Tamul proverb:—அவனுக்கும் இவனுக்கும் எருமைச் சங்காத்தம்—"The intimacy of these two persons is that of "the buffalo," referring to its gregariousness. And another:—எட்டு வருஷத்து எருமைக்கடா ஏரிக்குப்போக வழி தேடுகின்றது—"A buffalo eight years old is at a loss to "find its way to the tank;" derisive. And another:—எருமைக் கோமயம் எக்கியத்திற்கு ஆகுமா—"Will the dung of the "buffalo serve for sacrificial purposes?" it is never so used. And another:—வீட்டுக்கு வாய்த்தது எருமை, மேட்டுக்கு வாய்த்தது போர்—"A buffalo makes a house prosper, a "corn-stack makes high ground conspicuous;" referring to its utility. There is a Teloogoo proverb:—[illegible]—"As you look at the mother before "taking the daughter, so inquire how a buffalo milks before you "purchase."

KHOON (خون - khún, *Pers.*). Blood.——*Khoony* (خونی - khúní, Hind.). Murder [colley].

KHOOR (خر - khur, *Hind.*). Sun.——*Khoorsheed* (خورشید - khurshíd, Pers.). Part of lacab; as Khoorsheed bee, sun of ladies; Khoor sheed jah, high as sun [ism].

KHOORD (خرد - khurd, *Ar.*). Small. Plant second term. Ex.:—Alpinia officinarum (khusravidárúikhurd), small king's drug; Bambusa stricta (banskhurd), small bamboo. See gloss. paragraphs.

KHOOSH (خوش - khush, *Pers.*). Happy. Part of lacab; as Khoosh kadam, happy gift. Female servant's name [ism].——*Khooshbaush* (خوش باش - khushbásh, Hind.). From (above + básh, pers. remain). One who lives at ease; a cultivator who occupies nuttam [q.v.] lands free or on easy rent [sookhavausy].

KHOOSROW (خسرو - khusrau, *Pers.*). King. Plant first term. Ex., where transl. is of second term:—Alpinia galanga (khusravidárúikalán), drug + large; Alpinia officinarum (khusravidárúikhurd), drug + small. See gloss. paragraphs.

KHOOTBA (خطبه - khutbah, *Hind.*). From (khataba, ar. to discourse) [khateeb, khitaub]. A discourse delivered every Friday [shamba] after the forenoon service in the principal mosque [musjid], when the ruling power is prayed for. Also on the two great festivals [eed] in the morning after sunrise. The right of being named in the khootba and that of coining money are two of the principal privileges of the sovereign.

KHORASSAN (خراسان - khurásán, *Hind.*). Country between the Caspian and Afghanistaun.——*Khorassan mint* (حبق خراسانی - habakikhurásání, Ar.). Same as Country sorrel.——*Khorassan omam* (కురాసానిఓమము - kurásániómamu, Tel.). Plant name common to:—Hyoscyamus niger, Seseli indicum. See gloss. paragraphs.

KHOW (کهو - khaú, *Hind.*). Underground granary [gunj], common in hill forts.

KHUBBER (خبر - khabar, *Hind.*). From (khabura, ar. to know). News; especially as a sporting term, news of game.

KHUD (کهڈا - khaddá, *Hind.*). A precipitous hill-side.

KHUN (کهن - khan, *Hind.*). A day of Mahomedan lunar fortnight. For a day of Hindoo fortnight or pacsham [q.v.] see Tity.

KIBLA (قبله - kiblah, *Hind.*). From (kabala, ar. opposite). The direction in which all Mahomedans must pray, whether in their public or in their private devotions [namauz], namely towards Mecca. The direction is known and kibla constructed in mosques [musjid] according to the position of the pole-star [alrooccabah, nacshatram] by means of an astrolabe [q.v.] for finding the bearing of Mecca.

KIDANG (کڈنگ - garang, *Hind.*; கிடங்கு - kidangu, *Tam.*). Store-house; suffix in place names [godown].

KIDDY (கிட்டி - kitti, *Tam.*). From (kittu, tam. to approach). Finger-pincher made by two slips of bamboo [q.v.], &c., for torturing.

KIFAUYAT (کفایت - kifáyat, *Hind.*). From (kafá, ar. to suffice). Profit, gain resulting from lands held at reduced rates, surplus.

KILA (قلع - kila, *Hind.*). A fortress [cottay]. Killadar is the governor of a fort. Cf. Cotwaul.

KILKILAH (मत्स्यरङ्ग - matsyaranga, *San.*; کلکلا - kilkilá, *Hind.* and *Dec.*; బుచ్చిగాడు - buççigádu, *Tel.*; പൊന്മ - ponma, *Mal.*; மீன்கொத்தி - míngotti, *Tam.*). Title from hindostany. San. from (matsya, san. fish + ranga, san. love), fish loving. Hind. and dec. from chirping. Tel. from (buççi, tel. little + gádu, tel. personal suffix). Mal. from (pon, mal. gold + váya, mal. mouth). Tam. from (mín, tam. fish + kottu, tam. to peck). San. also (kuttaka); (suchitraka), meaning variegated. Hind. also (chhotákilkila), meaning small king-fisher; (chhotámachrangá), meaning small + white-breasted king-fisher. Tel. also (lakumuki), meaning small + face; (nílabuççigádu), meaning blue king-fisher. Mal. also (malapponma), meaning hill + king-fisher. Tam. also (viççuli), meaning swift bird; (shaççili), meaning beaked, from the long beak. Halcyonidæ family, fissirostres, insessores, aves [pacshy, 9], of naturalists [jantoo]. King-fishers. Divided into Halcyoninæ and Alcedininæ. Brown-headed king-fisher is halcyon leucocephalus, halcyoninæ; alias halcyon brunniceps, capensis, gurial, javana. White-breasted king-fisher is halcyon fuscus, halcyoninæ, alias alcedo fusca, halcyon smyrnensis. Black-caped purple king-fisher is halcyon atricapillus, gmel.; alias alcedo brama, pileata. Ruddy king-fisher is halcyon coromandelianus, alias halcyon coromander, schlegelii, lilacina, calipyga; very rare here in spite of name. White-collared king-fisher is todiramphus collaris, scop.; alias alcedo chlorocephala, sacra. Three-toed purple king-fisher is ceyx tridactyla; alias alcedo erythaca, purpurea, microsoma; a coast bird. Common indian king-fisher is alcedo bengalensis, alcedininæ; alias alcedo ispidioides; head and hind neck dusky feathers edged with pale blue; rufous band from base of nostrils to end of ear-coverts, below this dark band, back, rump and upper tail-coverts pale-blue, wings and tail dull green-blue; wing-coverts speckled with pale-blue; chin and throat white, rest of lower plumage bright ferruginous; in young bluish-green tinge is the prevalent tint, in adults a pure blue; blackish above, orange beneath; irides dark brown, legs orange red; length 6½ to 7 inches; a diminutive of the european bird. Pied king-fisher, cowryaula kilkilah in hindostany, is ceryle rudis, alcedininæ; alias ceryle varia; ispida bicincta, bitorquata; very common on banks of rivers and tanks.

KILOOVAY (கிளுவை - kiluvai, *Tam.*). From (kilai, tam. to ramify); from many branches and branchlets. Botanically Balsamodendron [balsam] berryi, arn., burseraceæ [vricsham, 35]. Alias Amyris gileadensis; Balsamodendron gileadense; Protium gileadense. Distinct however from Balm of gilead [q.v.]. Ultimate branches spinescent, with small short abortive branchlets bearing the leaves and flowers at their extremities; leaves palmately three-foliolate; leaflets roundish-obovate, obtuse, obscurely crenulate, glabrous; peduncles one-flowered, shorter than the petioles. Shrub or tree, covered with flower and fruit in february and march. Very common as a hedge plant but seldom flowering in that state, as the inflorescence is either attacked when young by some insect or rendered abortive from a successive propagation from cuttings. The whole tree has a grateful fragrance, gum-resin [googal] exuding. Useless wood.——*Hill kiloovay* (కొండమామిడి - kondamámidi, Can.; వేటపత్రి - vétapatri, Tel.; மலைக்கிளுவை - malaikkiluvai, Tam.). Can. from (konda, tel. hill + mámidi, tel. mango, mangifera indica, linn.). Tam. from (malai, tam. mountain + kiluvai, tam. the plant). Tel. also (kondamámidi), meaning hill + mango tree, mangifera indica, l.; (kondarégu), meaning hill + jujube tree, zizyphus jujuba, lam. Tam. also (karppúrakkiluvai), meaning camphor + the plant; (malaimá), meaning mountain mango. Title otherwise Hill jujube, Hill mango. Botanically Protium caudatum, w. & a., burseraceæ [vricsham, 35]. Leaves long-petioled with short lateral leaflets, the terminal one with a long petiolule, ovate entire; cymes bracteate at the branches, the bracteoles beneath the flowers very minute; flowers polygamous, small; calyx lobes deltoid, acute, as long as broad; petals about twice as long as calyx lobes; drupe about the size of a pea [calauyam], nearly globular, subtended by the persistent calyx. Green barked tree, common as avenue [shaulay] tree, though bare of leaves for some months towards end of cold season and beginning of hot; whole tree very odoriferous, leaves and bark having fragrance something like mangoes [q.v.]. Bark and all tender parts on being wounded discharge pale, whey-colored liquid, fragrant something like orange [q.v.] leaf; wood very brittle and full of sap, of no value. Another species is pubescens.

KILTAUN (കില്ത്താൻ - kiltán, *Mal.*). Island; pop. 790. One of the Laccadive group attached to South canara.

KIM (किं - kim, *San.*). What.——*Kimpooroosham* (किंपुरुष - kimpurusha, San.). From (above + purusha, san. man). Same

as Kinnaran.——*Kingry* (کنگری - kingrí, Hind.; கின்னரி - kinnari, Tam.). From (kinnara, san. a divine chorister). A musical instrument something like but smaller than the veenay [q.v.], having only two steel strings and three or four pumpkins [carcauroo] as sounding boards; fixed frets [sangeetam].——*Kinnaran* (किन्नर - kinnara, San.). From (above + nara, san. man). Beings with the form of a man and the head of a horse [ghorah] dwelling on Keilausam [q.v.]. They are also called Ashwa mookha, Tooraungavactra and Mayoo. Celestial choristers [gandharvan, matam]. See vol. I (78).

KIMEDY (కిమిడి - kimedi, *Tel.*). From (akhimundo, oor. eye-headed). Epithet of an aboriginal ruler. Zemindarry tract; Ganjam dist. On western border of district. Contains three estates:—Parlakimedy; Pedda kimedy or Boda kimedy, also called Vizianagram; and Chinna kimedy or Prataupagherry. Each estate consists of two distinct divisions, a lowland and an upland tract; the former held as an ordinary zemindarry [q.v.] under the regular district officers, and the latter under the supervision of a special Government agency. The whole country was ruled from a remote date by a descendant of the royal house of Orissa [q.v.]. In 1607 the Kimedy rajah allotted Vizianagram and Prataupagherry to his younger son Ananga bheema deo kesary, whose descendants divided the estate into two zemindarries, though they were temporarily reunited under Bheema deo. The latter proving troublesome, his fort at Coorlah was taken in 1769. The following year, in consequence of his suspected intrigues with Seetaram raj of Vizianagram and the Mahrattas, Prataupagherry his principal stronghold was seized. On this the Rajah accepted the terms offered him; but in 1772 it was again found necessary to enter the country. The British gained possession of all his forts, and the estate was divided between his two sons. The brothers ravaged one another's territory and burnt one another's villages, till in 1800 they were both thrown into jail in Ganjam for disturbing the peace. They were replaced by their respective sons, and the feud was carried on until very recently. The country is now peaceful and flourishing, and connected by road with the coast. The principal towns are Digoopoody, Parlakimedy and Poodamary.

KINAR (കിണറ് - kinaru, *Mal.*; கிணறு - kinaru, *Tam.*). From (khan, san. to dig). Well [kainy].

KINAURAH (کنارا - kinárá, *Hind.*). From persian. Side, bank, shore.——*Kinaury* (کناری - kinárí, Hind.). From (kinárah, pers. edge). Gold and silver lace [gotah, sarigay].

KINCOB (کمخاب - kamkháb, *Hind.*). From (kam, pers. privative + kháb, pers. soft down). Brocade. Silk [puttoo] stuff interwoven with gold or silver thread [sarigay].

KING (شاهی - sháhí, *Hind.*). Prefix.——*King-crow* (भृङ्गराज - bhringaraja, San.; هزاردستان - hazárdástán, Pers.; کولسا - kolsá, Hind. and Dec.; ಭರದ್ವಾಜ - bharadvája, Can.; పసలపోలిగాడు - pasalapóligádu, Tel.; കാക്കത്തമ്പുരാട്ടി - kákkattampurátti, Mal.; கரிக்குருவி - karikkuruvi, Tam.). Title from habit of pursuing crows [caurvam], hawks [shyainam], and kites [chillam], to drive them away from its nest. San. from (bhringa, san. bee + rája, san. king) [bhangrah]. Pers. from (hazár, pers. thousand + dástán, pers. tale); from variety of its notes. Hind. and dec. means charcoal, from color. Tel. from (pashuvu, tel. cattle + póli, tel. proper name + gádu, tel. personal suffix), from being seen perched on cattle. Mal. from (kákka, mal. crow + tampurátti, mal. queen). Tam. from (kari, tam. black + kuruvi, tam. bird). Hind. also (kotwál), meaning guard; (buchangá); (dhapri); (pahárîbuchangá), meaning hill drongo; (chaptiyá), meaning flat; (chhotákesráj), meaning small + drongo; (bhímráj); (kishanráj), meaning black king; (kesráj). Tel. also (bháradvájamu); (étrinta); (kondapasalapóligádu), meaning hill drongo; (nallapasalapóligádu), meaning black drongo; (tókapasalapóligádu), meaning long-tailed drongo; (hati), from ghond; (ventrukapasalapóligádu), meaning hairy drongo. Tam. also (karikkarumá), meaning black bird. Drongo shrikes. Dicrurinæ, laniadæ [pingalam], dentirostres, insessores, aves [pacshy, 19], of naturalists. Common drongo shrike is Dicrurus macrocercus; alias buchanga albirictus; dicrurus balicussius, indicus. Long-tailed drongo is Dicrurus longicaudatus; alias dicrurus cineraceus, intermedius, macrocercus, pyrrhops. White-bellied drongo is Dicrurus cœrulescens; called by natives mountain drongo; alias lanius fingah. Bronzed drongo is Chaptia ænea; generic from hindostany; alias dicrurus æratus; chaptia muscipetoides. Large racket-tailed drongo is Edolius paradiseus; called by the natives tailed drongo; alias chibia malabaroides; edolius dentirostris, grandis; lanius malabaricus; peculiar call, beginning with harsh chuckle, ending in peculiar metallic creaking cry 'tse-rung tse-rung;' often caught and tamed; will imitate all sorts of sounds, as of dogs, cats, sheep and goats, poultry, and the notes of many birds; hence called by some hazaurdaustaun, or the bird with a thousand tales; will eat raw meat, lizards [chipkalee], and almost any kind of animal food that is offered to it. Malabar racket-tailed drongo is Edolius malabaricus; alias dicrurus retifer; edolius cristatellus, paradiseus. Hair-crested drongo is Chibia hottentota; called by natives hairy drongo; alias chibia casia; criniger splendens; dicrurus criniger; edolius barbatus, krishna; frequently tamed by mussalmans.——*King fish* (شیر ماهی - shermáhí, Hind.). Hind. from (sher, pers. corruption of portuguese serra, saw + máhí, pers. fish), from serrate appearance of rows of finlets. Anglo-indian name given to several species of Cybium [seer], and Polynemus [robaul].

KINKA (کنکا - kinká, *Dec.*). Same as Wild jeerah.

KINNAB (भङ्गा - bhangá, *San.*; भांग - bhánga, *Mahr.*; भांगि - bhángi, *Conc.*; نبات القنب - nabátulkinnab, *Ar.*; درخت کنب - darkhtikinnab, *Pers.*; گانجے کا پیڑ - gánjekáper, *Hind.*; گانجے کا جھاڑ - gánjekájhár, *Dec.*; گنجه - ganja, *Malay*; ಭಂಗಿ - bhangi, *Can.*; ಬಂಗಿ - bangi, *Too.*; గంజాయిచెట్టు - gandzáyichettu, *Tel.*; കഞ്ചാവ് - kañchávu, *Mal.*; කංසාගහ - kanságaha, *Singh.*; கஞ்சா - kañjá, *Tam.*). Title from arabic. San. from (bhañj, san. to break); in allusion to process of debarkation by which the fibres were separated from stem [hemp bendy]. Mahr. from sanscrit. Ar. from (nabát, ar. plant + kinnab, ar. hemp). Pers. from (darakht, pers. plant + kinnab, pers. hemp). Hind. from (gánjah, hind. intoxicating drug + per, hind. tree). Dec. from (gánjah, hind. the drug + jhár, hind. tree). Tel. from (gánjah, hind. the drug + chettu, tel. tree). Mal. and tam. from hindostany. San. also (vijayá), meaning victorious, from giving success to its votaries; (shana), meaning giving [sunn]; (siddhapatra), meaning saint's leaf; (aláta), meaning firebrand; (vajradru), meaning adamantine tree; (griñjana), meaning grumbling [gaujar, lussoon]; (mátulání), meaning unequalled [datura]; (indráshana), meaning eaten by indran; (ánandá), meaning the gladdener; (harshiní), meaning delighter; (madiní), meaning intoxicator; (ganjá), meaning the noisy; (ganjiká), meaning small variety. Mahr. also (gánjá), meaning the dried leaves of the plant. Ar. also (kinnab), meaning hemp. Pers. also (darakhtiwarakulkhiyál), meaning intoxicating leaf tree; (darakhtihashísh), meaning hashish tree; (darakhtibhang), bhang tree. Hind. also (bhangkájhár), meaning bhang tree. Can. also (kusuvugida); (ganjá); (ganjáyi). Tel. also (jadagandzáyi), meaning plaited + the plant; (bangichettu), meaning bhang + tree; (kalpamu), meaning wishing tree. Mal. also (cherukañchávu), meaning small variety; (vakkuççana), meaning bark + crotalaria juncea, linn. Singh. also (ganjágaha); (matkansá), meaning head opium. Tam. also (pangi); (kórakkarmúli), meaning siddhan so called + plant; (kalbam), meaning useful preparation; (shanappu); (mathamattagam), meaning intoxication + head. νήπενθες of Homer. Later greek κάνναβις from the Arabic kinnab, whence English hemp. Title otherwise Carl hemp, Corakkan's drug, Fimble, Gallow grass, Giddy plant, Indian hemp, Victory plant, Wishing plant. Giving Bhang, Charas, Ganjah, Hashish, Majoon, Sabjee, Siddhee. Botanically Cannabis sativa, linn., urticaceæ [vricsham, 119]. Cannabis, from (kinnab, ar.). Alias Cannabis indica; Polygonum viridiflorum. Annual, 4–6 feet covered all over with an extremely fine rough pubescence; stem erect, branched, green, angular; calyx five-parted; leaves alternate or opposite, on long petioles, digitate, with linear-lanceolate, sharply-serrated leaflets, tapering to a long, smooth point; flowers in spikes, axillary clustered, small, greenish white; males lax, and drooping; females erect, leafy at the base; flowering all the year; cultivated; the whole plant has a strong aromatic and heavy odour. In certain seasons a resinous juice exudes and concretes on the leaves, slender stems, and flowers; this resin [raul] when separated and formed into small masses or lumps constitutes charas [q.v.] which is the type or basis of all hemp preparations; the resin in its purest form called cannabin is very soluble in alcohol and ether, partially soluble in alkaline, insoluble in acid solutions; when pure, of a blackish grey color; hard at 90°; softens at higher temperatures and fuses readily; soluble in the fixed and in several volatile oils [yennay]; odour fragrant and narcotic; taste slightly warm, bitterish and acrid. The dried plant which has flowered and from which the resin has not been removed is called simply ganjah [q.v.]; stems, leaves, and petioles pressed together is the form in which it is found in commerce; the bundles of ganjah are about 2 feet long and 3 inches in diameter, and contain twenty-four plants; the color is dusky green, the odour agreeably narcotic, the whole plant resinous, and adhesive to the touch; the natives cut the plant when in flower, allow it to dry for three days, and then lay it in bundles averaging one seer [q.v.] weight, which are distributed to the license-dealers; the ganjah itself is sold for smoking chiefly; ganjah yields to alcohol twenty per cent. of resinous extract, composed of the resin and green coloring matter, or chlorophylle; distilled with a large quantity of water, traces of essential oil pass over, and the distilled liquor has the powerful narcotic odour of the plant. The large leaves and capsules, macerated in water, without the stalks, are called bhang [q.v.]; they are used for making an intoxicating drink; bhang is cheaper than ganjah. The above make also a confection called majoon [q.v.]; the chief ingredients of this are ganjah leaves, milk [paul], ghee [q.v.], poppy seeds [khaskas], flowers of the thorn apple [datura], the powder of the nux vomica [poison nut], sugar [q.v.]. Hashish is a confection prepared from the tender parts of the plant dried. The hemp plant is cultivated in europe for fibre, but here for narcotic properties; it requires an elevated exposure and a cool climate; it thrives from 3,000 to 7,000 feet; cultivated in sandy soil and red loam; ground prepared on coromandel in

aushweejam or october and caurteecam or november; on w. coast in maidom or april to yedavam or may; seed sown on coromandel in caurteecam or november, on w. coast in macaram [mausam] or january; when the plant is full grown the leaves drop; cut ten months after sowing; the plant is cut just above the root or pulled up; the plant so cut is hung for about fifteen days, not exposing it to severity of sun; then the large stem is removed and the remaining parts are packed in small bundles, which should be exposed to the dew for three days and subsequently brought into store. Medicinally almost every part of the plant is useful; but especially the flowering-tops, the leaves, the milky juice or resin, and the seeds; with natives aphrodisiac, particularly in the majoon; leaves prescribed in diarrhœa, or in conjunction with turmeric [country saffron], onions [piyauz] and warm gingelly [q.v.] oil, made into unction for piles; the seeds in emulsion are prepared for gonorrhœa; substituted for british chloral hydras, bromide of potash, henbane and belladonna; in pharm. officinal; also in british pharm.; indian hemp is medicinally much more potent than that grown in europe. For smoking ganjah [q.v.] the dried article and some tobacco [pogauk] are rubbed together in the palm of the hand with a few drops of water; simple tobacco is placed in the pipe first, then a layer of the prepared ganjah, then more tobacco, and the fire above all; the hookah [q.v.] is passed round, and generally each person takes a single draught; intoxication ensues almost instantly. The bhang [q.v.] is not smoked, but pounded up with water into a pulp, so as to make a drink; it is considered highly conducive to health; same effects as opium [aphainam], but more agreeable. The fibre [demon plantain, sunn] is hemp, of which ropes and door mats are made, when woven known as canvas; the hemp plant destroys caterpillars and other insects [poochy], which prey upon vegetables; oil obtained by expression from the seed, not well known. Compare:—Abroma augusta, perennial indian hemp; Calotropis gigantea, bow-string hemp; Crotalaria juncea, bengal hemp, bombay hemp, brown hemp, concany hemp, deccany brown hemp, false hemp, indian hemp, jubbulpore hemp, madras hemp, salsette hemp, sunn hemp, taag hemp; Eupatorium cannabinum, agrimony hemp, water hemp; Hibiscus cannabinus, bombay hemp, brown hemp, deccany hemp, indian brown hemp, indian hemp; Musa textilis, manilla hemp; Sanseviera roxburghiana, bow-string hemp; Tragia cannabina, hemp-leaved tragia; Vitex trifolia, hemp tree. See gloss. paragraphs.

KINNY (ಚಿನ್ನಿ - kinni, *Can.*). Means small [chinna]. Pariah proper name [peyar].

KINO (کنیا گوند - kinyágond, *Hind.*; సీమగాండామృగమునెత్తురు - símagándámrigamnetturu, *Tel.*; சீமைக்காண்டாமிருகரத்தம் - shímaikkándámirugarattam, *Tam.*). Title from (kína, san. flesh); from red color. Tel. from (síma, tel. foreign + gándámrigamunetturu, tel. dragon's blood). Tam. from (shímai, tam. foreign + kándámirugam, tam. rhinoceros + rakta, san. blood). A gum [gond] from genera butea, eucalyptus, eugenia, pterocarpus; generally occurs in shining grains; of a rich ruby red color, of bitter, styptic taste, nearly all soluble in alcohol and readily pulverisable between the fingers; medicinally astringent; used to dye cotton cloth of a nankeen yellow [shauyam].——*Amboyna kino* (کنیا گوند انبونہ - kinyágondiambúnah, Hind.). Product of Common vengay.——*Bengal kino* (کنیا گوند بنگالہ - kinyágondibangálah, Hind.). Otherwise Butea kino. Product of Palaus tree.——*Malabar kino* (کنیا گوند ملیبار - kinyágondimalebár, Hind.). Product of Common vengay.——*Nemmy kino* (نیمی کنیا - nemmikinyá, Hind.). Product of Nemmy tree.——*Rangoon kino* (کنیا گوند رنگون - kinyágondirangún, Hind.). Product of Padouk.

KIOSK (کوشک - kúshak, *Hind.*). From turkish through (khushk, pers. dry). An open summer house supported by pillars [staupatyam].

KIRAUNY (കിരാണി - kiráni, *Mal.*). Writer. In Malabar used exclusively for Portuguese and half-caste writers.

KIRAUTAN (किरात - kiráta, *San.*). From (krí, san. to throw); arrow-thrower, bowman. Mountaineers mentioned in ancient Sanscrit as living in the mountains east of Hindostan. They are described in the Ramayanam [q.v.] as islanders, who eat raw fish, live in the waters, and are men-tigers, or men below and tigers [pooly] above. Their females are gold-colored and pleasant to behold, and have sharp-pointed hair knots. The word indicates probably the inhabitants of Orissa [q.v.]. According to Arrian, the coast before coming to the mouths of the Ganges is occupied by the κιρράδαι, a savage race [jauty].——*Chiretta* (چراَیتہ - charáitah, Hind.). See sep. title.——*Kariyat* (کریات - kiriyát, Hind.). From (kiráta, san. mountaineer); from use by them. Same as Chiretta.

KIRMAUN (کرمان - kirmán, *Pers.*). A province in S.E. of Persia. Latin name Caramania. Shawls [q.v.] and carpets are made.——*Kirmauny* (کرمانی - kirmání, Hind.). From (kirmán, pers. a place in babylonia). Lacab of a class of Mahomedans tracing their descent from a Koord clan on the frontiers of Persia [ism].

KIRMIZ (लाक्षा - lákshá, *San.*; किरमीज - kiramíja, *Mahr.*; قرمز - kirmiz, *Ar.*; کرم رنگریزان - kirmirangrízán, *Pers.*; قرمز - kirmiz, *Hind.* and *Dec.*; ఇంద్రగోపపురుగు - indragópapurugu, *Tel.*; கிருமிஞ்சிப்புழு - kirumiñjippuzhu, *Tam.*). Title from arabic. San. from (rañj, san. to dye). Mahr. from arabic. Ar. from (kirm, pers. insect + kíz, pers. silk). Pers. from (kirm, pers. insect + rangríz, pers. dyer). Hind. from arabic. Tel. from (indragópa, san. the beerboty insect + purugu, tel. insect). Tam. also (shappáttippuzhu), meaning prickly pear [q.v.] worm, as feeding on leaves of opuntia dillenii, haw. Cochineal insect. Coccus cacti, coccidæ, hemiptera, hemimetabola, insecta [poochy], of naturalists [jantoo]. Cochineal is the dried female insect. Imported. Useful for imparting red color [shauyam] to liquid medicines. Native use, aphrodisiac, astringent and anodyne; substituted for British phosphorus. Pharm. preparation is tincture of cochineal, tinctura cocci officinal. Distinguish the native article Lac [q.v.].

KIRRET (కడితము - kaditamu, *Tel.*). Book made of a long slip of cotton cloth, from eight inches to a foot wide, and from 12 to 18 feet long, covered on each side with a compost of paste and powdered charcoal [adoopp kary]. When dry, it is folded up, without cutting, in leaves of equal dimensions. To the two end folds are fixed ornamented plates of wood, painted and varnished, resembling the sides of a book, and the whole is put into a case of silk [puttoo] or cotton [q.v.], or tied with a tape. Those in use with the lower classes are tied up by a common string. The book opens at either side, and if unfolded and drawn out is still a long slip of the original length of the cloth. The writing is similar to that on a slate [cull palagay], and may be in like manner rubbed out and renewed. In Mysore Tippoo prohibited its use in recording the public accounts. This is the linen cloth described by Arrian as being written on by the Indians.

KISHK (किष्क - kishk, *San.*). To kill.——*Kishkindyay* (किष्किन्ध्या - kishkindhyá, San.). Ancient city. Capital of Soogreevan [q.v.], an ally of Rama [q.v.], the hero of Ramayanam [q.v.]. Site supposed to be in the north of Mysore about the source of the Pumpah river [charitram, rishyamoocam].

KISM (قسم - kism, *Hind.*). From (kasama, ar. to divide). Kind, sort, share.——*Kismat* (قسمت - kismat, Hind.). From (kasama, ar. to divide). Share of prosperity, hence fate [takdeer].

KISMIS (کشمش - kishmish, *Hind.*). Stoneless raisins from Persia [draucshay].

KIST (قسط - kist, *Hind.*). From (kasata, ar. to apportion equitably). Stated payment, instalment of rent.——*Kistbundy* (قسطبندی - kistbandí, Hind.). From (above + bandí, pers. settlement). Settlement of instalments of kist, both as to time and amount. See vol. I, 112.

KITAUB (کتاب - kitáb, *Hind.*). From (kataba, ar. to write). Book. Koran [q.v.] of mahomedans, Old testament of jews, New testament of christians. Distinguish from Khitaub.

KITCHAUN (കിച്ചാൻ - kíççán, *Mal.*; கிச்சான் - kíççán, *Tam.*). From (kíru, tam. streak); from bands. The genus Therapon, percidæ, acanthopterygii, teleostei, pisces [matsyam, 1], of naturalists [jantoo]. Marine fishes feeding on carrion, but eaten by poor. Color usually silvery, with longitudinal bands. The species best known to the natives are:—jarbua, puta, theraps.

KITTAIRY (கித்தேரி - kittéri, *Tam.*). Catherine. Native christian proper name [peyar].

KITTAL (කිතුල් - kitul, *Singh.*). Bastard sago palm.

KIYAUM (قیام - kiyám, *Ar.*). From (kauma, ar. to stand). Prop. Part of lacab; as Kiyaum ood dowla, prop of empire [ism].

KIZHAMAY (கிழமை - kizhamai, *Tam.*). Means ownership. A fraction of a week, a day [ahas, dinam, naul]; also a week [vauram].——*Kizhavan* (கிழவன் - kizhavan, Tam.). From (kizhamai, tam. propriety). Proprietor, lord, old man.——*Kizhavan saitoopaty* (கிழவன்சேதுபதி - kizhavansétupathi, Tam.). Old man + title. Title of Raghoonaut tevar saitoopaty, the sixth Marava [q.v.] ruler of Ramnaud. Murdered the Jesuit missionary John De Britto; changed his capital from Pogalore to Ramnaud, the present seat of Government; wrested all the territories south of the Amboor river from the ruler of Tanjore; created the Poodoocottah state and appointed his brother-in-law of the Cullan [q.v.] family as Tondiman [charitram, tondiman]. See vol. I (120), (124), 56.

KIZHAUTTY (జెల్ల - jella, *Tel.*; கிழாத்தி - kizhátti, *Tam.*). Siluridæ [matsyam, 35] or Cat-fish family of fishes. Otherwise Fresh-water sharks.

KLING (کلنگ - kling, *Malay*). Malay term. Name given by Burmese, Malays and Javanese to Teloogoos, being a corruption of Calingam [q.v.]. The trade and intercourse of the Teloogoo coast with the Indian archipelago is of great but

unascertained antiquity, and still goes on. Many Teloogoos have from time to time settled in Sumatra and the Malay peninsula, and their mixed descendants are numerous. In Singapore they form one-tenth of the population, and in Penang [q.v.] they are even more numerous. Malays sometimes mean the whole of india by Kling.

KOBEE (کرنب - karnab, *Ar.*; کوبی - kobí, *Hind.*; کرمکی بهاجی - karamkíbhájí, *Dec.*; ಮುದ್ದೆಕೋಸು - muddekósu, *Can.*; గోసుకూర - gósukúra, *Tel.*; கோவிசு - kóvisu, *Tam.*). Title from hindostany. Canarese from (mudde, can. lump + kósha, san. egg). Hindostany also (karamkallá), meaning cabbage-wort. Dec. also (karamkáság), meaning cabbage leaf. Greek ῥάφανος and κράμβη ἥμερος. Title otherwise Cabbage, Domestic colewort. Botanically Brassica [sarshapam] oleracea, linn., cruciferæ [vricsham, 10]. Produced by cultivating the european wild colewort; when perfect consists of solid masses formed by the leaves compactly enveloping one another. Cabbage was introduced intô s. india by europeans at an early date of their occupation; it is now grown on the hills. Seeds diuretic, laxative, stomachic, and anthelmintic; leaves form application in gout and rheumatism. The following are the chief varieties:—Capitata, linn., white cabbage; Rubra, linn., red cabbage; Sabauda, linn., savoy; Sabauda gemmifera, brussels sprouts; Sabellica, linn., borecole or scotch kale; Botrytis, linn., cauliflower; Botrytis cymosa, brocoli; Caulorapa, knol-khol. Rubra is only eaten in pickle; Sabauda instead of forming one single head, produces numerous small heads, of about the size of a pullet's egg, with blistered leaves; Sabellica is remarkable for its crimped and plume-like leaves; Botrytis heads [phool kobee], are a malformation of the inflorescence, forming a white conglomeration of imperfect buds; Caulorapa replaces the turnip in this country, as it endures heat; knol-khol being dutch for turnip cabbage; the stalk at one point expands into a globular mass resembling a turnip, and this is the edible part; originally imported into s. india from the cape.——*Phool kobee* (پهول کوبی - phúlkobí, Hind.). From (phúl, hind. flower + kobí, hind. cabbage). Cauliflower.

KODA (ಕೋಡ - kóda, *Can.*). Monkey [bandar].——*Kodanaud* (ಕೋಡನಾಡು - kódanádu, Can.). From (above + nádu, can. tract).—"*a*" Village, Hill; Neilgherry dist., Paranginaud div.; pop. 1,126; acres 8,170; lat. 11° 30′; long. 76° 56′; height 6,740 feet; from Coonoor N.N.E. 13 miles; from Ootacamund E.N.E. 15 miles. Three cairns [paundoocull, raucshasagoondloo] of rubble stones have been discovered containing pottery and jewelry.—"*b*" Tea estate, Paranginaud, Neilgherries, 6 miles N. of Kotagherry. Is the largest tea [q.v.] estate in Paranginaud division.

KODAYKARNAL (கொடிக்கானல் - kodikkánal, *Tam.* kodaikánal *). From (kodi, tam. creeper + kánal, tam. forest).—"*a*" Hills, Deputy tahsildarry, Madura district; pay Rs. 100.—"*b*" Hill, Sanitarium, Village, Deputy tahsildar's station; Madura dist., Pulney tal.; pop. 1,743; lat. 10° 14′; long. 77° 32′; from Dindigul W.S.W. 35 miles; from Madras S.W. 270 miles; from Madura W.N.W. 48 miles; from Pulney S. 17 miles; from Rameshwaram W.N.W. 140 miles; from Ramnaud W.N.W. 110 miles. For description see vol. II, 84 [hill station].

KOEL (कोकिल - kókila, *San.*; كوكو - kúkú, *Ar.*; کویل - koyal, *Hind.* and *Dec.*; ಕೋಗಿಲೆ - kógile, *Can.*; కోకిలము - kókilamu, *Tel.*; മുളകുപ്പൊട്ടി - mulakupótti, *Mal.*; குயில் - kuyil, *Tam.*). Title from hindostany. San. from the sound of the bird. Hind., &c., from sanscrit. Mal. from (mulaku, mal. pepper + pottu, mal. to bring up); as feeding on pepper. Tam. from (kuyil, tam. to utter). Tel. also (kóvela). Cuculinæ, cuculidæ [cookam], scansores, insessores, aves [pacshy, 15], of naturalists [jantoo]. Bill broad, flattened at base, sides compressed to tip; wings long; tail long; tarsi short, feathered and scaled. There is a Tamul proverb:—குயிற் குரலும் மயில் அழகும் போல—"Like the voice of the cuckoo, and the beauty of "the peacock [mayil]." There is a Hindostany proverb:—کویل کالے کوے کی جورو—"The cuckoo is the black crow's wife." The species best known to the natives are shown below.——*Banded koel* (పట్టకాటిపిట్ట - pattsakátipitta, Tel.; வரிக்குயில் - varikkuyil, Tam.). Title from markings. Tel. from (pattsa, tel. green + kátipitta, tel. bird, hierococcyx varius, vahl.). Tam. from (vari, tam. stripe + kuyil, tam. cuckoo). Cuculus sonneratii. Alias Cuculus himalayanus, pravatus, rufovittatus, venustus. Above greenish-dusky, numerously cross-barred with rufous.——*Common koel* (कोकिल kókila, San.; کویل - koyal, Hind. and Dec.; కోకిల - kókila, Tel.; കോകിലം - kókilam, Mal.; குயில் - kuyil, Tam.). Hind., &c., from sanscrit. Tam. from (kuyil, tam. to utter). Male bird is:—Tel. (nallapakki), meaning black + bird, from color. Female bird is:—Hind. (kauriyálá), meaning spotted. Tel. (podapakki), meaning spotted + bird, from spots. Eudynamys orientalis. Alias Cuculus maculatus, mindanensis, niger, scolopaceus. Male glossy greenish black throughout; bill pale-greenish, inside of the mouth reddish, irides fine crimson; legs slaty blue; length 15½ inches. Female glossy dusky-green, spotted with white above, wings and tail banded with white, beneath white, with black spots, longitudinal on throat and neck, somewhat heart-shaped or arrow-shaped on breast, transverse on abdomen, thigh-coverts, and under tail-coverts; length 7½ inches. About the breeding season the Koel is very noisy, its well-known cry 'ku-il-ku-il;' the male bird has also another note 'ho-whee-ho;' female deposits her eggs almost exclusively in the nest of the common crow [q.v.], more rarely in that of the carrion crow; mostly destroys the eggs of the crow at the time of depositing her own; flight not so quiet and gliding as that of the true cuckoos, performed with more numerous strokes of the wings.——*Hawk koel* (زکات - zakát, Hind.; కాటిపిట్ట - kátipitta, Tel.; ഇരാളൻ - iralan, Mal.). Title from resemblance. Hind. means alms bird or customs bird. Tel. from (kádu, tel. forest + pitta, tel. a bird). Mal. a corruption of (iravullálan), from (ira, mal. roof + ul, mal. inside + álu, mal. to possess), from building nests under the eaves. Hind. also (kúpak). Hierococcyx varius. Alias Cuculus ejulans, fugax, lathami, tenuirostris. The common cuckoo of the plains; loud crescendo notes to be heard in the breeding season, april to july; very fond of the fig of the banyan [q.v.] and other fici [atty]; flight rapid; lays its eggs in the nest of the shikrah [q.v.]; excellent eating, being very fat.——*Shepherd koel* (پپیہا - papíhá, Hind.; ಗೊಲ್ಲಕೋಗಿಲೆ - gollakógile, Can.; గొల్లకోకిల - gollakókila, Tel.). Title from following cattle. Hind. from (pika, san. indian cuckoo). Can. from (golla, can. shepherd + kógile, can. cuckoo). Hind. also (chatak), meaning bright colored. Can. also (jádige). Tel. also (tangédugóranki), meaning cassia auriculata, linn. + myna. Coccystes melanoleucos. Alias Oxylophus ater, edolius, serratoides, serratus. Above uniform black, under-parts dull white; peculiar call, a high pitched wild metallic note; flight not rapid.——*Small hawk koel* (చిన్నకాటిపిట్ట - chinnakátipitta, Tel.). Tel. from (chinna, tel. small + kátipitta, tel. hierococcyx varius, vahl.). Polyphasia nigra. Alias Cuculus flavus, niger.

KOH (کوہ - koh, *Hind.*). Mountain.——*Kohistaun* (کوهستان - kohistán, Hind.). From (above + sitán, pers. place). Hill districts.——*Kohkauf* (کوه قاف - kohkáf, Hind.). From (above + káf, hind. the range of that name). A mountainous chain supposed to surround the world [locaulocam]; abode of the demons and genii, of the fairies, and of the famous simurgh or great griffin; identified by some with mount caucasus. Cf. Cashyapan.

KOHL (کحل - kohl, *Ar.*). Collyrium.

KOINAH (کناکن - kinákin, *Hind.* and *Dec.*; జ్వరపట్టచెట్టు - jvarapattachettu, *Tel.*; സിങ്കോയിന - sinkoyina, *Mal.*; கொயினா - koyiná, *Tam.*). Title from the american indian. Tel. from (jvara, san. fever + patta, tel. bark + chettu, tel. tree). Tam. also (shurappattaisattu), meaning fever + bark + essence; applies to quinine. Title otherwise Cosmibuena, Fever bark, Kinah, Kinkin, Peruvian bark plant, Quinine plant. Botanically Cinchona species, rubiaceæ [vricsham, 71].—"*a*" The genus includes trees of varying size, some reaching an altitude of 80 feet and upwards, with evergreen leaves and deciduous stipules; the flowers are arranged in panicles, white or pinkish in color, with a pleasant odour, the calyx being five-toothed superior, and the corolla tubular, five-lobed, and fringed at the margin; the stamens are five, almost concealed by the tubular corolla, and the ovary terminates in a fleshy disk; the fruit is an ovoid or sub-cylindrical capsule, splitting from the base, and held together at the apex; the numerous seeds are flat and winged all round; natives of peru; cultivated here on mountain lands.—"*b*" The following is the botanical description of cinchona officinalis, linn., the commonest of the species here cultivated:—tree reaching 35 feet or more in height, with a naked stem, or two to four stems, and an ovoid rather tapering leafy head, with spreading or even drooping branches; or a mere bush, four feet to eight feet high; leaves four to five inches long, varying from broadly oval or even sub-rotund to lanceolate, acute at both ends, usually smooth on both sides, shining full green above, paler beneath, with glandular hairy depressions in the angles of the lateral veins; capsule oblong-ovate, about ½ inch long, and about twice as long as broad; flowers rose colored; calyx-teeth triangular acuminate; flower buds not inflated at the end. The principal varieties of officinalis are:—Uritusinga, pav., characterised by its broad large leaves, wavy or undulated at the margin, and very prominent leaf-veins; a large forest tree; original type of the species; Condaminea, howard, scarcely differs from the last in its smaller and non-wavy leaves, with less strongly marked veins, and a more lax inflorescence; Crispa, taf., the thick texture of the narrow leaves, and the very strongly marked and conspicuous scrobicules, are the characteristics of this form, which is generally little more than a shrub in habit; its name is derived from the short fracture of the bark. The following is the botanical description of cinchona calisaya, wedd., which is slightly cultivated:—very tall tree with a straight bare stem and leafy crown, or a shrub; leaves oblong, ovate-oblong, or lanceolate-obovate, usually obtuse at the apex, attenuate at the base, or rarely acute at both ends, two to seven inches long, smooth on both surfaces or pubescent beneath, with or without scrobicules, on short petioles; capsule small ovate, flower-buds usually much enlarged at the ends. The following is the botanical description of cinchona succirubra, pavon., which is cultivated here nearly as much as officinalis:—tree reaching 50 to 80 feet, head rounded-pyramidal; leaves

large, rounded-ovate or ovate, obtuse, usually acute or even tapering at the base, margin wavy, bright apple green, paler beneath, becoming when withering a fine red or orange-pink, upper surface usually with fine scattered short hairs, or smooth, the veins deeply impressed, under surface with the veins, especially the midrib, very thick, prominent and pubescent, the leaf itself smooth, and forming deep concavities between the veins, no scrobicules.—" c " The spanish colonists of peru were the first to ascertain the nature of cinchona barks generally; the american indians regarded it as a poison, they called it kinkin or kinah, hence title; introduction into europe took place in 1640; jesuits were the first to import it on a large scale, hence jesuit's bark; all knowledge however was uncertain until the voyage of de la condamine in 1738, hence condaminea; the first were discovered in the neighbourhood of loxa, hence that name; botanists also discovered the species lancifolia, cordifolia, oblongifolia, and ovalifolia, the barks of which were orange-colored, amarilla, rosy, white, &c.; pelletier and caventou in 1820 made the discovery of the two alkalies cinchonine and quinine. The idea of cultivating cinchonas in other parts of the world than their native country was suggested by ruiz in 1792, by fée in 1824, and royle in 1839; in 1848 weddell brought cinchona seeds to the jardin des plantes, and in june 1850 seedlings raised there were sent to algeria, and in 1852 to java; prior to this in 1849 cinchona plants had been sent to algeria by the jesuits of cusco; the dutch were the first to carry on cinchona culture to any great extent, and the enterprise was conducted in java; the next large experiment was instituted by the english government on the neilgherry hills and it has been eminently successful.—" d " The tree is cultivated in friable loam with loose sub-soil and good drainage; ground prepared in cold season, jungle being felled and burnt and pits 18 inches cube dug four to six feet apart; seed sown in nursery usually during latter half of year, but varies according to variety; after transplanting the plant is left to itself for several years, ground only being kept clear of weeds and suckers removed; no species can be successfully grown under the shade of other trees; the calisaya alone requires a certain degree of shade; this can be secured by placing the plants close together, so that they may shade each other. The bark is usually removed about the fourth to sixth year; may be coppiced, shaved with a spokeshave, or uprooted; the three methods of harvesting bark are practised according to circumstances. On the neilgherries the bark is chiefly harvested by what is called the mossing process; in this the bark is removed from the stem in vertical strips each from 2 to 3 inches wide, a strip of bark of the same width being left intact between each two denuded surfaces; in removing the strips great care is taken to avoid injuring the cambium; when the requisite number of strips of bark has been removed, the stem of the tree is enveloped in a thick covering of moss [pausy], under which the bark speedily renews more or less perfectly; the chief advantage of this process is a great increase of alkaloids in the renewed bark, but it is doubtful whether this increase is not gained at the expense of the bark on other parts of the tree; bark harvested in this way is called mossed bark, and bark taken from trees which have not been covered with moss, unmossed bark. The following is the mode of preparing the bark after removal; the bark is placed to dry before the sun; if the pieces are thin they roll up longitudinally into thin cylinders like quills, the larger pieces may retain their original form; thus the old distinction of quill, round and flat barks, as characteristic of species, are delusive; as however the bark of moderately grown trees is the richest in the powerful alkalies, too great quilling or its total absence, are unfavorable characters of barks, as showing that the branches were either too young or too old. In the market root bark from all kinds of cinchona is in the form of short recurved or twisted pieces, thicker and lighter in color than the stem bark; shavings consist of the outer or cellular portion of the bark, and are consequently thin and brittle, and are easily crushed in packing; mossed bark has a dark surface, is usually free from lichen [cull pausy], and occurs in thick, half or single quills; renewed bark is light in color, easily fractured on account of the absence of much liber, and is known by the peculiar uniform smoothness of its external surface.—" e " Quinine is the product of the cinchona alkaloids; other products similar are quinidine or conquinine, cinchonine, cinchonidine, quinamine. Quinine is a light-colored, amorphous, brittle substance in an anhydrous state, but may be obtained in a crystalline condition; it is soluble in ether, alcohol, chloroform, and very slightly in water; the quinine salt mostly used in medicine is the sulphate, the theoretical composition of which is:—quinine, 74·31; sulphuric acid, 11·23; water of crystallization, 14·45; cinchona bark is sold by the unit of sulphate of quinine; the unit is the price in pence per pound of bark containing one per cent. of sulphate of quinine. Acheap quinine is manufactured at the plantations on the neilgherries. For european quinine manufacture the bark of officinalis, is best suited, being rich in quinine; though perhaps in total yield succirubra, is the richest; after those two calisaya is the most important. With the exception of opium [aphainam], no single remedy has a wider range of therapeutic uses than quinine; dried bark and powder form the officinal parts, being powerfully antiperiodic, tonic, and astringent; the two former properties are due to the presence of quinine; leaves also possess tonic and antiperiodic properties.—" f " The following are the principal species known here, but it is to be observed that practically cultivation is limited to Officinalis, Succirubra, and the hybrids between these two. Calisaya, wedd., yellow bark, bolivian bark, calisaya bark, with a well known variety called ledgeriana. Lancifolia, mutis., columbian bark. Micrantha, r. et p., huanoco or lima bark, grey bark. Nitida, r. & p., genuine grey bark, huanoco or lima bark. Officinalis, linn., the most frequently grown, crown bark, loxa bark, pale bark; with varieties; uritusinga, original loxa bark; condaminea, select crown bark; crispa, fine crown bark. Peruviana, how., huanoco or lima bark, finest grey bark. Succirubra, pav., next most frequent to officinalis; red bark, new granada bark.—" g " The color of the leading barks found in the druggists' shops are pale, yellow, and red. Pale or grey bark occurs in solid pieces with clear or deep grey epidermis; inner surface pale yellow or reddish; powder deep brown, contains but minute quantities of the active alkalies; comes from officinalis, nitida, micrantha, and peruviana, but here practically only from the first. Yellow bark or royal bark was brought to spain in 1789, and monopolized for the spanish royal family; the inner bark of this has a yellow color passing into orange; comes from calisaya. Red bark is frequently warty; the color of the fine quills is faint red brown; in thick pieces this darkens to chestnut, sometimes with a purple tinge; the red barks stain the fingers red, and are bitter and astringent to an extreme degree; come from succirubra.—" h " The following are the commercial names of the different barks, and the species to which they belong:—Bogota, lancifolia; Bolivian, calisaya; Calisaya, calisaya; Caqueta, lancifolia; Carthagena, lancifolia; Columbian, lancifolia; Coquetta, lancifolia; Crown, officinalis; Fine crown, officinalis, var. crispa; Finest grey, peruviana; Genuine grey, nitida; Grey, micrantha; Huanoco, micrantha, nitida, peruviana; Lima, micrantha, nitida, peruviana; Loxa, officinalis; New granada, succirubra; Original loxa, officinalis, var. uritusinga; Pale, officinalis; Red, succirubra; Select crown, officinalis, var. condaminea; Silver, micrantha; Yellow, calisaya.—" i " For cinchona planting in s. india, see vol. I, 304.

KOK (गर्ताश्रय - gartáshraya, *San.*; کور موش - kormúsh, *Pers.*; ಕೊಕ್ಕು - kokku, *Can.*; అడవిఎలుక - adavieluka, *Tel.*; പെരിച്ചാഴി - periççázhi, *Mal.*; அகழெலி - agazheli, *Tam.*). Title from canarese. San. from (garta, san. hollow + áshraya, san. resort). Pers. from (kor, pers. blind + músh, pers. mouse). Tel. from (adavi, tel. forest + eluka, tel. rat). Tam. from (agazh, tam. to dig out + eli, tam. rat); as living in holes. Tel. also (golattakokku). Title otherwise Mole-rat. Nesokia indica, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. Alias Arvicola indica; Mus dubius, indica, kok, providens, pyctoris, rattoides. Fur long and somewhat harsh, brown mixed with fawn, the short fur softer and dusky; paler beneath and tinged gray; the color generally being like that of the common rat [ely], but with more fawn or red intermixed, and lighter beneath; head short and truncated; ears small, nearly round, covered with a fine down or small hairs; tail naked, nearly as long as the body without the head; whiskers long and full; incisors orange yellow. This is a large field-rat [varappely]; is found throughout Southern india, ranging up to a considerable altitude, above 7,000 feet. The Woddar [q.v.] or tank-diggers capture this animal in great numbers as an article of food, and during the harvest they plunder their earths of the grain stored up for their winter consumption, as to subsist almost entirely upon it, during that season of the year. The kok abounds in the richly cultivated black plains or cotton ground [regar]. A variety found in the red soil is much redder in color. This rat is occasionally destructive to tea [q.v.] trees, biting the roots just below the surface; more probably because they come in the way of their burrows than to feed on them. Indian species not here found are:—Elliotanus or elliot's field-rat, Barclayiana or barclay's field-rat, Blythiana or bengal field-rat, Hardwickii or hardwick's field-rat, Huttoni or hutton's field-rat, Scullyi or scully's field-rat.

KOLCAS (قلقاس - kulkás, *Ar.*). Latin colocasia. See Kachvee.

KOLE (कोल - kóla, *San.*; کول - kol, *Hind.*). Tribe inhabiting mountain tracts in South behar and Chota nagpore; akin to Gonds [q.v.]. There is a distant affinity to Dravidians.—*Kolaria* (कोलराज्य - kólarájya, San.). Means kola kingdom. Ancient name of India from the Koles of Central india. See vol. I (42).

KOLE (கோல் - kól, *Tam.*). Stick, measuring rod [colauttam, kole peimash]. Staff. A linear measure. 3 adees = 1 kole [alavay, 1d]. Approximate actual value, 1 kole = 28 inches. Another kole measures 6 feet, land measure. Compare Tutchacole, Tutchamoolam. See vol. I, 609; II, 515.—*Kolecauran* (கோல்காரன் - kólgáran, Tam.). The village toty [q.v.], who, as a badge of office, carries a hard bamboo [q.v.] blackened by age and fire, and shod with iron; from the end hang one or more small heart-shaped pieces of iron.—*Kolezhoot* (കോലെഴുത്ത് - kólezhuttu, Mal.). From (above + ezhuttu, mal. writing). The primitive dravidian character still in use on w. coast. See vol. I (44), (49), (128). Vattezhoot [q.v.] is better knowr, as a title, but in reality kolezhoot alone survives [bhaushay].

KOOCHLAH (کچلا - kuchlah, *Hind.*). From (kuchila, san. the tree). Same as Poison nut.——*Climbing koochlah* (کچلا لتا - kuchlálatá, Hind.). Same as Snake-wood tree.

KOOI (కోయి - kóyi, *Tel.*). Original form of Khond [coo].

KOOL (كول - kul, *Hind.*). From (ḳólí, san. the tree). Bair.

KOOM (كم : kum, *Ar.*). Arabic ending for second person plural; as Aleikoom, on + you.

KOOST (قسط - kust, *Ar.*). Means bad spot. Same as Costum.

KORAN (قران - kurán, *Hind.*). From (kara, ar. to read). Holy book of the Mahomedans. Distinguished in the text of the book by fifty-five special titles. Contains revelations made to the prophet [mahomed], delivered by him orally, collected and committed to writing by the caliph Omar.

KORESH (قريشي - kuraishi, *Hind.*). From (karasha, ar. to trade). A tribe of Arabs to which the prophet [mahomed] belonged and of which, according to Mahomedans, the caliph [q.v.] should also be. The Shareef [q.v.] of Mecca is always of this tribe; and to this tribe will belong also the last of the imaums [q.v.], Mahdee [imaumat].

KORKAY (கொற்கை - korgai, *Tam.*). From (kol, tam. to slay + kai, tam. hand) [col]. Arm of slaughter; poetical name for a military camp or Government head-quarters. Greek κόλχοι ἐμπόριον. Village; Tinnevelly dist., Tencaray tal.; pop. 2,289; acres 1,294; lat. 8° 39′; long. 78° 08′; from Shreeveicoontam E. 12 miles; from Tinnevelly E.S.E. 27 miles; from the sea W. 5 miles. Close to the modern Mauramungalam. Ancient seaport well known to early European geographers. It was formerly at the mouth of the Tamrapurny, but the silt of the river has spread seawards. Succeeded as a port by Cauyal, this in its turn left inland. Capital of the early Paundyans [q.v.] and one of the most important trading-marts in India. Megasthenes mentions it B.C. 302. The author of the Periplus mentions it as a celebrated place for pearl-fishery [moty]. In the Peutinger tables it is called "Colchis Indorum" to distinguish it from the Colchis in the Black sea. The Greeks named the Gulf of Manaar from this place, Colchic gulf. It was the first port visited by the Greeks after rounding Cape comorin and the first place on the Tinnevelly coast whose name was recorded by them. Excavations have been made and quantities of remains discovered in the shape of ruined houses, sepulchral urns, pottery of all kinds, Chinese and Arabian included, and coins [aursham]. The remains extend for many miles round. At the great Shiva pagoda [q.v.] at Tinnevelly the earth used in the ceremonies at the annual festivals is brought from Korkay as having been the habitation of Vamsha coolashekhara paundyan, who built temple [charitram]. See vol. I (6), (119); II, 130.——*Korkay auly* (கொற்கையாளி - korgaiyáli, Tam.). From (above + áli, tam. ruler). Title of the Paundy king.

KOS (කොස් - kós, *Singh.*). Gum from jack in Ceylon.

KOTA (कोट - kóta, *San.*; كوتا - kotá, *Hind.*; కోట - kóta, *Tel.*). Fort [cote, cottah, cottay].—"*a*" Deputy tahsildarry, Nellore district, situated east of Goodoor. Pay Rs. 70.—"*b*" Village, Head-quarters of Deputy tahsildar; Nellore dist., Goodoor tal.; pop. 5,203; acres 8,501; lat. 14° 02′; long. 80° 05′; from Goodoor E.S.E. 15 miles; from Madras N. 69 miles; from Naidoopett N.E. 14 miles; from Nellore S. 29 miles; from Ongole S. 103 miles; from the sea W. 7 miles. Celebration in honor of Cotamma once every five years; formerly with swinging festival [shirry]. The temple of Cotamma was built by Tondiman [q.v.] kings. Supplies betels [q.v.] to Nellore market. Large tank.

KOTAH (ಕೋಟ - kóta, *Can.*). A hill tribe of Neilgherries.—"*a*" Language an old and very rude canarese; the chief difference between todah [q.v.] and kotah lies in the deep guttural pronunciation of the todahs, the kotahs' pronunciation being more dental; the dialects are mutually understood; in kotah language an unusual number of words end in (*é*).—"*b*" Probably next to Todahs as to length of residence on hills. They have a settlement at foot of western slopes near Goodalore, and, like the Todahs, their oldest village or street is in the western highlands of the Todanaud. There is a tradition among them that they once lived on a mountain in Mysore called Collimullay after which they named the first village they built on the Neilgherries. The Todahs say that they were brought from the plains to work for them, which is probably true. They occupy seven villages on the hills, each called Kotagherry.—"*c*" Their color is lighter than other tribes and inclined to copper. They are better-looking and of stronger physique than Coorumbar [q.v.] or Iroolar [q.v.], having well formed heads and well shaped noses. Their cheek-bones are high and prominent, and they have generally an air of decision. The men wear their hair, which is black, straight and long, parted down the middle, either loose or tied in a knot behind. In the men the forehead is inclined to be prominent. In the women this defect is more marked, and they are generally less good-looking. The noses of the women are shorter and inclined to a snub, and the chin is short and angular. The dress of the men consists of the usual coarse unbleached cloth. The women have a similar one, which is worn over one shoulder and under the other arm, and forms a kind of petticoat reaching just below the knees. They are fond of rude ornaments, bracelets, armlets, and necklaces of seeds and wire. The dress of the dancers who attend festivals is peculiar; it is a loose ill-made gown of calico [q.v.], with a skirt gathered very full round the waist and reaching to the ankles; this is ornamented with country red cloth sewn on in patterns, a bright-colored girdle or scarf, and a handkerchief [roomaul] round the neck; trousers of colored cotton [q.v.] stuff and a turban [puggry] complete the costume; it is evidently borrowed in part from the mahomedans and so far cannot be very ancient; their national dance requires six or eight performers, who stand in a row, their motions being uniform; the effect of these dresses when the dancers twirl together from one side to the other is singular; the main characteristic of the dance in fact is the way in which their draperies swing to and fro with the measure.—"*d*" The Kotahs have one special deity Caumataroya, but they also worship his wife Kalikay; each is represented by a silver plate. These are sometimes supposed to be Shiva [q.v.] and Parvaty [q.v.]. Their temples are mere pent-houses of thatch, open at both ends, and supported by square stone pillars sculptured after the same fashion as the pillars of their verandahs [q.v.], but on a larger scale; there is no image of any kind; there are two or more of these temples in each village. Of their two great annual festivals one is in honor of caumataroya; it lasts for a fortnight in february and gives them an opportunity for decorating themselves in any dresses, ornaments, &c., that they can borrow, and of performing their national dance to the music of their drums [paray] and horns [comboo] accompanied by singing; on the day appointed they collect together, bringing shaumay [q.v.] rice with them, which is boiled in front of the temple, and offered with other articles to the idol, with dancing, singing, and music, which is continued for two days; a piece of tobacco [pogauk] is given to each person present. The other feast is in honor of the dead who have died during the year, and answers in some respects to the Todah green funeral [kerd]. Occasionally a kotah becomes possessed by a god; he then yells, dances, rolls about and performs the most frantic gestures until at last he falls down in a kind of fit. Kotahs are not allowed to enter a Badaga [q.v.] temple or to join in their annual feast to Hettey [q.v.], to which the Todahs are invited.—"*e*" Kotahs recognise no caste among themselves; the divisions are keries or streets, though these now appear to have little to do with locality; they always seek their wives from another kery [q.v.]. The kotahs are the artizans of the hills and are necessary to all the other tribes as their blacksmiths, carpenters, tanners, rope-makers, umbrella-makers, potters, musicians, and workers in gold and silver; consequently their villages have sprung up in the localities which enabled them to pursue their handicrafts and to find a ready sale for their wares. Every Badaga village has a number of Moottkotahs or attached kotahs living in the nearest Kotagherry. Each Badaga also has a particular individual among the Moottkottahs who works for him and who is repaid in grain at harvest time. The Kotahs work in the same way for the other tribes, who pay them in the produce they possess. Todahs pay them in dead buffaloes [khoolgah] and ghee [q.v.], the Coorumbar in grain, and the Iroolar in plantains [q.v.] and grain. They are also well paid for their music, and often receive ¼ rupee each for playing at a feast. On their part they pay the usual tribute in grain or goodoo [q.v.] to the Todahs. The Kotahs always attend the funerals and obsequies of the Todahs, &c., and receive from them the carcases of the buffaloes that are offered in sacrifice, allowing from a half to a quarter of a rupee for some, if they cannot give payment in service. The Kotahs burn their dead [shoodcaud], collect the bones on the following day, and bury these in a hole, marking the spot where they have done so. This they do in order to the performance of the obsequies. On the night of the first Monday after the first new moon [amavausyay] in the month of March, all the friends of the deceased assemble, and, preceded by music, go to the place of burning. Kotah villages are large and generally contain sixty houses or more; the houses are of mud and thatch, not so regularly arranged as those of the badagas and only saved from a squalid appearance by the patches of cultivation which surround them; though the houses are devoid of ornament, the pillars of the verandah are sometimes of stone sculptured by cutters from the low country. Kotahs are on the whole intelligent and hardworking, and their monogamous customs seem likely to ensure their rapid increase in numbers. The customs of marriage, divorce, &c., are the same as those of the Badagas. Those in lower circumstances are in a state of servitude, and are employed in cutting wood, making charcoal [adoopp kary], &c.—"*f*" See vol. I, (51); II, 109.——*Kotagherry* (ಕೋತಗಿರಿ - kótagiri, Can. kotagiri). From (above + giri, san. hill). A hill occupied by Kotar.—"*a*" Village; Neilgherry dist., Paranginaud div.; pop. 4,284; acres 7,660; lat. 11° 25′; long. 76° 54′; height 6,500 feet; from Coimbatore N. 32 miles; from Coonoor N.E. 7 miles; from Devaulah E.S.E. 32 miles; from Madras W.S.W. 258 miles; from Ootacamund E.N.E. 12 miles; from Pundalore E.S.E. 36 miles. Every Kotah village on the hills is called Kotagherry by the natives. There are two such in Paranginaud, two in Todanaud, one in Merkoonaud, and one in the Coondahs. The Kotagherry above is the largest colony of Kotahs.—"*b*" Ghaut; Neilgherry dist., Paranginaud div.; from Coonoor E. 10 miles; from Ootacamund E. 17 miles. There are two lines known as the Old and New kotagherry ghauts [q.v.]. For description see vol. II, 85. There was once an anicut [q.v.] from Devanaickencottah to Dimhutty by Tainaud and Keel kotagherry below Rungasawmy's peak and Nedooncoolam; the distance being 20 miles [hill station].

KOTIYEH (കൊട്ടിയ - kóttiya, *Mal.*). Ceylon word. A fast-sailing vessel, with two masts and lateen sails, employed on the Malabar coast.

KOTODY (کوٹھری - kothrí, *Hind.*). From (kósht'ha, san. apartment). Room, gymnasium.

KOYFUL (کائی پھل - káiphal, *Hind.*). From (katu, san. sharp + p'hala, san. fruit). Wild nutmeg.

KRAIT (کریت - karait, *Hind.*; ಕಡಬಲಕೆ - kadabalake, *Can.*; తుట్టెపురుగు - tuttepurugu, *Tel.*; പനയൻ - panayan, *Mal.*; பனைவிரியன் - panaiviriyan, *Tam.*). Tel. from (tutte, tel. rubbish + purugu, tel. reptile); from its resort. Mal. from (pana, mal. palmyra tree, borassus flabelliformis, linn. + an, mal. personal suffix). Tam. from (panai, tam. palmyra tree + viriyan, tam. viper). Hind. also (társámp), meaning palmyra snake. Tel. also (gaddiparugudu), meaning grass + runner. Title otherwise White-arched bungaur. Bungarus cæruleus, elapidæ [naug], ophidii colubriformes venenosi, ophidia [sarpam], reptilia [sarpy, 27], of naturalists [jantoo]. Compare Bungaur, which is Bungarus fasciatus. Alias Boa krait, lineata; Bungarus arcuatus, candidus, lineatus, lividus; Pseudoboa cærulea. Lower parts uniform white; upper parts bluish or brownish-black, uniform, or with more or less numerous very narrow white cross streaks, not quite as broad as a scale, and generally radiating from a white vertebral spot. No collar. It varies in size from two feet to four and a half. The fangs are smaller than those of the cobra [q.v.]. It is found in fields, huts, houses, in book-cases, ledges of windows, and venetians. It is often mistaken for the Lycodon aulicus, which is an innocent snake. In the krait the hexagonal scales on back and its fangs are sufficient to distinguish it from the Lycodon aulicus. It is also darker than Lycodon. This is next to the cobra, the snake most destructive to human life. Terrestrial snake; feeding on small mammals, lizards [chipkalee], small snakes [sarpam], and toads [bhaicam]; diurnal, yet prefers the shade to the sun. Shy and attempts to escape, but when attacked defends itself fiercely.

KRAYAM (क्रय - kraya, *San.*). From (krí, san. to sell). Sale. Kraya shausanam is a bill of sale.

KRI (कृ - krí, *San.*). To do [car, caur, kar].——*Kritam* (कृत - krita, San.). From (kri, san. to do). Done. The side of the die marked with four points. The first or golden age [yoog].——*Krita yoogaudy* (కృతయుగాది - kritayugádi, Tel.). From (kritayuga, san. the age + ádi, san. beginning). The same as Doorga navamy.——*Krity* (కృతి - kriti, Tel.). Writing of books; one of the seven meritorious acts.——*Kriyah lopam* (क्रियालोप - kriyálópa, San.). From (kriyá, san. rite + lópa, san. omission). Neglect of essential ceremonies involving loss of caste [jauty].——*Kriyay* (क्रिया - kriyá, San.). From (krí, san. to do). Action in general; religious ceremony. The second of the four stages of progress towards union with deity [yogam].

KRISH (कृष् - krish, *San.*). To draw, to plough; to attract.——*Kistna* (కృష్ణ - krishna, Tel.); means dark-blue; from color of the waters.—"*a*" Revenue district; situated on the Coromandel coast [q.v.]; between 15° 36′ and 17° 09′ lat., and between 79° 17′ and 81° 36′ E. long.; bounded N. by Nizam's dominions and Godavery district, E. by Godavery district and Bay of Bengal, S. by Bay of Bengal and Nellore district, W. by Kurnool district and Nizam's dominions; square miles 8,397; pop. 1,855,582; language Teloogoo. Contains rivers Kistna, Moonair, Naugilair and Palair; ports Cottapollem, Eepoorpollem, Gungadipollem, Masulipatam, Mortota, Motoopully, Naugayalunka, Nizampatam and Penoomoody; mountains Bellamcondah, Condapully, Condaveed, and Jamalavoy droog; sanitarium Dindey. The whole area of the district is represented by the following sub-areas, where talook [q.v.] means an ordinary tract administered by a Tahsildar [q.v.], and division means a Zemindarry [q.v.] tract administered by a superior Deputy tahsildar:—Baupatla talook, Bezwada talook, Bunder talook, Goodivauda talook, Guntoor talook, Krittivenn zemindarry, Lingagherry zemindarry, Meilavaram zemindarry, Moongaula zemindarry, Narsarowpett talook, Noozveed division, Nundigauma talook, Pulnaud talook, Repully talook, Sullapully zemindarry, Suttenapully talook, Valloor zemindarry, Vinoocondah talook, Vissanapett division. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Masulipatam; Sub-collector, Guntoor, in charge of Baupatla, Guntoor, Suttenapully and Repully talooks; Head assistant collector, Bezwada, in charge of Bezwada and Nundigauma talooks and Vissanapett and Noozveed divisions; General deputy collector, Vinoocondah, in charge of Pulnaud, Narsarowpett and Vinoocondah talooks. Tahsildars; Baupatla, Rs. 225; Bezwada, Rs. 150; Bunder, Rs. 175; Goodivauda, Rs. 200; Guntoor, Rs. 225; Narsarowpett, Rs. 200; Nundigauma, Rs. 150; Pulnaud, Rs. 200; Repully, Rs. 250; Suttenapully, Rs. 175; Vinoocondah, Rs. 150. Deputy tahsildars; Avanigadda, Rs. 70, range situated in the south of Bunder talook; Juggayapett, Rs. 70, range situated in the north-west of Nundigauma talook; Keicalore, Rs. 70, range situated in the north-east of Goodivauda talook; Mungalagherry, Rs. 70, range situated in the north of Guntoor talook; Noozveed, Rs. 100, range conterminous with the zemindarry; Ponnore, Rs. 70, range situated in the north of Baupatla talook; Tenally, Rs. 70, range situated in the north of Repully talook; Toomaracote, Rs. 70, range situated in the west of Pulnaud talook; Vissanapett, Rs. 100, range conterminous with the zemindarry. Sub-magistrate, Bunder town, Rs. 70, jurisdiction extending over the municipal town of Masulipatam. Port officer and Special first-class magistrate, Bunder fort, Rs. 300, jurisdiction extending over the fort of Masulipatam. Sub-magistrate, Guntoor, Rs. 70; jurisdiction extending over the town of Guntoor. Similarly judicial officers:—Judge, Masulipatam. District moonsifs; Baupatla with jurisdiction extending over portions of Repully, Baupatla and Narsarowpett talooks; Bezwada with jurisdiction extending over Keicalore division in Goodivauda talook, Bezwada and Nundigauma talooks, Noozveed and Vissanapett divisions, Coochipoody agrahauram, Bunder talook; Ellore sub-judge division, Cauramproody with jurisdiction extending over Pulnaud and Vinoocondah talooks and portions of Narsarowpett and Suttenapully talooks; Guntoor with jurisdiction extending over Guntoor talook, portions of Repully, Baupatla and Narsarowpett talooks; Masulipatam with jurisdiction extending over Bunder talook, except Coochipoody agrahauram, and Goodivauda talook except Keicalore division. Similarly Public works officers:—District engineer, Bezwada; Superintending engineer, Bezwada, Executive engineers, Dooggiraula, Bezwada, Goodivauda. Sub-divisional officers Baupatla, Dooggiraula, Masulipatam, Bezwada and Cowtaram. Contains Registration sub-districts:—Avanigadda, Baupatla, Bezwada, Bunder, Dauchepully, Goodivauda, Guntoor, Juggayapett, Narsarowpett, Noozveed, Nundigauma, Ponnore, Repully, Suttenapully, Tenally, Toomaracote, Vinoocondah. Contains Forest ranges:—Baupatla, Bezwada, Bunder, Crossoor, Guntoor, Pulnaud, Vinoocondah. Contains Municipalities:—Bezwada, Guntoor and Masulipatam. Contains district board and talook boards; Bunder, embracing Bunder and Goodivauda talooks including Zemindarries; Bezwada, embracing Bezwada and Nundigauma talooks and Noozveed and Vissanapett divisions; Guntoor, embracing Guntoor and Suttenapully talooks; Repully, embracing Baupatla and Repully talooks; Vinoocondah, embracing Vinoocondah, Narsarowpett and Pulnaud talooks. The following are the zemindarries:—Balliparroo, Calagara, Capileshwarapooram, Chevendra, Chinna gollapollem, Chintalapauty vantoo, Chitty goodoor, Comirey, Condore and Cumbampaud, Coochipoody, Devarcote, Devarpully, Goodoor pergunnah, Gumpalagoodem, Inagadapa, Kokilampaud, Krittivenn samoot, Lingagherry, Medore, Meilavaram mittah, Mirjapooram, Mooncoolla, Moonganla pergunnah, Narsayyagoodem, Ootcore, Pengolloo, Pingoodoor lunka, Pootraila, Royavaram, Sanoobunda, Tailaprole, Tirvore, Valloor samoot, Ventrapragada, Vissanapett, Vooyyoor. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 164; light-houses, II, 169; comparative population, II, 172; location of revenue officers, II, 386; revenue settlement of the district, II, 412; registrars' and sub-registrars' stations, II, 421; ports, II, 423; salt factories, II, 426; rain-guage stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 511; zemindarries contained, I, 59, and II, 298; special public works, I, 396. A special gazetteer account of the whole district is given at II, 82. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Baupatla, Bezwada, Bunder, Goodivauda, Guntoor, Krittivenn, Lingagherry, Meilavaram, Moongaula, Narsarowpett, Noozveed, Nundigauma, Pulnaud, Repully, Sullapully, Suttenapully, Valloor, Vinoocondah, Vissanapett.—"*b*" River; Kistna dist., Bunder tal. The μαίσωλος of Ptolemy is often taken for the Godavery; but in these pages it is taken for the Kistna; compare Masulipatam. In maps down to those of the sixteenth, seventeenth, and even eighteenth century, the Godavery was omitted altogether. The Booddhist [booddha] civilization on the Kistna absorbed attention, being the prototype of the later Bramin civilization on the Cauvery. The river rises at Mahableshwar, on the eastern brow of the Western ghauts [q.v.], 4,500 feet above sea level and in lat. 18° 00′, long. 73° 44′, 40 miles east of the western coast of the peninsula. Here stands an ancient temple of Mahadeo, at the foot of a steep hill. In the interior is a small tank, into which a stream of pure water ever pours out of a spout fashioned into the image of a cow's mouth. This is the traditional fountain-head of the river, which is likened to the deity in a female form, and called Krishna bye. Pilgrims in large numbers crowd to the sacred spot, which is embowered in trees of dark foliage and flowering shrubs. Like the Godavery and Cauvery the Kistna flows almost across the peninsula from west to east. Taking a south-easterly course of about 145 miles through the territory of Sattaura, and thence dividing that province from

the jagheers [q.v.] of the Southern mahratta country for a further distance of 10 miles, in lat. 16° 45′, long. 74° 34′, on the right side, it receives the Warna, flowing from the west. From that confluence flowing south-east for 158 miles, alternately between and through the jagheers of the southern Mahratta country, Sattaura, and the British district of Belgaum and Caladgy, it on the right side receives the Ghautprâbha, and thence holds a similar course for 35 miles, separating the collectorates of Sholapore and Belgaum, to lat. 16° 10′, long. 76° 17′, where it arrives at the territory of the Nizam [q.v.]. During this part of its course, besides the Ghautprabha, it receives on the right side, 22 miles lower down, the Maulprabha, besides several small torrents on the right and left. All these, like the main stream, are characteristic rivers of the plateau of the Deccan [q.v.]. They run in deep channels, from which it is almost impossible to lead off channels [q.v.] for irrigation. In the rainy season they swell into brimming torrents, but during the remaining eight months of the year they shrink to mere threads of water, straggling through a sandy waste. The river, skirting the territory of the Nizam for about 10 miles, passes into it, and holds through it a course north-east for about 60 miles, to lat. 16° 33′, long. 77° 02′ where it turns south-east, and, flowing in that direction 25 miles, on the left side receives, in lat. 16° 24′, long. 77° 20′, the Bheema, a large tributary from the north-west. Continuing to flow in a south-easterly direction 80 miles farther, it receives on the right side, at Sangam in lat. 15° 58′, long. 78° 18′, the Toongabudra, from the south-west. At this point it enters British territory. On entering the Nizam's dominions the Kistna drops from the tableland of the Deccan proper down to the alluvial Doabs [q.v.] of Sharapore and Ryechore. The fall is as much as 408 feet in about 3 miles. The first of the Doabs mentioned above is formed by the confluence of the Bheema, which brings down the drainage of Ahmednugger, Poona, and Sholapore; the second by the confluence of the Toongabudra, which drains the north of Mysore and the districts of Bellary and Kurnool. Flowing north-easterly for 180 miles through an uninhabited tract in the wilds of the Nullamullays, a zigzag course across the plateau on which the famous Srisheilam or Parvatam pagoda [q.v.] stands, in a wide and steep sided trench of nearly 1,000 feet in depth, it reaches Rauvairila in lat. 16° 50′, long. 80° 08′. During this part of its course it receives the Bhavanausy. After passing through the Nullamullays the river turns south-east, and enters Kistna district at Chintapully, near its confluence with the Palair. Between the confluence of the Toongabudra and Chintapully, it receives on the left side, from the territory of the Nizam, the Dindy, the Moosy; on whose banks stands Hyderabad, the Palair, the Seena, and the Neema; and a few miles below its entrance into the plain, the Moonair, flowing in a southerly direction. On the right it receives the S. Wardhah and Hagary. During its course through the mountains, its tributaries, though numerous, are all unimportant. From the confluence of the Toongabudra to that of the Palair, it forms the boundary between the territory of the Nizam and the districts of Kurnool and Kistna; thus giving the general boundary between this Presidency and the Nizam's dominions. From Chintapully, the river holds a course of 70 miles south-east to Bobbar lunka in Kistna district, lat. 16° 5′, long. 80° 56′, where it parts into two arms, the one flowing south-east 30 miles, and falling into the Bay of Bengal at Point divy, in lat. 15° 57′, long. 81° 13′; the other flowing south 25 miles, and falling into the Bay of Bengal, in lat. 15° 45′, long. 80° 53′; inclosing between them a delta [conamoogam] traversed by a third branch sent off from the southern arm, and by some water courses from the main branches. The delta is traversed by others of less magnitude, which are numerous during inundations. The total length of the river is about 1,000 miles and the total area of its catchment basin [nadee] about 97,050 square miles. As a great part of the course of the Kistna and its tributaries flow through alluvial soil [vandal munn], the flood-water is heavily charged with silt [adaimunn]. When it reaches Bezwada, it is confined between two gneissic hills, the width of the gorge being about 1,300 yards. At this point the velocity of the river in flood is rather more than 6·5 miles an hour, and the maximum flood discharge is 761,000 cubic feet per second. The solid matter carried by the flood-water past Bezwada is $\frac{1}{432}$ of the bulk. It follows that the Kistna in high flood carries past Bezwada daily enough detritus to form a deposit one foot deep over a surface of 5 square miles. Below Bezwada to the sea, the fall of the river is only 0·66 foot per mile, and the bed widens out to 3 or 4 miles, so that in the course of ages an extensive deltaic tract has formed between Bezwada and the coast. This delta slopes away on either side, with a fall of about 18 inches per mile from the elevated river bed; hence all that is not protected by embankments is submerged whenever a high flood occurs, and the deposition of fluviatile alluvium still continues. The colair lake represents the work still to be done by this alluvium in levelling up the land wrested from the sea by the rivers. The actual mouths of the rivers have thrown out low promontories far into the sea. The river is subject to two periodical inundations annually. The first and principal, caused by the south-west monsoon [q.v.] precipitating its heavy rains on the Western ghauts, Mysore, and other elevated tracts about the upper parts of the river's course, takes place about June; the other, and much smaller one caused by the local rains brought by the north-east monsoon, occurs about October. In consequence of the rapid declivity of its water way and rockiness of channel, the river may be said to be almost entirely useless for navigation. From Juggayapett down to the Bezwada anicut [q.v.], about 50 miles, the river is navigable for about six months of the year by sea-going dhonies [q.v.], which are brought up either by the Bunder or the Ellore canal. The mode of crossing at the ferries is by wide circular baskets, made of hides [chaurah] stretched over a framework of bamboos [q.v.]. Near Ryechore, the main stream is crossed by an iron girder bridge of the Great indian peninsula railway. In utility for irrigation the Kistna is inferior to the Godavery or the Cauvery. Throughout the whole upper portion of its course it runs in a deep bed, with high, very steep, almost perpendicular banks rising from 30 to 50 feet above its ordinary level. Here it drains rather than waters the surrounding country. As to its tributaries, the head-waters of the Bheema are dammed up at Kharakwasla to furnish Poona with a water-supply; and the Madras irrigation company expended large sums of money to water Kurnool from the floods of the Toongabudra. On the main stream, a small work has been constructed high up in Sattaura district, called the Kistna canal. A dam has here been thrown across the bed of the river, from which a canal is taken parallel to the left bank, capable of irrigating an area of 1,825 acres. But the greatest irrigation work on the Kistna is the Bezwada anicut, for description of which see vol. I, 396. In the Kistna delta there are several lines of canals. The principal line of navigable canal are as follows:—Bezwada to Ellore, 39 miles; Bezwada to Masulipatam creek, 48 miles; Kistna anicut to Nizampatam creek, 41 miles; Dooggiraula, at 12th mile of No. 3 Nizampatam canal, to Santaravore near Incolloo to which point the Buckingham canal [q.v.] is opened, 50 miles. The secondary lines of navigable canal are as follows:—Paumarroo, 31st mile of Masulipatam canal, to Vinzarampaud near Keicalore, 26 miles; Revendrapaud 8th mile of Nizampatam canal to Collore, 20 miles. Proposed lines of navigable canal are as follows:—Cowtaram to Ooppootair below Colair lake *viâ* Buntoomilly, 25 miles; Cowtaram to Ooppootair below Colair lake near Aucveed, continuation of No. 5, 26½ miles; Yenamala coodroo 4th mile, Masulipatam canal to Pooligedda in Divy island, 36 miles; Revendrapaud 8th mile, Nizampatam canal to Gungadipollem near mouth of Kistna, continuation of No. 6, 45½ miles. The Kistna, though less sacred than the Godavery and Cauvery, is a very sacred river. Nivritty sangam, or the junction of the river with the Bhavanausy, is considered a holy place of pilgrimage. Once in twelve years it is said that the river attains a peculiar sanctity when Jupiter [brihaspaty] enters the Canyay [q.v.] sign [raushy] of the zodiac [raushy chuckram] and that all sins are then washed away from the bather. Cf. Mahamagham and Pooshcaram. Near this place is a lingam [q.v.] said to have been originally made of wood and established by Dharmarajan [q.v.], the chief hero of the Mahabhaurat [q.v.]. Delay having occurred in the receipt of a stone lingam from Benares, Dharmarajan, when the auspicious hour arrived, established a wooden lingam which in process of time has been petrified. A short distance below the junction is a whirlpool called Chuckra teertam, regarded as having been caused by the discus [chuckram] weapon of Krishnan [q.v.], being thrown there.——*Kistnapatam* * (కృష్ణపట్నము - krishnápatnamu, Tel.). From (krishna, tel. proper name + pattana, san. town). Named after krishna deva royel. Greek σωπάτμα. Title otherwise Calitore. Village, Port, Salt factory, Backwater; Nellore dist., Goodoor tal.; pop. 2,807; acres 7,142; lat. 14° 17′; long. 80° 10′; from Goodoor E.N.E. 21 miles; from Madras N. 82 miles; from Meipaud S. 15 miles; from Nellore S.E. 15 miles; from Paumanjy N. 16 miles. On the Buckingham canal [q.v.], connected by road with Nellore. The canal basin is generally called the Mootcore basin from the village on road 3 miles distant. Anchorage outside the bar is unsafe, not being a good holding ground; but within the bar there is a fine backwater with great depth of water. The entrance to the backwater is always open, and the channel by which ships come in is 40 yards wide, and on the bar ordinarily 9 feet deep at mean tide, at high tide 11 feet. The whole width of the mouth is 500 or 600 yards. The channel shifts its position with the season of the year. A place of shelter for native craft during the monsoons [q.v.] and in the stormy months of April and May. Dhonies [q.v.] are sometimes taken into dock and repaired at this port. There used to be trade in salt; chief trade now is grain. It has been proposed to make the irrigation canal from Nellore to Kistnapatam navigable. Trig. station at the Beacon; lat. 14° 17′ 51·75″; long. 80° 11′ 1·11″; from Goodoor N.E. 22 miles; from Mootcore E. 3 miles; from the sea W. ¼ mile. For Collector's bungalow here see Conamoola.——*Krishna* (कृष्ण - krishna, San.). From (krish, san. to attract); originally applied to an attractive dark-blue. Black [calam, car, caulam, caur]. Plant first term, often joining two genera. Ex., where transl. is of second term:—Canna indica (krishnatámara), nelumbium speciosum; Justicia gendarussa (krishnanirgundi), vitex negundo; Murraya kœnigii (krishnanimba), melia azadirachta; Phyllanthus multiflorus (krishnakámbhóji), abrus precatorius. See gloss. paragraphs.——*Krishna ashtamy* (కృష్ణాష్టమి - krishnáshtami, Tel.). From (krishna, san. the god + ashtami, san. eighth lunar day). The eighth lunar day [tity] of the waning moon [krishna pacsham] of fifth lunar [chaundra maunam] month Shrauvanam

[mausam] as having been the birth-day of Krishnan. Same as Krishna jayanty.——*Krishna bhoomy* (కృష్ణభూమి - krishnabhúmi, Tel.). From (krishna, san. black + bhúmi, san. soil). Means black soil. Same as regar.——*Krishna chooday* (कृष्णचूडा - krishnachúdá, San.). Means Krishnan's hair jewel, from flower. Same as Gold mohur tree.——*Krishnadeva roya* (కృష్ణదేవరాయ - krishnadévaráya, Tel.). From (krishna, san. the god + déva, san. lord + rájá, san. king). Otherwise Krishnaroya. Rajah of Vijianugger of the Narsimha dynasty. A.D. 1509-1530. Extended his dominions to the north as far as the Kistna, defeating the Adil shahy sultan of Beejapore; to Warangal and Cuttack in the east, whose daughter he married as bond of peace; to Salsette in the west; on the south to Mysore, Madura and Trichinopoly. A great patron of Sanscrit and Teloogoo literature; the eight Ashta diggajams [q.v.] flourished in his Court. His minister was Timmarajah, the Hem rajah of the Mahomedan historians [charitram]. See vol. I (150), (153); II, 80, 250.——*Krishna dosham* (कृष्णदोष - krishnadósha, San.). From (krishna, san. black + dósha, san. disorder). From attendant symptoms of dark spots and dark tongue and lips and teeth. Typhus fever [veidyan].——*Krishnagherry* (கிருட்டிணக்கிரி - kiruttinakkiri, Tam.). See sep. title.——*Krishna jananam* (కృష్ణజననం - krishnajananam, Tel.). From (krishna, san. the god + janana, san. birth). Same as Krishna jayanty. *Krishna jayanty* (కృష్ణజయంతి - krishnajayanti, Tel.). Means krishnan's day of rejoicing. Otherwise Shree jayanty [q.v.]. Lunar [chaundra maunan] festival [pundigay, 6c], subject to intercalation [adhicam]. The eighth day of waning moon [krishna pacsham] of fifth lunar month Shrauvanam [mausam] between 8th August and 7th September. Anniversary of Vishnoo's incarnation [avatar] as Krishnan [q.v.]. Celebrated in houses and in Vishnoo [q.v.] pagodas [q.v.]. Natives form figures out of clay representing Krishnan and his family, and worship them during the night, observing a fast. In pagodas the festival is celebrated for nine days, during which the image of Vishnoo is carried in procession through the streets. The festival is particularly observed by shepherds [yaudava] in commemoration of Krishnan having been brought up amongst them [maryauday].——*Krishnamma* (కృష్ణమ్మ - krishnamma, Tel.). From (krishna, san. the god + amma, tel. mother). Hindoo 2nd or pers. name. Common to both sexes. Taken by males among Veishnava bramins, Comaties, and Shoodras [peyar].——*Krishnan* (कृष्ण - krishna, San.; கிருட்டிணன் - kiruttinan, Tam.). Means black, from color of person. ἀπόλλων of Greeks; Apollo of Romans; Osiris or occident deity or setting luminary of Egyptians. Eighth avatar [q.v.] of Vishnoo [q.v.].—"*a*" Krishnan's life is related at length in the Vishnoo pooraunam [q.v.] and other books. Krishnan was the son of Vasoodevan by his wife Devaky, a sister of Cumsan, a king who from jealousy ordered the child to be destroyed. This was attempted by Pootanay his nurse. The parents therefore gave their son in charge to Nundan [q.v.], a shepherd, who was in turn ordered by the king to kill the child. But as the shepherd's wife Yashoday had taken a fancy to the child they adopted him instead of a child which they had lost. Thus Krishnan grew up as Gopaulan [q.v.], a cowherd among cowherds. His favorite mistress was Raudhay. The Geeta govindam [q.v.] is a poem on their amours. He exchanged however soon the life of a shepherd for that of politician and warrior, joining the five Pandavas [pandoo] his relatives, and becoming their ambassador and a charioteer of Arjoonan [q.v.] whence his epithet Partasauraty [q.v.], in their war with Dooryodhanan [q.v.]. Throughout the war which he advocated, his was the presiding mind, while Arjoonan was the principal hero and Dharma rajan the nominal head of the confederacy. The war ended in the defeat of Dooryodhanan [mahabhaurat]. Krishnan was vulnerable in his sole only. One day when he sat in a forest, engaged in thought and resting his foot upon his knee, a hunter named Jaray came, and beholding from a distance the foot of Krishnan mistook it for the foot of a deer [mrigam], and shooting his arrow lodged it in the sole. Krishnan then abandoned his mortal body, and was in the language of the Vishnoo pooraunam united with his own self, or the universal spirit.—"*b*" There is a considerable coincidence between the account of the infancy of Cyrus, as stated by Herodotus, and the infancy of Krishnan, as narrated in the tenth book of the Bhaugavatam [q.v.]. The avatar of Krishnan was outside of India proper. The Pandavas were probably rulers in Cashmere. Partasauraty, or the car-driver of the Paurtan, is the name by which Krishnan is worshipped at the great pagoda [q.v.] at Triplicane, Madras.—"*c*" Krishnan is generally represented as a man standing on one leg and playing a flute [pillangrovy]. The separate scenes of his life however are represented in the arts. One is krishnan with his chief wife raudhay, daughter of the shepherd nundan and krishnan's foster sister. Another is ponna maunoo krishnan; when the gopicays or milk-maids were bathing in the jumna, krishnan removed their cloths and climbed a ponna maunoo tree or alexandrian laurel [common poon]. Another is chemboo krishnan or krishnan as a child carrying a pot. The scene of cauliya krishnan represents him jumping into the tank of cauliya, the king of snakes, then standing on the head of the snake and playing the flute. Murry aukoo krishnan represents him floating on a banyan [q.v.] leaf in the water. Another scene represents krishnan seated on a five-headed cobra [q.v.], keeping his right toe in his mouth and surrounded with ten avatars or incarnations of himself. Baulakrishnan is the infant krishnan seated on a five-headed cobra, his right toe in his mouth and his mother standing by with a peacock [mayil]. Doogdhya krishnan is krishnan being induced by his mother yashoday to eat butter when in the action of crawling. In the scene of govardhana krishnan he as a boy of seven years old lifts up the mountain govardhanam to protect the gopas [q.v.] and gopicays from a storm sent by indran [q.v.]. See vol. I (74). Gopaulkrishnan is krishnan grown up as a cowherd [matam].—"*d*" Hindoo 2nd or pers. name [peyar]. Familiarly corrupted into Kittan, Kittoo, Kittah and Kitty and sometimes Keelan. In Tel. and Can. it becomes Kishta, Kishtoo and Kishty.——*Krishna pacsham* (कृष्णपक्ष - krishnapaksha, San.). Means dark fortnight. The half of a lunar month [mausam] from full [powrnimay] to new moon [amavausyay] when the moon [chundran] is on the wane. First styled Apara pacsham or latter half and Apacsheeyamauna pacsham or waning half; subsequently Krishnam, Tanmisram or Vadyam. In tamul Tey piray [q.v.] or decrescent moon [jyotisham, pacsham].——*Krishna rajah wodeyar* (ಕೃಷ್ಣರಾಯಒಡೆಯರು - krishnaráyaodeyaru, Can.). Name + title. Adoptive father of the present ruler of Mysore. Succeeded when a minor with Poornayya as minister. Ill-government of the Maharajah after Poornayya's resignation forced his subjects into open revolt, and led to British management, which continued till Maharajah's death in 1868. See vol. I, 20; II, 250.——*Krishna's arrow* (कृष्णबाण - krishnabána, San.). Same as Poison nut.——*Krishnasawmy* (கிருட்டிணசாமி - kiruttinasámi, Tam.). From (krishna, san. the god + svámí, san. lord). Hindoo 2nd or pers. name [peyar].——*Krishnaudy* (कृष्णादि - krishnádi, San.). From (krishna, san. dark + ádi, san. beginning). The n. indian mode of reckoning [maunam] a month [mausam] by beginning with the Krishnapacsham or moon-waning half, making the day following the full moon [powrnimay] to be the first day of the month [gownam], and the day of the full moon to be the thirtieth. For the s. indian method see Shooclaudy.——*Krishnavenay* (कृष्णवेणा - krishnavéná, San.). From (krishna, san. the river so called + véní, san. stream). Tributary of the Kistna; see vol. I (3).——*Krishy* (कृषि - krishi, San.; കൃഷി - krishi, Mal.). From (krish, san. to plough). Cultivation [vellaumay]. Krishicauran is the cultivator [coody, ryot].

KRISHAM (कृश - krisha, *San.*). From (krish, san. to become thin). Lean.——*Krishaungy* (कृशाङ्गी - krishángí, San.). From (krishánga, san. thin-limbed). Rails. Rallidæ family, latitores, grallatores, aves [pacshy, 44], of naturalists [jantoo]. Most characteristic points of this family, which includes the water hens, coots, and rails, are the large feet, and the short stout and compressed beak; head is small and compressed, neck short, body also compressed; general aspect, and partially vegetable diet, give them appearance of gallinaceous birds [moorghy]; some are furnished with membranes or webs on toes, and swim well. Divided into two sub-families, Gallinulinæ, the coots and water hens; and Rallinæ, the true rails. The species best known are:—Purple coot, porphyrio poliocephalus, gallinulinæ; loud and somewhat fowl-like call. Bald coot called in tel. (bollikódi) or white fowl, from white beak and frontal disc; fulica atra, gallinulinæ. Water cock called in persian (zághiábí) or water raven, and in hindostany (pankavvá) or water crow; gallicrex cristatus, gallinulinæ; very noisy bird; partially nocturnal; male birds fight, and natives keep them for that purpose; excellent eating. Water hen or moor hen called in hindostany (páníkíbadak) or water duck; gallinula chloropus, gallinulinæ; head dusky grey; upper plumage deep olive; wing dusky; edge of wing white; throat, neck and breast dusky grey, rest of under parts deep bluish-grey; feathers edged whitish, flanks with large streaks of white; under tail-coverts pure white, with few black feathers intermixed; bill red at base, yellow at tip; irides red; legs and feet pale olive green, with orange garter above knee; length 12 to 13 inches; female larger and somewhat richer colored; swims freely, but when approached always retreats to the shore, and conceals itself among shrubs, which it climbs or among thick reeds; it runs with the tail erect. White-breasted water hen; gallinula phœnicura, gallinulinæ. Spotted rail; porzana maruetta, rallinæ. Pigmy rail; porzana pygmæa, rallinæ. Ruddy rail; porzana fusca, rallinæ. Banded rail; porzana ceylonica, rallinæ. Blue-breasted rail; rallus striatus, rallinæ. Indian water rail; rallus indicus, rallinæ.

KRISHNAGHERRY (کشنگری - kishnagirí, *Hind.*; கிருட்டிணக்கிரி - kiruttinakkiri, *Tam.* krishnagiri*) [krish]. From (krishna, san. black + giri, san. mountain). After a Krishna row of Chundragherry, who built the fort.——(1) Talook, Salem district, Tahsildar's pay Rs. 150. Area 659 square miles. N. of district. Between N. lat. 12° 14′ and 12° 42′ and E. long. 78° 00′ and 78° 32′. Extreme length and breadth about 32 miles each way. Bounded north by Oossoor talook, Baitmungalam talook of Mysore and the Cungoondy zemindarry in North arcot; west and south-west by Oossoor and Dharmapoory talooks; south by Dharmapoory and Ootancaray talooks, and east by Ootancaray and Tripatore talooks. The talook is in the border land between the Mysore plateau and the Carnatic [q.v.]. The whole country

is a series of small plains and valleys overlooked on all sides by droogs [q.v.] of greater or less size. It is the centre of the true Baramahaul [q.v.], the fortresses of which are scattered all round. In the amphitheatre of hills which skirt the talook the chief outlet is that through which the Ponniaur flows. It is also traversed very equally by numerous streams rising in the surrounding hills and all finally becoming tributary to the Ponniaur. Of these the Mullapaudyaur, the Muttooraur and the Rendaur are almost perennial, the latter two being much utilised for irrigation. The centre is occupied by a range of hills jutting out from the Mysore plateau the passes to which they command, about ten miles in extent bearing no particular name and including amongst its peaks four or five of the Droogs from which the Baramahaul takes its name; of these the chief are the Eiyyagownden mullay or Gaganaghurmullay, visible for miles on every side and the Juggadevyghurmullay. Red soils predominate, earth containing large quantities of saltpetre [shorah] and soda salts [munn cauram] is prevalent in positions suited for wet cultivation. Trap dyke exists in several places and whole mountains of trap [padicutt cull] may be seen near Vepanahully. On the road from Maharajghur there is a large tract of torrent mounds. Iron [auhan] ore of excellent quality is found in several of the hills and worked for local consumption. Fresh water nodular limestones [choonam cull], also easily obtainable. Chief products are cumboo [bajrah], cholum [q.v.], raggy [q.v.], varagoo [q.v.], tinay [q.v.], avaray [country bean], dholl [common dholl], horse-gram [madras horse-gram], oolandoo [black gram], cadalay [bengal gram], putchay payar [green gram], vaircadalay [ground nut], castor-oil [aumanac] and gingelly-oil [gingelly] seeds and paddy [q.v.]; sugar-cane [q.v.] and tobacco [pogauk] are cultivated in small quantities; cocoanuts [q.v.] are largely grown along the banks of rivers, and grapes [angoor] of excellent quality are produced in Krishnagherry and its vicinity. Palmyra [q.v.] jaggery [q.v.] also is manufactured in large quantities. Chief jungles are Bellaurapully, Canavyeputty, Kadireesha vriddhy, Maharajghur, Oppattavaudy, Tobbagutty. The hills are, generally speaking, covered with wood fit only for fuel and agricultural implements. On the Maharajghur hills are a few valuable timber [maram] trees. In the eastern part of the talook a large extent of land is covered with palmyras, much used for building purposes. The whole talook abounds in tamarind [q.v.] trees in the fruits of which there is a large trade. Exports are chiefly rice [q.v.], cumboo and other grains, ghee [q.v.], tamarind and hides [chamrah], grapes, shoes and black cloth. Imports are chiefly silk [puttoo], indigo [q.v.], cloths, salt [ooppoo], spices, raggy [q.v.], wheat [geung], bengal gram [q.v.] and betel nuts [q.v.]. The talook is remarkable for the number of ancient breached tanks [q.v.], some very large. Anicuts [q.v.] and river channels [q.v.] are small. Chief anicuts are those of Agaram, Bandaurapully, Baroor, Chandaupooram, and Punnandore. Important tanks are Badetalaub near Krishnagherry, Attipullam and Baroor in the south-eastern portion, and Pennagondapooram tank. Camping grounds:—Coorumbarpully, Juggadevy, Krishnagherry. Mahendramungalam, Mattore, and Mullapaudy. Zemindarries:—Atchamungalam, Auvatvaudy, Bellaurapully, Bellaurcooppam, Coondaurapully mittah, Coorumbarpully, Eelagam, Eicondamcottapully, Juggadevy, Mahendramungalam, Nammaundahully, Nulloor, Oolagam, Payanapully, Penneshwaramutt, Poorshottamapooram, Royacottah, Shandaurapully, Shaumandamullay, Shooligoonta, Talihully, Tippanapully. Places of archæological interest:—Agaram, Chikka timmanhully, Coorumbarpully, Krishnagherry, Royacottah, Shappauniputty. The leading places, &c., in the talook are the following.——*Atchamungalam* (அச்சமங்கலம் - aççamangalam, Tam.). From (aççam, tam. tree, sesbania grandiflora, pers. + mangala, san. prosperity). Zemindarry, Village; pop. 645; square miles 5; lat. of village 12° 31′; long. 78° 22′; from Krishnagherry E. 7 miles; from Salem N.N.E. 61 miles. Peshcush Rs. 631.——*Auvatvaudy* (ஆவத்துவாடி - ávattuvádi, Tam.). From (ávattu, tam. from ápad, san. distress + vádi, tam. enclosure). Zemindarry, Village; pop. 1,135; sq. miles 5; lat. of village 12° 20′; long. 78° 19′; from Krishnagherry S.S.E. 14 miles; from Salem N.N.E. 47 miles. Peshcush Rs. 1,946.——*Baramahaul* (بارہ محل - bárámahal, Hind.). See sep. title.——*Baroor* (ಬಾರೂರು - bárúru, Can.). See sep. title.——*Bellaurapully* (பெள்ளாரப்பள்ளி - pellárappalli, Tam. pellárapallimitta *). From (ballála, can. dynasty so called + palli, tam. village). Zemindarry, Village; pop. 101; square miles 60; lat. of village 12° 30′; long. 78° 11′; from Krishnagherry W.S.W. 4 miles; from Salem N. 58 miles. Peshcush Rs. 5,711.——*Cauveryputnam* (காவேரிப்பட்டணம் - kávérippattanam, Tam.). See sep. title.——*Coondaurapully* (குந்தாரப்பள்ளி - kundárappalli, Tam.). From (kunru, tam. hill + áru, tam. river + palli, tam. village). Zemindarry, Village; pop. 773; square miles 31; lat. of village 12° 34′; long. 78° 13′; from Krishnagherry N.W. 4 miles; from Salem N. 62 miles. Peshcush Rs. 312.——*Coorumbarpully* (குறும்பர்ப்பள்ளி - kurumbarppalli, Tam.). From (kurumban, tam. member of the caste + palli, tam. village). Zemindarry, Village; pop. 318; lat. of village 12° 36′; long. 78° 10′; from Krishnagherry N.W. 8 miles; from Salam N. 65 miles. Peshcush Rs. 2,488.——*Dowlatabad* (دولت آباد - daulatábád, Hind.). See sep. title.——*Eelagam* (ஈலகம் - ílagam, Tam.). From (ízham, tam. toddy + agam, tam. place). Zemindarry, Village; pop. nil; square miles 14; lat. of village 12° 34′; long. 78° 04′; from Krishnagherry W.N.W. 14 miles; from Salem N.N.W. 63 miles. Peshcush Rs. 1,275.——*Eicondamcottapully* (ஐக்கொந்தம் கொத்தப்பள்ளி - aikkondamgottappalli, Tam.). From (aiyyakkavundan, tam. proper name + kotta, tel. new + palli, tel. village). Zemindarry, Village; pop. 985; square miles 6; lat. of village 12° 27′; long. 78° 22′; from Krishnagherry S.E. 9 miles; from Salem N.N.E. 55 miles. Peshcush Rs. 720.——*Gaganaghur* (گگن گڑھ - gagangarh, Hind.; ககனக்கடை - kaganakkadai, Tam.). From (gagan, hind. sky + garh, hind. hill fort); hill reaching the sky. Sanscrit name (gaganagiri), meaning the same. Tam. also (aiyyakkavundanmalai), meaning ayya gownden, proper name + mountain. Hill; lat. 12° 26′; long. 78° 20′; from Krishnagherry S.S.E. 8 miles; from Salem N.N.E. 54 miles. One of the Baramahauls.——*Juggadevy* (ಜಗದೇವಿ - jagadévi, Can.; சகதேவி - shagathévi, Tam.). From (shagathévaráyan, tam. proper name). Zemindarry, Village, Hill; pop. 979; acres 9,846; lat. of village 12° 29′; long. 78° 22′; from Krishnagherry E.S.E. 7 miles; from Salem N.N.E. 58 miles. The hill is one of the Baramahauls. It was the fortress of Juggadeva royer, who with his eleven brothers ruled the surrounding country in the sixteenth century. Peshcush Rs. 1,890.——*Krishnagherry* (கிருட்டிணக்கிரி - kiruttinakkiri, Tam.). See below.——*Maharajghur* (مہاراج گڑھ - mahárájgarh, Hind.; மகாராசக்கடை - magárásakkadai, Tam.). From (mahá, san. great + rájá, san. king + garh, hind. hill fort). Sanscrit name (mahárájagiri), meaning same. Village, Hill; pop. 719; acres 290; lat. 12° 38′; long. 78° 18′; from Krishnagherry N.N.E. 7 miles; from Salem N. 67 miles.——*Mahendramungalam* (மகேந்திரமங்கலம் - magéndiramangalam, Tam.). From (mahá, san. great + indra, san. the god + mangala, san. prosperity). Zemindarry, Village; pop. 596; square miles 42; lat. 12° 25′; long. 78° 06′; from Krishnagherry S.W. 14 miles; from Salem N.N.W. 52 miles. Peshcush Rs. 4,398.——*Mullapaudy* (மல்லப்பாடி - mallappádi, Tam.). From (malla, san. a wrestler + pádi, tam. village). Village; pop. 852; acres 1,226; lat. 12° 32′; long. 78° 25′; from Krishnagherry E. 10 miles; from Salem N.N.E. 62 miles. One of the Baramahauls.——*Nammaundahully* (ನಮ್ಮಾಂಡಹಳ್ಳಿ - nammándahalli, Can.). From (nam, tam. our + ándai, tam. ruler + halli, can. village). Zemindarry, Village; pop. 477; square miles 13; lat. of village 12° 28′; long. 78° 01′; from Krishnagherry W.S.W. 18 miles; from Salem N.N.W. 57 miles. Peshcush Rs. 1,360.——*Nulloor* (நல்லூர் - nallúr, Tam.). From (nal, tam. good + úr, tam. village). Zemindarry, Village; pop. 225; square miles 9; lat. of village 12° 32′; long. 78° 03′; from Krishnagherry W. 14 miles; from Salem N.N.W. 61 miles. Peshcush Rs. 1,432.——*Payanapully* (பையனப்பள்ளி - paiyyanappalli, Tam.). From (painá, tel. high + palli, tam. village). Zemindarry, Village; pop. 232; lat. of village 12° 32′; long. 78° 19′; from Krishnagherry E. 4 miles; from Salem N.N.E. 60 miles. Peshcush Rs. 278.——*Pennagondapooram* (பென்னக்கொண்டப்புரம் - pennakkondappuram, Tam.). From (penu, tel. great + konda, tel. mountain + pura, san. town). Village; pop. 6; lat. 12° 21′; long. 78° 27′; from Krishnagherry S.S.E. 18 miles; from Salem N.N.E. 50 miles. Irrigation project.——*Penneshwaramutt* (பெண்ணேசுவரமடம் - pennésuvaramadam, Tam.). From (pennésuvaran, tam. the local god + mat'ha, san. cloister). Zemindarry, Village; pop. 679; square miles 7; lat. 12° 24′; long. 78° 17′; from Krishnagherry S.S.E. 10 miles; from Salem N.N.E. 51 miles. There is Penneshwarasawmy temple here. Peshcush Rs. 2,006.——*Ponniaur* (பெண்ணையாறு - pennaiyáru, Tam.). See sep. title.——*Poorshottamapooram* (புருசோத்தமப்புரம் - purusóttamappuram, Tam.). From (purushóttama, san. proper name + pura, san. town). Zemindarry, Village; pop. 56; square miles 8; lat. of village 12° 30′; long. 78° 23′; from Krishnagherry E.S.E. 8 miles; from Salem N.N.E. 59 miles. Peshcush Rs. 598.——*Royacottah* (ರಾಯಕೋಟೆ - ráyakóte, Can.). See sep. title.——*Shandaurapully* (சந்தாரப்பள்ளி - shandárappalli, Tam.). From (shandam, tam. beauty + áram, tam. garden + palli, tam. village). Zemindarry, Village; pop. 860; square miles 11; lat. of village 12° 29′; long. 78° 21′; from Krishnagherry E.S.E. 6 miles; from Salem N.N.E. 58 miles. Peshcush Rs. 706.——*Shaumandamullay* (சாமந்தமலை - shámandamalai, Tam.). From (sámanta, san. a tributary prince + malai, tam. mountain). Zemindarry, Village; pop. 229; lat. of village 12° 35′; long. 78° 14′; from Krishnagherry N.N.W. 3 miles; from Salem N. 63 miles. Peshcush Rs. 709.——*Shooligoonta* (ಸೂಳಿಗುಂಟ - súligunta, Can.). From (súle, can. dancing girl + gunta, can. property). Zemindarry, Village; pop. 131; lat. of village 12° 33′; long. 78° 06′; from Krishnagherry W. 11 miles; from Salem N. 62 miles. Peshcush Rs. 555.——*Talihully* (ತಲಿಹಳ್ಳಿ - talihalli, Can.). From (tale, can. head + halli, can. hamlet). Zemindarry, Village; pop. 809; square miles 12; lat. of village 12° 24′; long. 78° 17′; from Krishnagherry S.S.E. 9 miles; from Salem N.N.E. 52 miles. River Ponniaur passes by. Peshcush Rs. 1,890.——*Tippanapully* (திப்பனப்பள்ளி - tippanappalli, Tam.). From (tippa, tel. proper name + palli, tam. village). Zemindarry, Village; pop. 383; lat. of village 12° 36′; long. 78° 13′; from Krishnagherry N.N.W. 6 miles;

from Salem N. 65 miles. Peshcush Rs. 729.——*Tuttacull* (தட்டைக்கல் - tattaikkal, Tam.). From (tattai, tam. flat + kal, tam. rock). Village; pop. 515; acres 1,010; lat. 12° 22′; long. 78° 20′; from Krishnagherry S.S.E. 12 miles; from Salem N.N.E. 50 miles.——**(2)** Town, Hill, Talook and District moonsif's head-quarters; Salem dist., Krishnagherry tal.; pop. 5,314; acres 317; lat. 12° 32′; long. 78° 16′; from Madras W.S.W. 143 miles; from Namacull N. 90 miles; from Oossoor E.S E. 30 miles; from Salem N. 60 miles; from Tripatore W. 24 miles; from Yercaud N. 52 miles. On the Madras-Bangalore road at the foot of the Droog, from which it takes its name. Consists of two portions, old and new Krishnagherry, the latter known as Dowlatabad. Said to have been built by Juggadeva royer, a relative of Krishna row, the chief of Chundragherry. The ascent to the hill is difficult. In 1767, and again in 1791, British troops attempted to take this fort by assault, but failed to do so. On the 2nd May 1768 it surrendered to a blockading force under Colonel Smith and was held by a British garrison for some years until restored by treaty. The fortification, as well as the reservoirs of water, were dismantled during the mutiny, and remains of these in fair preservation may be seen about half way up to the north-west and north-east. Great loss of life is said to have ensued amongst European troops quartered on the rock by the explosion in 1803 of one of the magazines which was struck by lightning. From the summit of the Droog many of the forts of the Baramahaul can be seen. On the summit are a few ruined magazines and the cutcherry [q.v.] of the Killadar [q.v.]. The latter is a remarkable structure. A huge rocking stone spreads out from a columnal centre, being supported partly by rocks in situ and partly by masonry, thus making a sort of circular room, entered by narrow doors, and having this columnal mass in the centre. The measurement round the central mass is 24½ fathoms and that of the outer wall 30½ fathoms; the height is from 6 to 8 feet. A Krishna temple formerly stood on the Droog. Two tombs on the hill are regarded by Mussalmans with much veneration, being waited on by a fakeer [q.v.] who levies fees from visitors. North of the town is a picturesque tank, and beyond this are the tombs of former residents.

KRITTY (कृत्ति - kritti, *San*). From (krit, san. to divide). Elephant's skin.——*Krittivenn* (కృత్తివెన్ను - krittivennu, Tel.). From (above + vat, san. suffix of possession), meaning shiva, the elephant-skin wearer. Sanscrit name (krittivásapura), meaning shiva, the skin-covered deity + town.—"*a*" Zemindarry talook, Kistna district. In Bunder goverment talook.—"*b*" Zemindarry; Kistna dist., Bunder tal.; pop. 3,627; square miles 32. The estate formerly belonged to Jampany family. In 1811 Malrauz vencata goonda row zemindar [q.v]. of Narsarowpett purchased it in revenue sale and transferred it to Poolloory pedda vencatareddy naidoo, who still holds it.—"*c*" Village; Kistna dist., Krittivenn zemindarry tal.; pop. 417. Old temple [pondrauca].

KULLAUR (கல்லாறு - kallâru, *Tam.*). From (kal, tam. stone + áru, tam. river) [cull].—"*a*" Village; Coimbatore dist., lat. 11° 20′; long. 76° 55′; from Coonoor E.S.E. 5 miles; from Ootacamund E.S.E. 13 miles. At foot of Coonoor ghaut [q.v.].—"*b*" River; Neilgherry and Coimbatore districts. Tributary of the Bhawauny. Flows close to base of hills, below Coonoor ghaut. As it brings down water from the Coonoor and Kotagherry side only of the hills, it is not much affected by S.W. monsoon [q.v.], but is nevertheless capricious. Wet cultivation carried on by means of the Allauvaly and Maroothauvaly channels [q.v.].

KULSY (ಕಳಸಿ - kalasi, *Can.*). Measure of capacity. 14 seers = 1 kulsy; 3 kulsies = 1 mooda [alavay, 3c]. Approximate actual value, 1 kulsy = 980 cubic inches. South canara. Same as moonta of Nellore. Compare:—Nowt, Toom of Godavery; Mercaul of Madras, North arcot, Chingleput. See vol. I, 609; II, 508.

KURNOOL* (కర్నూలు - karnûlu, *Tel.*). From (kandena, tel. a mixture of lamp oil and burnt straw used in greasing cart wheels + prólu, tel. village). When the temple of Alampore was under construction the carts [bandy] for carrying stones had wheels greased here, which made a settlement. Tel. also (kandenavólu), meaning same. Colloquially (kandanólu).—"*a*" Revenue district; situated inland; between 14° 54′ and 16° 18′ N. lat., and between 77° 23′ and 79° 37′ E. long.; bounded N. by Toongabudra and Kistna rivers and Kistna district, E. by Kistna and Nellore districts, S. by Cuddapah and Anantapore districts, W. by Bellary district; square miles 7,768; pop. 817,811; language Teloogoo but Hindostany is extensively spoken. Contains rivers Bhavanausy, Coondair, Goondlacumma, Kistna, Saglair, Toongabudra; mountains Nullamullays, Veligonda hills, Yerramalas. The whole area of the district is represented by the following sub-areas:—Bunganapully Native state, Coilcoontla talook, Cumbum talook, Marcapore talook, Nundiaul talook, Nundicotcore talook, Putticondah talook, Ramalcottah talook, Sirwail talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Kurnool; Head assistant collector, Nundiaul, in charge of Nundiaul and Sirwail talooks; General deputy collector, Cumbum, in charge of Cumbum and Marcapore talooks; General deputy collector, Pyaupaly, in charge of Coilcoontla and Putticondah talooks; General deputy collector, Kurnool, in charge of Ramalcottah and Nundicotcore talooks. Tahsildars; Coilcoontla, Rs. 225; Cumbum, Rs. 150; Marcapore, Rs. 150; Nundiaul, Rs. 200; Nundicotcore, Rs. 175; Putticondah, Rs. 175; Ramalcottah, Rs. 200; Sirwail, Rs. 150. Deputy tahsildars; Atmacore, Rs. 70, range situated in the east of Nundicotcore talook; Caulwa, Rs. 70, range situated in the west of Nundiaul talook; Kurnool, Rs. 70, range situated in the north of Ramalcottah talook; Owk, Rs. 70, range situated in the west of Coilcoontla talook; Pyaupaly, Rs. 70, range situated in the south of Putticondah talook. Similarly judicial officers:—Judge, Kurnool; District moonsifs, Cumbum with jurisdiction extending over Cumbum and Marcapore talooks, Kurnool with jurisdiction extending over the talooks of Ramalcottah, Nundicotcore, Putticondah, and a portion of Nundiaul talook, Nundiaul with jurisdiction extending over Coilcoontla, Sirwail and a portion of Nundiaul talooks. Similarly Public works officers:—District engineer, Kurnool; Sub-divisional officers, Nundiaul and Kurnool. Contains Registration sub-districts Atmacore, Caulwa, Coilcoontla, Cumbum, Giddalore, Kurnool, Marcapore, Nundiaul, Nundicotcore, Owk, Putticondah, Pyaupaly, Ramalcottah, Sirwail. Contains Forest ranges Cumbum, Nundiaul, Nundicotcore, Marcapore, Sirwail, Yerramalas. Contains Municipality Kurnool. Contains District board; and Talook board, Nundiaul embracing Nundiaul and Sirwail talooks. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; comparative population, II, 172; location of revenue officers, II, 387; revenue settlement of the district, II, 413; registrars' and sub-registrars' stations, II, 421; rain-guage stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 513; special public works, I, 397. A special gazetteer account of the whole district is given at II, 85. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Bunganapully, Coilcoontla, Cumbum, Marcapore, Nundiaul, Nundicotcore, Putticondah, Ramalcottah, Sirwail.—"*b*" Deputy tahsildarry, Kurnool district. Pay Rs. 70.—"*c*" Town, Municipality, Head-quarters of Collector, District judge and tahsildar; Kurnool dist., Ramalcottah tal.; pop. 24,376; acres 797; lat. 15° 50′; long. 78° 06′; height 815; from Cumbum W.N.W. 72 miles; from Madras N.W. 240 miles; from Nundiaul N.W. 37 miles; from Pyaupaly N.N.E. 46 miles. A hot town, on a tongue of land composed chiefly of limestone [choonamcull] and shale rocks, at the junction of the Hindry and Toongabudra. The temperature is high in April, May, and June, and in July variable, ranging from 75° to 87°. In August showers are usual and heavy rains occasional. September and the first half of October are cloudy and hazy in the mornings; evenings still, and oppressive, and the thermometer ranges from 76° to 88°. November and December cold and bracing, thermometer falling to 64°. The heat increases from January to April. The prevailing winds are west and north-east. The population is half Hindoo and half Mussalman; this unusual proportion marking the long rule of the Pataun [q.v.] nawaubs [q.v.]. In 1799, after fall of Seringapatam, when Mysore territories were divided between English and Nizam [q.v.], Kurnool fell to share of latter. In 1800 it passed with the other Ceded districts [q.v.] to British. Besides fort [kila] and pettah [q.v.] the town comprises Newpettah, Boodhavaurampett, Roja and Zorahpore. Europeans reside in Newpettah which belongs to Culloor. Roja lies N. of Newpettah and is a jagheer [q.v.] village. Boodhavaurampett is a small rural village between Hindry and Collector's office. Zorahpore lies on S. bank of the Hindry. Formerly populous and noted as scene of conflict between the foreign soldiers of the late Nawaub and the British regiment sent to take possession of the country in A.D. 1839. The name is derived from Zorah, sister of Abd ool wahaub, the first Beejapore Governor of Kurnool. The following are the travelling distances by road from Kurnool to different places:—

To	Viâ	Miles and Furlongs.

KURRUCK (కరుకు - karuku, *Tel.*). Rough, as in bas-relief. Kurruck hoon [q.v.] or rough pagoda [star pagoda] was a gold coin [naunyam] by Hyder worth four rupees; also called Bahaudry [q.v.].

KUSHNEE (کشنیز - kishníz, *Hind.*). Coriander [cassibor].

KWAUTAM (क्वाथ - kvát'ha, *San.*). From (kvat'h, san. to boil). Decoction [veidyan].——*Kath* (کتھا - katthá, Hind.; കത്ത - kattu, Mal.). Hind. from (kvát'ha, san. decoction). The purest or crystallized form of cutch [catechu, cutch]; but the term is merely the general Hindostany for that article.——*Kwauta shastram* (क्वाथशास्त्र - kvát'hashástra, San.). From (above + shástra, san. science). A botanical vocabulary in Sanscrit with Teloogoo synonyms [shastram].

KYABOCA (کیبوکا - kaiboká, *Burm.*). Moch coondam [q.v.].

KYDAH (قاعدہ - káidah, *Hind.*). From (kada, ar. to sit). Rule, custom [mamool].

KYFIYAT (کیفیت - kaifiyat, *Hind.*). From (kaif, ar. how). Particulars [tafseel], statement [vaukmoolam].

KYLE (کیل - kail, *Ar.*). From (kálá, ar. to measure). Measurement. Amount of grain on the threshing floor [calam] after thrashing and before sharing it. So experiment as to produce.

L (ल - la, *San.*; ل - lám, *Hind.*). San. name of indran [q.v.]; also Paniny's technical term for all the tenses and moods. Hind. denotes 30 in arithmetic; saturn [shany]; and the opposite aspect in astrology [jyotisham]; abbreviation of the tenth mahomedan month [maheena].

LA (لا - lá, *Ar.*). Negative prefix.——*Lakhiraj* (لاخراج - lákhiráj, Hind.). From (above + khiráj, ar. revenue). Land that does not pay revenue [khirauj] to Government [inam]. In contradistinction to maulgoozarry [q.v.]. See vol. I, 112.

LABBAR (لبر - labbar, *Hind.*; సాగుబంక - ságubanka, *Tel.*; மார்ச்சனி - márççani, *Tam.*). Hind. from english rubber. Tel. from (ságu, tel. to be stretched + banka, tel. gum). Tam. from (márj, san. to rub). Title otherwise Caoutchouc, Gum elastic. See Indian rubber.

LABDHAM (लब्ध - labdha, *San.*). From (labh, san. to obtain). Quotient [palam] in arithmetic [pauty ganitam, shastram].

LABLAB (لبلاب - lablâb, *Ar.*). Same as Country bean.

LAC (लाक्षा - láksha, *San.*; लाख - lákha, *Mahr.*; لک - luk, *Ar.*; لاکخام - lákikhám, *Pers.*; لاکھ - lákh, *Hind.* and *Dec.*; امبلو - ambalu, *Malay*; ಅರಗು - aragu, *Can.*; ಅರಕ್ - arak, *Too.*; లక్క - lakka, *Tel.*; അരക്ക - arakku, *Mal.*; ලාකඩ - lákada, *Singh.*; அரக்கு - arakku, *Tam.*). Title from sanscrit through hindostany. San. from (laksha, san. one hundred thousand) [lacsh, lakh]; from the great number of insects. Pers. from (láksha, san. lac + khám, pers. raw). Tam. from sanscrit by corruption. Greek κάγκαμον. Product of Coccus lacca, hemiptera, of naturalists [poochy]. Improperly been called a gum [gond]. The female of this insect punctures the bark of certain trees in order to lay its eggs in the orifice; the incrustation thereon called lac is formed by the insects being crowded so densely on the branches as to leave no spaces, and to exude from their bodies this resinous substance; the parent lac insect, after laying her eggs, becomes a lifeless bag, of an oval shape, containing a small quantity of the red liquid; the young insects feed on this, and their bodies also assume the same hue; the tree itself is at length destroyed by the incrustation. Previous to the discovery of the mexican cochineal [kirmiz], coccus cacti, the coloring matter of the lac insect was universally employed for dyeing red [shauyam]. λάκκος χρωμάτινος or colored lac was according to the Periplus exported from the north Malabar coast. Efforts were made by the east india company to introduce cochineal from mexico into india in 1799, but an inferior variety coccus cacti sylvestris was the one brought, not the variety coccus cacti grana fina; the lac product still holds its ground locally. Lac is used in the preparation of certain red paints [rangh] and of native ink [mashy]; chucklers [q.v.] use it in conjunction with the milky juice or yercum paul, of the gigantic swallow-wort, calotropis gigantea, r. br. [yercum], and some other ingredients, when they dye leather [chamrah] red; a mixture of lac, alum [padicauram], and tamarind [q.v.] water is the dye for silk [puttoo] or cotton [q.v.] cloth of a crimson color; also used in the preparation of varnishes [rangh]; with seed lac [q.v.] in conjunction with powdered flint [teetatty cull], grind stones are made; with shell lac [q.v.], beads [munkah], ornamental rings, necklaces [maulay], sealing-wax [q.v.], &c., are made; a peculiar acid [poolipp, tezaub] resides in lac called laccic acid. Veidyans [q.v.] prescribe lac medicinally in old bowel-complaints; also mixed with gingelly [q.v.] oil, as external application for the head, in debility from continued fever [jwaram]; tincture of lac favorite medicine amongst hakeems [q.v.] in preparing cleansing washes, they call it mahauwar [q.v.]; decoction [kwautam] of stick lac [q.v.] in mustard [rayaun] seed oil, to which is added some pounded root of morinda citrifolia, linn. [dyeing mulberry], used as unguent for anointing body in cases of general debility. Lac burns with a pleasant odour. The following are two key-lists of the trees of s. india on which the insect settles; further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume:—"*a*" Acacia arabica, babool; Acacia concinna, soap-pod; Anona squamosa, sweet sop; Bombax malabaricum, red-cotton tree; Butea frondosa, bengal kino; Dichrostachys cinerea, ashy babool; Eriodendron anfractuosum, silk cotton; Erythrina indica, common coral tree; Feronia elephantum, wood-apple; Ficus bengalensis, banyan; Ficus infectoria, stone banyan; Ficus religiosa, peepul; Pithecolobium dulce, corcapilly; Schleichera trijuga, ceylon oak; Shorea talura, taloora saul; Stilpnophyllum elasticum, indian caoutchouc; Terminalia tomentosa, murdah; Zizyphus jujuba, bair.—"*b*" Babool, acacia, dichrostachys; Bair, zizyphus; Banyan, ficus; Caoutchouc, stilpnophyllum; Coral tree, erythrina; Corcapilly, pithecolobium; Kino, butea; Murdah, terminalia; Oak, schleichera; Peepul, ficus; Red cotton, bombax; Saul, shorea; Silk cotton, eriodendron; Soap-pod, acacia; Sweet sop, anona; Wood-apple, feronia.——(1) The following are the different varieties of the product distinguished.——*Gum lac* (کچالاکھ - kaççálákh, Hind.; ಅಂಟುಅರಗು - antuaragu, Can.; బంకలక్క - bankalakka, Tel.; പച്ചയരക്ക - paççayarakku, Mal.; துப்பு - tuppu, Tam.). Hind. from (kaççá, hind. raw). Tel. from (banka, tel. gum). Mal. from (paçça, mal. raw). The lac when first gathered is called cutcha lac, gum lac, or raw lac. This is treated with water, and thus the coloring matter is extracted.——*Lac dye* (अलक्तकरस - alaktakarasa, San.; لاکھیرنگ - lákhirang, Hind.; ಅರಗುಛಾಯೆ - araguchháye, Can.; അരക്കച്ചായം - arakkuççáyam, Mal.; அரக்குச்சாயம் - arakkuççáyam, Tam.). The coloring matter extracted from the stick lac or gum lac. Used instead of cochineal [kirmiz]. A varnish [rangh] with lac as its basis.——*Lacquer* (ಮೆರುಗೆಣ್ಣೆ - merugenne, Can.; బచ్చెన - baççena, Tel.; மெருகெண்ணெய் - merugenney, Tam.). Can. from (merugu, can. polish + enne, can. oil). Tel. from (prachhanna, san. covered). Tam. from (merugu, tel. lustre + enney, tam. oil). A varnish either for wood or brass made with shell lac and spirits of wine.——*Lake* (ಕೆಂಪರಗು - kemparagu, Can.; చెంగావి - chengávi, Tel.; അരക്കരങ്ക - arakkuranku, Mal.; செம்பரக்கு - shembarakku, Tam.). Can. from (kempu, can. red + aragu, can. lac). Tel. from (chem, tel. red + kávi, tel. tint). Mal. from (arakku, mal. lac + ranku, mal. color). Tam. from (shem, tam. red + arakku, tam. lac). By pouring warm water on stick lac, a crimson coloring matter is obtained, which is made into square cakes for sale, and then called lac dye, lake, or cake lake. These cakes, when broken, are dark-colored, shining, and compact, but when scraped they yield a bright red powder approaching carmine.——*Lump lac* (ಮುದ್ದೆಅರಗು - muddearagu, Can.; ముద్దలక్క - muddalakka, Tel.; അരക്കിൻകട്ടി - arakkinkatti, Mal.; கட்டியரக்கு - kattiyarakku, Tam.). Seed lac melted up into masses.——*Sealing wax* (مهرکی لاکھ - muharkilákh, Hind.; ಮುದ್ರೆಅರಗು - mudrearagu, Can.; മുദ്രയരക്ക - mudrayarakku, Mal.; முத்திரையரக்கு - muttiraiyarakku, Tam.). Tam. also (shemmezhugu), meaning red wax. Gum lac, melted and incorporated with resin [raul], and afterwards colored with vermillion [shangarf], ivory-black [yeloomboo kary], &c.——*Seed lac* (بینج لاکھ - bínjlákh, Hind.; ಪುಡಿಅರಗು - pudiaragu, Can.; ಪರೆಲರಕ್ - parelarak, Too.; లక్కబియ్యము - lakkabiyyamu, Tel.; അരക്കരി - arakkari, Mal.; அரக்கரிசி - arakkarisi, Tam.). Title from appearance. Hind. from (bínj, hind. seed + lákh, hind. lac). Can. from (pudi, can. powder + aragu, can. lac). Too. from (parel, too. a grain of sand + arak, too. lac). Tel. from (lakka, tel. lac + biyyamu, tel. grain). Mal. from (arakku, mal. lac + ari, mal. rice). Tam. from (arakku, tam. lac + arisi, tam. rice). The stick lac separated from the twigs, appearing in a granulated form and deprived of its resinous matter and part of its coloring matter by boiling.

When melted over a fire and squeezed through a long sack [gunny] into troughs, spreads out into thin flakes known as shell lac. If dropped into rounded masses, it is button lac. If into larger pieces, it is sheet lac or piece lac.——*Shell lac* (چپرا لاکھ - chaprálákh, Hind.; ಬಿಲ್ಲೆಅರಗು - billearagu, Can.; लाक्षा - láksha, Too.; అటుకులక్క - atukulakka, Tel.; அவலரக்கு - avalarakku, Tam.). Title from appearance. Hind. from (chaprá, hind. liquid + lákh, hind. lac). Can. from (bille, can. cake + aragu, can. lac). Tel. from (atuku, tel. flattened rice + lakka, tel. lac). Tam. from (aval, tam. bruised flat rice + arakku, tam. lac). Seed lac melted, strained, and run into thin layers. The most common form in which lac is generally known. A decoction [kwautam] of this is used in the preparation of several medicinal oils.——*Stick lac* (بتی کی لاکھ - battíkílákh, Hind.; ಕಡ್ಡಿಅರಗು - kaddiaragu, Can.; కొయ్యలక్క - koyyalakka, Tel.; കോലരക്ക് - kólarakku, Mal.; கொம்பரக்கு - kombarakku, Tam.). Title from its covering the small twigs of tree [croton-lac tree]. All mean stick + lac. The substance in its natural state, before its separation from the twigs which it incrusts, being gathered before the insects have left their cells; and the best is of a red purplish color. Decoction [kwautam] of this given to suppress hæmorrhage.——(2) *Croton-lac tree* (కొమ్ములక్క - kommulakka, Tel.; වැල්කැප්පිටිය - valkappitiya, Singh.; கொம்பரக்கு - kombarakku, Tam.). Tel. from (komma, tel. branch + lakka, tel. lac). Singh. from (val, singh. creeper + kappitiyá, singh. the plant). Tam. from (kombu, tam. branch + arakku, tam. lac); from lac formed on branches [stick lac]. Tel. also (siribilla). Singh. also (kappitiyá). Botanically Croton [ghantabeejam] aromaticus, linn., euphorbiaceæ [vricsham, 118]. Alias Croton lacciferus. Tree; branches, petioles, and leaves roughish, with stellate hairs; leaves long-petioled, bearing stalked glands at the base, ovate, acute, cordate at the base, denticulate, glands yellowish; racemes lax, spiked; bracts broadly subulate, males one-flowered, equalling the flowers; petals snowy-woolly at the margin; disc hypogynous, urceolar, sub-entire; filaments about thirty, bearded near the base, glabrous, shining brown; ovary hispid with stellate hairs; styles once two-cleft, divisions sub-spathulate entire or two-lobed or cleft; capsules ellipsoid or obovoid sub-globose, scabrous; seeds very minutely puberulous. ——*Gum-lac tree* (کچا لاکھ کا جھار - kaççálákhkájhár, Hind.). Same as Ceylon oak.——*Taloora-lac tree* (தளூரா - talúra, Tam.). Same as Taloora saul.

LACAB (لقب - lakab, *Ar.*). Name of honor. Attached as title, generally at the end of a proper name [alam, ism, khituab]. Some lacabs originally belonged to prophets, to the household of Mahomet [q.v.], to his companions, or to the Imaums [q.v.]. They appear both as simple and compound terms; but at present date many compound lacabs have passed into use as simple alams. Specimens of lacabs originally pertaining to prophets are:—Caleem ool lah, speaker to god, to Moses; Rooh ool lah, spirit of god, to Jesus christ; Habeeb ool lah, friend of god, to Mahomet. Of lacabs originally pertaining to Mahomet's households:—Syedat oon nissa, prince of women, to daughter Fatimah; Asad ool lah, lion of god, to Ally, prophet's son-in-law, fourth caliph [q.v.]; Zoon noorein, possessor of two lights, to Osman, third caliph, from prophet having married two of his daughters. Of lacabs originally belonging to Mahomet's companions:—Siddeek, the true, to first caliph, Aboo bakr; Farook, the distinguisher, to caliph omar, second caliph. Of lacabs originally belonging to the Imaums:—Saudic, the true, to sixth Imaum; Cauzim, the restrainer of anger, to seventh Imaum, on account of his patience under sufferings; Takee, pious, to ninth Imaum; Nakee, pure to tenth. The following are some of the simple lacabs generally current:—Alavee, Faurooky, Hasanee, Haushimy, Hoossainy, Kirmauny, Koreishy, Madanee, Mehkary, Moohaujir, Moortazavee, Siddeeky, &c. The lacabs given as relating to prophets illustrate compound lacabs. See vol. I (104).

LACSH (लक्ष - laksh, *San.*). To see, mark, distinguish [lac]. ——*Laccadives* (لکھدیپ - lakhádíp, Hind.; ಲಕ್ಷದ್ವೀಪ - lakshadvípa, Can.; ലക്ഷദ്വീപ് - lakshadvípu, Mal.). From (laksha, san. hundred thousand + dvípa, san. island). Islands; South canara and Malabar dists.; pop. 10,637; lat. 8° 20′ to 13° 50′; long. 71° 47′ to 74° 03′. Barbosa, in 1516, calls the laccadives Malandiva, and the maldives Palandiva. The Tohfat ool moojauhideen calls the laccadives the Islands of malabar. The latin Maniolae are the Maldives, not the Laccadives. The Laccadives were discovered by De gama in his first voyage. For description see vol. II, 89. For the Malabar islands proper see the heads:—Agatty, Andrott, Calpeny, Cavarathy, Soohely. For the S. canara islands see Amindivy. See also Minicoy for the southernmost island near Maldives.——*Lacsha deepam* (ലക്ഷദീപം - lakshadípam, Mal.). From (laksha, san. a lakh + dípa, san. light). Solar festival [pundigay, 6d]. Celebrated at Trivandrum once in six years on the first of tenth solar [madhyama sowra maunam] month Macaram [mausam] or 12th January. This closes moorjapam [bhadradeepam, maryauday]. ——*Lacsham* (लक्ष - laksha, San.). From (laksh, san. to see). A recognized mark; object to aim at; a prize, a great number. Lakh [q.v.]. Cf. Lac.——*Lacshanam* (लक्षण - lakshana, San.; இலக்கணம் - ilakkanam, Tam.). Distinguishing quality or characteristic. Elegance, philology, the institutes of grammar [vyaucaranam].—"*a*" For Sanscrit grammar see Paniny.—"*b*" In Tamul a highly developed study and almost wholly separate from sanscrit grammar. Agastyan [q.v.] wrote the first grammar of the Tamul [q.v.] language, which was called Agastya nool. He had twelve disciples, whom he instructed in the language; one of these was Tolgauppyan. Soon after, Tolgauppyan prepared another grammatical work called Tolgauppya nool [tolgauppyam], of which the Agastya nool was the basis. The former gradually sunk into oblivion, and is now lost excepting the fragments contained in Tolgauppyan's work. Some time after, Pavanandy vidwaun, a learned man of the Jeina [q.v.] sect, abridged the Tolgauppya nool and called it Nunnool [q.v.]. Of the five parts into which the Tolgauppyam was divided, viz., Yezhoot adhicauram, the chapter of letters or orthography, Sholl adhicauram, the chapter of words or etymology, Porool adhicauram, the chapter of matter, Yaup adhicauram or Sheyyool adhicauram, the chapter of poetry, and Alancauraudhicauram, the chapter on beauty or rhetoric; and into which Pavanandy also divided his work; only the two first chapters have been preserved. The rest are lost, though they were afterwards supplied by other persons. After Pavanandy was a learned man of the Shamana [q.v.] or Jeina sect, who wrote an explanation of the Nunnool. About the same time arose a learned Shiva bhacticauran, named Veidya nauta pundauram, and pretending to find errors in the text of the Nunnool, wrote a grammatical work called Ilakkana vilakkam, or the light of rules, in which he changed some parts of the Nunnool, and added others at his discretion, but retained the before-mentioned division in five parts. About the year 1770, there was a poet in Tinnevelly, named Shuncara namashivauya poolavan. Upon the request of the Ootoomullay poligar [q.v.], Maroothappa tevan, he wrote an explanation of the text of the Nunnool made by Pavanandy. About the same time, Shivanyauna tumbiraun, a learned sanyausy [q.v.], wrote a work, in which he exposed the errors of the Ilakkana vilakkam made by the above-mentioned Veidyanauta pundauram. This work he called Ilakkana vilakka shoorauvaly, i.e., the blast or strong wind on the light of grammar. He wrote also the Sootra vriddhy, in which he explained the Tolgauppyam. Moreover he undertook to examine and compare the former three works, viz., Ilakkana cott, Ilakkana vilakka shoorauvaly, and Sootra vriddhy; made the necessary extracts; and embodied them in the Nunnool prepared by Shuncara namashivauyan. The thus enriched Nunnool is now in use among the Tamulians and held in high estimation as the best classical work. It is called Nunnool ooray, or an exposition of the Nunnool.—"*c*" The most ancient Teloogoo grammarian, of whom mention is made in the native books is the sage Canwa. His work is not now to be found. All the treaties on Teloogoo grammar at present extant consist of Sanscrit commentaries on an ancient series of concise apothegms originally written in Sanscrit by a Bramin named Nannayya bhatt but not now extant [bhaushay]. Teloogoo grammar is excessively modern compared with Tamul.——*Lacshyam* (लक्ष्य - lakshya, San.; இலக்கியம் - ilakkiyam, Tam.). Marked, defined; example in illustration of grammatical rules; classical writings according to grammatical rules. Includes all approved poetical compositions, whether original or translated. Under this head the Dravidians have epic, lyric, ethic, dramatic, scientific and philosophic pieces; but of these by far the most important are the ethic [bhaushay].——*Lakh* (لکھ - lákh, Hind.). From (laksh, san. to see), a recognized mark; object to aim at; a prize, a great number. A hundred thousand [lacsham]. Generally 100,000 rupees. The Hindoo method of writing and reading high numbers is by thousands, lakhs, and crores; thus, 1,02,30,000 or one crore [q.v.], two lakhs, thirty thousand.——*Lutcham* (लक्ष - laksha, San.). From (laksh, san. to see). Mark. ——*Lutchman* (लक्ष्मण - lakshmana, San.). Brother of Rama [q.v.].——*Lutchmanan* (இலட்சுமணன் - iladchumanan, Tam.). One who bears auspicious marks. Familiarly atchanna. Hindoo 2nd or pers. name [peyar].——*Lutchmanateertam* (ಲಕ್ಷ್ಮಣತೀರ್ಥ - lakshmanatírt'ha, Can.; lakshmantirtha, Mys. Gov.). River. Rises in Western ghauts on southern frontier of Coorg, flows north-east and falls into Cauvery near Saugarcuttey village in Yedatorey talook, Mysore [aroovy].——*Lutchmicauntan* (இலட்சுமிக்காந்தன் - iladchumikkándan, Tam.). From (lakshmí, san. the goddess of fortune + kánta, san. husband). Vishnoo. Hindoo 2nd or pers. name [peyar].——*Lutchminarrain* (இலட்சுமிநாராயணன் - iladchuminárâyanan, Tam.). From (lakshmí, san. wife of vishnu + náráyana, san. vishnu, the water wanderer). Hindoo 2nd or pers. name [peyar].——*Lutchminarsoo* (లక్ష్మీనరసు - lakshminarasu, Tel.). From (lakshmí, san. the goddess of fortune + narasu, tel. familiar contraction of narasimha, san. vishnu, the man-lion deity). Hindoo 2nd or pers. name [peyar].——*Lutchmipaty* (लक्ष्मीपति - lakshmípati, San.). From (lakshmí, san. the goddess + pati, san. husband). Vishnoo [q.v.].——*Lutchmipore* (లక్ష్మీపురము - lakshmípuramu, Tel.). From (lakshmí, san. goddess of fortune + pura, san. town). Ghaut; Vizagapatam district, Parvatipore division; from Parvatipore N.W. 35 miles; from Vizagapatam N.N.W. 123 miles.——*Lutchmivallabhan* (இலட்சுமிவல்லபன் - iladchumivallaban, Tam.). From (lakshmí, san. wife of vishnu + vallabha, san. husband). Hindoo 2nd or pers. name [peyar].——*Lutchmy*

(लक्ष्मी - lakshmí, San.; இலக்குமி - ilakkumi, Tam.). From (laksha, san. mark); of good sign or luck. ἀφροδίτη of greeks; venus of romans; isis or orient luminary deity of egyptians. The goddess of prosperity and wealth; in the later mythology identified with Shree [q.v.], appearing in Tamul as Tiroo [q.v.] and made the shacty [q.v.] or wife of Vishnoo [q.v.]. Lutchmy was one of the products from churning the milk sea and agrees specially with the sea-born Venus [coormam]. It is possible that the idea of a shacty to Vishnoo was suggested by the success of the Sheivas. Lutchmy and Bhoo devy with Veishnavites counterbalance Parvaty [q.v.] and Gungay [q.v.] with Sheiveites. There exists in the literature much less of romance with reference to Vishnoo and Lutchmy than with reference to Shiva and Parvaty. On the other hand the stories of Rama [q.v.] and Seetay [q.v.], and of Krishnan [q.v.] and his wives, make up the deficiency. Lutchmy is represented in Southern india as a woman in a sitting posture, with four arms and hands, two of which she has empty and as it were ready to give blessings; the other two she raises, holding in each a lotus [nelumbo] flower. On each side of her stands a white elephant [q.v.], holding with his trunk a water pot from which he waters the flowers in Lutchmy's hands. The color of her body is yellow, and her forehead is marked with a red paste, called Tirchoornam [q.v.], which is also worn by the women of the country. Her ornaments are the same with those of other goddesses. Her seat is a little elevated, and behind her lies a cushion. Thus she is found in pagodas [q.v.] as well as in many houses; for of all the images in the pagodas miniatures of metal, stone or wood are made and worshipped in the private dwellings. Lutchmy has no pagodas of her own, but she is, thrice every day, worshipped with offerings in those of Vishnoo, where she has a temple, and she is also adored in those of Shiva [q.v.] where she has a small chamber of her own. There are no special festivals celebrated in her honor, but she is carried about with Vishnoo at his festivals; and Friday is set apart as a special fast in her honor. There are no books separately written about her, but many stories are told of her in the books on Vishnoo. Of her many names the following may be mentioned:—Alar magal or the flower-daughter; Aukkam or wealth; Indray or the supreme female; Jalajay or the lotus-born; Jaunaky or Seetay; Mahcadal piranda cothay or that was born in the great ocean [coormam]; Mungala devy or goddess of luck; Narayany or water goddess; Patniyammay or the chaste or faithful; Pon or Ponam or gold; Porool shelvy or the rich one; Samoodra devy or sea-goddess; Seeta lutchmy; Sheyyaul or the red or beautiful one; Shree or Shree devy or the divine, or the goddess of fortune; Taukkanang or she whose beauty excels all others; Tirmagal or the divine or illustrious daughter; Tirvengadamoodeiyal or possessor of tripatty; Yileiyaul or the younger one. Lutchmy, whose presence is a guarantee for happiness and prosperity, is said to dwell in the face of a horse [ghorah] of superior caste, with the wise and good, in all fragrant flowers, in the tree of paradise [calpacam] that bestows whatever its votaries may desire, in beauty of a good and obedient wife, in the ocean, in the portal of a house where a marriage is being celebrated, in a well governed country, in grain [dhaunyam], in brilliant lamps [deepam] and flaming torches [masaul], in the words of the great, with truth-speaking men, in the arrows of cupid [cauma baunam], and in vessels of milk [paul]. For the eight lutchmies or deities of prosperity see Ashta lutchmy. For Lutchmy vratam, or worship in honor of lutchmy, see Vara lutchmy vratam. There is a Tamul proverb:—*நடந்தவன் காலிலே சீதேவி, இருந்தவன் காலிலே மூதேவி*—"The goddess of fortune "dwells in the feet of the industrious; the goddess of misfortune "[moodevy] dwells in the feet of the sluggard" [matam]. See vol. I (74), (79). As a female name, Lutchmy is shortened into Yatchy, Yatchmy, Yatchoo, Latchy [peyar].——*Lutchmy's lily* (इन्दीवर - indívara, San.). From (indirá, san. lakshmí, the goddess + vara, san. choice); from tradition that the goddess issued at the creation from the petals [cauma baunam]. Same as Blue indian water-lily.

LADOW (لدٲو - ladáu, *Hind.*). From (ládná, hind. to load). Vault or arched roof [staupatyam].

LAG (लग् - lag, *San.*). To adhere.——*Lagna bhoojam* (लग्नभुज - lagnabhuja, San.). From (lagna, san. right ascension + bhuja, san. arm). Ascensional difference in sunrise.——*Lagnam* (लग्न - lagna, San.). From (lag, san. to adhere); contact. Point of contact or intersection of two lines. The point or arc [chaupam] of the equator [naudy mundalam] which corresponds to a given point or arc of the ecliptic [craunty mundalam]; the division of the equator which rises in succession with each sign [raushy]; the right ascension of european astronomers. This is more technically the arc of the equinoctial, or angle at the pole [dhroovam], intercepted between the celestial meridian [raikhay] passing through the object and that passing through the tropical [ayanaumsham, maunam] first point of aries [maisham]; it is reckoned eastward, in the order of the signs [raushy], to 360° or 24h; it is generally expressed in time, 1 hour for 15°, being the rate at which the heavens appear to revolve round the pole; as the equinoctial is merely the projection of the terrestrial equator [niracsham], right ascension corresponds with terrestrial longitude [deshauntaram]; distinguish from celestial longitude, dhroovacam or sauyanam as the case may be. Lagnam is also the rising of a sign of the zodiac [raushy chuckram] above the horizon [cshitijam], astrologically indicative of good or evil [jyotisham, noojoom].——*Langoolya* (లాంగూలియా - lángúliyá, Tel. lángulya*). From (lángala, san. plough); according to legend it was dug by the plough of balaraman [q.v.], elder brother of krishnan [q.v.]. Sanscrit name (lángalí), meaning plough; also (nágávalí), meaning serpent + line. River; Vizagapatam and Ganjam districts, Bobbily, Chicacole, Palcondah, Parvatipore and Saulore talooks. Formed by the junction of three streams rising in the Gondwana mountains near Calahundy in the Central provinces. Flows south-east across the territory of Jeypore and into the plains of the presidency where it is joined by important tributaries draining the eastern slopes of the ghauts [q.v.] from Gaulicondah to Royagada and the Saulore, Bobbily, Parvatipore and Palcondah divisions. Bridged at Chicacole. In the last 30 miles of its course, forms the boundary between Vizagapatam and Ganjam districts, entering the sea below Chicacole. Total length, 140 miles. On its banks are Nagore, Palcondah, and Chicacole. Principal tributaries are the Saulore and Makkoova. Its rapid current makes navigation impossible.——*Lingadhaury* (లింగధారి - lingadhári, Tel.). From (linga, san. phallic emblem of shiva + dhári, san. wearer). Same as Lingayet.——*Lingagherry* (లింగగిరి - lingagiri, Tel.). From (linga, san. symbol of shiva + giri, san. hill).—"*a*" Zemindarry talook, Kistna district.—"*b*" Zemindarry; Kistna dist., Nundigauma tal.; pop. 4,947; square miles 30. The territory lies detached in the Nizam's dominions. The zemindars are bramins. They trace their descent from Muntry preggada mullapa rauz, who resided at Lingagherry two centuries ago. Peshcush Rs. 486.—"*c*" Village; Kistna dist., Lingagherry zemindarry; pop. 1,133; lat. 16° 53′; long. 79° 52′; from Bezwada W.N.W. 60 miles; from Guntoor N.W. 59 miles; from Madras N. 260 miles; from Masulipatam W.N.W. 100 miles; from Vinoocondah N. 56 miles. Inscription dated A.D. 1174 records grant of land to the temple.——*Lingam* (लिङ्ग - linga, San.). From (lag, san. to fasten); mark to lay hold of. The phallic emblem of Shiva [q.v.], under which form alone he is worshipped in S. india. It is represented by a cylindrical stone rounded off at the top, and at the other end inserted in masonry or in the ground, but transfixing another horizontal and flat stone named yony [q.v.]; the two sections thus indicating the two sexes; this is the original meaning, but it is not recognized by the people, who merely worship the symbol of shiva; the emblem is placed in the open field, on the way side, and in shiva temples. In temples the figure is worshipped daily three times, with drink-offering, food-offering, and burning of incense, by a certain class of bramins [gooroocal]; none but these bramins are allowed to perform the lingam worship before that lingam which stands in the innermost and most holy part [garbhagriham] of the pagodas [q.v.]; but this class of bramins is less esteemed than other classes; they wear a string of the holy roodraucsham [q.v.] beads on their necks and another on their heads, which they have always uncovered; they wear also in common with all bramins [q.v.] the poonool [q.v.]. The lingam has several names:—Audhaura lingam or fundamental lingam; Auvoodeiyaur lingam or the life possessor; Moola lingam or original or chief lingam; Paurtivalingam or earth lingam; Pautaula lingam or hell lingam; Prauna lingam or life lingam; Shiva lingam, &c. Some, when about to bathe in a river and intending to perform religious ceremonies, make a figure of earth, representing a lingam, worship it, and then throw it into the water; this is the Paurtivalinga poojay. Some lingams are held to have grown spontaneously out of the earth, and these cannot be dug out, because they have no end below; they go down into the lowest world; these are the Pautaula lingam; pilgrims often flock to the places where such lie. The Prauna lingam is that specially worshipped and worn by lingayets [q.v.]. The twelve great and renowned lingams of India are or have been at:—Somnaut in goozerat; Mullicarjoonan or srisheilam in kurnool; Maha caulan in oojjein; Omcauram on the nerbudda; Amareshwaram in oojjein; Veidya nautan at deogarh in bengal; Rameshham at saitoobandham or the island of rameshwaram between ceylon and this presidency; Bheema shuncaram, at draucsharaumam near rajahmundry; Vishweshwaran at benares; Triyambacan on the banks of the goomty; Gowtameeshan site uncertain; Kedaureshan or kedaur nautan in the himalayas. Many of these were destroyed by the mahomedans. The Srisheilam and Rameshwaram lingams are to this day much resorted to. In the old augamam [q.v.] philosophy of s. india there are five lingams:—Streelingam, properly the organ entire, male and female, with its functions; it is a figure, the only one of the five which has form; the charitay or popular pooraunic course of worship belongs to this roopam. Poollingam or the male lingam, defined to the perception; to this belongs the kriyay course of worship, the second great stage. Napoomsaca lingam or neuter lingam, the stage of darkness or of doubt and neutrality and as a course of worship is included in the succeeding stage. Parama lingam or supreme lingam, under the domain of mauyeshwaran the concealer and is called maraippoo lingam; the course of worship here is that of yogam [q.v.], the third great stage. Mahalingam, symbol of enlightenment; and the course of worship is nyaunam [q.v.] or knowledge, the last stage which exempts from births and secures absorption into the supreme essence [bramh]. Puncha lingam are again the imaginary forms of the five elements:—Lingam of earth, worshipped

at conjeeveram; Lingam of water, worshipped at tirvannacauval or jambookeshwaram; Lingam of fire, worshipped at trinomallee; Lingam of wind, worshipped at calastry; Lingam of ether, worshipped at chidambaram [matam]. An historical account of phallic worship in connection with Southern india has been given in the foot-note on the History of Hindoo religion, at vol. I (72), (83), (84), (88). The word is a suffix in Tamul and Teloogoo proper names; Mahalingam, Ramalingam, &c. [peyar].——*Linga shareeram* (लिङ्गशरीर - lingasharíra, San.). From (linga, san. mark + sharíra, san. body). A higher development of the material body [shareeram, stoola shareeram].——*Lingavant* (ಲಿಂಗವಂತ - lingavanta, Can.). From (linga, san. phallic emblem of shiva + vat, san. suffix of possession). Deccan canarese for Lingayet.——*Lingayet* (ಲಿಂಗಾಯತ - lingáyata, Can.). From (linga, san. phallic emblem + vat, san. suffix of possession). Corruption of Lingavant. Title otherwise Jangam, Lingadhaury, Lingavant, Veerasheiva. The ascetics of the sect are called Tumbiraun [q.v.]. Not a caste, but a religious designation embracing many castes. See vol. I (57), (68), (77) and (84). The sect wear as a reliquary a miniature of the lingam, made of stone or crystal, in a small casket of silver or gold either on the breast secured by means of a string round the neck, or fastened to the right arm, or to the tuft of hair on the head. Some never remove it from their bodies, and are buried with it; this is the Prauna lingam or life lingam. The worship of the Lingam and Yony marks the Sheivas; the worship of the Lingam alone denotes the Lingayets. The latter attach a further meaning to the word indicating various heavens or locams [q.v.] in the invisible world; the uppermost is the Bramha [q.v.], or sometimes Shiva lingam, concerning which metaphor is extensive. In the south the Lingayets are very numerous, and the officiating priests of Sheiva shrines are commonly of this sect, when they bear the designations of Aradhya [q.v.] and Pundauram [q.v.]; such priests claim to be descendants of Sheivite bramins, and between them and the Smartas [q.v.] there is a certain degree of reluctant intercourse, founded upon the rites of initiation or oopanayanam [q.v.], which both parties use. The history of this sect from its foundation by basava [q.v.] in the inland Canarese country, has been given in the foot-note on the History of Hindoo religion at vol. I (77). They adore shiva as the one god and wear his image hung on their breasts; they call themselves primitive worshippers and look upon others as idolators; they deny the authority of the bramins, by whom they therefore are detested as heretics; basava abolished caste [jauty], pilgrimage [jatrah], and penance [tapas]. Though the lingayets generally deny the sanctity of any particular place, the aradhyar have yielded to the hindoo propensity to worship in certain places as peculiarly holy; one of these at conjeeveram, one at jambookeshwaram near trichinopoly, one at arnagiry trinomallee, one at calastry, and one at chidambaram; these are respectively called the lingams of earth, water, fire, air, and ether. No case is known of the image having been voluntarily laid aside; and lingayets declare that no one of their brotherhood has ever embraced the christian or the mahomedan faith. Lingayets differ from other hindoos with regard to a future state; other men are liable to transmigration [samsauram]; they depart either to heaven or hell, and that state is eternal; the prayers of lingayets are addressed to the image they wear, which they salute as basaveshwaran; the daily prayers usually are in the mother tongue. Lingayets receive and return the salutation of every woman. In common with the sheivas generally, the lingayets smear their foreheads with vibhooty [q.v.] or ashes and wear necklaces [maulay] and carry rosaries [maulay] made of the roodrauesham [q.v.] seed; the clerical members of the sect usually stain their garments with red ochre [cauvy]. Lingayets desist from :—Apasavyam, Tíla tarpanam [q.v.], Sacred grass or darbhay [q.v.], Burnt sacrifice [homam], Parvam [q.v.] at the new [amavausyay] and full moon [powrnimay], Arghyam, Paudyam; which list is intended to sum up all the Braminical rites. The dress of Lingayets differs from that of other Hindoos only in the rite of wearing the image. An analogy exists between pythagoreans and lingayets; pythagoras call the four principles by numerical names, the monad, duad, triad and tetrad; the lingayets call them by specific names, viz., the lingam, bhactan, gooroo, and sheivam, i.e., the deity, the disciple, the teacher, and supreme spirit, which pervades and unites all three; the lingam and the sheivam, being the first and fourth principles, are one and the same. The basava pooraunam in canarese is the chief work on the religion of the sect; but there are many other canarese works, such as the chenna basava pooraunam, prabhoolinga leelay, sharanaleelaumritam, viractaracauvyam, and others, containing legends of jangam saints; lingayets have no objection to read any part of the braminical books, but they refuse to accept them as authoritative. Lingayets generally are of two classes; Ayets, who do not take animal food nor the food prepared by bramins; and Ganayets who eat flesh and food prepared by other castes. Aradhyar, or braminical lingayets, are of three classes; Rigvaidies, Yajoorvaidies, Saumavaidies, according to the vedams [q.v.] which they follow. Lingayets also class themselves as Saumaunyans and Vishaishans. The Saumaunya or ordinary lingayet is bound by no vow; he can eat flesh excepting that of the cow [pashoo], drink wine [angoor], use betel-nut [q.v.], and eat in any one's house; only he is obliged to marry in his own caste. The higher grade opposed to this is the Vishaisham or extraordinary, being the gooroo [q.v.] or teacher, commonly called Mataudhipaty or spiritual guide; all the rest are his disciples; he taking a vow, the greater vow. Among lingayets at all solemnities whether marriage, birth, initiation or funerals, four vases of water are solemnly placed in the name of the four Aradhyar or prophets. In four ages, it is said, these four successively appeared as precursors of the divine Basava. They are analogous to the four peers [q.v.] of the Mussalmans [q.v.]. The latter play the same part in the ceremony of making a Mussalman mooreed [q.v.] that the four Aradhyar do in that of making a Jangam [jauty, matam]. Numbers about 120,000 in presidency. It is to be observed that the Lingayet creed has never had followers in Malabar.——*Lingayya* (లింగయ్య - lingayya, Tel.; இலிங்கய்யன் - ilingayyan, Tam.). From (linga, san. phallic emblem of shiva and so shiva + ayyan, tam. father, title of respect). Common proper name.——*Loonghee* (لنگی - lungí, Hind.). From (lung, pers. a cloth worn between the legs). A cotton [q.v.] cloth wrapt once or twice round the hips and tucked in at the upper edge; not tucked between the legs like a dhoty [q.v.]. When large and of plain material, it acts not only as a clothing during the day, but as a sheet [chudder] at night. Some loonghees are made with checks and stripes or with a figured diaper body. A common variegated form is plain with colored borders and gold in ends. In another style, color is employed in the body of the piece, as well as in the ends and borders. Sometimes a cotton [q.v.] loonghee has silk [puttoo] in borders and ends.——*Lungoor* (हनुमान् - hanumán, San.; वानर - vánara, Mahr.; قرد - kird, Ar.; بوزنه - búzinah, Pers.; هنومان - hanúmán, Hind.; لنگور - langúr, Dec.; ಮುಸ್ಯ - musya, Can.; కొండముచ్చు - kondamuttsu, Tel.; കരിങ്കുരങ്ങൻ - karinkurannan, Mal.; වඳුරා - vandurá, Singh.; கொண்டைமுசுறு - kondaimusuru, Tam.). Title from deccany. San. from (hanu, san. jaws + mat, san. suffix of possession). Mahr. from (vana, san. forest + nara, san. man). Ar. from (karida, ar. submissive); from docility. Pers. from (bú, ar. father + zannah, ar. suspicion); from vigilance. Dec. from (lángúla, san. tail); long-tailed. Tel. from (konda, tel. hill + muttsu, tel. thief). Mal. means black monkey. Tam. from (kondai, tam. crest + musuru, tam. black ape). Equivalent to sub-family of Apes; or Semnopithecinæ, cereopithecidæ, quadrumana, mammalia [sastanam, 1], of naturalists [jantoo]. Cf. Baboon for the sub-family Cercopithecinæ. The superior apes of India, the genus Hylobates or gibbon, which possess the callosities of true monkeys [bandar], but differ from them in having neither tail nor cheek pouches, are not represented in Southern india. The genus Semnopithecus which gives the apes of the south is characterised by slender bodies and long limbs and tails. By some they are called Slim-apes. Another peculiarity of this genus is the absence of cheek pouches, which, if present, are but rudimentary. They are also to be distinguished by the peculiar structure of the stomach, which is singularly complicated, almost as much so as in the case of ruminants, which have four divisions. They are long and loose-limbed, with a prodigious tail, black face, and overhanging brows of long stiff black hair, projecting like a penthouse. The Lungoors can take enormous leaps, twenty-five feet in width, with thirty to forty in a drop, and never miss a branch. But generally speaking their progress is not made so much by leaping as by swinging from branch to branch, using their powerful arms alternately. Strychnine has no effect on Lungoors. It is possible that in the forests they eat the fruit of the strychnos nux-vomica [poison nut], which is also the favorite food of the pied hornbill [sooliman moorghy]. The Sanscrit and mythological name for a Lungoor is Hanooman [q.v.]. In Braminical history Hanooman, the meaning of which is long jaw, was one of the rulers of the monkey kingdom of Southern india, who aided Rama [q.v.] in his conquest of Ceylon by forming a bridge of rocks [adam's bridge] opposite Manaar [q.v.]. His figure is often found in Hindoo temples [coil] in the guise of a man, with a black monkey face and a long tail. He is not however actually worshipped.—"*a*" The ordinary Madras lungoor is the Semnopithecus priamus of naturalists; alias Presbytis priamus; Semnopithecus albipes, pallipes. Otherwise called Black-faced monkey. It is of an ashy-gray color with a pale reddish tint overlaying the whole back and head; sides of the head, chin, throat and beneath, pale yellowish; hands and feet, whitish; face, palms and fingers, and soles of the feet and toes, black; a high compressed vertical crest of hairs on the top of the head; hairs long and straight, not wavy; tail of the color of the darker portion of the back, ending in a whitish tuft. This species inhabits the Eastern ghauts and southern portion of the tableland of Southern india, not extending however to the Malabar coast. It is found both in forests and large groves of trees and has the usual habits and call of its tribe. It is often domesticated at Madras and other places.—"*b*" On the west coast there is a Malabar lungoor called Semnopithecus hypoleucus; alias Presbytis johnii. Above, dusky brown, slightly paling on the sides; crown, occiput, sides of head and beard, fulvous, darkest on the crown; limbs and tail, dark brown, almost black; beneath, yellowish white. A somewhat small variety. This monkey is found from about latitude 14° or 15° to Cape Comorin, that is to say in South canara, Malabar, Cochin, and Travancore. It does not ascend the mountains to any great height above the sea. It does not occur on the wooded tableland of the Wynaud. It is not confined to

the forests, but frequents gardens and the belt of cultivated wooded land that extends all along the sea coast of Malabar. It varies a good deal in the intensity of its color, and especially in the blackness of its limbs and tail, and the young are throughout of a sooty brown.—"c" On the hill ranges there is the Neilgherry lungoor, Semnopithecus johnii of naturalists; alias Semnopithecus cucullatus. Of a dark glossy black throughout, except the head and nape, which are reddish brown, the hair very long; in old individuals, a grayish patch on the rump. This monkey is found not only on the Neilgherry hills, but also in the Anamullays, the Pulneys, the Wynaud, and all the higher parts of the range of ghauts [q.v.] as low as Travancore. It does not descend lower than from 2,500 to 3,000 feet. It is shy. The fur is fine and glossy, and is much prized.—"d" Indian species of Semnopithecus not here found are:—Senex or white lungoor, Barbei or tipperah lungoor, Cephalopterus or ceylon lungoor, Entellus or bengal lungoor, Obscurus or dusky-leaf monkey, Phayrei or silvery-leaf monkey, Pileatus or capped lungoor, Schistaceus or himalayan lungoor.——*Lungooty* (لنگوٹی - langotí, Hind.). From (linga, san. male organ + addana, san. shield). A piece of cloth about two feet long and six or eight inches broad, passed between the legs and the end tucked in before and behind to the dawauly [q.v.] or tusma [q.v.].——*Oollagnam* (उलग्न - ullagna, San.). From (ut, san. upper + lagna, san. right ascension). The Lagnam of a particular place, answering to the oblique ascension of the stars, in any place which has latitude [acsham, jyotisham].

LAHNGAH (لہنگا - lahangá, *Hind.*). Skirt or petticoat.

LAHOOT (لاہوت - láhút, *Ar.*). Means extinction or absorption. The last stage of the mystic journey [soofee].

LAHORE (لاہور - láhor, *Hind.*). Means fort of loh [lavan]. Chief town of Punjaub.——*Lahore carrot* (زردک لاہوری - zardakiláhorí, Pers.). Same as Sweet potato.——*Lahore seed* (لاہوری حرمل - láhoríhurmul, Hind.). Same as Harmal.

LAHSAN (لہسن - lahsan, *Hind.*). From (lashuna, san. garlic). Garlic [lussoon].——*Lahsanyah* (वैदूर्य - vaidúrya, San.; عين الهر - aínulhirr, Ar.; لہسنیا - lahsaniyá, Hind.; పిల్లికన్రత్నము - pillikanratnamu, Tel.; വൈഡൂര്യം - vaidúryam, Mal.; பூனைக் கண்கல் - púnaikkangal, Tam.). San. from (vidúra, san. name of a mountain). Ar. from (aín, ar. eye + hirr, ar. cat). Hind. from (lahsan, hind. garlic, allium sativum, linn.); from color. Tel. from (pilli, tel. cat + kannu, tel. eye + ratna, san. precious stone). Mal. from sanscrit. Tam. from (púnai, tam. cat + kan, tam. eye + kal, tam. stone). Cat's eye. A variety of quartz [vencull] having the appearance of an eye. A pseudo opal [csheeraspaticam], common in Ceylon. Its composition is nearly the same as that of the common opal [ratnam].

LAINA (لینا - lená, *Hind.*). To take.——*Laina dainah* (لینادینا - lenádená, Hind.). From (above + dená, hind. to give). Also in the aorist, Laivadaivy. Traffic. Money transactions.

LAKLAK (لکلک - laklak, *Hind.*). From imitation of its chattering. White stork. Bird name common to:—Ciconia alba; Ciconia leucocephala. See gloss. paragraphs.

LAKOOCHA (लकुच - lakucha, *San.*). From (lak, san. to taste). Same as Monkey jack.

LALONG GRASS (बर्हिस् - barhis, *San.*; النگ النگ - alangalang, *Malay*; మొదవ - modava, *Tel.*). Title from malay. San. from (vrih, san. to pluck up). Botanically Imperata kœnigii, nees., graminaceæ [vricsham, 156]. Culm erect, simple; leaves linear, attenuately plaited at the base, short acuminated at the apex; sheaths densely hairy at the margins; panicle spiked, elongated, cylindric; pedicels scarcely dilated at the apex; glumes colored, four times shorter than the involucrating hairs; styles rather longer than the glume. Small grass; used by teloogoos in marriage ceremonies; not of much use as fodder; used for thatching houses; no other species here.

LAMB (लम्ब् - lamb, *San.*). To hang.——*Lambacam* (लम्बक - lambaka, San.; இலம்பகம் - ilambagam, Tam.); means pendent. A chapter in works of history and fiction [chintaumany].——*Lambajyay* (लम्बज्या - lambajyá, San.). From (lamba, san. co-latitude + jyá, san. sine). Sine of the co-latitude [lambam] or cosine [cotijyay] of the latitude [jyotisham, vicshaipam].——*Lambam* (लम्ब - lamba, San.). Perpendicular. The co-latitude, or the arc [chaupam] between the Pole [dhroovam] and Zenith [oordhwam, ootcham] of a given place.

LAMP OIL (एरण्डतैल - érandataila, *San.*; بڑی ارنڈ کا تیل - baríarandkátel, *Hind.*; چراغکاتیل - charághkátel, *Dec.*; ದೀಪದ ಎಣ್ಣೆ - dípayanne, *Can.*; ఆముదం - ámudam, *Tel.*; വിളക്കെണ്ണ - vilakkenna, *Mal.*; விளக்கெண்ணெய் - vilakkenney, *Tam.*). San. from (éranda, san. castor plant + taila, san. oil). Hind. means large + castor-plant oil. Tel. from (ámanda, san. castor plant). Mal. and tam. from (vilakku, tam. lamp + enney, tam. oil). Product of the large-seeded castor-oil plant [aumanac]. This called specially lamp oil, though many other oils used in lamps. For oils generally see Yennay.

LAND WIND (مغربی ہوا - maghribíhawá, *Hind.*; انگن دارت - angindárat, *Malay*; ಕರೆಘಾಳಿ - kareghálí, *Too.*; పడమటిగాలి - padamatigáli, *Tel.*; மேல்காற்று - mélgáttu, *Tam.*). Title as blowing from the land. Hind. from (maghribí, ar. western + hawá, ar. air). Malay from (angin, malay, wind + dárat, malay, land). Too. from (kare, too. land, as opposed to water + gháli, too. wind). Tel. from (padamara, tel. west + gáli, tel. wind). Tam. from (mél, tam. west + káttu, tam. wind). Tam. also (kódai), meaning wind of the hot season. Portuguese Terrenho. Westerly winds prevailing mainly during day-time to the east of the western ghauts [q.v.] especially in Carnatic [q.v.]. See vol. II, 5, for causes. They are always preceded by a long calm, and carry before them a cloud of dust [pishauch]; the atmosphere while they blow is hazy and thicker than in common, and the sun when rising appears as if involved in mist or dust. In most parts they set in about ten or eleven o'clock in the forenoon, and increase in violence and heat till they are stopped by the easterly sea breeze; the sea breeze is preceded by a short lull or calm; if the sea breeze fail, as sometimes happens, the land wind continues blowing, but gradually decreases in strength, and finally dies away in the beginning of the night, having slowly veered round to the south-west; about morning a little motion of the air is perceptible; but it is very weak, until at the usual time the wind sets in stronger and hotter than on the preceding day. The land winds are said to be dry, and on that account productive of an uneasy sensation all over the body, with a dryness of the skin as if the perspiration had been suddenly stopped; this sensation is peculiarly felt in the eyes, which must frequently be shut while walking in this wind, as the lids become stiff; these wind can destroy men and animals if exposed to them too long; it is not very uncommon to see large kites [chillam] and crows [caurvam], while on the wing, drop down at once as if they had no life in them; at the setting in of the wind, when people are caught unprepared, pains of the bones and general lassitude are felt, and paralytic or hemiplectic affections are common. Nightly illuminations of the ghauts [q.v.] or of the hills in their neighbourhood are seen at this season, after it has continued for some time without rain; these appear always about the middle of the mountain, seldom or never reaching the top; the natives account for these spontaneous combustions by the friction of the bamboos [q.v.] against each other. The natives use no other means of securing themselves against the effects of the land winds than shutting up their houses and bathing in the morning and evening; Europeans cool their apartments by means of wetted tatties [tatty], made of straw or grass, and sometimes of the roots of the cuscus [q.v.] or vettivair or andropogon muricatus, retz., which when wetted exhales a pleasant but faint smell [longshore wind, monsoon, sea breeze].

LANSEH (لنگست - langsat, *Malay*). Title otherwise Langsat. Botanically Lansium anamalayanum, bedd., meliaceæ [vricsham, 36]. Moderate sized tree; leaves 6–9 inches; leaflets 3–4½ by 1½–2 inches; petiole 1–⅔ inch; hermaphrodite flowers sessile, about ¼ inch diameter; fruit the size of a large grape [angoor]; produced in bunches; succulent aril in fruit eaten by monkeys [bandar] and birds [pacshy].

LARIN (لاری - lárí, *Hind.*). From (lár, pers. province on the north of the persian gulf). Coin usually in shape of a fish-hook, formed of two pieces of silver wire welded together and doubled round into this shape [naunyam]. A rarer form is straight [ridy].

LASCAR (لشکر - lashkar, *Hind.*). From persian. An army, camp, cantonment, gang, crew. Thence a single member of such; as a sailor, tent-pitcher [calassy], inferior artillery man. Proper form of latter would be Lascary.

LATEEF (لطیف - latíf, *Hind.*). From (latafa, ar. slender). Exquisite. An attribute of God [allah]. Common alam. Also part of lacab, as Lateefa bauno, alam + pataun female alaumat. Lateef ood deen, the most exquisite of the faithful [ism]. Feminine Lateefa, subtle.

LATERITE (سلی کا پتھر - sillíkápatthar, *Hind.*; کالا پتھر - káláphattar, *Dec.*; ಮುರಕಲ್ಲು - murakallu, *Too.*; బొంతరాయి - bontaráyi, *Tel.*; വെട്ടുകല്ല് - vettukal, *Mal.*; சொறிக்கல் - shorikkal, *Tam.*). Title from latin, from brick-like red color. Hind. from (sillí, hind. whet stone + patthar, hind. stone). Dec. from (kálá, hind. black + phattar, hind. stone). Tel. from (bonda, tel. fissure + ráyi, tel. stone). Mal. from (vettu, mal. to cut + kal, mal. stone), because soft when first dug. Tam. from (shori, tam. roughness + kal, tam. stone). Hind. also (muram); (kírekápatthar), meaning worm stone; from worm-eaten appearance. Mal. also (charakkal), meaning gravelly stone; (ishtakakkallu), meaning brick + stone, from color and use. Tam. also (vettukkal), meaning cut + stone; (shembúrángal), meaning red + centipede + stone, from color of common centipede; (tavalaikkal), meaning frog stone, from roughness of surface. Cabook of Ceylon. Anglo-indian term. Irony red or brick dust colored clay iron [auhan] ore peculiar to India. It covers the western coast almost continuously, and for the most part up to the very foot of the ghauts [q.v.]; it is found in detached beds along the coromandel coast [q.v.], near madras and nellore, rajahmundry and samulcottah, extending into cuttack; it caps the loftiest summits of the eastern and western ghauts

[q.v.], and some of the isolated peaks in the tableland in the interior; it occurs in mysore, salem, coimbatore, south arcot, the carnatic [q.v.] and tanjore; it rarely if ever contains either crystals [palingoo cull] or organic remains [cull poo], is never stratified or columnar, and generally spreads out in vast sheets over the surface of the plutonic or volcanic rocks; the origin is regarded as modified volcanic matter, the low-level having undergone a further re-arrangement and deposition. Laterite is chemically a porous, argillaceous rock, much impregnated with iron peroxide, which is irregularly distributed throughout the mass, some forms of the rock containing as much as from 25 to 35 per cent. of metallic iron; this iron exists either entirely in a state of hydrated peroxide or limonate, or else partly as hydrated and partly as anhydrous peroxide; the surface after exposure is usually covered with a brown or blackish brown crust of limonite, but the rock when freshly broken, is mottled with various tints of brown, red and yellow, and a considerable portion sometimes consist of white clay [calimunn]; the difference of tint is due to the segregation of the iron in the harder portions, the pale-yellow and white portions of the rock, which contain little or no iron, being very much softer and liable to be washed away on exposure; the exposed surface, whether vertical or horizontal, is extremely irregular, being pitted over with small hollows caused by the washing away of the softer portions. The laterites of this country contain manganese [q.v.], silica, alumina, and lime [choonam] with traces of magnesia, soda and potash; they differ from the conglomerates of other countries in containing more manganese and ochrey clay. The surface of the country composed of the more solid forms of laterite is usually very barren, the trees and shrubs growing upon it being thinly scattered and of small size. The rock is so porous that all water sinks into it; when the upper surface of laterite is cleared away, the rock below is found soft and easily cut into blocks of any form, whence malayalam name; it quickly hardens and darkens in hue by exposure to the air, and is then not at all liable to decomposition or injury from the weather. It is much used on the Western coast and about Madras for building and road-making, as kankar [q.v.] is used in the north. When ground into clay mixed with jaggery [q.v.], it makes a good water-proof cement [cauray] for the roofs of houses. The proportions for laterite road-making at Madras are:— 15 laterite, ⅝ gravel [parookkay cull], 2 clay, 2⅝ sand [manal].

LATORAH (भृङ्ग - bhringa, *San.*; लटोरा - latórá, *Mahr.*; اخيل - akhyal, *Ar.*; كاسكينه - káskínah, *Pers.*; لٹورا - latorá, *Hind.*; బెలంచి - belanchi, *Tel.*; கிச்சாங்குருவி - kíççánguruvi, *Tam.*). Title from hindostany. San. from (bhri, san to sound). Ar. (khaila, ar. having moles). Tam. from (kíççu, tam. chirping + kuruvi, tam. small bird). Hind. also (dúdhiyálatorá), meaning milky shrike; (mattiyálatorá), meaning earth-colored shrike; (kachkachlatorá), meaning talkative shrike; (kájallatorá), meaning lamp-black shrike; (pachrang), meaning five colored. Dec. also (sufedlatorá), meaning white shrike; (mattíkerangkálatorá), meaning earth-colored shrike. Tel. also (shenkubelanchi), meaning conch or white shrike; (peddakirítigádu), meaning large + crested + fellow; (errabelanchi), meaning red shrike; (chinnabelanchi), meaning small shrike; (vennadéga), meaning butter hawk; (bhattigádu), meaning a song fellow; (bhattikirítigádu), meaning a crested song fellow. Title otherwise True shrikes. Lanianæ, laniadæ [pingalam], dentirostres, insessores, aves [pacshy, 19], of naturalists [jantoo]. The indian grey shrike is lanius lahtora; alias lanius burra; pale blue grey narrow frontal streak; affects low, thin, jungle; sits on top of some low tree, on the watch for a cricket, locust, &c., to come near; usually harsh grating cry, but imitates the song of other birds to bring them near; captures small birds. The rufous-backed shrike is lanius erythronotus; alias lanius caniceps; call a shrill single sound, generally repeated with one high and one low note, like peek peek. The black-headed shrike is lanius nigriceps; alias antiguanus, tricolor. The bay-backed shrike is lanius hardwickii. The brown shrike is lanius cristatus; alias lanius ferrugiceps, phænicurus, superciliosus; peculiarly harsh chattering.——*Hill latorah* (धूम्राट - dhúmráta, San.; پہاڑی لٹورا - pahárílatorá, Hind. and Dec.; ఊలపిట్ట - úlapitta, Tel.). San. from (dhúmra, san. dark red + ata, san. wanderer). Hind. from (pahár, hind. mountain + latorá, hind. shrike). Tel. from (úla, tel. whistle + pitta, tel. bird). Tel. also (vadambálajitta), meaning imitation + bird. Wood shrikes. Malaconotinæ, laniadæ [pingalam], dentirostres, insessores, aves [pacshy, 19], of naturalists [jantoo]. The malabar wood shrike is tephrodornis sylvicola. The common wood shrike is tephrodornis pondicerianus; alias keroula indica; lanius griseus, muscicapoides, sordidus; muscicapa philippensis; tenthæa leucura; tephrodornis superciliosus; common in thin jungle; found in small flocks, in general, pleasing mellow whistling note; occasionally caged for its song.

LATTA (లాత్త - látta, *Tel.*). From (látamu, tel. a stick). Means struck. Astrological element. There are two sorts of Lattas, eastern and western; those of the Sun [sooryan], Mars [coojan] and Saturn [shany], being accounted east, and those of Rahoo [q.v.] and Kait [q.v.] west. Whenever the sun is in XII Nacshatrams [q.v.] counted eastward from that in which the moon [chundran] happens to be, then he is Latta or struck, &c. The planets [graham] have each a different scale [jyotisham].

LAUDA (ಲಾಡ - láda, *Can.*). From (láta, san. south goozerat). Traders in the Mahratta country. Smartas [q.v.] and followers of Shuncaracharry [shuncaran]. Worship god at Tripatty. Customs do not differ from Rauchavaur [q.v.].

LAUL (माणिक्य - mánikya, *San.*; لعل - lal, *Ar.*, *Pers.* and *Hind.*; ಕೆಂಪು - kempu, *Can.*; కెంపు - kempu, *Tel.*; ചുവപ്പുക്കല്ല - chuvappukkallu, *Mal.*; செப்பு - sheppu, *Tam.*). San. from (manika, san. town, so called). Ar. means red. Can. and tel. mean red. Mal. means red stone. Tam. means redness, short for (shivappu). Tam. also (kembu), meaning red. Ruby. This variety of perfect corundum [q.v.] can be procured in Ceylon, but is more abundant and of a much finer kind in Burmah. It is properly a red sapphire [neelam], and when perfect its color is cochineal [kirmiz] red.——*Laldanah* (لال دانه - láldanah, Hind.; మెట్టతూటి - mettatúti, Tel.; திருதாளி - tirutáli, Mal.; රසතැල්ල - rasatella, Singh.; தாளி - táli, Tam.). Title from hindostany, meaning red seed. Tel. from (metta, tel. high ground + túti, tel. ipomæa aquatica, forsk.). Mal. from (tiruku, mal. to twist + táli, mal. creeper). Botanically Ipomæa [calamby] sepiaria, kœn., convolvulaceæ [vricsham, 93]. Alias Convolvulus marginatus, maximus. Twining; leaves cordate oblong; peduncles many-flowered; heads of flowers dense; sepals oblong, ovate acute or obtuse; corolla pinkish, tubular, funnel-shaped. A climbing perennial plant with rose-colored flowers found in hedges; leaves eaten as greens.——*Laulah* (لالا - lálá, Hind.). Literally a writer. A Hindostany speaking caste; follow trade; some of them held high offices under the Nawaubs [q.v.] of the Carnatic [q.v.]. So a mere Hindoo third name [peyar]. Also used as an address in speaking to a respectable person, not of high rank, especially with jee [q.v.] annexed, as Laulah jee, sir [jauty, maryauday].——*Laul baugh* (لال باغ - lálbágh, Hind.). From (above + bágh, pers. garden). Name of a garden in more than one town; specially one in Bangalore, first laid out by Hyder ally [q.v.].——*Laulbye* (లాలుబాయి - lalubáyi, Tel.). From (above + bái, mahr. woman). Hindoo 2nd or pers. name [peyar].——*Laul e jalauly* (لعل جلالی - lalijalálí, Hind.). Means jalaul's gem. Acbar's gold coin [ilauhee, jalaul].——*Laulgoody* (இலாலுக்குடி - ilálukkudi, Tam. lálgudi*). From (lálá, mahr. caste so called + kudi, tam. village).—"*a*" Deputy tahsildarry, Trichinopoly district. Pay Rs. 100.—"*b*" Town, Deputy tahsildar's station, Assistant collector's division; Trichinopoly district, Trichinopoly talook; pop. 4,830; lat. 10° 52′; long. 78° 53′; from Ariyalore S.W. 25 miles; from Madras S.S.W. 179 miles; from Moosiry E.S.E. 27 miles; from Shreerungam E. 9 miles; from Trichinopoly E.N.E. 9 miles. Taken from French in 1752. In 1861 the old Laulgoody and Conaud talooks were amalgamated and formed into the present talook of Trichinopoly. Old Shiva temple. Richly sculptured. On left side of road to Poollambaudy, is old Jeina [q.v.] statue.

LAUT (لات - lát, *Hind.*). Also called stambham [q.v.]. Pillar, obelisk. These are common to all the styles of Indian architecture [staupatyam]. With the Booddhists [booddha] they were employed to bear inscriptions on the shafts, with emblems or animals on the capitals. With the Jeinas [q.v.] they were generally deepdandams [q.v.], or lamp-bearing pillars. With the Veishnavas [q.v.] they bear statues of Garoodan [q.v.] or Hanooman [q.v.]. With the Sheivas [q.v.] they are flagstaffs [dhwajastambham]. Whatever their destination, they are always in a superior style of art.

LAVANGAM (लवङ्ग - lavanga, *San.*; قرنفل - karanful, *Ar.*; ميخك - mekhak, *Pers.*; لونگ کا جهاڑ - longkájhár, *Hind.* and *Dec.*; چڠکيه - chángke, *Malay*; ಲವಂಗಮರ - lavangamara, *Can.*; లవంగము - lavangamu, *Tel.*; കരയാമ്പൂ - karayámbú, *Mal.*; වරාල - varála, *Singh.*; இலவங்கம் - ilavangam, *Tam.*). San. from (lú, san. to cut) [cassia cinnamon, ceylon cinnamon, country cinnamon, loo]. Pers. from (mekh, pers. nail + diminutive suffix). Hind. from (lavanga, san. clove + jhár, hind. tree). Can. from (lavanga, san. cloves + mara, can. tree). Tel. from sanscrit. Mal. from (kara, mal. blackness + áku, mal. to become + pú, mal. flower), from flower blackening when dried. Tam. from sanscrit. San. also (dévakusuma), meaning divine flower. Singh. also (karábu). Tam. also (kirámbu); (karuvá) [ceylon cinnamon]. Greek καρυοφύλλον, from tamul (karuvá). Title otherwise Clove tree, Nail-fruit tree. Giving Cloves, Clove oil, Mother cloves. Clove from resemblance of fruit to nail. Botanically Eugenia [jamboo] caryophyllata, willd., myrtaceæ [vricsham, 561. Alias Caryophyllus aromaticus. Tree, habitat moluccas, cultivated in malabar, resembles the laurel; 15-40 feet high; leaves large; ovate-oblong, acuminated at each end, evergreen; flowers small, produced in great profusion in cymes; the calyx has a cylindrical tube and four-cleft border corolla consists of four petals united by their tips; the stamens are in four clusters; the fruit an oblong dry berry with one or two cells and as many seeds; leaves, flower and bark have an aromatic odour. Cloves are the unexpanded flowers of the tree quickly dried in the sun; as occurring they should be large, heavy, brittle, brown externally, red within, and when

compressed or rasped allowing a volatile oil [yennay] to exude; their odour is aromatic, very sweet; taste aromatic, strong, hot, and acrid, almost to burning, slightly bitter; the ripe fruits dried before the sun are clove berries, or mother cloves, their properties feebler, but these are in hindostany narlaung or male cloves; oil above-mentioned is deep red, flavor of the clove, comparatively milder, sinks in water. The clove tree is indigenous only in the five small islands which constitute the moluccas proper, afterwards introduced into other neighbouring islands, where it is now cultivated, and at a later period into zanzibar and pemba on the east coast of africa; introduced into india, and mentioned by characan, the oldest sanscrit medical writer. The product, cloves, have been much prepared by the dutch at amboyna; they have been known in china and india as an introduced article from time immemorial. The flowers of the clove grow as above said in cymes and when fit for gathering the calyx tube is of a bright red color; the collection is by hand, each clove being picked singly; they are afterwards dried upon mats in the sun, which takes about three days; very inferior samples of cloves are sold in bazaars; good cloves are plump and of fair size, and should leave an oily stain when pressed between the thumb nails; the essential oil should be 16 to 18 per cent.; cloves are stronger than cinnamon [q.v.] for all uses; the oil of cloves of the indian bazaars [q.v.] is made by steeping cloves in sweet oil; no essential oil is manufactured in the country. A paste of cloves is applied to the forehead and nose as a remedy for colds; a clove roasted in the flame of a lamp and held in the mouth is a popular remedy for sore throat; gives to pharm. the clove, caryophyllum; active principles, a volatile oil and a resinous crystalline principle, caryophyllin; aromatic stimulant and carminative; preparations, infusum caryophylli, oleum caryophylli; officinal. Much used as a spice in cooking; also with betel-leaf [q.v.] for chewing; the oil easily combines with grease, soap and spirit, and is extensively used in the manufacture of perfumery.——*Jungle lavangam* (అడవిలవంగ - adavilavanga, Tel.). Same as Country cinnamon.——*Lowly lavangam* (भूलवङ्ग - bhúlavanga, San.; पाणीलवङ्ग - pánílavanga, Mahr.; بن لونگ - banlaung, Hind.; ಕಾವಾಕುಲಗಿಡ - kávákulagida, Can.; నీరుఅగ్నివేంద్రము - níruagnivéndramu, Tel.; കാട്ടുകരയാമ്പൂ - káttukarayámpú, Mal.; நீர்க்கிராம்பு - nírkkirámbu, Tam.). Title trom habitat and resemblance. San. from (bhú, san. ground + lavanga, san. cloves, eugenia caryophyllata, willd.), aromatic plant. Mahr. means water clove, referring to habitat. Hind. from (ban, hind. forest + laung, hind. clove). Tel. from (níru, tel. water + agnivéndramu, tel. ammannia baccifera, linn.). Mal. from (kátu, mal. forest + karayámpú, mal. cloves). Tam. from (nír, tam. water + kirámbu, tam. cloves, eugenia caryophyllata, willd.). Can. also (kávakúlagida). Mal. also (karámbu). Singh. also (hamargo). Tam. also (kirámbuppúndu), meaning cloves + plant; (káttukkirámbu), meaning wild clove plant. Title otherwise Primrose willow, West-indian loose strife, Wild clove tree. Botanically Jussiæa suffruticosa, linn., onagraceæ [vricsham, 59]. Alias Epilobium fruticosum; Jussiæa exaltata, fruticosa, villosa. Perennial, herbaceous, 1½ feet, erect, more or less pubescent or villous; leaves from broadly lanceolate to linear acuminate, tapering at the base into a short petiole; flowers almost sessile; calyx lobes four or five, broadly lanceolate or ovate, three to five-nerved, much shorter than the roundish-ovate petals; capsule nearly cylindrical, elongated, tapering at the base into a short pedicel; flowers largish, yellow, evening-primrose-like; flowering in rainy season. The plant, ground small, and steeped in butter-milk [mor], is considered good in dysentery; also in decoction as a vermifuge and purgative. A smaller species is repens.——*Wild lavangam* (قرنفل بری - karanfulibarrí, Hind.). Same as China pepper.

LAVAUJAMAH (لوازمه - lawázimah, *Hind.*). From (lazama, ar. to be necessary). Necessary things, baggage.

LAYAK (لایق - láik, *Hind.*). From (laika, ar. to do right). Fit. Layak bunjar is waste land fit for tillage.

LEAF INSECT (پتے کا کیڑا - pattekákírá, *Dec.*; ಎಲೆಹುಳ - elehula, *Can.*; గొల్లభామ - gollabháma, *Tel.*; ഇലപ്പുഴു - ilappuzhu, *Mal.*; இலைக்கிளி - ilaikkili, *Tam.*). Title from haunt and appearance. Dec. from (pattá, hind. leaf + kírá, hind. worm). Can. from (ele, can. leaf + hula, can. insect). Tel. from (golla, tel. shepherd caste + bháma, tel. woman); the posture of sitting suggesting the posture of a shepherd woman while churning. Mal. from (ila, mal. leaf + puzhu, mal. insect). Tam. from (ilai, tam. leaf + kili, tam. locust); leaf-winged locust. Terms synonymous with the family Phasmidæ, orthoptera, hemimetabola, insecta [poochy], of naturalists [jantoo]. Of varied shapes. Called spectres, phantoms, devils' horses, walking sticks, walking leaves, &c. They mostly are inoffensive leaf-eating creatures, some being broad and leaf-like, while others are long and cylindrical, so as to resemble sticks or bits of withered grass. The Mantidæ however, so called because of their, habit of sitting with their long fore feet held up as if in prayer, are carnivorous, taking that position in wait for their prey.

LEELAY (लीला - lílá, *San.*). From (lal, san. to play). A pastime. Also avatar [q.v.]. Shiva's miracles at Madura. See the Tamul tirvilaiyaudal.——*Leelaudhar* (లీలాధరు - lílá-dharudu, Tel.). From (above + dhara, san. assumer). Vishnoo [q.v.] who assumes incarnations. Hindoo 2nd or pers. name [peyar].——*Leelaudharvilaus* (లీలాధర విలాసుడు - líládharavilásudu, Tel.). From (above + dhara, san. assumer + vilása, san. shining). Shining like Vishnoo. Hindoo 2nd or pers. name [peyar].

LEIL (لیل - laíl, *Hind.*). Night [shab].——*Leilat ool kadr* (لیلة القدر - laílatulkadr, Hind.). From (above + kadr, ar. power). The night of power, when the Koran [q.v.] descended from heaven [bheest] to the fourth firmament [asmaun], generally held to have been on the twenty-seventh Ramzaun [q.v.]. Anniversary observed with reverence by Mahomedans. The devout sit up all night burning frankincense pastiles, repeating nafeelen, reciting the praises of the deity, reading the Koran, &c.——*Leilat ool miraaj* (لیلة المعراج - lailatulmiráj, Hind.). From (above + miráj, ar. ladder). The night of Mahomed's ascent to heaven. Held to be the fifteenth or sixteenth or twenty-seventh of seventh month Rajab [maheena]. The angel Gabriel [jibbreel] then conveyed the prophet [mahomed] mounted on the booraak [q.v.] to the Almighty. People commemorate the night by sitting up all night, reading narratives written concerning it, and next day keep fast [roza]. The custom is peculiar to the learned and devout.——*Leilat ool moobaurak* (لیلة المبارك - laílatulmubárak, Ar.). From (above + mubárak, ar. blessed). Same as Shab e baraut [q.v.].——*Leilee* (لیلی - lailí, Hind.). Name of the celebrated mistress of mujnoon [q.v.], the subject of many poems.

LEKKA (లెక్క - lekka, *Tel.*). From (likh, san. to write). An account [hisaub, kanak].

LEMON GRASS (गन्धतृण - gandhatrina, *San.*; हिर्वंच - hirvacha, *Mahr.*; ताकातण - tákkátana, *Conc.*; الاذخر - izkhar, *Ar.*; چاه کشمیری - cháikashmírí, *Pers.*; اگیا گہاس - akiyághás, *Hind.*; هزار مصالح - hazármasálah, *Dec.*; ವಾಸನೆಹುಲ್ಲು - vásane-hullu, *Can.*; ಚಾತಪ್ಪು - chátappu, *Too.*; నిమ్మగడ్డి - nimmagaddi, *Tel.*; സംഭാരപ്പുല്ലു - sambhárappullu, *Mal.*; පෙංගිරිමාන් - pengirimán, *Singh.*; கற்பூரப்புல் - karbúrappul, *Tam.*). Title from scent. San. from (gandha, san. perfume + trina, san. grass). Conc. means curd grass, from use to flavor curd. Pers. from (chá, pers. tea + kashmír, pers. cashmere); from fragrance. Hind. from (agiya, hind. bird, alauda genus + ghás, hind. grass). Dec. from (hazár, hind. thousand + masálah, ar. ingredient); referring to aroma. Can. from (vásane, can. fragrance + hullu, can. grass). Tel. from (nimma, tel. lemon, citrus medica, linn., var. limonum, brandis + gaddi, tel. grass). Mal. from (sambhá-ram, mal. diluted butter-milk + pullu, mal. grass); from grass used to flavor butter-milk. Singh. from (pengiri, singh. acid + mán, singh. having). Tam. from (karpúra, san. camphor + pul, tam. grass). San. also (bhústrina), meaning earth grass; (málá-trinaka), meaning wreath + grass; (takratrina), meaning curd grass; (dévajagdhaka), meaning eaten by gods. Mahr. also (olancha). Hind. also (gandbel), meaning aromatic creeper; (ganjníkághás) by corruption from sanscrit meaning fragrant grass. Can. also (kámanchahullu); (kávanchehullu); (káchihullu); (majjigehulla), meaning butter-milk grass; (purvalihullu). Tel. also (kámanchigaddi), meaning forest + good + grass; (kámák-shikasuvu); (vásanagaddi), meaning good smell + grass; (chip-pagaddi). Mal. also (vásanappullu), meaning fragrant grass; (cháyappullu), meaning color grass; (rámaççam). Tam. also (vásanaippul), meaning fragrant grass; (kávattambul), meaning shed + grass; (mándappul), meaning dullness + grass; (kámád-chippul), meaning goddess + grass; really corruption from teloogoo. Greek σχοίνου ἄνθος. Title otherwise Butter-milk grass, Camel's hay, Camphor grass, Cashmere tea, Fragrant grass, Indian melissa oil grass, Masaulay grass, Sour grass, Sweet rush, Verbena oil grass. Botanically Andropogon [beard grass] schœnanthus, roxb., graminaceæ [vricsham, 156]. Alias Andropogon aromaticus, bicornis, citratum, citriodorus, nardus, pruinosus; Cymbopogon citratum, citriodorus, schœnanthus; Lagurus schœnanthus; Trachypogon schœnanthus. Root perennial; panicles somewhat secund; spikes conjugate, ovate-oblong; rachis pubescent; floscules sessile, awnless; culms 5–7 feet, erect, smooth; leaves many near the root, bifarious, soft, pale green, 3–4 feet long; spikelets in pairs, on a common pedicel furnished with a spathe; rachis articulated, hairy; flowers in pairs, one hermaphrodite and sessile, the other male and pedicelled. Sweet-smelling, bitterish, aromatic grass much cultivated in w. coast gardens. Oil by distillation, pale sherry color owing to resin contained, transparent, extremely pungent taste and lemon-like odour. Infusion of leaves medicinally tonic and stimulant; mixed with butter-milk [mor], leaves used in ring-worm; rhizomes and flowers have similar qualities; lemon-grass oil is substituted for british chamomile [baboona], caraway [q.v.], peppermint [poodeenah], and cajeput [q.v.] oils; gives to pharm. the volatile oil, oleum andropogi citrati, stimulant, carminative, antispasmodic, and diaphoretic; locally applied, rubefacient; officinal. Leaves used for tea [q.v.] and curries [q.v.] like roussa grass [q.v.]. Oil used as a perfume. Compare:—Andropogon martini (doddabilikáchihullu), large white lemon grass; Apluda aristata (sannakarikáchihullu), small black lemon grass. See gloss. paragraphs.

LEMURIA (ليموريه - limoriyah, *Malay*). From the Lemur found both in Madagascar and Southern india. A continent which from soundings is supposed to have formerly extended from Madagascar to Ceylon, India, and the Malay islands, from the Permian to the end of the Miocene geological period.

LIFAUFAH (لفافه - lifáfah, *Hind.*). From (lafa, ar. to wrap). Envelope.

LIMBOLEE (لميولى - limbolí, *Hind.*). Oil of Murraya kœnigii, spr., Curry-leaf tree.

LIME (करुणा - karuná, *San.*; اترج - utraj, *Ar.*; ترنج - turanj, *Pers.*; ليمو - límú, *Hind.*; نينبو - nímbú, *Dec.*; ಹೇರಳೆ - hérale, *Can.*; దబ్బ - dabba, *Tel.*; கொம்மட்டிமாதளை - kommattimáthalai, *Tam.*). Title from arabic (límú), through portuguese lima. Hind. from arabic. Dec. from hindostany. Can. from (híru, can. great). Tam. from (kommatti, tam. water-melon, citrullus vulgaris, schrad. + máthalai, tam. pomegranate, punica granatum, linn.). San. also (bíjapúra), meaning filled with seed [anaur, guava]; (mátulunga), meaning unequalled. Tel. also (lungamu); (mádíp'halamuchettu); (pulladabba), meaning sour + the tree; (peddanimma), meaning large + lime tree, citrus medica, linn., var. acida, brandis. Botanically Citrus [jambeeram] medica, linn., rutaceæ [vricsham, 32]. The typical lime, native of Sikkim and Koomaon. The "e" in specific name is long; in ancient times it derived its name from media; was the median apple introduced into greece and italy from persia and asia; greek μῆλον μηδικὸν. Shrub or small tree; leaflets 3 to 6 inches, elliptic ovate or ovate-lanceolate; petiole naked or winged; flowers five to ten in a raceme, small or middle-sized; stamens twenty to forty.——**(1)** All four varieties mentioned below [citron, lemon, sour lime, sweet lime] are cultivated to a limited extent in gardens.——*Citron* (फलपूर - p'halapúra, San.; मावळंग - mávalanga, Mahr.; मावलिङ्ग - mávalinga, Conc.; اترج - utraj, Ar.; ترنج - turanj, Pers., Hind. and Dec.; ಮಾದಳದಗಿಡ - mádaladagida, Can.; ಮಾಪಲ - mápala, Too.; నారదబ్బ - náradabba, Tel.; ഗണപതിനാരകം - ganapatinárakam, Mal.; ලප්නාරං - lapnáram, Singh.; துரிஞ்சி - turiñji, Tam.). Title from greek. San. from (p'hala, san. kernel + púra, san. full). Mahr. from (mátulunga, san. the plant). Conc. from (mátulunga, san. the plant). Ar. from syriac (atrogha). Pers. from arabic. Can. from (mádala, can. citron + gida, can. plant). Tel. from (nára, tel. fibre + dabba, tel. citrus medica, linn.). Mal. from (ganapati, san. the deity + nárakam, mal. lime, citrus). Tam. from persian. San. also (mátulunga), meaning unequalled; (jambíra), meaning eatable; (bíjapúra), meaning seed-filled. Ar. also (utranj). Hind. also (barálímú), meaning large lime. Can. also (maháp'halagida), meaning great + fruit + plant; (máduválagida). Tel. also (mádíp'halamu); (lungamu); (májíp'halamu); (pulladabba), meaning sour + the tree. Mal. also (mátalanárakam), meaning pomegranate, punica granatum, linn. + lime, citrus. Singh. also (sedaran). Tam. also (kommattimáthalai), meaning water-melon, citrullus vulgaris, schrad. + pomegranate, punica granatum, linn.; (kodimáthalai), meaning creeper + pomegranate. Title otherwise Cedrat, Creeper lime, Ganapaty's lime, Giant lime, Large lemon, Melon lime, Ootraj, Pomegranate lime, Tooranj. Botanically Citrus [jambeeram] medica, linn., var. medica proper, brandis, rutaceæ [vricsham, 32]. Alias Citrus fructu maximo, limon, solaniana, tuberosa; Limona racemosum, spinosum, vulgare. Shrub; young branches rigid; leaves oblong, pointed; petioles simple; flowers white, tinged with red; flowering in hot season; fruit great size, obovoid, deeply furrowed and wrinkled, with thick spongy rind, terminated by a knob, and juice only slightly acid; found wild along base of himalayas; at the present day no where cultivated extensively, the more prolific lemon [q.v.] and sour lime [q.v.] having generally taken its place. Citron rind is hot, dry and tonic; pulp cold and dry; seeds, leaves, and flowers hot and dry; juice refrigerant and astringent; the juice as sherbet is substituted for british citric and tartaric acids. The fruit itself seldom eaten, but made into confections and preserved; the rind very fragrant from quantity of aromatic oil. ——*Lemon* (महाजम्बीर - mahájambíra, San.; थोरनिंबू - t'hóranimbú, Mahr.; قلنبق - kalambak, Ar. and Pers.; بڑا ليمو - barálímú, Hind.; بڑا نينبو - baránímbú, Dec.; ದೊಡ್ಡನಿಂಬೆಗಿಡ - doddanimbegida, Can.; పెద్దనిమ్మ - peddanimma, Tel.; വലിയചെറുനാരകം - valiyacherunárakam, Mal.; ලොකුදෙහි - lokudehi, Singh.; பெரியவெலுமிச்சை - periyavelumiççai, Tam.). Title from sanscrit (nimbuka), so hindee (nimbu) and (limbu), so arabic (limun), so english lemon; the natives rightly consider it a mere variety of lime. San. from (mahá, san. great + jambíra, san. sweet lime, citrus medica, linn., var. limetta, brandis). Mahr. from (thóra, mahr. large + nimbú, mahr. lemon). Hind. from (bará, hind. large + límú, hind. lime). Dec. from hindostany. Can. from (dodda, can. large + nimbe, can. lime + gida, can. plant). Tel. from (pedda, tel. large + nimma, tel. lime, citrus medica, linn.). Mal. from (valiya, mal. large + cherunárakam, mal. sweet lime). Singh. from (loku, singh. large + dehi, singh. sweet lime). Tam. from (periya, tam. big + elumiççai, tam. lime). Dec. also (pahárínímbú), meaning mountain lime. Malay also (pahárikághazí), meaning mountain paper-like lime. Tam. also (kodiyelumiççai), meaning creeper + lime. Title otherwise Creeper lime, Large lime, Mountain lime. Botanically Citrus [jambeeram] medica, linn., var. limonum, brandis, rutaceæ [vricsham, 32]. Alias Citrus limonum, medica. Small tree 10 to 15 feet; young branches flexible; leaves oval-oblong, usually toothed; petioles simply margined; flowers white tinged with red, fragrant; flowering in hot season. Fruit middle-sized, ovoid oblong, nippled at top, external skin thin, smooth, highly odoriferous, pale yellow, marked all over by small cells filled with essential oil; rind thin; juice very acid. Real lemons are rarely met with in madras. Gives to pharm. the outer part of the rind of the ripe fruit, limonis cortex; again the essential oil of the rind, limonis oleum; again the expressed juice of the ripe fruit, limonis succus. Yellow peel is an aromatic oil from rind used in perfumery; citric acid made of the fruit.——*Sour lime* (जम्बीर - jambíra, San.; निंबू - nimbú, Mahr.; ليمو حامض - límúihámiz, Ar.; ليمو ترش - límúitursh, Pers.; ليمو - límú, Hind.; نينبو - nímbú, Dec.; جارك كرباو - járukkarbau, Malay; ನಿಂಬೆಗಿಡ - nimbegida, Can.; నిమ్మ - nimma, Tel.; ଲେମ୍ବୁ - limbo, Oor.; ചെറുനാരകം - cherunárakam, Mal.; දෙහි - dehi, Singh.; எலுமிச்சை - elumiççai, Tam.). Title from taste of all parts. San. from (jam, san. to eat + víra, san. strong). Mahr. from (nimbúka, san. the plant). Ar. from (límú, ar. lime + hámiz, ar. sour). Pers. from (límú, ar. lime + tursh, pers. sour). Hind. from arabic. Dec. from sanscrit. Malay from (járuk, malay, citrus sp. + kárbau, malay, buffalo). Can. from (nimbe, can. lime + gida, can. plant). Tel. from sanscrit. Oor. from sanscrit. Mal. from (cheru, mal. small + nárakam, mal. lime, citrus). San. also (nimbúka); (mátulunga), meaning unequalled; (limpáka), meaning stainer, from removing stains on garments. Ar. also (límún), meaning lime. Pers. also (límú), meaning lime. Malay also (járuknipis), meaning thin orange; (limau), from persian. Can. also (gajanimbegida), meaning elephant + lime + plant. Title otherwise Acid lime, Buffalo lime, Elephant lime, Small lemon, Thin orange. Botanically Citrus [jambeeram] medica, linn., var. acida, brandis, rutaceæ [vricsham, 32]. Alias Citrus acida. Leaflet elliptic oblong, petiole many times shorter than the leaflet linear or obovate, racemes short, flowers small, petals usually four, fruit usually small globose or ovoid, with a thick or thin rind, pulp pale sharply acid. As the true lemon [q.v.] is scarce here, the fruit of this is universally used as a substitute; differs considerably in appearance from lemon; smaller, quite round or nearly so, smooth rind thinner than lemon; much more acid than lemon; to a certain degree acrid; in natural qualities otherwise the same; color, when the fruit arrives at a perfect state of maturity, is a fine bright yellow; much more common than the lemon; is like the w. indian lime. The fruit contains free citric acid, combined malic and phosphoric acids, and potassium, the first being the essential constitutent; the juice can be prepared for market either by boiling or by adding 10 per cent. of a strong spirit, brandy or whisky, to it. For cultivation best soil is sandy clay; ground prepared at any time, being turned up manured with dung [shauny] and alluvial soil and pitted; seed sown in nursery [nauttangaul] in pots and transplanted at rains; plant requires frequent watering, and occasional manuring; plants will come to full bearing after 7 years; price 5 annas per 100 fruits. The juice of fruit is medicinally antalkaline, antiscorbutic, refrigerant, astringent, stomachic and tonic; diluted with water and sweetened, forms a refrigerant drink; used in pharm. for the officinal lemon [q.v.]; the dried rind of fruit used as a vegetable drug. Dried limes are used to fasten and improve colors; lime-juice is used by dyers in dyeing yellow [shauyam], by washermen [dhoby] for taking stains out of linen, and with borax [vengauram] in preparation of the tirchoornam [q.v.]. The best of this variety are called by the natives paper-lime and leaf-lime, on account of thinness of the rind.——*Sweet lime* (निम्बूक - nimbúka, San.; मिठानिंबू - mit'hánimbú, Mahr.; ليمو حلو - límúihalo, Ar.; ليمو شيرين - límúishírín, Pers.; ميٹها ليمو - míthálímú, Hind.; ميٹها نينبو - míthánímbú, Dec.; ನಿಂಬೆಗಿಡ - nimbegida, Can.; నిమ్మ - nimma, Tel.; ചെറുനാരകം - cherunárakam, Mal.; දෙහි - dehi, Singh.; எலுமிச்சை - elumiççai, Tam.). Title from taste of pulp. Mahr. from (mit'há, mahr. sweet + nimbú, mahr. lemon). Ar. from (límú, ar. lemon, citrus medica, linn., var. limonum, brandis + halo, ar. sweet). Pers. from (límú, ar. lemon + shírín, pers. sweet). Hind. from (míthá, hind. sweet + límú, pers. lemon). Dec. from hindostany. Can. from (nimbe, can. lime + gida, can. plant). Mal. from (cheru, mal. small + nárakam, mal. lime, citrus). San. also (madhukarkatí), meaning sweet + cucumis melo, linn. Hind. also (amritphal), meaning sweet fruit. Tel. also (tiyyanimma), meaning sweet lime. Tam. also (tittippuyelumiççai), meaning sweet lime. Title otherwise Adam's apple, Limetta, Pear lemon, Sweet lemon. Botanically Citrus [jambeeram] medica, linn., var. limetta, brandis, rutaceæ [vricsham, 32]. Alias Citrus limetta. Leaves and flowers as in sour lime, fruit globose 3–5 inches diameter, rind thin smooth, juice abundant, sweet not aromatic. Native of northern india; has smooth, laurel-like leaves, and fruits similar to the orange [q.v.], but of an oval form, and the apex depressed, forming a hollow; very smooth,

pale-green rind, scarcely any flavor perceptible besides that of sweetness; flower white fragrant. Cultivation same as Sour lime; average price one fruit for six pies. Fruit is used somewhat as an orange.——(2) The following are limes so called in other genera.——*Manilla lime* (چینی نارنگی - chínínárangí, Dec.). Same as Musk lime.——*Monkey lime* (माकडनिंबण - mákadanimbúna, Mahr.; चोर्निंबुवे - chórnimbuvé, Conc.; جنگلی لیمبو - janglínímbú, Dec.; ಕಾಡುನಿಂಬೆ - kádunimbe, Can.; ಕೈಪೇರಿಪುಳಿ - kaipéripuli, Too.; కొండనిమ్మ - kondanimma, Tel.; ନାରଙ୍ଗି - narguni, Oor.; മലനാരകം - malanárakam, Mal.; காட்டெலுமிச்சை - káttelumiççai, Tam.). Title from exterior appearance of fruit. Mahr. from (mákada, mahr. monkey + nimbú, mahr. lemon, citrus medica, linn., var. limonum, brandis). Conc. means thief lime or false lime. Dec. from (janglí, hind. wild + nímbú, dec. lime). Can. from (kádu, can. forest + nimbe, can. lime tree). Too. from (kaipéru, too. bitter + puli, too. acidity). Tel. from (konda, tel. hill + nimma, tel. lime). Mal. from (mala, mal. mountain + nárakam, mal. lime). Tam. from (kádu, tam. forest + elumiççai, tam. lime, citrus medica, linn., var. acida, brandis); from berry-like lime. Mahr. also (ránanimbúna), meaning wild lemon. Can. also (kádulimbi), meaning wild + lime tree; (dodlihuligida), meaning large + sour + orange, citrus aurantium; (náyibéladamara), meaning barber + bael tree, ægle marmelos, corr. [wild lime] Tel. also (adavinimma), meaning jungle + lime. Mal. also (káttukurunnu), meaning forest shoot; (káttunárakam), meaning forest lime. Tam. also (káttukkurundu), meaning wild shoot. Title otherwise Bitter orange, Dog-wood apple, Hill lime, Indian wild lime, Jungle lime, Monkey lime, Thorny trichilia. Botanically Atalantia monophylla, corr., rutaceæ [vricsham, 32]. Alias Atalantia floribunda, platystigma; Limonia monophylla, rotunda; Trichilia spinosa; Turæa virens. Shrub, 8 feet; thorns small; leaves ovate or oblong, more or less emarginate at the apex; calyx four-toothed; petals four; racemes short, sessile; pedicels long, slender; berry globose, size of a nutmeg [jautikye] or small lime, three to four-seeded; flowers axillary and terminal, small, white; flowering in november; native of s. india. Warm, pleasant-smelling oil prepared by veidyans [q.v.] from the berry; application in chronic rheumatism and paralysis. Wood yellow, very hard and close-grained; substitute for box. Other common species are:—missionis, racemosa.——*Musk lime* (چینی نارنگی - chínínárangí, Dec.; கஸ்தூரியெலுமிச்சை - kattúriyelumiççai, Tam.). Title from flavor. Dec. from (chín, hind. china + nárangí, hind. orange, citrus aurantium, linn.). Tam. from (kastúri, san. musk + elumiççai, tam. lime, citrus). Tam. also (shinnakkozhuuji), meaning small + orange. Title otherwise China limboo, China orange, Manilla lime. Botanically Triphasia trifoliata, dec., rutaceæ [vricsham, 32]. Alias Triphasia aurantiola. Glabrous spinous shrub, with straggling evergreen branches and leaves; spines slender, straight; leaflets thick and soft, crenulate, coriaceous, almost nerveless, the terminal shortly petioled, ¾-1½ inch, ovate with a cuneate base, and rounded notched tip; lateral smaller, more rounded, oblique; flowers very shortly peduncled, nearly ½ inch long, white, fragrant; petals linear-oblong; fruit ½ inch long, fleshy, apiculate, gland-dotted. A small thorny shrub; bears small, white, fragrant flowers; the fruit about the size of a large black currant; encloses a stone which fills nearly the whole of the centre, leaving room for a small quantity of juicy pulp of an agreeable aniseed [anise] like flavor. No other common species here.——*Wild lime* (नैबेल - naibéla, Mahr.; بیلی - belí, Hind.; ನೈಬೆಲ - naibela, Can.; అడవినిమ్మ - adavinimma, Tel.; ବେଣ୍ଟ - bhenta, Oor.; ചെറുകാട്ടുനാരകം - cherukáttunárakam, Mal.; காட்டெலுமிச்சை - káttelumiççai, Tam.). Mahr. means barber's bael; from fruit used by barbers for soap. Hind. from (bel, hind. bael tree, ægle marmelos, corr.). Can. from mahratta. Tel. from (adavi, tel. forest + nimma, tel. citrus medica, linn., var. acida, brandis). Mal. from (cheru, mal. small + káttunárakam, mal. atalantia monophylla, corr.). Tam. from (kádu, tam. forest + elumiççai, tam. lime tree, citrus medica, linn., var. acida, brandis); berries resemble lime. Tel. also (tórelaga), meaning strong + wood-apple, feronia elephantum, corr. Tam. also (kuttivilá), meaning small + wood-apple tree, feronia elephantum, corr. Title otherwise Barber's bael, Musk-deer plant. Botanically Limonia acidissima, linn., rutaceæ [vricsham, 32]. Alias Limonia crenulata. Limonia, from (limú, ar. lime). Armed shrub, orange family, 6-10 feet; leaves pinnate, with two to three pairs of leaflets and an odd one; leaflets oblong, retuse, crenated; spines solitary; petioles broadly winged; flowers corymbose; corymbs umbelliform, two to three together from the axils of the fallen leaves; petals four; fruit globose, size of a nutmeg [jautikye], yellowish, but red when perfectly ripe; flowers small, white, fragrant; flowering in april and may. Root purgative, sudorific, and used in colic pains; the dried fruits are tonic and antidote to various poisons; wood very hard, close-grained, yellowish-white; used for turning. Other species are alata and bilocularis.

LINGO WOOD (لنگوکا جہاڑ - lingokájhár, *Hind.*). Same as Moch coondam.

LISAUN (لسان - lisán, *Ar.*). Tongue. Plant first term. Ex., where transl. is of second term:—Holarrhena antidysenterica (lisánulasáfírulmurr), sparrow + bitter; Onosma bracteatum (lisánussaur), bull; Wrightia tinctoria (lisánulasáfír), sparrow; (lisánulasáfírulhalo), sparrow + sweet. See gloss. paragraphs.

LITCHY (لیچی - líchí, *Hind.*; لیچی - liççi, *Malay*). Title from chinese through malay. Malay also (kálengkeng). Title otherwise Lee-chee. Botanically Nephelium litchi, camb., sapindaceæ [vricsham, 43]. Specific name from malay. Alias Scytalia litchi. Fine tree of moderate height, with spreading branches; leaves 3-9 inches; leaflets 1½-6 by ½-1¾ inches; petiolules $\frac{1}{12}$-$\frac{1}{4}$ inch; inflorescence tawny-puberulent; flowers greenish-white, $\frac{1}{12}$-$\frac{1}{8}$ inch wide; anthers shorter than the filaments; disk glabrous ovary two to three-celled, ferruginous-hairy; style two to three-lobed, lobes recurved; fruit two to one-lobed, globose, about 1 inch diameter; pericarp dry, at length brittle; tubercles angular; aril fleshy, whitish, edible. Conspicuous with spreading branches, compound alternate extipulate leaves, very small white flowers; introduced into gardens; most celebrated native fruit of china; fruit size and form of a large plum [auloochah], with rough, thin, scale-like rind, which, while the fruit is hanging ripe upon the tree, is of a red tinge, but gradually becomes of a dull brown color short time after gathered; pulp of the fruit resembles white of a plover's egg; contains in its centre a stone; in the best fruit the stone is very small. The chinese dry the fruit, when it becomes black like a prune; the pulp has a sub-acid flavor when eaten fresh. Wood red, hard, heavy. Nearly allied to the Rambutan [q.v.] and Longan [q.v.].

LITTLE MOUNT (சின்னமலை - shinnamalai, *Tam.*). As distinguished from St. Thomas' mount which is the Great mount. Village. Chingleput district, Sydapett talook; being a portion of Guindy; lat. 13° 01′; long. 80° 17′; from Fort St. George S.S.W. 6 miles; from St. Thomas' mount E. 2 miles; from Sydapett S.E. ¾ mile; from the sea W. 4 miles. Traditionary site of St. Thomas' martyrdom. There is a cave in a rock and a natural spring. It is asserted that St. Thomas took refuge here from his pursuers. A church is erected over the spot. Two stones below are pointed out as bearing impress of his foot and marks of his knees, while another is said to be stained with his blood. At the foot of the steps leading up to the church is a slab with an inscription in Armenian characters. The spring is said to have been miraculously created to supply the saint with water when attacked by thirst in the cave in which he had taken refuge. The legend regarding this is still current in Syria.

LO (లో - ló, *Tel.*). Within.——*Locoony* (లోకుని - lókuni, Tel.). From (above + kuni, tel. piece of land). Patch of ground within a field, as distinguished from Veloocoony or patch on the side of a field. Used in field measurement [cshetram, pramanam].——*Lodoom* (లోదుము - lodumu, Tel.). Tel. from (lodugu, tel. fallen in). Hollow; natural stream.——*Lona* (లోన - lóna, Tel.). Interior; suffix in place names.——*Lopaly soonkam* (లోపలిసుంకము - lópalisunkamu, Tel.). From (lópala, tel. inside + sunkamu, tel. duty). Import duty.

LOBAUN (لوبان - lobán, *Hind.*). Ar. from (laban, ar. juice). Stands for either Benzoin or Olibanum.

LOBYAH (باقلہ - bákla, *Ar.*; لوبیا - lobiyá, *Pers.*; لوبیا - lobaya, *Hind.*; لوبا - lobá, *Dec.*; ಹುರಳಿಗಿಡ - huraligida, *Can.*; දඹල - dambala, *Singh.*). Title from hindostany [cow gram]. Ar. from (bákil, ar. ground producing herb). Title otherwise French bean, Haricot bean, Kidney bean. Botanically Phaseolus [moodgam] vulgaris, linn., leguminosæ [vricsham, 48]. Alias Phaseolus manus, vulgaris. Sub-glabrous annual; stems low and sub-erect, or twining to a height of 6-10 feet; racemes much shorter than the leaves; pedicels finally ¼-⅓ inch long; bracteoles ovate or roundish, persistent; pod 4-6 inches by ½ inch, glabrous, rostrate, turgid. Bears middle-sized, white flowers; stems low or sub-erect, twining; cultivated in gardens. Green pod and its immature beans are cut up into slices, boiled, and eaten. Two kinds, first runners, second dwarfs which require no sticks for their support. For the different grams see Gram, and for beans see Shimby.——*Country lobyah* (کہرسنبل - kharsambal, Hind.). Title otherwise Country french bean, Country haricot, Duffin bean, Hibbert bean, Lima bean, Scymitar-podded kidney bean, Sugar bean. Botanically Phaseolus [moodgam] lunatus, linn., leguminosæ [vricsham, 48]. Alias Phaseolus maximus. Biennial, usually twining, glabrous or pubescent; leaflets ovate, acuminated; stipules reflexed; racemes shorter than the leaves, the flowering part elongated; pedicels in pairs; bracts narrow, much shorter than the calyx; legumes pendulous, scimitar-shaped, long mucronate, not torulose, two to four-seeded; flowers small greenish; flowering in the cold season. The pods are rather coarse looking and are not eaten; the large, flat, ivory-like [dant] beans are shelled, laid in a pan of cold water and boiled till they are quite soft; they are then exceedingly agreeable, having a mealy roast chestnut-like flavor; not much used however by natives. Six varieties are cultivated for the table.

LOCAM (लोक - lóka, *San.*). From (luk, san. to see). World, sometimes divided into three [trilocam]. Generally means seven upper worlds allotted for the residence of different species of animated beings, including Bhoo locam the earth as the first; Bhoovar locam is the space between the earth and the sun; Swar locam is the heaven of indran [q.v.] between the sun and

the polar star [dhroovam]; Maharlocam, the abode of bhringy and other rishies; during the conflagration of these lower worlds the saints ascend to the next, or Jana locam, the abode of bramha's sons; above this is the Tapolocam, where the deified sages reside; the seventh world Satya locam is the abode of bramha [q.v.], and translation to this world exempts beings from further birth [samsauram]. The seven regions below the earth are called stalam [q.v.]; the habitations of the snake gods, and are named in the order of their talam [q.v.] or descent:—Atalam, Vitalam, Sootalam, Rasautalam, Talautalam, Mahautalam, and Pautaulam. Both the written and popular views regard the inferior worlds as places of punishment, and the superior worlds as ascending in the scale of sanctity and happiness. Sectaries have also invented locams or regions of their own, as:—Veicoontam, the sphere of vishnoo; Golocam, the region of krishnan, &c. [matam].——*Locachundran* (உலோகச்சந்திரன் - ulógaççandiran, Tam.). From (above + chandra, san. the moon). Hindoo 2nd or pers. name [peyar].——*Loca mautah* (लोकमाता - lókamátá, San.). From (above + mátá, san. mother). Saraswaty [q.v.].——*Locan* (உலோகன் - ulógan, Tam.). Short for any of the compounds. Hindoo 2nd or pers. name [peyar].——*Locanautan* (உலோகநாதன் - ulóganáthan, Tam.). From (above + nát'ha, san. lord); epithet of any of the superior gods, shiva [q.v.], krishnan [q.v.], vishnoo [q.v.], &c. Hindoo 2nd or pers. name [peyar].——*Loca paulacan* (लोकपालक - lókapálaka, San.). From (above + pálaka, san. protector). Sovereign. Also any one of the eight regent deities of the quarter [ashtadic paulacan].——*Locaulocam* (लोकालोक - lókálóka, San.). Means visible and not visible; world and not world. The mountain range encircling the world and separating it from the non-world. In the Shiva tantram it is said that the gods had their play-ground at the foot of the Locaulocam mountain. The Mahomedans have a mountain in their legends, called Koh kauf [q.v.], a girdle of stone surrounding the world.——*Locauyatam* (लोकयत - lókáyata, San.). From (above + áyata, san. extended); world-extending or material. The system of atheistical philosophy [chaurvaucan, samayam, shastram].——*Locayyan* (உலோகய்யன் - ulógayyan, Tam.). From (above + aiyyan, tam. master, titular affix). Hindoo 2nd or pers. name [peyar].——*Log* (لوگ - log, Hind.). From (lóka, san. world). People. Suffix in compounds; as Sahib log, meaning master + people, gentle folk.——*Lowkica* (लौकिक - laukika, San.). From (lóka, san. world). Secular, as opposed to Veidica or priestly.

LOCMAUN (لقمان - lokmán, *Hind.*). Arabian author of fables, the Æsop of the east.

LOCUST TREE (خرنوب - khurnúb, *Hind.*). Same as Carob.

LODH (लोध्र - lódhra, *San.*; لودھ - lodh, *Hind.*; عبیر کا جھاڑ - abírkájhár, *Dec.*; ಬಲಲೊಡ್ಡಿ - balaloddi, *Can.*; లొద్దుగ - lodduga, *Tel.*; പാച്ചോറ്റി - páççótti, *Mal.*; ලොත්සුඹුල - lotsumbula, *Singh.*). Title from hindostany. San. from (rudhira, san. red); from red dye. Hind. from sanscrit. Dec. from (abír, hind. red powder used in hóli festival + jhár, hind. tree); from being made of this bark. Can. from (bala, can. strong + loddi, can. the tree). Tel. from sanscrit. Mal. from (pál, mal. milk + chori, mal. to shed) [pauchonty]. San. also (shábara), meaning pertaining to shabaras; (shrímat), meaning propitious; (tilaka), meaning caste mark, as being used for it. Can. also (loddi). Tel. also (erralodduga), meaning red + the tree. Title otherwise Californian cinchona, China nora, Lotur bark. Botanically Symplocos racemosa, roxb., styraceæ [vricsham, 84]. Alias Symplocos hamiltoniana, theæfolia. Tree, 10–12 feet; leaves oblong-lanceolate, acuminate, acute at the base, quite glabrous sub-denticulate, shining above; racemes simple, axillary, nearly equalling the petiole, hairy; sepals and bracteoles ovate, obtuse, ciliated; ovary free at the apex; flowers small, yellow. The bark is very soft and friable, of a light fawn color; the external surface corky and much fissured transversely; the internal of a lighter color and fibrous texture; on making a transverse section a middle layer of a red color is seen between the corky and fibrous portions; microscopic examination shows that the colored layer is chiefly composed of oblong cells containing red coloring matter; the inner layer of the bark consists almost entirely of woody fibre; the taste is faintly balsamic and astringent. Bark medicinally cooling, astringent, like cinchona [koinah]; decoction of wood used as gargle. Bark gives a red dye [shauyam]; ashes used as mordant [cauram]. Wood small, white or yellowish, hard and durable, suitable for turnery. Other common species are:—acuminata, anamallayana, ferruginea, foliosa, gardneriana, macrophylla, microphylla, monantha, nervosa, obtusa, oligandra, pendula, pulchra, rosea, spicata.

LOMAM (लोम - lóma, *San.*). Later form of romam [q.v.]. From (ruh, san. to grow). Short hair on the body of men and animals; less properly applied to long hair of head [kesham] and beard or to that on the mane [kesharam] or tail of animals. Braided hair is Vainy [q.v.]; clotted or matted hair is Jatay [q.v.]. For hair of animals or wool see Pushm. Cf. Anooloma.——*Lomree* (किखि - kikhi, San.; खोकड - khókada, Mahr.; ثعلب - salab, Ar.; روباه - rúbáh, Pers.; لونبڑی - lonbrí, Hind.; لومڑی - lomrí, Dec.; ಚನ್ನಂಗಿನರಿ - channanginari, Can.; గుంటనక్క - gunta-nakka, Tel.; କୋଙ୍କିବିଲୁଵ - konkibilluva, Oor.; കുറുനരി - kurunari, Mal.; වල්නා - valná, Singh.; குழிநரி - kuzhinari, Tam.). Title from deccany. Ar. from (salaba, ar. cowardly). Hind. from (lómasha, san. fox). Dec. from hindostany. Can. from (channa, can. red + anga, can. body + nari, can. jackal). Tel. from (gunta, tel. hole + nakka, tel. jackal). Mal. from (kuru, mal. small + nari, mal. jackal). Tam. from (kuzhi, tam. hole + nari, tam. jackal). Ar. also (abulhusain), meaning father of the inaccessible; (abulhiyal), meaning father of stratagems. Can. also (konk); (kempunari), meaning red + jackal. Tel. also (pottinakka), meaning short + jackal; (konkanakka), meaning timid + jackal. Tam. also (kullanari), meaning short + jackal. Title otherwise Fox. Vulpes bengalensis, canidæ [cookooram], digitigrada, carnivora, mammalia [sastanam, 12], of naturalists [jantoo]. Alias Canis bengalensis, kokree, rufescens; Cynalopex bengalensis; Vulpes hodgson, indicus. Kokree from mahratta. The Indian fox is reddish gray, rufous on the legs, muzzle, reddish white beneath; ears long, dark brown externally; tail long, bushy with a broad black tip; muzzle very acute; chin and throat whitish. Rare in the forest, abundant in open country. It burrows in the open plains. Coursed with grey hounds. It runs with great speed, doubling like a hare [mosal]; but instead of stretching out at first like that animal and trusting to its turns as a last resource, it turns more at first and if it can fatigue the dogs [nye], it then goes straight away. Its numerous earths in this country prevent its being hunted with fox hounds, and the scent is poor. See Jackal. Indian species not here found are:—Ferrilatus or thibetan grey fox, Alopex or persian fox, Leucopus or desert fox, Canna or hoary fox.

LONGAN (لونگن - longan, *Malay*; ಮಲಹಕೊಟ - malahakota, *Can.*; මොර - mora, *Singh.*; பூவத்தி - púvatti, *Tam.*). Title from malay. Tam. from (pú, tam. flower + atti, tam. fig tree, ficus). Tam. also (pirappinmaram). Title otherwise Dragon's-eye. Botanically Nephelium longana, camb., sapindaceæ [vricsham, 43]. Specific name from malay. Alias Dimocarpus longan; Euphorbia longana; Scytale longana; Scytalia longana. Leaflets two to four pair, entire, somewhat glaucous beneath; panicles lax, terminal; calyx deeply five-partite; petals five, narrow-oblong, hairy, without a scale; stamens hairy; ovary two to three-lobed; stigmas two to three, linear; berries usually solitary or in pairs, rarely three, globose, slightly scabrous; flowers white; flowering in february and march. Handsome tree, similar to litchy [q.v.], but smaller; fruit the size and form of a marble, of a russet color, and borne in bunches like grapes [angoor]; fruit smaller than litchy; pulp edible, resembles that of litchy in flavor, but vapid and inferior. Wood hard and close-grained.

LONG CLOTH (گاڑھا - gárhá, *Hind.*; ಪರಕಾಲಿ - parakáli, *Can.*; పరకాల - parakálá, *Tel.*; കുപ്പായശീല - kuppáyashshíla, *Mal.*; சட்டைத்துணி - shattaittuni, *Tam.*). Hind. means thick as opposed to mull [q.v.] which is thin. Can. from (paraka, can. fine + ele, can. thread). Tel. from canarese. Mal. from (kuppáyam, mal. coat + shíla, mal. cloth). Tam. from (shattai, tam. coat + tuni, tam. cloth). Tam. also (shattaiççámbu), coat + piece. Anglo-indian name for Lancashire white cotton [q.v.] shirtings, because it is made of length unusual in India; cloth for native use being ordinarily made in pieces sufficient only to clothe one person [poonjam].

LONGSHORE WIND (దక్షిణపుగాలి - dakshinapugáli, *Tel.*; தென்றல் - tenral, *Tam.*). Tel. from (dakshina, san. south + gáli, tel. wind). Tam. means south wind. Damp wind that blows on the Coromandel coast [q.v.], July to September, from the south [land wind, monsoon, tennal]. See vol. II, 5.

LONTAR (لونتر - lontar, *Malay*). Same as Palmyra.

LOO (लु - lu, *San.*). To cut.——*Lavaly* (लवली - lavalí, San.). From (lu, san. to cut); from sour taste of fruit. Botanically the Averrhoa genus, geraniaceæ [vricsham, 31]. Small trees cultivated throughout india; leaves evergreen, alternate, pinnate; flowers small, purplish, in racemes; fruit is like a gherkin in shape, very acid, but pleasant when made into syrup, candied, or pickled; leaves are slightly sensitive. The species best known to the natives are:—bilimbi [blimbing], carambola [coromandel gooseberry].——*Lavan* (लव - lava, San.). From (lú, san. to cut). The younger of the twin sons of Rama [q.v.] by Seetay [q.v.]. The elder was Cooshan [q.v.].——*Lavangam* (लवङ्ग - lavanga, San.). See sep. title.——*Loham* (लोह - lóha, San. and Mahr.; حديد - hadíd, Ar.; آهن - áhan, Pers.; لوہا - lohá, Hind.; ಲೋಹ - lóha, Can.; لہوا - lhauvá, Dec.; لابرن - láburan, Malay; ലോഹം - lóham, Mal.; ಲೋಹಾ - lóhá, Too.; లోహము - lóhamu, Tel.; ලෝහ - lóha, Singh.; உலோகம் - ulógam, Tam.). San. from (lú, san. to cut + há, san. to avoid), not easily cut. Ar. from (hadda, ar. to hinder); from its resistance. Malay from (labur, malay, to melt); thing melted. Metal, one form of minerals [dhautoo]. Cf. Col and Pon. The following are all the south indian metals:—Antimony [soorma], Brass

[pittalay], Calamine [madaltoottam], Chromium [cooroom], Copper [taumram], Gold [pon], Iron [auhan], Lead [eeyam], Manganese [q.v.], Mercury [rasam], Pinchbeck [tambauk], Platinum [goorootwam], Pyrites [teecull], Silver [velly], Steel [wootz], Tin [tagaram], Zinc [tootnaug]. Simple metals are the following:—Copper, Gold, Iron, Lead, Mercury, Platinum, Silver, Tin, Zinc. Note that carbon [kary] and sulphur [gandhac] are non-metallic substances. Water vessels or lotahs [q.v.], dishes, bowls, candlesticks, images of the gods [vigraham], temple bells, sacrificial spoons, censers, and other sacred and domestic utensils in brass and copper are made all over the country, and of the same patterns as are found in representations on the oldest Booddhist [booddha] sculptures [staupatyam] and cave-paintings. These metal vessels in a native Indian household supply the place of the porcelain [kaolin], glass [cunnaudy] and silver plate in a European family. Hindoos use brass vessels, and Mahomedans copper, except for drinking-cups, which are generally of silver. The metal work of Madura and Tanjore is the finest in India. In its bold forms and elaborately inwrought ornamentation the latter recalls the descriptions by Homer of the work of the artists of Sidon. Some designs are simply etched, and others deeply cut in mythological designs, and others are diapered all over with crustæ of the leaf pattern seen in Assyrian sculptures, copper on brass, or silver on copper, producing an effect often of quite regal grandeur. The temple bells of Southern india are distinguished by their stately architectural forms. The handles are generally crowned with a group of the Pooraunic gods, sculptured in full relief. The sacrificial vases also are often very beautifully designed and wrought. See vol. II, 29.——*Lohauro* (لوهار - lohár, Hind.; లోహారొ - loháro, Tel.). From (lóha, san. metal). The corresponding terms are:—Tam. collan, Tel. cummara. Ironsmith caste among the Ooriyas.——*Loniyah* (لونيا - loniyá, Hind.). Means cutting; from acidity. Same as Indian purslane.

LOOCSAUN (نقصان - nuksán, *Hind.*). From (nuks, ar. defect). Loss.

LOOT (لوٹ - lút, *Hind.*). From (lut'h, san. to plunder). Plundering. Also the booty carried away.——*Lootcher* (لچا - luççá, Hind.). A libertine. A common term of abuse.

LOQUAT (لوکاٹ - lakotá, *Hind.*; ಲಕ್ಕೊಟೆಗಿಡ - lakkotegida, *Can.*; நோக்கட்டாமரம் - nókkattámaram, *Tam.*). Title from chinese through hindostany. Title otherwise Japan medlar. Botanically Eriobotrya japonica, lindl., rosaceæ [vricsham, 49]. Alias Mespilus japonica. Branchlets as thick as the little finger; leaves 6-8 by 1½-3 inches, thick and stiffly coriaceous; base obtuse or narrowed into the very short stout woolly petiole; nerves twelve to fifteen very prominent beneath; panicles 3-6 inches long and broad; branches very stout; flowers ½ inch diameter, crowded, fragrant; calyx-tube short; lobes ovate, sub-acute; petals broadly ovate; fruit 1-1½ inch long, rather narrower, yellow, rarely as many as five-seeded. Tree of apple [seb] class; introduced from china; cultivated for fruit; handsome foliage and large leaves; flower smallish white, fragrant; fruit grows in clusters, small, yellow, 1-1½ inches long, thin skin, luscious pulp, and brown seeds; resembles a very small pear [amrood]; no distinct varieties, but great difference in fruits from different trees; esteemed for desserts and preserves.

LORY (نوری - nuri, *Malay*; பச்சைக்கிளி - paççaikkili, *Tam.*). Title corrupted from the malay. Malay from (núr, hind. light) [noor]; shining. Tam. from (paççai, tam. green + kili, tam. parrot). Brilliantly-colored variety of parrot found in the Moluccas. Loriinæ, psittacidæ [keeram], scansores, incessores, aves [pacshy, 12], of naturalists [jantoo]. Bill compressed, small or moderate, slightly curved; lower mandible much longer than high; tongue in most is furnished with a protrusile tuft of elongated papillæ, enabling them to draw the nectar from flowers, which with soft fruits constitutes their sole food; they appear to have a delicate sense of taste. ——*Lorikeet* (بهورا - bhorá, Hind.; ಪಂಚವರ್ಣಗಿಣಿ - pancha-varnagini, Can.; പഞ്ചവര്‍ണ്ണക്കിളി - pañchavarnnakkili, Mal.; பஞ்சவன்னக்கிளி - pañjavannakkili, Tam.). Title means small lory. Can. means five-colored parrot. Mal. and tam. from (pañcha, san. five + varna, san. color + kili, tam. parrot). Hind. also (latkan), meaning pendent; from sleeping head downwards suspended by claws. Title otherwise Love-bird. Loriculus vernalis, loriinæ [lory], psittacidæ [keeram], scansores, insessores [pacshy, 12], of naturalists. Alias Psittacus pendulus. Above grass-green, darker on wing-coverts and scapulars; paler and yellowish beneath wings and tail blue-green; rump and upper tail-coverts dull deep red; wings and tail beneath pale-bluish; chin and throat in the male tinged with verdigris-blue; bill dark-yellow, irides pale-yellow; feet leaden; w. coast, found in small flocks; keeps up continual chirping when feeding, which it does on fruit and flower-buds; fond of toddy [q.v.] of cocoanut [q.v.] palm and sometimes taken stupified at toddy-pots; occasionally caged, become very tame, sleeping with head downwards.

LOTAH (لوٹا - lotá, *Hind.*). Small spheroidal brass [pittalay] pot [chatty], which the natives of all classes use for drinking and sometimes for cooking.

LOTUS (لوٹس - lotas, *Hind.*). Greek λωτός. Originally egyptain term for the nile water-lily, a nelumbium or nymphæa [nelumbo, indian water-lily]; the former has edible pith and root, the latter has edible pod. Sacred plant there as here. The lotus of the lotophagi in Homer's odyssey, otherwise the cyrenean lotus, was a north african shrub of the nature of zizyphus jujuba, lam. [bair]; also called in arabic the fruit of paradise. The plant has also been ascribed to Celtis australis, linn. [indian nettle], and Diospyros [indian ebony] lotus, linn. For Hill lotus see China root; for Black lotus see Makhanah.

LOUSE BERRY (பேன்கொட்டை - péngottai, *Tam.*). Title from use of powdered berries in destroying lice in hair. Same as Indian berry.

LOVEDALE (ಮಂಜನಕೊರೈ - manjanakorai, *Can.*). From (manju, can. dew + korai, can. small shola). Hill, Station; Neilgherry district, Merkoonaud division; lat. 11° 22'; long. 76° 44'; height 7,330 feet; from Coonoor W.N.W. 7 miles; from Ootacamund S. 2 miles. The Lawrence asylum is situated here.

LOVI-LOVI (ලොවිලොවි - lovilovi, *Singh.*). Tomi tomi.

LOWH (لوح - lauh, *Ar.*). From (láha, ar. to shine). A light which appears to angels showing them the things they are commanded to do.

LUBBAY (لبے - labbe, obl. *Hind.*; లబ్బి - labbí, *Tel.*; இலப்பை - ilappai, *Tam.*). Dravidian corruption of (arabí) [choliya]. A race, Mussalmans in creed, but speaking Tamul. Supposed to be, like the Moplahs [q.v.] of the West coast, the descendants of Arab immigrants by intermarriage with native women. They are found in large numbers on the eastern coast, chiefly between Poolicat on the north and Negapatam on the south, their head-quarters being at Nagore near Negapatam, the burial-place of their patron saint Nagore meeraun sahib [cawderwally], to whose shrine numerous pilgrimages are made by the tribe. Physically they are good-looking, tall, well-made, robust, sometimes inclined to obesity, of light complexion and with well-developed limbs, not unlike the Moplah in their general configuration. The cranium is singularly and strikingly small; the eyes are slightly oblique, and not wanting in expression; cheek-bones prominent; lower jaw large and heavy; beard in some instances full and long, but in most cases decidedly spare. They generally wear the loonghee [q.v.], a cloth loosely wrapped round the waist and extending below the knees; they also wear bright-colored jackets, occasionally turbans [puggry]; the most frequent head-gear being a skull-cap, fitting closely to a shaved head. They live freely on animals and vegetables, making use of all kinds of flesh meats, saving pork for which Mahomedans have a religious abhorrence. They are exceedingly industrious and enterprising in their habits and pursuits, there being hardly a trade or calling in which they do not succeed. They make persevering fishermen and good boatmen. They are lapidaries, weavers, dyers, matmakers, jewellers, gardeners, bazaar men, grocers, boatmakers, boat and ship owners, and merchants, and as regards the leather [chamrah] and horn [sing] trade they excel as merchants. There are few classes of natives in Southern india, who, in energy, industry, and perseverance, can compete with the Lubbay. They have translated the Koran [q.v.] into Tamul. In Travancore they are called Maittan and Jonacan [q.v.]; the former word meaning a convert. They belong chiefly to the Soonnee [q.v.] sect. By the Mussalmans they are looked down upon. There are some 30,000 in presidency [jonangy]. See vol. I (37), 493; II, 233.

LUFFA (لف - laff, *Ar.*; பீர்க்கு - pírkku, *Tam.*). Ar. from (laffa, ar. to involve); from reticulate fruit. Tam. from (pír, tam. pale green). Botanically the Luffa genus, cucurbitaceæ [vricsham, 62]. Climbing gourd; pepo is ovate and oblong, fibrous within, containing many compressed seeds; natives of tropical asia and africa. The species best known to the natives are shown below.——*Bitter luffa* (कोशातकी - kóshátakí, San.; राणतुरई - ránaturaí, Mahr.; नागताळि - nágatáli, Conc.; کڑوی ترائی - karvíturáí, Hind. and Dec.; ಕಹಿಹೀರೆ - kahihíre, Can.; చేదుబీర - chédubíra, Tel.; കൊട്ടപ്പീരകം - kottappírakam, Mal.; பேய்ப்பீர்க்கு - péyppírkku, Tam.). Title from taste of fruit. San. from (kósha, san. sheath, cocoon + at, san. to go); from disposition of seeds in the fibrous fruit. Mahr. from (rána, mahr. wild. + turaí, mahr. the plant). Hind. from (karví, hind. bitter + turáí, hind. luffa acutangula, roxb.). Can. from (kahi, can. bitter + híre, can. the creeper). Tel. from (chédu, tel. bitterness + bíra, tel. the plant, luffa acutangula, rox.). Mal. from (kotta, mal. seed + pírakam, mal. the plant, luffa acutangula, roxb.). Tam. from (péy, tam. devil + pírkku, mal. the plant). San. also (jáliní), meaning having a net; from reticulate fruit; (raktakóshátakí), meaning red + the plant; (katukí), meaning pungent; (dálika), meaning bursting; (ghóshaka), meaning noisy, alluding to the rattling sound of seeds in dry fruits. Hind. also (bindál); (karelá), meaning momordica charantia, linn. [carolah]. Can. also (nágadálíballi), meaning prickly-pear creeper. Tel. also (adavibíra), meaning jungle + luffa acutangula, rox.; (chétibíra), meaning bitter + luffa acutangula, rox.; (verribíra), meaning mad + the plant, luffa acutangula, rox. Title otherwise Bindaul luffa, Net fruit, Wild luffa. Botanically Luffa acutangula, roxb., var. amara, roxb., cucurbitaceæ [vricsham, 62]. Alias Cucumis acutangulus;

operculata; Luffa amara, bindaal, plukenetiana. Bindaal from hindostany. Climbing; stems slender; leaves a little scabrous, roundish-cordate, slightly five to seven-lobed; calyx five-toothed; petals five, distinct; male racemes long peduncled; fruit oblong, tapering towards each end, acutely ten-angled; seeds blackish grey, marked with elevated minute black dots; margin turned, two-lobed at the base; flowers large, yellow, flowering in rainy season; bitter in every part; hedges and dry uncultivated places. Fruit violently carthartic and emetic; juice of the young roasted fruit applied to cure headache; seeds in substance or infusion, used as an emeto-cathartic; quoted in pharm., non-officinal. Chebeera [q.v.] also is called Bitter luffa.——*Common luffa* (झिङ्गाक - jhingáka, San.; घोसाळी - ghósálí, Mahr.; घोसाळे - ghósálé, Conc.; خیار - khiyár, Pers.; تُرئی - turáí, Hind. and Dec.; جنجی - jinjí, Malay; ಹೀರೆ - híre, Can.; ಪೀರೆ - píre, Too.; బీర - bíra, Tel.; ଝହ୍ନି - janhi, Oor.; പീച്ചകം - píççakam, Mal.; වටකොළු - vatakolu, Singh.; பீர்க்கு - pírkku, Tam.). San. from rattling fruit when dry. Mal. from (piççu, mal. bile + akam, mal. inside). Tam. from (pír, tam. pale green). San. also (damargava); (jhinginí); (jhingí). Mahr. also (jinga). Hind. also (jinga), from mahratta. Can. also (kádukahihíre), meaning jungle + bitter + the creeper. Mal. also (cherupírakam), meaning small + the plant. Singh. also (dáravatakolu). Tam. also (karukkuppírkku), meaning rough edge + the plant, luffa; from four-edged form of fruit; (píram); (pír); (shálini), domestic plant. Title otherwise Gourd plant, Marvellous apple, Strainer vine. Botanically Luffa acutangula, roxb., cucurbitaceæ [vricsham, 62]. Alias Cucurbita acutangulus; Luffa fœtida. Climbing; stems glabrous; leaves five-angled or five-lobed; male racemes long peduncled; stamens distinct; calyx segments of the female flowers covered with glands; fruit, about 1 foot long and 2–3 inches thick, clavate, obtuse, or shortly pointed, tolerably smooth, ten-angled, the angles sharp and smooth; seeds black irregularly pitted, two-lobed at the base; flowers large, yellow, flowering nearly all year. Seeds purgative and emetic; half-grown fruit is excellent vegetable, much used in curries [q.v.]; pickled, boiled, and dressed with butter, pepper [q.v.] and salt [ooppoo] is little inferior to green peas [calauyam]; oil from seed.——*Oil-giving luffa* (राजकोषातकी - rájakóshátakí, San.; घोसाळी - ghóusálí, Mahr.; لفا - laff, Ar.; خیار - khiyár, Pers.; گھی ترائی - ghíturáí, Dec.; ತುಪ್ಪದಹೀರೆ - tuppadahíre, Can.; నేతిబీర - nétibíra, Tel.; കാട്ടുപീരകം - káttupírakam, Mal.; நுரைப்பீர்க்கு - nuraippírkku, Tam.). San. from (rája, san. radiant + kóshátakí, san. luffa acutangula, roxb., var. amara, roxb.); from whitish color of fruit. Ar. from (laffa, ar. to involve). Dec. from (ghí, hind. ghee + turáí, hind. luffa acutangula, roxb.), from oil-giving properties. Can. from (tuppa, can. ghee + híre, can. the plant). Tel. from (neyyi, tel. ghee + bíra, tel. luffa acutangula, roxb.). Mal. from (kátu, mal. forest + pírakam, mal. luffa acutangula, roxb.). Tam. from (nurai, tam. butter + pírkku, tam. the plant); from whitish fruit. San. also (dírghapatólìká), meaning long + luffa acutangula, roxb. Tel. also (guttibíra), meaning cluster + luffa acutangula, roxb.; (núnebíra), meaning oil + luffa acutangula, roxb. Tam. also (párbírkku), meaning white + the plant. Title otherwise Long luffa, Towel gourd, Washing gourd. Botanically Luffa ægyptiaca, müller, cucurbitaceæ [vricsham, 62]. Alias Luffa pentandra, racemosa. Extensively climbing hairy; tendrils two to three fid; leaves 4 inches diameter, reniform-orbicular, five-angled or somewhat five-lobed, dentate, usually scabrous, punctate on both surfaces, pubescent on the nerves beneath; petiole 2 inches; male peduncle 6 inches, flowers often approximate near the summit; pedicels short, each carrying a small ovate viscid entire bract sometimes obsolete; petals five, ¾–1 inch, yellow, often with elevated hairy green veins; stamens five; female flower solitary, peduncle 1–3 inches; fruit 5–12 inches; seeds ⅜ by ¼ inch, usually black, very narrowly winged, smooth or very sparingly tubercled. Flower large, yellow; oblong fruit thickening at the lower end and without ridges. Seeds used as cooling medicine. Commonly used in curry [q.v.]. Gives an oil; ashes used as mordant [cauram].——*Snake luffa* (देवदाली - dévadálí, San.; పాముబీర - pámubíra, Tel.; நுரைப்பீர்க்கு - nuraippírkku, Tam.). Title from use as an antidote. San. means divine luffa, from medicinal property. Tel. from (pámu, tel. snake + bíra, tel. luffa acutangula, roxb.). Tam. from (nurai, tam. butter + pírkku, tam. the plant), from whitish fruit. San. also (ákhuvishahá), meaning rat-poison-destroying. Tam. also (péyppírkku), meaning devil + the plant. Botanically Luffa echinata, r., cucurbitaceæ [vricsham, 62]. Stems herbaceous, scandent, five-sided, slightly hairy; tendrils two-cleft; leaves generally five-lobed, somewhat hairy, margins scallop-toothed; petioles as long as the leaves, ribbed; fruit oval, the size of a nutmeg [jautikye], armed with numerous long, rather soft, diverging bristles, obscurely divided into three cells by a network of dry fibres, and opening at the top with a perforated stopple, which falls off when the seeds are ripe; seeds about eighteen, ovate, compressed, black and scabrous; testa very hard; kernel white; the fibrous substance in which the seeds are enclosed is intensely bitter. Pulp of fruit a frequent ingredient in the compound decoctions which are prescribed for bilious fevers; and given in snake bite. Fruit an abortifacient.

LUGHAEE (لگهائی - lagháí, Hind.). Thug who buries victim.

LUKDY (काष्ठ - kásht'ha, San.; لکڑی - lakrí, Hind.; ಕಟ್ಟಿಗೆ - kattige, Can.; కట్టె - katte, Tel.; മുട്ടി - mutti, Mal.; கட்டை - kattai, Tam.).—"*a*" Firewood. The indigenous fuel-producing trees are too numerous to mention. In the plains of the southern districts, the introduced Casuarina equisetifolia, forst. [chowkmaram], is the best. On Neilgherry hills the Australian eucalyptus globulus, labill. [blue gum], has produced astonishing results. The two Australian acacias, Acacia melanoxylon, r. br. [australian blackwood], and Acacia dealbata, link., are also both useful, and of quick growth.—"*b*" Plant second term. Ex., where transl. is of first term:—Acorus calamus (gankílakrí), scent; Dalbergia latifolia (kálílakrí), black; Glycirrhiza glabra (míthílakrí), sweet; Holarrhena antidysenterica (dúdhíkílakrí), milk; Tetranthera laurifolia (maidálakrí), flour; Tetranthera monopetala (maidálakrí), flour. See gloss. paragraphs.

LUMBANG NUT (अक्षोट - akshóta, San.; अक्रोड - akhóda, Mahr.; شجرجوز بری - shajarijauzibarrí, Ar.; درخت چهار مغز هندی - darakhtichahármaghzihindí, Pers.; هندی اخروٹ کا پیڑ - hindíakhrotkáper, Hind.; جنگلی اکروٹ کا جهار - janglíakrotkájhár, Dec.; ನಾಟುಅಕ್ರೋಡು - nátuakródu, Can.; నాటుఅక్రోటు - nátuakrótu, Tel.; കാരങ്കോലം - kárankólam, Mal.; කකුණ - kakuna, Singh.; நாட்டக்கரோட்டு - náttakkaróttu, Tam.). Title from malay. San. from (aksh, san. to pervade), from spreading roots. Mahr. from sanscrit. Ar. from (shajar, ar. tree + jauz, ar. walnut + barr, ar. forest). Pers. from (darakht, pers. tree + chahár, four + maghz, pers. kernel + hindí, pers. indian). Hind. from (hindí, pers. indian + akhrot, pers. walnut + per, hind. tree). Dec. from (janglí, hind. forest + akrot, hind. walnut + jhár, hind. tree). Can. from (nádu, can. country + akhrot, pers. walnut). Tel. like canarese. Mal. from (kár, mal. black + ankólam, mal. alangy tree, alangium lamarckii, thw.). Tam. like canarese. Ar. also (khasafihindí). Pers. also (girdagán), meaning round thing [acroot]. Hind. also (hijlíbádam), meaning cashew nut; (akóla) [alanjy]. Tel. also (úduga), meaning serviceable tree. Mal. also (akrótt); corruption of (akshóta). Title otherwise Belgaum walnut, Bencoolen nut, Bengal walnut, Candle nut, Country walnut, Indian walnut, Kekui-oil plant, Kekune-oil plant, Molucca nut, Otaheite walnut. Botanically Aleurites triloba, forst., euphorbiaceæ [vricsham, 118]. Alias Aleurites moluccana; Camirium cordifolium; Jatropha moluccana; Juglans camirium. Large tree; leaves petioled, very large, cordate, with entire or scalloped margins, three to five-lobed; panicles terminal; small white flowers succeeded by sub-globose, fleshy, smooth, olive-colored fruit containing hard seeds, rich in oil and with a furrowed testa, resembling a walnut [acroot]. Oil from kernels a mild purgative. In pharm. non-officinal, like castor [aumanac] oil. Kernels eatable, tasting like fresh walnuts. An oil cake for cattle and manure. Oil used for food and for burning. The nuts themselves burn like a candle. Timber of no value. The ordinary walnut is Juglans regia, linn. [acroot].

LUMBAUDY (لمباڑا - lambárá, Hind.; లంబాడి - lambádi, Tel. and Tam.). From (lampata, san. greedy). A tribe who wander about as gypsies. Their occupation is grain-carrying. They speak a dialect of Hindostany [q.v.]. Closely resembling Brinjarries [q.v.] and Soogaulies [q.v.]. About 20,000 in presidency [jauty]. See vol. I (69), 195; II, 113.

LUNGAR (لنگر - langar, Hind.). From persian. Alms; also an anchor.——*Lungarbaudy* (لنگرواڑی - langarwárí, Hind.). An anchorage.——*Lungar curts* (لنگر خرچ - langarkharch, Hind.). From (above + kharch, pers. expense). A dole.——*Lungarkhana* (لنگر خانه - langarkhánah, Hind.). From (above + khánah, pers. house). A poor-house, where some reside and to others food is dispensed [inam].

LUNKA (लङ्का - lanká, San.; లంక - lanka, Tel.; இலங்கை - ilangai, Tam.). From (ilangu, tam. to shine). One of the four cities supposed in sanscrit science to lie under the equator [niracsham] at 90° distance from each other, viz., Yavacoty, Lunka, Romacam, and Siddhapoory. Lunka is considered by all Indian astronomers to give the first meridian [raikhay], to which all computations should be referred; though several and particularly Teloogoo astronomers refer instead to Rameshwaram. Towards the north, and under the same meridian as Lunka, the shastrams [q.v.] state that there are two other cities and a great mountain; viz., Avanty supposed to be the same as Oojjein, and Sannihita saras, which in former times were the seats of colleges, observatories, and Rohitacam the mountain. The meridian of Lunka lies in 75° 53′ 15″ or 5h 3′ 33″ east of Greenwich; and 73° 33′ or 4h 54′ 12″ east of Paris [jyotisham]. Lunka is also the island of Ceylon [q.v.], where the war between Rama [q.v.] and Ravanan [q.v.] is supposed to have taken place [charitram]. Also an islet in a river. Also a kind of cheroot [q.v.] so called from being made of tobacco [pogauk], grown in islands of Godavery delta [conamoogam].——*Lunkamala* (లంకమల - lankamala, Tel.). From (lanka, san. island + mala, tel. hill); probably from the position between two rivers, pennair and saglair. Range of hills; Cuddapah dist., Budwail, Cuddapah, Sidhout tals.; between lat. 14° 27′ and 14° 43′ and long. 78° 50′ and 79° 05′; from Cuddapah N.N.E. 5 miles. Form a block nearly square, one half being situated in Budwail and the other

in Sidhout talook. Cease about the point where the talooks of Cuddapah, Proddootore, Budwail, and Sidhout meet. Here the Nullamullays commence. Average elevation 2,000 feet. Many old pagodas [q.v.] in the valleys, almost all deserted and in ruins, for the range is haunted by a deadly fever. The only inhabitants are Yanaudies [q.v.]. Two water-falls; Matsyalunka and Saulunka. Trig. station in lat. 14° 39′ 43·05″; long. 78° 57′ 23·44″; height 2,871 feet; from Budwail W.S.W. 12 miles; from Regoolacoonta S. 5 miles.

LUSSOON (रसोनक - rasónaka, *San.*; लसूण - lasúna, *Mahr.*; लसुण - lasuna, *Conc.*; ثوم - súm, *Ar.*; سير - sír, *Pers.*; لہسن - lahsan, *Hind.*; لسن - lassan, *Dec.*; بونگ پتح - buvangputih, *Malay*; ಬೆಳ್ಳುಳ್ಳಿ - bellulli, *Can.*; ಬೊಳ್ಳುಳ್ಳಿ - bollulli, *Too.*; తెల్లగడ్డ - tellagadda, *Tel.*; ଲୋସୋନୋ - losono, *Oor.*; വെള്ളുള്ളി - vellulli, *Mal.*; සුදුලූනු - sudulúnu, *Singh.*; வெள்ளைப்பூண்டு - vellaippúndu, *Tam.*). Title from hindostany. San. from (rasa, san. taste + úna, san. deficient), wanting sourness out of the six tastes in medicine. Mahr. and conc. from sanscrit. Malay from (bavang, malay, an onion + putih, malay, white). Can. from (beli, can. white + ulli, can. garlic). Too. from (bollu, too. silver + ulli, too. garlic). Tel. from (tella, tel. white + gadda, tel. root). Mal. from (vel, mal. white + ulli, mal. onion, allium cepa, linn.). Singh. means white onion. Tam. from (vellai, tam. white + púndu, tam. small plant). San. also (lashuna), meaning eaten; (arishta), meaning harmless [neem, soap-nut tree]; (griñjana), meaning roaring [gaujar, kinnab]; (shvétakanda), meaning white root; (mahaushadha), meaning great remedy. Ar. also (fúm). Tel. also (tellaulli), meaning white + onion, allium cepa, linn.; (vellulli), meaning white + onion; (ellulli), meaning white + onion; (velligadda), meaning white + root. Tam. also (vellaivengáyam), meaning white + onion; (vellulli), meaning white + garlic; (írulli), meaning moisture + garlic; (púndu), meaning small plant. Title otherwise Garlic, Poorman's treacle, White onion. Botanically Allium sativum, linn., liliaceæ [vricsham, 136]. Alias Porrum sativum. Stem 2 feet, unbranched, bearing at the top an umbel of a few whitish flowers, mixed with small bulbs; upper part of stem before flowering rolled into a ring; leaves grass-like, obscurely keeled, not fistulous like those of the onion [piyauz]; three alternate stamens are three-pointed, the middle point bearing the anther; bulb consists of about twelve to fifteen ovate oblong cloves or subordinate bulbs, which are axillary buds of its scales thus developed. Flower small, white; native of sicily, cultivated here; volatile oil obtained by distilling the bruised bulbs, when purified, colorless. Cultivated in black loam; wet; ground prepared in chittray or april for caur [q.v.] and in poorataushy [mausam] or september for pishaunam [q.v.] crop, by ploughing and sheep folding; ground divided into small plots by banks; seed sown two months after; dibbled in; irrigation water let in once a week, while under growth; harvested same as onion [piyauz]; average price 50 imperial seers for 1 rupee. The juice is applied to the ears for deafness and pain; oil from seed is medicinal; oil mixed with vinegar [caudy] is astringent in sore throat, &c.; supposed to prevent the hair turning grey when applied externally; bulb given in confection for rheumatism. In veterinary practice, when made into paste with two-thirds of its weight of wheat [geung] flour, forms a very powerful blister which should be removed fifteen minutes after application; the part to be blistered should be shaved. As food, garlic promotes digestion; forms constant ingredient in curries. The onion is Allium cepa, linn. [piyauz].

LUTCHAH (لچها - laççhá, *Hind.*). A necklace, having a semi-lunar ornament in the centre [zewar]. Same as Hindoo talee [q.v.].

M (म - ma, मा - má, *San.*; م - mím, *Ar.* and *Hind.*; மா - má, *Tam.*). San. short, name of the fourth note of the musical scale [swara graumam]. San. short symbol of bramha [q.v.], shiva [q.v.], and vishnoo [q.v.] combined. San. long, name of lutchmy [q.v.]. Adverbial prefix used with Arabic verbs to denote place; as in musjid, meaning place of prostration. Also a suffix denoting feminine gender; as in begum, meaning beg + feminine suffix. Hind. numerically 40. Countersignature of diwaun [q.v.] under moghul [q.v.] government on imperial grants of revenue. Sunday. Contraction of the first Mahomedan month [maheena]. Tam. long, the fraction $\frac{1}{20}$ [mah]. ——*Maumandore* (மாமண்டூர் - mámandúr, Tam.). From (má, san. lakshmí, the goddess + vindu, tam. vishnu + úr, tam. village). Sanscrit name (lakshmínarasimhapura), because founded by lutchmy narsimha iyer. Also (lakshmínáráyanapura), meaning lutchmy + vishnoo, the mover on the waters + town. Village; North arcot dist., Arcot tal.; pop. 1,942; acres 1,536; lat. 12° 45′; long. 79° 43′; from Arcot E.S.E. 25 miles; from Chittore S.E. 50 miles. Rock-cutting similar to those in Puncha pandava mullay. Caves now used as cattle-pens. Large tank [q.v.] exceeding Cauverypauk, supply lasting fifteen months. Below bund [q.v.] are kistvaens [paundicoozhy] of flat boulders evidently not quarried. On verge of tank, and within Doosy village, is large rock with inscription in Tamul [q.v.] and Grantam [q.v.]. Vencataudry naidoo, Poligar [q.v.] of Calastry, named the tank Chennasamoodram after his father Chennappa naidoo. When granting the English a settlement at Madras, he similarly stipulated that that town should be called Chennappa putnam [madras]. Trig. station in lat. 12° 44′ 40·27″; long. 79° 42′ 27·20″; height 431 feet; from Arcot E.S.E. 25 miles; from Narsamungalam N.W. ½ mile.

MA (ما - má, *Ar.*). That which.——*Mashallah* (ماشاالله - másháallah, Hind.). From (above + shá, ar. pleased + alláh, ar. god). Expression of admiration.

MAABAR (معبر - mabar, *Hind.*). From (ubr, ar. to cross). Means the place of crossing over, that is from Madura to Ceylon, but applies to the whole coast of Madura north from Rameshwaram. Not to be confounded with Malabar. Friar jordanus, the Quilon bishop of the fourteenth century, in the following passage clearly distinguishes between these two words:—"In this Greater india [q.v.] are twelve idolatrous "kings, and more. For there is one very powerful king in the "country where pepper [q.v.] grows, and his kingdom is called "Molebar. There is also the king of Singuyli and the king "of Columbum, the king of which is called Lingua, but his "kingdom Mohebar. There is also the king of Molephatam, "whose kingdom is called Molepoor, where pearls [moty] are "taken in infinite quantities." The very powerful king is the Zamorin [q.v.]. Molebar is Malabar. Singuyli may be Cauyancollam, an old port a few miles north of Quilon and formerly a small kingdom. Columbum is Quilon. Lingua is perhaps a name derived from the Lingayet religion. Mohebar is Maabar. Molephatam and Molepoor are probably near Cauyal [charitram]. See vol. I (12).

MAAD (معاد - maád, *Hind.*). From (maada, ar. to travel). The doctrine of return to God [allah] or the conception of future existence. The belief of the Mahomedans in general is that the soul when freed from the body will exist as a self-conscious entity, and that pleasure and pain in a future existence will depend on the use or misuse of a man's powers [mabdah] here. Compare Carmam and Samsauram of the Hindoos.

MABDAH (مبدا - mabdá, *Hind.*). From (bida, ar. to produce something new). The doctrine of origin or the coming from God [allah]. The belief is that the primal absolute cause created the active intelligence, from which sprung the abstract soul [nafs], out of which was evolved primary matter, which was made capable of taking shapes and forms. Thus the abstract soul individualized in man strives to attain by self-discipline and purity of life the goal of perfection, and to return to the source from which it emanated [maad]. Compare Srishty of the Hindoos.

MACLEOD SEER (ഇടങ്ങഴി - itannazhi, *Mal.*). As introduced by Mr. Macleod. Measure of capacity. 4 nauzhies = 1 Macleod seer; 10 Macleod seers = 1 parrah [alavay, 3d]. Approximate actual value, 1 Macleod seer = 113¾ cubic inches. Introduced in 1802, and contains when liberally heaped 130 tolahs [q.v.] of rice [q.v.]. Used in Chiracal, Cottayam, Cooroombranaud, Valavanaud and Palghaut. In Calicut and Ponnany Macleod's half seer liberally heaped and containing 65 tolahs [q.v.] is used. Same as Mal. yidangazhy. See vol. I, 609; II, 516.

MACSHAM (मक्ष - maksha, *San.*). From (maksh, san. to collect). Fly.——*Macsha grauhy* (मक्षग्राहि - makshagráhi, San.). From (above + grih, san. to catch). Muscicapidæ family, dentirostres, insessores, aves [pacshy, 20], of naturalists [jantoo]. Flycatchers. Divided into:—Myiagrinæ, true flycatchers, live chiefly on soft-winged insects, which they almost always capture in the air, often with a loud snap of their mandibles, occasionally picking one off a leaf or a branch [shah boolbool, mynautty]; and Muscicapinæ [dhoby boolbool]; bill rather wide, depressed, shallow; the culmen straight, distinctly hooked and notched at the tip; rictal bristles numerous and strong; wings moderate, tail generally rather short or moderate; tarsus short, weak; feet moderately small, feeble.——*Makkhee* (मक्षिका - makshika, San.; माशी - máshí, Mahr.; ذباب - zubáb, Ar.; مگس - magas, Pers.; مکہی - makkhí, Hind. and Dec.; للت - lalat, Malay ನೊಣ - nona, Can.; ಕಿಲೆಂಜಿ - kilenji, Too.; ఈగ - íga, Tel.; ഈച്ച - íçça, Mal.; මැස්සි - makshi, Singh.; ஈ - í, Tam.). Title from hindostany. San. from (maksh, san. to collect); as collecting honey. Ar. from (zabba, ar. in constant motion). Pers. from sanscrit. Hind. from sanscrit. Musca domestica, muscidæ, diptera, holometabola, insecta [poochy], of naturalists [jantoo]. There is a Tamul proverb:—ஈக்கு விடம் தலையில், தேளுக் குக்கொடுக்கில்—"In a fly the head is the seat of poison, in a "scorpion [tail] the tail." Tamul (máttí) is the cattle-fly or gad-fly.

MAD (मद् - mad, *San.*). To intoxicate, gladden.——*Madablota* (माधवी - mádhaví, San.; مدھ مالتی - madhmáltí, Hind.; వడ్లయారాల - vadlayárála, Tel.; ବୋରମାଳି - borómali, Oor.; குரிந்தை - kurindai, Tam.). Title corruption from hindostany. San. from (madhu, san. spring season); flowers in spring. Hind. from sanscrit. Tel. from (vadla, tel. corruption of vedala, tel. flower + yárála, tel. putranjiva roxburghii, wall.). San. also (atimuktá), meaning surpassing pearls [musk jasmine, nemmy]; (málatí), meaning beautiful flowered [common jasmine, wild jasmine, wild nutmeg]. Tel. also (mádhavitíga), meaning spring creeper; (pótuvadla), meaning male + the tree; (vedalachettu), meaning flower + tree. Tam. also (shirugurinjá), meaning small + the plant [small indian ipecacuanha]; (kuriñjá)

[indian ipecacuanha]; (kurukkatti), meaning white + fig plant, ficus; cf. musk jasmine. Title otherwise Clustered gærtnera, Delight-of-the-woods, Spring creeper. Botanically Hiptage madablota, gærtn., malphigiaceæ [vricsham, 29]. Specific name from (mádhavílatá, san. spring flower creeper), through (madúbúláta, beng.). Alias Banisteria bengalensis, unicapsularis; Gærtnera racemosa; Molina racemosa. Tall climber, glabrous except the young parts and inflorescence which are hoary and appressed-tomentose; leaves 3-6 inches, coriaceous, petioled, shining above; racemes 1-6 inches, axillary, usually forming a leafy panicle; flower ½-¾ inch diameter, fragrant, white; sepals obtuse; petals twice as long, fimbriate, fifth petal yellow at the base; wings of carpels oblong, coriaceous inner 1-2 inches, linear-oblong outer narrower shorter spreading. Large shrub, scandent; lanceolate pointed leaves, 7 inches long; profuse trusses of white and yellow fragrant flowers, somewhat resembling horse-chestnut. Leaves useful in cutaneous diseases; wood red in centre, yellowish-white in outer portion, moderately hard. There is another species, parvifolia.——*Madak* (مدك - madak, Hind.). Intoxicating pill made of chopped betel leaves [q.v.], and opium [aphainam] to be swallowed or smoked in a pipe [chandoo, mookhadiraut].——*Madaksira* (ಮದಕಸಿರ - madakasira, Tel.). See sep. title.——*Madanaghanta* (मदनघण्ट - madanaghanta, San.; घंटी - ghantí, Mahr.; మదనగ్రంధి - madanagrandhi, Tel.; താർത്താവൽ - tárttával, Mal.; நத்தைச்சூரி - nattaiççúri, Tam.). Title from sanscrit. San. from (madana, san. cupid + ghantá, san. bell); from aphrodisiac seeds. Mahr. from (ghantá, san. bell). Tel from (madana, san. cupid + grant'hi, san. knot); from aphrodisiac seeds. Mal. from (tár, mal. flower + távu, mal. to spread). Tam from (nattai, tam. oyster + shúri, tam. knife); for explanation see below. Tel. also (madana), meaning cupid; (modina); (madanabudatakáda), meaning cupid + short + stem. Tam also (nattaiççundi), meaning oyster pincher. Title otherwise Bristly button weed, Button weed, Shaggy button weed. Botanically Spermacoce hispida, linn., rubiaceæ [vricsham, 71]. Alias Spermacoce articularis, scabra. A procumbent, scabrous, or hirsute herb; root fibrous, annual or perennial; leaves obovate spathulate, oblong or elliptic, obtuse or acute, coriaceous, ½-1½ by ¼ to ⅜ inches; flowers four to six in a whorl, blue or white; capsules hispid or pubescent; seeds oblong, granulate, opaque; in some forms of the plant the leaves have cartilaginous edges. There is a Hindoo myth that an oyster [auly] will open its shell if touched by the plant. Seeds aphrodisiac, plant prescribed to cure hæmorrhoids; alterative and purifier of the blood like sarsaparilla, and is prescribed in decoction.——*Madanam* (மதனம் - mathanam, Tam.). Silence. There is a Tamul proverb:—மதனம் மலைக்கு ஒப்பிடலாம்—"Silence is comparable to "a mountain;" being as irresistible.——*Madanan* (मदन - madana, San.). Manmatan [q.v.], called in Northern india and in literature Cauman [q.v.].——*Madanapully* (మదనపల్లె - madanapalle, Tel.). See sep. title.——*Madapollem* (మాధవాయపాలెం - mádhaváyapálem, Tel.). From (mádhavayya, tel. proper name + pálemu, tel. fortified village). Town, Port, Head-quarters of General duties deputy collector; Godavery dist., Narsapore tal.; pop. 1,862; acres 852; lat. 16° 26′; long. 81° 44′; from Cocanada S.W. 50 miles; from Coonavaram S.S.E. 82 miles; from Ellore E.S.E. 43 miles; from Madras N.N.E. 248 miles; from Narsapore N.E. 1 mile; from Rajahmundry S. 39 miles. On the Godavery. Part of present town of Narsapore, English factory established, 1679; withdrawn in 1688; resettled, 1698; captured by French in 1757; ceded by Nizam's treaty with Colonel Forde, 14th May 1759; grant confirmed by Moghul's firmaun [q.v.], 12th August 1765. The sites of the old buildings have been carried away by successive encroachments of the river. Trade declined since the abolition of the Company's factory [aurang] in 1827. A fine kind of white piece-goods intermediate between calico [q.v.] and muslin [q.v.] manufactured here, and well known in trade.——*Madaur* (مدار - madár, Hind.). From (mandára, san. the plant, specially the white variety). Same as Yercum.——*Madh* (مده - madh, Hind.). Honey. Caulee madh means black honey; same as Poolah. Soofaid madh means white honey; same as White poolah.——*Madhoo* (मधु - madhu, San.). Sweetness, spring, honey, intoxicating liquor [shahad, tain, tem]. Plant first term in the sense of sweet. Ex., where transl. is of second term:—Celosia cristata (madhuchhada), cover; Dioscorea aculeata (madhválu), esculent root; Dregea volubilis (madhumálati), jasmine; Glycirrhiza glabra (madhuyashtika), stick; Mangifera indica (madhudúta), meaning spring + servant; Tinospora cordifolia (madhuparní), leaf. See gloss. paragraphs.——*Madhoocam* (मधुक - madhuka, San.). Sweet. Plant name common to:—Glycirrhiza glabra; Mallotus philippensis. See gloss. paragraphs.——*Madhoopaty* (मधुपति - madhupati, San.). From (madhu, san. spirits + pati, san. master). Mistress of ardent spirits; Bhadra cauly [q.v.].——*Madhooram* (मधुर - madhura, San.). Sweet. Plant first term. Ex., where transl. is of second term:—Citrus decumana (madhuranárakam), lime; Ipomæa batatas (madhurakizhannu), esculent root; Zizyphus jujuba (madhurap'hala), fruit. See gloss. paragraphs.——*Madhoo sakhan* (मधुसख - madhusakha, San.). From (madhu, san. spring + sakha, san. friend). Companion of the spring. Manmatan [q.v.].——*Madhwa* (मध्व - madhva, San.). From (madhu, san. sweet). Otherwise Madhwacharry. Also called Ananta teertan, Ananda teertan and Poornapranyan. A Bramin, native of Tooloovam [q.v.], in the twelfth century. He was a worshipper of Vishnoo and as a religious philosopher he promulgated the doctrine of Dweitam [q.v.] or dualism, according to which the supreme soul [paramautman] of the universe and the human soul [autmam], jeevautman are distinct; as against the old and now still orthodox doctrine of Adweitam or non-duality, according to which god and soul, spirit and matter, are one. See Adweitam, Shuncaracharry [shuncaran]. Also for the nearly contemporaneous Veishnavite doctrine Vishishtaudweitam, see that head and Ramaunoojan. The history of Madhwa's religious and philosophic efforts has been given in the foot-note on the History of Hindoo religion at vol. I (76), (85), (90). The sect which follows Madhwa is not a numerous one, perhaps 60,000 in all. They are called also Bramha sampradayees. Their tenets are fully described at vol. I (76). Madhwa bramins hold the ninth day of the eleventh lunar month as a festival. Distinguish from Maudhavan.——*Madhwam* (माध्व - mádhva, San.). Dweitam philosophy promulgated by Madhwa. See vol. I (74).——*Madmaunty* (हरचंपक - harachampaka, San.; विलायतीचांपा - viláyatíchámpá, Mahr.; مدن مانتی - madanmánti, Hind.; مدن مست - madanmast, Dec.; ಮನೋರಂಜನಬಳ್ಳಿ - manóranjanballi, Can.; మనోరంజితము - manóranjitamu, Tel.; മദനകാമേശ്വരി - madanakáméshvari, Mal.; மனோரஞ்சிதம் - manóraññjitham, Tam.). Title from hindostany. San. from (hri, san. to captivate + champaka, san. michelia champaca, linn.). Mahr. from (viláyatí, mahr. foreign + chámpá, mahr. michelia champaca, linn.). Hind. from (madana, san. cupid + mántí, hind. subservient). Dec. from (madan, hind. cupid + mast, hind. intoxicated). Can. from (manas, san. mind + rañj, san. to please + balli, can. creeper). Tel. from (manas, san. mind + rañj, san. to be pleased). Mal. from (madana, san. lustful + káma, san. cupid + íshvarí, san. goddess). Tam. from (manas, san. mind + rañj, san. to be pleased). Tel. also (p'halasampenga), meaning fruit + michelia champaca, linn.; (sakalap'halasampenga), meaning all + fruit + michelia champaca, linn.; from flowers having the mixed flavor of many fruits. Mal. also (manóraññjitam), meaning heart + ravishing. Title otherwise Cupid's plant, Foreign champak, Fruited champak, Heart's joy. Botanically Artabotrys odoratissimus, br., anonaceæ [vricsham, 4]. Glabrous, branches long; leaves 2 to 8 by 1 to 2 inches; flowers yellow, solitary or gemmate; petals 1 to 1¾ inches, nearly equal, young pubescent, especially at the base; carpels obovate-oblong, yellow, odorous. Large shrub; lanceolate, glossy, pure green leaves; moderate-sized irregular-formed flowers similar to custard-apple [anona], of a heavy, pale yellow color, perfume somewhat like over-ripe apples [seb]; small, golden, pear-like [amrood] fruit. Flowers are narcotic.——*Madrantacam* (மதுராந்தகம் - mathurándagam, Tam.). See sep. title.——*Madura* (மதுரை - mathurai, Tam.). See sep. title.——*Madyam* (मद्य - madya, San.). Any intoxicating liquor [mooskiraut].——*Mahoor* (مهور - mahúr, Hind.). Same as Bachnaug.——*Mandam* (मन्द - manda, San.). Slow. Astronomical anomaly. Mandotcham is the apsis of a planet's [graham] orbit [cacsham], Toonga mandotcham being the higher apsis [ootcham]. Manda caindram, from (kéndra, san. centre), is argument of anomaly. Manda jyay, from (jyá, san, sine) is equation to the centre. Manda palam, from (p'hala, san. equation) is anomalistic equation of a planet [graham].——*Mandaram* (मन्दर - mandara, San.). From (mand, san. to rejoice). The mountain used by the gods in churning the ocean [coormam].——*Mandaukiny* (मन्दाकिनी - mandákiní, San.). From (manda, san. slow + aka, san. going). Name of the celestial Ganges.——*Mandiram* (मन्दिर - mandira, San.). From (mand, san. to halt). The adytum of a temple [coil].——*Mantapam* (मण्डप - mandapa, San.; منڈپ - mandap, Hind.). From (mand, san. to adorn). Any square or rectangular hall with a flat roof supported by pillars, open at the sides. Particularly the porch [toranam] of a temple [coil]. Cf. Chauvady.——*Mathy* (மதி - mathi, Tam.). From (mad, san. to rejoice). Moon [chundran]. Niraymathy is full moon [powrnimay].——*Matsyam* (मत्स्य - matsya, San.). See sep. title.——*Maudhavan* (माधव - mádhava, San.).—"*a*" Manmatan [q.v.], the god of spring season. Also Vishnoo [q.v.].—"*b*" Name of an author. Otherwise Maudhavacharry or Vidyaunagaranyan, the latter designation giving rise to Vidyaunagaram or Vijianugger [q.v.] as he was chiefly instrumental in its foundation. He belonged to the adweitic school of Shuncaracharry [shuncaran] and was the Jagat gooroo of shringairy about the middle of the fourteenth century. Though apparently an original author, he is best known in literature by his Sarwa darshana sangraham or critical review of the principal systems of philosophy [darshanam] current down to his time. These systems are arranged in a progressive series, beginning with the Chaurvaucam [q.v.] as being the furthest removed from, and gradually ascending to the Saunkhyam [q.v.] and Yogam [q.v.], the systems nearest approaching to, Maudhavan's own [matam]. Maudhavan was priest and minister of Bookka roya and Harihara of Vijianugger, in the fourteenth century as his father Mayana had been of their father Sangama. Distinguish from Madhwa.——*Maudhoo row* (माधुराव - mádhurávu, Mahr.). Mahratta chief. Contested with Hyder; invaded Mysore, captured Sheerah;

appointed Hyder's brother-in-law as Governor of Goorram-condah. Died in 1772 [charitram].——*Maundavair* (మాండవేరు - mándavéru, Tel.). From (mándavya, san. the sage + éru, tel. river). Sanscrit name (mándavyanadí), meaning maundavyan, the sage, so called + river. River; Cuddapah dist., Royachoty tal. Drains the greater part of Royachoty talook, flowing through the centre of the talook and joining Pinchahnuddy, at foot of hills. Has little water and a wide sandy bed.——*Mendphal* (مینڈ پھل - mendphal, Dec.). Means intoxicating fruit. Same as Common emetic nut.——*Mohwah* (مہوا - mohwá, Hind.). See sep. title.——*Mom* (موم - mom, Hind.). See sep. title.——*Mowloo* (ماؤلو - máúlú, Hind.). Means sweet esculent root. Same as Goa yam [auloo].——*Mudar* (مدار - madár, Hind.). Common spelling of Madaur or Yercum [q.v.].——*Mundalam* (मण्डल - mandala, San.; منڈل - mandal, Hind.). From (mand, san. to adorn). A circle, especially great circle; also any elliptical figure; a division of a country; as Tondaimundalam, Paundy mundalam, Cholamundalam. In medicine and ritual applied to a period of forty days. Mundalaubhishaicam is a daily anointing of an idol [vigraham] for forty days after the Coombhaubhishaicam or other ceremonies. Mundaleshan or Mundaleshwaran is an independent sovereign, especially one who governs a country forty yojanams [q.v.] in length and forty in breadth and containing over 100,000 hamlets. Mundalaurdham is a semi-circle. A division of the Rig vedam [q.v.]. Craunty mundalam, from (kránti, san. going) is the ecliptic. Naudy mundalam, from (nádi, san. indian hour) is the celestial equator [niracsham]; the circle in the heavens [bhagolam], equally distant from the poles [dhroovam] of the celestial sphere, is the equinoctial or celestial equator, which is merely the projection of the terrestrial equator [niracsham] to the sphere of the fixed stars [jyotisham, maunam, nacshatram].——*Must* (مست - mast, Hind.). From (mad, san. to be drunk). Drunk or lustful; especially applied to an elephant [q.v.] or camel [ottagam] in a state of periodical excitement.——*Mutchly* (مچھلی - machhlí, Hind.). Means fish or sinew. Also same as Tanner's sumach. Mutchly bunder, from (bandar, hind. port) is Masulipatam.

MADA (మడ - mada, *Tel.*; മട - mata, *Mal.*; மடை - madai, *Tam.*). From (madu, tam. to hold). Irrigation channel [q.v.]; small sluice. Also means den.——*Madaiyaun* (மடையான் - madaiyán, Tam.). Means keeper of sluice. A village servant who distributes water for irrigation [inam, maday vetty, neer gunty].——*Madakara* (മടക്കര - matakkara, Mal.). From (mata, mal. den + kara, mal. village). Island; Malabar district, Chiracal talook. On north side of Belliapatam river. Obtained from Rajah of Chiracal as a trading post on rent in 1669. Formally ceded by rajah, 1749. Permission granted by rajah for erection of a fort, 1759. Fort blown up and island given back to the Vice-regent of Chiracal in 1762. Abandoned in 1762 after the fall of Pondicherry and Mahé in 1761. Ceded by Tippoo with the rest of Malabar, 18th March 1792.——*Madal* (மடல் - madal, Tam.). Means turning; branch channel. Channel [q.v.].——*Madavay* (بوری - búrí, Ar.; پڑھن - parhan, Hind.; عربی مچھی - arabímacchí, Dec.; బొంత - bonta, Tel.; மடவை - madavai, Tam.). Ar. from (búrah, ar. town in egypt); where frequent. Dec. from (arabí, ar. arabian + macchí, hind. fish). Tel. means large. Tam. from (madai, tam. channel). Name for the family Mugilidæ [matsyam, 26] cf fishes.——*Madoogoo* (مرگ - marug, Hind.; మడుగు - madugu, Tel.). From (madu, tam. to contain). Pool. Distinguish from Mathagoo.

MADAGASCAR (مدغاسکر - madagháskar, *Ar.*). The island to east of Africa, once joined to southern india, as is supposed, by the now submerged Lemuria [q.v.].——*Madagascar palm* (مدغاسکر کا تاڑ - madagháskarkátár, Hind.). Same as Traveller's palm.

MADAKSIRA (మడకశిర - madakasira, *Tel.* madakasira*). From (madaka, san. raggy, eleusine coracana, gærtn. + sirá, san. stream) [mad].——(1) Talook, Anantapore district. Tahsildar's pay Rs. 150. Area 439 square miles. Population 67,993. S.W. of district. Languages Teloogoo and Canarese. Surrounded by Mysore except on the east where it joins Hindoopore talook. In the south the talook is very hilly and rocky, the two highest peaks being at Madaksira and Ratnagherry, both of which are strongly fortified. Towards the west the country is more level and fertile. The soil is chiefly red. The principal products are paddy [q.v.], raggy [q.v.], cholum [q.v.], cumboo [bajrah], oil-seeds [yennay] and gram [q.v.]. The largest market in the talook is at Amrapore. Grain is imported from the Mysore country and exported to the Hyderabad country and Hindoopore. Agricultural tract, no manufactures. There are eighty-six spring channels [q.v.] and about 2,560 wells, most of which are the private property of the ryots [q.v.]. There are altogether 158 tanks [q.v.] in the talook, the largest being Agaly, Amrapore, Harisamoodram, Madaksira, Morabaugal, Shivaram. Camping ground at Madaksira. Places of archæological interest:—Agaly, Amrapore, Doddairy, Hemauvaty, Madaksira, Madhoody, Poyalbunda, Shivaram, Toommadihully. Principal Trig. station:—Cariyacull. The leading places, &c., in the talook are the following.——*Agaly* (అగళి - agali, Tel.). From (aga, san. tree + ilá, san. ground). Village; pop. 1,629; lat. 13° 47′; long. 77° 05′; from Anantapore S.S.W. 72 miles; from Madaksira S.W. 18 miles. Contains numerous areca, &c., gardens. Large tank irrigating 873 acres. River Swarnamookhy runs by.——*Amrapore* (అమరాపురము - amarápuramu, Tel.). From (amara, san. god, the immortal + pura, san. town). Ancient name (nadimipalli), meaning middle village. Village; pop. 3,805; lat. 14° 08′; long. 77° 01′; from Anantapore S.W. 56 miles; from Madaksira N.W. 23 miles. On the old route from Chitaldroog to Chittore. The ancient name was as lying midway between the Pyaulagherry and Cottacote towns built by Hottal naidoo. The old site of the town is about half a mile to the west. A large weekly market. It contains good areca [q.v.] and other gardens and orchards. Tank irrigating 602 acres.——*Cariyacull* (కరియకల్లు - kariyakallu, Tel.). From (kari, can. black + kallu, tel. rock). Trig. station; lat. 13° 55′ 14·57″; long. 77° 05′ 07·65″; height 2,646 feet; from Anantapore S.W. 65 miles; from Cholagherry W. 4 miles; from Madaksira W. 16 miles.——*Halcore* (ಹಲ್ಕೂರು - halkúru, Can.). From (halaku, can. to climb + úru, can. village). Village on the slope. Village; pop. 1,628; lat. 14° 05′; long. 77° 02′; from Anantapore S.W. 57 miles; from Madaksira W. 21 miles. Situated on road to Amrapore. Contains superior areca gardens. Tank irrigating acres 511.——*Harisamoodram* (హరిసముద్రం - harisamudram, Tel.). From (hari, san. proper name + samudra, san. ocean). Village; pop. 1,756; lat. 13° 54′; long. 77° 20′; from Anantapore S.S.W. 57 miles; from Madaksira S.E. 2½ miles. Has a large tank irrigating acres 894.——*Hemauvaty* (హేమావతి - hémávati, Tel.). See sep. title.——*Madaksira* (మడకశిర - madakasira, Tel.). See below.——*Madhoody* (మధూడి - madhúdi, Tel.). From (madhu, can. proper name + hudi, can. dam). Village; pop. 1,692; lat. 13° 49′; long. 77° 03′; from Anantapore S. 71 miles; from Madaksira W.S.W. 19 miles. Tank irrigating 532 acres. Contains numerous areca [q.v.] and cocoanut [q.v.] gardens. River Swarnamookhy runs by.——*Manoor* (మనూరు - manúru, Tel.). From (mani, san. gem + úru, tel. village). Village; pop. 1,821; lat. 13° 51′; long. 77° 23′; from Anantapore S.S.W. 59 miles; from Madaksira S.E. 8 miles. Has a tank irrigating acres 468. Produces tobacco [pogauk].——*Morabaugal* (ಮೊರಬಾಗಲು - morabágalu, Can.). From (murári, can. proper name + bágalu, can. door). Village; pop. 1,745; lat. 13° 57′; long. 77° 05′; from Anantapore S.W. 62 miles; from Madaksira W. 16 miles. Large tank.——*Ratnagherry* (రత్నగిరి - ratnagiri, Tel.). From (ratna, san. gem + giri, san. mountain). Village; pop. 1,378; lat. 13° 49′; long. 77° 10′; from Anantapore S.S.W. 68 miles; from Madaksira S.W. 13 miles. A strongly fortified hill. Poligar [q.v.] was deprived of office by Sir Thomas Munro. Present poligar draws a small pension [madaksira].——*Shivaram* (శివరాము - shivaramu, Tel.). From (shrí, san. the goddess + pura, san. city). Sanscrit name (shrípura), meaning lutchmy's city. Village; pop. 1,061; lat. 14° 02′; long. 77° 04′; from Anantapore S.W. 59 miles; from Madaksira W.N.W. 18 miles. Large tank.——*Shunkercull* (శంకరగల్లు - shankaragallu, Tel.). From (shankara, san. shiva, the pleasure giver + kallu, tel. stone). Village; pop. 1,719; lat. 13° 59′; long. 77° 16′; from Anantapore S.S.W. 52 miles; from Madaksira N.W. 5 miles. Formerly Poligar's station. Contains a few areca and cocoanut gardens. Situated amidst hills.——(2) Talook head-quarters, Anantapore dist., Madaksira tal.; pop. 4,896; lat. 13° 56′; long. 77° 19′; from Anantapore S.S.W. 56 miles; from Bellary S.S.E. 86 miles; from Gooty S.S.W. 85 miles; from Madras W.N.W. 215 miles; from Penoocondah W.S.W. 24 miles. Situated at foot of a rock. Built on a forest clearing in A.D. 1520 by a chief, Ratnagherry sarjappa royappa rajah, who also built the temple of Anjaneyan [hanooman]. Hirey wodeya, the founder of the poligar family, formerly established here, served the Vijianugger Government with 1,000 peons [q.v.], for the support of whom twelve villages in the Chitaldroog talook were given to him in jagheer [q.v.]. This jagheer was afterwards augmented by the incorporation of adjacent districts bearing a rent of one lakh [q.v.] of pagodas [q.v.]. One of the family built the fort at Sheerah in Mysore. Much of the country was taken from the poligar by the Sultan of Beejapore early in the seventeenth century. The two chief forts which remained in his possession were Madaksira and Ratnagherry. The former of these was at one time resumed but afterwards restored. In 1728 the place fell under the Mahrattas and in 1741 it was captured by Moraury row who imposed a chowt [q.v.] of Rs. 8,000. He also built a fort and palace. In A.D. 1762 the Mussalmans seized the place, but were ejected two years later. Hyder ally took it in 1769 and demanded from the poligar a peshoush [q.v.] of Rs. 15,000, and as this was not punctually paid, he captured the poligar and his five sons in 1776 and sent them prisoners to Seringapatam. The eldest son was taken by the English troops at the siege of Seringapatam in 1792 and set at liberty. He returned to Ratnagherry and captured the place, but was again driven out and died a year or two afterwards without issue. His brothers were all hanged by Tippoo sultan and the family became extinct. The Mussalmans regained possession in A.D. 1774 and held it till 1799 A.D., when the country fell under the English on the

defeat of Tippoo sultan. There are some fine wells with steps of cut-stone. Large tank.

MADANAPULLY (మదనపల్లె - madanapalle,* *Tel.*). From (madana, san. the god of love + palle, tel. village) [mad]. Probably a corruption from name of the ruler maryauda ramanna. Sanscrit name (madanapuri), meaning cauman, the god of love + town.——**(1)** Talook, Cuddapah district. Tahsildar's pay Rs. 175. Area 837 square miles. Population 127,352. Language Teloogoo. S.W. of district. Contains 93 Government and 17 inam [q.v.] villages, but all of these have hamlets attached to them, and some as many as 80, 90, or 100, separated many miles from the village to which they belong. The principal ryot's house is enclosed by a mud-wall, and the hamlet is named by the original proprietor. Bounded east by Voilpaud and north by Royachoty and Cadiry talooks of the district, south by Poonganore zemindarry of North arcot, and west by Mysore and Cadiry talook. Very hilly, except in the south-western part where the land meets Mysore plateau. Climate pleasant and favorable to Europeans; though a low kind of fever is prevalent. Soil good, especially in valleys. Sugar-cane [q.v.] noted. Tanks [q.v.] very small, and the majority are dasbandam [q.v.]. The principal tanks are—Pedda tippasamoodram, Rungasamoodram, and Vyausasamoodram, situated within a few miles of each other, all receiving supply from the Mysore water-shed. The supply diminishes from year to year, as fresh works of irrigation are constructed in Mysore. Two other large tanks are Badicauyalapully and Chinna tippasamoodram. There are two rivers, Paupughny and Bauhoodah nuddy. The former runs greater part of year, the latter only during monsoon [q.v.]. Another stream, Peddapollem wunka, formed by surplus water of Pedda tippasamoodram tank is generally dry. Many jungle streams, some of which are utilised. No anicuts [q.v.]. Tanks trust to the scanty rainfall only. Talook is rich in natural springs which open out with every shower of rain. These springs are in reality often nothing more than surface drainage, but they run for three months after the heavy monsoon [q.v.]. The two largest spring head channels [q.v.] are the Battala caulwa and the Cottapully caulwa, both at Madanapully. Places of archæological interest:—Badicauyalapully, Basnicondah, Batlanootigadda, Beerangy, Boorracauyalacote, Cadinauuhoonicote, Calicherla, Chadam, Chinnatippasamoodram, Chippily, Cokkunty, Cosoovaurpulley, Cottacote, Cottaula, Cundoocore, Gollapully, Gootlastalam, Gutt, Madanapully, Marellagadda, Moodivaid, Moolcalcheroo, Nadigadda, Paupayapully, Pedda tippasamoodram, Sompully, Tamballapulley, Tavalam, Veligull, Vempully. Principal trig. stations:—Adavy auvoolapully, Canoogonda. The leading places, &c., in the talook are the following.——*Adavy auvoolapully* (అడవిఆవులపల్లి - adaviávulapalli, Tel.). From (adavi, tel. forest + ávu, tel. cow + palli, tel. village). Village; lat. 13° 28′; long. 78° 26′; from Cuddapah S.S.W. 75 miles; from Madanapully S.W. 9 miles. Trig. station in lat. 13° 28′ 22·05″; long. 78° 26′ 36·44″; height 3,850 feet; from Maulepaud S.W. 3 miles.——*Badicauyalapully* (బడికాయలపల్లి - badikáyalapalli, Tel.). From (badikáya, tel. school boy + palli, tel. village). Village; pop. 1,795; acres 9,125; lat. 13° 37′; long. 78° 19′; from Cuddapah S.S.W. 70 miles; from Madanapully W. 16 miles. Ramasawmy temple. Tank.——*Basnicondah* (బసినికొండ - basinikonda, Tel.). From (basava, can. bull + konda, tel. hill). Village, Hill; pop. 1,394; acres 5,432; lat. 13° 33′; long. 78° 34′; from Cuddapah S.S.W. 67 miles; from Madanapully E. 1½ miles. Rock 660 feet above the town of Madanapully. On the summit a pagoda [q.v.] to Vencatesha sawmy, who placed one foot here while travelling to Tripatty the other foot resting on Gundicote. Three inscriptions.——*Canoogonda* (కనుగొండ - kanugonda, Tel.). See sep. title.——*Cheyair* (చెయ్యేరు - cheyyéru, Tel.). See sep. title.——*Chinnatippasamoodram* (చిన్నతిప్పసముద్రం - chinnatippasamudram, Tel.). From tipparasayya, name of the constructor of the tank; as opposed to pedda tippasamoodram. Village; pop. 2,642; acres 6,246; lat. 13° 38′; long. 78° 36′; from Cuddapah S.W. 60 miles; from Madanapully N.N.E. 8 miles. Large tank seldom full. At opposite corner of talook from other of same name. Feeds channel which irrigates 60 acres near Voilpaud.——*Cottaula* (కొట్టాల - kot'hála, Tel.). From (kottamu, tel. thatched house). Village; pop. 1,293; acres 7,710; lat. 13° 55′; long. 78° 27′; from Cuddapah S.W. 48 miles; from Madanapully N.W. 26 miles. Inscription on rock N. of village.——*Cundoocore* (కందుకూరు - kandukúru, Tel.). From (kandu, tel. black + úru, tel. village). Village; pop. 2,432; acres 7,405; lat. 13° 45′; long. 78° 12′; from Cuddapah S.S.W. 66 miles; from Madanapully W.N.W. 27 miles. Among paddy [q.v.] fields, and water of town is impregnated with their drainage. Village given as a gift to a priest by Krishna rajah of Vijianugger. Two old Vishnoo [q.v.] temples. Vyausasamoodram tank is close by.——*Gutt* (ఘట్టు - ghattu, Tel.). Means hill. Village; pop. 3,101; acres 18,309; lat. 13° 39′; long. 78° 22′; from Cuddapah S.S.W. 65 miles; from Madanapully W.N.W. 14 miles. Hill-fort, the poligar [q.v.] of which at one time, possessed considerable power. A pension is paid to his descendants who reside at Cottapettah. Fort in ruins; also ancient palace. Two ruined temples and inscriptions.——*Horsley condah* (హార్సిలీకొండ - hársilikonda, Tel.). See sep. title.——*Madanapully* (మదనపల్లె - madanapalle, Tel.). See below.——*Moodivaid* (ముదివేడు - mudivédu, Tel.). From (mudi, tel. old + vídu, tel. town). Village; pop. 2,529; acres 7,470; lat. 13° 42; long. 78° 33′; from Cuddapah S.W. 57 miles; from Madanapully N. 11 miles. Four inscriptions.——*Moolcalcheroo* (ములకలచెరువు - mulakalacheruvu, Tel.). From (mulaka, tel. brinjal, solanum ferox, linn. + cheruvu, tel. tank). Village; pop. 1,073; acres 3,178; lat. 13° 49′; long. 78° 19′; from Cuddapah S.W. 59 miles; from Madanapully N.W. 2 miles. Inscriptions.——*Paupayapully* (పాపేపల్లి - pápépalli, Tel.). From (pápaya, tel. proper name + palli, tel. village). Village; pop. 942; acres 7,129; lat. 13° 57′; long. 78° 35′; from Cuddapah S.W. 41 miles; from Madanapully N. 28 miles. Once residence of a poligar.——*Paupughny* (పాపఘ్ని - pápaghni, Tel.). See sep. title.——*Peddapollem* (పెద్దపాళెము - peddapálemu, Tel.). From (pedda, tel. large + pálemu, tel. fortified village). Village; pop. 95; acres 4,505; lat. 13° 46′; long. 78° 20′; from Cuddapah S.W. 61 miles; from Madanapully N.W. 21 miles. Former residence of a poligar.——*Pedda tippasamoodram* (పెద్దతిప్పసముద్రం - peddatippasamudram, Tel.). From (tipparasayya, tel.); name of the constructor of the tank [chinna tippasamoodram]. Village; pop. 3,009; acres 3,073; lat. 13° 42′; long. 78° 15′; from Cuddapah S.W. 67 miles; from Madanapully W.N.W. 23 miles. Old temples and forts. Near hamlet of Poollaygootvauripully is an inscription; another on a rock called Boyabunda, south-west of village; others on boulders near the chauvady [q.v.]; others in a temple on the road from Poollaygootvauripully, and in the forts. Chiefly remarkable for its large tank. This lies close to Mysore frontier, from water-shed of which it receives supply.——*Rungasamoodram* (రంగసముద్రం - rangasamudram, Tel.). From (ranga, san. vishnu + samudra, san. ocean). Village; pop. 2,704; acres 7,348; lat. 13° 42′; long. 78° 18′; from Cuddapah S.W. 65 miles; from Madanapully N.W. 20 miles. Large tank, ayacut [q.v.] 1,917 acres, assessed at Rs. 8,318. Pays low assessment, land being on high level. Supply precarious and it leaks.——*Sompully* (సోంపల్లి - sómpalli, Tel.). From (sompu, tel. excellent + palli, tel. village). Village, Place of pilgrimage; pop. 3,135; acres 11,707; lat. 13° 50′; long. 78° 18′; from Cuddapah S.W. 57 miles; from Madanapully N.W. 25 miles. Residence of a poligar. Old Vishnoo temple with frescoed roof, in front of which stands a sculptured monolithic pillar [stambham] 50 feet high. Bangles [gauzoo] manufactured from an earth similar to iron earth. One and-a-half miles east is fort of Causincote, at least 830 years old.——*Tettoo* (తెట్టు - tettu, Tel.). Means fort-gate. Village, Place of pilgrimage; pop. 1,117; acres 11,896; lat. 13° 38′; long. 78° 28′; from Cuddapah S.S.W. 64 miles; from Madanapully N.W. 7 miles. Former residence of a poligar [q.v.]. Ancient temple.——*Vyausasamoodram* (వ్యాసముద్రము - vyásasamudramu, Tel.). See sep. title.——**(2)** Town, Talook and divisional head-quarters; Cuddapah dist., Madanapully tal.; pop. 6,527; acres 6,626; lat. 13° 33′; long. 78° 32′; from Cuddapah south 68 miles; from Madras 126 miles W. & by N.; from Bangalore north-east 74 miles; from Sidhout S.S.W. 71 miles. Once the residence of a poligar. The family now extinct. Two inscriptions in Goondlapully hamlet. Remains of an old fort. Has a number of spring head channels. The favorite resort of pensioned officials of the district.

MADAUR (مدار - madár, *Ar.*). From (dára, ar. to move in a circle). A centre, pivot. Common alam; as Madaur bee, alam + alaumat [ism].——*Madauriya* (مداریه - madáriyah, Hind.). From (madár, ar. title of the founder). His full name was Shah badee ood deen zinda shah madaur. A class of Fakeers [q.v.].

MADDALAM (मर्दल - mardala, *San.*; மத்தளம் - mattalam, *Tam.*). From (mard, san. to strike). Double drum [paray, sangeetam].

MADEENA (مدينه - madínah, *Ar.*). From (madana, ar. to build or settle in a place). City. Particularly the holy city of the Mahomedans in Arabia, where Mahomet is buried. Taken as alam; as Madeena sahib [ism].——*Madanee* (مدني - madaní, Hind.). Lacab of Mahomet. Title of a class of Mahomedans [ism].

MADHYAM (मध्य - madhya, *San.*). Latin medius. Middle, interior, centre [caindram]. Meridian [raikhay]. Middle term or mean of a progression [raushy]. Madhyama graham is the mean place of a planet [graham]. Madhyamam is mean; in contradistinction to spootam [q.v.], or true, apparent in astronomy [jyotisham]. Madhyama sowra maunam, from (saura, san. solar), is mean solar reckoning of time [maunam]. Madhyastan is a mediator; in Malabar arbitrator; corresponds with Punchayetdar [q.v.] in other places. Madhyaunam, from (ahan, san. day), is noon [ooroomam].——*Madhya desham* (मध्यदेश - madhyadésha, San.). From (above + désha, san. region). In Sanscrit literature the central region or the land lying between the Himalayas on the north, the Vindhya mountains on the south, Vinaushanam on the west, and Prayaugay on the east [charitram]. See vol. I (2).——*Madhyaushtamy* (మధ్యాష్టమి - madhyáshtami, Tel.). From (above + ashtamí, san. eighth day). Lunar [chaundramaunam] festival [pundigay, 3e] subject to intercalation [adhicam]. The eighth lunar day [tity] in middle of the waning moon [krishna pacsham] of the sixth lunar month Bhaudrapadam [mausam] between 8th September

and 8th October. Otherwise Mahaulya pacsham [q.v.]. A day on which it is meritorious to observe the Shrauddham [q.v.], which, when done, produces the same effect as if that ceremony had been performed during every other day of the Pacsham [maryauday, pacsham].

MADOOBBAH (മദ്ബഹ - madubbá, *Mal.*). Chancel among Malabar syrian christians.

MADRANTACAM (مدنات - madnát, *Hind.*; மதுராந்தகம் - mathurándagam, *Tam.* madurántakam *). From (mathurai, tam. town, so called + antaka, san. end) [mad]; indicating the northern limit of the kingdom of madura. Sometimes called Vada madura, or northern madura.——**(1)** Talook, Chingleput district. Tahsildar's pay Rs. 225. The largest and most important talook in the district. Area 696 square miles. Population 263,137. Language Tamul, Teloogoo. Bounded west by Arcot and Wandiwash talooks of North arcot district; south by Tindivanam talook of South arcot district; east by the sea; and north and north-west by the Cheyaur and Palaur. The surface is generally undulating. The northern portion is studded with a few low conical or ridged hills, the former predominating; towards the south run two long ridges, seven miles apart, rising here and there into peaks. A strip of land running down the coast and separated from the mainland by backwaters [cauyal] is called the Yidakkay naud [q.v.]. Tradition points to its separation by an irruption of the sea. This tract is covered with cocoanut [q.v.] trees, which yield the best nuts of any in these parts, the produce being exported to Madras. The soil is generally red ferruginous loam, but becomes sandy as the sea is approached. Its fertility is however fair. Paddy [q.v.] of the usual sort is the principal crop raised on the wet area [nunjah]. The dry [poonjah] ayacut [q.v.] is chiefly occupied by varagoo [q.v.]. Weaving is carried on to a small extent, principally for local requirements. The Palaur and Cheyaur irrigate a large acreage. The water is either stored in tanks [q.v.], being brought down by channels from the rivers when in fresh, or flows directly into the fields from spring channels [q.v.], whose heads are excavated in the beds of the rivers after the floods have run off. The Kiliyaur irrigates a few villages in the western portions. The only large tank besides Madrantacam tank is that of Ootramallore, which is filled through a long channel of about 7 miles from the Cheyaur. Camping-grounds, Acharapaukam and Carangooly. Petty zemindarries:—Agaram, Aneicutt, Aumayamputt, Aundaurcooppam, Boothore, Carimbaukam, Cayanullore, Cayapaukam, Chinnakilacaudy, Chinnavelicaud, Chittore, Choonampett, Cokkantaungal, Colattanullore, Colattore, Collambaukam, Comauracooppam, Coomily, Cullputt, Cuttiwaukum, Eesore, Illaid, Iroombaid, Keelcanday, Keelcauranay, Keeralvaudy, Madavilaugam, Maroovalam, Maumbaukam, Mogaiyore, Moodelliarcooppam, Nariyore, Neerpair, Neinaurcooppam, Nercoonaputt, Noogambal, Olavetty, Orangauvaly, Othiyore, Ottivilaugam, Panayore, Pavanjore, Perively, Periyakilacaudy, Periyavelicaud, Pilancooppam, Pondore, Poothoocooppam Poothooputt, Poroor, Saulore, Sheyoor Shirvambaukam, Shirmeilore, Shiroocalattore, Shiroonugger, Shiroopinayore, Tattamputt, Taudauncooppam, Tondamanullore, Tonnaud, Toondamvellairy, Toorayore, Velanganore, Vembanore, Venmaulaharam, Yettoor, Vilangaud, Vitchoor, Vunniyanullore, Yendatore. Places of archæological interest:—Acharapaukam, Alamparva, Cadambarcoil, Carangooly, Keenore, Madrantacam, Ootramallore, Pernugger, Peroombayore, Pondore, Shaulwaukum, Sheettancherry, Tirmacoodal, Tirpoolivanam, Tirvancoil, Villivaukam. Principal trig. stations:—Avirimode, Carangooly, Vilangaud. The leading places, &c., in the talook are the following.——*Acharapaukam* (அச்சரவாக்கம் - aççaravákkam, Tam. acharapákam *). From (aççuram, tam. a thorny plant, tribulus terrestris, linn. + pákkam, tam. village). Sanscrit name (akshéshvarapura), meaning soul + lord + town, or town of shiva, lord of souls. Village, Railway station; pop. 1,272; acres 1,626; lat. 12° 25′; long. 79° 53′; height 135 feet; from Madrantacam S.S.W. 8 miles; from Sydapett S.W. 50 miles; from the sea W. 20 miles. Travellers' bungalow [q.v.] on great southern trunk road. Old Shiva temple. Five inscriptions of Chola and Paundy dynasties [raj] on temple of Acsheshwarasawmy.——*Alamparva* (ஆலம்பறை - álambarai, Tam.). See sep. title.——*Avirimode* (அவிரிமேடு - avirimódu, Tam.). From (aviri, tam. indigo plant, indigofera tinctoria, linn. + módu, tam. high ground). Trig. station; lat. 12° 27′ 13·49″; long. 79° 57′ 08·32″; height 490 feet; from Madrantacam S. 4 miles; from Yendatore W. 2 miles; from the sea W. 16 miles.——*Carangooly* (கருங்குழி - karunguzhi, Tam.). See sep. title.——*Cauvitundalam* (காவித்தண்டலம் - kávittandalam, Tam.). From (kávi, tam. red earth + tan, tam. cool + talam, tam. place). Village; pop. 187; acres 1,155; lat. 12° 43′ 35″; long. 75° 59′; from Madrantacam N.N.W. 16 miles; from Sydapett S.W. 28 miles; from the sea W. 20 miles. N.E. of Ootramallore. Its mud fort was scene of struggles between English and French.——*Cayapaukam* (கயப்பாக்கம் - kayappákkam, Tam.). From (kayam, tam. tank + pákkam, tam. village). Zemindarry, Village; pop. 1,294; square miles 2; lat. of village 12° 21′; long. 79° 54′; from Madrantacam S. 11 miles; from Sydapett S. 52 miles; from the sea W. 13 miles. Peshcush Rs. 2,120.——*Cheyaur* (செய்யாறு - sheyyáru, Tam.). See sep. title.——*Cheyoor* (செய்யூர் - sheyyúr, Tam. cheyúr *). From (sheyya, tam. red + úr, tam. village). Zemindarry, Town; pop. 5,364; acres 8,802; lat. of town 12° 21′; long. 80° 03′; from Madrantacam S.E. 13 miles; from Sydapett S. 47 miles; from the sea W. 4 miles. Temple of Keilausanautan with inscriptions, temple of Soobramanyan [q.v.]; inscription at the temple of Valmeekeshwaran. The inscriptions belong to the Chola dynasty. Extensive salt pans [ooppalam].——*Choonampett* (சூனம்பட்டு - shúnámbattu, Tam. chúnámpet *). From (shunnámbu, tam. lime stone + pattu, tam. village). Zemindarry; pop. 4,306; lat. 12° 16′; long 79° 58′; from Madrantacam S. 17 miles; from Sydapett S.S.W. 56 miles; from the sea W. 7 miles. Peshcush Rs. 1,996.——*Choonampett villiwaukam* (சூனம்பட்டுவில்லிவாக்கம் - shúnámbattuvillivákkam, Tam.). From (shúnámbattu, tam. village so called + villivákkam, tam. vilage so called); villivaukam in choonampett. Village; pop. 3,779; acres 4,718; lat. 12° 16′; long. 79° 59′; from Madrantacam S. $17\frac{1}{4}$ miles; from Sydapett S. 56 miles; from the sea W. 6 miles. Chief place of Choonampett zemindarry. Salt pans. An old Shiva temple.——*Keelcauranay* (கீழ்க்காரணை - kízhkkáranai, Tam.). From (kízh, tam. east + kár, tam. black + anai, tam. dam). Zemindarry, Village; pop 535; lat. of village 12° 24′; long. 79° 58′; from Madrantacam S. 8 miles; from Sydapett S. 47 miles; from the sea W. 12 miles. Peshcush Rs. 396.——*Kiliyaur* (கிளியாறு - kiliyáru, Tam.). From (kili, tam. a grasshopper + áru, tam. river). River; Tributary of Palaur. Rises in Wandiwash hill, and after supplying a few villages in western portion of the talook, runs into Madrantacam tank, after flowing over calingula [q.v.] of which it runs between high banks in a course at first due east, and afterwards north-east till it joins the Palaur, about 10 miles from sea.——*Madrantacam* (மதுராந்தகம் - mathurándagam, Tam.). See below.——*Mogaiyore* (முகையூர் - mugayúr, Tam.). From (mugai, tam. a bud + úr, tam. village). Zemindarry, Village; pop. 1,356; square miles 3; lat. of village 12° 24′; long. 80° 08′; from Madrantacam S.E. 16 miles; from Sydapett S. 43 miles; from the sea W. 1 mile. Peshcush Rs. 1,732.——*Nedoombauray* (நெடும்பறை - nedumbarai, Tam.). From (nedum, tam. long. + párai, tam. rock). Otherwise Nedoomaram. Village; pop. 928; acres 1,522; lat. 12° 26′; long. 80° 08′; from Madrantacam S.E. 15 miles; from Sydapett S. 41 miles; from the sea W. 3 miles. Formed part of the Home farms [q.v.].——*Ootramallore* (உத்திரன்மேரூர் - uttiranmérúr, Tam.). See sep. title.——*Ottivilaugam* (ஒத்திவிளாகம் - ottivilágam, Tam.). From (otti, tam. a plant, pupalia atropurpurea, moq. + világam, tam. battle field). Zemindarry, Village; pop. 137; square miles $3\frac{1}{2}$; lat. of village 12° 17′; long. 80° 01′; from Madrantacam S. 16 miles; from Sydapett S.W. 54 miles; from the sea W. 5 miles. Peshcush Rs. 233.——*Palaur* (பாலாறு - páláru, Tam.). See sep. title.——*Panayore* (பனையூர் - panaiyúr, Tam.). From (panai, tam. palmyra tree, borassus flabelliformis, linn. + úr, tam. village). Zemindarry, Village; pop. 1,741; square miles $2\frac{5}{8}$; lat. of village 12° 19′; long. 80° 04′; from Madrantacam S.E. 16 miles; from Sydapett S. 50 miles; from the sea W. $1\frac{1}{2}$ miles. Peshcush Rs. 168.——*Pattaulam* (பட்டாளம் - pattálam, Tam.). Means regiment. Village, Railway station; pop. 869; acres 641; lat. 12° 36′; long. 80° 00′; height 86 feet; from Madrantacam N.E. 7 miles; from Sydapett S. 34 miles; from the sea W. 16 miles.——*Perively* (பெருவேலி - peruvéli, Tam.). From (peru, tam. large + véli, tam. fence). Zemindarry, Village; pop. 807; square miles $2\frac{1}{16}$; lat. of village 12° 26′; long. 79° 57′; from Madrantacam S. 5 miles; from Sydapett S. 45 miles; from the sea W. 15 miles. Peshcush Rs. 488.——*Pernugger* (பெருநகர் - perunagar, Tam.). From (peru, tam. large + nagara, san. city). Village; pop. 2,233; acres 3,535; lat. 12° 39′; long. 79° 42′; from Madrantacam W.N.W. 18 miles; from Madras S.W. 52 miles; from Sydapett S.W. 45 miles; from the sea W. 36 miles. Ancient Shiva temple, elaborately sculptured and containing many inscriptions. Old Vishnoo temple. East of village is a ruined jeina temple, stones of which were used in building Vishnoo temple. In bed of tank are three cairns [paundicoozhy].——*Pondore* (போந்தூர் - póndúr, Tam.). From (póndu, tam. palmyra tree, borassus flabelliformis, linn. + úr, tam. village). Zemindarry, Village; pop. 213; square miles $1\frac{1}{4}$; lat. of village 12° 20′; long. 79° 58′; from Madrantacam S. 13 miles; from Sydapett S. 52 miles; from the sea W. 8 miles. Peshcush Rs. 3,627. Old Vishnoo temple.——*Shaulwaukum* (சாலவாக்கம் - shálavákkam, Tam.). From (shálai, tam. avenue + vákkam, tam. village). Village; pop. 1,922; acres 1,081; lat. 12° 40′; long. 79° 56′; from Madrantacam N. 11 miles; from Sydapett S.W. 33 miles; from the sea W. 22 miles. Between Ootramallore and Chingleput. Being conveniently situated in the centre of a fertile country it was always the head-quarters both of Hindoo and Mahomedan revenue officers. The fort, a Hindoo work, was maintained by Mahomedans when they occupied country.——*Tonnaud* (தொன்னாடு - tonnádu, Tam.). From (tol, tam. old + nádu, tam. country). Zemindarry, Village; pop. 654; square miles $1\frac{1}{4}$; lat. of village 12° 24′; long. 79° 58′; from Madrantacam S. 8 miles; from Sydapett S.W. 47 miles; from the sea W. 13 miles. Peshcush Rs. 238.——*Vilangaud* (விளாங்காடு - vilángádu, Tam.). From (vilá, tam. wood-apple tree, feronia elephantum, corr. + kádu, tam. forest). Zemindarry, Village; pop. 474; square miles $2\frac{1}{16}$; lat. of village 12° 21′; long. 79° 58′; from Madrantacam S. 11 miles; from Sydapett S.W. 51

miles; from the sea W. 24 miles. Peshcush Rs. 297. Trig. station in lat. 12° 20′ 34·18″; long. 79° 58′ 31·18″; from Madrantacam S.S.E. 12 miles; from Villivaukam N. 6 miles; from the sea W. 8 miles.——*Yendatore* (எண்டத்தூர் - endattúr, Tam.). From (vendu, tam. to grow dry + úr, tam. village). Zemindarry, Village; pop. 1,134; square miles $3\frac{7}{16}$; lat. of village 12° 27′; long. 79° 59′; from Madrantacam S. E. 5 miles; from Sydapett S. 44 miles; from the sea W. 14 miles. Peshcush Rs. 1,599.——*Yidakkay naud* (இடக்கைநாடு - idakkainádu, Tam.). From (idam, tam. left + kai, tam. hand + nádu, tam. country). A strip of land running down the coast of the talcok and separated from the mainland by backwaters.——**(2)** Town, Railway station, Talook head-quarters; Chingleput dist., Madrantacam tal; pop. 5,143; acres 4,451; lat. 12° 30′; long. 79° 56′; height 91 feet; from Chingleput S.S. W. 14 miles; from Conjeeveram S.E. 26 miles; from Madras S.W. 47 miles; from St. Thomas' mount S.W. 39 miles; from Sydapett S. 41 miles; from the sea W. 18 miles. On great southern trunk road, at fiftieth stone from Madras. Vishnoo temple of Codandaramasawmy with inscriptions. Chola inscription at Shiva temple of Vencateshwaran mostly in Grantam [q.v.] and Nagry [q.v.] character. The large tank is formed by damming up the Kiliyaur. Bund [q.v.] is 1½ miles long and circumference when full 7 miles. The calingula, one of the finest works of its kind in the country, is built in the form of a waved line, the height from the crest to the bed of the river below being 30 feet. The southern portion is a curious and beautiful specimen of masonry. Instead of being built in steps, the descent is formed to imitate the curve which the flood water takes in a fresh, and huge blocks of granite [caroomcull] have been hewn into this shape and are bound with lead [eeyam].

MADRAS (मन्दराजपट्टन - mandarájápattana, *San.*; مدراس - madrás, *Hind.*; ಮದರಾಸು - madarásu, *Can.*; చన్నపట్టణం - channapattanam, *Tel.*; മദിരാശി - madiráshi, *Mal.*; சென்னப்பட்டணம் - shennappattanam, *Tam.*). Hind. and can. from (mandarádzu, tel. name of a local telugu royer) [mund]. Tel. and tam. from (channappa, tel. name of a local poligar + pattana, san. town) [maumandore]. Colloquially (pattanam) or city by eminence.——**(1)** Revenue district comprising the city. Area 29 square miles. The Revenue district as originally comprised was conterminous with the present Municipal limits with the exception of some outlying portions of the Perambore division. In 1877 for administrative convenience certain portions of Aminjicaray, Aroombaukam, Maumbalam, Pooliyore and Shirvallore, villages of the Chingleput district which are all parts of tank beds, comprising an area of 1,040 acres, were added to the district. Bounded north, south, and west by Chingleput district; east by the sea. Population 452,518. Tamul, Teloogoo, and Hindostany are the principal languages; but Goozeratty, Marwarree, Canarese and Mahratta are spoken. Contains rivers Adyar and Cooum. General administration is conducted by Collector of Madras, who is also Collector of Sea customs, Protector of Emigrants, Superintendent of Stamps and Stationery and chairman of the Harbour trust board; assisted by two Deputy collectors in charge respectively of the Sea customs and the Quit-rent and Income-tax departments, and a Tahsildar, Rs. 150, whose duties are the supervision of the quit-rent and ground-rent, immediate charge of the Talook treasury, sale of stamps, &c. The Revenue local jurisdiction of the Collector and the Deputy collector is concurrent. For purposes of quit-rent collections, the town is divided into the following 15 divisions, to each of which are attached a conicopoly [q.v.] and an attender:—1 and 2 Mylapore, 3 Nungumbaukum, 4 Egmore, 5 Pursewaukum, 6 Perambore, 7 Vepery, 8 and 9 Tondiarpett, 10 and 11 Moottiaulpett, 12, 13 and 14 Peddanaickenpett, 15 Triplicane. The High court with the Orignal and Appellate branches, and the Small cause court, administer civil justice; while the two Presidency magistrates' courts of Egmore and Black town, with the High court, Original side, conduct the administration of criminal justice. Public works are administered by the Municipality, with the exception of bridges, roads over them, and Government buildings; all of which are in charge of the Executive engineer, Presidency. The tanks [q.v.] are supervised by a technical department called Tank maintenance department, supervised by the same officer. The following are the zemindarries [q.v.] and shrotriems [q.v.] in the district:—Chintaudripett, Maumbalam, Pooliyore, Trivateeshwarampett.——**(2)** City. Lat. 13° 06′; long. 80° 21′. The Madras observatory, in Nungumbaukam is lat. 13° 04′ 05·93″; long. 80° 17′ 22·17″. The city is an aggregate of sixteen hamlets, viz., Chetput, Chintaudripett, Comaleshwarampett, Egmore, Moottiaulpett, Nadoombauray, Nungumbaukam, Peddanaickenpett, Perambore, Pursewaukum, St. Thomé, Tondiarpett, Triplicane, Vepery, Vyausarpaudy, and Yeroongoondam. Lighthouse on esplanade, north of the fort Lat. 13° 05′; long. 80° 20′. White; flashing. Light has five faces and every minute one face flashes towards the same spot, but three faces are presented seaward at one time. 20 miles range. Visible from all directions seaward. Granite column. To guide vessels clear of the Poolicat shoal and into the roadstead. Mariners should not bring this light to southward of S.S.W. ½ W. to avoid Poolicat shoal. Also a leading Light at the Pier T. head. Lat. 13° 06′; long. 80° 21′. Red. Fixed; 5 miles; visible from all directions seaward; wooden post; to guide vessels leaving the harbour or making the anchorage at night. Another leading light on the Port office terrace. Lat. 13° 06′; long. 80° 21′. Green. Other particulars as the last. Map directions and distances from different places:—Anantapore E.S.E. 207 miles; Arcot E. 67 miles; Bangalore E. 185 miles; Bellary S.E. 270 miles; Bombay S.E. 640 miles; Calcutta S.W. 835 miles; Calicut N.E. 330 miles; Cannanore E. 343 miles; Chetterpore S.W. 530 miles; Chittore E. 80 miles; Cocanada S.S.W. 292 miles; Coimbatore N.E. 270 miles; Cuddalore N. 96 miles; Cuddapah S.E. 136 miles; Ernacolum N.E. 346 miles; Hyderabad S.E. 320 miles; Kurnool S.E. 240 miles; Madura N.N.E. 261 miles; Mangalore E. 370 miles; Masulipatam S. 220 miles; Nagpore S. 557 miles; Nellore S.S.E. 96 miles; Ootacamund E.N.E. 266 miles; Pondicherry N. 85 miles; Poona S.E. 570 miles; Salem N.E. 174 miles; Sydapett N.E. 6 miles; Tanjore N. 178 miles; Tinnevelly N.N.E. 245 miles; Trichinopoly N.E. 191 miles; Trivandrum N.E. 386 miles; Vizagapatam S.S.W. 369 miles. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. A general gazetteer account of the city is given at II, 90. For the Municipality, see I, 219.——**(3)** The leading places, &c., in the city are the following.——*Adyar* (அடையாறு - adaiyáru, Tam.). From the fort S.S.W. 5 miles. European suburb on banks of river. For river see sep. title.——*Ameer mahaul* (اميرمحل - amírmahal, Hind.; அமீருமகால் - amírumagál, Tam.). From the fort S.W. 2 miles. Residence of the Princes of Arcot after Prince Azeem jah. Constructed by Government on the site of the old Police Royapettah Court house when the Shaudy mahaul was sold at auction as the property of the mother of Prince Azeem jah.——*Anderson pettah* (ஆண்டர்சன்பேட்டை - ándarsanbéttai, Tam.). Named after Dr. James Anderson of the madras medical service. Is a large block of land at Nungumbaukum, more than eighty cawnies [q.v.] in extent. Granted rent free to the abovementioned by the Court of Directors at the end of the last century.——*Armenian street* (அரமணிக்காரத்தெரு - aramanikkáratteru, Tam.). From the fort N. ½ mile. Begins at the southern end of Black town [q.v.] opposite the Lighthouse esplanade and ends at its northern limit in Moottiaulpett. Towards the end of seventeenth century, wealthy Armenian merchants settled here. Important thoroughfare and contains houses of agency, Roman catholic cathedral, Armenian church and Agra bank.——*Basin* (மூலக்கொத்தளம் - múlakkottalam, Tam.). From (múlai, tam. corner + kottalam, tam. rampart). From the fort N.N.W. 2 miles. A canal basin in north-west corner of Black town outside north rampart wall, where it is spanned by basin bridge. About 300 yards long and 80 broad. There formerly existed, at a distance of 2 miles from the sea and almost parallel to it, numerous detached portions of backwater, which were soon after Hyder's invasion in the latter part of the eighteenth century lengthened and deepened to facilitate carriage of materials for the construction of the north rampart wall of Black town. Subsequently an enterprising merchant named Cochrane continued the excavation and united the several detached portions and improved the basin, and the canal thus formed was named after him Cochrane's canal [q.v.]. The basin and canal belonged to Messrs. Arbuthnot and Co. until 1820, when they were purchased by Government. It now forms part of Buckingham canal [q.v.]. There is a wharf where dues are collected from boats passing up and down the canal, and the basin itself is used as a place of anchorage. Cargoes of firewood [lukdy], grain, salt [ooppoo], fish, condiments [chutney], cocoanuts, gram [q.v.] plantains [q.v.], palmyra [q.v.], and cocoanut [q.v.] fibre [coir] carried over the canal are loaded or unloaded at the wharf.——*Beach* (دريا كنارا - daryákinárá, Hind.; சமுத்திரக்கரை - samuttirakkarai, Tam.). Madras town has 9 miles of sea-coast. The beach throughout is flat and sandy. For the first half mile from the shore the bed of the sea slopes from 6 to about 7 fathoms or 42 feet in depth. After this the slope becomes very gradual, for, at the distance of 3½ miles from the shore, the depth is only 10½ fathoms or 63 feet. The difference of level between high and low tide is about 3 feet only. The two principal currents along shore both flow parallel to the coast. The first, from the north sets in about middle of October, and continues till February, or till such time as the long shore winds [q.v.] begin to blow, when the second current sets in from the south. This current ceases about August, when variable currents and calms set in and continue till the burst of the north-east monsoon [q.v.] in the middle of October. The two principal currents, must be caused by the winds. The velocity at full strength is computed at 3 miles per hour.——*Beach road* (சமுத்திரக்கரைவழி - shamuttirakkaraivazhi, Tam.). Runs along the sea beach for a distance of over 5 miles, from the old town north rampart wall on the north to St. Thomé on the south. Divided into North and South beach roads. The former skirts Black town on its eastern side and is of great commercial importance. It is bounded by the new harbour bounds for some distance on the east, and it contains the Custom house, High court, Stamp office, General post and Telegraph buildings, Houses of Agency, &c. The southern section is the resort of those seeking the évening sea breeze generally from the southern end of the fort to the old Ice house. On this are the Senate house, old Chepauk palace which is now Revenue board office, Public works department offices, and Presidency college. A broad promenade or Marina has been lately constructed from the Cooum bridge on the north to St. Thomé on the south, a distance of three miles.——*Black town* (پٹن - patan, Hind.; பட்டணம் - pattanam, Tam.). Title is name given by earlier English settlers because occupied by the natives, in contradistinction to their own quarters called White town, which latter name however is no longer used. Area about 1,000 acres. From the fort N. ½ mile. Bounded north by Tondiarpett; south by Fort St. George from which it is separated by the esplanade; east by the sea; and west by the Buckingham canal. A low-lying tract, being in some places only 6 inches above the level of the sea at spring-tides. Crowded with houses and narrow streets. Is the centre of trade. Divided into two pettahs [q.v.]; Peddanaickenpett the western half, and Moottiaulpett the eastern. The water pipes from the Red hills [q.v.] reservoirs have considerably improved the health of Black town and form the chief source of water-supply. Before these were laid, the Seven wells [q.v.] and a few wells dug on the esplanades gave a meagre supply. Three broad streets, running north and south divide the town into four nearly equal parts. Mint street is occupied by wealthy sowcars [q.v.] and merchants. Popham's broadway has some of the chief shops and firms. The houses are generally built of clay [calimunn], overlaid with cement [cauray] of choonam [q.v.], and roofed with tile [wode]; and for the most part they consist of continuous rooms, arranged round a small quadrangular court. There is no cultivation, space not being available. Black town possesses some fine buildings, such as Patchiappah's hall, the Madras christian college, the Agra bank, the Evangelistic hall and Church, the Students' home, the late Mint, and the store-houses of the principal European merchants. The drainage, still defective, is being attended to.——*Buckingham canal* (உப்புவாய்க்கால் - uppuváykkál, Tam.). See capital title.——*Burra bazaar* (بڑا بازار - barábázár, Hind.; மார்க்கட்டு - márkkattu, Tam.). From (bará, hind. great + bázár, hind. market). Otherwise General market. From the fort N.N.W. ¾ mile. The largest market of the city, whence supplies for the European residents are chiefly drawn. In the heart of Black town north of Oakes & Co., adjoining Popham's broadway.——*Cassimode* (காசிமேடு - kásimédu, Tam.). From (kási, tam. proper name + médu, tam. high ground). From the fort N.N.E. 3 miles. A straggling village, adjacent to Tondiarpett on the north, and lying along the sea coast. Originally a high sand bank with a few fishermen's huts, but latterly has become thickly populated, and there are some bungalows [q.v.] on the west tenanted by Europeans and wealthy natives, chiefly Mahomedans. The soil is only fit for the growth of casuarina [chowkmaram]. There are a few good roads. The water-supply is not abundant, the chief source being the municipal water pipes and wells. With the exception of the European portion, the whole village presents a poor appearance. Owing to erosions, partly in consequence of the construction of the Madras harbour, the sea is slowly but steadily encroaching, and more than two streets have already been submerged. To obviate further claims for damages, the Government have purchased a belt of land likely to yield to further erosions, and this comprises nearly half the village.——*Chepauk* (بڑا باغ - barábágh, Hind.; சேப்பாக்கம் - shéppákkam, Tam.). Hind. from (bará, hind. large + bágh, hind. garden). Tam. from (shé, tam. beautiful + pákkam, tam.

village). From the fort S.S.W. 1 mile. Originally the whole site now occupied by the Marine villa, the Senate house, the Revenue board's office, the Civil engineering college, the Public works office and the Presidency college, comprised this village; to the back of which lay a large garden. Nothing now left of the village but a few houses occupied by Mahomedans.——*Chetput* (சேத்துப்பட்டு - shéttuppattu, Tam.). From (shéru, tam. marshy ground + pattu, tam. village). From the fort W.S.W. 3½ miles. Small village in the westernmost part of the district consisting of about fifty insignificant huts principally occupied by Vellaular [q.v.], who migrated from the south and took to cultivation and sale of paddy [q.v.], flowers and vegetables [keeray]. Bounded north by Kilpauk, south by the Cooum, east by Egmore, and west by Sydapett talook of Chingleput district. In the northern and western parts are fine houses and gardens, chiefly occupied by Europeans. The locality is marshy, but healthy.——*China bazaar* (چینی بازار - chínibázár, Hind.; பீங்கான்கடை - pingángadai, Tam.). From the fort N.W. ¾ mile. Between Patchiyappah's hall and Tumboo chetty street. European miscellaneous articles retailed here by natives. ——*Chintaudripett* (چنتادری - chinthádárí, Hind.; చింతాద్రిపేట - chintádripéta, Tel.; சிந்தாதிரிப்பேட்டை - shindáthirippéttai, Tam.). From (chintádri, tel. proper name + péta, tel. suburb). From the fort W.S.W. 1 mile. Nearly surrounded by the Cooum river which separates it from Vepery except a slight portion abutting on Mount road. Formerly a mere jungle; now a flourishing densely-populated and fairly well-laid-out little town. Chiefly inhabited by artizans, many of whom are wealthy. Some East indian quarters are springing up. In the centre are two well-built temples of Shiva and Vishnoo, called Audipooreeshwaran and Audikeshava permaul, after Audiyappa naick founder of the village. In the vicinity is a small park called Napier's park after Lord Napier, a former governor. To this the well-to-do classes of this densely-populated locality generally resort in the evenings. Chintaudripett is a shrotriem [q.v.] village conferred in 1787 on Goday mungapaty naidoo and Vencatroyel naick, the descendants of Audiyappa naick, founder of the village, on an annual jody [q.v.] of 30 pagodas [q.v.] or Rs. 105. Audiyappa received the village as a gift in perpetuity from the Golcondah dynasty [raj]. He built the two temples in its centre and also residences for the temple servants. About 1734 Chintaudry and Narrain, head-weavers of Madras and descendants of Audiyappa naick, were granted a cowle [q.v.] permitting them to settle in this village in consideration of their engaging to supply all the cotton [q.v.] that the Company might require. In course of time, this arrangement fell through, and about 1787 two rival parties set up a claim to the soil, one representing the family of Audiyappa naick, and the other alleging that it was Government property available to the public at large. A commission of enquiry recommended that, in consideration of the large outlay incurred in the erection of the temples and the houses, as also of the resumption, on the change of dynasty to Mahomedan rule, of Cadapaukam village which was a free gift to Audiyappa naick, Chintaudripett might be given as shrotriem to his family. This was done under a cowle issued that year in favor of G. Mungapaty naidoo and Vencatroyel naick and with power to raise the rents on the houses, shops, and lands for the upkeep of the temple.——*Choultry plain* (சாவடிமைதானம் - shávadimaithánam, Tam.). From the fort S.W. ½ mile. Shortly after Fort St. George was built, there was a large sandy plain to the south of the fort, extending from the sea on the east to the Cooum on the west, and from Government house bridge on the north to St. Thomé on the south. This tract, the four corners of which are now denotable by the bridge over Cooum, Colonel Law's bridge, Munro bridge and Capper house hotel, was called Choultry plain from a large choultry [q.v.] which then existed. The villages of Chepauk, Triplicane, Chintaudripett, Royapettah, Nungumbaukum and Teynampett now occupy its site. The ground so called began about 2,000 yards south-west of Fort St. George, from which it was separated by the Triplicane river and another stream coming from the north-west passing near the western side of Black town and ultimately joining the mouth and bar of Triplicane river. The low ground included by the channels of the two rivers and the canal, called the island, was about 3,000 yards in circumference. 1,200 yards from the strand of the sea was a long bridge leading from the island over the Triplicane river to a road, which continued south to St. Thomé. Another bridge over the canal led to the west towards Egmore. All the ground between the St. Thomé road and the sea was filled with villages and enclosures; and so was that on the left for half a mile towards the Choultry plain, from which a road and several smaller passages led through them to the St. Thomé road. The Choultry plain extended two miles to the west of the enclosures which bounded the St. Thomé road and terminated on the other side at the Mylapore tank, behind which ran with deep windings the Triplicane river. The road from the Mount passed two miles and a half under the bund [q.v.] of the tank [q.v.], and at its issue into the Choultry plain was a kind of defile, formed by the mound on the one hand and buildings with thick enclosures on the other. From a very early date, the Madras troops not required to garrison the fort usually encamped on this plain, and the Commander-in-chief living on a part of it dated his orders from Choultry plain. The fiction of the latter name was kept up till quite recently. The plain has long since been covered with buildings of every description, and, at the present time, upwards of 70,000 people form its population.——*Cochrane's canal* (காக்குரேன்வாய்க்கால் - kákkurénváykkál, Tam.). Named after Mr. Basil Cochrane who stood security to the contractor on the canal. Part of the present Buckingham canal [q.v.].——*Comaleswarampett* (கோமளேசுவரம்பேட்டை - kómlésuvarambéttai, Tam.). From (kómalésuvaran, tam. the handsome lord shiva + péttai, tam. suburb). From the fort W.S.W. 1½ miles. Temple dedicated to Comaleswaran. Is a hamlet of Egmore and the Egmore villagers claim a mirassy [q.v.] right over the hamlet which is disputed. Is situated on the banks of the Cooum, and the Harris road formed in 1853-54 runs through it. The village contain the residences of a few wealthy natives.——*Cooum* (کهاری - khárí, Hind.; கூவம் - kúvam, Tam.). See capital title.——*Cotton's canal* (காட்டன்வாய்க்கால் - káttanváykkál, Tam.). Named after Col. Cotton, R.E. In the north-western part of Madras district, being in the northern part of Vyausarpaudy division and touching the boundary line of Madras and Chingleput districts. Excavated about sixty years ago. Carries off the surplus water of the Vyausarpaudy tank and the drainage of the surrounding lands. Empties itself into the part of Buckingham canal once known as Cochrane's canal after running a distance of two miles due east. It has been abandoned, and is becoming so silted up that ere long there will be no trace of it left [buckingham canal].——*Egmore* (எழும்பூர் - ezhumbúr, Tam.). From (ezhu, tam. seven + úr, tam. village). The village had originally six hamlets attached to it:—Chintaudripett, Comaleshwarampett, Narraingaud parcherry, Sawmyreddy parcherry, Seetapett, Soorammaulpett. From the fort W. 2 miles. Important suburb and Revenue division. Bounded north by Pursewaukum; south by the Cooum; east by the same river, Chintaudripett and Vepery; and west by Chetput. Contains many good residences. Some cultivation. South indian railway terminus is built near its eastern extremity. Other places of interest are Government central museum, Lying-in Hospital, Police Commissioner's office, Southern division presidency magistrate's court, Revenue survey office, and Scotch kirk, the last an edifice of considerable architectural importance.——*Evening bazaar* (گزری - guzrí, Hind.; குச்சிலி - kuççili, Tam.). Hindostany means road-side market. Called sometimes Thieving bazaar, a corruption from title. From the fort W.N.W. ¾ mile. Originally petty sowcars [q.v.] sold sundry articles in the street at this locality, in the evening. Now a large bazaar [q.v.]. Is between the south-eastern extremity of Mint street and the Ordnance lines on the Esplanade. On its western side there is a Hindoo temple to Cundasawmy. The Memorial hall is a little to its south-east.——*Fort st. george* (قلعہ - kila, Hind.; கோட்டை - kóttai, Tam.). Named after the patron saint of England, Saint George. Lat. 13° 5′; long. 80° 21′. On the sea-shore, between Black town on the north and Triplicane division on the south. Originally a small factory constructed by the East india company as a place of defence and refuge for the few merchants and other Europeans then in Madras. The site was a marshy plain where the Cooum and what was known as the North river met. It was gradually enlarged and improved until it reached its present dimensions. It has six gates, two of which face the sea and the others inland. The fort is in form an irregular polygon, somewhat in the form of a semi-circle of which the sea face is nearly a diameter, running north and south, and presenting a clear front on that side of 500 yards. On the land side the fort is defended by a double line of fortifications, both bombproof; its sea face is well armed with heavy guns. The inner inclosure is so constructed as to afford accommodation to a large body of troops. It is protected by a moat and bastions and is garrisoned by a battery of artillery and a wing of British infantry. See vol. II, 279. Contains offices civil and military, including Government offices, Council chamber, Government arsenal, St. Mary's, the oldest church in Madras.——*Goojelly bazaar* (گزری - guzrí, Hind.; குச்சிலி - kuççili, Tam.). From (guzrí, hind. road-side market + bázár, hind. shop). Same as Evening bazaar.——*Guindy* (గిండి - gindi, Tel.; கிண்டி - kindi, Tam.). Means basin. From the fort S.W. 6½ miles. The country residence of the Governor of Madras. See capital title.——*Hamilton's bridge* (حجام کا پل - hajámkápul, Hind.; அம்பட்டன்வாராவதி - ambattanváráthí, Tam.). Hind. and tam. mean barber's bridge, from barbers being usually seated there. Connects Mylapore and Royapettah.——*Island* (கோட்டைமைதானம் - kóttaimaithánam, Tam.). Vernacular from (kóttai, tam. fort + maithánam, tam. plain). From the fort S.W. ½ mile. Formed by the two arms of the Cooum encircling it, and lies between Fort st. george and the Governor's bridge, the Mount road running through it. It lies low and is partially under water during the monsoons [q.v.]. Used as a parade ground for troops. In 1886, the local gymkhana [q.v.] club erected a handsome stand which is used for races and sports. The Governor's Body guard is at one end with the Camp equipage depôt, St. Mary's, St. Andrew's and St. Patrick's cemeteries, all lying close together. The equestrian statue of Sir Thomas Munro, a former Governor of Madras, occupies the centre. The water surrounding it is crossed by three bridges; St. Mary's, Wallajah, and Governor's.——*Kilpauk*

(கீழ்ப்பாக்கம் - kízhppákkam, Tam.). From (kízh, tam. low + pákkam, tam. village). In contradistinction to Medapauk or high village, adjacent. From the fort W. 3½ miles. Bounded north by Pursewaukum, south by Chetput, east by Pursewaukum, and west by Sydapett talook of Chingleput district. As in Chetput, a few straggling Vellaula families settled here. It now consists of about fifty tiled huts, the inhabitants living by cultivation, although the soil is poor. Possesses fine gardens, good houses with grounds, and good roads. Its situation is low, but it is healthy. Buildings of interest are former and present lunatic asylums. Has small tank with one month's supply and 20 acres of cultivation.——*Krishnampett* (கிருட்டிணம்பேட்டை - kiruttinámbéttai, Tam.). Named after krishnayya a bramin minister of nawaub [q.v.] wallajah [q.v.]. From the fort S.S.W. 2¼ miles. A small hamlet at the northern end of Mylapore to the back of the old Ice house, and consisting of a few straggling tiled huts.——*Long tank* (மைலாப்பூரேரி - mailáppúréri, Tam.). Tam. from (mailáppúr, tam. mylapore + éri, tam. tank). From the fort S.W. 3½ miles. Also called Mylapore tank. Lies in the south-west part of Madras and was excavated in the time of the Gentoo [q.v.] kings. When full it contains five months' supply of water and the cultivation of 812 acres of land, on which paddy [q.v.], betel [q.v.], plantains [q.v.], &c., are raised, depends on it. There is a Tamul proverb:— மயிலாப்பூர் ஏரி உடைந்துபோகிறது என்றால், வருகிற கமிட்டிக்கு ஆகட்டும் என்றாற்போல—"Like saying it may "be deferred to the next committee, on hearing that the "Mylapore tank has given way." Its principal source of supply is the Nungumbaukum tank situated immediately to the north of it, and from which it is separated by the Codambaukam road. The bund [q.v.] lies partly in Madras district and partly in Sydapett talook of Chingleput district. Mount road touches it at the third mile stone, and then runs parallel to its bund for a distance of a mile and a half, until the limits of Chingleput district are reached. Maumbalam, a zameen [q.v.] village in Sydapett talook, is situated in the bed. For conservancy arrangements it is in charge of the Collector of Madras.——*Luz church* (தலைவெட்டிக்கோயில் - talaivettikkóyil, Tam.). Title from Portuguese. From the fort S.W. 3¼ miles. European suburb between Mylapore and Teynampett.——*Marmalong* (மாம்பலம் - mámbalam, Tam.). From (má, tam. plant, mangifera indica, linn. + ambalam tam. open space). Village near Sydapett, which gives name to bridge. The latter spans Adyar river 410 yards; long but narrow; has 29 arches; on the hither side is a square building 14 feet high with pillars at each corner and an inscription in English, Latin and Persian, recording legacy by Adrian Fourbeck, a Madras merchant, for expenses of bridge built from plan and under direction of Lieut.-Col. Patrick Ross, Chief engineer, in 1786; about 6 miles S.W. of Fort; leads to Guindy park, and is often called Guindy bridge.——*Monegar choultry* (மணியக்காரஞ்சாவடி - maniyakkárañjávadi, Tam.). From the fort N.N.W. 2 miles. The oldest charitable institution of Madras, founded in 1808 A.D. Supported by public contributions aided by Government. A lying-in hospital and a surgery ward recently added. Situated to the north of Black town, adjoining the north rampart wall. ——*Moor's pettah* (میر صاحب پیٹھ - mírsáhibpeth, Hind.; மீர்சாயப்புப்பேட்டை - mírsáyappuppéttai, Tam.). Vernacular from (mírsáhib, hind. proper name + péttai, tam. suburb). Village in Mylapore revenue division. From the fort S. 3 miles. Called after a high official of the former Carnatic [q.v.] court. On the Royapettah high road. Bounded north by Triplicane, south by Mylapore, east by Krishnampett, and west by Royapettah. It stands high and its water-supply is indifferent. There is little cultivation beyond cocoanut [q.v.] and betel [q.v.] gardens. There are about two hundred tiled houses originally occupied entirely by Mahomedans, but now by various castes.——*Moottiaulpett* (ముత్యాలపేట - mutyálapéta, Tel.; முத்தியாலப்பேட்டை - muttiyálappéttai, Tam.). From (mutyálu, tel. proper name + péta, tel. suburb). Village. Acres 345. From the fort N. ½ mile. This and Peddanaickenpett form Black town.——*Mount road* (மலைச்சாலை - malaiçálai, Tam.). From being the main road leading from Fort st. george to Saint thomas' mount. Ten miles in length. Begins at the Wallajah gate. The broadest and the most important road in Madras. The portion of it lying in Madras district measures about four miles, the remainder is in Chingleput district. A good portion of the road runs in south-westerly direction, but near Teynampett it takes a turn to the south and runs for some distance parallel to the bund of the long tank. There are many shops and other important buildings and objects of interest on both sides of the Madras portion of it. The chief of these are Government house, the Banqueting hall, the Vizianagram maharajah's water-fountains, statues of Sir Thomas Munro and General Neil, Thousand lights, St. George's cathedral, Government agrihorticultural gardens, and the Government bakery. Wheel traffic of all kinds is heavy.——*Munnady* (மண்ணடி - mannadi, Tam.). From (man, tam. sand + adi, tam. bottom). From the fort N. 1 mile. Name of a street connecting Popham's broadway on the west, and Lingachetty street on the east. When Popham's broadway was the bed of a river separating Peddanaickenpett from Moottiaulpett, the only ford was at this spot.——*Museum* (عجائب کالج - maríkálij, Hind.; விநோதக்காலேசு - vinóthakkálésu, Tam.). Hind means dead animal's college. From the fort S.W.W. 2 miles. In Egmore, established by Government in 1851. Contains a natural history section, a herbarium, collection of coins, &c. Attached to it is a reading room, a general and a scientific library. Open gratuitously to the public daily and to gosha [q.v.] ladies on the first Saturday of every month.——*Mylapore* (மயிலாப்பூர் - mayiláppúr, Tam.). From (mayil, tam. peacock + pura, san. city). Referring according to bramins to the tradition that parvaty [q.v.] worshipped her husband shiva [q.v.] here in the form of a peacock [mayil]. Sanscrit name (mayúrapurí), means the same; also (vámanát'hapura), meaning shiva + lord + town. From the fort S.S.W. 3½ miles. Bordering the sea and near the open suburbs of the Adyar and the Luz. Bounded north by Nungumbaukum, Poodoopauk, and Triplicane; south by the Adyar river; east by the sea; and west by Sydapett talook of Chingleput district. Former residence of the Gentoo [q.v.] rulers. In the fifteenth century, the Portuguese formed a commercial settlement and built a fort here, of which no trace remains. The Cooral [q.v.] was written here. Also the principal scene of the labors of St. Thomas [q.v.] in India. The shrine regarded as the tomb of the apostle was visited by travellers in the twelfth and thirteenth century. There is a Shiva temple dedicated to Capauleshwaran with a fine tank in front approached by flights of steps. This tank has a mantapam [q.v.] in the centre of the water and is surrounded on all sides by substantially built houses of well-to-do natives. The place has no commercial importance now, but is a favorite Bramin residence. The soil is a fertile reddish loam, and plantains [q.v.], betel [q.v.], sugar-cane [q.v.] and paddy [q.v.] are cultivated to a limited extent. A little pot-making [chatty] and cloth-making is carried on, but chiefly for local supply. For Mylapore tank, see Long tank.——*Nedoombaray* (நெடும்பறை - nedumbarai, Tam.). From (nedu, tam. long + parai, tam. pariah caste). In the middle of the last century a number of Pariah families settled in it, and called the place Clive's pettah, after the then Governor of Madras, Lord Clive. Village in Perambore revenue division. From the fort N.W. 2 miles. In the north-western part of the district. Bounded north by Vyausarpaudy and Perambore divisions, south by Pursewaukum, east by Vepery division, and west by Perambore. It lies low, being covered with water during the monsoons [q.v.], and is considered unhealthy. The soil is so saline that there is no cultivation. There are about fifty tiled houses, occupied by pot-makers [coosavan] and Pariahs [q.v.] employed in the municipal slaughter-house close by. ——*Nungumbaukum* (நுங்கம்பாக்கம் - nungambákkam, Tam.). From (nungamudu, tel. proper name + pákkam, tam. village). Tel. name (bommarádzupuram). One of the Revenue divisions. From the fort W.S.W. 3¾ miles. Bounded north by the Cooum and Sydapett talook; south by Mylapore division; east by the Cooum and Poodoopauk; and west by Sydapett talook. The Teloogoo name was after a Carvetnugger zemindar named Bomarauz, to whom the village and the surroundings originally belonged. He divided this whole tract of land into 100 parts, four of which he dedicated to the local temples of Shiva and Vishnoo, and the remaining ninety-six were divided equally among twenty-four Bramin families. One Noongama naick, who was appointed by the zemindar to look after these charitable grants, excavated the tank in this village, which is now the third largest in the district, and called the village after his own name. Being more than 3 miles from the crowded parts of the town and having very good drinking water, it is about the healthiest part of the city and much sought after as a place of residence by well-to-do classes. On September 25th, 1708, a purwanna [q.v.] was received by the British from Davood khan, Nawaub [q.v.] of the Carnatic [q.v.] portion of the Golcondah [q.v.] soobah [q.v.], granting the towns of Vyausarpaudy and Nungumbaukum. In October 1713, these towns were resumed by Nawaub saadat ool lah khan. On January 5th, 1716, firmaun [q.v.] was received from the Emperor, Ferokshere, cancelling this resumption and confirming the grant. On September 10th, 1746, the town surrendered with the city of Madras to the French. On August 15th, 1749, delivered up as part of the city of Madras by the French under the operation of the treaty of Aix-la-chapelle, dated 7th October 1748. In 1765, the old grants were confirmed by firmaun of the Moghul. The College hall and the Government observatory are the only places of interest. There are many fine bungalows [q.v.] with extensive compounds and gardens, chiefly occupied by European gentlemen. Products are paddy [q.v.], betel [q.v.], plantain [q.v.], sugar-cane [q.v.], and ordinary vegetables [keeray]. The soil is fertile, being a rich black loam. 161 acres depend on the tank.——*Partasaurathy coil* (பார்த்தசாரதிக்கோயில் - párttasárathikkóvil, Tam.). From the fort S. 2 miles. In Triplicane. Principal Vishnoo temple in the city. Festival in Chittray [mausam] or april.——*Patchiappah's hall* (பச்சையப்பாசாலை - paççaiyappásálai, Tam.). North of the Esplanade.——*Peddanaickenpett* (పెద్దనాయనిపేట - peddanáyanipéta, Tel.; பெத்தநாயக்கன்பேட்டை - pettanáyakkanbéttai, Tam.). From (peddanáyakudu, tel. proper name + péta, tel. suburb). From the fort W.N.W. ¾ mile. This and Moottiaulpett form Black town.——*Perambore* (பெரம்பூர் - perambúr, Tam.). From (pirambu, tam. cane + úr, tam. village). The site having been a cane [rattan] jungle in which families of Vellaulas [q.v.], who had

migrated from Madura and Tinnevelly, were allowed to build huts in the time of the Tondiman [q.v.] rulers. From the fort N.W. 3¼ miles. Chief village of the revenue division of that name. Bounded north by Vyausarpaudy, south by Pursewaukum, east by Nedoombaray, and west by Sydapett talook of Chingleput district. Since the opening of the Madras railway, thirty years ago, the place has risen greatly in importance. The Madras railway company's work-shops being situated there, a very large number of its employés, European, Native, and Eurasian, live in the neighbourhood.——*Periamett* (بڑی میٹ - barímet, Hind.; பெரியமெட்டு - periamettu, Tam.). Hind. from (barí, hind. large + mettu, tam. toll-gate). Tam. from (periya, tam. great + mettu, tam. a toll-gate). From the fort W. 1¼ mile. Within a mile of Black town and in a somewhat elevated situation on the northern bank of the Cooum. Bounded north and west by Vepery division, of which it forms a part for revenue administration; east by the People's park; and south by the Poonamallee road. During Mahomedan rule the chief station where moturfa [q.v.] was collected on articles brought into the town. The inhabitants are for the greater part either laborers, or keepers of stores from which oils and condiments, imported wholesale, are supplied to all the bazaars [q.v.] in Madras.——*Pier* (دریا کا پل - daryákápul, Hind.; சமுத்திரவாராவதி - shamuttiravárávathi, Tam.). Vernacular means sea-bridge. From the fort N. 1¼ miles. Screw-piled pier, 40 feet broad and jutting out 1,000 feet into the sea. Has stairs down to the water. Landing and shipping effected by lighters to the pier-head and thence conveyed to Customs-house by railway. Opposite Sea customs house.——*Pooliyore* (புலியூர் - puliyúr, Tam.). From (puli, tam. tiger + úr, tam. village). From the fort W.S.W. 4¾ miles. Is in the Sydapett talook of the Chingleput district, but a small portion was transferred to Madras district in 1877 for tank conservancy purposes. Occupied mostly by Vellaulas [q.v.].——*Poonamallee road* (پھولمری کا رود - phulmaríkárod, Hind.; பூந்தமல்லிரோட்டு - púndamallíróttu, Tam.). Traverses Madras nearly through its centre from east to west for a distance of about 4 miles and connects it with the military cantonment of Poonamallee and hence its name. One of the general system of military roads constructed by the British prior to railways.——*Poothoopauk* (புதுப்பாக்கம் - puthuppákkam, Tam.). Etym. from (puthu, tam. new + pákkam, tam. village). From the fort S.W. 1 mile. See Trivateeshwarampett.——*Poothoopett* (புதுப்பேட்டை - puthuppéttai, Tam.). From (puthu, tam. new + péttai, tam. suburb). From the fort W.S. W. 1¾ miles. Almost in the centre of district on the north bank of the Cooum. Bounded north and west by Egmore division, of which it forms a part for revenue purposes, and south and east by the Cooum. A low-lying tract. Poor Mahomedans and Native christians are its chief inhabitants. The site formerly belonged to a member of the Nawaub wallajahs' family, but became through the owner's embarrassments the property of a sowcar [q.v.], who divided it into small blocks, which he sold as house sites about half a century ago. The town which sprang up was called Poothoopett or New town, in contradistinction to the Black or Old town. Chief industries are jewel-making, clock-repairing, and type-casting, conducted chiefly by Native christians.——*Popham's broadway* (மார்க்கட்டுதெரு - márkkattutteru, Tam.). Title from Mr. Popham, a merchant, and from its being the broadest street in the town at that time. Tamul means market-street. Runs from north to south and divides Black town into two parts, the western being styled Peddanaickenpett and the eastern Moottiaulpett. Begins opposite the north glacis of Fort st. george and runs due north, ending with the north rampart wall of Black town. About 1½ miles in length and bordered by shops and places of business, the general market and civil debtors' jail being also situated in it. Several streets cross it at right angles, and there is a continual stream of traffic. From its site having originally been the bed of what was formerly known as the north river, the situation is low and liable to being flooded during heavy rains.——*Pully teynampett* (பள்ளித்தேனாம்பேட்டை - pallitténámbéttai, Tam.). From (palli, tam. cultivating caste + ténámbéttai, tam. place so called). From the fort S.W. 3¾ miles. Portion of Teynampett, which see.——*Pursewaukum* (புரசவாக்கம் - purasavákkam, Tam.). From (purasu, tam. bastard teak, butea frondosa, roxb. + pákkam, tam. village). There was a close jungle here in the days of the Gentoo [q.v.] rulers. One of the Revenue divisions. From the fort W. 2 miles. Bounded north by Perambore, south by Egmore, east by Vepery, and west by Kilpauk and Chetput. Connected with Fort st. george by several good roads. A large number of Vellaula [q.v.] families migrated from Madura and Tinnevelly districts and this porasam [palaus] jungle was assigned to them as the site for a settlement. It has since increased in size and importance and now forms a separate revenue division of the Madras district on its western side. It lies high and has good drainage. Its climate is healthy, water-supply good, and soil fertile, being black sandy clay. Inhabited by persons of all classes and possesses some fine terraced houses with gardens. Too closely built over to allow of cultivation. Shiva temple in the middle of this suburb, erected soon after the formation of the Vellaula settlement.——*Quibble island* (குவிபில்தீவு - kuvibildívu, Tam.). So called because a portion of the high lying land in its centre changed hands owing to a quibble in a court of law. This is the derivation usually given. Area 47½ acres. From the fort S.S.W. 4¼ miles. At the mouth of the Adyar river, in the extreme south-east district. It is not strictly speaking an island, but when the bar of the Adyar river is open at high tide, and during the heavy rains, it is nearly surrounded by water. A portion is high lying and covered with cocoanut [q.v.] and casuarina [chowkmaram] trees, but the greater portion is marshy and during many months of the year an unwholesome and unsightly swamp. A project is under consideration for draining it and converting it into a public park.——*Robertson's pettah* (இராபர்ட்சென்பேட்டை - irábarttusanbéttai, Tam.). Named after Mr. Robertson, a european merchant. From the fort S. 4 miles. Consists of about fifty tiled houses and lies on the east of Brodie's road in Mylapore in the south of Madras. Bounded north and west by Mylapore, east and south by the Adyar. The site is low and marshy during the monsoons [q.v.], not very healthy, and water-supply indifferent. Inhabitants are chiefly laborers, weavers, and servants of Europeans living in the Adyar. The site of the pettah [q.v.] was originally a grant of land from Government, with an area of 20 acres, and belonged to a Portuguese named D'Frouze in 1804. There is no cultivation or trade.——*Royapettah* (రాయపేట - ráyapéta, Tel.; இராயப்பேட்டை - iráyappéttai, Tam.). From (ráyadu, tel. king + péta, tel. suburb). After Krishna deva roya the last of the Gentoo [q.v.] kings, who ruled the country surrounding Madras. Village in Mylapore Revenue division. From the fort S.W. 2 miles. In the south-west part of Madras. Bounded north by Poothoopauk, south by Mylapore, east by Meersahibpett, and west by Nungumbaukum. Connected with the fort by several good roads, of which the principal is Royapettah high road. It lies fairly high and its climate and water-supply are good. Formerly a favorite place of residence with wealthy Hindoos. It is all built over, so there is no cultivation. Lord Harris' school, the Madras club, and the Government hospital popularly known as Royapettah hospital are situated in this suburb.——*Royapooram* (రాయపురం - ráyapuram, Tel.; இராயப்புரம் - iráyappuram, Tam.). From (ráyappa, tel. proper name + pura, san. town). So called by the original teloogoo inhabitants after St. Peter, whom they called royappan. Village in Tondiarpett Revenue division. From the fort N. 2 miles. On the south-east of the division, bordering the sea, north of Black town. Bounded north by Cassimode, south by the north rampart wall, east by the sea, and west by Attapolliem village. Stands on low sandy soil, unfit for cultivation. Its water-supply is not good, but the neighbourhood is considered fairly healthy on account of the open ground surrounding it. Inhabitants are chiefly poor Native christian fishermen or boatmen. St. Peter's church, one of the largest Roman catholic churches in Madras, built in 1790, is situated here. The Madras railway company's terminus was originally erected here; but since the opening of the Central station, the fine building has been chiefly used as offices. The Southern india spinning and weaving mills, Robinson park, and Arcot armoogam moodelliar's fernery contribute to its importance.——*Salt cotaur* (ఉప్పుకొటారు - uppukot'háru, Tel.; உப்புக்கொட்டாரம் - uppukkottáram, Tam.). From the fort N.W. 1½ miles. Salt store. Close to Madras salt depôts and N. of People's park. Terminal goods station of the Madras railway, about a mile from the Central station.——*Seven-wells* (سات باؤری - sátbáurí, Hind.; ஏழுகிணறு - ézhuginaru, Tam.). From having originally been seven in number. From the fort N.N.W. 2 miles. Sunk between 1772 and 1782. When finished they were purchased by the East india company at a cost of about 4 lakhs [q.v.] of rupees [q.v.] in order to supply the troops in Fort st. george with good drinking water. As demand increased, fresh wells were sunk in the neighbourhood, and there are now about 30. They are situated to the north of Black town, adjacent to the north rampart wall. The water is conveyed to the fort by iron pipes under ground, and it is considered to be purer even than that brought from Red hills [q.v.] tank.——*Shoolay* (சூளை - shúlai, Tam.). Means a kiln. From having originally been the site of numerous kilns constructed for the manufacture of bricks when Fort st. george was built. From the fort W.N.W. 1½ miles. Densely populated suburb of Black town. Bounded north by Nedoombaray village, east by Sydenham's road, south by Periamett and Vepery, and west by Pursewaukum. Still the abode of many potters [cosavan] and brickmakers, although the kilns themselves have been removed to more outlying parts. Has Shoolay market, otherwise new market.——*Spur tank* (எழுமூரேரி - ezhumúréri, Tam.). Title from the tank being like a spur in shape. Tam. from (ezhumúr, tam. egmore + éri, tam. tank). From the fort W. 2¼ miles. Almost in the centre of the city. Bounded north by Poonamallee road, east by Egmore village, south by Spur tank road, and on the west by Chetput. It is of moderate size, and the extent of cultivation depending on it is only 25 acres. It is rain-fed and holds only six months' supply of water. The South indian railway runs right through it from east to west. It was at one time proposed to close the tank and sell the bed as building sites, but this idea was abandoned in consequence of its usefulness to the neighbouring villages, to whose healthiness it contributes in no small degree.——*St. thomé* (மயிலாப்பூர் - mayiláppúr, Tam.). Title from St. Thomas the apostle, who landed here and converted the inhabitants to christianity. Lat. 13° 2′ N.; long. 80° 19′ E. From the fort S.S.W. 3¾ miles. Forms the

extreme north-eastern part of Mylapore, and the natives have no separate name for it. Bounded north by Triplicane, south and west by Mylapore, and east by the sea. It lies on the seashore and is cool and healthy. There are a good many residences of Europeans and well-to-do Eurasians, but the bulk of the population consists of poor Native christians who make their living by fishing. This soil is sandy and unfit for cultivation, and water, though abundant, is brackish, except that supplied in pipes from the Red hills. The place was taken in 1547 by the Portuguese, who gave it its name. It was one of their most important stations on the Coromandel coast [q.v.]. It subsequently belonged successively to the French, the Dutch, the king of Golcondah, the Nawaub of Arcot. On October 2nd, 1749, Mahomed ally [q.v.], Nawaub [q.v.] of the Carnatic [q.v.], granted the English by a firmaun [q.v.] the town of Mylapore or St. Thomé. The English immediately after the restoration on 15th August 1749 of Madras by the French, under the treaty of Aix-la-Chapelle, took possession of St. Thomé, for fear of its falling into the hands of the French. On August 12th, 1765, the grant was confirmed by the Moghul's firmaun. From time immemorial, this town has been crowded every year with pilgrims from various parts of Asia, including Syria, Palestine, and Armenia, eager to visit the spot where, according to tradition, St. Thomas the Apostle suffered martyrdom on 21st December A.D. 58. The generally alleged scene of the martyrdom is a small mount near the petty fort. Others maintain that the apostle was martyred at St. Thomas' mount. According to the traditions of the Native christians, St. Thomas having preached Christianity in Arabia, the island of Socotra, and Malabar, proceeded to the Coromandel coast, and, having succeeded in making many proselytes at Mylapore, excited the violent jealousy and resentment of the Bramins, at whose instigation he was stoned to death by the populace and buried on the mount.——*Teynampett* (தேனம்பேட்டை - ténámbéttai, Tam.). From (teyvavináyagan, tam. proper name + péttai, tam. suburb). Village in Mylapore division. From the fort S.W. $3\frac{1}{2}$ miles. Bounded north by Nungumbaukum and Poothoopauk; east and south by Mylapore, and west by the Mylapore long tank. It is low-lying. Divided into Vellaula and Pully Teynampett. The climate is fairly healthy. The water-supply is abundant, and is drawn from the long tank. Mount road runs through it. Productions are paddy [q.v.], betel [q.v.], plantain [q.v.], sugar-cane [q.v.], and other vegetables for local consumption. It has no trade and its inhabitants are chiefly gardeners and cultivators. Objects of interest are St. George's cathedral, the Agri-horticultural gardens, and the Government bakery.——*Thousand lights* (نقشہ - nakshah, Hind.; ஆயிரம் விளக்கு - áyiramvilakku, Tam.). Hind. means picture. Tam. means same as title. From the fort S.W.W. $2\frac{3}{4}$ miles. Suburb of Madras, called after the building of that name constructed by Oomdat ool omrah, in which the Shiah [q.v.] mahomedans assemble during the Moharram [q.v.] to bewail the martyrdom of the grandsons of the prophet [hoossain]. Situated S.W. of the Madras club, at the acute angle formed by the Mount road with Peter's road, west of Mackay's gardens and north of Saint George's cathedral.——*Tondiarpett* (தண்டையார்ப்பேட்டை - tandaiyárppéttai, Tam.). From (tándavaráyan, tam. proper name + péttai, tam. village). Village, Revenue division. From the fort N. $1\frac{3}{4}$ miles. On the sea-shore immediately north of Black town. It has an extensive sea-board on the east, and the Buckingham canal [q.v.] skirts it on the west. Towards the sea, the tract is an uninteresting sandy plain, with fishermen's and boatmen's hamlets scattered here and there. Owing to the sandy soil it is ill-adapted for cultivation. Towards the north however there are cocoanut [q.v.] topes [q.v.] with good bungalows [q.v.], the summer retreats of well-to-do natives. A fine metalled road runs through the village leading on to Trivettore. On February 10th, 1693, Asad khan, Aurungzeeb's grand vizier, granted the English the three towns of Tondiarpett, Pursewaukum and Egmore. On September 10th, 1746, these were surrendered to the French under Labourdonnais. Ransom fixed by him at 11 lakhs [q.v.] of pagodas [q.v.]; but the stipulation disregarded by Dupleix. On August 15th, 1749, delivered up, as part of the city of Madras, by the French under the operation of the treaty of Aix-la-Chapelle, dated 7th October 1748. On August 12th, 1765, original grant confirmed by a firmaun [q.v.] from the Moghul [q.v.].——*Triplicane* (ترملکہری - tirmulkharí, Hind.; திருவல்லிக்கேணி - tiruvallikkéni, Tam.). From (tiru, tam. holy + alli, tam. white lotus + kéni, tam. tank). Sanscrit name (kairaviní), meaning tank of white lotus. Village, Revenue division. From the fort S.S.W. $1\frac{3}{4}$ miles. Bounded by the Cooum on the north, Mylapore on the south, Nungumbaukum on the west, and the sea on the east. It has a long sea-board, which presents a fine aspect owing to its numerous public buildings. The chief of these are the Marine villa, Senate house, Chepauk palace, Public works office buildings, and the Presidency college. It is densely populated and unhealthy. Water-supply is derived from the Red hills [q.v.] water supplied through municipal pipes. Ancient and richly endowed Vishnoo temple. The presiding deity is Partasauraty [q.v.] of the Pandoos [q.v.]. The temple is mentioned in the Prabandhams [q.v.]. The ancient temple tank is Vedavully pooshcarny. Triplicane is also spoken of in the Stala pooraunams [q.v.]. First formed by detaching portions of Egmore, Poothoopauk and St. Thomé and appropriating them to the temple service and servants. It continued in the enjoyment of the temple authorities till the conquest of the south by the Sultan [q.v.] of Golconda. The East india company subsequently sent a Hindoo ambassador to the Golcondah court to procure a confirmation of the grant of Madras. The latter obtained a free sunnud [q.v.] for the Triplicane pagoda and then recommended that the village should remain under the protection of the company, but that the company's merchants should pay to the pagoda [q.v.] a subsidy of 50 pagodas a year, and that the whole of the revenues that accrued from the village should be enjoyed by the temple. This arrangement was acceded to. During the administration of Mr. Pitt, the company interfered with the revenues and charged the gardens of Triplicane with rents amounting to 151 pagodas and 24 fanams [q.v.], which the company received for many years. The Nawaub of the Carnatic, who was, in virtue of a treaty with the company, compelled to settle in Triplicane, afterwards purchased some of these gardens. The inams [q.v.] granted for the maintenance of the temple have been resumed and in lieu an annual allowance of 1,050 rupees deducted from the gross demand of the village is granted. When the Nawaubs of Carnatic took up their abode at Chepauk, Triplicane became the centre of the Mahomedan population. The residence of the present Princes of Arcot, a fine building called Ameer mahaul, is in the centre of the town. There is no cultivation as the land is all built over.——*Trivateeshwarampett* (திருவட்டீசுவரன் பேட்டை - tiruvattísuvaranbéttai, Tam.). From (tiru, tam. holy + vatéshvara, san. shiva, lord of the baynan tree + péttai, tam. village). From the fort S.W. $1\frac{1}{2}$ miles. About two centuries ago this village was a sandy tract through which a small water-course ran. A Shiva [q.v.] lingam [q.v.] being discovered here by Samoodra moodelly, head conicopoly [q.v.] in the Sea customs house, he erected a small shed over it and appointed a Bramin for its service. Subsequently he obtained from the Nawaub [q.v.] of the Carnatic [q.v.] a grant of land of 12 cawnies [q.v.] for this lingam free of rent, then built from his private resources the fine temple which at present renders the place sacred to Hindoos, marked out the four streets surrounding it and built houses for the pagoda [q.v.] attendants. The revenues from this grant were appropriated for the upkeep of the temple, but the houses in which the pagoda servants lived were rent free and remain so to this day. Some time after Samoodra moodelly purchased $155\frac{1}{2}$ cawnies of land in the neighbourhood from the Mahomedan killadar [q.v.] of Poonamallee for the support of the temple, and had the sale ratified by the then Nawaub of the Carnatic. This land, together with that granted by the Nawaub, was converted into a shrotriem [q.v.] and conferred, free of jody [q.v.], on Samoodra moodelly and his heirs in perpetuity as wardens of the temple. The additional block of land of $155\frac{1}{2}$ cawnies is now known as Poothoopauk. A great portion of this shrotriem land is now in the occupation of private proprietors, and the present shrotriem of Trivateeshwarampett and Poothoopauk does not measure more than 30 cawnies. Houses multiplied in both the villages, and in course of time all, except those occupied by the pagoda servants were charged a monthly rent of 2 annas and 6 pies per house. The present total amount of rent collected per annum, viz., Rs. 700, is spent on the pagoda. In 1795 the present shrotriem of Trivateeshwarampett and Poothoopauk was charged with an annual jody of Rs. 105, which the shotriemdar still continues to pay to Government.——*Vellaula teynampett* (வெள்ளாளத் தேனம்பேட்டை - vellálatténámbéttai, Tam.). From (vellálan, tam. member of that caste + tenámbéttai, tam. place, so called). From the fort S.W. $3\frac{1}{4}$ miles. Part of Teynampett. ——*Vepery* (வெப்பேரி - véppéri, Tam.). From (vémbu, tam. margosa tree + éri, tam. tank). Its site having been originally the bed of a large tank surrounded by veppam [neem] trees. Village, Revenue division. From the Fort W.N.W. $1\frac{1}{4}$ miles. Almost in the heart of Madras. Bounded north by Pursewaukum, east by Periamett and Shoolay, south by Poonamallee road and Periamett, and west by Pursewaukm. Now a large and densely populated locality and one of the most important suburbs of the city. Inhabited by all classes. Nawaub Saadat ool lah khan, Soobahdar of Arcot, granted by way of inam [q.v.] to the company this and villages now included in the city of Madras on November 4th, 1742. Surrendered, as part of the city of Madras, to the French under Labourdonnais on September 10th, 1746. Delivered up, as part of the city of Madras, by the French on August 15th, 1749, under the operation of the treaty of Aix-la-Chapelle, dated October 7th, 1748. Original grant confirmed by firmaun [q.v.] of the Moghul [q.v.] on August 12th, 1765.——*Vyausarpaudy* (வியாசர்ப்பாடி - viyásarppádi, Tam.). From (vyása, san. the sage so called + pádi, tam. village). Vyausan [q.v.] worshipped from this place the tyaugaraja sawmy of trivettore close by, but would not go there, as the tradition was that even the sand of that place was so many shiva lingams [q.v.] which should not be trodden over. Village, in Perambore revenue division. From the fort N.W. $2\frac{3}{4}$ miles. In the north-western part of the district. Bounded north and west by Sydapett talook of Chingleput district, south by Perambore, and east by the Buckingham canal. Consists of about 100 houses. The soil is black clay, but, as it contains much saline matter, it is ill-adapted for cultivation and very little grain is produced. The situation is very low, and, although far away from Black town and possessing a large tank, it is not healthy,

The Madras railway traverses it. The Gun powder factory lies in the precincts.——*Wallajah road* (والاجاه رود - wálájáhrod, Hind.; வாலாசாரோட்டு - válásáróttu, Tam.). After the nawaub of that name. From the fort S.W. 1¼ miles. About two furlongs in the length. Commences from the Mount road near the old Round tannah, now called the Vizianagram maharajah's fountain, and runs from west to east to the entrance of the Chepauk palace buildings. To its south lies Triplicane, while Government house and grounds form its northern boundary. Of little commercial importance, but forms one of the chief approaches to the Marina and the Government offices.——*Wall-tax road* (நெல்லுமண்டித்தெரு - nellumanditteru, Tam.). Vern. from (nellu, tam. paddy + mandi, tam. warehouse + teru, tam. street). After Hyder's invasion in the eighteenth century, the East india company built rampart walls except on the east and the south, where the town is protected by the sea and Fort st. george, respectively. Numerous cells were formed in the rampart walls, and they were occupied by families, who paid a tax for the privilege of living in them. Gradually a road was formed along the wall, which was called Wall-tax road. This road is two miles long and runs from south to north parallel with the Buckingham canal [q.v.], beginning at the General hospital and ending at the north rampart wall of Black town. The wall was demolished in 1859 and its site sold in convenient lots as freehold building blocks. Between 1866 and 1872, the whole site was re-purchased and the Madras railway company's Central station built on it. There is good deal of traffic on the southern portion of road, as large grain bazaars [q.v.] exist in the neighbourhood; but the northern portion is not much used. There are houses on the east side up to the Elephant gate in the southern section, while gardens and the Madras salt cotaurs [q.v.] skirt it on both sides in its northern section.——*Washermanpett* (دھوبی پیٹھ - dhobípeth, Hind.; வண்ணாரப்பேட்டை - vannárappéttai, Tam.). Vernacular means the same thing. From the fort N. 2 miles. South of Tondiarpett. When Fort st. george and the East india company's factory were established and when people began to settle in the present Black town and Moottiaulpett, the washermen and dyers, not finding the accommodation and water-supply necessary for their avocation, settled in the outlying parts, and hence the name. Subsequently, when Black town grew more populous, men of other races and profession went to Washermanpett to the gradual exclusion of the original settlers. The village now contains some excellent bungalows [q.v.] owned by natives of position.——*Yedapolliem* (இடைப்பாளையம் - idaippálaiyam, Tam.). From (idai, tam. the yiday caste + pálaiyam, tam. fortified village). Originally a shepherd settlement. From the fort N.W. 1 mile. Part of Peddanaickenpett.——**(4)** *Madras cloth* (పట్నంరుమాలు - patnamrumálu, Tel.). Generally shortly called a Madras. This was formerly a large bright-colored handkerchief [roomaul], of silk [puttoo] warp and cotton [q.v.] woof, made in Nellore, &c., exported from Madras, and used by the negroes in the West indies as a headdress. The word is still preserved in French, but is obsolete in English [nesavoo].

MADRISSA (مدرسه - madrasah, *Hind.*). From (dars, ar. lesson). A place for reading, a school [maktab].——*Madrissa i azam* (مدرسهٔ اعظم - madarsa-i-azam, Hind.) From (azam, ar. poetical appellation of the last nawaub of the carnatic). Principal Mahomedan school of S. india. Begun by last Nawaub of Carnatic [ghoolaum mahomed ghouse khan], and taken over by British in 1859.

MADURA* (மதுரை - mathurai, *Tam.*). From (madhura, san. attractive) [mad]. Tam. also (álaváy), meaning poison + mouth; as held to be encircled by a coiled serpent whose mouth and tail are joined; also (kúdal), meaning place of meeting and shelter; also (tengási), meaning south + benares. Sanscrit name (hálásya), meaning serpent, the poison-mouthed; also (kadambavana), meaning the tree, authocephalus cadamba, miq. + forest. Greek *μόδουρα*. Muttra [matooray] in N. india, which is a different word, was with the Greeks *μεθόρα*.——**(1)** Revenue district; situated on the Coromandel coast [q.v.]; between 9° 06′ and 10° 50′ N. lat., and between 77° 15′ and 79° 29′ E. long.; bounded N. by Coimbatore, Trichinopoly and Tanjore districts; E. by the sea; S. by the sea and Tinnevelly district; W. by Travancore state; square miles 8,813; pop. 2,608,404; language Tamul. Contains rivers, Goondaur, Varshaleiyaur, Veigay; ports, Attangaray, Caurangaud, Damodaraputnam, Deviputnam, Keelakaray, Mantapam, Marcauyaputnam, Moodiapatam, Moottoopett, Numboodalay, Paumben, Paushiputnam, Pillaymadam, Poothooputnam, Rameshwaram, Tirpaulancoody, Tondy, Vaulimookham, Vedaulay, Yemanangoondoo, Yervaudy; mountains, Alagar hills, Carandamullay, Nuttam hills, Pulney hills, Shiroomullays, Travancore hills; sanitarium, Kodaykarnal. The whole area of the district is represented by the following sub-areas:—Dindigul talook, Madura talook, Mailore talook, Periyacoolam talook, Pulney talook, Ramnaud zemindarry, Shivagunga zemindarry, Tirmungalam talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Madura; Sub-collector, Dindigul, in charge of Dindigul and Pulney talooks; Head assistant collector, Ramnaud, in charge of Ramnaud and Shivagunga zemindarries; Assistant collector, Deputy collector of Mailore division, Madura, in charge of Mailore talook and Madura town; General deputy collector, Madura, in charge of Madura and Tirmungalam talooks. Tahsildars—Dindigul, Rs. 200; Madura, Rs. 225; Mailore, Rs. 175; Periyacoolam, Rs 150; Pulney, Rs. 150; Tirmungalam, Rs. 200. Deputy tahsildars—Oottamapolliem, Rs. 70, range situated in the south of Periyacoolam talook; Kodaykarnal hills, Rs. 100, range situated in the south of Pulney talook; Madura, Rs. 100, range situated in the east of Madura talook; Deputy tahsildar of Madura has virtually no revenue charge. Moothoocoolatore, Rs. 70, range situated in the south of Ramnaud zemindarry; Nilacottah, Rs. 70, range situated in the south of Dindigul talook; Oosilamputty, Rs. 70, range situated in the north of Tirmungalam talook; Ramnaud, Rs. 100, range situated in the east of Ramnaud zemindarry; Shivagunga, Rs. 100, range situated in the south of Shivagunga zemindarry; Tirshooly, Rs. 100, range situated in the west of Ramnaud zemindarry; Tripatore, Rs. 100, range situated in the north of Shivagunga zemindarry; Tirvadaunay, Rs. 70, range situated in the north of Ramnaud zemindarry; Vedasundoor, Rs. 70, range situated in the north of Dindigul talook. Town sub-magistrate of Madura is in charge of a portion of Madura talook and Shivagunga zemindarry. Similarly judicial officers:—Judge, Madura. District munsifs, Dindigul, Madura, Paramacoody, Tirmungalam, Shivagunga. Contains Registration sub-districts, Aroopoocottah, Chinnammanore, Dindigul, Kodaykarnal, Madura, Mailoor, Moothoocoolatore, Nilacottah, Oosilamputty, Paumben, Periyacoolam, Ponmainy, Pulney, Ramnaud, Shivagunga, Sholavandaun, Tirmungalam, Tirparacoondram, Tirshooly, Tirvadaunay, Tripatore, Tullacoolam, Vedasundoor. Contains Forest ranges, Chinnammanore, Dindigul, Madura, Mettooputty, Periyacoolam, Poyyacarayputty. Contains Municipalities, Dindigul, Madura, Periyacoolam, Pulney. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 157; light-houses, II, 169; comparative population, II, 172; location of revenue officers, II, 387; registrars' and sub-registrars' stations, II, 421; ports, II, 423; salt factories, II, 426; rain-gauge stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 515; zemindarries contained, I, 56, and II, 298; special public works, I, 408. A special gazetteer account of the whole district is given at II, 95. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Dindigul, Madura, Mailore, Periyacoolam, Pulney, Ramnaud, Shivagunga, Tirmungalam.——**(2)** Talook, Madura district. Tahsildar's pay Rs. 225. Area 446 square miles. Population 261,195. Language Tamul. Central inland part of district. Bounded:—N. Dindigul and Mailore talooks, E. Mailore talook and Shivagunga zemindarry, S. Tirmungalam talook and Shivagunga zemindarry, W. Tirmungalam and Dindigul talooks. Madura talook is chiefly a plain broken by a few isolated hills and masses of rocks towards the north, west and south. The most important of these are Alagarmullay, Cutchaicutty hills, Elephant rock, Kiloovamullay, Nangamullay, Pasoomullay, Scandamullay, and Vagathoomullay. The principal soils are sand [manal], clay [calimunn], loam, gravel and lime [choonam]. The Veigay valley is the most fertile part. Madura town is the most important centre of trade and industries for the talook. Weaving [nesavoo] and dyeing [shauyam] are the chief industries while trade is carried on in cloths, agricultural produce, and metal [loham] vessels. The rivers Kritamaula, Sathiyaur and Veigay, and numerous tanks [q.v.] are the sources of irrigation. The Veigay has two anicuts [q.v.], viz., Chittanay and Pairanay within the limits of the talook. Camping grounds for troops are available at Chittamputty, Tirparacoondram, Tirvaidagam, and Tullacoolam. Places of archæological interest:—Anoopaunady, Codimungalam, Coonnatore, Coosavaputty, Covilcoorvittoray, Cuttacoolam, Madura, Maudacoolam, Maungoolam, Moollippullam, Nileiyore, Paravay, Pooliyangoolam, Rajaukkalputty, Shengottay, Shileiyoomaun, Sholaicoorchy, Sholavandaun, Tainore, Tirmoogore, Tirparacoondram, Tirvoypcodeiyaurcoil, Vadapalanjy, Velleiyamputty, Vilacherry. Principal trig. stations:—Naugamullay, Scandamullay. The leading places, &c., in the talook are the following.——*Anamullay* (ஆனைமலை - ánaimalai, Tam.). See sep. title.——*Chittanay* (சிற்றணை - shittanai, Tam.). From (shiru, tam. little + anai, tam. bund). Anicut, Village; lat. 10° 04′; long. 77° 56′; from Madura N.W. 19 miles. Site of an anicut across the Veigay constructed by Vishwausa naick, ruler of Madura in the sixteenth century [veigay].——*Goripolliem* (கோரிப்பாளையம் - kórippálaiyam, Tam.). From (gor, pers. tomb + pálaiyam, tam. fortified village). Village, Place of pilgrimage; pop. 843; acres 549; lat. 9° 56′; long. 78° 10′; from Madura N.E. 1½ miles. North of the Veigay. Mosque [musjid], called Syed sultan allah ood deen

durgah, with inam [q.v.] of nine villages, originally granted by Coon paundyan for 14,000 gold pieces. Principal place of Mussalman worship.——*Madura* (மதுரா - mathurai, Tam.). See below.——*Maungoolam* (மாங்குளம் - mángulam, Tam.). From (má, tam. mango tree, mangifera indica, linn. + kulam, tam. tank). Village; pop. 2,355; lat. 10° 02′; long. 78° 17′; from Madura N.E. 12 miles. A mile east is a hill called Caloogoomullay in which is a rock-cut cave and inscriptions. Another rock is known as the Puncha pandava padookye. In the village is a sculptured stone elephant [q.v.], and in the neighbourhood dolmens [coday cull] are found.——*Naugamullay* (நாகமலை - nágamalai, Tam.). See sep. title.——*Pairanay* (பேரணை - péranai, Tam.). From (pér, tam. great + anai, tam. bund). Village; lat. 10° 05′; long. 77° 54′; from Madura W.N.W. 22 miles. Site of the anicut across the Veigay. So named in contradistinction to Chittanay. It is two miles higher up the river than Chittanay [q.v.]——*Scanda mullay* (கந்தமலை - kandamalai, Tam.). From (skanda, san. subrahmanya, the god + malai, tam. hill). Tam. also (tirupparakkunram), meaning holy + god + hill. Sanscrit name (skandagiri), meaning the same. Otherwise Secunder mullay by corruption by Mahomedan fakeers [q.v.]. Village, Hill, Place of pilgrimage; lat. 9° 53′; long. 78° 07′; height 471 feet; from Madura S.W. 4 miles. Celebrated temple. Trig. station in lat. 9° 52′ 34·03″; long. 78° 06′ 40·21″; height 1,048 feet; from Madura S.W. 4 miles; from Tirparacoondram S.W. ¼ mile.——*Sholavandaun* (சோழவந்தான் - shózhavandán, Tam. sholavandán*). From (shózhan, tam. chóla ruler + vandán, tam. he who came). Sanscrit name (chólapura), meaning chola town. Town, Railway station, Sub-registrar's office; pop. 2,885; acres 2,799; lat. 10° 01′; long. 78° 01′; height 547 feet; from Madura W.N.W. 13 miles. On the Veigay. Old fort commanding a pass on main road from Dindigul to Madura. Occupied by Mahomed yoosoof in 1757 to cover the operations of Calliaud against Madura. In the same year, captured by Hyder ally and retaken by British. Two temples and a musjid [q.v.]——*Siroopaulay* (சிறுபாலை - shiruppálai, Tam.). From (shiru, tam. small + pálai, tam. desert tract). Zemindarry, Village; pop. 1,109; square miles 3; lat. of village 10° 02′; long. 78° 07′; from Madura N.N.W. 8 miles. Peshcush Rs. 903.——*Veigay* (வைகை - vaigai, Tam.). See sep. title.——*Velliyacoondam* (வெள்ளியக்குண்டம் - velliyakkundam, Tam.). From (vel, tam. white + íyam, tam. lead + kunram, tam. hill). Zemindarry, Village; pop. 1,072; square miles 5½; lat. of village 10° 01′; long. 78° 14′; from Madura N.E. 8 miles. Peshcush Rs. 2,183.——**(3)** Ancient kingdom, the Paundy mundalam of the Tamuls. μόδουρα βασίλειον πανδίονις of Ptolemy's tables; showing that the Paundyans [q.v.] had transferred their capital from Korkay on the Tamrapurny to Madura on the Veigay before the Christian era. Between 8° and 11° of N. lat. and 95° to 97° of E. long. Bounded north by the Cauvery; east by the Bay of Bengal and Manaar straits; south by Cape comorin and the Indian ocean; and west by the ghauts. In 1324 the Mussalmans occupied the province and held it for fifty years. It subsequently became a province of the empire of Vijianugger kings under whom the Naick [q.v.] dynasty [raj] reigned in Madura from 1559 to 1623. In 1740 it fell into the hands of Chundah sahib and was subsequently under the nominal rule of the Nawaubs of the Carnatic. It came into British possession in the beginning of the nineteenth century. For further information regarding history, &c., see vol. I (120), (154), &c.——**(4)** Deputy tahsildarry, Madura district. Pay Rs. 100.——**(5)** Town, Railway station, Headquarters of division, Talook, Collector, Deputy tahsildar, Judge, Place of pilgrimage, Madura dist., Madura tal.; pop. 87,428; acres 1,217; lat. 9° 55′ long. 78° 10′; height 440 feet; from Dindigul S.S.E. 32 miles; from Kodaykarnal E.S.E. 48 miles; from Madras S.S.W. 264 miles; from Rameshwaram W.N.W. 92 miles; from Ramnaud N.W. 60 miles. Locally known as Tencaushy on the Veigay. From time immemorial the political and religious capital of the extreme south. Also seat of ancient Dravidian college [madura college] consisting of the great Tamul scholars known as Sangattaur [q.v.]. Capital of the Paundyan kings for many centuries. Mentioned by classical writers and well known to the Greeks and Romans. Many Roman copper coins found in river bed. Great Shiva temple, best preserved in S india. The invasion of S. india by Malik caufoor in A.D. 1310 caused the destruction of the original temple, built probably many centuries before Christ. The present temple is formed on the model of most others in Southern india, the small shrine in the centre being the oldest; while the courts with their towers, increasing in size and grandeur with their distance from the shrine, are newer. The present edifices were for the most part built by Trimal naick [q.v.] in the first half of the seventeenth century. The enclosure is a rectangle, 847 feet long by 744 feet wide. There are two temples in the centre; one dedicated to Shiva [q.v.] and the other to Meenautchy [q.v.]. These sanctuaries are said to date from A.D. 1520. The enclosure possesses four large gopoorams [q.v.] and five of less importance; the beautiful teppacoolam tank by the name of Pottaumaray [q.v.] surrounded by a handsome colonnade; and a hall of 1,000 pillars with sculptures of singular merit unequalled elsewhere in India. This building, called the Poothoo mantapam, or Vasanta mantapam, contains statues of Trimal naick and his nine predecessors and their wives. Outside the principal enclosure of the temple to the east is the mantapam [q.v.] built by Trimal naick for the reception of the deity of the temple. It is 333 feet long by 105 feet wide and consists of four ranges of columns all elaborately sculptured, some with the rampant Yaulies [q.v.] and others with human figures. The effigy of Trimal naick, in the central corridor with a canopy over it, is brilliantly painted. At one end of the central corridor is a handsome black basaltic stone canopy. At the east end of the hall is an unfinished gateway commenced by Trimal naick; it measures 174 feet by 107 feet, and if completed would have been the most important gopooram [q.v.] in Southern india. The great gopooram, which is the principal entrance to the temple, has an elaborately carved stone base, and a superstructure of masonry and plaster nine storeys in height, covered with intricate ornaments and figures. The plaster is painted in brilliant colors, but at a distance the general tone is neutral and not inharmonious. The entrance to Meenautchy's temple is to the south of this gate, and its elaborately painted façade of plaster ornamentation and figures is a most picturesque object, although grotesque in detail. The teppacoolam [q.v.] tank measures 995 feet long by 742 feet broad, and has a central garden with a vimaunam [q.v.] in the centre and four pavilions at the corners. About one and a half mile from the station is the palace of Trimal naick, the builder of the Madura pagoda [q.v.] and palaces. The pillars which carry the arches are of masonry, and the foliated brick arches are of choonam [q.v.]. The height of the massive columns gives great dignity to the building, and the plaster enrichments both inside and outside are very remarkable and effective specimens of their class. This palace was destroyed in A.D. 1666 by Trimal naick's grandson Chokkalingam. The tamkam [q.v.] or summer-house is a palace building of the same period erected by Trimal naick for wild beast fights. The old Permaul [q.v.] temple is another object of interest. The following are the travelling distances by road from Madura to different places:—

——**(6)** *Madura college* (மதுராக்கல்விச்சங்கத்தார் - mathuraikkalviççangattár, Tam.). From (kalvi, tam. learning + sangha, san. assemblage). Anglo-indian; native name is Sangattaur [q.v.]. Not a teaching institution, but association of poets, who gave their imprimatur to works they considered classical by giving the writer a place on the board on which they sat. The ruler Vamshashekhara paundyan first founded the College. His son Vamshachoodaumany completed it. There were forty-nine professors; the chief before the appearance of Cooral being Nakkeeran [q.v.], and the chief after being Capilan and Paranau. In the early history a dispute arose between the professors and the Sheiva bramin priests. The priests proved more powerful. This is the meaning of the legend of Nakkeeran the chunkcutter, incurring the wrathful glance of Shiva, and only escaping from being burnt to ashes in the flames emanating from the eye in the forehead of the god, by plunging into the holy pool pottaumaray, and there composing the Antaudy panayam, a poem in honor of Shiva. It was after this that Shiva presented to the professors

a diamond [vajram] bench to sit on, which contracted if an unworthy person offered to sit on it, and expanded to receive a worthy one. The abolition of the Sangattaur is narrated in the following manner. A candidate for a seat appeared in the person of the pariah priest Tirvulloovan, author of Cooral [q.v.]. His book itself when placed on the seat began to expand and continued to do so till all the professors were ejected therefrom. The latter drowned themselves in a neighbouring pool. In consequence the establishment was abandoned. This indicates a Tamul revival against Sanscrit. The following works are the most celebrated which received sanction of college, and they are all by writers of Jeina [q.v.] faith:—Auchaura covay, Calavazhy naurpath, Caurnaurpath, Cooral, Innah naurpath, Inyahnaurpath, Moothoo mozhy caunjy, Nauladiyaur, Naunmany cadigay, Pazhamozhy, Shiroo puncha moolam, Togay, Tricatoocam, Yelauthy. The forty-nine professors were as follows:—Accauracany nutchman, Alangoody vungan, Arisilkizhaur, Aushriyar nullandoovan, Bhaurataınpaudiya peroondevan, Calattorekizhaun, Capilan, Cauvery poomputnatt cauricunnan, Cavisaugara peroondevan, Codinyaulan maunipoothan, Coolapatinayanaur, Covoorkizhaun, Cullaudan, Gotaman, Gownyan, Iraiyan, Keerandaiyan, Marootwan damodaran, Mathooray balausiriyan, Mathooray permaroothan, Mathooray tamul nayaganaur, Maumoolan, Maungoody maroothan, Mosikeeran, Nakkeeran, Nalgoor velviyaun, Nappaulattan, Nariveroottalaiyaun, Naugandevan, Nutchman, Nuttattan, Oogra pervazhoothiyaun, Paranan, Peroom sheettanaur, Pokkiyaur, Ponmoodiyaur, Roodrajenman, Sheettalay shauttanaur, Shengoonroorkizhaur, Sheyalore codoom shengannan, Sheyircauveriyaur maganaur shauttanaur, Shrimethauviyaur, Tainicoody keeran, Todittalay vizhoottandinaur, Vannakkam shauttanaur, Velliveetiyaur, Warriore moothoocoottan, Yerichelore malandanaur, Yilavettan [bhaushay].—— *Madura veerappen* (மதுரைவீரப்பன் - mathuraivirappan, Tam.). A deified person, to whom a small temple has been built at Madura. He cut off his own head before the shrine of Meenautchy [q.v.]. He is the subject of a poem termed Veerappan ammaunay.

MADY (ಮಡಿ - madi, *Can.*; మడి - madi, *Tel.*; மடி - madi, *Tam.*). Literally means to turn; also to die. Lap cloth. Field. ——*Mady cathir* (மடிக்கதிர் - madikkathir, Tam.). From (madi, tam. lap + kathir, tam. an ear of corn). A perquisite belonging to the women engaged in reaping the crops.——*Mady moottaur tauzhy* (மடிமுத்தார்த்தாழி - madimúttárttázhi, Tam.). From (madi, tam. to die + múttán, tam. an elder + tázhi, tam. urn). Large globular sepulchral urns found in the old Dravidian burial places. They are generally pyriform like the gravid human uterus, and with a process at the small end like the cervix uteri. The uterine shape of the urn may have been intentional. The body was placed in a crouching position, and such conceptions are very common among the Tamuls [aursham, paundicoozhy].——*Mercara* (ಮಡಿಕೇರಿ - madikéri, Can.; mercara, Coorg Gov.). From (madi, can. paddy field + kéri, can. street). Can. also (mádapéte), corruption of (mahádévipéte), meaning great queen + suburb, after the principal queen of dodda veera rajendra; also (madhukéri), meaning madhoo, the king + street; also (shukravárasante), meaning friday + market.—"*a*" Talook in the centre of Coorg. Head-quarters at Mercara. Contains the following nauds:—Caggodloo, Hoodikery caunta more, Hooroor noorokal, Mercara, Oolgooly moodgairy. Principal places:—Carnangerey, Catigerey, Maudey.—"*b*" Naud in Mercara talook.—"*c*" Town; capital of Mercara talook; in 12° 26′ north lat., 75° 47′ east long., on plateau 3,809 feet, 128 miles S.W. of Bangalore, 48 miles N.E. of Cannanore, 70 miles E. of Mangalore by the great trunk roads. Population 6,227. Founded in 1681 by Madhoo rajah first Coorg rajah. The original seat of the family had been at Haulairy. Built in 1773 by Hyder. Hyder's garrison driven out in 1782, and Tippoo's general capitulated to Dodda veera rajendra in 1790. Given to the Rajah by the British after the peace of 1792. Occupied by a British force in 1834, the Rajah being deposed and deported to Benares and the present British establishments formed. The palace erected in 1812 by Linga rajendra wodeyar, a large substantial castellated building with numerous windows, is now occupied as a treasury. The principal buildings in the native quarter are the mausoleums of Dodda veera rajendra, the hero of Coorg independence, Linga rajendra and their favorite queens. The central school occupies the site of a handsome building erected by Dodda veera rajendra as a reception house for English visitors. Mercara has now ceased to be a military station. The climate, though it is cold and damp compared with the plains, is favorable to the European constitution. Average annual temperature in May 72° F., in September 64°. Average annual rainfall 139·8 inches. Tiles [wode] similar to those of Mangalore are manufactured. Consists of native town of Mahadevapett, of Fort, and Military cantonment.——*Mulla* (మల్ల - malla, Tel.). From (madi, tel. field). Locative plural. Suffix in place names; as Sooddamulla, meaning pipe-clay fields.

MAGADHAM (मगध - magadha, *San.*). From (maga, san. sin + dhá, san. to generate); braminical name for booddhist [booddha] country. South behar [charitram]. See vol. I (116).

MAGADY (மகடி - magadi, *Tam.*). Wind-instrument with which snakes are enticed from their holes [jeenboorra, tootty].

MAGAZINE (مخزن - makhzan, *Ar.*). From (khizana, ar. to lay up). A store.

MAGHAM (మఘ - magha, *Tel.*; മകം - makham, *Mal.*; மகம் - magam, *Tam.*). Means gift; wealth. The tenth lunar mansion; hence the feast held on that day of Cunny on which the moon's position is in Magham lunar mansion [nacshatram]. Luni-solar [maunam] festival [pundigay, 5c] in sixth solar month Cunny [mausam], i.e., between 15th September and 15th October, a little after Wonam [q.v.] in memory of Bhadracauly [q.v.]. The ceremonies are the same as that of Wonam [maryauday]. ——*Makhrauz* (మఖరాజు - makharádzu, Tel.). Maghay, star + king. Founder of the present line of Carvetnugger zemindars [q.v.]. See vol. I, 58.——*Maushimagham* (மாசிமகம் - másimagam, Tam.). From (máshi, tam. the eleventh tamul solar month + magha, san. the tenth lunar asterism). Luni-solar [maunam] festival [pundigay, 5b]. On the day of full moon [powrnimay] or on the next day thereto, when the moon [chundran] is in the constellation [nacshatram] Magham [q.v.] in the eleventh solar month of Maushy [mausam], i.e., between 12th February and 11th March. This happens each year. It consists in performing ablutions in sacred water. The orthodox fast and make Tarpanam [maryauday, tarpanam].—— *Maushy* (மாசி - mási, Tam.). The eleventh tamul solar month [mausam].

MAGIZH (மகிழ் - magizh, *Tam.*). Means rejoicing, from fragrant flowers. Same as Ilanjy.——*Magizhady saivay* (மகிழடிசேவை - magizhadisévai, Tam.). From (above + adi, tam. foot + shévai, tam. worship). Worship under the fragrant flower tree so called. Local festival [pundigay, 6d] at Trivettore, 6 miles north of Madras. On this occasion the two celebrated birds of Tircalicoondram, which were once rishies [q.v.], said to be thousands of years old, visit the temple. Occurs in the eleventh solar month of Maushy [mausam], i.e., between 12th February and 11th March [maryauday]. See vol. I (94).—— *Mogadam* (மகிழம் - magizham, Tam.). Same as Ilanjy.

MAH (ما - má, *Hind.*). A termination of female names amongst Sheikhs; as Shareefa mah, alam + alaumat [ism]. Cf. Maujoo.

MAH (மா - má, *Tam.*). Otherwise Mow. Means one-twentieth. Superficial measure. 100 goolies = 1 mah; 20 mahs = 1 vaily [alavay, 2a]. Variable. Approximate actual value, 1 mah = 14,400 square feet. Tanjore. See vol. I, 609; II, 518.—— *Maugauny* (மாகாணி - mágáni, Tam.). From (má, tam. one-twentieth + káni, tam. one-eightieth); meaning a measure of a mah [q.v.] and cawny [q.v.]. Distinguish from the teloogoo maugauny [q.v.]. One-sixteenth, or anna [q.v.], or veesam [q.v.].

MAHA (महा - mahá, *San.*). From (mah, sad. to grow). Greek μέγα. Great. Plant first term. Ex., where transl. is of second term:—Ægle marmelos (mahákapitt'ha), feronia elephantum; Ailanthus excelsa (mahánim), melia azadirachta, (maharukha), tree; Ailanthus malabarica (mahánimba), melia azadirachta; Allium sativum (mahaushadha), medicine; Andrographis paniculata (mahátiktá), bitter; Carissa carandas (mahakaramba), carissa; Cedrela toona (mahaním), melia azadirachta; Citrus decumana (mahanáran), orange, (mahánímbú), lime; Citrus medica, var. limonum (mahájambíra), lime, (maháp'halagida), fruit tree; Datura fastuosa (maháshat'ha), wicked; Ipomæa digitata (maháshvétá), white; Ixora parviflora (maharatambalá), ixora coccinea; Lycopersicum esculentum (mahátatámatti), foreign tomato; Melia azedarach (mahánimba), melia azadirachta; Phaseolus mungo (mahásahá), enduring; Pimpinella anisum (mahaduru), cumin; Pterocarpus indicus (mahákutaja), holarrhena antidysenterica; Saccharum officinarum (mahárasa), juice; Sida rhombifolia, var. rhomboidea (mahábalá), sida rhombifolia, var. retusa; Solanum ferox (mahaushadhí), medicine; Solanum indicum (mahatíkrántá), surpassing brinjaul; Trichosanthes palmata (mahakála), black; Zizyphus jujuba (mahadebara), zizyphus. See gloss. paragraphs. ——*Macheen* (ما چین - mahácháin, Hind.). From (mahá, hind. large + chín, hind. china). China [cathay]. Generally used pleonastically coupled with cheen [q.v.] to denote the same country.——*Mahabhaurat* (महाभारत - mahábhárata, San.). See sep. title.——*Maha bhootam* (महाभूत - mahábhúta, San.). From (above + bhúta, san. being). Gross element as opposed to subtle element or tanmautram [q.v.]. The gross elements are five, viz., ether, fire, air or light, water, and earth [bhootam]. ——*Maha calay* (महाकला - mahákalá, San.). From (kalá, san. phase of moon). The conjunction [amavausyay] or opposition [powrnimay] of the sun [sooryan] and moon [chundran]. ——*Mahacauvyam* (महाकाव्य - mahákávya, San.). See sep. title.——*Maha cshetram* (महाक्षेत्र - mahákshétra, San.; മഹാക്ഷേത്രം - mahákshétram, Mal.). From (above + kshétra, san. temple). Temple of first order.——*Mahadevan* (महादेव - mahádéva, San.). From (above + déva, san. god). The great god. Always Shiva [q.v.]. See vol. I (73). There is a Tamul proverb:—மழைபெய்யும் பிள்ளைப்பேறும் மகாதேவருக்கும் தெரியாது—"Even Mahadevan does not "know when it will rain [mazhay], nor when a child will be "born." Hindoo 2nd or pers. name [peyar]; familiarly Mauthoo.

——*Mahadevy* (महादेवी - mahádévi, San.). The great goddess. Always cauly [q.v.].——*Mahajan* (مہاجن - mahájan, Hind.). From the sanscrit (above + jana, san. person). A great man; a banker; Bramin land owner.——*Mahalingasawmy* (மகாலிங்கசாமி - mágalingasámi, Tam.). From (above + linga, san. phallic emblem + svámí, san. master). Deity, especially among Badagas [q.v.] on the Neilgherries.——*Mahalutchmy* (மகாலட்சுமி - magálaççumi, Tam.). From (above + lakshmí, san. the goddess of fortune). Female proper name. Familiarly contracted into Mauchy, Maulutchmy [peyar].——*Maha magham* (महामघ - mahámagha, San.; మహామఘం - mahámagham, Tel.; മാമാങ്കം - mahámakham, Mal.; மகாமகம் - magámagam, Tam.). From (above + magha, san. tenth nacshatram). Means the great magham; so called to distinguish it from Maushy magham occurring once every year, in Maushy. Colloquially Maumaungam. Luni-solar [maunam] festival [pundigay, 5c]. The great Magham feast occurs in 11th solar month Maushy [mausam], i.e., between 12th February and 11th March, once in twelve years, when Jupiter [brihaspaty, gooroo] joins Simham [q.v.], and the full moon [powrnimay] is in or about the asterism [nacshatram] Magham. This time is auspicious for bathing. At Combaconam there is a large tank, the water of which rises once in twelve years, on the above occasion, and when people in great numbers assemble from distant places to bathe and obtain remission of sins. Similar to the Godavery pooshcaram [cotipully] or Krishna [kistna] pooshcaram [q.v.]. A similar festival used formerly to be held every twelfth year at Tirnavoya temple in Ponnany talook, Malabar; this was always the occasion for a Cootam [q.v.] or assembly of all Keralam [q.v.]. There is a Tamul proverb:—மகாமகம் பன்னிரண்டு வருஷத்திற்கு ஒரு விசை—"Maha magham festival is celebrated every "twelfth year." On this occasion certain holy rivers are believed to receive an under current from the Ganges. Special services to Shiva [q.v.] are then performed. There is a proverb:—மாமாங்கமாற்றா பார்க்கக்கூடாது—"Brothers and sisters "when they have not visited each other for twelve years, should "not meet without a propitiatory offering." A cycle of Jupiter [brihaspaty chuckram] is, roughly speaking, twelve years; more accurately 4,332 days [bhaganam, maryauday].——*Maha mauyay* (महामाया - mahámáyá, San.). From (above + máyá, san. illusion). The illusory nature of wordly objects personified, and identified with Doorga [q.v.].——*Maha moony* (மகாமுனி - magámuni, Tam.). From (above + muni, san. sage). Usually limited to Agastyan [q.v.].——*Mahamye* (మహామాయి - mahámáyi, Tel.). From (mahá, san. great + máyí, mahr. mother). Village deity.——*Maha naud* (மகாநாடு - magánádu, Tam.). From (above + nádu, tam. country). Council of a nation. In former times composed of the chief landed proprietors of a naud [q.v.], or district, who met to consider agricultural interests.——*Mahanavamy* (महानवमी - mahánavamí, San.; మహానవమి - mahánavami, Tel.). From (above + navamí, san. ninth day of the lunar fortnight). A feast [pundigay, 3e] observed on the ninth day of the waxing moon [shoocla pacsham] of the seventh lunar month aushweejam [mausam]; the last day but one of the Dusserah [q.v.], on which arms are worshipped [saraswaty poojay].——*Mahant* (महन्त - mahanta, San.; మహంతు - mahantu, Tel.). From (mahán, san. great). The head of a religious establishment of mendicants. According to the mitaucsharam [q.v.] a mahant is succeeded on his death by his virtuous disciple; if no such person is qualified, the mahants of neighbouring mutts [q.v.] meet and elect a successor. The best known mahant in the south is the manager of the pagoda [q.v.] at Tripatty.——*Maha nyaunam* (महाज्ञान - maháñána, San.). From (above + ñána, san. knowledge). Knowledge of the supreme deity [bramh, paramautman].——*Maha peroondevy* (மகாப்பெருந்தேவி - magápperundévi, Tam.). From (above + perum, tam. great + déví, san. goddess). Name of Mauriyamman [q.v.], the small-pox [ammay] goddess.——*Maha pooraunam* (महापुराण - mahápurána, San.). From (above + purána, san. history). Great pooraunam [q.v.], applied to the Bhagavat and Vishnoo.——*Maha pralayam* (महाप्रलय - mahápralaya, San.). From (above + pralaya, san. dissolution). The entire destruction or dissolution of all things after a period commensurate with the life of Bramha [q.v.], when the seven locams [q.v.] and their inhabitants, together with all the saints, gods, and Bramha himself, are annihilated [calpam]. See Pralayam.——*Maharajah* (महाराज - mahárájá, San.; مہاراجہ - mahárájah, Hind.). A supreme king; applied in courtesy to every rajah [q.v.], or to any person of high rank or deemed holy. The religious heads of the Vallabhacharries [q.v.] take this title [peyar].——*Maharany* (مہارانی - mahárání, Hind.). A queen, either in her own right or as wife of a rajah [q.v.]. The term is applied also in courtesy to Hindoo ladies of lesser rank [peyar].——*Maharashtram* (महाराष्ट्र - maháráshtra, San.). From (above + ráshtra, san. kingdom). Mahratta language and country. Capital anciently at Deogarh. About the middle of the twelfth century, the reigning sovereigns were a family of Yadoos [q.v.]. One of Hwen Thsang's nine divisions of S. india, in Chinese Moho-lo-cha. The old Tamul name is Maraudam [bhaushay, charitram]. See vol. I (10). Maharashtram is one of the main sub-divisions of Dravida [q.v.] or Southern bramins [jauty].——*Maharauz* (مہاراج - mahárâj, Hind.; మహారాజు - mahárádzu, Tel.). The great king. Proper name [peyar].——*Maha sancraunty* (महासंक्रान्ति - mahásankránti, San.). The great Sancraunty [q.v.], or sun's entrance into Capricorn [macaram], the winter solstice [oottarauyanam]. The Pongal [q.v.] festival [pundigay, 2b].——*Maha shivarautry* (మహాశివరాత్రి - maháshivarátri, Tel.; மகாசிவராத்திரி - magásivaráttiri, Tam.). Lunar [chaundramaunam] festival [pundigay, 6a], subject to intercalation [adhicam]. Correct name for the yearly Shivarautry [q.v.]; as opposed to monthly. Fourteenth of waning moon [krishna pacsham] of eleventh lunar month of Maugham [mausam] between 11th February and 11th March. When the gods churned the ocean to obtain the water of immortality [amritam], a deadly poison was emitted in the process. To save gods and men from destruction, Shiva [q.v.] drank the poison; but he lay insensible for a time from its effects, in memory of which his followers fast [neelacuntan]. In Egypt there was a similar commemoration for a night of the distress of Osiris. This, in the estimation of the followers of Shiva, is the most sacred of all their observances, expiating all sins, and securing the attainment of all desires during life, and union with Shiva, or final emancipation [mocsham] after death. The three essential observances of Shivarautry are fasting during the whole Tity [q.v.], holding a vigil during the night and worshipping the lingam [q.v.] at the same time. But the ritual is loaded with directions, not only for the presentation of offerings to the lingam, but for gesticulations to be employed, and prayers to be addressed to subordinate divinities connected with Shiva, and to Shiva himself in a variety of forms. After bathing in the morning the worshipper recites his Sancalpam [q.v.], or pledges himself to celebrate the worship. He repeats the ablution in the evening, and going afterwards to a temple of Shiva renews his pledge. Those modes of adoration which are at all times addressed to the different forms of Shiva, and those articles which are peculiarly enjoined to be presented to the lingam, necessarily form part of the observances of Shivarautry. Amongst the forms is the Japam [q.v.], or muttered recitation of his different names, as the worshipper turns between his fingers the beads of a rosary [maulay] made of the seeds of the Roodraucsham [q.v.] or Eleocarpus [roodrauck]; the fullest string contains one hundred and eight [chowraushy] beads, for each of which there is a separate appellation, as Shiva, Roodran, Haran, Shuncaran, Eeshwaran, Maheshwaran, Shoolapauny, Pashoopaty, and others. The feast is particularly observed at Calastry in North arcot district [maryauday]. See vol. I (94).——*Mahat* (महत् - mahat, San.). From (mah, san. to increase). Intellect, first production of Pradhaunam [moola pracrity]. There is a Tamul saying:—மகத்து, தன்னிலும் அதிகமான வஸ்துவில்லாதவர்—"Mahat, besides which there "is nothing great [matam]."——*Mahaty* (महति - mahati, San.). Greater in mathematics [ganitam].——*Mahaulya amavausyay* (మహాలయామావాస్య - mahálayaamávásya, Tel.). Lunar [chaundramaunam] festival [pundigay, 3e], subject to intercalation [adhicam]. The new moon day in Mahaulya pacsham [q.v.].——*Mahaulyam* (महालय - mahálaya, San.). From (above + álaya, san. dwelling); place of refuge. Bramha's abode. Offerings made to the spirits of departed ancestors, fifteen days prior to Dusserah [q.v.].——*Mahaulya pacsham* (మహాలయపక్షము - mahálayapakshamu, Tel.). From (álaya, san. abode + paksha, san. lunar fortnight). Lunar [chaundramaunam] festival [pundigay, 6d], subject to intercalation [adhicam]. The fortnight of waning moon [krishna pacsham] in sixth lunar month Bhaudrapadam [mausam] between 1st September and 15th October, sacred to the world of Bramha [q.v.], the highest heaven. Commonly Mahaulyam. The fortnight is intended to provide for failures in the due performance of the anniversary or annual ceremony or the Paurvana shrauddham or Tarpanam [q.v.] every new moon day [amavausyay]. It is likewise intended for cases, in which individuals have either forgotten the dates of deaths of their ancestors or for ancestors on whose behalf the anniversary or the annual ceremony is not observed. The principal days in the fortnight on which Bramins are bound to perform this ceremony are Mahabharany, Madhyaushtamy, and Vyateepautam. See vol. I (93).——*Mahaulyaurambham* (మహాలయారంభం - mahálayárambham, Tel.). The beginning of Mahaulya pacsham [maryauday].——*Mahautmyam* (माहात्म्य - máhátmya, San.). Means greatness; or the greatness of the place named. Same as Stala pooraunam.——*Mahavanso* (महावंश - mahávamsha, San.). From (above + vamsha, san. lineage). A metrical chronicle in Pali [q.v.] of the dynastic history of the island of Ceylon from B.C. 543 to A.D. 1750. This and other Ceylonese scriptures were reduced to the present form by Booddhaghoshan in the beginning of the fifth century A.D. The 17th chapter is entitled, Arrival of Relics, and details the acquisition to Ceylon of the collar bone and other relics of Booddha [booddha, charitram, rajaratnaucary, rajauvaly]. See vol. I (110).——*Mahavaucyam* (महावाक्य - mahávákya, San.). From (above + vákya, san. saying). High passages in Vedauntam [q.v.], which deal with the subject matter of the origin, modification and extinction of the lord of existence [pralayam, srishty].——*Maha veera charitam* (महावीरचरित - mahávíracharita, San.). From (mahávírá, san. ráma, the great hero + charita, san. story). The adventures of the

great hero. Sanscrit Indian drama in seven acts by Bhavabooty [q.v.]. An abstract of Ramayanam [q.v.].——*Mahavindam* (महाविन्द - mahávinda, San.). From (above + vind, san. to obtain). A book which relates the history of the Puncha pandavas [q.v.] getting their kingdom.——*Maha yanyam* (महायज्ञ - maháyaña, San.). Any great sacrifice or act of worship. Five such are recognized:—Bramha yanyam, study of bramha [q.v.] or the veda [q.v.]; Pitry yanyam, offering to the manes; Deva yanyam offering to the gods; Baly yanyam or bhoota yanyam, worship of all existing things, also of mischievous spirits, by offerings of food scattered in the air; Nri yanyam, worship of man, hospitality [maryauday].——*Maha yoog* (महायुग - mahá-yuga, San.). From (above + yuga, san. period of time). A grand period of general astronomical conjunction, containing 4,320,000 solar sidereal years, and comprehending the four lesser yoogs [q.v.]. The following is the scale:—12,000 devavarshams or years of the gods = 1 Mahayoog or great age, 1,000 mahayoogs = 1 calpam or bramha's day light [caulam, 2]. The distribution and reckoning [maunam] in divine years of the four yoogs with their morning and evening crepuscules, the two latter equalling in each case one-sixth of the total quaternary division, is as follows:—Krityoog [q.v.] 4,000, Sundhyay [q.v.] 400, Sundhyaumsham [q.v.] 400, Total 4,800; Tretayoog [q.v.] 3,000; Sundhyay 300, Sundhyaumsham 300, Total 3,600; Dwaupar [q.v.] yoog, 2,000, Sundhyay 200, Sundhyaumsham 200, Total 2,400; Kaliyoog [q.v.] 1,000, Sundhyay 100, Sundhyaumsham 100, Total 1,200; grand total 12,000. If these divine years are converted into years of mortals, by multiplying them by 360, a year of men being a day of the gods, the following figures are given:—

$4,800 \times 360 = 1,728,000$ years
$3,600 \times 360 = 1,296,000$,,
$2,400 \times 360 = 864,000$,,
$1,200 \times 360 = 432,000$,,

Thus a Maha yoog = 4,320,000 years. So that these periods resolve themselves into the conception of four ages in a deteriorating series expressed by descending arithmetical progression, as 4, 3, 2, 1; the conversion of units into thousands; and the belief that these are divine years, each composed of 360 years of men. The following are some astronomical elements of a Maha yoog:—"*a*" The sun [sooryan] performs 4320000 bhaganams [q.v.] or sidereal revolutions in a Maha yoog; and in the same period of time there are 1577917828 natural or Bhoomy sauvana days [dinam].—"*b*" The moon [chundran] makes 57753336r in the same period.—"*c*" The sun's upper Apsis [mandotcham] makes 387r in a Calpam or 1000 Maha yoogs which Calpam [q.v.] therefore contains 1577917828000 Bhoomy sauvana days.—"*d*" The moon's apogee [chundra mandotcham] makes 488203r in a Maha yoog, with an additive Beejam [q.v.] or correction of four revolutions in the same space of time.—"*e*" The Ayanams [q.v.] or equinoctial points, called sometimes Craunty pautams [q.v.], or Nodes of the ecliptic [craunty mundalam] make 600 revolutions, or librations, if that view is taken of the Hindoo precessional variation [craunty pauta gaty], in a Mahayoog.—"*f*" The Maha yoog is an anomalistic period of the sun and moon, at the end of which the latter, with her apogee and ascending node, is found together with the sun in the first degree of Aries [maisham]; the planets [graham] also deviating from that point only as much as is their latitude [vicshaipam] and the difference between their mean and true anomaly [jyotisham, mandam]. See vol. I, 609.——*Mahbaly* (மாபலி - mábali, Tam.). From (má, tam. great + bali, san. a king). The great Baly [q.v.] giant, probably a very ancient Coorumba [q.v.] ruler.——*Mahcadalpiranda cothay* (மாகடற்பிறந்தகோதை - mágadarbirandagóthai, Tam.). From (má, tam. great + kadal, tam. sea + pira, tam. to be born + kóthai, tam. woman). Lutchmy [q.v.] as born out of the ocean when it was churned by gods [deva] and asoorans [q.v.]. Venus Anadyomene [coormam].——*Mahendragherry* ([illegible] - mahéndragiri, Tel.; மகேந்திரகிரி - magéndiragiri, Tam.). From (mahá, san. great + indra, san. indra + giri, san. mountain).—"*a*" Malli quorum Mons maleus, of Pliny. Hill; Ganjam dist., Berhampore tal.; Mundasa zemindarry; lat. 18° 58′; long. 84° 24′; from Berhampore S.W. 36 miles; from Chetterpore W.S.W. 50 miles; from the sea W. 21 miles. An outlying spur of the Eastern ghauts [q.v.]. The highest mountain in the district. See vol. II, 98. Trig. station, Boodaurasinghy zemindarry; lat. 18° 58′ 00·37″; long. 84° 24′ 29·94″; height 4,923 feet; from Boodurasinghigodo W. 5 miles; from Berhampore S.W. 36 miles; from Chetterpore S.W. 50 miles.—"*b*" Hill; Tinnevelly dist., Nangoonairy tal.; lat. 8° 23′; long. 77° 32′; height 5,370 feet; from Nangoonairy W.S.W. 14 miles; from Tinnevelly S.S.W. 27 miles; from the sea N. 22 miles. Peak of the Coolacaul hills. Said to be the hill from which Hanooman [q.v.] jumped to Ceylon. Southernmost peak of Travancore ghauts. Tea [q.v.] largely grown.——*Mahendratanaya* ([illegible] - mahéndratanaya, Tel.). From (mahéndra, san. a mountain + tanayá, san. daughter).—"*a*" River; Ganjam dist., Sompett tal., Deputy tahsildar's range. Boodaurasinghy and Mundasa zemindarries and Barwah estate. Rises in Mahendragherry and flowing eastwards drains Boodaurasinghy, Mundasa and Barwah zemindarries and falls into the sea near Barwah.—"*b*" River; Ganjam dist., Parlakimedy zemindarry. Rises in Mahendragherry and flowing south into Parlakimedy zemindarry where it fills several important reservoirs for irrigation and passing Parlakimedy town joins the Vamshadhaura.

——*Maheshwaran* (மகேசுவரன் - magésuvaran, Tam.). From (above + íshvara, san. lord). Shiva [q.v.]. Hindoo 2nd or pers. name [peyar].——*Maheshwary* (माहेश्वरी - máhéshvarí, San.). From (above + íshvarí, san. goddess). One of the seven divine mothers [mautah].——*Mahilauropyam* (महिलारोप्य - mahilárópya, San.). From (máhilá, san. female proper name + árópya, san. fixed); founded by mahilay. City where the Punchatantram [q.v.] stories were narrated according to the southern version; evidently Mylapore.——*Mahisham* (महिष - mahisha, San.). Buffalo [khoolgah]. Ancient name for Mysore.——*Mahishamardiny* (महिषमर्दिनी - mahishamardiní, San.). From (mahisha, san. asura, so called + mardiní, san. crusher). Doorga [q.v.], the crusher of Mahishausooran. See Dusserah.——*Mahishan* (महिष - mahisha, San.). Means powerful. An Asooran buffalo-headed, slain by Doorga; the subject of a piece of sculpture at Mauvellipore [seven pagodas].——*Mahout* (مهاوت - mahávat, Hind.). From (mahá, san. great + mátra, san. measure); great in measure; high official. Elephant-driver. He sits on the neck, makes the animal move forward by pressing the pointed end of the goad [ancoosham], stops it by the butt end, and turns it by pressing his leg to the neck. The same man tends the elephant [q.v.].——*Mahratta* (مهراٹا - mahrátá, Hind.). From (above + ráshtra, san. kingdom). Language and race. The southern limit of the present Mahratta language runs from Goa through Kolhapore and Beedar to Chundah. Its eastern line follows the Wurdah to the chain of hills north of the Nerbudda. Those hills are its northern limit as far west as Nandode near the Nerbudda; and its western will be shown by a line from Nandode to Damaun continued along the sea to Goa. Compare Maharashtram [bhaushay, jauty, mullarashtram]. There are many descendants of the Mahrattas who settled themselves in South india during their invasion of the Tamul country; they are regarded as a distinct caste, and they number many castes amongst them. Maharatta bramins [q.v.] are a large branch of the great Dravida [q.v.] division. They embrace the following castes:—Deshastas, to be found in Tanjore; Concanastas; Caraudigar; Canwas; Maudhyandinas; Padyas; Hoossainies, half converts to the Mahomedan faith; and others. Mahratta bramins were extensively employed in the public service during the existence of the Mahomedan kingdoms of the Deccan [q.v.]. See vol. I (169).——*Mahratta buds* ([illegible] - marátimogga, Tel.). As originally brought from mahratta country. These are very young and tender fruits of either bombax malabaricum [red-cotton tree] or eriodendron anfractuosum [silk-cotton tree], but more frequently the former; in some places the buds of poisonous plants, datura alba [white datura] and datura fastuosa [purple datura], are sold under the same name; and in a few the buds of artabotrys odoratissimus [madmaunty]. The young fruits of bombax malabaricum, when separated from their stalks vary in their length from one to three quarters of an inch, and in their thickness from one to two lines; and are five angled or roundish, and conical or tapering; they are brown or dark-brown when old, and grey when new; odourless and slightly aromatic in taste; young as they are they contain minute black seeds, and are distinctly five-celled; the stalks are about the same length as the fruits, one to three quarters of an inch, but somewhat less in thickness paler in color, rough and often knotty or bent in the centre; the fruits, with their stalks attached to them, particularly when fresh, bear a great resemblance to flower buds. In eriodendron anfractuosum the fruit stalk is round, about the thickness of a pin and two or three times longer than the fruit; the fruits are always round without any ridge near the hilum, and somewhat larger and darker in color than those of bombax malabaricum. Medicinally sedative and slightly intoxicant; chiefly used by natives as electuary or in milk in diarrhœa and dysentery to stop purging and to ease pain.——*Mahratta ditch* (مہراٹی خندق - mahrátíkhandak, Hind.). Originally applied to an excavation on the landward-side of calcutta, made to protect the settlement from the mahrattas in 1742. Name given in this presidency to a defensive earthwork round Saint thomas mount [q.v.] raised about the close of the eighteenth century.——*Mahtaud* (مہتاد - mahtád, Hind.). A village peon [q.v.] for watching crops.——*Mahy campam* (महीकम्प - mahíkampa, San.). From (mahí, san. the great earth + kampa, san. quake). Earthquake. Varauha mihiran has the following:—"Some say "that earthquake is caused by huge water monsters and some "that it is caused by the elephants [ashtadic gajam] supporting "the earth, resting for a time from their labor. According to "some earthquake is caused by the violent collision of winds and "their striking the earth in consequence, and according to others "the cause is some invisible and unknown agency. Once upon "a time, in the days gone by, the earth, being shaken by the "rising and falling of winged mountains, addressed Bramha "[q.v.] the creator in the court of Indran [q.v.], as follows, and "with feelings of shame. Lord, I was named by thee as the "unmoving. This character has now suffered, and I am unable "to bear the troubles caused by moving mountains. Bramha, "perceiving her broken speech, trembling lips, bent head and "weeping eyes, spoke as follows:—O Indran, relieve the "earth of her grief; throw thy weapon—the Vajrauyoodham "[vajram]—to destroy the wings of mountains."——*Maitary* ([illegible] - métari, Tel.). From (mehtar, hind. headman). A headman amongst palankeen [q.v.] bearers [boy], washermen

[dhoby], cowherds [golla, yiday], &c. [mehtar].——*Manantoddy* • (മാനന്തവാടി - mánantaváti, Mal.). From (má, mal. large + ananta, san. endless + váti, san. garden). Town, Deputy collector's and tahsildar's and North Malabar district forest officer's head-quarters; Malabar dist., Wynaud tal.; lat. 11° 48′; long. 76° 03′; from Calicut N.N.E. 40 miles; from Cannanore E.S.E. 43 miles; from Madras W.S.W. 300 miles; from Malapooram N. 51 miles; from Palghaut N.N.W. 82 miles; from Ponnany N.N.E. 68 miles; from Tellicherry E. 34 miles. Principal town of Talook. Was one of the chief towns of Wynaud coffee [q.v.] tract. The coffee has been largely replaced by lantana, wild cholum [q.v.]. Early in the century a military out-post. In 1802 the garrison was massacred by the Cotiote rebels. Travellers' bungalow [q.v.]. Centre of some trade. Weekly market on Sundays. Government botanical gardens. Formerly a cantonment.——*Maraudam* (மராடம் - maráדam, Tam.). Mahratta country.——*Maul* (மால் - mál, Tam.). Greatness. Name of Vishnoo [q.v.]; especially used in combination with other words, as Permaul [q.v.].——*Mauloondivandone* (மாலுந்திவந்தோன் - málundivandón, Tam.). From (mál, tam. vishnu + undi, tam. navel + vandón, tam. one who came). Bramha [q.v.], who is sprung from Vishnoo's navel according to Veishnava pooraunams [pooraunam, pralayam].——*Maumoondiyaur* (மாமுண்டியார் - mámundiyár, Tam.). From (má, tam. great + mundu, tam. to be unruly + áru, tam. river). River; Trichinopoly dist., Coolitalay tal. Rises in Cadavore and Maroongapoory hills, and flows into Wyacondaun channel just above Trichinopoly, where it causes damage by high floods. Known also at different stages as Ariyaur, Coraiyaur, and Ponnanayaur.——*Mausticull* (ಮಾಸ್ತಿಕಲ್ಲು - mástikallu, Can.). From (mahá, san. great + satí, san. a virtuous wife + kallu, can. stone). A slab of stone, about four feet high, bearing the sculpture of a pillar [stambham] or post with a human arm projecting from it and underneath a rude sculpture of a man and his wife. These stones mark the spots where widows became suttee [aursham, paundoocull].——*Mauthoo* (மாது - máthu, Tam.). Familiar contraction of Mahadevan, the great god Shiva. Also of Maudhava or vishnoo. Hindoo 2nd or pers. name [peyar].——*Mauvelicara* (മാവേലിക്കര - mávélikkara, Mal.). From (mávélan, mal. subrahmanya, the great spear-god + kara, mal. village).—"*a*" Talook; Travancore state, Quilon division. Contains 145 caras or villages; pop. 111,731. Its greatest length N. to S. is 10 miles, and its greatest breadth E. to W. is 17 miles. It is sub-divided into 8 praverties [q.v.]. Bounded N. by Chengancre talook, E. and S. by Coonnatore talook, and W. by Caroonaugapully and Caurtigapully talooks.—"*b*" Town, Head-quarters of Talook and Tahsildar; Travancore state, Quilon division, Mauvelicara tal.; pop. 13,218; lat. 9° 14′; long. 76° 35′; from Alleppey S.E. 22 miles; from Cauyancollam N.E. 5 miles; from Cottayam S. 24 miles; from Madras S.W. 367 miles; from Nagarcoil N.W. 93 miles; from Paravore S.S.E. 65 miles; from Quilon N. 25 miles; from Trivandrum N.N.W. 58 miles; from the sea E. 9 miles. Former capital of Mauvelicara principality. At present the residence of the Mauvelicara rajahs, from whose family the Travancore royal family usually make their adoptions [dutt] whenever there is an occasion of so doing. Contains the remains of a Dutch fort. Centre of the Church missionary society. It is situated on the Coolacudda river and contains a large Nayar [q.v.] population. ——*Mauvellipore* (மாவலிப்புரம் - mávalippuram, Tam.). Seven pagodas [q.v.].——*Mauvilingam* (மாவிலங்கை - mávilangai, Tam.). From (má, tam. large + villam, tam. bael, ægle marmelos, corr. + kai, tam. bitter); fruit like that of bael but bitterish. Same as Nirvala.——*Mauvratam* (மாவிரதம் - máviratham, Tam.). From (má, tam. great + vrata, san. vow). One of the six divisions of orthodox Sheivism [ootchamayam]. ——*Mehtar* (مہتر - mehtar, Hind.). From persian meaning great. A head or chiefman; honorific title of sweepers, &c. [maitary], perhaps in irony.——*Moplah* (മാപ്പിള - máppilla, Mal.; மாப்பிள்ளை - máppillai, Tam.). From (má, mal. great + pilla, mal. child, title). A bridegroom, son-in-law. Also honorary title given to colonists from the West, perhaps at first only to their representatives. The name now applies in native usage to Mahomedans, Christians and Jews. Mahomedans are sometimes called Jonaca [q.v.] moplahs, to distinguish them from the christian moplahs who are Nasrauny [q.v.] moplahs. By the English the term is always used as meaning the West coast mahomedans, mostly a mixed race of original Arab fathers with native women. The settlement of Mahomedans in Malabar goes back to ninth century A.D. The Moplahs have numerous mosques [musjid]. Their spiritual chief, denominated Tangal [q.v.], resides at Ponnany and is maintained by lands which have been allotted for the purpose. The Moplahs are active and enterprising, and possess much landed property. They have been restless under British rule and have repeatedly risen in insurrections, but these have been local. Under the influence of religious excitement, they are reckless of their own lives or those of others, and the presence of European troops in the district has always been considered necessary to secure peace. There have been several outbreaks. They all speak Malayalam, but they use a modified form of the Arabic alphabet to write it in. The Moplah women are secluded. The Moplahs of N. malabar follow Maroomakkatoyem, those of S. malabar, with few exceptions, follow ordinary Mahomedan law. Among those who profess Maroomakkatoyem [q.v.], the practice frequently prevails of treating the self-acquisitions of a man as descendible to his wife and children under the Mahomedan law. Among those who follow the ordinary Mahomedan law, it is not unusual for a father and sons to have community of property and for the property to be managed by the father and, after his death, by the eldest son. The Lubbays [q.v.] of the South-east coast, the Moors [q.v.] of Ceylon, and a large proportion of the Maldive islanders in the Atolls [q.v.] have sprung from an origin similar to that of the Moplahs of Malabar. See vol. I (17), (37), (51); II, 103,233 [jauty]. Moplahs number some 500,000 [arab, turk, yavana].——*Mysore* (ಮೈಸೂರು - maisúru, Can.). See sep. title.

MAHABHAURAT (महाभारत - mahábhárata, *San.*). From (mahá, san. great + bhárata, san. relating to bharata, the hero) [maha]. Otherwise Bhauratam. The great epic poem of Hindoos. Later than Ramayanam [q.v.]. Corresponds to Greek Iliad. The longest in the world. Divided into 18 parvams [q.v.] and contains about 220,000 lines. Reputed compiler Krishna dweipauyanan, otherwise Vyausan [q.v.] or the fitter together. There are several great wars indicated in Hindoo story; as:—Soobramanyan against asoorans; Parshooraman against cshatriyas; Rama against ravanan and other raucshasans; Doorga against mahishausooran; Pandavas against cowravas or mahabhaurat. The original legend of the Pandavas is properly Cashmerian. The leading subject of Mahabhaurat is the war between them and the Cooroos. The object of the struggle was the kingdom whose capital was Hastinapooram, the ruins of which are traceable fifty-seven miles north-east of Delhi, on an old bed of the Ganges. The following table shows the genealogy :—

Bharatan.

Dhritaraushtran. Pandoo—Coonty.

A hundred sons, the Cooroos or Cowravas; the eldest son was Dooryodhanan.

Yoodhishtiran. Bheeman. Arjoonan. Nacoolan. Sahadevan.

Drowpady was their joint wife.
These were the Pandoos or Pandavas.
Their tutor was Dronan.

Bharatan was the head of one branch of the great Lunar race [aryan, vamsham]. Pandoo, though he was the younger son, succeeded Bharatan, but abdicated the kingdom in favor of Dhritaraushtran, and retired to the Himalayas, where he died. His sons returned, and Yoodhishtiran was installed as his uncle's coadjutor and successor. The jealousy of Dooryodhanan and his brothers procured at length from their blind old father the banishment of the Pandoos. These latter won Drowpady, daughter of Droopadan, king of Paunchaulam by their skill in archery, displayed at the Swayamvaram [q.v.], and building Indra prastam became powerful kings. But Yoodhishtiran lost everything at the gambling table to his rival Dooryodhanan; and with difficulty the Pandavas and Drowpady were permitted to go into the forest as exiles. After twelve years of wandering, with Krishnan [q.v.] as their powerful ally, the Pandoos met their rivals on the field of Coorooo cshetram or the Cooroos' field and the great battle, which lasted eighteen days, and in which all the chivalry of India was engaged, was fought. The issue was that only three of the Cooroos and the five Pandavas with their wife survived. In the hour of their triumph the latter retired to the Himalayas, unable to survive the death of their kindred. The leading story occupies only a fourth part; numerous episodes and legends, chiefly didactic, and interpolations of a later date, make up the other three-fourths. The whole forms a collection of the traditions of the early history of the Aryan people prior to and during their first settlement in India. There are some analogies between the Iliad and the Bhauratam; and it is not impossible that some very early tradition was carried by colonists in different directions, and made use of by two races. Dhritaraushtran answers to Priam; Dooryodhanan to Paris; Drowpady to Helen; Dharma rajan agrees with Menelaus; Achilles combines something of Krishnan and Arjoonan, for like the first, he is vulnerable only in his heel; Ajax agrees with Bheeman; Diomedes has a counterpart in Sahadevan. Mahabhaurat records the first eclipse [grahanam] of the sun mentioned in any shastram [q.v.]. European commentators say its date is 25th October in 945 B.C., and therefore anterior to that transmitted from Chaldeans, which was observed on the 19th March in 720 B.C. There is an entry in Mahabhaurat which describes the shape of India as an equilateral triangle, divided into four smaller equal triangles [trikonam]. The apex of the triangle is Cape comorin and the base is formed by the line of the Himalaya mountains. No dimensions are given and no places are mentioned. However, by drawing a small equilateral triangle on the line between Dwarca in Goozerat and Ganjam on the eastern coast, and by repeating this small triangle on each of its three sides, to the north-west, to the north-east, and to the south, there are obtained the four divisions of India in one large equilateral triangle. The shape corresponds very well with the general form of the country, if the limits of India are extended to Ghuznee on the north-west, and the other two points of the triangle are fixed at Cape comorin and Sadiyah in Assam. The Javanese have, both in their ancient and modern language, an epitome of Mahabhaurat under the name

of the Bratayooda [q.v.]. They have transferred the locality to the province of Pakalongan in their own island. The Tamul version of Mahabhaurat was written at Shreevillipoottore, by a Veishnava bramin called Saurwa bhowma iyengar. It is only part of the whole. It was not equal to the Tamul ramayanam of Cumban [q.v.], which stands, with the Chintaumany [q.v.] and the Cooral [q.v.], in the first rank of Tamul poems. There is a Teloogoo version. The first three parvams by Nannaya bhatt [q.v.] and his associate Yerra pragada [q.v.]. Remaining fifteen by Ticcana [q.v.]somayaujy. These authors unitedly are called Cavy [q.v.] trayam the three bards. The 19 sections are as follows.—"*a*" *Audy parvam* (आदिपर्व - ádiparva, San.). From (ádi, san. first + parva, san. chapter). Introductory book. Describes how the two brothers, Dhritaraushtran and Pandoo, are brought up by their uncle Bheeshman, and how Dhritaraushtran, who is blind, has 100 sons, commonly called Cooroo princes, by his wife Gaundhaury, and how the two wives of Pandoo, Pritay or Coonty and Maudry have five sons, called the Pandoo princes.—"*b*" *Sabha parvam* (सभापर्व - sabháparva, From (sabhá san. assembly). Describes the great assembly of princes at Hastinapooram, when Yoodhishtiran, the eldest of the five Pandavas, is persuaded to play at dice with Shacoony and loses his kingdom. The five Pandavas and Drowpady, their wife, are required to live for twelve years in the woods.—"*c*" *Vana parvam* (वनपर्व - vanaparva, San.). From (vana, san. forest). Narrates life of Pandavas in Caumyacam forest. This is one of the longest books and full of episodes, such as the story of Nalan [q.v.] and that of the Kirautarjooneeyam [q.v.].—"*d*" *Virauta parvam* (विराटपर्व - virátaparva, San.). From (viráta, san. the country, so called). Describes 13th year of exile and adventures of Pandavas while living disguised in service of King virautan.—"*e*" *Oodyoga parvam* (उद्योगपर्व - udyógaparva, San.). From (udyóga, san. employment). Preparations for war.—"*f*" *Bheeshma parvam* (भीष्मपर्व - bhíshmaparva, San.). From (bhíshma, san. the person so called). Both armies join battle on Cooroo cshetram, a plain north-west of Delhi. The Cowravas are commanded by Bheeshman, who falls transfixed with arrows by Arjoonan [q.v.].—"*g*" *Drona parvam* (द्रोणपर्व - drónaparva, San.). From (dróna, san. the person so called). Cooroo forces are commanded by Dronan and numerous battles take place. Dronan falls in a fight with Dhrishtadyoomnan, son of Droopadan.—"*h*" *Carna parvam* (कर्णपर्व - karnaparva, San.). From (karna, san. the person so called). Cooroos are led by Carnan. Other battles are described. Arjoonan kills Carnan.—"*i*" *Shalya parvam* (शल्यपर्व - shalyaparva, San.). From (shalya, san. the person so called). Shalyan is made general of Cooroo army. The concluding battles take place, and only three of the Cooroo warriors, with Dooryodhanan, are left alive. Bheeman and Dooryodhanan then fight with clubs. Dooryodhanan, chief and eldest of the Cooroos, is struck down.—"*j*" *Sowptica parvam* (सौप्तिकपर्व - sauptikaparva, San.). From (supti, san. sleeping). The three surviving Cooroos make a night attack on the camp of the Pandavas and kill all their army, but not the five Pandavas.—"*k*" *Stree parvam* (स्त्रीपर्व - stríparva, San.). From (strí, san. woman). Lamentation of queen Gaundhaury and the other women over bodies of slain heroes.—"*l*" *Shaunty parvam* (शान्तिपर्व - shántiparvam, San.). From (shánti, san. peace). Yoodhishtiran is crowned in Hastinapooram. To calm his spirit, troubled with the slaughter of his kindred, Bheeshman still alive instructs him at great length in the duties of kings, Raja dharmam 1995–4778; rules for adversity, Aupatt dharmam 4779–6455; rules for attaining final emancipation, Mocsha dharmam 6456 to end.—"*m*" *Anooshausana parvam* (अनुशासनपर्व - anushásanaparva, San.). From (anushásana, san. instruction). Instruction is continued by Bheeshman, who gives precepts and wise axioms on all subjects, such as the duties of kings, liberality, fasting, eating, &c., mixed up with tales, moral and religious discourses, and metaphysical disquisitions. At the conclusion of his long discourse Bheeshman dies.—"*n*" *Ashwa medha parvam* (अश्वमेधपर्व - ashvamédhaparva, San.). From (ashvamédha, san. horse-sacrifice). Yoodhishtiran having assumed government, performs an Ashwa medham [q.v.] or horse sacrifice in token of his supremacy.—"*o*" *Aushrama vausica parvam* (आश्रमवासिकपर्व - áshramavásikaparva, San.). From (áshrama, san. hermitage + vas, san. to dwell). The blind king Dhritaraushtran, with his queen Gaundhaury and with Coonty, mother of the Pandavas, retires to a hermitage in the woods. After two years a forest conflagration takes place, and they immolate themselves in the fire to secure heaven and felicity.—"*p*" *Mowsala parvam* (मौसलपर्व - mausalaparva, San.). From (musala, san. club). Death of Krishnan [q.v.] and Balaraman [q.v.], their return to heaven, the submergence of Krishnan's city Dwarca by the sea, and the self-slaughter in the fight with clubs of Krishnan's family, the Yaudavas [q.v.] through the curse of some Bramins.—"*q*" *Maha prastaunica parvam* (महाप्रस्थानिकपर्व - maháprast'hánikaparva, San.). From (mahá, san. great + prast'hána, san. departure). Renunciation of their kingdom by Yoodhishtiran and his four brothers, and their departure towards Indra's heaven in Mount meroo [q.v.].—"*r*" *Swargarohanica parvam* (स्वर्गारोहणिकपर्व - svargáróhanikaparva, San.). From (svarga, san. heaven + áróhana, san. ascending). Ascent and admission to heaven of the five Pandavas, their wife Drowpady, and kindred.—"*s*" *Harivamsah parvam* (हरिवंशपर्व - harivamshaparva, San.). From (hari, san. vishnu + vamsha, san. family). A later addition, recounting the genealogy and birth of krishnan and the details of his early life.

MAHA CAUVYAM (महाकाव्य - mahákávya, *San.*). From (mahá, san. great + kávya, san. poem) [maha]. Six great Sanscrit poems, great not with reference to length, but to subjects. Generally enumerated as follows.—*Comaura sambhavam* (कुमारसम्भव - kumârasambhava, San.). From (kumára, san. son + sambhava, san. birth). By Calidass [q.v.], on the birth of Coomaran or Caurtikeyan [q.v.], god of war, són of Shiva [q.v.] and Parvaty [q.v.]; originally in sixteen cantos, of which seven are usually edited, and nine more have been printed.—*Kirautarjooneeyam* (किरातार्जुनीय - kirátárjuníya, San.). From (kiráta, san. mountaineer + arjuna, san. one of the pándavás + íya, san. suffix, meaning belonging to). The battle of the Kirautan [q.v.] and Arjoonan [q.v.], by Bhauravy, in eighteen cantos, on a subject taken from the third chapter of Mahabhaurat [q.v.]. Penance performed by Arjoonan, one of the Pandava princes, and his combat with Shiva disguised as a Kirautan or wild mountaineer.—*Maigha dootam* (मेघदूत - méghadúta, San.). From (mégha, san. cloud + dúta, san. messenger). By Calidass. A poem of 116 verses in the Mandaucrauntam metre, describing a message sent by a banished Yacshan [q.v.] to his wife in the Himalayas, a cloud being personified and converted into the messenger. Called also Maigha sandaisham. Two parts, Poorvam and Oottaram.—*Neishadam* (नैषध - naishadha, San.). From (nishadha, san. the country so called). Otherwise Neishadheeyam. By Shreeharshan, on a subject from an episode in sixth chapter of Vana parvam of Mahabhaurat [q.v.], viz., the history and adventures of Nalan [q.v.], king of Nishadham [neidatham].—*Raghoo vamsham* (रघुवंश - raghuvamsha, San.). From (raghu, san. the king so called + vamsha, san. race). In nineteen chapters, by Calidass, on same subject as Ramayanam [q.v.], viz., history of Ramchendran [q.v.], but beginning with a longer account of his ancestors.—*Shishoopaula vadham* (शिशुपालवध - shishupálavadha, San.). From (shishupála, san. baby-protector, the king of chédí + vadha, san. killing). Destruction of Shishoopaulan [q.v.]. Otherwise Maugham. In twenty cantos, by Maughan, on a subject taken from the seventh chapter of the Sabha parvam of the Mahabhaurat [q.v.], viz., the slaying of the impious Shishoopaulan by Krishnan at a Rajasooya sacrifice performed by Yoodhishtiran [q.v.].

MAHAR (مهر - mahar, *Hind.*). Mahomedan dowry. A large sum far beyond the capacity of the bridegroom whose gift it is to the bride is often arranged for, the object being to prevent a divorce. The dowry is the property of the bride unless she waives her claim to it; which she often does, sometimes at the point of death, in order to prevent her children claiming it from their father. For Hindoo dowry see Stree dhanam.

MAHAUL (محل - mahál, *Hind.*). Properly the plural of (محل), but used as a singular noun, with a plural of its own, or mahallaut.—"*a*" Apartment, palace, district, department. Distinguish from maul, property.—"*b*" Village; Cuddapah dist., Voilpaud tal.; acres 1,428; lat. 13° 47′; long. 78° 51′; from Cuddapah S. 48 miles; from Voilpaud N.E. 16 miles. Important place of trade. Heratty merchants, settled here for several generations, import elephants [q.v.], horses [ghorah], shawls [q.v.], pearls [moty], &c. Residence of representative of nawaubs [q.v.] of Goorramcondah.—*Mahallaut* (محلات - mahallát, Hind.). Women's apartments [zenana]. Figuratively, women.

MAHBOOB (محبوب - mahbúb, *Hind.*). From (hubba, ar. to love). Beloved. Title of the chief saint of the Mahomedans [dastgheer]. Common alam; as Mahboobally, double alam; Mahboob bee, alam + alaumat; Mahboob shah, alam + alaumat of fakeer [ism].

MAHDEE (مهدی - mahdí, *Hind.*). From (hudá, ar. to guide). Guide. Name of the twelfth and last Imaum [q.v.], who according to the belief of Soonnee [q.v.] mahomedans will appear again on the second coming of Jesus christ and is not born yet. The Shiahs [q.v.] believe that he has already appeared and remains concealed. Gheir mahdevites believe that he was on and has disappeared from earth. Common alam; as mahdeeally, double alam [ism].—*Mahdivy* (مهدوی - mahdiví, Hind.) From (mahdí, ar. name of the last imaum). A sect of Mahomedans who believe in the reappearance of Mahdee, the twelfth and last Imaum [q.v.], towards the close of this world.

MAHÉ (മയ്യഴി - mayyazhi, *Mal.*). Title from the french. Mahé Mal. from (mai, mal. black + azhi, mal. river mouth). Mahé was the first name of Labourdonnais.—"*a*" French town and tract of country, Port; Malabar dist., Cooroombranaud tal.; lat. 11° 42′; long. 75° 35′; from Badagara N.N.W. 8 miles; from Bombay S.S.E. 516 miles; from Calicut N.N.W. 35 miles; from Cannanore S.E. 16 miles; from Chombye N.W. 3 miles; from Cullye W. 3 miles; from Tellicherry S.E. 4 miles. The only

French settlement on west coast. Now of little importance. South of mouth of the river Mahé, and possesses a roomy harbour whose rocky bar admits vessels up to 70 tons. The town overlooks the river. The French first settled here with a view to acquiring a share in the pepper [q.v.] trade in 1722, having obtained the grant of a plot of ground for a factory [aurang] from the rajah of Cadatnaud about the same time they obtained the grant of a piece of land at Calicut from the Zamorin [q.v.]. In 1752 they acquired by purchase from the rajah of Chiracal the ports of Ramatody, Cauvaly, Neeleshwar and Mattalye; and in 1754 Mount delly from the same. But with surrender of Mahé in February 1761, all these possessions fell into hands of English; and with exception of the fort at Mount delly, all other fortifications were razed to the ground. Mahé was restored to French in 1765; but with surrounding dependencies, was recaptured by English in 1779 and dismantled, to be once more restored in 1785. It was for a third time taken in 1793, and was restored to French with small factory at Calicut in 1815. In 1853 four outlying aldées [q.v.] were restored increasing the area to 5 square miles. The deshoms [q.v.] constituting the settlement are Chaulacara, Chembra, Chooticottah, Manchacull, Mattaummal, Moondokkil, Pandacull, Pauracull, Pooliyil, Pullore, Valappinagam, Valavil, Valiyangaudy, Wodattinagam. Of the four outlying aldées restored in 1853, Chaulacara, Pullore and Chembra formed the demesne of the Numbiyaurs of Iroovalinaud and Pandacull of Coorangote nayar, and the four villages together constituted the amshom [q.v.] of Naultara in Cottayam talook. The settlement is in charge of a chef-de-service subordinate to Pondicherry. The Carmelites have a church and missionary establishment. A long wooden bridge maintained by British government gives access to British territory on right bank. The coast road from Beypore running northward through Tellicherry and Cannanore, passes through Mahé.—"*b*" River; Malabar district, Cooroombranaud talook. Rises in heavy forests of Wynaud ghauts, and after 34 miles falls into sea at Mahé, of the main portion of which territory it forms northern and eastern boundary for two miles. Navigable for small country craft for half a mile, and for boats as far as Pauracadavoo, 12 miles.—"*c*" Light on the south side of the entrance to the river at the foot of the flagstaff; lat. 11° 42′; long. 75° 34′. Red. Fixed. 7 miles. Visible from all directions seaward. Small white pyramid. As a guide to the anchorage.

MAHEENA (شهر - shahr, *Ar.*; ماه - máh, *Pers.*; مہینا - mahíná, *Hind.*). Month [mau, mausam]. 4 haftahs or weeks = 1 maheena; 12 maheenas = 1 saul or year [caulam, 7]. The months of the Mahomedan year [hijrah] and the number of days [dinam, roz] in each, are the following.——"*a*" *Moharram* (محرم - muharram, Ar.). From (haruma, ar. sacred). 30 days. See sep. title.——"*b*" *Safar* (صفر - safar, Hind.). From (sifr, ar. empty); because in this month the Arabians went to war and left their homes empty. The most unlucky, for in it Adam was turned out of Eden and the prophet was taken ill [aukhiry chahaur shamba, teyrah teyzee]. 29 days.——"*c*" *Rabee ool owval* (ربيع الاول - rabíulavval, Ar.; باراوفات - báráwafát, Hind.). Ar. from (rabí, ar. spring season + awwal, ar. first). Hind. from the prophet's anniversary. 30 days [vilaudat e shareef].——"*d*" *Rabee ool aukhir* (ربيع الاخر - rabíulákhir, Ar.; دستگير - dastgír, Hind.). Ar. from (rabí, ar. spring season + ákhir, ar. last). Hind. from the anniversary of the saint [abdool cawder]. 29 days.——"*e*" *Jamaudy ool owval* (جمادى الاول - jamádiulawwal, Ar.; مدار - madár, Hind.). Ar. from (jamádí, ar. winter + awwal, ar. first); being first of the winter months. Hind. from saint's anniversary [shah badee ood deen]. 30 days.——"*f*" *Jamaudy ool aukhir* (جمادى الاخر - jamádiulákhir, Ar.; قادر - kádir, Hind.). Ar. from (jamádí, ar. winter + ákhir, ar. last). Hind. from the anniversary of the saint [cawder wally]. Otherwise Jamaudy oos saunee. 29 days.——"*g*" *Rajab* (رجب - rajab, Ar. and Hind.). From (rajiba, ar. to revere). 30 days. War was not permitted during this month. Mahomet's nocturnal journey to heaven occurred in it [leilat ool mirauj].——"*h*" *Shabaun* (شعبان - shabán, Ar. and Hind.). From (shaaba, ar. to separate); because the arabs used to disperse for predatory expeditions. 15th of this month is Shab e baraut [q.v.]. 29 days.——"*i*" *Ramzaun* (رمضان - ramazán, Hind.). 30 days. See sep. title.——"*j*" *Shawaul* (شوال - shauvál, Ar.; دودھ كا مہينا - dúdhkámahíná, Hind.). Ar. from (shaul, ar. vacant), the arabs having left their homes vacant for hunting excursions. Hind. from (dúdh, hind. milk + mahíná, hind month); from ramzaun feast when milk is used to break the fast. Hind. also (khálímahíná), meaning empty month, in that it has no feast. The first day is the Eed ool fitr [q.v.].——"*k*" *Zoolcada* (ذوالقعده - zulkadah, Ar.; بنده نواز - bandahnawáz, Hind.). Ar. from (zu, ar. lord + kadah, ar. sitting); sitting month; no war or pilgrimage allowed. Hind. from saint's festival [bunda nawauz]. 30 days.——"*l*" *Zool hijja* (ذوالحجه - zulhijjah, Ar.; بكرعيد - bakríd, Hind.). Ar. from (zú, ar. lord + hij, ar. pilgrimage); pilgrimage month. Hind. from the festival which occurs in this. 29 days; except in the intercalary years [nasee], when this last month also has 30 days.

MAHIMALORE (మహిమలూరు - mahimalúru, *Tel.*). From (mailumallayya, tel. proper name + úru, tel. village); from mayil mullareddy, the founder. Village; Nellore dist., Atmacore tal.; pop. 3,377; acres 11,562; lat. 14° 38′; long. 79° 33′; from Atmacore W. 7 miles; from Nellore W. 37 miles. Village and temple established or rebuilt by Mayil mullareddy, from Hyderabad. His brothers Bheema reddy and Nundan who accompanied him established the villages of Bheemavaram and Nandavaram in Oodayagherry talook. Traces of an old fort, which formerly had five killadars [q.v.] when it was held by the zemindar [q.v.] of Vencatagherry's ancestors. Pagoda [q.v.] to Shiva as Gopaulsawmy, with inam [q.v.] of acres 63·96. Extensive indigo [q.v.] trade. Large tank. A bramin of this village, Pautoolayya, was a well-known poet [cavy].

MAHOE (مہو - maho, *Hind.*). W. indian for Cork wood bendy.

MAHOMED (محمد - muhammad, *Ar.*). From (hamada, ar. to praise). Praised. Name of the prophet of the Mahomedans. Common alam; as Syed mahomed, alaumat + alam; Mahomed acbar, double alam [ism].——*Mahmood* (محمود - mahmúd, Ar.). From (hamada, ar. to praise). Praiseworthy. Name of the prophet. Common alam; as Mahmood ally, double alam; Mahmood bee, alam + alaumat [ism].——*Mahomed ally* (محمد على - muhammadalí, Hind.). Double alam. Nawaub of the Carnatic. Styled Wallajah [q.v.]. Second son of Anwar ood deen [q.v.], died, aged 78, on 13th October, A.D. 1795. Escaped from the field of Amboor on death of his father, to Trichinopoly, where he was besieged by the French who had espoused Chundah sahib's [q.v.] claims to Carnatic [q.v.] throne. Relieved by Clive by an attack on Arcot. Succeeded by his son Oomdat ool oomrah [charitram]. Vol. I (122), (177), 44; II, 252.——*Mahomedan* (محمدى - muhammadí, Hind.). From (muhammad, ar. prophet's name). English formation from mahomet. A Mussalman. There are nearly two millions in the Presidency. Malabar has the greatest number [moplah], next Tanjore, and next Bellary. In Trichinopoly they are important. Ganjam has very few. Mahomedans are divided into four great classes, Syed [q.v.], Sheikh [q.v.], Moghul [q.v.], and Pataun [q.v.]. The Pataups are sometimes also termed Afghauns.——*Mahomedan's lime* (ജോനകനാരകം - jónakanárakam, Mal.). Same as Bergamot orange.——*Mahomed cassim* (محمد قاسم - muhammadkásim, Hind.). Otherwise Ferishta [q.v.], author of Taureek e ferishta, historical work published in Acbar's reign.

MAHSOOL (محصول - mahsúl, *Hind.*). From (hasúla, ar. to obtain). That which is produced. Mahsooldar is crop watcher, for whom inam [q.v.] was formerly allowed.

MAHWAL (ماهول - máhwal, *Hind.*). Same as Large mountain ebony.

MAHZAR (محضر - mahzar, *Hind.*). From (hazara, ar. to be present) [hauzir]. Otherwise Mahzar nauma. A certificate signed by several. Especially award of a punchayet [q.v.].

MAIDARY (మేదరి - médari, *Tel.*). From (méda, can. basket). Mat and basket makers. The corresponding terms are:—Tam. corava; Can. maidara; Mal. cavara. Their wares are made of bamboo [q.v.] only. Date [kharjooram] mats [boriyah] and baskets [tokrah] are made by Coorchar [coorchar, jauty].

MAIL (ಮೇಲೆ - méle, *Can.*; మేలు - mélu, *Tel.*; മേൽ - mél, *Mal.*; மேல் - mél, *Tam.*). Over, above [mett]. Also in tamul, west. Prefix in place names; as Mailore, meaning west village; Mailcote, meaning high fort.——*Mailcaunom* (മെല്ക്കാണം - melkánam, Mal.). Mortgage upon mortgage. See Caunom.——*Mailcoondah* (ಮೇಲ್ಕುಂದ - mélkunda, Can.). From (mél, can. upper + kunda, can. hill). Village, Mountain; Neilgherry dist., Coondah div.; pop. 233; acres 8,200; lat. 11° 15′; long. 76° 41′; height 6,924 feet; from Ootacamund S.S.W. 13 miles. One of principal eminences overlooking Bhawauny valley, near S.W. extremity of Neilgherries. Village inhabited by Badagas [q.v.]. Large sculptured cromlech [paundoocull] surrounded by others unsculptured.——*Mailcooray* (மேற்கூரை - mérgúrai, Tam.). From (above + kúrai, tam. thatched roof). Thatched roof, upper part of a house.——*Mailcottah* (மேலக்கோட்டை - melakkóttai, Tam.). From (mél, tam. west + kóttai, tam. fort). Mahomedan name (hussainábád), meaning beautiful city. Hill; Neilgherry district, Todanaud division; from Ootacamund N.W. 5 miles. One of the three principal old forts of the Neilgherries, near the Seegore pass. Utilized by Tippoo sultan who called it Hoossainabad.——*Mailcoyma* (മേൽക്കോയ്മ - mélkkóyma, Mal.). From (above + kóyma, mal. power). The right of the ruler, especially over temples. See vol. II, 104.——*Maileshoott pillay* (മേലെഴുത്തുപിള്ള - mélezhuttuppilla, Mal.). From (above + ezhuttu, mal. writing + pilla, mal. accountant). Head village accountant.——*Mailore* (மேலூர் - mélúr, Tam.). See sep. title.——*Mailpady* (மேற்படி - mérppadi, Tam.). From (above + padu, tam. to occur). Aforesaid.——*Mail vauram* (மேல்வாரம் - mélváram, Tam.). From (above + vára, san. quantity). Rent of landlord. The Circar [q.v.] share of the produce of a field, either in kind or money;

as distinguished from Coodivauram [q.v.], or tenant's share [maiticore]. Cf. Sawmibhogam. See vol. I, 112.——*Main cauvalgar* (மேன்காவற்காரன் - méngávargáran, Tam.). From (above + kával, tam. guard + káran, tam. agent). A petty chief, a poligar [q.v.], the superior guardian or protector of the country [deshacauvalgar].——*Maiticore* (మేటికోరు - médikóru, Tel.). From (above + kóru, tel. share). The landlord's share of the crop [mail vauram, sawmibhogam].——*Maittan* (മേത്താൻ - méttan, Mal.). From (above + st'ha, san. to stand). Travancore name for Lubbay [q.v.].——*Maity* (ಮೇಟಿ - méti, Can.; మేటి - méti, Tel.; മെട്ടി - métti, Mal.; மேட்டி - métti, Tam.). From (mél, tam. high). The post in a threshing-floor [calam]. Also lord; head of a body of persons, especially of inferior cultivators [inam]. A menial servant, in Anglo-indian establishments, who washes dishes, &c., always of the pariah [q.v.] tribe; probably this last is the sailors' phrase maity for mate.——*Melagherry* (ಮೇಲಗಿರಿ - mélagiri, Can.). From (mél, tam. west + giri, san. mountain). Hill range; Salem dist., Oossoor tal.; pop. nil; lat. between 12° 12′ and 12° 26′; long. 77° 52′ and 78° 00′; from Oossoor S.S.E. 21 miles; from Salem N.N.W. 43 miles. The hills extend northwards, more or less unbroken, to a point south-east of Kelamungalam where they are hardly distinguishable from the Punchabully hills, and similarly to the bank of the Cauvery on the south, while they merge more or less in the Pikkily mullay in the Dharmapoory talook on the east. Practically they may be held to commence on the north in the valley of the Sanatcomauranuddy and to end southwards in Gootroyen, the highest peak. This gives an approximate length of 20 miles from north to south, with an average breadth of 5 miles from east to west. They are most easily reached from Dencanicottah viâ Irdoocottay, whence access is obtained to Siddhapore, by a ghaut [q.v.] practicable for horses [ghorah]. The plain at the foot is about 3,000 feet above sea-level and the ghaut is about 1,000 more. In places somewhat stony, after about two-thirds of its length, the steep path is succeeded by a series of grassy undulations and terraces; the plateau at the top is therefore about 4,000 feet high, and the average height is about 3,500 or 3,800 feet. The summit is fairly level and abounds in grassy lawns, fringed with forest and bamboos [q.v.]. About half a mile south of Siddhapore is Glenshaw, a picturesque plateau, where coffee [q.v.] has been unsuccessfully tried. The most striking feature of the hills is the superabundance of white ants [q.v.]. The Malayaulies [q.v.] are chiefly Lingayets [q.v.], but there are numbers of Gollar [q.v.], Iroolar [q.v.], Pullies [q.v.], and other classes. The sandalwood [sandal] reserves are valuable, and other timbers and bamboos are found in abundance. The hills are reputed feverish. The great want is drinking water.——*Menaud* (மேனாடு - ménádu, Tam.). Highland.——*Menon* (മേനോൻ - ménón, Mal.). From (above + an, mal. personal suffix); means over man, supervisor. The corresponding terms are :—Can. shanbogue, Tel. curnum, Tam. kanaka. The village or district accountant in Malabar. A frequent third name there.——*Merkk* (மேற்கு - mérgu, Tam.). From (mél, tam. above). West. Prefix in place names; as Merkoonaud, meaning west country.——*Merkoonaud* (மேற்குநாடு - mérgunádu, Tam. merkunád *). From (mérgu, tam. west + nádu, tam. country). Division, Neilgherries; acres 63,891; pop. 42,798; divided from Paranginaud by S. spur of Doddabetta range and Kartairy river; from Todanaud on N.W. by a spur of Doddabetta range, and E. branch of Coondah river, which flows through Lovedale and Nunjenaud valleys to the main stream; the same stream separates it from the Coondah division on S.W. Included in the jurisdiction of the Deptuy tahsildar and Sub-magistrate of Coonoor, and forms the charge of a Revenue inspector.——*Meroovey* (ಮೇರುವೆ - méruve, Can.). From (mél, tam. above, high). An inclined plane up which blocks of stone are rolled for the upper parts of a building.——*Methonica* (മേത്തോന്നി - méttónni, Mal.). Title corruption from malayalam meaning superior lily. A genus [wild bachnang].——*Meyjodoo* (پائتابہ - páitábah, Hind.; میجور - mejor, Dec.; మేజోడు - médzódu, Tel.; மேசோடு - mésódu, Tam.). Hind. from (pái, pers. foot + tábah, pers. support). Tel. from (mél tam. upper + dzódu, tel. shoe). Tam. from teloogoo. Socks.

MAILAM (ಮೇಳ - méla, *Can.*; మేళము - mélamu, *Tel.*; മേളം - mélam, *Mal.*; மேளம் - mélam, *Tam.*). From (mil, san. to join); means an assemblage of instruments [sangeetam]. Drum [paray].——*Maula* (మాల - mála, Tel.). From (mélam, tam. drum). The corresponding terms are :—Tam. pariah, Can. holeya, Mal. poolaya. The teloogoo pariah [q.v.] caste. Numbers about 1¼ millions [jauty]. Compare, where name given on account of dingy habit :—Corvus culminatus (málakáki), pariah crow; Herodias alba (málakonga), pariah crane; Milvus govinda (málagadda), pariah kite.——*Melah* (میلہ - melá, Hind.). A fair [chunda, santa, santey, shandy].

MAILORE (ಮೇಲೂರು - mélúru, *Can.*; மேலூர் - mélúr, *Tam.* melúr *). From (mél, tam. upper + úr, tam. village) [mail].——**(1)** Village; Neilgherry dist., Merkoonaud division; pop. 2,578; acres 14,169; lat. 11° 18′; long. 76° 45′; from Coonoor W.S.W. 7 miles; from Ootacamund S. 7 miles. Badaga village. Contains one of the principal Badaga [q.v.] temples. There is a large group of cromlechs [paundoocull] and sculptured memorial stones.——**(2)** Pass; Neilgherry dist., Merkoonaud division, from Ootacamund S.W. 15 miles. Constructed next in order to the Kotagherry ghaut, about 1828, and at one time much used by passengers from S. and W. districts. Westwards from Shoondaputty at its foot the ancient track to Munnarcaud and Calicut runs up Bhawauny valley crossing ridge near Silent valley, which lies between two spurs of the Coondahs. E. a path runs down left bank of Bhawauny to Mettapolliem, thence to Coimbatore from Shoondaputty. The pass reaches the summit of the ghaut [q.v.] below the Shoondabetta, near Mailore. It was once much used by tobacco [pogauk] smugglers. W. is the Tullapoya pass [ghaut].——**(3)** Coffee [q.v.] estate, Merkoonaud, Neilgherries; from Coonoor S.W. 8 miles. 283 acres.——**(4)** Talook, Madura district. Tahsildar's pay Rs. 175. Area 484 square miles. Population 148,656. Language Tamul. North centre inland part of district. Bounded :—N. by the Coolitalay talook of Trichinopoly district, E. by the Shivagunga zemindarry and Coolitalay and Poodoocottah in Trichinopoly district, S. by the Shivagunga zemindarry and the Madura talook, W. by Madura and Dindigul talooks. Contains mountains, Alagar hills, Carandamullay, Nuttam hills. Red soil generally. Rain-fed tanks and two streams Tirmany moottaur and Palaur in Nuttam firkah [q.v.]. There are spots where tents [derah] may be pitched in the following places :—Mailore, under a large banyan [q.v.] tree within the compound of the travellers' bungalow [q.v.]; Nauviniputty near Mailore; Pullaputty near Cottaumputty, a large tope [q.v.] by the side of the stream Palaur; Nuttam, a large tope by the side of the stream Tirmany moottaur. Places of archæological interest :—Ambalacauranputty, Cottaumputty, Cotteinoottputty, Covilputty, Cullivailiputty, Keel valaivoo, Mailore, Poothacoody, Tirchoonay, Tirvathore, Vilamputty. The leading places, &c., in the talook are the following.——*Alagur hills* (அழகர்மலை - azhagarmalai, Tam.). See sep. title.——*Carandamullay* (கரந்தமலை - karandamalai, Tam.). From (karandai, tam. sweet basil, ocimum basilicum, linn. + malai, tam. hill). Hill; trig. station; lat. 10° 19′ 03·64″; long. 78° 15′ 18·92″; from Madura N.N.E. 29 miles; from Mailore N.N.W. 22 miles.——*Caroongaulacoody* (கருங்காலக்குடி - karungálakkudi, Tam.). From (karumai, tam. blackness + kála, san. death + kudi, tam. village). Village; pop. 2,708; acres 3,479; lat. 10° 10′; long. 78° 25′; from Madura N.E. 23 miles; from Mailore N.N.E. 8 miles. Weekly market.——*Cottaumputty* (கொட்டாம்பட்டி - kottámbatti, Tam.). From (kottán, tam. blacksmith's hammer + patti, tam. village). Village; pop. 2,332; acres 1,728; lat. 10° 13′; long. 78° 26′; from Madura N.E. 28 miles; from Mailore N.N.E. 13 miles. On high road to Trichinopoly. Large choultry [q.v.].——*Mailore* (மேலூர் - mélúr, Tam.). See below.——*Nuttam* (நத்தம் - nattam, Tam.). See sep. title.——**(5)** Town, Talook head-quarters, Sub-registrar's office. Madura district, Mailore talook; pop. 5,858; acres 5,753; lat. 10° 02′; long. 78° 23′; from Dindigul S.E. 35 miles; from Kodaykarnal E.S.E. 57 miles; from Madras S.S.W. 246 miles; from Madura E. 18 miles; from Rameshwaram N.W. 81 miles; from Ramnaud N.N.W. 55 miles. Former stronghold of the Cullar [q.v.] of Mailore naud. Old Shiva temple with inscriptions. Large and richly endowed choultry [q.v.]. Mission station.

MAISTRY (మేస్త్రి - méstri, *Tel.*; மேஸ்திரி - mésttiri, *Tam.*). From portuguese. Head workman.

MAITEE (मेथिका - mét'hiká, *San.*; मेथी - mét'hí, *Mahr.*; मेत्ति - métti, *Conc.*; حلبه - hulbah, *Ar.*; شنبلیله - shambalíd, *Pers.*; میتھی کا پیڑ - methíkáper, *Hind.*; میتھی کا جہاڑ - methíkájhár, *Dec.*; ಮೆಂತ್ಯ - mentya, *Can.*; ಮೆತ್ತೆ - mette, *Too.*; మెంతి - menti, *Tel.*; మెతి - meti, *Oor.*; ഉലുവ - uluva, *Mal.*; උලුවා - uluvá, *Singh.*; வெந்தயம் - vendayam, *Tam.*). Title from mahratta. Mahr. from sanscrit. Ar. from (huluba, ar. to increase flow of milk). Hind., &c., from sanscrit. Mal. from arabic. San. also (shamlít); (shamlíz). Pers. also (mét'hí). Mal. also (ventayam). Greek βουκέρας, τῆλις. Its mucilaginous seeds in latin are Siliquæ. Title otherwise Fenugreek, Vendayam. Botanically Trigonella fœnum-græcum, linn., leguminosæ [vricsham, 48]. Annual, robust, erect, sub-glabrous; stipules not laciniated; leaflets toothed, ¾–1 inch long, oblanceolate-oblong; flowers one to two, sessile in the axils of the leaves; calyx ¼–⅓ inch, teeth linear; corolla much exserted; pod 2 to 3 inches long, ten to twenty-seeded, with a long persistent beak, often falcate. Small, herbaceous plant; pod horn-shaped; seeds oblong, cylindrical, a little compressed, truncated at both ends, covered with small hollow and yellow points; internally their color is yellow; the odour is strong and peculiar on chewing; the seed is mucilaginous, and the taste is analogous to the smell; an unctuous farinaceous taste, accompanied with a degree of bitterness; containing the principle called coumarin, which imparts the smell to hay. Seeds are medicinally diuretic, emmenagogue, demulcent, astringent, emollient and suppurative; externally employed in poultice and fomentation; used in veterinary practice in cordial preparation. Seeds aromatic and stimulant

in curries [q.v.]; also used as coffee [q.v.] after roasting; the plant is eaten fresh as a vegetable. Seed yields a yellow dye [shauyam]; fresh seed yields small percentage of oil [yennay]. There is a Tamul proverb:—வெந்தயம் போடாத கறியும் கறி அல்ல, சந்தை இல்லாத ஊரும் ஊர் அல்ல—"A curry made without vendayam is not a curry, a village "without a market is not a village." And another:—வெந்தயம் இட்ட கறிக்கு சந்தேகம் இல்லை—"A curry with vendayam "in it needs not be questioned." The species corniculata is Horseshoe fenugreek.

MAJAL (ಮಜಲ - majala, *Can.*). Second sort of rice land in South canara and Mysore, producing annually one crop of rice [q.v.] and one of vegetables or dry grain [q.v.].

MAJD (مجد - majd, *Ar.*). From (majada, ar. to excel in glory). Glory. Part of lacab; as Majd ood deen, glory of religion; Majd ood dowla, glory of the empire [ism].——*Majeed* (مجيد - majíd, Hind.). From (majada, ar. to excel in glory). Lord of glory. Epithet of God [allah]. Common alam; as Majeed khan, alam + alamaut. Sometimes part of lacab; as Majeed ood deen, glory of the faith; Majeed ood dowlah, glory of the state [ism].

MAJIL (منزل - manzil, *Hind.*). From (nazala, ar. to descend). A stage [makaum, tappaul] in travelling [manjilee]. Cf. Manzil.

MAJMOO (مجموع - majmúa, *Ar.*). Total.——*Majmoodar* (مجموعدار - majmúadár, Hind.). From (above + dár, pers. keeper). The head accountant in the talook [q v.] cutcherry [q.v.].

MAJOON (معجون - majún, *Hind.*). From (ajín, ar. kneaded). Product of Cannabis sativa [kinnab]. Electuary used by Mahomedans. The chief ingredients are ganjah [q.v.] leaves, milk [paul], ghee [q.v.], poppy seeds [opium poppy], flowers of the thorn apple [datura], the powder of the nux vomica [poison nut], and sugar [q.v.]. Two similar aromatic compounds, containing hemp [janam], are well known among the Tamulians, and are frequently ordered by the veidyans [q.v.]; one of them is composed of twenty-one, the other of thirty-five ingredients [mookhadiraut].

MAKAUM (مقام - makám, *Hind.*). From (káma, ar. to stand). Station. Halting place [majil].——*Maujaunam* (மாகாணம் - mágánam, Tam.). From (makán, ar. a place). A division of a revenue district, usually consisting of six or seven villages. See vol. I, 112. Distinguish from Maugauny.

MAKBARAH (مقبرة - makbarah, *Hind.*). From (kabr, ar. grave). Mausoleum [goombaz].

MAKBOOL (مقبول - makbúl, *Hind.*). From (kabala, ar. to receive favourably). Approved. Prefixed to an alam forms a lacab; as Makbool hoossain, accepted of Hoossain. Generally taken by Shiahs [ism].

MAKDOONAS (مقدونس - makdúnas, *Ar.*; فطراساليون - fitrásáliún, *Pers.*). Title means of macedon. Ar. also (kussah); (yukhsis). Pers. also (karafsimakduní), meaning macedonian apium graveolens, linn. Greek πτεροσέλινον, Latin apium. Title otherwise parsley. Botanically Pteroselinum sativum, wight, umbelliferæ [vricsham, 67]. The leaf used as a garnish.

MAKHAM (मख - makha, *San.*). From (mah, san. to worship). Sacrifice.——*Makhanah* (मखान्न - makhánna, San.; مکهنا - makhanah, Hind.; నల్లపద్మము - nallanipadmamu, Tel.; କଣ୍ଟପଦେନ - kuntapudena, Oor.). San. from (makha, san. sacrifice + anna, san. food); from use of seed during yaugam [q.v.] or sacrifices. Tel. from (nalla, tel. black + padma, san. nelumbium speciosum, willd.). Hind. also (machaná), meaning sacrifice food; (makhúrch). Title otherwise Black lotus, Gorgan plant, Machnah, Prickly water-lily. Botanically Euryale ferox, salisb., nymphæceæ [vricsham, 7]. Alias Anneslea spinosa. Specific from bristling foliage. Stemless floating plant; sepals four; petals numerous in four to seven series; leaves peltate, about 1 to 4 feet each way from orbicular to oval, entire, dark green above, with ferruginous veins, armed, with few slender prickles above, spinous beneath; petioles armed; calyx covered with recurved spines on the outside; carpel size of a pea [calauyam]; flowers bluish purple; flowering nearly all year. Seeds are deemed powerful tonics. Seeds are farinaceous and eaten after having been heated in sand and husked. No other common species here.

MAKHDOOM (مخدوم - makhdúm, *Hind.*). From (khadama, ar. to serve). Lord. Prefixed to an alam forms a lacab; as Makhdoom ally, ally the master [ism], one of Hyder's generals in Malabar defeated by Colonel Humberstone in 1782 near Calicut.

MAKKAL (ಮಕ್ಕಳು - makkalu, *Can.*; മക്കൾ - makkal, *Mal.*; மக்கள் - makkal, *Tam.*). From (maga, tam. child). Children [moga].——*Makkala santauna* (ಮಕ್ಕಳಸಂತಾನ - makkalasantána, Can.). Same as Makkatoyem in Malabar. The system of inheritance [dauyam] in which the property descends to the son or succession in the line of sons [aliya santauna].——*Makkatoyem* (മക്കത്തായം - makkattáyam, Mal.). From (above + táyam, mal. portion). The right of a man's sons to inherit as distinguished from Maroomakkatoyem, the right of his sisters' sons to inherit [maroomakkatoyem]. The following are the principal castes who follow the Makkatoyem system of inheritance [dauyam]:—Adigal, Chaukky, Cherooman, Comaty, Cummaulan, Eeramcolly, Elliad, Ilavan, Moossad, Mootta chettiyaun, Numbeeshan, Numbidy, Numboory, Pidauran, Podwaul, Puttan, Tandaun, Tangal, Teeyan in Cadatnaud and Travancore, Veisya, Vilacattravan, Yembraun [maryauday].

MAKKAMAH (محکمه - mahkamah, *Hind.*) [hookum]. From (hukm, ar. order). A tribunal [adawlut].

MAKMULL (مخمل - makhmal, *Hind.*). From (khaml, ar. nap). Velvet [sheelay].

MAKNAH (مکنا - makhná, *Hind.*; പിടി - piti, *Mal.*). Hine or female elephant [q.v.].

MAKREE (ऊर्णनाभ - úrnanábha, *San.*; عنكبوت - ankabút, *Ar.*; کارتنه - kártinah, *Pers.*; مکری - makrí, *Hind.*; ಜೇಡಹುಳ - jédahula, *Can.*; సాలెపురుగు - sálepurugu, *Tel.*; എട്ടുകാലി - ettukáli, *Mal.*; சிலந்தி - shilandi, *Tam.*). Title from hindostany. San. from (úrna, san. wool + nábhi, san. navel). Hind. from (markata, san. a spider). Can. from (jéda, can. weaver + hula, can. worm). Tel. from (sále, tel. weaver + purugu, tel. worm). Mal. from (ettu, mal. eight + kálu, mal. leg). Spider [poochy].

MAKTAB (مکتب - maktab, *Hind.*). From (kataba, ar. to write) [kitaub]. Mahomedan school [madrissa]. According to Muslim law [shareeyat], all education should be carried on in connection with religious instruction in the first instance; and consequently schools are generally attached to mosques [musjid], where the Koran [q.v.] and other branches of learning [ilm] are taught. The teacher seats himself on the ground, with his hearers all seated round him in a ring. Instruction is usually given in the early morning after the morning prayer [namauz], and continues some 3 or 4 hours. It is again renewed for a short time after the midday prayer. Also schooling ceremony amongst Mahomedans when a child has attained the age of four years four months and four days.

MAL (മാൽ - mál, *Mal.*; மால் - mál, *Tam.*). Black [meilam].——*Mahl* (മാൽ - mál, Mal.). Language of Minicoy of the Laccadives, with a mixture of corrupt Malayalam [bhaushay]. See vol. I (51).——*Maldives* (مالديب - máldíp, Hind.; മാലദ്വീപ് - máladvípu, Mal.). From (mál, mal. black + dvípa, san. island); from the dark soil. Sanscrit name (máládvípa), meaning garland + island; from configuration. Latin Maniolæ. Islands extending southwards from lat. 7° 6′ 30″ N. to 0° 42′ S. About 12,000 in number. Have been colonized from Arabia. The ruler is styled Sultan [q.v.] of the thirteen atolls [q.v.] and 12,000 isles. Upon the acquisition of Ceylon by the British in 1766, the supreme authority over the Maldives accompanied. The present sultan sends an ambassador to the Governor of Ceylon annually. These islands belong to Ceylon, not India; excepting the most northern or Minicoy, which detached from the rest is part of the Cannanore island dominions, and is thus administered as part of the Malabar district. Mahomedanism has been the accepted religion of the Maldivians for at least six centuries, but side by side with it there has continued to exist an older creed in demons. Maldive cocoanut is same as Sea cocoanut.——*Malkangany* (वह्निरुचि - vahniruchi, San.; मालकांगोणि - málakángóní, Mahr.; مال کنگنی - málkangní, Hind. and Dec.; ಕಂಗೊಂಡಿಬಳ್ಳಿ - kangondiballi, Can.; గుండుమెడ - gundumeda, Tel.; പാലുഴവം - páluzhavam, Mal.; කටුපිල - katupila, Singh.; வாலுளுவை - váluluvai, Tam.). Title from hindostany. San. from (vahni, san. fire + ruchi, san. taste); from its acrid and stimulating properties. Hind. from (mál, tam. black + kangu, san. panicum italicum); from black oil and seeds like tinay [large chintoo]. Can. from (kanga, san. crooked + ondu, can. unite + balli, can. creeper). Tel. from (gundu, tel. round + meda, tel. neck). Mal. from tamul [oolinja]. Singh. from (katu, singh. thorny + pila, singh. nerium). San. also (jyótishmatí), meaning light possessing, in allusion to its supposed property of stimulating intellectual powers and sharpening memory [oolinja]. Tel. also (peddachinta), meaning large + tamarindus indica, linn.; (bávanji); (erikata); (maneru); (málaerikata), meaning pariah + the tree; (máyalaerikata), meaning deceit + the tree. Singh. also (lavaná); (duhudu). Tam. also (athipariççam), properly the seed; (málganguni). Title otherwise Black-oil tree, Intellect tree, Malkangany oil tree, Spindle tree [large chintoo], Staff tree. Botanically Celastrus paniculatus, willd., celastrineæ [vricsham, 40]. Alias Ceanothus paniculatus; Celastrus nutans, rothiana. Climbing shrub, unarmed; young shoots and flower-bearing branches pendulous; leaves alternate, broadly oval, or ovate, or obovate, usually with a sudden short acumination, slightly serrated, glabrous; racemes terminal, compound or supra-decompound, elongated, much longer than the uppermost leaves; petals five; calyx five-partite; lobes rounded, ciliated; capsule globose, three-celled, three to six-seeded; seeds with a complete arillus; flowers small, greenish; grows in dry elevated

jungles. The fruit is a three-celled, globose green capsule, containing from three to six seeds enclosed in a complete arillus of a rich orange colour and sweet taste; the seeds are about the size of millet [q.v.], of a reddish-brown colour, oily, angular like the section of a sphere; the testa is hard, and the kernel which is white has an acrid taste. The expressed oil has a deep reddish-yellow colour, derived from the adhering arillus; it deposits a quantity of solid fat after it has been kept for a short time. Oleum nigrum or black oil is a compound and empyreumatic oil obtained by a destructive distillation of the seeds with several other ingredients, and is generally manufactured in northern circars [q.v.]; there are several varieties, those in vizagapatam, ellore and masulipatam are best. The following is description of the preparation of oleum nigrum:—into an earthen pot, the bottom of which is perforated by a number of small holes, are put the seeds ℔. iss., benzoin [q.v.], cloves [lavangam], nutmegs [jauty], and mace [jauty] āā ℥ ss; the mouth is closed, and the pot, placed over another, is luted to it; they are then placed in a pit three feet deep and nearly as wide, and surrounded by cakes [bratty], of dry cow dung, which are set on fire; and when they are consumed, about ℥ vi of the oil is found in the under vessels, ready for use; it should be kept in well-closed vessels; sp. gr. 0·975. The seeds, fixed oil and compound empyreumatic oil, are medicinally diuretic, diaphoretic, stimulant and nervine tonic; the seeds long been in repute with veidyans [q.v.] for stimulating intellectual powers; the oils are substituted for juniper, sp. æther. nit., buchu, broom, phosphates, hypophosphites and strychnia, a popular remedy in beri-bery [q.v.], administered in doses of a few drops daily in emulsion. Oil also burnt in lamps and employed in religious ceremonies. Wood pinkish-yellow, soft. Same title given to Gymnosporia montana [chintoo].

MALA (ಮಲೆ - male, *Can.*; మల - mala, *Tel.*; മല - mala, *Mal.*; மலை - malai, *Tam.*). Mountain [maley, mullay].——*Malabar* * (മലയാളം - malayálam, Mal.) [mala]. Title is an arabic corruption from (mala, mal. mountain + vára, san. slope). Mal. from (mala, mal. mountain + ázham, mal. depth). Sanscrit name (malayavára), meaning malaya mountain + slope. Greek *μαλέ*. Distinguish from Maabar. The term Malabar was transferred by the Portuguese as a name for the Tamul language and so continued till a much later date by Anglo-indians. The fisherman's Tamul on the coast is very like Malayalam. Cf. Gentoo for teloogoo. Revenue district. This is situated along the coast; between 10° 15′ and 12° 18′ N. lat. and between 75° 13′ and 76° 54′ long.; bounded N. by South canara, E. by Coorg, Mysore, Neilgherries and Coimbatore, S. by Cochin, W. by Arabian sea; square miles 5,584; pop. 2,652,565; language Malayalam. Rivers:—Agalapoya, Anjarcundy, Belliapatam, Beypore, Bhawauny, Cadaloondy, Chetwye, Cotta, Cubbany, Cullye, Delly, Mahé, Ponnany, Ramapore, Taliparamba, Tellicherry, Yelattore. Ports:—Attacooy, Auttpooram, Badagara, Belliapatam, Beypore, Cadaloondy, Calicut, Cannanore, Caupautt, Cavvye, Chombaula, Collam, Coorcooy, Cootye, Cottacull, Cuddalore, Cullye, Dharmapatam, Mahé, Maudye, Molancadav, Moottangal, Parpanangaudy, Ponnany, Poothiyangaudy, Quilandy, Talye, Taunore, Tellicherry, Tricody, Velliangode, Yelara, Yellatore, Yetticoolam. Mountains:—Western ghauts and Anamullay hills. The whole area of the district is represented by the following talooks:—Calicut, Chiracal, Cochin, Cooroombranaud, Cottayam, Palghaut, Ponnany, Valavanaud, Wynaud, Yernaud. For departmental purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Calicut. Sub-collector, Tellicherry, in charge of Chiracal, Cooroombranaud and Cottayam talooks. Head assistant collector, Palghaut, in charge of Palghaut and Valavanaud talooks. Special assistant collector, Malapooram, in charge of Yernaud and Calicut talooks. General deputy collector, Ponnany, in charge of Ponnany talook. General deputy collector, Manantoddy, in charge of Wynaud talook. General duty deputy collector, Cochin, in charge of Cochin talook. Tahsildars, Calicut, Rs. 175. Chiracal, Rs. 175. Cooroombranaud, Rs. 200. Cottayam, Rs. 175. Palghaut, Rs. 200. Yernaud, Rs. 200. Valavanaud, Rs. 200. Ponnany, Rs. 225. Wynaud, Rs. 200 plus Rs. 50, Hill allowance. Deputy tahsildars, Aulatore, Rs. 70; range situated in the south of Palghaut talook. Calicut, Rs. 70; range situated in the western coast of Calicut talook. Cannanore, Rs. 100; range situated in the western coast of Chiracal talook. Cherpalcherry, Rs. 70; range situated in the south of Valavanaud talook. Chowghaut, Rs. 70; range situated in the south of Ponnany talook. Coottooparamba, Rs. 70; range situated in the north-east of Cottayam talook. Quilandy, Rs. 70; range situated in the south of Cooroombranaud talook. Taliparamba, Rs. 70; range situated in the north of Chiracal talook. Tiroorangaudy, Rs. 70; range situated in the west of Yernaud talook. Bettatt poothiyangaudy Rs. 70; range situated in the north of Ponnany talook. Vythery, Rs. 100 plus Rs. 50, Hill allowance; range situated in the south of Wynaud talook. Sub-magistrates, Anjengo, Rs. 70. Jurisdiction extending over Anjengo, situated to the north of Trivandrum, in Travancore. Tungacherry, Rs. 70; jurisdiction extending over Tungacherry, situated to the north of Anjengo. Similarly judicial officers:—Judges, Calicut and Tellicherry; Sub-judges, Calicut, Palghaut and Tellicherry. District moonsifs, Angaudipooram, with jurisdiction extending over thirty-one amshoms of Valavanaud talook; Aulatore, with jurisdiction extending over twenty-nine amshoms in Palghaut talook; Badagara, with jurisdiction extending over fourteen amshoms in Cooroombranaud talook; Bettatnaud, with jurisdiction extending over twenty-six amshoms in Ponnany talook; Calicut, with jurisdiction extending over thirty-eight amshoms in Calicut talook; Cannanore, with jurisdiction extending over twenty-one amshoms in Chiracal and seven in Cottayam talook; Chowghaut, with jurisdiction extending over twenty-one amshoms in Ponnany talook; Munjery, with jurisdiction extending over twenty-six amshoms in Yernaud, one in Calicut and three in Valavanaud talook; Nadaupooram, with jurisdiction extending over twenty amshoms in Cooroombranaud talook; Nedoonganaud, with jurisdiction extending over twenty-nine amshoms in Valavanaud and three in Palghaut talook; Palghaut, with jurisdiction extending over twenty-four amshoms in Palghaut and one in Valavanaud talook; Parpanangandy, with jurisdiction extending over twenty-six amshoms in Yernaud talook and five in Ponnany talook; Ponnany, with jurisdiction extending over twenty-one amshoms in Ponnany talook; Quilandy, with jurisdiction extending over twenty-three amshoms in Cooroombranaud talook; Taliparamba, with jurisdiction extending over twenty-two amshoms in Chiracal talook; Tellicherry, with jurisdiction extending over twenty-one amshoms in Cottayam talook; Vythery, with jurisdiction extending over Wynaud and two amshoms in Calicut talook; Similarly Public works officers:—District engineer, Calicut; Divisional officers, Palghaut, Tellicherry, Valavanaud, Wynaud. Contains Registration sub-districts:—Andattode, Anjarcundy, Anjengo, Aulatore, Badagara, Bettattpoothiyangaudy, Cannanore, Cherpalcherry, Chevayore, Chowghaut, Cochin, Codevauyore, Condotty, Coottiyandy, Coottooparamba, Malapooram, Manantoddy, Mungara, Munjery, Munnarcaud, Nadaupooram, Nadoovannore, Palghaut, Paunore, Payoly, Payyangaudy, Perindalman, Ponnany, Quilandy, Taliparamba, Tamracherry, Taunore, Tiroorangaudy, Tripriaur, Trittaula, Tungacherry, Vandoor, Vythery. Contains Forest ranges:—Nelambore, Palghaut and Wynaud. Contains Municipalities:—Calicut, Cannanore, Cochin, Palghaut, Tellicherry. Sultan ally, Rajah of Cannanore, resides in Malabar district. Leading Jenmies [q.v.] are:—Amarambalatt edavanna tirmalpaud, Collangode vengoonattil valiya numbidy, and Nelambore tutcharacauvil tirmalpaud. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 148; lighthouses, II, 168; comparative population, II, 172; location of revenue officers, II, 388; registrars' and sub-registrars' stations, II, 420; ports, II, 424; rain-gauge stations, II, 428; police divisions, II, 431; maps published, II, 436; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 515; zemindarries, II, 298. A special gazetteer account of the whole district is given at II, 99. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Calicut, Chiracal, Cochin, Cooroombranaud, Cottayam, Laccadives, Minicoy, Palghaut, Ponnany, Valavanaud, Wynaud, Yernaud.——*Malabar almond* (நாட்டுவாதுமை - náttuváthumai, Tam.). Same as Catapang.——*Malabar arrowroot* (तवखीर - tavakhíra, Mahr.; कूव्याझाड - kúvyájháda, Conc.; تیکھر - tíkhar, Hind.; جو کے آٹے کا گدہ - jaukeátekágaddah, Dec.; ಕೂವೆಗಿಡ - kúvegida, Can.; ಕೂವೆ - kúve, Too.; పాలగుండ - pálagunda, Tel.; ଖଲୁ - palu, Oor.; കൂവ - kúva, Mal.; கூகை - kúgai, Tam.). Title from habitat. Mahr. from (tvakkshírá, san. bamboo milk) [tabasheer]. Dec. from (jau, hind. barley, hordeum vulgare, linn. + átá, hind. flour + gaddah, hind. tuber). Can. from (kúvalu, can. cry). Tel. from (pálu, tel. milk + kunda, tel. pot). Mal. from (kúvu, mal. to cry + kai, mal. stem); from hollow stems through which children blow out bubbles. Tam. from malayalam. Hind. also (kuvvekágaddah), meaning coova root; (viláitiátekágaddah), meaning foreign flour tuber; (kuvvekenishastekágaddah), meaning coova + starch + tuber. Tel. also (támaravalli), meaning lotus, nelumbium speciosum, willd. + creeper; (mettatámara), meaning dry land + lotus. Tam. also (kúvaikkizhangu), meaning arrowroot. Title otherwise Coova [q.v.], Indian arrowroot, Milk-pot root, Narrow-leaved turmeric, Tikhar, Wild arrowroot. Botanically Curcuma [haridrah] angustifolia, roxb., zingiberaceæ [vricsham, 144]. Bulbs oblong, with pale oblong pendulous tubers; leaves petioled, narrow lanceolate, most acute, striated with fine parallel veins; flowers longer than the bracts; petioles 6–10 inches long, lower half sheathing; spike radical, 4–6 inches long, crowned with an ovate purple tuft; flower large, bright-yellow, with a purple tuft, expanding at sunrise and decaying at sunset; grows without cultivation, especially in travancore. Farinaceous substance procured from roots; like arrowroot both in appearance and virtues; commonly eaten boiled in water and mixed with tyre

[q.v.] and salt [ooppoo]. Red malábar arrowroot from color of root, otherwise Large malabar arrowroot, or Kempa coova, is Curcuma leucorrhiza, roxb.; bulbs ovate; palmate tubers long and far-spreading; leaves broad-lanceolate, smooth, spikes lateral, few-flowered; flowers the length of the bracts, outer border slightly tinged with pink, inner yellow; flowering in the rains. Compare also in other genera:—Alpinia allughas (malaiyiñchikkúva), hill ginger arrowroot; Costus speciosus (channakkúva), violent arrowroot; Kœmpferia rotunda (malankúva), hill arrowroot; Manihot utilissima, brazilian arrowroot; Tacca pinnatifida, mergui arrowroot, tahiti arrowroot, and south sea arrowroot. See gloss. paragraphs.——*Malabar black varnish tree* (കാട്ടുചേര് - káttuchér, Mal.). Title from acrid juice from wood used as black varnish in malabar. Mal. means wild marking nut tree, from similar juice. Same as Holigarna.——*Malabar blackwood* (शिसव - shisava, Mahr.; बीटी - bítí, Conc.; سیسم - sísam, Hind.; کالی لکڑی - kálílakrí, Dec.; ಬೀಟೆ - bíti, Can.; విరుగుడు - virugudu, Tel.; ସିସ୍ସ - sissa, Oor.; വീട്ടി - vítti, Mal.; ஈட்டி - ítti, Tam.). Dec. from (kálí, hind. black + lakrí, hind. wood). Tel. from (virugu, tel. to break); wood splits lengthwise. Mal. from (vítu, mal. freehold property); one of the privileges of jenmies [q.v.] to use the wood. Tel. also (iruvudu); (jillagechettu); (irugudu); (jittégi), meaning small + the vaigy tree, pterocarpus marsupium, roxb. Tam. also (tóthagatti), meaning closeness + interior, from hard heartwood; (núkkam), meaning slackening, from weakening diseases; (karunduvarai), meaning black + diospyros embryopteris, pers. Title otherwise Beety, Black gaub, Bombay blackwood, Eety, Indian blackwood, Indian ebony, Indian rosewood, Ironwood, Jittaigy, Lesser vengay, Nookmaram, Sheesham, Todacutty, Veety. Botanically Dalbergia [yooga pattricay] latifolia, roxb., leguminosæ [vricsham, 48]. Alias Dalbergia emarginata. Tree 40 to 50 feet; leaves pinnate; leaflets alternate three to seven, generally five, orbicular, emarginate, above glabrous, beneath somewhat pubescent when young; panicles axillary, branched, and divaricating; corolla papilionaceous; calyx segment oblong; stamens united in a sheath open on the upper side; ovary stalked, five-ovuled; legumes stalked, oblong-lanceolate, one-seeded; flowers small, white, on short slender pedicels; flowering in hot season. Found throughout presidency; grows to immense size on mountains, particularly on west of presidency to nearly 4,000 feet; chiefly in dry deciduous forests with teak [q.v.], and in the moist evergreen sholahs [q.v.], and is often associated with the bamboo [q.v.] of very slow growth, especially when young; difficult to rear from the ravages of insects on the sprouting seeds. Seeds yield an oil; stem gives a gum [gond]. Sapwood yellow, small; heartwood extremely hard, dark purple, with black longitudinal streaks; no distinct annual rings; coppices well; valuable furniture wood, exported to europe from the forests of canara and malabar; also used here for cart wheels, agricultural implements, gun-carriages, sleepers, carving and fancy work; planks 4 feet wide, after removing the outer white wood, are procurable; the cut wood is heavy and close-grained, and admits of a very fine polish, having appearance then of rosewood; the oil in the wood makes it difficult to paint; the planks split longitudinally, when not well seasoned; an earthy deposit is frequently found embedded in the largest logs, a great defect in what would otherwise be fine planks; malabar blackwood generally fetches a higher price than teak; a variety sissoides, common in Coimbatore, Palghaut, Anamullays, Madura and Tinnevelly, smaller tree, wood redder, is called in tamul dark eety.——*Malabar cardamom* (ملیوار کی الایچی - malewárkíiláchí, Hind.). Same as Cardamom.——*Malabar catmint* (ओष्टफल - ósht'hap'hala, San.; चोधरा - chódhará, Mahr.; कालोतुम्बो - kálótumbó, Conc.; مگبیرے کا جہاڑ - mugbírekájhár, Dec.; ಕರಿತುಂಬೇಗಿಡ - karitumbégida, Can.; మొగబీర - mogabíra, Tel.; കരിന്തുമ്പ - karintumba, Mal.; பேய்மருட்டி - péymarutti, Tam.). San. from (ósht'ha, san. lip + p'hala, san. fruit); flowers resemble lip. Can. from (kari, can. black + tumbégida, can. the plant, leucas). Tel. from (moga, tel. male + bíra, tel. elæodendron glaucum, pers.). Mal. from (kari, mal. black + tumba, mal. leucas indica, r. br.); from flowers. Tam. from (péy, tam. devil + maruttu, tam. to threaten). San. also (bhútánkusha), meaning demon goad; (vaikunt'ha), meaning not blunt. Tel. also (mábhéri); (chinaranabhéri), meaning small + war + drum; (mogabhéri), meaning male + drum. Mal. also (péymeratti), meaning demon driver; (perumtumba), meaning large + the plant, leucas indica, r. br. Tam. also (péyverutti), meaning devil + to frighten; (irattaipéymarutti), meaning two + devil + to frighten. Title otherwise Black toombay, Devil frightener, Large toombay. Botanically Anisomeles malabarica, r. br., labiatæ [vricsham, 103]. Alias Ajuga fruticosa; Anisomeles intermedia; Nepata malabarica; Stachys mauritiana. Shrub, 2 to 5 feet; branches tomentose; leaves ovate-lanceolate, crenately serrated at the upper part, entire below; calyx five cleft, thickly covered with long, white, somewhat viscid pubescence; upper lip of corolla entire, white, under one three cleft, with the lateral divisions reflexed; anthers deep purple; whorls disposed in simple racemes; flower faintly fragrant. A clear reddish oil is distilled, of heavy odour, acrid and slightly bitter. Leaves are bitter and medicinally astringent; juice in infusion given in colic, indigestion, &c.; perspiration produced by inhalation from infusion of whole plant; oil is external application in rheumatism. Anisomeles ovata, br., is similar.——*Malabar convolvulus* (കാട്ടുകിഴങ്ങ് - káttukizhannu, Mal.). Same as Malabar creeper.——*Malabar creeper* (കാട്ടുകിഴങ്ങ് - káttukiznannu, Mal.; பேய்முசுட்டை - péymusuttai, Tam.). Mal. from (kátu, mal. forest + kizhannu, mal. root). Tam. from (péy, tam. devil + musuttai, tam. ipomæa candicans, bot. mag.). Title otherwise Malabar convolvulus. Botanically Argyreia [ajauntry] malabarica, choisy, convolvulaceæ [vricsham, 93]. Alias Convolvulus malabaricus; Ipomæa malabarica. Twining shrub; stem downy; leaves roundish-cordate, acute, furnished with a few scattered hairs on both surfaces, paler below; corolla campanulate; peduncles as long as the leaves, many-flowered at the apex; sepals five; exterior ones clothed with hoary villi with revolute edges; petioles and peduncles villous; flowers small, cream-colored, with deep purple eye; native of malabar. The root is cathartic with farriers [naulbund].——*Malabar glory* (മേട്ടോന്നി - méttónni, Mal.). Title from habitat and shining flower. Same as Wild bachnaug.——*Malabar kino* (വേന്ന - vénna, Mal.). Same as Common vengay.——*Malabar nightshade* (उपोदिका - upódiká San.; پوئی - poí, Hind.; بچلا - bachlá, Dec.; ಬಸಳೆ - basale, Can.; బచ్చలి - battsali, Tel.; പച്ചല - pachala, Mal.; නිවිති - niviti, Singh.; பசலை - pasalai, Tam.). San. from (upa, san. near + udaka, san. water); from moist habitat. Hind. from sanscrit. Drav. from (pasai, tam. stickiness). Botanically the Basella genus, basellaceæ [vricsham, 109]. Generic from tamul. One of the Indian spinaches; cf. Maurisham. Climbing plant with succulent stems and leaves; grown over trellis-work for protection from sun; flowers white or red and hermaphrodite; fruit, a single seed with an embryo coiled up like a watch-spring. The species best known to the natives are shown below.—"*a*" Heart-leaved malabar nightshade with the following vernaculars; (upódiká, San.; poí, Hind.; hiribasale, Can.; battsali, Tel.; pachala, Mal.; mápatniviti, Singh.; kottuppasalai, Tam.); San. from (upa, san. near + udaka, san. water); Can. from (hiri, can. large + basale, can. basella); Mal. from (pasalai, tam. the plant); Singh. from (mápata, singh. large + niviti, singh. malabar nightshade); Tam. from (kottu, tam. cluster + pasalai, tam. basella); Can. also (basale), (doddabasaleballi), meaning large + green + creeper; Tel. also (pottibattsali), meaning short + the plant, (allubattsali), meaning spreading + the plant, (peddabattsali), meaning large + the plant, (tígabattsali), meaning creeper + the plant; Mal. also (pótika); title otherwise Small malabar night shade; is botanically Basella [malabar nightshade] cordifolia, lam., basellaceæ [vricsham, 109]. Climbing, stem variegated green and purple; leaves cordate, entire, undulated; spikes much shorter than the leaves, long-peduncled; flowers purplish without, whitish-green within; berries dark purple; flowering in the cool season; cultivated as pot-herb. Succulent shoots and leaves eaten like spinach [maurisham]. Yields purple dye [shauyam].—"*b*" Red malabar nightshade with the following vernaculars; (pútika, San.; vála, Mahr.; támbadiváli, Conc.; poí, Hind.; lálbachlá, Dec.; kempubasale, Can.; kempubasale, Too.; peddamattu, Tel.; chuvannapachala, Mal.; shivappukkodippasalai, Tam.); Title from color of stem and leaves; San. from (púti, san. putrid); Conc. from (támbada, mahr. red + váli, conc. creeper); Dec. from (lál, hind. red + bachlá, hind. spinach, basella); Can. from (kempu, can. red + basale, can. basella); Too. from canarese; Tel. from (pedda, tel. large + mattu, tel. plant basella); Mal. from (chuvanna, mal. red + pachala, mal. the herb, basella cordifolia, lamk.); Tam. from (shivappu, tam. red + kodi, tam. creeper + pasalai, tam. basella); is botanically Basella [malabar nightshade] rubra, linn., basellaceæ [vricsham, 109]; alias Basella nigra. The commonest species. Stem scandent, 3-4 feet, angular, brownish purple; leaves ovate, acuminate, purplish, spikes nearly equalling the leaves, long-peduncled; flowers purple; outer divisions of the calyx oblong-elliptic; berries dark purple, obsoletely four-lobed, greenish and purple at the apex before ripening; seeds pale brown. Juice of leaves used in catarrh of children. Leaves dressed and eaten like spinach; infusion of leaves used as tea [q.v.]. Yields a very rich purple dye [shauyam], but this is difficult to fix.—"*c*" White malabar nightshade with the following vernaculars; (upódiká, San.; dhaviváli, Conc.; sufedpoí, Hind.; sufedbachlá, Dec.; bilibasale, Can.; boldubasale, Too.; allubattsali, Tel.; vellappachala, Mal.; niviti, Singh.; vellaikkodippasalai, Tam.); Title from color of stem; San. from (upa, san. near + udaka, san. water); Conc. from (dhava, mahr. white + váli, conc. creeper); Hind. from (sufed, hind. white + poí, hind. basella); Dec. from (sufed, hind. white + bachlá, hind. basella); Can. from (bili, can. white + basale, can. basella); Too. from (boldu, too. whiteness + basale, too. basella); Tel. from (allu, tel. to spread + battsali, tel. the plant, basella); Mal. from (vella, mal. white + pachala, mal. the herb, basella cordifolia, lam.); Tam. from (vellai, tam. white + kodi, tam. creeper + pasalai, tam. basella); title otherwise Field basella; is botanically Basella [malabar nightshade] rubra, linn., var. alba, basellaceæ [vricsham, 109]; alias Basella alba. Deciduous biennial trailer; cultivated; leaves ovate, wavy; peduncles simple, longer than the leaf; flowers white, flowering in july and november. Climber in damp regions. Succulent leaves dressed and eaten.——*Malabar nut*

(ആടലോടകം - átalótakam, Mal.). Same as Adhatoday.——*Malabar nutmeg* (مليوار كا جاپهل - malewárkájáphal, Hind.). See under Jauty.——*Malabar oil* (मत्स्यतैल - matsyataila, San.; دهن السمك - dhonussamak, Ar.; روغن ماهى - raughanimáhí, Pers.; مچهى كا تيل - machhíkátel, Hind.; ಮೀನೆಣ್ಣೆ - mínenne, Can.; చేపనూనె - chépanúne, Tel.; മീൻനെയ് - mínneyi, Mal.; மீனெண்ணெய் - mínenney, Tam.). Vernacular means fish + oil. Oleum piscis of chemists [yennay]. Made on W. coast from livers of sharks [soorah], skates [tenky], saw fishes, rays [tenky], oil-sardines [hilsa], &c. The oil-sardine is the basis. This is a migratory fish, and very capricious as to times of arrival and departure; hence supplies of fish-oil vary. The oil exported is sent to Europe for tanning leather [chamrah] and other purposes, taking the place of Train-oil. When properly made it is of a fine amber color; the smell and taste similar to cod-liver oil, but more strongly marked and more disagreeable. It is usually rancid, owing to the livers being exposed to the sun and allowed to putrify in the process of extraction. This oil is used by native painters in preparing coarse pigments [rangh]; it is also rubbed on the large beams and small wood work employed in house-building to preserve them from the weather and white-ants [q.v.].——*Malabar plum* (ജമ്പു - jambu, Mal.). Same as Rose apple.——*Malabar sago palm* (ഈറമ്പന - írampana, Mal.). Same as Bastard sago palm.——*Malabar squirrel* (پہاڑی گلہری - pahárígilehrí, Hind.; ಕೆಂಪಳಿಲು - kempalilu, Can.; മലയണ്ണാൻ - malayannán, Mal.). Can. from (kempu, can. red + alilu, can. squirrel). Hind. and Mal. mean mountain squirrel. Sciurus [anil] malabaricus, sciuridæ [chamarapootcham], rodentia, mammalia [sastanam, 16], of naturalists [jantoo]. Ears, nape, back of neck, the back and sides of the body, bright maroon chestnut; the posterior part of the back, rump, and upper portion of all the limbs, and the tail, back, forehead and interocular regions brownish; muzzle and cheeks rufous; neck, breast, and lower parts dingy-yellow; feet rufous in front, yellow internally; ears small, rounded, very hairy. This large squirrel inhabits the southern portions of Malabar, the Wynaud, slopes of the Neilgherries, Travancore, &c.—"*a*" Allied is Bombay red squirrel, Sciurus elphinstonei. Ears and the whole upper surface of the body, and half way down the tail, outside the hind legs, and half-way down the forelegs outside, of an uniform rich reddish chestnut; the whole under surface of the body from the chin to the vent, inside of the limbs and lower part of the forelegs, crown of head, cheeks and posterior half of the tail, of a fine reddish-white, the two colors being separated by a defined line, and not merging into each other; feet light red; forehead and nose reddish brown, with some white hairs intermixed. Ears tufted. It is found in the northern portion of the Western ghaut [q.v.] extending into north Malabar.—"*b*" Also the Grizzled hill squirrel, Sciurus macrourus. Head and neck, basal half of tail, and limbs externally, dull maroon black, much grizzled with white, especially on the haunches, sides, croup and tail, the apical end of which is brown with a whitish grizzle; lips, cheeks, neck in front and on the sides, belly, and limbs internally, yellow or yellowish white. Ears ovate, acuminate, with short hair, not tufted, or whitish externally with a very small black tuft. The fur here is coarse, slightly waved, and varies from maroon black to rufous brown.—"*c*" Indian species of Sciurus akin to the above and not here found are:—Atrodorsalis or black-backed squirrel, Blanfordii or blanfords' squirrel, Caniceps or golden-backed squirrel, Erythræus or assam red-bellied squirrel, Ferrugineus or rusty-colored squirrel, Giganteus or black hill squirrel, Gordoni or gordon's squirrel, Hipparis or chestnut-bellied assam squirrel, Lokriah or orange-bellied grey squirrel, Lokroides or hoary-bellied grey squirrel, Maximus or central indian red squirrel, Phayrei or laterally banded or phayre's squirrel, Pygerythrus, Sladeni or sladen's squirrel.—"*d*" The large forest squirrels just mentioned inhabit lofty tree jungle, making their nests on the tops of the tallest trees. They are awkward on the ground. They are to be distinguished from the ordinary Striped squirrel [anil pillay].——*Malacoota* (मलकूट - malakúta, San.). From (malaya, san. the mountain + kúta, san. summit). Hwen thsang's mo-lo-kiu-cha. The modern districts of Tanjore and Madura on the east, with Coimbatore, Cochin, and Travancore on the west. In the Chino-Japanese map of India, the alternative name of Malacoota is Hai-an-men, Ptolemy's ἀïοί [charitram]. See vol. I (10), (13).——*Malaicoody* (ಮಲೆಕುಡಿ - malekudi, Can.; മലക്കുടി - malakkuti, Mal.). From (above + kuti, mal. house). A hill-tribe living in the jungle tracts of South canara, Ooppinangady talook, in the cardamom [q.v.] forest tracts, &c., bordering on the ghauts [ghaut, jauty]. See vol. II, 63. General term for hill-tribes.——*Malaimadanday* (மலைமடந்தை - malaimadandai, Tam.). From (above + madandai, tam. woman). Parvaty [q.v.].——*Malainaud* (மலைநாடு - malainádu, Tam.). Any hilly country, term used in many parts. The hilly forest tract in Mysore bordering on Western ghauts [q.v.].——*Malaiyarasa* (മലയരശൻ - malayarashar, Mal.; மலையரச - malaiyarasa, obl., Tam.). From (above + arachan, mal. chief). Aboriginal race of ancient traditions, found among the hills of Canara, Coimbatore, and Malabar. They live in small communities of five or six families, and probably do not exceed 500 in all. Their huts consist of a few sticks covered with bark and thatch. They live on wild forest products, and have a few fowls [moorghy] and dogs [nye]. As a race they are diminutive; with crania small, and pear-shaped [amrood], rising to a point about the junction of the occipital bone and the sagittal suture; a low retreating forehead, long, tangled, black hair, flat nose, and small eyes. They are averse to intercourse with strangers. They catch wild animals with pits and traps and use bows and arrows. They collect drugs for the trade. They burn the dead. They speak corrupt Malayalam in the north and corrupt Tamul in the south. They have a tradition giving them special permission to eat the black monkey [bandar]. From this they are by the low county people called Corangootinnies. The inhabitants of the plains regard them as in alliance with demonolatry, and presents are bestowed in order to prevent their curses producing ill effects. Each village has its priest, who when required calls on the demon resident in the hill. If he obtains the necessary encouragement he appears possessed and gives out answers with yells and gestures. The Malaiyarasar have sacred groves in which they will not fire a gun or speak above a breath [jauty]. See vol. I (111).——*Malaiyaraya* (മലയരയൻ - malayarayan, Mal.). Travancore form of Malaiyarasa.——*Malapaty* (மலைப்பதி - malaippathi, Tam.). From (above + pati, san. master). Refers to Tripatty deity. Hindoo 2nd or pers. name [peyar].——*Malapooram* (മലപ്പുറം - malappuram, Mal. malapuram *). From (mala, mal. mountain + puram, mal. side). Town, Special assistant collector's head-quarters, Telegraph office, Assistant superintendent of Police; Malabar dist., Yernaud tal.; lat. 11° 03′; long. 76° 06′; from Calicut S.E. 24 miles; from Cannanore S.E. 72 miles; from Madras W.S.W. 320 miles; from Manantoddy S. 51 miles; from Munjery S.W. 6 miles; from Palghaut W.N.W. 44 miles; from Ponnany N.N.E. 20 miles; from Tellicherry S.E. 61 miles; from the sea E. 15 miles. Centre for many years of Moplah [q.v.] fanatical outbreaks. In consequence of two such risings in 1841 and 1843, native troops were stationed here; but as they proved useless during the outbreaks of 1849 and 1851, a detachment of European troops has since been quartered. Since 1873 the soldiers have been three times called out to deal with Moplah fanatics. A special police force, consisting of one European inspector, four European head constables and eighty constables is now stationed here. They are relieved from ordinary Police duty and only deal with local outbreaks. Public bungalow [q.v.], barracks for European troops. Tippoo [q.v.]. had a fort here, now in ruins.——*Malasa* (மலச - malasa, obl., Tam.). Short form of tamul Malaiyarasa [mulcer].——*Malavauram* (മലവാരം - malavaram, Mal.). From (above + váram, mal. tax). Tax on hill land cleared.——*Malayalam* (മലയാളം - malayálam, Mal.). From (malai, tam. mountain + ázham, tam. depth). From the abrupt slope. Also in old books Malayarma. No such word known to earlier Greeks. In Cosmas Indicopleustes writing especially about Ceylon, the adjacent country of μαλέ whence the pepper [q.v.] comes is mentioned. This is Tamul மலை a hill, probably from Tamul settlers in Ceylon.—"*a*" The country lying between Neeleshwar river and Cape comorin and the sea and ghauts. Compare Keralam, which is a wider term. See vol. I (51). The whole space was geographically divided into four parts Colanaud, Yairaud, Perimpadapp, Vainaud.—"*b*" The Malayalam language is, like Codoon tamul, an immediate dialect of Shen tamul [q.v.]. Has lost all its verb personal terminations. Written in three characters, Aryam, Kolezhoot [q.v.], and Vattezhoot [q.v.]. The first is a variety of the Grantam [q.v.] and expresses the Nagry [q.v.] alphabet [varnamaulay]; the second is the character in which public grants are drawn up; and the third, the clipped or abbreviated letter, is only a modification of the second. Both the latter differ little from Tamul, except in the mode of joining the vowels to the consonants and in the manner of writing. There is a large intermixture of Sanscrit in the vocabulary. See vol. I (50), (51), (52), (58); II, 110.——*Malayam* (मलय - malaya, San.). The travancore hills.——*Malayamaun* (மலையமான் - malaiyamán, Tam.). From (above + mán, tam. suffix showing possessor). Epithet of any king of the Chera [q.v.] race, as lord of a hilly country.——*Malayauly* (മലയാളി - malayáli, Mal.; மலையாளி - malaiyáli, Tam.). From (above + áli, tam. ruler).—"*a*" A native of Malabar.—"*b*" Also a tribe inhabiting the hill ranges of North and South arcot and Salem districts, especially the Shevaroys; engaged chiefly in pastoral and agricultural pursuits. According to traditions these originally emigrated from Conjeeveram about 600 years ago, on account of religious persecution. They tenaciously cling to their common origin and shrink from alliances with the people of the plains. In features and physical appearance and dress they scarcely differ from inhabitants of the adjoining country, and speak Tamul somewhat corrupted. The chief deity is Cauly [q.v.], in whose honor they celebrate a feast once a year lasting fifteen days. During this time no one from the plains approaches them. Marriage ceremonies are performed without the intervention of Bramins [q.v.]. In certain traces of ancient polyandric institutions still survive. Even localities it is imperative on a widow to marry again. The at 80 years of age a widow is not exempted from this rule. The houses are long, low, thatched structures, with the roofs secured

by long bamboos pegged down at intervals. Each hut stands in a yard surrounded by a palisade of wattled bamboos. The village precincts are regarded as sacred; and even Bramins are desired to walk barefoot along their alleys. In certain districts villages resemble clusters of enlarged beehives, houses being circular and raised on wooden piles about two feet high. The walls are of split bamboo [q.v.] coated with mud; roof conical and thatched with long coarse grass [cooray]. Numbers about 70,000 [jauty]. See vol. II, 82,124.——*Maldaivy* (మల్దేవి - maldévi, Tel.). From (mala, tel. mountain + dévi, tel. goddess). Sanscrit name (malat'ha), meaning sin-taker. River; Nellore dist., Nellore tal. Takes its rise in the calingula [q.v.] of Caligherry reservoir [sangam]. Pearls [moty] were found formerly.——*Maley* (ಮಲೆ - male, Can.; మల - mala, Tel.; மலை - malai, Tam.). Hill; suffix in place names [mullay].——*Maliah* (మాలియ - máliya, Tel.). From (mala, tel. mountain). High lands in Ganjam district formed by the irregular chain of the Eastern ghauts [q.v.]. In the Ganjam maliahs there are three plateaux. One is from the Boad frontier to a line drawn from Oodayagherry in the Goomsoor maliahs and Sarangada of Chinna kimedy. This is flat and uninteresting and differs but little in appearance and produce from the plains near the foot of the hills. The second is considerably higher with fine hills and valleys intersecting it in every direction, and extends from this line to a line drawn from Noovaugada in the Parlakimedy maliahs to Mahendragherry. The third, from this to the Vizagapatam frontier, is again lower than the central one and less picturesque. The mean elevation of the central plateau is 2,000 feet, that of the other two is considerably less. Balligooda is 2,200 feet, Soobarnagiry 2,445 feet, and Dosragaum a little more above sea-level. The chief peaks are Dodosoro, near Reikyah, 3,800 feet, in the Goomsoor maliahs; Singarauz 4,976 feet, and Mahendragherry 4,928 feet, in the Soorangy maliahs; and Deodangar or Ojjeigodo 3,941 feet, in Parlákimedy. The chief passes [ghaut] into the Ganjam maliahs are as follows. To begin with the easiest, that from Russellcondah by Doorgaprasaud known as the Calingyah ghaut, is a bandy [q.v.] road quite practicable for carts. Proceeding southward, the next ghaut is Pippalpunka by Gajellabady to Daringabaudy, a long and stony road. After that the Cuttingia ghaut from Sooradah viâ Meercote to Cuttingia. The next is the Hot spring or Taptapauny ghaut from Digoopoody to Lohogoody. Further south is the Pooypauny ghaut from Serangy viâ Noovaugada to Cheligodo. Last is the Moonshingy ghaut in Parlakimedy from Kimedy to Goomma. These are all passable by loaded elephants [q.v.] and horses [ghorah] and men. There are other paths used by the hill-people. From Calingyah, the top of the first ghaut named, besides the Boad road there is a road completely bridged to Balligooda, and an alternative road to the same place viâ Sarangada and Coortely. From Balligooda there are roads to Baracoma and Toomaribund, and one which traverses the length of the Maliah country from Balligooda towards Goomma known as the Grand military road. The more important Maliahs of Ganjam are given below; they take their names from the contiguous tracts in the plains. The Goomsoor maliahs, population 49,750, Khonds [q.v.] chiefly, containing the following mittahs [q.v.]:—Baurah, Chocapaud, Coradah, Hodogodo, Lanipoda, Oteero, Tentooligodo. The Daringabaudy maliahs, population 6,761, Khonds chiefly, containing the mittahs of Cuttingia and Daringabaudy. The Bodagooda maliahs, population 16,810, Khonds chiefly, containing the following mittahs:—Boodooly, Corchobady, Gondogoto, Govindapooram, Jhiliky, Jorow, Kondhoodoba, Lohogoody, Meercote, Moheno, Odoba. Chinna kimedy maliahs, population 46,264, Khonds chiefly, containing the following mittahs:—Balligooda, Baracoma, Bodagooda, Codootooly, Comonkolla, Coortumgar, Cotgodo, Gadapore, Mahashingy, Mirikyah, Moondigar, Panigonda, Poosangyah, Roomisy, Sarangada, Toomaribund. Pedda kimedy maliahs, population 29,512, chiefly Sowrahs [q.v.] containing the following mittahs:—Bodopoda, Cotodesho maliah, Jalarshingy goomah, Keradango goomah, Kojiripoda, Noovaugada, Oodayagherry, Ramgiry goomah. Parlakimedy maliahs, population 19,201, chiefly Sowrahs, containing the following mittahs:—Boomulshingy, Geiba, Gondahutty, Goomma, Jirango, Koniporo, Lohkniyagodo, Narayanaporo, Naumangoro, Ojoyogodo, Ryegodo, Serangy. The Boodaurasinghy, Jalantra, Jarada, Mundasa and Soorangy maliahs are comparatively small and of little importance. Their inhabitants are chiefly Sowrahs. The several mittahs have always formed part of the zemindarries [q.v.] whose name they bear, but in 1875 special hill sunnuds [q.v.] were granted for them to the Zemindars [q.v.] concerned; under these sunnuds, their alienation by sale or otherwise was forbidden. For the administrative arrangements, see volume I, 71.——*Mulcer* (மலசர் - malasar, Tam.). English corruption for Malaiyarasa [malasa].——*Mullay* (ಮಲೆ - male, Can.; మల - mala, Tel.; മല - mala, Mal.; மலை - malai, Tam.). Mountain [mala, maley]. The principal mountains in this Presidency are the Western ghauts, or Sahyadry range, running for 800 miles along the shore of the Arabian sea. The range increases to 6,000 feet in height along the borders of Mysore and joins the Neilgherries; highest summit, Dodabetta, 8,760 feet, the highest point but one [anamoody] in Southern india. South of the Neilgherries, and separated from them by the Palghaut valley, a gap 20 miles broad, lies an unnamed range, continuing the Western ghauts for 200 miles to Cape comorin. From the eastern parts of the Neilgherry mountains extend several ranges towards north-east as far as the Godavery, with an average elevation of about 1,500 feet. These ranges are called the Eastern ghauts. There are several detached groups as the Shevaroy hills, north of Salem; highest summit, Moottanaud [green hills], 5,260 feet high. Besides the principal mountains mentioned above there are the Nagary hills in North arcot; the Varauhagherry or Pulney hills in Madura; and the Cuddapah hills between Cuddapah and Nellore [ghaut].——*Mullay chaurp* (மலைச்சார்பு - malaiççárbu, Tam.). Hilly country.——*Mullay poonam* (மலைப்புனம் - malaippunam, Tam.). Rocky soil.——*Mulnaud* (ಮಲನಾಡು - malanádu, Can.). Any hilly country. Especially western part of Mysore.

MALABATHRUM (तमालपत्र - tamálapatra, *San.*). From (tamála, san. cassia cinnamon + pattra, san. leaf). Title from sanscrit, omitting first syllable. Greek μαλάβαθρον. In former days this was the dried leaf of various wild species of cinnamomum [cinnamon]. Classical export from India.

MALACA (మలక - malaka, *Tel.*). Bullock load [pothy].——*Malacapootty* (మలకపుట్టి - malakaputti, Tel.). From (above + putti, tel. a grain measure). Measure of capacity. 2½ pullepootties = 1 malacapootty; 3 malacapootties = 1 garce [alavay, 3b.] Approx. actual value, 1 malacapootty = 32 cubic feet and 704 cubic inches. Godavery. Also sub-divided into 20 tooms.

MALACCA (ملاكا - malakka, *Malay*; மலாக்கா - malákká, *Tam.*). Means emblic myrobalan, phyllanthus emblica, linn., plant being abundant there. Town and territory on western side of Malay peninsula, washed by straits which bear its name. The town is in lat. 2° 20′ N.; long. 102° 00′ E., at mouth of small river. Malacca was taken by the Portuguese under Albuquerque in 1511; became a Dutch possession in 1642; fell in 1795 into the hands of the British, to whom it was finally ceded in 1824. Part of the Indian empire till 1867, when transferred to the colonial office and since a crown colony. Term also applied to the whole of the Malay peninsula. Distinguish from Moluccas. See vol. I, 31.——*Malacca bean* (ملاکا کی پهل - malákahkíphalli, Hind.). Marking-nut.——*Malacca benzoin* (மலாக்காசாம்பிராணி - malákkásámbiráni, Tam.). Same as Benzoin.——*Malacca cane* (ملاکا کی بید - malákahkíbed, Hind.). The cane of Calamus scipionum, lour. Stems are thicker than Calamus rotang [country rattan]. Prized as walking sticks. Some are of a uniform rich brown color, others are variously mottled. Imported from Singapore and Malacca.——*Malacca jamboo* (ملاکا کا جام - malákakájam, Hind.). Same as Malacca jaumoon [q.v.]——*Malacca yam* (زمینی کندا - zamíníkandá, Hind. and Dec.; మలాకాకాయపెండలము - malákákáyapendalamu, Tel.; കാട്ടുകാച്ചിൽ - káttukáççil, Mal.; පනුකොඩොල් - panukondol, Singh.; காட்டுவள்ளி - káttuvalli, Tam.). Hind. from (zamín, hind. ground + kandá, hind. root) [telinga potato]. Tel. from (malákà, tel. malacca + káya, tel. fruit + pendalamu, tel. dioscorea). Mal. from (kátu, mal. forest + káççil, mal. dioscorea alata, linn.). Singh. from (panu, singh. living + kondol, singh. yam). Tam. from (kádu, tam. forest + valli, tam. dioscorea). Tam. also (káyvalli), meaning fruit + dioscorea, from bulbous yams; (shíragavalli), meaning cumin seed, cuminum cyminum, linn. + dioscorea, from similar smell of plant; (káttukkáyvalli), meaning wild + fruit + dioscorea; (káttuççíragavalli), meaning wild + cumin + dioscorea. Title otherwise Bulbous-rooted yam, Cummin yam, Granada yam, Guinea yam, Zameen cundah. Botanically Helmia bulbifera, kth., dioscoreaceæ [vricsham, 132]. Alias Dioscorea bulbifera. Shrub, leaves alternate, deeply cordate, acuminate, seven-nerved; the exterior nerves two-cleft; transverse veins reticulated; stem bulbiferous; male spikes fascicled; west coast. Root applied to ulcers after being dried and powdered; bulb on stem and roots used as vegetables; the latter are bitter, but after process of being covered over with ashes and steeped in cold water, they become eatable. Other common species are:—Dæmona, called tiger-root, nauseous even boiled; Hirsuta; Tomentosa. For the dioscorea genus see Auloo.

MALATTAUR (மலட்டாறு - malattáru, *Tam.*). From (maladu, tam. barren + áru, tam. river). River; South arcot dist., Tricalore and Cuddalore tals. An offshoot from the Ponniaur, which it leaves eight miles east of Tricalore, falling into the Guddilam three miles west of Panrooty.

MALAY (ملايو - male, *Malay*). Race of people inhabiting the Malayan peninsula and the Western islands of the Archipelago. Also their language.——*Malay almond* (ملے کا بادام - malekábádam, Malay). Same as Catapang.——*Malay apple* (ملے کا میوہ - malekámewah, Hind.). Same as Malacca jaumoon.——*Malay camphor* (ملے کا کافور - malekákáfúr, Hind.). Product of Dryobalanops aromatica, colebr., dipterocarpeæ [vricsham, 24].——*Malay earth gall* (ملے کا ماجو پهل - malekámájúphal, Hind.). Same as Mongoose snake root.——*Malay red wood* (چندن کا جهاڑ - chandankájhár, Dec.; سنتور - santur, Malay; చేవమాను - chévamánu, Tel.; சேவமரம் - shévamaram, Tam.). Dec. from (chandan, dec. redwood, santalum album, linn. + jhár, dec. tree). Tel. from (chéva, tel. red heart-wood + mánu, tel. tree) [soymida]. Tam.

from teloogoo. Tam. also (sháyamaram), meaning color + tree. Title otherwise False mangosteen, Santoor, Wild mangosteen. Botanically Saudoricum indicum, cav., meliaceæ [vricsham, 36]. Generic name from malay. Alias Mella koetjape; Trichilia nervosa, venosa. Lofty tree; leaves 6–18 inches; leaflets 3–8 by 1½–4¾ inches; common petiole 1¾–6 inches; flowers ⅓ inch long; calyx about 1/12 inch; stigmas truncate; fruit about 3 inches diameter; pulp fleshy acid, with a peculiar smell. Small or middling-sized tree; flowers numerous, small, yellow; berry nearly round, size of small orange [q.v.], slightly villous when ripe, yellow; has a fleshy acid pulp. Root bitter and used medicinally. The fruit is eaten and made into jelly. Sapwood grey; heart-wood red, moderately hard, close-grained, takes good polish; used for carts and boat-building.——*Malay sandal* (سنتور - santur, Malay). Same as Malay red wood.——*Malay upas* (چنڈال - chandál, Hind.). Same as Sack tree.——*Moley* (மலாய் - maláy, Tam.). A kind of curry [q.v.] corruption of Malay.

MALDA (مالدا - máldá, *Hind.*). A district of Bengal north of Ganges noted for the manufacture of silk [puttoo] and indigo [q.v.]. Had an English silk factory, now known as English bazaar.——*Malda dye* (پنڈالو - pindálú, Dec.; ಕಾಡುಗೆಣಸು - kádugenasu, Can.; మానుపెండలము - mánupendalamu, Tel.; മരക്കിഴങ്ങ - marakkizhannu, Mal.; மரவள்ளி - maravalli, Tam.). Dec. from sanscrit meaning ball-like yam. Can. from (kádu, can. wild + genasu, can. dioscorea). Tel. from (mánu, tel. tree + pendalamu, tel. dioscorea). Mal. from (maram, mal. wood + kizhannu, mal. root). Tam. from (maram, tam. tree + valli, tam. the plant, ipomæa batatas, lamk); from fleshy root. Hind. also (rotíálu), meaning bread potato. Dec. also (pindalam). Can. also (maragenasu), meaning tree + the plant; (kanagala); Tel. also (karrapendalamu), meaning stick + the plant, dioscorea. Mal. also (maravélikkizhannu), meaning wood + hedge + root; (maramchínikkizhannu), meaning wood + foreign root; (vélikkizhannu), meaning hedge + root, from being planted as hedgestakes; (púlakkizhannu), meaning bombax malabaricum, dec. + root [long zedoary]; (chínakkantal), meaning chinese root; (ézhilakkizhannu), meaning seven leaves + root, from the palmate leaves. Tam. also (álvalli), meaning useful yam + the plant; (malaiççarkkaraivalli), meaning mountain + ipomæa batatas, lamk. Title otherwise Brazilian arrowroot, Cassareep, Cassava, Cipipa, Mandioc, Manioc, Maravully tree, Mountain sweet potato, Mousache, Sweet potato, Tapioca. Botanically Manihot utilissima, pohl., euphorbiaceæ [vricsham, 118]. Alias Janipha manihot; Jatropha manihot. Stems white, crooked, 6–7 feet, smooth, covered with protuberances from the fallen leaves; branches crooked; leaves palmate, divided nearly to their base into five lanceolate, entire lobes, attenuated at both extremities, dark green above, glaucous beneath; midrib prominent below, of a yellowish-red color; panicles axillary and terminal, 4–5 inches long; male flowers smaller than the female; calyx purplish on the outside, brownish within, segments five, spreading, divided nearly to the base; female flowers deeply five-parted, with lanceolate-ovate segments; root oblong, tuberous; capsule ovate, triangular, tricoccous; seeds elliptical, black, shining; flowers small, reddish; shrub of tropical america, introduced here by portuguese; thrives on most barren soil. The large fleshy root is full of venomous juice, chemically hydrocyanic acid, which if taken internally produces death; in manufacture the root is rasped, and pulp well bruised and thoroughly washed, after which the mass is placed on iron plates and heated; in this way the venom is driven off, and the residue or fecula becomes cassava flour or cassava starch; lumps of this again are heated, and by agglutination form cakes fit for consumption; tapioca is the same substance differently treated and broken into small grains for use; extract made from the concentrated juice of the root called cassareep is a powerful antiseptic. From the juice red indians in south america prepare mandioc poison to tip arrows. Cassava flour is eaten with fish curry [q.v.] when rice [q.v.] is scarce; natives also cook the raw root for curries; tapioca is the well-known food; the expressed juice is sometimes fermented with treacle into an intoxicating fluid. Leaf gives here dye called green dye of malda [shauyam]. Wood soft.

MALEEDA (مليدة - malídah, *Hind.*). From (málídan, pers. to rub). A meal formed of pounded bread or cakes mixed with ghee [q.v.], sugar [q.v.], milk [paul].

MALFOOF (ملفوف - malfúf, *Hind.*). From (lafa, ar. to wrap). Enclosure in a cover.

MALIK (مالك - málik, *Hind.*; മാലിക - málika, *Mal.*). From (milk, ar. property) [maul, milk]. Proprietor, king. Attribute of god [allah]. Forms composite alam; as Abd ool malik, slave of god [ism]. Part of lacabs; as Malik oosh shorah, king of poets. Also a house title; as Malik ghoolaum dastgheer, alaumat + name; Malik ool masheikh, chief of the priests; Malik ool toojar, chief of the merchants [ism].——*Malik aslam khan* (ملك اسلم خان - malikaslamkhán, Hind.). Royal title + alam + honorific title. Fowjdar [q.v.] of Nellore from 1765 to 1772 and nephew of Nawaub [q.v.] wallajah [q.v.].——*Malikhana* (مالكانہ - málikána, Hind.; മാലിഖാന - málikhána, Mal.). Subsistence allowance granted to zemindars [q.v.], poligars [q.v.], and others, dispossessed of their estates, usually at the rate of ten per cent. on the collections actually made from their estates.——*Mulkangherry* (ملكنگرى - mulkangiri, Hind.). See sep. title.——*Mullika* (ملكہ - malikah, Ar.). Queen. Part of lacab; as Mullikai jehaun, queen of the world [ism].

MALLOTUS (ملّتا - mallata, *Hind.*). From nepaulese. A genus [kamela].

MALPAUN (മല്പാൻ - malpán, *Mal.*). Syrian word, meaning doctor of divinity. Archdeacon with Malabar syrian christians.

MALPEY (ಮಲ್ಪೆ - malpe, *Can.*). Village; Port, South Canara dist., Oodipy tal.; pop. 3,125; lat. 13° 21′; long. 74° 45′; from Mangalore N. 34 miles; from Oodipy W. 3 miles. Port of Oodipy. Small fishing village at mouth of Oodipy river. Daryah bahaudur ghur, an island off Malpey, forms sheltered anchorage. As regards trade one of the most important towns in the district. light close to the entrance of the river; Lat. 13° 20′; long. 74° 44′; white; fixed; 5 miles range; flagstaff; guide to vessels making the port; exhibited 1st October to 31st May.

MALWA (मालव - málava, *San.*). A table-land in Central india, north of Vindhya mountains. Governed in prehistoric times by Hindoo rajahs, one of whom was the celebrated Vicramauditya [q.v.], it passed into the hands of Mahomedans about the commencement of fourteenth century and continued in their possession till conquered by Mahrattas in eighteenth century. Now consists of many native states, the more important being Gwalior and Indore. Large quantity of opium is produced and exported.——*Malwa opium* (مالوى افيم - málví-afím, Dec.). Occurs in round or slightly flattened balls, weighing about ten ounces each; consistence like that of smyrna opium; appearance of section homogeneous; colour almost rusty brown, odour very powerful, taste intensely bitter and lasting [aphainam].

MAMIRAUN (ماميران - mámírán, *Ar.*; درخت ماميران - darakhtimámírán, *Pers.*; ماميران كا پير - mámíránkáper, *Hind.*; ماميران كا جهاڑ - mámíránkájhár, *Dec.*; පීතකරොසන් - pítakarosan, *Singh.*). Title from arabic. Greek μαμιράς. Title otherwise Assamese golden-thread root, Coptis root, Huldy bachnaug, Mishmee bitter, Mishmi teeta. Botanically Coptis teeta, wall., ranunculaceæ [vricsham, 1]. Specific through assamese from san. (tikta), bitter. Rootstalk horizontal, golden yellow, woody, densely fibrous, very bitter; leaves glabrous; petioles 6–12 inches; leaflets 2–3 inches, ovate-lanceolate, pinnatifid, lobes incised, terminal largest; scape slender, equalling the leaves; flowers one to three-pedicelled, bracts leafy; sepals ¼ inch, oblong-lanceolate, acute; petals narrow, ligulate, obtuse, ⅓ shorter than the sepals. Creeping-rooted, three-leaved, low plant, native of assam; the roots are nearly cylindrical and uneven, scabrous, more or less curved, of a greyish brown color externally, internally bright yellow, varying in thickness from the size of a crow quill to double that diameter; taste intensely and purely bitter, very lasting, with only a slight aroma; on mastication the root tinges the saliva yellow. Sold in bazaars [q.v.] as a bitter tonic; substituted for british gentian [chiretta] calumba [q.v.] and cinchona [koinah]; gives to pharm. mishmi tita, coptidis radix; officinal.

MAMODEESA (മാമോദീസ - mámódísa, *Mal.*). Baptism with the Malabar syrian christians.

MAMOOL (معمول - mamúl, *Hind.*; மாமூல் - mámúl, *Tam.*). From (aml, ar. action) [amal]. Custom. Immemorial custom is declared by Menoo [q.v.] to be the root of all law. It is the vital spirit of the Hindoos and the immediate cause of the permanence of their institutions. Cf. Auchauram, Maryauday.

MAN (मन् - man, *San.*). To think.——*Manas* (मनस् - manas, San.). From (man, san. to think). Mind, sign of Mahat [q.v.], an organ of action and of perception and action. The heart, the will, the seat of desire and consciousness. According to Vishnoo pooraunam [q.v.], manas is that which considers the consequences of acts to all creatures, and provides for their happiness.——*Manmatan* (मन्मथ - manmat'ha, San.). From (manas, san. mind + mat'h, san. to agitate). The god of love. The Cauman of the north. Manmatan is represented in the south as a natural man, with a crown on his head; and his ears, neck, breast, arms, hands, feet, and the remaining part of his body, are adorned with various ornaments of pearls [moty], precious stones [ratnam], gold [pon], and silver [velly]. On his shoulders he wears a Bauhoo puttay or shoulder girdle. In one of his hands he holds a bow of sugarcane [q.v.], with a string of insects; and in the other an arrow, ready for discharge. On his back he carries a quiver, with the Puncha baunam [cauma baunam] or five sorts of arrows, consisting of five kinds of flowers. His standard is a fish [matsyam]; his vehicle is a parrot [totah]; and the color of his body is yellow. Raty [q.v.] his wife is represented as a female with long black hair braided into a pig tail that reaches to the ground. Like her husband she wears a crown, and is on the whole adorned and equipped similar to him. Manmatan has no pagodas [q.v.] and is not worshipped, but the poets make much use of his name. Books specially devoted to his praise are:—Nellaimaulay, Manthoonool, Viralividoo tooth. Among his numerous epithets may be specified:—Anangan or bodiless;

Angajan or body-born; Caroothiya caroop villy or the designing sugar-cane-man; Caumy or the lustful; Chittajan or mind-born; Kinganaykishavan or the lord of the five flower arrows; Madanan or the wanton; Madhoo sakhan or the friend of spring; Manobhavan or mind-born; Manojan or mind-born; Mauran or killer; Meenoorcodiyooyarttone or bearer of the fish-standard; Mohan or the lustful; Oorvilly or beautiful bow-man; Poovauly or he with the flower arrow; Raticauthalan or raty's husband; Shambaraury or destroyer of shambaran; Shengan maul meindan or vishnoo's son; Tenraltairone or he whose chariot is the south wind; Tirmagalmaindan or the son of the divine daughter; Villy or the bow-man. Manmatan creates love both in mortals and celestials, but more especially in the female sex, whilst his wife Raty causes love in the male sex [matam]. ——*Manobhavan* (मनोभव - manóbhava, San.). From (manas, san. mind + bhú, san. to be). Mind-born or created by fancy or imagination; Manmatan.——*Manojan* (मनोज - manója, San.). From (manas, san. mind + jan, san. to be born). Mind-born; like manobhavan. Manmatan.——*Manoshilay* (मनश्शिला - manashshilá, San.; زرنيخ احمر - zirníkhiahmar, Ar.; زرنيخ سرخ - zirníkhisurkh, Pers.; منسل - mansal, Hind.; لال هرتال - lálhartál, Dec.; ورنگن - warangan, Malay; ಮನಶಿಲೆ - manishile, Can.; మణిశిల - manishila, Tel.; മനോല - manóla, Mal.; රත්සිරියල් - ratsiriyal, Singh.; மனோசிலை - manósilai, Tam.). San. from (manas, san. orpiment + shilá, san. stone). Ar. from (zirníkh, ar. arsenic + ahmar, pers. red). Pers. from (zirníkh, ar. arsenic + surkh, pers. red). Hind. from sanscrit. Dec. from (lál, hind. red + hartál, hind. orpiment). Mal. from sanscrit. Singh. from (rat, singh. red + siriyal, singh. arsenic). Tam. from sanscrit. Hind. also (lálsumbul), meaning, red arsenic. Tam. also (kuthiraipparbásánam), meaning horse-tooth arsenic. Realgar. Otherwise Red arsenic [paushaunam], Impure bisulphate of arsenic, Sulphuret of arsenic, Red orpiment. Arsenicum rubrum, bisulphuretum, disulphidum, of chemists. Aurora-red color, which passes through scarlet red, and hyacinth-red; lighter in weight than yellow orpiment [hartaul], contains less sulphur [gandhac]; internally shining, otherwise soft, brittle, and frangible; tasteless, and insoluble in water. Imported from China. Purified by being rubbed with the juice of lemons [q.v.] or of ginger [q.v.]; used internally in fever, skin diseases, cough, asthma, &c., externally in skin diseases; in fever, it is generally used in combination with mercury [rasam], orpiment [hartaul], &c. Used as a coloring substance [shauyam] as well as in pyrotechnical compounds [baunam].——*Manwantaram* (मन्वन्तर - manvantara, San.). From (manu, san. sovereign of earth + antara, san. interval). The period or age of a Menoo [q.v.]. A period equal to seventy-one times the number of years contained in the four yoogs [q.v.], with some additional or sundhyay [q.v.] years. This is the duration of the Menoo, the attendant divinities, and the rest, which is equal to 852,000 divine years, or to 306,720,000 years of mortals, independent of the additional period. Fourteen times this period constitutes a Bramha day [dinam], that is a day light of Bramha [q.v.] or a Calpam [q.v.]. Total 308,448,000 solar sidereal years [maunam]. The seven past manwantarams, agree in number with seven successive periods or Yomim of creation, recorded in the 1st chapter of Genesis, in the seventh of which periods the world now is. Cf. the epistle of St. Jude, in the expression "Enoch, the seventh from Adam."——*Matam* (मत - mata, San.; மதம் - matham, Tam.). From (man, san. to think).—"*a*" Religion, principle. The development of the Hindoo religion took place in three periods, the Vedic, Epic, and Pooraunic. The knowledge of the first is derived from the Veda [q.v.]; of the second from the Ramayanam [q.v.] and the Mahabhaurat [q.v.]; of the last from the Pooraunams [q.v.] and Tantrams [q.v.]. For the Dravidian religion as found, see vol. I (70) to (94), and the following foot notes:—history of rel. and phil. I (70), consp. of pantheon I (77), devil worship I (80), serpent worship I (82), sectarian marks I (85), existing hindoo sects I (88), jeinas I (95).—"*b*" The seven matams or principles of authorship are according to Nunnool:—agreement or acquiescence; rejection or refutation; conditional adoption and rejection of other tenets; establishing and maintaining an hypothesis; inclining to, and adopting, one or other of two contrary opinions; exposing the faults of other works; unyielding and positive adherence to one's own opinions. ——*Maumsam* (मांस - mámsa, San.). From (man, san. to think); what makes one feel strong. Flesh. Eaten freely by lower orders when they can procure it. To Bramins it is forbidden food. Many medicinal uses. Flesh of tiger [pooly], boiled in mustard seed [rayaun] oil, used as an unguent for the body, is remedy for emaciation. Flesh of elephant [q.v.], boiled in mustard seed oil, is a remedy for Cochin leg [q.v.]. Bear's [ricsham] flesh is used for affections of the eyes, especially cataract. Flesh of jackal [q.v.], boiled in oil and rubbed on the loins, in use for hæmorrhoids. Flesh of male camel [ottagam] employed in diabetes. Flesh of buffalo [khoolgah], dog [nye], musk-deer [mrigam], monkey [bandar], black partridge [teetar], peacock [mayil], have all specific properties attached to them by veidyans [q.v.].——*Maumsicay* (मांसिका - mámsiká, San.). From (mámsa, san. worm); worm-killer. Title otherwise Copper-leaf, Three-seeded mercury. Botanically the Acalypha genus, euphorbiaceæ [vricsham, 118]. Shrubs, undershrubs, perennial or annual herbs, found in tropical and sub-tropical regions; leaves alternate, toothed or crenate, and nettle-like; flowers minute, usually green or reddish, and disposed in erect or drooping spikes; capsule three sided, three-celled and of the size of a pea [calauyam]. The species best known to the natives are:—fruticosa [chinny], indica [cooppamainy], spiciflorus [vuttatauly]. Other s. indian species indigenous or naturalized are:—alnifolia, brachystachya, capitata, ciliata, fallax, malabarica, paniculata.——*Maunam* (मान - mána, San.). Honor. Distinguish from Maunam, a measure [mau].——*Maunasam* (मानस - mánasa, San.). Conducive to mental contemplation; a lake in the Himalaya mountains, a lake in the world of Bramha [q.v.]; also name of a snake goddess.——*Maunavedan* (മാനവേദൻ - mánavódan, Mal.). From (mána, san. honor + véda, san. knowledge). Hindoo 2nd or pers. name [peyar].——*Mauna vicrama* (മാനവിക്രമ - mánavikrama, Mal.). From (mána, san. pride + vikrama, san. prowess). Name of the Zamorin [q.v.] to whom Calicut was given by Chermaun on his retirement to Mecca.——*Maunoosham* (मानुष - mánusha, San.). From (man, san. to think). Propitious to man. Epithet of certain signs of the zodiac [raushy]. ——*Maunyam* (मान्य - mánya, San.). From (mánya, san. respectable). Privilege. A land exempt from tax [teervay] in whole or in part. Generally land given to village servants [balootah]. Corresponds to the foreign word inam [maniyam, monigar]. Ardha maunyam is where the holder has a claim only to the government revenue [khirauj, teervay]. Sarwa maunyam is where the holder is entitled not only to the revenue of the state, but the rents of the cultivators.——*Mautangy* (मातङ्गी - mátangí, San.). From (mata, san. will + gam, san. go). The young woman; Bhadra cauly [q.v.] or Mauriyamman [q.v.].——*Menoo* (मनु - manu, San.; మనువు - manuvu, Tel.). From (man, san. to think). Thought; man. Compare μίνως in Greek, Manes in Lydian, Mannus the early Teutonic leader and legislator, the Cretan minos, the Egyptian menes, &c. In the Vedic legend of the flood [pralayam] the man saved by the fish is called Menoo. Title of 14 patriarchs who preside successively over the same number of Manwantarams of which with sundhyays [q.v.] the Calpam [q.v.], bright-half of Bramha's day [dinam] is composed. Each rules during seventy-one Mahayoogs [q.v.], amounting altogether to 994 Mahayoogs for the fourteen. Besides these, in order to complete the bright-half of Bramha's day, are required six more Mahayoogs which are the Sundhyay. There are seven Menoos past and seven others to come. The Jeinas [q.v.] have 14 Menoos, to whom they give names different from those found in Hindoo pooraunams [q.v.]. The calpam formerly consisted only of nine manwantarams. Five have been interpolated. Festivals are held for the commemoration of the patriarchs according to the following table compiled from the Vishnoopooraunam [q.v.]:—

No.	Name of Menoo.	Lunar month.	Pacsham.	Tity.	
				Numeral.	Name.
1	Swauyambhoovan	Caurteecam	Shooclam.	12	Dwaudashy.
2	Swarochishan ...	Aushweejam	Do. ..	9	Navamy.
3	Oottaman	Cheitram ...	Do. ...	3	Triteeyay.
4	Taumasan ...	Bhaudrapadam.	Do. ...	3	Triteeyay.
5	Reivatan	Pooshyam ...	Do. ...	11	Yecaudashy.
6	Icshwauk	Ashaudham,	Do. ...	10	Dashamy.
7	Veivaswatan ...	Maugham ...	Do. ...	7	Saptamy.
8	Bramha sauvarny.	Phaulgoonam	Do. ...	15	Powrnimay.
9	Roodra sauvarny.	Ashaudham.	Krishnam	8	Ashtamy.
10	Dacsha sauvarny,	Caurteecam	Do. ...	8	Ashtamy.
11	Agny sauvarny ...	Shrauvanam.	Do. ...	30	Amavausyay
12	Soorya sauvarny.	Bhaudrapadam·	Do. ...	8	Ashtamy.
13	Rowchyan ...	Cheitram ...	Shooclam.	15	Powrnimay.
14	Bhowtyan ...	Jyeshtam ...	Do. ...	15	Powrnimay,

The name is most commonly met with now in connection with the Maunava dharma shastram [dharma shastram], which purports to have been uttered by the first Menoo, the son of Bramha [q.v.]. The compilation is an irregular compendium of rules and maxims by different authors, which existed unwritten for a long period of time, and were then handed down orally. The contents of the twelve books may be ranged under six principal heads:—Veda, sacred knowledge and religion; Vedauntam, philosophy in general; Auchauram, social duties; Vyavahauram, civil and criminal law; Prauyaschittam, penance;

Carmapalam.——*Mimaumsam* (मीमांसा - mímámsa, San.). See sep. title.——*Moony* (मुनि - muni, San.). See sep. title.

MANA (മന - mana, *Mal.*). House of Bramins and Numboories. Different names for houses in Malabar according to castes are the following:—Mana, numboodripaud; Illam, numboory; Covilagam, cottauram, rajah; Yillam, naudvauly; Coottaula, naudvauly; Veed, nayar; Pooshpacam, ambalavausy; Pishauram, ambalavausy; Vauryam, ambalavausy; Mutt, chaukyaur, puttar; Coody, chaulyar; Peedica, moplah; Poora, teeyan; Chaula, cherooman; Poora, blacksmith, goldsmith, silversmith, carpenter, brazier.——*Manay* (निवेशन - nivéshana, San.; ಮನೆ - mane, Can.; மனை - manai, Tam.). A house; house-site. So land measure equal to 2,400 coozhies, or square feet, or the 24th part of a cawny [q.v.]; the proper form is a parallelogram of 60 feet by 40 [ground]. Cf. Tel. ancanam. Manay chit is a title-deed; Manay vary is house-tax; Manay veed, from (vídu, tam. house) is a house and grounds; also building site [nuttam]. See vol. I, 609; II, 514.——*Munny* (మన్ని - manni, Tel.). Tel. form of manay [q.v.] and ground [q.v.].

MANAM (மணம் - manam, *Tam.*). Fragrance, marriage. ——*Manatakkauly* (மணத்தக்காளி - manattakkáli, Tam.). From (manam, tam. fragrance + takkáli, tam. physalis). Same as Indian hound's berry.——*Manavaula maumoony* (रम्यजामातृ मुनि - ramyajámátrimuni, San.; மணவாளமாமுனி - manaválamámuni, Tam.). From (manaválan, tam. marriage ruling man, hence husband or male person + má, tam. great + muni, san. sage). The opponent of Vedauntacharry at Conjeeveram and head of the Tengalays [q.v.] or conservative party among the Shreeveishnavas [q.v.], otherwise Ramaunoojeeyans. See vol. I (85).

MANAUKIB (مناقب - manákib, *Hind.*). From (nakaba, ar. to retail misfortunes). Hymns sung in the Moharram [q.v.].

MANCHAM (मञ्च - mañcha, *San.*). Platform; bedstead. ——*Machaun* (مچان - machán, Hind.). From (mañcha, san. platform). A scaffolding erected to watch for a tiger [pooly] to guard a field, &c.——*Manchua* (മഞ്ചി - mañchi, Mal.). From (mañcha, san. cot). Portuguese usage; also Munjy. A large cargo-boat, with a single mast and a square sail, used on the Malabar coast, from 10 to 40 tons [munjy].——*Manjeshwar* (ಮಂಜೇಶ್ವರ - manjéshvara, Can.; മഞ്ചിശ്വരം - mañchíshvaram, Mal.). From (above + íshvara, san. the lord). A Jeina [q.v.] deity. Village, Port, South canara dist., Cassergode tal.; pop. 2,608; lat. 12° 43′; long. 74° 56′; from Bombay S.S.E. 432 miles; from Cassergode N.N.W. 16 miles; from Coombla N.N.W. 7 miles; from Madras W. 360 miles; from Mangalore S. 12 miles; from Oolaul S.S.E. 9 miles. At mouth of a small stream on an inlet of Arbian sea. A large straggling town. The southern portion stands on a plain, and the northern on a steep bank that overhangs the river. These two portions were held by the petty Jeina [q.v.] bungar rajah and the Vittala rajah respectively, until Tippoo [q.v.] hanged the former and forced the latter to take refuge with the English at Tellicherry.——*Muncheel* (മഞ്ചൽ - mañchal, Mal.). From (mañcha, san. a bedstead). Hammock-litter on West coast, substitute for a palankeen [q.v.] or dhooly [q.v.]. Consists of a long and broad strip of canvas suspended at each end to a stout pole.——*Munjy* (മഞ്ചി - mañchi, Mal.). See sep. title.

MANCOOHA (منکوحه - mankúhah, *Hind.*) [nicka]. From (nikáh, ar. marriage). A woman married by the simple Nicka [q.v.] ritual. Takes a lower social place here than a wife married by Shaudy [q.v.] ceremony.

MANDEY (మందె - mande, *Tel.*). Title from teloogoo. Tel. from (mandu, tel. medicine). Tel. also (manchimande), meaning good medicine. Botanically Ceropegia bulbosa, roxb., asclepiadeæ [vricsham, 88]. Root tuberous, a little flattened like a turnip, with several fibres from its base; it is about as large as a small apple [seb]; stems twining, herbaceous, smooth, succulent; from 2 to 4 feet long; leaves opposite, short petioled, obovate with small point, entire, fleshy; size various; umbels lateral, length of the leaves, peduncled, few-flowered; flowers pretty large, erect, tube greenish, border purple; follicles two, slender, singly, about 3 or 4 inches long. Every part is eaten by natives, either raw or stewed in curries [q.v.]; the tubers when boiled lose their bitterness, and pulped with milk form a sweet mucilaginous mixture not unlike salep [q.v.], which is highly nutritious.

MAN EATER (வேங்கை - véngai, *Tam.*). Tam. from (vé, tam. to heat); impetuous animal. Old tiger or panther which has lost its teeth, or whose teeth are worn out, so that it takes human food by preference. See Pooly.

MANEY (منے - mane, *Hind.*). Highland.——*Maneysultan* (منے سلطان - manesultán, Hind.). Title of the Maharajah of Vizianagram. Also of Travancore rulers.

MANGALORE * (ಮಂಗಳೂರು - mangalúru, *Can.*; മംഗലാപുരം - mangalápuram, *Mal.*). From (mangalá, san. local deity + úru, can. village) [mungalam]. Sanscrit name (mangalápura), meaning same. Hind. name (kauriyálbandar). Greek νίτρα ἐμπό-ριον; also μαγγάνουρ in Ptolemy. Mandegora of Arrian.—— (1) Talook, South canara district. Tahsildar's pay Rs. 225. Area 620 square miles. Centre coast of district. Boundaries:— on the north, the Oodipy talook; on the south Cassergode talook; on the east, Ooppinangady talook and Mysore territory; on the west, Arabian sea. A hilly country intersected by rivers and streams. Soil mostly laterite [q.v.]. Principal industry is agriculture. Among minor industries are to be classed the manufacture of machine-made tiles [wode] and bricks [shengal], earthern-ware [chatty], coir [q.v.] and coir mats, brass [pittalay], tin [tagaram] and copper [taumram] vessels, weaving, printing, book-binding, coffee-curing, iron-casting. Imports consist of cloths, twist, salt, kerosine oil, oils, grains, dried fruits, porcelainware, hardware, spices, drugs, spirits, and wines. Exports coffee [q.v.] of Mysore and Coorg, rice [q.v.], other grains, arecanuts [q.v.], sandalwood, sandalwood [sandal] oil, jaggery [q.v.], cocoaunts [q.v.], pepper [q.v.], cardamoms [q.v.], sundry spices, &c. Irrigation mainly dependant upon rains, and in the dry season upon supplies of water drawn from rivers and streams and private wells and reservoirs. Camping grounds:—Buntwaul, Farangipett, Goorpore, Mangalore, Moodbidry, Moolky, Soortacull. Places of archæological interest:—Adyapaudy, Adyaur, Aladangady, Amataudy, Amoonajey, Balanja, Bangra cooloor, Baupanaud, Belma, Belvye, Bondamtilla, Cajeycaur, Cancanaudy, Cauntauvara, Caurandore, Caushiputna, Cauvala moodore, Cauvore, Chitraupoora, Conaja, Coodoopoo, Coonjatta byle, Cuddry, Goorpore, Haleynilla, Inna, Inoovully, Irveil, Kellapoottigay, Kempoonaja, Mangalore, Mauntraudy, Mogar, Moodbidry, Moodoo, Moondcoor, Moondore, Munchy, Naurauvy, Nellicaur, Nelliteerta, Niddody, Oolaul, Oolipaudy, Padoo, Padoocody, Padoo panambore, Panambore, Poottigey, Prauntya, Savanaul, Simantooroo, Someshwaram, Tirvyle, Woolaibett, Yeed, Yenoor. Principal trig. stations:—Anjaragoodda, Cunnore, Mangalore, Mijarra. The leading places, &c., in the talook are the following.——*Anjaragoodda* (ಅಂಜರಗುಡ್ಡ - anjaragudda, Can.). From (anjúra, can. fig, ficus carica, linn. + gudda, can. hill). Trig. station; lat. 13° 01′ 14·68″; long. 75° 04′ 17·08″.——*Ass' ears* (ಕೋಣಜಡಕಲ್ಲು - konajadakallu, Can.). See sep. title.——*Balmatta* (ಬಳ್ಮಠ - balmat'ha, Can.). See sep. title.——*Bolore* (ಬೋಳೂರು - bólúru, Can.). From (bólu, can. hollowness + úru, can. village). Village; pop. 1,256. In Mangalore town. On bank of Goorpore river. Battery constructed by Tippoo [q.v.] sultan [q.v.] of granite [caroomcull] rock.——*Buntwaul* (ಬಂಟ್ವಾಳ - bantvála, Can.). See sep. title——*Cuddry* (کدری - kadrí, Hind.; ಕದ್ರಿ - kadri, Can.). Sanscrit name (kadali), meaning plantain. Village; pop. 1,677; from Mangalore N.E. 2½ miles; from the sea E. 3 miles. Old temple of Shree munjoonanta and a Jogy [q.v.] mutt [q.v.]. Just above the temple are nine tanks for bathing.——*Cunnore* (ಕನ್ನೂರು - kannúru, Can.). Trig. station; lat. 12° 51′ 56·68″; long. 74° 56′ 11·08″.——*Farangipett* (فرنگی پیٹھ - farangípeth, Hind.). From (farangí, hind. european + péte, can. town); from the portuguese having settled here. A hamlet, being portions of Arcoola and Pooda villages; lat. 12° 52′; long. 74° 59′; from Mangalore E. 7 miles; from the sea E. 9 miles. On north bank of Netrauvaty; has a traveller's bungalow [q.v.], a military encamping ground, and an old church and convent built during Portuguese settlement.——*Goorpore* (ಗುರುಪುರ - gurupura, Can.). See sep. title.——*Jappoo* (ಜಪ್ಪು - jappu, Can.). A hamlet of Mogar cusbah [q.v.] village. A suburb of Mangalore on northern bank of Netrauvaty; tile and brick factories, a coffee-curing establishment and a large seminary newly built by Jesuit mission.——*Manail* (ಮನೇಲು - manélu, Can.). Sanscrit name (pulinapura), meaning river-bank + town. Village. On N.E. bank of Goorpore river. Temple called Rajah rajeshwary ammanavara devastauna.——*Mangalore* (ಮಂಗಳೂರು - mangalúru, Can.). See below——*Mijarra* (ಮಿಜಾರು - mijáru, Can.). Village; pop. 2,608; lat. 13° 01′; long. 74° 59′; height 694 feet; from Mangalore N.N.E. 13 miles; from the sea E. 11 miles. Gold found on a hill called Moondabett in neighbouring village of Yedapadavoo. Trig. station in lat. 13° 03′ 23·00″; long. 74° 58′ 39·98″; from Mijarra N. 3 miles; from Mangalore N.N.E. 14 miles; from the sea E. 10 miles.——*Moodbidry* (ಮೂಡಬಿದ್ರಿ - múdabidri, Can.). See sep. title.——*Moolky* (ಮೂಲ್ಕಿ - múlki, Can.). See sep. title.——*Moondcoor* (ಮುಂಡ್ಕೂರು - mundkúru, Can.). Village; pop. 2,179; lat. 13° 07′; long. 74° 55′; from Mangalore N. 26 miles; from the sea E. 10 miles. Temple.—— *Naurauvy* (ನಾರಾವಿ - nárávi, Can.). From (nára, can. water + ávi, can. vapour). Village; pop. 1,292; lat. 13° 08′; long. 75° 11′; from Mangalore N.E. 28 miles; from the sea E. 25 miles. Temple of Sooryanarrain, car festival in February.——*Netrauvaty* (ನೇತ್ರಾವತಿ - nétrávati, Can.). See sep. title.——*Nireshaulya* (ನಿರೇಶ್ವಾಲ್ಯ - nirashválya, Can.). From (nere, can. full + shalya, can. cloth). Village. Part of Mangalore; contains Collector's office.—— *Oolaul* (ಉಳ್ಳಾಲ - ullála, Can.). Village, Port; pop. 5,703; acres 3,840; lat. 12° 50′; long. 74° 53′; from Bombay S.S.E. 422 miles; from Mangalore S. 2 miles; from Manjeshwar N. 10 miles. On south bank of Netrauvaty river. A ferry connects

the south coast road with Mangalore. Former residence of a petty Jeina prince. Jeina [q.v.] basty [q.v.] of uncertain age. ——*Panambore* (ಪಣಂಬೂರು - panambúru, Can.). From (panambu, can. arrow + úru, can. village). Village; pop. 2,658; lat. 12° 56′; long. 74° 51′; from Mangalore N. 5 miles; from the sea E. 1 mile. Nundeeshwaran temple.——*Premeira* (ಮೂಲ್ಕಿಬಂಡೆ - múlkibande, Can.). See sep. title.——*Shumbavaty* (ಶಂಭವತಿ - shambhavati, Can.). See sep. title.——*Soortacull* (ಸುರತಕಲ್ಲು - surtakallu, Can.). From (surata, san. great enjoyment + kallu, can. rock). Village; pop. 2,770; lat. 13° 00′; long. 74° 50′; from Mangalore N.N.W. 9 miles; from the sea E. ½ mile. Camping ground. Temple on a high rock on sea-shore, car festival at end of December.——*Valalunkey* (ವಳಲಂಕೆ - valalanke, Can.). A sub-division of talook comprising seven villages; pop. 3,871.——*Yenoor* (ಯೇನೂರು - yénúru, Can.). See sep. title. ——(2) Sub-magistracy, South canara district. Pay Rs. 100. ——(3) Town, Cantonment, Head-quarters of Collector, Judge, Tahsildar, Deputy tahsildar, South canara dist., Mangalore tal.; pop. 40,922; lat. 12° 52′; long. 74° 53′; from Bombay S. 418 miles; from Coondapore S.S.E. 54 miles; from Goorpore S.W. 8 miles; from Madras W. 370 miles; from Moolky S.S.E. 16 miles; from Oodipy S.S.E. 38 miles; from Oolaul N. 2 miles; from Poottore W.N.W. 25 miles; from Seringapatam W. 130 miles; from Soobramanyam W.N.W. 53 miles. Light on a hill above the town, and near some high trees. Lat. 12° 52′; long. 74° 53′. White; fixed. 14 miles range. Visible from all directions seaward. Small white masonry tower. Guide to the anchorage. Town is on the backwater [cauyal] formed by the convergent mouths of Netrauvaty and Goorpore rivers. Connected with Mercara by a good road. Also with Mysore. Has water on three sides of it. Arabian dhonies [q.v.] and country craft enter harbour. Also steamers of light draught. The bar is impassable during monsoon [q.v.]. Boats of large size are carried as far as Buntwaul up the Netrauvaty. Mangalore is buried in groves of cocoanut [q.v.] trees. The monsoon sets in between May and June. The climate has a relaxing and debilitating effect. In 1547 Mangalore was desolated by the Portuguese. Being rebuilt in 1555, it was again destroyed by the same. It once more fell into the hands of the Portuguese, who destroyed every living being and burned the town. In 1567 finally occupied by the Portuguese, who built the fort St. sebastian and a church. In 1617 the Portuguese governor defeated the rajah of the small territory in the vicinity and compelled him to cede a portion of his possessions. In 1640 Mangalore was still in the hands of the Portuguese, but subsequently wrested from them by the Rajah of Bednore. Occupied by Hyder ally in 1763. All his and Tippoo's ships built here. Taken by the British, 1768; retaken by Hyder ally, 1768; a second time surrendered to the English, 1783; yielded to Tippoo sultan, 1783. In 1784 was concluded the treaty of Mangalore between the East india company and Tippoo sultan. In 1799 Mangalore became British territory. Since that time the only disturbance has been during the Coorg insurrection in 1837, when the rebels entered the town, burnt the cutcherry [q.v.], and then retired. The East india company held a monopoly from the rajah of the magazines here for sandalwood growing on the Mysore hills. Mangalore is at present garrisoned. The cantonment is north of the town on a level space, gently elevated, well-drained, and open to the sea breezes; and from these circumstances is healthy. The Mungala devy temple, which gives its name to the town, is an old one. There is a large native Roman catholic population with a European bishopric. Has two colleges, one maintained by Government, the other recently established by Jesuit mission. A few miles north is found a deposit of porcelain clay, closely resembling that of which Sevres ware is formed. Mangalore clears and exports all the coffee of Coorg and a great deal of that produced in the neighbouring plantations in Mysore, and trades directly with Arabia and the Persian gulf. The Basel lutheran mission has its head-quarters here. Good cloth is woven at their establishment; the making of roof-tiles, printing, and binding are also taught. Rice [q.v.] is the great article of export, more than three-fourths of the whole produce being sent to Muscat, Goa, Bombay, and Malabar. Betel-nut [q.v.], coffee [q.v.], black pepper [q.v.], sandal-wood [sandal], cassia [q.v.] and turmeric [country saffron] are also exported. Salt [ooppoo] is not manufactured but imported from Bombay and Goa. Raw silk [puttoo] for the use of the manufactures above the ghauts [q.v.], and sugar [q.v.] are imported from Bengal and China and oil and ghee [q.v.] from Surat. In Hyder's reign, the principal merchants were Moplahs and Concanies. Many men of property have however come since then from Surat, Cutch, Bombay and other places to the north. These persons are chiefly of the Veisya [q.v.] caste, but there are also some Parsees [q.v.], and the vessels employed in trade generally belong to other ports. Good water is only procurable in the dry season, and even then it is always more or less impregnated with iron [auhan] from the laterite [q.v.] through which it percolates. The small tanks in the neighbourhood are seldom dry, though in the hot weather the surface of the water becomes covered with slimy vegetable matter. Trig. station in lat. 12° 52′ 17·25″; long. 74° 53′ 10·48″; height; 196 feet; from Mangalore S. ½ mile; from the sea E. ¼ mile. The following are the travelling distances by road from Mangalore to different places:—

MANGANESE (منغنيس - manghanís, *Hind.*). From arabic Manganesium of chemists. For local distribution, see vol. II, 36. No native uses known.

MANGO (आम्र - ámra, *San.*; अंब - amba, *Mahr.*; आंबो - ámbó, *Conc.*; شجرة الانبج - shajaratulambaj, *Ar.*; درخت انبه - darakhtiambah, *Pers.*; انبک پیر - ámbkáper, *Hind.*; آم کا جهار - ámkájhár, *Dec.*; مم پالم - mampálam, *Malay*; ಮಾವು - mávu, *Can.*; ಕುಕ್ಕು - kukku, *Too.*; మామిడి - mámidi, *Tel.*; ଅମ୍ବ - ambó, *Oor.*; മാവ് - mávu, *Mal.*; අඹ - amba, *Singh.*; மா - má, *Tam.*). Title by portuguese from malay through tamul (mángáy), the fruit. San. from (am, san. to afflict with sickness); generates disease. Mahr. and conc. from sanscrit. Ar. from (shajar, ar. tree + ambaj, ar. mango). Pers. from (darakht, pers. tree + ambah, pers. mango). Hind. from (ámb, hind. mango + per, hind. tree). Dec. from (ám, hind. mango + jhár, dec. tree). Malay from tamul. Can. from tamul. Oor. from sanscrit. Mal. from tamul. Singh. from sanscrit. San. also (chúta), meaning trickling juice; (madhukara), meaning honey producing; (mákanda), meaning sweet mango tree; (bhringábhíshta), meaning liked by bees; (chakralatámra), meaning circular leaved mango; (kámánga), meaning cupid's limb; (kámáyudha), meaning cupid's weapon; (káméshta), meaning liked by cupid; (kámap'hala), meaning desire + fruit; (kámashara), meaning cupid's arrow [cauma baunam]; (kámavallab'há), meaning cupid's beloved; (kíréshta), meaning liked by parrots; (kókilánanda), meaning cuckoo's joy; (kókilávása), meaning cuckoo's abode; (kókilótsava), meaning cuckoo's feast; (mádhavadruma), meaning tree of spring; (madhudúta), meaning harbinger of spring; (nílakapitt'ha), meaning dark + wood-apple tree, feronia elephantum, corr.; (rasála), meaning juice-giver [hurrially, sugar cane]; (sahakára), meaning fragrant mango; (nripapriyá), meaning king's beloved. Pers. also (darakhtinaghzak). Malay also (ampálam); (pálam). Tel. also (mávi); (tiyyamámidi), meaning sweet + mango; (guddzumámidi), meaning juice + mango; (rátsamámidi), meaning king + mango; (elamávi), meaning delicate + mango. Oor. also (ám). Mal. also (múççi), meaning old. Tam. also (ottumá), meaning grafted mango; (kilimákkumá), meaning parrot + beak + mango [dil pasand]. Title otherwise Amba, Common mango, Cuckoo's joy, Cupid's favourite, Harbinger of spring, Spring tree. Botanically Mangifera [mango] indica, linn., anacardiaceæ [vricsham, 45]. Alias Mangifera amba, domestica, montana. Amba from mahratta.——(1) Tree, 40 feet; leaves alternate, lanceolate, acuminated, glabrous; calyx five-cleft; pétals five; panicles terminal, much branched, pubescent, erect; drupe obliquely-oblong or somewhat reniform; seed solitary; flowers

small, greenish-yellowish. Evergreen tree of a rounded form, with dense foliage; blossoms according to situation, from february to april; fruit ripens from may to july; grows very large in mcuntain forests up to 4,000 feet, generally in ravines and on banks of streams; most variable in the length and breadth of its leaves and form of its panicles. Its fruit is the apple [seb] of the tropics; this also differing in shape, size, color, and flavor; the most usual form is an oval, somewhat flattened, and with a kind of heel near the apex; of a yellow or yellow-and-red color when ripe; the inferior kinds are terebinthaceous in flavor; the fruit contains a large stone; the blue stain produced on a knife cutting the fruit results from presence of gallic acid in the pulp, which likewise contains citric acid and gum. Gum resin [googal] obtained from the bark with a hot and bitter taste and burns with a pleasant odour; only partially soluble in water; occurs in small and irregular masses, some of which consist of very small tears sticking to each other; this is generally reddish-yellow or reddish-brown in color, with a bland mucilaginous taste. Friar jordanus, the quilon bishop of the fourteenth century, has the following:—"there is another tree which has fruit like a plum [auloochah] "but a very big one, which is called amba; this is a fruit so "sweet and delicious as it is impossible to utter in words." Flower religious, and celebrated in poetry; with it one of the five arrows of cauman [q.v.] is tipped. The mango tree is best propagated by grafting, though it will readily grow from seeds; really good fruit is seldom found except on grafted trees; for cultivation garden soil is most suited; ground prepared by digging pits one cubic yard in contents and filling and manuring them; seed sown in jyeshtam or june in nursery; transplanted in caurteecam or november and margashiram [mausam] or december when plants are about 2 feet high; while under growth the plant is watered for the first month every alternate day, for the first year once a week and afterwards occasionally; gives fruit five to eight years after; fruits picked by a long stick with net attached or by climbing trees; unripe fruits buried in straw till ripe; the price varies from one fruit per one pie to one for two annas according to the quality. The kernel is medicinally astringent, demulcent, and nutrient; the gum, demulcent, and slightly stimulant; the pulp of the ordinary mango laxative, and that of the grafted variety very nutrient. The kernel should be removed from young or half-grown mangoes in their fresh state and cut into small pieces and dried in the sun immediately; in the case of ripe mangoes, the seed or kernel must also be separated from the shell as soon as possible, and if not already dry, it should be dried in the sun in the same manner. Compound powder; take of the kernel of young or half-grown mangoes, in powder, three ounces; cuminum cyminum, [jeerah], piper nigrum [black pepper], zingiber officinale [ginger], in powder, each one ounce and two drachms; the gum of mangifera indica, in powder, five drachms; opium [opium poppy], in powder, one drachm; mix them thoroughly, pass the powder through a fine sieve, rub lightly in a mortar. Doses; of simple powder, from forty to eighty grains; of compound powder, from ten to sixty grains; there is one grain of opium in every drachm of the compound powder. Substituted; the simple powder, for creta præparata and pulv. cretæ aromat., and compound powder, for pulv. ipecac. compositus, pulv. kino compositus, and pulv. cretæ aromat. cum opio. The kernels dried and powdered, are useful in expelling common round worm; the fruit acts as a diaphoretic and refrigerant; the resin [raul] mixed with lime-juice or oil is used externally in cutaneous affections; the resin mixed with white of egg and opium [aphainam], is a specific on malabar coast for diarrhœa and dysentery; the stalks, powdered and calcined, are used to take away warts; the bark is administered in infusion in menorrhagia and leucorrhœa; gives to pharm. the kernels, non-officinal, like santonin [absinth]. The cultivated fruit is one of the best in the world, that of the wild tree however is uneatable; mangoes when eaten in excess heat the blood and produce exanthematous affections. When fruit is green, the stone is extracted, and the fruit cut into halves or slices, and treated in following ways:—put into curries [q.v.]; made into pickle with salt [ooppoo], mustard [rayaun] oil, chillies [q.v.], and other ingredients; made into chutney [q.v.]; made into presrves and jellies by being boiled and cooked in syrup; boiled, strained, and with milk [paul] and sugar [q.v.] made into a custard known as mango phool; dried and made into the native ambchoor, used for adding acidity to certain curries. When fruit is ripe it is treated in following ways:—made into curry which has a sweet acid not unpleasant taste; cut into small pieces, and made into salad with vinegar [caudy] and chillies; the juice squeezed out, spread on plates and allowed to dry, and made to form the thin cakes known as ambsath. The flower also is edible. The leaves are tied up in a row in front of houses on festive days; cf. margosa leaves hung up for small-pox; natives use the leaves as tooth brushes; dry unripe fruit is largely used in dyeing with safflower [bastard saffron]; bark and leaf also yield a yellow dye [shauyam]; from wounds in the bark issues a soft reddish brown gum-resin [googal], hardening by age and much resembling bdellium [q.v.], burnt in the flame of a candle, it emits a smell like that of cashew [q.v.] nuts when roasting; oil from seeds [yennay]. The timber is soft, of a dull grey color, porous, soon decaying if exposed to wet, but useful for common purposes; in large old trees the wood acquires a light chocolate color towards the centre of the trunk and larger branches, and is then hard, close-grained and somewhat durable; the wood, burnt with sandal-wood [sandal], is used for burning corpses. There is a Tamul proverb:—பொங்கும் காலம் புளி பூக்கும், மங்கும் காலம் மா பூக்கும்—"In times of plenty the tamarind [q.v.] tree "blossoms, in times of scarcity the mango bears in abundance." There is a species sylvatica, called in sanscrit (kóshámra) or sheath mango; (ghanaskandha), meaning having heavy trunk; (jantupádapa), meaning insect tree, cf. cluster fig; (kshudrámra), meaning inferior mango tree; (raktámra), meaning red mango tree; (suraktaka), meaning very red; (vanámra), meaning wild mango.——**(2)** There are no recognized scientific varieties of Indica but the following different fruits are produced in this presidency.——*Ameer golah* (امير گولہ - amírgolah, Hind.). From (amír, ar. proper name + golah, hind. ball). Round and whitish yellow; insipid.——*Caula pahaur* (كالا پهاڑ - kálápahár, Hind.). From (kálá, hind. black + pahár, hind. mountain). Green; red inside, sweet.——*Cawder pasand* (قادرپسند - kádirpasand, Hind.). From (kádir, ar. proper name + pasand, pers. approved). Kidney-shaped; reddish yellow when ripe; fleshy and of milky flavor; largely eaten.——*Dil pasand* (دل پسند - dilpasand, Hind.). From (dil, pers. heart + pasand, pers. approved). Parrot-beak shaped larger than cawder pasand; yellow when ripe; sweet.——*Haufiz pasand* (حافظ پسند - háfizpasand, Hind.). From (háfiz, ar. proper name + pasand, pers. approved). Round and yellow; sweetish.——*Malghobah* (ملغوبا - malghobá, Hind.). From (marghúb, ar. lovely). Round; yellowish green; fleshy.——*Peter pasand* (پيتر پسند - pítarpasand, Hind.). From (petre, eng. judge + pasand, pers. approved). Similar to cawder pasand in size and color but slightly compressed; sweetish sour.——*Roommauny* (رومانی - rummání, Hind.). From (rummán, pers. pomegranate). Round and reddish; not luscious.——*Wallajah pasand* (والاجاه پسند - wálájáhpasand, Hind.). From (wálájáh, pers. wallajah + pasand, pers. approved). Round; greenish-yellow when ripe.——**(3)** *Mango bird* (हरित - harita, San.; पावशा - pávashá, Mahr.; پيلك - pílak, Hind. and Dec.; వంగపండు - vangapandu, Tel.; മാങ്ങാക്കിളി - mánnákkili, Mal.; மஞ்சக் கொழுப்பன் - mañjakkozhuppan, Tam.). Title from yellow colour. San. from (hari, san. yellowish green). Hind. from (pílá, hind. yellow). Tel. from (vanga, tel. brinjaul, solanum melongena, linn. + pandu, tel. fruit), from the color. Mal. from (mánna, mal. mango + kili, tam. bird). Tam. from (mañjal, tam. turmeric + kozhuppu, tam. fat). Indian oriole. Oriolinæ, brachypodidæ [boolbool], dentirostres, insessores, aves [pacshy, 22], of naturalists [jantoo].—"*a*" The most familiar is Oriolus kundoo. Alias Oriolus aureus, galbula, galbuloides. Feeds especially on figs of banyan [q.v.]. Call loud mellow whistle, resembling peeho.—"*b*" The black-naped indian oriole is Oriolus indicus; black horse-shoe mark extending from base of bill through eyes to nape.—"*c*" The southern black-headed oriole, called in teloogoo hill oriole, is Oriolus ceylonensis.——*Mango fish* (انبہ مچهی - ámbahmaçchí, Hind.). From colour. Title otherwise Tupsee. Same as Robaul.——*Mango ginger* (మామిడిఅల్లము - mámidiallamu, Tel.). From smell. See under Ginger.——*Mango shower* (மாசிமழை - másimazhai, Tam.). From (mási, tam. month so called + mazhai, tam. rain). Showers which fall in March and April, when the mangoes begin to ripen.——**(4)** *Bald mango* (బోడమామిడి - bodamámidi, Tel.). Same as Devil fig.——*Black beetle mango* (తుమ్మెదమామిడి - tummedamámidi, Tel.). Same as Marking nut.——*Christian's mango* (പാതിരിമാവ് - pátirimávu, Mal.). Same as Cashew.——*Eeshwara's mango* (ఈశ్వరమామిడి - íshvaramámidi, Tel.). Same as Yellow mangosteen.——*Female pot mango* (ఆడఅటికమామిడి - ádaatikamámidi, Tel.). Same as Tikry.——*Fibre mango* (నారమామిడి - náramámidi, Tel.). Same as Meidalukdy.——*Fig mango* (బొద్దమామిడి - boddamámidi, Tel.; நிகோடா - nigóḍá, Tam.). Title from shape of fruit. Tel. from (bodda, tel. fig, ficus glomerata, miq. + mámidi, tel. mango tree, mangifera indica, linn.). Tam. corruption from (ney, tam. ghee + kottai, tam. seed); ghee-seeded tree. Can. also (kaluyette). Tel. also (murumámidi), meaning beauty + mango tree, mangifera indica, linn.; (koravi), meaning firebrand; (égisa) [common vengay]; (kottaichettu). Tam. also (karadipungam). Title otherwise Four-leaved soap-nut, Nicotah. Botanically Hemigyrosa canescens, thw., sapindaceæ [vricsham, 43.]. Alias Cupania canescens; Molinæa canescens; Sapindus tetraphyllus. Tree; leaflets two pair, obovate or oblong, quite entire, glabrous; racemes simple or panicled, from the old leafless shoots; sepals roundish; petals four-fifth deficient, flat, the claw silky at the back; scale woolly in front, two-cleft, with a crested appendage at its back below the cleft; stamens eight, on one side, opposite from the disk; ovary ovate; style simple, elongated; stigma three-toothed; capsule ovoid, three-sided; flowers small, white; flowering in february and march. Resembles soap-nut [q.v.] tree, but differs in its irregular flowers and unilateral disk and in its inflorescence being lateral instead of terminal. Wood of average quality, white, does not bear exposure.——*Forest mango* (காட்டுமா - káttumá, Tam.).

Chironjee and Odallam.——*Gummy mango* (ஷிகிடிமா - shigidimá, Tam.). Same as Cashew.——*Hill mango* (కొండమామిడి - kondamámidi, Tel.; மலைமா - malaimá, Tam.). Same as Hill kiloovay.——*Journey mango* (سفریام - safaríám, Hind.). Otherwise (supáríám), by corr. meaning areca mango. Same as Guava.——*Juicy mango* (చారుమామిడి - chárumámidi, Tel.). Same as Chironjee.——*Jungle mango* (காட்டுமா - káttumá, Tam.). Same as Odallam.——*Papaw mango* (പപ്പായംപഴം - pappáyampázham, Mal.). Title from yellow pulp of fruit. Same as Papaw.——*Portuguese mango* (പോർതുകിമാവു - pórtukimávu, Mal.). Same as Cashew.——*Pot mango* (అతికమామిడి - atikamámidi, Tel.). From being cooked as potherb. Same as Tikry.——*Red mango* (कोकंबि - kókambi, Mahr.). Same as Mate mangosteen.——*Saffron mango* (ஆவிமா - ávimá, Tam.). Same as Coomby.——*Ship mango* (കപ്പൽമാവു - kappalmávu, Mal.). Title from being a foreign tree. Same as Cashew.——*Stone mango* (ಕಲ್ಲುಮಾವು - kallumávu, Can.). From hard wood and shape of leaf. Same as Alanjy.——*Wild mango* (आम्रातक - ámrátaka, San.; अंबाडा - ambádá, Mahr.; आंबाडो - ámbádó, Conc.; درخت مریم - darakhtimaryam, Ar.; درخت مریم - darakhtimaryam, Pers.; امرا - amrá, Hind.; مریم کا جھاڑ - maryamkájhár, Dec.; ಅಮಟೆ - amate, Can.; అడవిమామిడి - adavimámidi, Tel.; അമ്പഴം - ampázham, Mal.; අඹරැල්ල - ambaralla, Singh.; காட்டுமா - káttumá, Tam.). San. from (ámra, san. mangifera indica, linn. + at, san. to go), resembling mango. Mahr. and conc. from sanscrit. Ar. from (darakht, ar. tree + maryam, ar. mary). Pers. from arabic. Hind. from sanscrit. Dec. from (maryam, ar. mary + jhár, hind. tree). Tel. from (adavi, tel. forest + mámidi, tel. mango, mangifera indica, linn.). Mal. from sanscrit. Tam. from (kádu, tam. forest + má, tam. mango, mangifera indica, linn.). San. also (pítana), meaning making yellow; (kapítana), meaning gladdening monkeys with fruits; (kánanámra), meaning wild mango; (adhvagabhógya), meaning traveller's comfort, cf. journey mango; (pittavriksha), meaning bile tree, from being used in bilious dyspepsia. Mahr. also (ránaámba), meaning wild mango. Hind. also (ambodhá); (ranámb), meaning wild mango tree. Dec. also (janglíámkájhár), meaning wild mango tree. Can. also (ambate); (pullile); (pundi). Tel. also (ivurumámidi), meaning tender leaf + mango tree, mangifera indica, linn. [yellow mangosteen]; (ambálamu); (pítavrikshamu); (sítavrikshamu). Mal. also (káttampázham), meaning wild + the tree. Tam. also (marimá), meaning devil + mango, mangifera indica, linn. [chironjee]; (pullile), of kaders. Title otherwise Bile tree, Greens mango, Hog-plum, Traveller's delight, Yellow mango. Botanically Spondias [amrautam] mangifera, willd., anacardiaceæ [vricsham, 45]. Alias Baldingera glandulosa; Evia amara; Mangas paniculata; Mangifera pinnata; Poupartia mangifera; Spondias amara. Large tree; calyx small, five-cleft; petals five, spreading; leaves alternate, unequally pinnated; leaflets four to five pairs, ovate or elliptic-oblong, oblique at the base, entire, glabrous; panicles axillary and terminal, diffuse; drupe fleshy, oval, yellow; nut oblong, woody, outwardly fibrous, five-celled, very hard; flowers small, white. Deciduous tree, wild and cultivated; leaves are agreeably acid; fruit, when largest, is of the size of a goose's egg, of a rich olive green, mottled with yellow and black, with but a trifling degree of scent, and none of the quince-like [bedauna] odour of the other species of the genus. When very large and old the tree throws out occasionally a large quantity of gum mixed with a resinous substance through an old wound or crack; the gum [gond] and resin [raul] collect on the ground in the form of a thick, flat, oblong or irregular mass; in addition to the above occasional flow, a small quantity is often found on the stem, generally in small and transparent tears; this latter is quite soluble in water and resembles the indian gum-arabic in many other characters. The young fruit is medicinally stomachic and tonic, and the gum demulcent and emollient. Preparation is simple powder; select the young fruits before their nut is hard and fully developed, remove the nut, cut the fleshy portion into small pieces and dry them in the sun, when quite dry reduce them to a fine powder in the usual manner. Dose; from thirty grains to one drachm or more, three or four times in the 24 hours. Substituted; the young fruit for gentian [chiretta] and calumba [q.v.], and the gum for indian gum-arabic [q.v.]. Pulp of fruit is astringent; bark is a refrigerant; juice of leaves applied to ear-ache. The inner part of fruit nearest the rind is rather acid, but that being removed, the part nearest the stone is sweet and eatable; leaves used in chutneys [q.v.]. Wood soft, light-gray.——*Yellow mango* (पीतन - pítana, San.). Same as Wild mango.

MANGOSTEEN (منگستان - mangústán, *Hind.* and *Dec.*; منگستا - manggusta, *Malay*; ശൂലമ്പുളി - shúlampuli, *Mal.*; சூலம்புளி - shúlambuli, *Tam.*). Title from malay; no connection with mango. Hind. and dec. from malay. Mal. from tamul. Tam. from (shúla, san. trident + puli, tam. tamarind tree, tamarindus indica, linn.). Malay also (manggis). Title otherwise Common mangosteen. Botanically Garcinia [ractaumram] mangostana, linn., guttiferæ [vricsham, 22]. Specific name from malay. Branches many, decussate; leaves 6–10 by $2\frac{1}{2}$–$4\frac{1}{2}$ inches, very coriaceous; nerves regular, close, in arching with the intermarginal one; male flower in three to nine-flowered terminal fascicles; pedicels short; sepals orbicular, concave, persistent; petals broad, ovate, fleshy; stamens indefinite; hermaphrodite flower 2 inches diameter, solitary or geminate at the tips of the young branches; pedicels $\frac{1}{2}$ inch, thick, woody; sepals and petals as in the male; stamens many, filaments slender, connate below; ovary four to eight-celled; stigma sessile, eight-rayed; ovules solitary; berry as large as an orange, smooth, dark, purple; pericarp firm, spongy; seeds large, flattened; aril very fleshy, white, juicy. A small, conical tree, 20 to 30 feet, evergreen, with leathery leaves; the flowers are followed by fruit as large as an orange [q.v.], which is smooth, dark purple, with a firm covering having a spongy layer, and containing large flattened seed having a white fleshy and juicy growth from the seed stalk which is the part eaten; native of molucca. Gives to pharm. fleshy pericarp of the fruit, non-officinal, for diarrhœa and dysentery; fruit to eat is between a strawberry and a grape [angoor]; to taste the fruit in perfection it must be eaten as it is gathered from the tree; gum [gond] from rind and bark; flower gives a dye [shauyam].——*False mangosteen* (جھوٹا منگستان - jhútámangústán, Hind.). Same as Malay red wood.——*Mate mangosteen* (भिरंड - bhiranda, Mahr.; बीरुंड - bírunda, Conc.; کوکم - kúkam, Hind. and Dec.; ಮುರುಗಿನಹುಳಿ - murginahuli, Can.; ಪುನರಪುಳಿ - punarapuli, Too.; പുനമ്പുളി - punampuli, Mal.). Title means cook-room mangosteen; ship term. Hind. and dec. from (kókambi, mahr. red mango). Can. from (murige, can. twisted + huli, can. tamarind, tamarindus indica, linn.). Mal. from (pinar, mal. stiff + puli, mal. tamarind). Mahr. also (rátambi), meaning red mango, mangifera indica, linn.; (kókambi), meaning red mango; (támbadaámbá), meaning red mango. Can. also (murghulimara). Mal. also (pinampuli), stiff tamarind. Title otherwise Brindones, Cokum butter tree, Moorgana tallow tree, Red mango. Botanically Garcinia [ractaumram] indica, chois., guttiferæ [vricsham, 22]. Alias Brindonia indica; Garcinia celebica, purpurea; Stalagmites cowa. Brindonia from concany. Small tree of upright, conical habit; drooping branches; leaves lanceolar, obtuse, of a bright coppery color while young, and dark green smooth and leathery when mature; native of west coast; flowers are inconspicuous, and are followed by globular purple fruit the size of a small orange [q.v.], containing several large seeds, from which a concrete oil is obtained by crushing and boiling the seed in water; this oil, or cokum butter [q.v.], preserves its solidity to 98° fahr. [yennay]. Cokum butter is found in bazaars [q.v.] in the form of egg-shaped or oblong lumps about 4 inches long by 2 inches in diameter, and weighing about a quarter of a pound; it is a whitish substance, at ordinary temperatures, firm, dry, and friable, yet greasy to the touch; when long kept it acquires an unpleasant rancid smell and brownish hue, and an efflorescence of shining tufted crystals appears on the surface of the mass. The butter and dried fruit are medicinally demulcent, nutrient and emollient; used in substance with or without sugar. Doses; as a nutrient or remedy for phthisis pulmonalis and scrofulous diseases, from half to one ounce, or more; as remedy or adjuvant to other medicines in dysentery and mucous diarrhœa, from one to two drachms. Substituted for cod-liver and fish oils, cetaceum and wax. Gives to pharm. cokum butter, garciniæ purpureæ oleum, used in preparation of ointments, suppositories, and for other pharmaceutical purposes, local application to ulcerations, fissures of the lips, hands, &c., officinal; in canara cokum used medicinally as cure for cattle wounded by tigers [pooly]. Fruit, agreeable acid flavor; syrup made from it; cokum [q.v.] used to adulterate ghee [q.v.]; workers in iron [auhan] use the acid juice as a mordant [cauram].——*Wild mangosteen* (جنگلی منگستان - janglímangustán, Hind.). Same as Gaub.——*Yellow mangosteen* (तमाल - tamála, San.; دمپل - dampal, Hind. and Dec.; ಹಿರೇಕನಿಗಿನಮರ - hirekaniginamara, Can.; చికటిమాను - chíkatimánu, Tel.; സമുദ്രപ്പച്ച - samudrappaçça, Mal.; ගොරක - goraka, Singh.; தமாலம் - tamálam, Tam.). Title from color of fruit. San. from (tamas, san. dark), from dark leaves and bark [cassia cinnamom, ceylon gamboge, karanj]. Hind. and dec. from sanscrit. Can. from (hiri, can. superior + kaniginamara, can. nerium odorum, sol.). Tel. from (chíkati, tel. darkness + mánu, tel. tree) [nauga champak]. Mal. from (samudra, san. sea + paçça, mal. green). Tam. from sanscrit. San. also (kálaskandha), meaning having black trunk; (tápiñchha), meaning allaying one oppressed by heat. Tel. also (ivurumámidi), meaning tender shoot + mango tree, mangifera indica, linn. [wild mango]; (íshvaramámidi), meaning god + mango tree; fruit is like a mango. Tam. also (malaippuli), meaning mountain tamarind tree, tamarindus indica, linn.; (kulavi); (malaippaççai), meaning mountain + greenness. Title otherwise Cheeksty, Eeshwara's mango, Hill green, Hill tamarind, Painter's xanthochymus. Botanically Garcinia [ractaumram] xanthochymus, hook. f., guttiferæ [vricsham, 22]. Alias Stalagmites pictorius; Xanthochymus tinctorius, pictorius. Tree, 40 feet; leaves linear-lanceolate, shining; calyx of five unequal sepals; petals five, deciduous, alternating with the sepals; flowers lateral, fascicled, all bisexual; ovary five-celled; fruit ovate pointed, yellow, one to four-seeded; flowers small, white. Fruit like a mango [q.v.], but flatter; the seeds or stones like jack [q.v.] stones. Fruit eaten by natives. Yields an indifferent gamboge [q.v.].

MANGROVE (منگی منگی - mangimangi, *Malay*). Title is corruption. Applied to the genera Rhizophora and Avicennia, shrubs or small trees growing on low coasts. Extended to Bruguiera, Carallia, Kandelia, Lumnitzera, Manihot. The barks are generally a valuable tan [chamrah].——*Candel mangrove* (ରସୁରିଆ - rasuriya, Oor.; ചെറുകണ്ടൽ - cherukantal, Mal.; கண்டல் - kandal, Tam.). Title from tamul. Mal. from (cheru, mal. small + kantal, mal. bulb-like). Tam. means bulb-like. Mal. also (kantal), meaning bulb-like. Tam. also (púkkandal), meaning flower + candel tree. Title otherwise Candel [q.v.]. Botanically Kandelia rheedii, w. & a., rhizophoreæ [vricsham, 54]. Generic from malayalam. Alias Rhizophora candel. Shrub; leaves quite entire, linear-oblong, obtuse, two to three chotomous, four to nine-flowered; inflorescence axillary; calyx tube campanulate, segments linear, persistent; petals as many as the segments of the calyx, membranaceous, cleft to below the middle into numerous capillary segments; fruit oblong, longer than the tube of the calyx; germinating embryo subulate-clavate, acute; flowers largish, white and green; s. canara and malabar tidal backwaters. Bark mixed with dried ginger [q.v.] or long pepper [q.v.] and rose-water [goolaub, panneer] is cure for diabetes. Bark used for tanning [chamrah]; gives a dye [shauyam]. Wood soft, close-grained; used for fire-wood.——*Caurally mangrove* (फणसी - p'hanasí, Mahr.; ಅಂಡಿಪುನಾರುಮರ - andipunárumara, Can.; ಅಂಡಿಪುನಾರ್ - andipunár, Too.; [illegible] - káralli, Tel.; വങ്കണ - vankana, Mal.; [illegible] - davata, Singh.). Title from teloogoo; distinguish from cauralłam [q.v.]. Mahr. from (p'hanasa, mahr. artocarpus integrifolia, willd.), from resemblance. Can. from (anda, can. handsome + punáru, can. the tree, so called). Tel. from (káru, tel. forest + alli, tel. memecylon edule, rox., var. capitellata). Mal. from (van, mal. large + kana, mal. knot). Can. also (punselu). Tel. also (káravalli), meaning forest + memecylon edule, rox., var. capitellata. Title otherwise Davata, Wild cassa. Botanically Carallia integerrima, dec., rhizophoreæ [vricsham, 54]. Generic from teloogoo. Alias Carallia corymbosa, lucida, octopetala, sinensis, timorensis, zeylanica; Marallia zeylanica; Pootia cereopsifolia. Tree; leaves oval, acuminated, finely serrated; petals six to seven, roundish, entire, waved on the margin, much larger than the segments of the calyx; stigma concave, three-lobed; peduncles short, axillary, bifid; flowers small, greenish-white; flowering in the hot season; it is only the younger trees that have the leaves serrated; in old ones they are perfectly entire and vary in shape and size. Timber is ornamental reddish, used in s. canara for furniture and cabinet purposes, it is tough and not easily worked, has a wavy appearance, is peculiar in structure, having a great deal of cellular tissue. Another species is lancæfolia; bark giving dye [shauyam].——*China mangrove* (ചീനക്കണ്ടൽ - chínakkantal, Mal.). Same as Malda dye.——*Madagascar mangrove* (مدغاسکر منگی منگی - madagháskarmangimangi, Hind.; കടക്കണ്ടൽ - katakkantal, Mal.; [illegible] - bériya, Singh.). Mal. from (katal, mal. sea + kantal, mal. kandelia rheedii, w. and a.). Mal. also (karakkantal), meaning shore + the plant. Title otherwise Cadal candel. Botanically Lumnitzera racemosa, willd., combretaceæ [vricsham, 55]. Alias Bruguiera madagascariensis; Jussieua racemosa; Petaloma alternifolia; Pyrrhanthus albus. Shrub; calyx five-cleft; segments rounded; petals five, acute, inserted on the calyx and longer than it; leaves alternate, cuneate obovate, alternated at the base into a short petiole, glabrous, thick and somewhat fleshy; spikes axillary, five stamens longer than the other alternating ones, and about the length of the petals; drupe clove-shaped, ovate-oblong, bluntly angled, crowned with the calyx; nut linear-oblong, angled one-seeded; flowers small white; found in salt marshes on the coast; wood remarkably strong and durable.——*Ooppata mangrove* (तिवर - tivara, Mahr.; మడ - mada, Tel.; ഉപ്പുകുറ്റി - uppukutti, Mal.; உப்புக்குட்டி - uppukutti, Tam.). Title from malayalam. Mal. from (uppu, mal. salt + kutti, mal. stump); from growing near salt-water. Tam. from malayalam. Tel. also (nallamada), meaning black + the tree. Mal. also (uppútti), by corruption. Title otherwise Common indian mangrove, Downy-leaved avicennia, New zealand mangrove, Nulla mada, White mángrove. Botanically Avicennia officinalis, linn., verbenaceæ [vricsham, 102]. Alias Avicennia alba, resinifera, tomentosa; Mangium album; Oepata; Secura marina. Oepata is malayalam. Small tree; leaves opposite, obovate or oval, slightly tomentose beneath; flowers terminal, small, dingy yellow; seeds germinate in the fruit, while still hanging on the tree and produce a root, 3 or 4 feet long, which ultimately falls into the mud and forms a new centre; grows on lagoons [cauyal] and tidal rivers; the plant sends up, in a wide radius all round its stem, a dense crop of shoots from 1½ to 2 feet high; these catch mud and débris of plants, and thus gradually form a sort of peninsula which protects the land from erosion by the water; plant contains a juice which is very tenacious. The bark contains a red coloring matter striking a greenish color with ferric chloride, but giving no precipitate with gelatine; the coloring matter is precipitated by acids [poolipp, tezaub] and redissolved by alkalies [cauram]; the ash of the air-dried bark amounts to 11·4 per cent., and is deliquescent. Roots aphrodisiac; unripe seeds are used as poultice to hasten suppuration of boils. Kernels bitter but edible. Bark used for tanning [chamrah]; a preparation is made from ashes of wood which dhobies [q.v.] use for cleaning cotton cloths and painters use with colors to make them adhere; juice used for sealing letters. Wood grey, with a darker heartwood, hard, heavy, consisting of numerous, narrow, well marked, concentric layers; very brittle; used for fire-wood.——*Tree mangrove* (കണ്ടൽ - kantal, Mal.). Mal. from (kanta, mal. bulbous root). Botanically Bruguiera gymnorhiza, lamk., rhizophoreæ [vricsham, 54]. Alias Bruguiera australis, rheedii, rumphii, wightii; Rhizophora gymnorhiza. Tree; leaves ovate-oblong, acuminated at both ends; calyx about twelve-cleft; segments linear, acuminated, triquetrous towards the point; petals two-lobed, with about five short bristles; ovary three to four-celled; germinating embryo somewhat cylindric, tapering towards each end; flowers largish, red; peduncles one-flowered, solitary, drooping; common on the sea-coast; flowering in the hot season. Bark gives a dye [shauyam] and used in tanning [chamrah]. Wood yellowish hard and durable, used for house-building and for fuel. Other species are:—caryophylloides, eriopetala, parviflora.——*White candel mangrove* (منگی منگی - manggimanggi, Malay; అడవిపొన్న - adaviponna, Tel.; വെങ്കണ്ടൽ - venkantal, Mal.; [illegible] - kadol, Singh.; கண்டல் - kandal, Tam.). Title from flowers. Tel. from (adavi, tel. forest + ponna, tel. calophyllum inophyllum, linn.). Mal. from (ven, mal. white + kantal, mal. kandelia rheedii, w. & a.). Malay also (kayuapiapi), meaning fire-fly tree. Tel. also (uppuponna), meaning salt + calophyllum inophyllum, linn. Tam. also (péykkandal), meaning devil + kandelia rheedii, w. & a. Title otherwise Candelaria mangrove, Demon candel, Kunro bark tree, Mangle. Botanically Rhizophora mucronata, lamk., rhizophoreæ [vricsham, 54.]. Alias Rhizophora candelaria, mangle. Candaleria from malayalam. Small tree; leaves oval, long-cuspidate; segments of the calyx triangular-ovate; peduncles three to six-flowered; germinating embryo subulate-clavate, acute; flowers largish, white, fragrant; flowering in hot season; abounds in tidal backwaters [cauyal]; has aerial roots, which descend into the mud and raise the stem of the plant upwards. Fruit is sweet and edible, and juice when fermented forms a light wine; salt extracted from aerial roots. Bark used for tanning [chamrah]; has been exported to europe; leaf gives a dye [shauyam]. Wood dark reddish, hard and durable. Another species is conjugata.——*White mangrove* (ഉപ്പുകുറ്റി - uppukutti, Mal.). Title from color of wood. Same as Ooppata mangrove.

MANILLA (மணிலா - manilá, *Tam.*). The chief town in the Philippine islands and head-quarters of Spanish government in the East.——*Manilla cauray* (മണിലക്കാര - manilakkára, Mal.). Same as Edible paulay.——*Manilla hemp* (منلا کا نار - manillakánár, Hind.). Same as Demon plantain.——*Manilla lime* (منلا کا لیمو - manillakálímú, Hind.). Same as Musk lime.——*Manilla nut* (மணிலாக்கொட்டை - manilákkottai, Tam.). Title from original habitat. Same as Groundnut.——*Manilla tamarind* (خرنوب - kharnúb, Ar.). Title otherwise Algaroba [carob], Aloja, Cashew [q.v.] tree, Paray of peru. Botanically Prosopis [shivah] dulcis, kunth., leguminosæ. By spaniards introduced to philippine islands, and thence here; sweetish, succulent pods, 20 to 24 inches long, enclosing black seeds embedded in white pulp; pods used for feeding cattle; planted along railway lines. Manilla tamarind. Term is also applied to Corcapilly [q.v.].

MANJILEE (منزلی - manzilí, *Hind.*). From (manzil, ar. a journey). A litter at Goa [majil].

MANKENA (बन्धूक - bandhúka, *San.*; तांबडीदुपारी - támbadídupárí, *Mahr.*; دو پہریا - dopahariyá, *Hind.*; మంకెన - mankena, *Tel.*; നാഗപ്പൂ - nágappú, *Mal.*). Title from teloogoo. San. from (bandh, san. to bind), attracting on account of its beauty [jungle geranium]. Mahr. from (támbadá, mahr. red + dupárí, mahr. the plant). Hind. from (do, hind. two + pahar, hind. measure of time); or noontide; from time of flowering. Tel. from (manku, tel. obstinate), from obstinate growth [jungle geranium]. Mal. from (nága, san. serpent + pú, mal. flower). San. also (bandhujívaka), meaning living in group; (raktaka), meaning red, on account of crimson flowers [jungle geranium]; (arkavallabhá), meaning beloved of the sun; (pushparakta), meaning red-flowered. Mahr. also (dupárí), from hindostany. Title otherwise Bandhoocam, Doopaury, Scarlet-flowered plant, St. helena red wood. Botanically Pentapetes phœnicea, linn., sterculiaceæ [vricsham, 26]. Alias Dombeya phœnicea; Pentapetes angustifolia. Annual; leaves linear-lanceolate, hastate, serrated; peduncles one to two-flowered, axillary, drooping, red; flowering in the rainy season. Has an erect stem about two feet high, common weed of rice-fields, bearing spike of middle-sized flowers, deep carmine color; also a white variety.

MANNA (من - mann, *Ar.*; شیرخشت - shírkhisht, *Pers.* and *Hind.*; ಮನ್ನಾ - manná, *Can.*; మంన - manna, *Too.*; మేనా - méná, *Tel.*; மன்னா - manná, *Tam.*). Title from arabic through hebrew, meaning to bestow. Pers. from (shír, pers. juice + khushk, pers. dry). Pers. also (turanjabin), meaning persian

manna; (gazangabín), meaning tamarisk. Saccharine exudation obtained from several plants naturally, and from others on the bark or epidermis being incised. Eaten in its natural condition, or prepared into paste, mixed with other ingredients and made into sweetmeats [halwah]. Purgative, given to children and delicate women.——*Alhagi manna* (شیرخشت الحاج - shírkhish-tulháj, Hind.). Same as Arabian manna.——*Arabian manna* (شیرخشت - shírkhist, Hind.). See sep. title.——*Australian manna* (شیرخشت فرنگ - shírkhishtifarang, Hind.). From Eucalyptus manifera, moudic.——*Khorassan manna* (شیرخشت خراسانی - shírkhishtikhurásání, Hind.). From olive [zeitoon]. *Oak manna* (شیرخشت زیتون - shírkhishtizaítún, Hind.). Product of two species of quercus [belote], vallonea and persica. These trees are visited by immense number of a small white coccus, from puncture of which a saccharine fluid exudes and solidifies in small grains.——*Persian manna* (ترنجبین - taranjabín, Hind.). Same as Arabian manna.——*Sicilian manna* (شیرخشت - shír-khisht, Hind.). Title from place of growth. Title otherwise Calabrian manna, Flowering ash, Manna ash. Botanically Fraxinus ornus, linn., oleaceæ [vricsham, 85]. Alias Ornus europæa. Inhabitant of Sicily. A manna from this appears in tears, length of a finger, uneven, wrinkled, brittle, resembling stalactites, light, porous, and pulverizable, white, with traces of bark on one side; is devoid of odour, of sweet, mild, and rather heavy taste, dissolves entirely in the mouth; it is a concrete saccharine exudation from the stem obtained by incisions; a mild purgative in pharm.——*Tamarind manna* (شیرخشت تمرهندی - shírkhishtitamarihindí, Hind.). Product of Tamarind.——*Tamarisk manna* (گزانگبین - gazangabín, Hind.). Product of Tamarix gallica [manna jhow], arabian manna.——*Turkish manna* (عسل اللبنان - asalullibanan, Hind.). From (asal, ar. honey + libanan, ar. lebanon). Product of Pistacia lentiscus [mastic], manna of lebanon.——*Yercum manna* (سکرالعشر - sakkarulushr, Hind.). From (sakkar, hind. sugar + ushr, ar. calotropis). Product of Calotropis procera [yercum].

MANOO (ಮನವಿ - manavi, *Tel.*; மனு - manu, *Tam.*). A request, petition [arzee, durkhast].

MANSAB (منصب - mansab, *Hind.*). From (nasaba, ar. to fix). Dignity. A military title conferred by the Moghul [q.v.]. Government of Delhi, and regulated by the supposed number of horse [ghorah] the holder of the title could if required bring into the field. Jagheers [q.v.] were assigned for the maintenance of this force. In many cases the title was nominal, and often it was assumed without warrant. Title is still current in Nizam's dominions.

MANSOOR (منصور - mansúr, *Ar.*). From (nasara, ar. to conquer). Victorious. Name of a great Mahomedan saint. Taken as alam; as Mansoor ally, double alam; Mansoor beg, alam + alaumat [ism].——*Mansoorcottah* (మనసూరుకోట - manu-súrukóta, Tel.). From (mansúr, ar. maho. proper name + kóta, san. fort). Village, Port; Ganjam dist., Berhampore tal.; pop. 250; acres 982; lat. 19° 17′; long. 84° 57′; from Berhampore E. 8 miles; from Chetterpore W.S.W. 7 miles; from Ganjam W.S.W 12 miles; from Gopalpore N. 2 miles; from Madras N.N.E. 520 miles. Under Mahomedan rule an administrative centre. Aska sugar [q.v.] is exported largely [gopalpore].

MANTIK (منطق - mantik, *Hind.*). From (nataka, ar. to speak). Logic [ilm].

MANUEL COTTAH (മനുവൽകോട്ട - manuyalkótta, *Mal.*). Means fort of manuel, king of portugal. Otherwise Cotchy cottah. Also called Fort manuel. Portuguese fort built at Cochin in 1503. Francisco de albuquerque superintended its construction. The first European fort in India [cochin].

MANY (मणि - mani, *San.*; மணி - mani, *Tam.*). Beauty, gem [ratnam] or pearl [moty]. A bead; corn grain. Blackness. A bell or gong [ghantay]; the hour of the day, maninairam being european hour. Also a golden bell presented for distinction by kings; hence royal insignia, a badge of honor, office or authority. Also applied to poison stone [bezoar]. Suffix in proper names as Devashikhaumany, Naugamany. Proper name common to both sexes. Also familiar contraction of Soobramanyan [peyar].——*Manimooctah* (மணிமுத்தா - manimuttá, Tam. manimukta*). From (mani, san. crystal + muktá, san. pearl). River; South arcot dist., Cullacoorchy and Vriddhauchellam talooks. Tributary of Vellaur. Rises in Cullroyen hills and flows through Cullacoorchy and Vriddhauchellam into Vellaur, 12 miles west of Bhoovangherry. Several anicuts [q.v.]. Of equal sanctity with Ganges at Benares, and its junction with the Gomookhanuddy is known as Prayaugay, a name also given to Allahabad.——*Manipooram* (मणिपुर - manipura, San.). From (mani, san. gem + pura, san. city). Name occurring in the Mahabhaurat [q.v.]. Also ancient city, Mysore district, Mysore, three miles south-east of Chaumrajnugger.——*Maniyam* (ಮಣಿಯ - maniya, Can.; മണിയം - maniyam, Mal.; மணியம் - maniyam, Tam.). Bearing royal insignia. Applied to office of superintendence in a palace or temple and in modern times in a village. An office of this name existed once for clearing the way for persons of distinction. Management of affairs. A subordinate revenue-officer; as well as the holder of the office of monigar [q.v.].——*Maniyauchy* (மணியாச்சி - maniyâççi, Tam. maniyáchi *). From (mani, tam. corn-grain + ádchi, tam. possession). Zemindarry, Village, Railway station; Tinnevelly dist., Ottapidauram tal.; pop. of village 1,396; acres 8,587; lat. of village 8° 52′; long. 77° 56′; height 206 feet; from Ottapidauram W.S.W. 9 miles; from Tinnevelly E.N.E. 17 miles; from the sea W. 18 miles. It is the junction station between Tinnevelly, Madura and Tuticorin. Peshcush Rs. 1,808.——*Maunicam* (మాణిక్యము - mánikyamu, Tel.; மாணிக்கம் - mánikkam, Tam.). Means ruby. Hindoo 2nd or pers. name. Common among non-bramins applied to both sexes; also taken by Native christians [peyar].——*Maunica vauchacan* (மாணிக்க வாசகன் - mánikkavásagan, Tam.). From (mánikya, san. ruby + váchaka, san. speaker). Sheiva devotee and poet. Minister of Arimardana paundyan, a very early king of Madura. Bramin caste. When sent to buy horses [ghorah] for the king, spent the money in founding Sheiva temple at Tirperoondoray, and was put into prison. At this moment a great flood occurred in the Veigay and the king, considering it a retribution by Shiva released Maunicam. He then established himself at Chidambaram, where he defeated Booddhist priests from Ceylon, as related in the Tirvauthavoorar pooraunam [q.v.]. Author of Tamul grammar [lacshanam], Coovalayaunandam, besides two works Chittambala covay and Tirvauchacam. Chittambala covay of 400 stanzas is an epithalamium of Shiva [q.v.] and Parvaty [q.v.]. Tirvauchacam, a series of hymns to Shiva [tirvauchacam]. In the Devashikhaumany paudal, a Tamul work of W. coast, it is stated that a sorcerer Maunica vauchacan came to Malayalam and induced the king to kill his state minister, a Roman catholic named Devashikhaumany. The native Roman catholics still exhibit a drama on this. Maunica vauchacan died at Chidambaram, aged 32.——*Monigar* (ಮಣಿಯಗಾರ - maniyagára, Can.; మనివకాడు - manivakádu, Tel.; மணியக்காரன் - maniyakkáran, Tam.). From (maniyam, tam. superintendence) [maniyam]. The headman of a village, employed as a revenue officer of the Circar [q.v.], for which he holds a maunyam [q.v.] or receives payment. Potail in mahratta, Peddacaup in teloogoo, Adhicaury in malayalam.

MANZIL (منزل - manzil, *Ar.*) [majil, manjilee]. From (nazala, ar. to alight). Place of alighting. A stage. In astronomy, mansion of the moon [chundran]. The Hindoo asterisms [nacshatram] generally consist of nearly the same stars as the Arabian manzils, but in a few instances they essentially differ. See Nacshatram for list.

MAPHRIAN (മെപ്രിയാൻ - mép'hrián, *Mal.*). Archbishop of the Syrian church of Malabar next in rank to the patriarch.

MAR (मर् - mar, *San.*). To die.——*Maranam* (मरण - marana, San.). From (mri, san. to die). Death; one of the effects of Cauman's arrows [cauma baunam].——*Marcandeyan* (मार्कण्डेय - márkandéya, San.). From (mrikandu, san. the sage); a patronymic. Ancient sage. One of the chiranjeevies [q.v.]. Also a pooraunam [q.v.] of this name.——*Marcapore* (మార్కాపురము - márkápuramu, Tel.). See sep. title.——*Mard* (مرد - mard, Hind.). Man.——*Mardaun* (مردان - mardán, Pers.). Manly. Prefixed to an alam forms a lacab; as Mardaun ally, manliness of ally [ism].——*Mardoom giyah* (استرنج - ustaranj, Ar.; مردم گیاه - mardumgiyáh, Pers.; لکھمنی - lakhmuní, Hind.; لفاه - lufáha, Malay; காட்டுகுட்டி - káttusútti, Tam.). Title from pers. meaning man + grass. Hind. from (lákh, hind. lakh + muní, hind. sage). Tam. from (kádu, tam. forest + shuttu, tam. forehead ornament). Ar. also (laffáh); (yabrúh); (sirájul-kutráb), meaning fairy's lamp; from use in magic rites. Pers. also (mihrgiyáh), meaning love grass, from the fact of those possessing the root being liked by others; (yabrúz). Greek μανδραγόρας μέλας, Latin mandragora or circeium. Dudaim of the bible. Venus was often styled Mandragorites. Title otherwise Devil's apple, Love apple, Mandrake. Botanically Mandragora officinarum, wight, solanaceæ [vricsham, 94]; generic from μάνρα cattle-fold, and in spite of the persian and english associations has nothing to do with the word man. A perennial plant, with a long, thick, fusiform, light brown root, which often bifurcates; the leaves are all radical, petioled and humifuse, broad, acute, with undulating edges; flowers numerous, on peduncles shorter than the leaves; fruit a yellow berry, ovoid; plants when fresh have a nauseous acrid taste. Has fetid root like parsnip in shape, with fancied resemblance to human form; nearly allied, in appearance and structure, to Atropa belladonna, linn. [dog angoor]. Formerly an article of materia medica. Smell of plant induces drowsiness; root narcotic and antispasmodic. The root is worn as a charm.——*Maroot* (मरुत् - marut, San.). From (mri, san. to die); agent of destruction. God of the wind [vayoo] in the Aryan mythology.——*Marwah* (मरुवक - maruvaka, San.; मरवा - maravá, Mahr.; مرزنجوش - marzanjúsh, Ar.; مرزنگوش - marzangúsh, Pers.; مروا - marwá, Hind. and Dec.; మరువము - maruvamu, Tel.; மரு - maru, Tam.). Title from sanscrit through hindostany. San. from (maru, san. desert); from habitat. Mahr. from

sanscrit. Ar. from persian. Pers. from (marz, pers. mouse + gosh, pers. ear). Hind. from sanscrit. Tel. from sanscrit. Tam. means fragrance. San. also (p'hanijjaka), meaning serpent + holy basil, ocimum sanctum, linn. Ar. also (marzanjúnash); (bakalatulghizál), meaning gazelle herb; (habakulfíl), meaning elephant basil; (habakulkaná), meaning spear ocimum; (surmuk). Pers. also (ávishan). Hind. and dec. also (dauná), cf. absinth. Tel. also (mridumaruvamu), meaning soft + the plant. Greek ἀμάρακον and σαμψύχον. Latin amaracus. Title otherwise Marjoram, Organy. Botanically the Origanum genus, labiatæ [vricsham, 103]. Aromatic herbs or under shrubs; leaves entire or toothed; flowers in cylindrical or oblong spikes; they give the hill-side on which they grow a gay appearance and hence the generic name.—"*a*" The best known species is botanically Origanum marjorana, linn., labiatæ [vricsham, 103]; alias Majoranum hortense; ornamental and aromatic shrub, native of portugal and palestine, here cultivated, brown fibrous root, flower odorous, sacred to soobramanyan [q.v.]. Seeds astringent, leaves eaten with gynandropsis pentaphylla, dc. [vailay], for colic; essential oil from leaves used as a perfume. Leaves used for flavoring sauces, &c.—"*b*" Another species is vulgare. Bears small, rose-colored or purple flowers; yields oil of thyme [ipar], a remedy for toothache. Esteemed by mahomedans as tonic; the dried leaves used as tea [q.v.].—"*c*" Pot marjoram is onites. ——*Marwarry* (مارواری - márwárí, Hind.). From (maru, san. desert); from the arid tract of marwah, their country. A caste from marwah in central india, the members of which follow the business of banker, broker and merchant. They are mostly of Jeina [q.v.] religion. They are spread over all towns in the peninsula. Numbers about 500 [jauty].——*Maur* (मार - már, San.). To kill.——*Mauran* (मार - mára, San.; மாரன் - máran, Tam.). Means killer. Manmatan [q.v.]. Pariah proper name [peyar].——*Mauraun* (മാരാൻ - márán, Mal.). From being originally employed in maury or bhagavaty temples. Sweepers and musicians in temples.——*Mauriyamman* (மாரியம்மன் - máriyamman, Tam.). From (mári, tam. death + amman, tam. goddess). The best known of the South indian tutelary village goddesses. Literally the mother of death, or of contagious diseases, more especially of the small-pox [maury]. She is supposed to inflict these diseases, and also to deliver from them. Mauriyamman is represented in the arts in a sitting posture, with four hands, in which she holds the same weapon as Yellamma. Her pagodas [q.v.] are to be found everywhere, usually at some distance from the villages in groves. Many of them are somewhat large, and surrounded by a wall, within which there is a vaulted stage, containing figures of wood, on which she is carried at festivals; and in front of all of them stands an altar of stone. In the pagoda stands her image of stone, together with that of Vigneshwaran [q.v.]. But her image is also made of metal; and small images of wood or stone, representing all the different Graumadevatays [q.v.], are sometimes found in the houses of the Tamulians [q.v.]. Opposite to her pagoda stands a small temple, in which are the following images:—Chettippen or the daughter of a merchant, stolen by Cauttaun; Cauttaun or a chief among the demons, of whom the people are more afraid than of mauriyamman; Mautangy; Pauppautty the daughter of a bramin, stolen by cauttaun; Shookmauttadicaurar or wearers of a staff called shookmauttady, her door-keepers; Veerabhadran; Yidaippen or shepherd woman. Besides these images, there are many more figures of clay, both within and without the enclosure of the pagodas, all of which are presented in fulfilment of vows by people who recover from the small-pox. These however are not worshipped, but regarded simply as ornaments. In those pagodas, which have a sufficient income, Mauriyamman receives an offering daily, in the lesser pagodas only on Friday. Besides the ordinary offerings that are made to her by the priest, she receives also extraordinary offerings, consisting of eatables which are laid before the pagoda by women; and these offerings belong to the priest [poojarry] and other servants of the pagoda. Moreover in her honor an annual festival is celebrated, which lasts eight days, when her image is carried every morning and evening. On the last and principal day, many thousands of people, more especially women, gather together near her pagoda, kindle fires, boil rice, &c., and make offerings therewith to her. The men bring goats [vellaud], and cocks [moorghy], and beheading them before the pagoda, ask the goddess to protect them in the coming year from evil. They have at the same time dancing and sports of kinds. This festival is not celebrated at a fixed time, but whenever it is convenient to the people of a place. There are no books written specially about Mauriyamman, but a few stories are told of her in various books relating to other deities. She has a variety of names:—Caudcaul amman, the forest-goddess; Comala vully, the beautiful female; Cotty, the valiant female; Maha peroondevy, the very great goddess; Maury, death, small-pox; Mautangy, the wilful pariah woman; Mody, show, enchantment; Shoory, heroine; Vadoogantye, vadoogan's or bheiravan's mother, &c. To propitiate Mauriyamman, hook-swinging was once practised, many persons making a vow to swing in her honor every year. As a rule however the hook-swinging [shirry] was done by professional devotees [matam]. See vol. I (78), (82). Mauriyannan and Mauriyappan are common names among non-bramins [peyar]. ——*Mauriyaye* (மாரியாயி - máriyáyi, Tam.). Proper name [peyar].——*Maurthy* (மாருதி - máruthi, Tam.). Son of Maroot. Epithet of Hanooman [q.v.]. Hindoo 2nd or pers. name [peyar].——*Maury* (मारी - márí, San.; மாரி - mári, Tam.). Means killer. Same as Mauriyamman. See vol. I (71). Pariah proper name [peyar]. Common to both sexes.——*Mirch* (مرچ - mirch, Hind.). Means killing, from burning sensation [mar]. Pepper. Cauly mirch is black pepper. Laul mirch is red pepper; same as Common chilly.——*Miriyaul* (మిరియాలు - miriyálu, Tel.). Means killing, from burning sensation. Same as Black pepper.——*Moordar* (مردار - murdár, Hind.). Dead. ——*Moordar sing* (مردا سنج - murdásanj, Ar.; مردا سنگ - murdásing, Pers.; مردار سنگ - murdársing, Hind. and Dec.; ಮುದದಾರಶಿಂಗಿ - mudadárashingi, Can.; ముదారశింగు - murdárasingu, Tel.; മുദാരശിംഗു - mudárasingu, Mal.; மிருதாரசிங்கி - miruthárasingi, Tam.). Pers. from (murdah, pers. dead + sang, pers. stone). Hind. from (murdár, hind. dead + sang, pers. stone). Can., &c., from hindostany. Litharge. Otherwise Impure oxide of lead. Plumbi oxidum of chemists. A semi-vitrified oxide of lead in the form of small shining heavy scales, or more or less agglutinated masses; usually produced in the purification of silver [velly] from lead [eeyam]. Medicinally irritant; inhalation of vapour poisonous; veidyans [q.v.] use as ingredient of plasters; natives generally employ mixed with vinegar [caudy] to remove pimples from face. Also used by painters [rangh].

MAR (മാർ - már, *Mal.*). Lord. Ecclesiastical title among the Malabar syrian christians.

MARABOU (مرابو - marabu, *Hind*). From javanese. Under-tail coverts of the Adjutant [q.v.] crane. The feathers are very light, and are much worn for head-dresses, the white kinds being exceedingly valuable.

MARAM (दारु - dáru, *San.*; لکڑی - lakrí, *Hind.*; ಮರ - mara, *Can.*; మ్రాను - mánu, *Tel.*; മരം - maram, *Mal.*; மரம் - maram, *Tam.*). Tree.——**(1)** The influence of trees on climate is to prevent the too rapid withdrawal of moisture from the soil, a point of great importance in this country where the heat of the sun is intense and the supply of water is dependant only upon periodical falls of rain [mazhay, monsoon]. Wood and timber are not only applied here to the usual economic uses, but they also furnish fuel [lukdy] to all classes, supplying the place of coal [nilakary], which has not yet been found in any quantity within the limits of the presidency.——**(2)** The following are two key-lists of the timber trees of s. india for which vernacular names are known; further information must be traced in the glossary paragraphs through the small-type cross references at end of this volume; see also vricsham, 7 for the method of expressing the products, &c., of the trees in the dravidian languages.—"*a*" Acacia arabica, babool; Acacia catechu, catechu; Acacia farnesiana, cassie-oil plant; Acacia ferruginea, anasandra; Acacia intsia, corindah; Acacia leucophlæa, white babool; Acacia melanoxylon, australian blackwood; Acacia pennata, rusty mimosa; Acacia planifrons, arrow thorn tree; Acacia suma, white sundra; Acacia sundra, sundra; Acacia tomentosa, umbrella thorn; Acrocarpus fraxinifolius, shingle tree; Adansonia digitata, baobab; Adenanthera pavonina, false red sanders; Adhatoda vasica, malabar nut; Adina cordifolia, model wood; Ægle marmelos, bael; Ailanthus excelsa, coromandel ailanto; Ailanthus malabarica, malabar ailanto; Alangium lamarckii, ancola; Albizzia amara, dark sirissa; Albizzia lebbek, common sirissa; Albizzia odoratissima, fragrant sirissa; Albizzia procera, var. elata, hill sirissa; Albizzia stipulata, stone sirissa; Aleurites triloba, lumbang nut; Alstonia scholaris, dita; Amoora rohituka, rohitacam; Anacardium occidentale, cashew; Anogeissus acuminata, pauchimaun; Anogeissus latifolia, vekkauly; Anona muricata, sour sop; Anona reticulata, bullock's heart; Anona squamosa, sweet sop; Anthocephalus cadamba, cadamba; Antiaris saccidora, sack tree; Antidesma bunius, chinese laurel; Antidesma ghæsembilla, var. genuinum, gasambilla; Aquilaria agallocha, eagle wood; Areca catechu, areca; Artocarpus hirsuta, anjely; Artocarpus incisa, ratadel; Artocarpus integrifolia, bread fruit; Artocarpus lakoocha, lakoocha; Atalantia monophylla, monkey lime; Averrhoa bilimbi, blimbing; Averrhoa carambola, coromandel gooseberry; Avicennia officinalis, ooppata mangrove; Balanites roxburghii, fire-work plant; Balsamodendron berryi, kiloovay; Balsamodendron mukul, mookul bdellium; Bambusa arundinacea, common bamboo; Bambusa stricta, male bamboo; Bambusa vulgaris, striped bamboo; Barringtonia acutangula, small indian oak; Barringtonia racemosa, common indian oak; Bassia latifolia, wild mohwah; Bassia longifolia, common mohwah; Bauhinia anguina, snake-like mountain ebony; Bauhinia malabarica, malabar mountain ebony; Bauhinia purpurea, purple mountain ebony; Bauhinia racemosa, small-flowered mountain ebony; Bauhinia retusa, nirpa mountain ebony; Bauhinia tomentosa, wild mountain ebony; Bauhinia vahlii, large mountain ebony; Bauhinia variegata, variegated mountain ebony; Berberis aristata, berberry; Berrya ammonilla, trincomalee tree; Bischoffia javanica, var. genuina, javanese cedar; Bixa orellana, monkey turmeric; Bombax malabaricum, red cotton tree; Borassus flabelliformis, palmyra; Boswellia serrata, yellow

dammer; Boswellia serrata, var. glabra, white dammer; Breynia rhamnoides, var. genuina, poolah shrub; Bridelia retusa, var. genuina, thorny vengay; Bruguiera gymnorhiza, candel mangrove; Buchanania latifolia, chironjee; Butea frondosa, bengal kino; Cæsalpinia bonducella, bonduc; Cæsalpinia coriaria, divy divy; Cæsalpinia sappan, sappan; Cæsalpinia sepiaria, mysore thorn; Calamus draco, sumatra dragon's blood; Calamus rotang, country rattan; Calophyllum angustifolium, narrow-leaved poon; Calophyllum bracteatum, bracteate poon; Calophyllum inophyllum, common poon; Calophyllum tomentosum, malabar poon; Calophyllum wightianum, small poon; Calotropis gigantea, mudar; Calycopteris floribunda, white wodala; Camellia theifera, tea; Canarium strictum, black dammer; Canthium didymum, black cauray; Capparis grandis, raghota caper; Capparis horrida, thorny caper; Carallia integerrima, caurally mangrove; Carapa moluccensis, crab-oil plant; Careya arborea, hindostany slow match; Carissa carandas, carondah; Caryota urens, bastard sago palm; Cassia auriculata, tungaid; Cassia fistula, indian laburnum; Cassia glauca, tree senna; Cassia marginata, horse cassia; Cassia siamea, sumatra senna; Cassia tora, chakondah; Casuarina equisetifolia, whip tree; Cedrela toona, toon; Celastrus paniculatus, malkangany; Celtis wightii, white indian nettle; Ceratonia siliqua, carob; Cerbera odollam, odallam; Chickrassia tabularis, chickrassy; Chloroxylon swietenia, satin wood; Cinnamomum zeylanicum, ceylon cinnamon; Citrus aurantium, var. aurantium proper, sweet orange; Citrus decumana, pummelow; Cochlospermum gossypium, golden silk cotton; Cocos nucifera, cocoanut; Coffea arabica, coffee; Corchorus capsularis, jute; Corchorus olitorius, wild jute; Cordia myxa, small sebestens; Cordia obliqua, large sebestens; Cordia rothii, narrow-leaved sebestens; Corypha umbraculifera, talipot; Cratæva religiosa, garlic pear; Croton oblongifolius, devil's goad; Cynometra ramiflora, iripa; Dæmia extensa, hedge cotton; Dalbergia lanceolaria, caunooga; Dalbergia latifolia, malabar blackwood; Dalbergia paniculata, yellow mountain ebony; Dalbergia sissoo, sissoo; Dendrocalamus tulda, bengal bamboo; Dichopsis elliptica, indian guttapercha; Dichrostachys cinerea, ashy babool; Dillenia indica, chaltah; Dillenia pentagyna, small chaltah; Diospyros ebenum, ceylon ebony; Diospyros embryopteris, gaub; Diospyros hirsuta, calaminder wood; Diospyros melanoxylon, coromandel ebony; Diospyros montana, forest gaub; Diospyros tomentosa, sweet gaub; Dodonæa viscosa, bog myrtle; Dolichandrone crispa, flowering pauthiry; Dolichandrone falcata, wody; Dolichandrone rheedii, long-leaved wody; Ehretia lævis, smooth coorvitchy; Elæodendron glaucum, nerija; Epicarpurus orientalis, stunted jack; Eriodendron anfractuosum, silk cotton; Erioglossum edule, rusty soapnut; Erythrina indica, common coral tree; Erythrina ovalifolia, devil coral tree; Erythrina stricta, thorny coral tree; Erythrina suberosa, white coral tree; Erythroxylon monogynum, deccany deodar; Eucalyptus globulus, blue gum; Eugenia alternifolia, moy; Eugenia arnottiana, small jaumoon; Eugenia jambolana, common jaumoon; Eugenia jambolana, var. caryophyllifolia, clove-leaved jaumoon; Eugenia operculata, cherry jaumoon; Euphorbia antiquorum, square milk-hedge; Euphorbia cattimandoo, cement plant; Euphorbia nereifolia, leafy milk-hedge; Euphorbia tirucalli, round milk-hedge; Eurya japonica, wild tea; Excæcaria agallocha, blinding tree; Excæcaria sebifera, china tallow; Feronia elephantum, wood-apple; Ficus bengalensis, banyan; Ficus excelsa, tall fig; Ficus glomerata, cluster fig; Ficus infectoria, stone banyan; Ficus racemosa, country fig; Ficus religiosa, peepul; Ficus tomentosa, hill banyan; Ficus tsiela, tsiela; Filicium decipiens, pehimbia; Flacourtia inermis, tomi-tomi; Flacourtia montana, attack; Flacourtia ramontchi, mauritius plum; Flacourtia ramontchi, var. sapida, ceylon plum; Garcinia cambogia, malabar gamboge; Garcinia indica, mate mangosteen; Garcinia mangostana, mangosteen; Garcinia morella, ceylon gamboge; Garcinia xanthochymus, yellow mangosteen; Gardenia latifolia, hill emetic nut; Gradenia lucida, decamallee; Gardenia turgida, nunjoondam; Garuga pinnata, garooga; Givotia rottleriformis, white tanakk; Gluta travancorica, red carany; Gmelina arborea, cashmere tree; Gossypium arboreum, tree cotton; Gossypium barbadense, var. acuminatum, peruvian cotton; Grewia asiatica, falsah; Grewia orbiculata, round-leaved tadda; Grewia pilosa, dog-bran plant; Grewia salvifolia, jaurah; Grewia tiliæfolia, tadda; Guazuma tomentosa, roodrauck tree; Guettarda speciosa, indian zebra wood; Gymnosporia emarginata, small chintoo; Gymnosporia montana, large chintoo; Gyrocarpus jacquini, tanakk; Hardwickia binata, yaipy; Helicteres isora, screw tree; Hemigyrosa canescens, fig mango; Heritiera littoralis, looking glass plant; Hibiscus tiliaceus, cork-wood bendy; Hiptage madablota, delight of the woods; Holarrhena antidysenterica, telicherry bark; Holigarna longifolia, holigarna; Holopetala integrifolia, indian elm; Homonoya riparia, wild gannair; Hopea parviflora, water caung; Hopea wightiana, common caung; Hydnocarpus venenata, fish-poison tree; Ixora parviflora, torch tree; Jasminum humile, golden jasmine; Jatropha curcas, physic nut; Jatropha glandulifera, adul oil; Jatropha multifida, small physic nut; Kandelia rheedii, candel mangrove; Lagerstrœmia flos-reginæ, adambo; Lagerstrœmia lanceolata, venteak; Lagerstrœmia parviflora, loose strife; Lawsonia alba, henna plant; Lebedieropsis orbicularis, var. collina, garrar; Limonia acidissima, wild lime; Loranthus longiflorus, gooloom; Lumnitzera racemosa, madagascar mangrove; Maba buxifolia, neilgherry satin-wood; Macaranga indica, round-leaved lotus; Mallotus philippensis, kamela; Mangifera indica, mango; Melanthesopsis patens, large neeroory; Melia azadirachta, margosa; Melia azedarach, large neem; Melia dubia, hill neem; Melocanna rheedii, berry-bearing bamboo; Memecylon edule, cassa; Mesua ferrea, naugachampak; Michelia champaca, champak; Miliusa velutina, black doodooga; Millingtonia hortensis, indian cork; Mimusops elengi, ilanjy; Mimusops hexandra, monkey-face paulay; Mimusops kauki, edible paulay; Morinda citrifolia, ach root; Moringa pterygosperma, indian horse radish; Murraya exotica, andaman satin-wood; Murraya kœnigii, curry leaf tree; Myristica malabarica, malabar nutmeg; Nephelium litchi, litchy; Nephelium longana, longan; Ochna squarrosa, shilandy; Ochrocarpus longifolius, soora poon; Odina wodier, wodier; Olea dioica, indian olive; Ougeinia dalbergioides, nemmy; Pavetta indica, pavetta; Persea nan-muh, nan-muh; Phœnix sylvestris, wild date; Phyllanthus distichus, brazil cherry; Phyllanthus emblica, emblic myrobalan; Phyllanthus polyphyllus, forest nelly; Pimenta officinalis, pimento; Pithecolobium bigeminum, venezuela soap-bark; Pithecolobium dulce, corcapilly; Pithecolobium saman, zamang; Plecospermum spinosum, cority; Poinciana elata, indian poinciana; Poinciana regia, flamboyant; Polyalthia cerasoides, doodooga; Pongamia glabra, indian beech; Premna integrifolia, moonnay; Premna latifolia, buffalo moonnay; Premna tomentosa, fire-brand teak; Prosopis glandulosa, mesquit; Prosopis spicigera, shamee; Protium caudatum, hill kiloovay; Psidium guyava, guava; Psidium guyava, var. pyriferum, white guava; Pterocarpus indicus, andaman red wood; Pterocarpus marsupium, malabar kino; Pterocarpus santalinus, red sanders; Pterospermum suberifolium, velanga; Punica granatum, pomegranate; Putranjiva roxburghii, wild olive; Randia dumetorum, common emetic nut; Randia uliginosa, gray emetic nut; Rhododendron arboreum, neilgherry rhododendron; Ricinus communis, castor-oil; Salix tetrasperma, indian willow; Salvadora oleoides, large tooth-brush tree; Salvadora persica, tooth-brush tree; Samadera indica, niepa bark; Sandoricum indicum, malay red wood; Santalum album, sandal; Sapindus trifoliatus, soap-nut; Saraca indica, bengal ashocam; Schleichera trijuga, ceylon oak; Schrebera swietenioides, weaver's beam; Securinega leucopyrus, white honey shrub; Semecarpus anacardium, marking nut; Sesbania ægyptiaca, common sesban; Sesbania grandiflora, west-indian sesban; Shorea robusta, common saul; Shorea talura, taloora saul; Shorea tumbuggaia, tambaga saul; Sideroxylon tomentosum, foreign ilanjy; Sonneratia acida, blatty; Soymida febrifuga, rohan tree; Spondias mangifera, hog plum; Sponia wightii, indian nettle; Stephegyne parvifolia, water cadamba; Sterculia balanghas, edible sterculia; Sterculia colorata, wild papaw; Sterculia fœtida, bastard poon; Sterculia guttata, dung tree; Sterculia urens, false tragacanth; Sterculia villosa, odul; Stereospermum chelonoides, pauthiry; Stereospermum xylocarpum, valencoorny; Stilnophyllum elasticum, indian caoutchouc; Strychnos nux-vomica, poison nut; Strychnos potatorum, clearing nut; Symplocos racemosa, californian cinchona; Tabernæmontana coronaria, adam's apple; Tabernæmontana dichotoma, eve's apple; Tamarindus indica, tamarind; Tamarix dioica, cypress tamarisk; Tectona grandis, teak; Terminalia arjuna, arjoon; Terminalia belerica, belleric myrobalan; Terminalia catappa, country almond; Terminalia chebula, chebulic myrobalan; Terminalia paniculata, flowering murdah; Terminalia tomentosa, var. coriacea, leathery murdah; Terminalia tomentosa, var. typica, black murdah; Tetranthera monopetala, meida lukdy; Thespesia populnea, portia; Thevetia nereifolia, exile tree; Toddalia aculeata, lopez root; Trewia nudiflora, river portia, Vateria indica, piney; Ventilago madraspatana, pappily; Vitex alata, peacock gingelly; Vitex altissima, wild peacock gingelly; Vitex leucoxylon, field notchy; Vitex negundo, notchy; Vitex pubescens, tall notchy; Webera corymbosa, tirauna; Woodfordia floribunda, godaury; Wrightia tinctoria, paula indigo; Wrightia tomentosa, ground paulay; Xylia dolabriformis, burmah iron wood; Zanthoxylum rhetsa, rhetsa; Zizyphus glabrata, carook vauly; Zizyphus jujuba, bair; Zizyphus nummularia, forest bair; Zizyphus œnoplia, jackal bair; Zizyphus xylopyrus, nutty bair.—"*b*" Ach root, morinda; Adambo, lagerstrœmia; Adam's apple, tabernæmontana; Adul oil, jatropha; Ailanto, ailanthus; Almond, terminalia; Anasandra, acacia; Ancola, alangium; Anjely, artocarpus; Arjoon, terminalia; Arrow thorn, acacia; Ashocam, saraca; Attack, flacourtia; Babool, acacia, dichrostachys; Bael, ægle; Bair, zizyphus; Bamboo, bambusa, dendrocalamus, melocanna; Banyan, ficus; Baobab, adansonia; Bdellium, balsamodendron; Beech, pongamia; Bendy, hibiscus; Berberry, berberis; Blackwood, acacia, dalbergia; Blatty, sonneratia; Blimbing, averrhoa; Blinding tree, excæcaria; Blue gum, eucalyptus; Bog myrtle, dodonia; Bonduc, cæsalpinia; Bran plant, grewia; Brazil cherry, phyllanthus; Bread fruit, artocarpus; Bullock's heart, anona; Cadamba, anthocephalus, stephegyne; Calaminder wood, diospyros; Caoutchouc, stilpnophyllum; Caper, capparis; Carany, gluta; Carob, ceratonia; Carondah, carissa; Carook vauly, zizyphus; Cashew, anacardium; Cashmere tree, gmelina; Cassa, memecylon; Cassie, acacia; Castor-oil, ricinus; Catechu, acacia; Caung, hopea; Caunooga, dalbergia; Cauray, canthium; Cedar, bischoffia; Cement plant, euphorbia; Chakondah, cassia; Chaltah, dillenia; Champak, mesua, michelia; Chickrassy, chickrassia; China tallow, excæcaria; Chinese laurel, antidesma; Chintoo,

gymnosporia; Chironjee, buchanania; Cinchona, symplocos; Cinnamon, cinnamomum; Clearing nut, strychnos; Cocoanut, cocos; Coffee, coffea; Coorvitchy, ehretia; Coral tree, erythrina; Corcapilly, pithecolobium; Corindah, acacia; Cority, plecospermum; Cork, millingtonia; Cotton, dæmia, gossypium; Crab oil, carapa; Curry-leaf tree, murraya; Dammer, boswellia, canarium; Date, phœnix; Delight of woods, hiptage; Deodar, erythroxylon; Devil's goad, croton; Dita, alstonia; Divy divy, cæsalpinia; Doodooga, miliusa, polyalthia; Dragon's blood, calamus; Dung tree, sterculia; Eagle wood, aquilaria; Ebony, bauhinia, diospyros; Elm, holopetala; Emetic nut, gardenia, randia; Eve's apple, tabernæmontana; Exile tree, thevetia; Falsah, grewia; Fig, ficus; Fire-work plant, balanites; Fish poison, hydnocarpus; Flamboyant, poinciana; Gamboge, garcinia; Gannair, homonoya; Garlic pear, cratæva; Garooga, garuga; Garrar, lebedieropsis; Gasambilla, antidesma; Gaub, diospyros; Gingelly, vitex; Godaury, woodfordia; Gooloom, loranthus; Gooseberry, averrhoa; Guava, psidium; Gutta-percha, dichopsis; Henna, lawsonia; Hog plum, spondias; Horse radish, moringa; Ilanjy, mimusops, sideroxylon; Indigo, wrightia; Iripa, cynometra; Ironwood, xylia; Jack, epicarpurus; Jasmine, jasminum; Jaumoon, eugenia; Jaurah, grewia; Jute, corchorus; Kamela, mallotus; Kiloovay, balsamodendron, protium; Kino, butea, pterocarpus; Laburnum, cassia; Lakoocha, artocarpus; Lime, atalantia, limonia; Litchy, nephelium; Longan, nephelium; Looking-glass plant, heritiera; Loose strife, lagerstrœmia; Lopez root, toddalia; Lotus, macaranga; Lumbang, aleurites; Malabar nut, adhatoda; Malkangany, celastrus; Mango, hemigyrosa, mangifera; Mangosteen, garcinia; Mangrove, avicennia, bruguiera, carallia, kandelia, lumnitzera, rhizophora; Margosa, melia; Marking-nut, semecarpus; Meidalukdy, tetranthera; Mesquit, prosopis; Milk-hedge, euphorbia; Mimosa, acacia; Modelwood, adina; Mohwah, bassia; Moonnay, premna; Mountain ebony, dalbergia; Moy, eugenia; Mudar, calotropis; Murdah, terminalia; Myrobalan, phyllanthus, terminalia; Nan-muh, persea; Neem, melia; Neeroory, melanthesopsis; Neipa bark, samadera; Nelly, phyllanthus; Nemmy, ougeinia; Nerija, elæodendron; Nettle, celtis, sponia; Notchy, vitex; Nunjoondam, gardenia; Nutmeg, myristica; Oak, barringtonia, schleichera; Odallam, cerbera; Odul, sterculia; Olive, olea, putranjiva; Orange, citrus; Palmyra, borassus; Papaw, sterculia; Pappily, ventilago; Pauchimaun, anogeissus; Paulay, mimusops, wrightia; Pauthiry, stereospermum; Peepul, ficus; Pehimbia, filicium; Physic nut, jatropha; Pimento, pimenta; Piney, vateria; Plum, flacourtia; Poison nut, strychnos; Pomegranate, punica; Poolah, breynia; Poon, calophyllum, ochrocarpus, sterculia; Portia, thespesia, trewia; Ratadel, artocarpus; Rattan, calamus; Red cotton, bombax; Red wood, pterocarpus, saudoricum; Rhetsa, zanthoxylum; Rohan, soymida; Rohitacam, amoora; Roodrauck, guazuma; Sack tree, antiaris; Sago palm, caryota; Sandal, santalum; Sanders, adenanthera, pterocarpus, Sappan, cæsalpinia; Satin-wood, chloroxylon, maba, murraya; Saul, shorea; Screw tree, helicteres; Sebestens, cordia; Senna, cassia; Sesban, sesbania; Shamee, prosopis; Shilandy, ochna; Shingle tree, acrocarpus; Silk cotton, cochlospermum, eriodendron; Sirissa, albizzia; Sissoo, dalbergia; Slow match, careya; Soap bark, pithecolobium; Soap nut, erioglossum, sapindus; Sour sop, anona; Sundra, acacia; Sweet sop, anona; Tadda, grewia; Talipot, corypha; Tamarind, tamarindus; Tanakk, givotia, gyrocarpus; Tea, camellia, eurya; Teak, premna, tectona; Tellicherry bark, holarrhena; Thorn, acacia, cæsalpinia; Tirauna, webera; Tomi-tomi, flacourtia; Toon, cedrela; Tooth brush tree, salvadora; Torch tree, ixora; Tragacanth, sterculia; Trincomalee, berrya; Tsiela, ficus; Tungaid, cassia; Turmeric, bixa; Valencoorny, stereospermum; Vekkauly, anogeissus; Velanga, pterospermum; Vengay, bridelia; Venteak, lagerstrœmia; Weaver's beam, schrebera; Whip tree, casuarina; White honey shrub, securinega; Willow, salix; Wodala, calycopteris; Wodier, odina; Wody, dolichandrone; Woodapple, feronia; Yaipy, hardwickia; Zamang, pithecolobium; Zebra wood, guettarda.——(3) *Maracaur* (മരക്കാർ - marakkár, Mal.). From (marakkalam, mal. boat + kár, mal. plural termination showing possession). Titular appellation of the Moplah [q.v.] mahomedans on the south-west coast [peyar].——*Maramairy* (மரமேறி - maraméri, Tam.). From (maram, tam. tree + éru, tam. to ascend). Another name for Shaunaur [q.v.].——*Marungotty* (दार्वाघाटकुल - dárvághátakula, San.; نقارالخشب - nakkárulkhashb, Ar.; کتھ پھوڑ - kathphor, Hind.; لکڑ پھوڑ - lakarphor, Dec.; پالتك - pálatuk, Malay; ಮರಕುಟಕ - marakutaka, Can.; వడ్లంగిపిట్ట - vadlangipitta, Tel.; മരങ്കൊത്തി - marankotti, Mal.; மரங்கொத்தி - marangotti, Tam.). Title from tamul. San. from (dáru, san. wood + ághat, san. to strike). Ar. from (nakkár, ar. constant pecker + khashb, ar. wood). Hind. from (kath, hind. wood + phor, hind. breaker). Dec. from (lakar, dec. wood + phor, hind. breaker). Can. from (mara, can. wood + kutaka, can. pecker). Tel. from (vadlangi, tel carpenter + pitta, tel. bird). Mal. and tam. from (maram, tam. tree + kottu, tam. to peck). Ar. also (akhyal); (surad). Tel. also (mánutolachi), meaning wood borer; (chirutapakshi), meaning castanet bird from rapid rapping on trees. Tam. also (marandulaiççi), meaning wood borer. Picidæ family, scansores, insessores, aves [pacshy, 13], of naturalists [jantoo]. Wood-peckers. Divide into:—Picinæ, Campephilinæ, Gecininæ, Yunginæ or wrynecks.——*Marcalan* (മരക്കലൻ - marakkalan, Mal.). From (marakkalam, mal. boat). Title among fishermen. Hindoo third name [peyar].——*Marcam* (మరకము - marakamu, Tel.). From (marakkál, tam. the measure). Measure of capacity. 12 pucka seers = 1 marcam [alavay, 3b]. Approximate actual value:—1 marcam = 840 cubic inches. Same as Tam. paunay. Compare Mercaul, Parrah of malabar. See vol. I, 609; II, 511.——*Marcauyar* (மரைக்காயர் - maraikkáyar, pers. pl., Tam.). Tamul form of Maracaur; applied to Lubbays [q.v.] honorifically.——*Marotty* (कडुकवंठ - kadúkavant'ha, Mahr.; गर्डफल - gardap'hala, Conc.; جنگلی بادام کا پیڑ - janglíbádámkáper, Hind.; جنگلی بادام کا جہاڑ - janglíbádámkájhár, Dec.; ಗರುಡಫಲ - garudap'hala, Can.; ಸೂರಂಟೆ - súrante, Too.; నీరుడుచెట్టు - níruduchettu, Tel.; മരോട്ടി - marótti, Mal.; මකුලු - makulu, Singh.; நீரடிமுத்து - níradimuttu, Tam.). Title from malayalam. Mahr. from (kadú, mahr. bitter + kavant'ha, mahr. wood-apple, feronia elephantum, corr.). Conc. from canarese. Hind. from (janglí, hind. wild + bádám, hind. prunus amygdalus, baill.). Dec. from hindostany. Can. from (garuda, san. braminy kite + p'hala, san. fruit). Tel. from (níru, tel. water + údu, tel. to drop out + chettu, tel. tree); from its drawing out bad water from blood in skin diseases. Mal. from (maram, mal. tree + vattu, mal. ball); fruits resembling wooden balls. Tam. from (nír, tam. water + adi, tam. to strike + muttu, tam. pearl) [wild jamalguta]. Tel. also (adavibádamchettu), meaning wild almond tree, prunus amygdalus, baill. Mal. also (níralam). Singh. also (ratakakuna), meaning foreign canarium zeylanicum. Tam. also (maravattai), (nírettimuttu), meaning water + to reach + pearl-like seed. Title otherwise Fish-poison tree, Jungle almond, Makooloo, Maravetty, Neeradimoot, Soorty-oil tree, Tamana-oil tree. Botanically Hydnocarpus venenata, gærtn., bixineæ [vricsham, 14]. Alias Chilmoria pentandra; Hydnocarpus inebrians; Munniksia laurifolia. Tree, 50 feet; leaves glabrous, crenately serrated, alternate; sepals five, two outer ones ovate, three inner ones larger, very concave; petals five, fringed with soft white hairs; fruit globose, very hard, as large as an apple [seb], crowned with the undivided portion of the stigma; seeds numerous; flowers small, white; malabar. Kernel of seed has nauseous smell, and tastes unctuous and a little acrid. Oil got by expression resembles in appearance almond oil but much thicker; in effects resembles chaulmoogra [q.v.], giving a green reaction with sulphuric acid [gandhac tezaub]. Oil in great repute as a drastic, and externally for leprosy [cooshtam] and other cutaneous complaints; in pharm. non-officinal; kernels and thin shells sometimes ground together, mixed with castor-oil [aumanac] applied externally to cure itch. Fruit, if eaten, occasions giddiness; seeds act as a poison to fish [common emetic nut, indian berry, indian oak, round milk-hedge, sooptee, tejbul, walsoora, zanzibar indigo], but render them unfit for use as food. There are species alpina and wightiana.——*Mercaul* (మరకము - marakamu, Tel.; மரக்கால் - marakkál, Tam.). From (maram, tam. wood + kalam, tam. vessel).—"*a*" Measure of capacity. 8 puddies = 1 mercaul; 12 mercauls = 1 calam [alavay, 3a]. Approximate actual value, 1 mercaul = 800 cubic inches. But very various in the districts. Same as cooroony. Compare Tel. marcam, cooncham, toom. See vol. I, 609; II, 506, 507, 509, 513, 515, 518, 519. Penday mercaul means split bamboo mercaul; it contains 2½ Madras measures or puddies.—"*b*" Superficial measure. 8 puddies = 1 mercaul; 21 mercauls = 1 dhaunya cottay [alavay, 2a]. Approximate actual value, 1 mercaul = 3,362 square feet. Used in Tinnevelly. Land requiring a mercaul of seed. Same as Cooroony. Compare Tel. cooncham, Mal. parrah.——*Mercaunum* (மரக்காணம் - marakkánam, Tam.). From (maram, tam. wood + kánam, tam. horse gram, dolichos biflorus, linn.).—"*a*" Deputy tahsildarry, South arcot district. Pay Rs. 70.—"*b*" Town, Port, Deputy tahsildar's station. South arcot dist., Tindivanam tal.; pop. 5,690; acres 9,716; lat. 12° 12′; long. 79° 59′; from Chidambaram N.N.E. 56 miles; from Cuddalore N.N.E. 34 miles; from Madras S.S.W. 64 miles; from Pondicherry N.N.E. 19 miles; from Sadras S.S.W. 25 miles; from Tindivanam E. 20 miles; from Tricalore E.N.E. 51 miles; from Vriddhauchellam N.N.E. 61 miles. Village by a backwater. Salt [ooppoo] manufactured. Cocoanut [q.v.] keets [q.v.] manufactured.

MARAM (மறம் - maram, *Tam.*). Bravery.——*Marava* (மறவ - marava, Tam.). Means warrior. The Marullo of Cosmas indicopleustes. A race allied to the Cullar [q.v.], found in Madura, Tinnevelly, Ramnaud, and Shivagunga. Ramnaud is the Greater marava country and Shivagunga the Smaller marava country. Their early history is very obscure, and it is only known that they are very ancient. At least two centuries before the Christian era, Kirautan their ruler made war with Coola bhooshana paundyan, and overran the whole of his country. Nothing else is known till the invasion of the country by the Mahomedans, which terminated the Paundyan dynasty. The Maravar then threw off their old allegiance to the ruler of Madura, and during the administration of the Naickar continued practically independent. The origin of the title Saitoopaty [q.v.] held by their leader in Ramnaud, and their latter history will be found described at vol. I (124). To this class belonged most of the southern poligars [q.v.] who disputed with the English the possession of Tinnevelly during the latter half of

the last and the first years of the present century. The tribe constituted themselves the protectors of more peaceable tribes in times when no central authority existed. Hence arose the systems of Desha cauval [q.v.] and Stala cauval [q.v.], or the guard of a tract of country comprising a number of villages against open marauders in armed bands, and the guard of separate villages, their houses and crops, against secret theft. The feudal chief received a contribution from the area around his fort in consideration of protection afforded against armed invation. His servants of the same caste, spreading themselves among the villages, received fees and sometimes rent-free land for undertaking to protect the property of the villagers against theft, or to restore an equivalent in value for anything so lost. Claims to Desha cauval fees as well as to Village cauval fees are of common occurrence to the present day [inam]. The Maravar resemble in this respect the Ramoosy of Sholapore and Bombay. Maravar are a dark-skinned race, of moderate height, the cranium rounded, narrow in front, forehead low, eyes large and full; the men do not wear turbans [puggry]; they wear their hair long; the women wear very long cloths folded in plaits, which they fasten behind; this is unlike other women of southern India, whose cloth is fastened on the right side in front; men and women wear ear-rings, and by pulling elongate the lobes of the ears. They worship the usual local deities and demons; on the occurrence of a small-pox or cholera epidemic devil-dances are common. The tribes that pay outward respect to the authority of the Saitoopaty are the eighteen chiefs of the Tanjore country, Wodeya tevar the chief of shivagunga, and the Tondiman of Poodoocottah. Deva [tevar] is the caste-title of all Maravar. The chief of Ramnaud however prefers to be called by his special hereditary title of Saitoopaty, lord of Rama's bridge. Numbers about 300,000. They have, at different times and in various proportions, been spread through the Tanjore, Madura, and Tinnevelly provinces; but properly speaking they inhabit a strip of land on the coast, from Cape comorin to some distance north of Ramnaud, the principal town. There are seven sub-divisions in the tribe, respectively denominated Shemboonautt marava, Condaiyan cottay marava, Appanore naud marava, Agatha marava, Worore naud marava, Oopcottay marava and Coorchicutt marava. Among these sub-divisions that of the Shemboonautt maravas is the principal. See vol. I (124); II, 52, 97, 230, 236.——*Mauramungalam* (மாறமங்கலம் - máramangalam, Tam.). From (máran, tam. pándya title + mangala, san. prosperity); Village; Tinnevelly dist., Tencaray tal.; pop. 1,108; acres 677; lat. 8° 39′; long. 78° 07′; from Shreeveicoontam E. 11 miles; from Tinnevelly E. 27 miles; from the sea W. 4 miles. Former name of a portion of Korkay [q.v.].——*Mauran* (மாறன் - máran, Tam.). Means brave man. Native title of the Paundy kings while at Korkay. A portion of Korkay was called Mauramungalam, 'the good fortune of the Mauran.' See vol. I (118), (120).

MARAUMUT (مرمت - marammat, *Hind.*). From (rama, ar. to mend). Repairs, small or large [doorast].——*Maraumut tafreek* (مرمت تفریق - marammattafrík, Hind.). From (above + tafrík, ar. distribution). Charge made upon ryots [q.v.] for preservation of tank [q.v.] bunds [q.v.], &c. They are required to furnish so many days' labour [amanjy] and so many loads of earth for filling in goolies [coozhy], &c. This is now often commuted to a money charge. See vol. I, 112.

MARAY (மறை - marai, *Tam.*). From (marai, to hide), hidden or secret knowledge. Vedam [q.v.].——*Maraimoothal* (மறைமுதல் - maraimuthal, Tam.). From (above + muthal, tam. first). The first in the Vedas. Shiva [q.v.]. Cf. Marayone for bramha [q.v.].

MARCAPORE (మార్కాపురము - márkápuramu, *Tel.* markápur*). From (márika, tel. a devotee of chennakéshavasvámi who built village + pura, san. town) [mar].——**(1)** Talook, Kurnool district. Tahsildar's pay Rs. 150. Area 1,117 square miles. Population 99,971. Language Teloogoo. N.E. of district. Bounded N. by Pulnaud talook of Kistna district, E. by Vinoocondah talook of same district and Darshy zemindarry of Nellore, S. by Cumbum talook, and W. by Nullamullays, which separate it from Nizam's territories and Nundicotcore talook. Very hilly and largely covered with jungle. Some hills are dome-shaped and crowned with pagodas [q.v.]. Some in N.W. corner contain extensive pasture lands to which cattle from coast resort for grazing. The W. half near Nullamullays is very unhealthy, fever being almost endemic. Soil is generally rocky. 89·58 per cent. of the soil is classed as red and is generally impregnated with sowdoo [q.v.]. Except in Dornaul valley and in neighbourhood of Marcapore, very little regady [regar]. The general poverty of soil is compensated by facilities which exist for construction of tanks [q.v.] and wells and the short depth, 8 yards, at which water is usually found. Several hills like Inooparauty condah contain iron [auhan] ore. Products are paddy [q.v.], cholum [q.v.], sadza [bajrah] the staple food here, corra [tinay], arikeloo [varagoo], candooloo [common dholl], castor-oil seeds [aumanac], cotton [q.v.], horse-gram [q.v.] and indigo [q.v.]. The paddy crop is generally raised by transplantation [nautt nadavoo]. Indigo cultivation has lately decreased. Rice [q.v.] and salt [ooppoo] are imported by the Lumbaudies [q.v.] and Yerkalas [q.v.] on pack-bullocks. Earth salt was formerly manufactured extensively and used for cattle Saltpetre [shorah] is also manufactured from salt earth found in streets and near the walls of houses. Rivers are Candlair, Doovvalair, Goondlacumma, Raullavaugoo, and Teegalair. Places of archæological interest:—Doddanaula, Marcapore, Millampully, Rajampulley, Tripoorauntacam, Vaimlacote, Vencataudripollem, Yerragondapollem. Principal Trig. stations:—Doorgapoocondah, Inooparautycondah. The leading places, &c., in the talook are the following.——*Bhoopatipully* (భూపతిపల్లి - bhúpatipalli, Tel.). From (bhúpati, san. earth-lord, epithet of a king + palli, tel. village). Village, B.K.S. railway station; pop. 1,533; acres 4,768; lat. 15° 40′; long. 79° 14′; from Kurnool E. 76 miles; from Marcapore S.W. 7 miles. On S. banks of Goondlacumma.——*Bommalaupooram* (బొమ్మలాపురం - bommalápuram, Tel.). From (bomma, tel. wooden toy + pura, san. town). Village; pop. 2,153; acres 3,906; lat. 15° 57′; long. 79° 11′; from Kurnool E. 72 miles; from Marcapore N.W. 17 miles. Residence of descendants of Dornaul poligar [q.v.].——*Calanootla* (కలనూతల - kalanútula, Tel.). From (kalla, tel. hedge + núyi, tel. well). Village; pop. 1,591; acres 6,057; lat. 15° 49′; long. 79° 11′; from Kurnool E. 72 miles; from Marcapore W.N.W. 11 miles. In the hills. At temple of Cautamraus annual festival on Teloogoo new year's day [pundigay, 4].——*Caukoola canama* (కాకులకనమ - kákulakanama, Tel.). See sep. title.——*Chaupalmadoogoo* (చాపలమడుగు - chápalamadugu, Tel.). From (chápa, tel. fish + madugu, tel. pond). Village; pop. 3,225; acres 5,740; lat. 16° 05′; long. 79° 25′; from Kurnool E.N.E. 89 miles; from Marcapore N.N.E. 24 miles. Former head-quarters of Deputy tahsildar. Also formerly seat of a poligar.——*Doopaud* (దూపాడు - dúpádu, Tel.). From (duppi, tel. spotted deer + pádu, tel. waste). Village; pop. 2,896; acres 8,497; lat. 15° 55′; long. 79° 25′; from Kurnool E.N.E. 89 miles; from Marcapore N.N.E. 14 miles. Former head-quarters of talook of same name. Ruins of fort built in Pratauparoodran's time. Large tank.——*Doorgapoocondah* (దుర్గపుకొండ - durgapukonda, Tel.). From (durga, san. fort + konda, tel. hill). Trig. station; lat. 16° 03′ 45·46″; long. 79° 08′ 09·04″; height 2,958 feet; from Marcapore N.N.W. 25 miles; from Vencataudripollem W. 8 miles.——*Doovvalair* (దువ్వలేరు - duvvaléru, Tel.) From (duvva, tel. dust + éru, tel. river). River. Tributary of the Goondlacumma.——*Dornaul* (దోరనాల - dóranála, Tel.). See sep. title.——*Gadzalacondah* (గజ్జలకొండ - gaddzalakonda, Tel.). From (ghizál, hind. antelope + konda, tel. hill). Village; pop. 2,416; acres 6,877; lat. 15° 45′; long. 79° 26′; from Kurnool E. 89 miles; from Marcapore E. 8 miles. Bilamboodoo cave in the vicinity has sacred spring. Hilly and rocky. Railway station.——*Goondlacumma* (గుండ్లకమ్మ - gundlakamma, Tel.). See sep. title.——*Inooparautycondah* (ఇనపరాతికొండ - inaparátikonda, Tel.). From (inumu, tel. iron + ráyi, tel. stone + konda, tel. hill). Trig. station; lat. 15° 59′ 39·81″; long. 79° 10′ 34·74″; height 2,372 feet; from Bommalaupooram N. 4 miles; from Marcapore N.N.W. 19 miles.——*Marcapore* (మార్కాపురము - márkápuramu, Tel.). See below.——*Muntraula canama* (మంత్రాలకనమ - mantrálakanama, Tel.). See sep. title.——*Murrivaimla* (మర్రివేముల - marrivémula, Tel.). From (marri, tel. banyan tree, ficus bengalensis, linn. + vému, tel. margosa tree, melia azadirachta, linn.). Village; pop. 1,553; acres 2,755; lat. 16° 14′; long. 79° 36′; from Kurnool E.N.E. 103 miles; from Marcapore N. 39 miles. Former seat of a poligar. A collateral scion of the family now draws small pension.——*Nullagoontla* (నల్లగుంట్ల - nallaguntla, Tel.). From (nalla, tel. black + gunta, tel. pond). Village; pop. 505; acres 1,653; lat. 15° 52′; long. 78° 58′; from Kurnool E. 57 miles; from Marcapore W.N.W. 25 miles. In the Nullamullays. Former seat of poligar whose ancestor served under the Vijianugger royel. On the decline of the power he seized nine villages, but was expelled by the Hyderabad kings and Aurungzeeb. The present representative, a widow, draws small pension. Deity of this village Mantraulammah, worshipped by Chentsoos [q.v.], gives name to Muntraula canama pass [ghaut].——*Nullamullay* (నల్లమల - nallamala, Tel.). See sep. title.——*Rollapenta* (రోళ్లపెంట - róllapenta, Tel.). From (rólu, tel. the pounding mortar + penta, tel. heap). Village, Hill, Trig. station; lat. 15° 52′ 02·60″; long. 78° 51′ 09·09″; height 2,455 feet; from Kurnool E. 50 miles; from Marcapore W. 32 miles. Half-way over the Muntraula canama pass. Brinjarry [q.v.] camping ground. Grove of wild mangoes [q.v.]. Fine watering place.——*Teegalair* (తీగలేరు - tígaléru, Tel.). From (tíga, tel. creeper + éru, tel. river). River. Rises in Nullamullays, flows in E. direction and joins Goondlacumma near Doopaud. Runs from September to February.——*Tripoorauntacam* (త్రిపురాంతకం - tripurántakam, Tel.). From (tripura, san. name of the three-citied giant + antaka, san. destroyer). Epithet of shiva [q.v.] who is said to have destroyed the giant of that name to save mankind. Sanscrit name (tripurántakapura), meaning tripooran, the giant + destroyer + town. Village, Place of pilgrimage; pop. 1,410; acres 4,044; lat. 16° 00′; long. 79° 30′; from Kurnool E. 93 miles; from Marcapore N.E. 22 miles. Considered one of the gates of Srisheilam. Temple to Tripoorauntaceshwara sawmy on the top of hill. S.W. is temple of Tripoora soondary in a tank. Annual festivals for Tripoorauntaceshwaran on Shivarautry

[pundigay, 6a] and for Tripoora soondary on Dusserah [pundigay, 6d].——*Veligonda* (వెలిగొండ - veligonda, Tel.). See sep. title.——*Vencataudripollem* (వెంకటాద్రిపాలెం - venkatádripálem, Tel.). From (venkatádri, tel. proper name + pálemu, tel. fortified village). Sanscrit name (venkatádripura), meaning vishnoo + hill + town. Village; pop. 3,452; acres 8,032; lat. 16° 03′; long. 79° 16′; from Kurnool E.N.E. 78 miles; from Marcapore N. 22 miles. Seat of a poligar with a small pension. N. is old Vishnoo [q.v.] temple with annual festival in February. ——*Yandrapully* (యండ్రపల్లి - yandrapalli, Tel.). From (endri, tel. a crab + palli, tel. village). Village; pop. 1,154; acres 4,877; lat. 16° 07′; long. 79° 22′; from Kurnool E.N.E. 86 miles; from Marcapore N. 26 miles. Residence of ancient poligar in the hills.——*Yerragondapollem* (ఎఱ్ఱగొండపాలెం - erragondapálem, Tel.). From (erragondu, tel. proper name + pálemu, tel. fortified village). Named after yerragondoo, builder of the tank in the village. Village; pop. 2,890; acres 7,287; lat. 16° 03′; long. 79° 21′; from Kurnool E.N.E. 84 miles; from Marcapore N. 21 miles. Former seat of poligar. Large tank. Stone slab, lies in a field, on which the ancient rulers took their seat when administering justice.——(2) Village, Tahsildar's station; Kurnool dist., Marcapore tal.; pop. 3,276; acres 7,238; lat. 15° 44′; long. 79° 19′; from Cumbum N.E. 16 miles; from Kurnool E.S.E. 81 miles; from Madras N.N.W. 194 miles; from Nundiaul E. 55 miles; from Pyaupaly E.N.E. 107 miles. Large Vishnoo temple, with annual festival in April and allowance of Rs. 175. Copperplate grant [shausanam] dated A.D. 1542, records grant by Sadaushiva deva roya of Vijianugger. An officer of Gajapaty rajah named Teloogoo royadoo built the tank here as well as the large Teloogoo royady cheroo in the Nullamullay valleys in N.W. corner of talook [q.v.].

MARJ (मार्ज् - márj, *San.*). To cleanse.——*Marjauram* (मार्जार - márjára, San.). From (márj, san. to cleanse); from habit of constantly cleaning itself. Cat. The genus Felis, felidæ [deeptaucsham], digitigrada, carnivora, mammalia [sastanam 9], of naturalists [jantoo]. The species known to the natives are:—bengalensis [shivingy poonay], caracal [q.v.], chaus [jungle cat], domestica [poonay], pardus [honiga], rubiginosa [poolly poonay], tigris [pooly], viverrina [meencolly poonay].

MARKING-NUT (भल्लातक - bhallátaka, *San.*; बिबी - bibí, *Mahr.*; बिब्बयि - bibbayi, *Conc.*; شجر حب القلب - shajarihabbulkalb, *Ar.*; درخت بلادر - darakhtibaládur, *Pers.*; بھلیے کا پیڑ - bhelekáper, *Hind.*; بھلاوین کا جھاڑ - bhilávenkájhár, *Dec.*; ಗೇರು - géru, *Can.*; ತೇರೆದಮರ - téredamara, *Too.*; జీడిచెట్టు - jídichettu, *Tel.*; ଭଲ୍ଲିଆ - bhalliya, *Oor.*; ചേർ - chér, *Mal.*; බඩුල්ල - badulla, *Singh.*; சேரான் - shérán, *Tam.*). Title from juice of nut used to mark cotton cloth. San. from (bhall, san. to hurt); vesicant. Ar. from (shajar, ar. tree + habb, ar. nut + kalb, ar. heart), from shape of nut; cf. specific name. Pers. from (darakht, pers. tree + baládur, pers. marking nut). Hind. and dec. from sanscrit. Can. from tamul. Tel. from (jídi, tel. corrosive sap + chettu, tel. tree). Oor. from sanscrit. Mal. from tamul. Tam. from (shér, tam. to fit + á, tam. negative particle), disagreeable, from caustic juice. San. also (arushkara), meaning producing sores; (agnimukhí), meaning fire-faced; (vranakrit), meaning wounding, a vesicant; (kshatáksha), meaning wound seed; (vírataru), meaning heroic tree, from caustic juice. Ar. also (inkardiyá), from greek anacardia; (shajarihabbulfahm), meaning intellect nut tree. Hind. also (bhiláma), from sanscrit. Can. also (karigéru), meaning black + the tree; (kéru). Too. also (gérkáyi). Tel. also (nallajídi), meaning black + the tree; (tummedamámidi), meaning black beetle + mango tree, mangifera indica, linn. Mal. also (kampíra); (ténprákku). Singh. also, (shénkotte) from tamul. Tam. also (shé), meaning red; (tagilimá); (vírasági), meaning heroic tree; (erimugi), meaning burning face. Greek ξανθοβάλανον. Title otherwise Bhilawaun, Black beetle mango, Black varnish, Fire-face tree, Indian varnish, Intellect nut, Jeedy, Malacca bean, Malacca kidney bean, Marking fruit tree, Marknut tree, Marsh-nut, Singhalese varnish, Sore plant, Sylhet varnish. Botanically Semecarpus anacardium, linn. f., anacardiaceæ [vriesham 45]. Alias Anacardium latifolium, officinarum. Tree, 50 feet; leaves entire, cuneate-obovate, rounded at the apex, whitish beneath, but not downy; calyx flat, five-cleft; petals five, sessile, spreading; flowers panicled, terminal, branched; fruit sessile, cordate-ovate, with a slight notch on one side under the apex; flowers small, green; flowering in may to july; trunk straight, covered with grey scabrous bark; common in dry elevated jungles. Nut is described in arabic works as resembling the heart of an animal, the fleshy stem representing the auricles, and the fruit the ventricles; it is black, smooth, shining, and flattened on both sides; it contains between the laminæ of shell an acrid juice of a pale milk color till perfectly ripe, when juice becomes black; when dry the juice has all the appearance of a bitumen [shilajit], being brittle, translucent, and very inflammable; the juice is not soluble in water; it unites perfectly with oils; should be cautiously handled. Like cashew-nut, the marking-nut is a fruit and not a seed or nut as its name implies; but it is commonly known as a nut in contradistinction to the fleshy torus, to which it is attached, and which is considered by the natives of this country as a fruit. The fruit and its acrid oil are in medicine; internally, sedative, antispasmodic, nervine and alterative tonic; externally, stimulant, rubefacient and vesicant. Oil is generally prepared by natives by aid of heat; the nuts being slightly cut or broken at each of their ends, they are put in an earthen pot, the bottom of which is perforated by three or four small holes; the pot's mouth, well closed with an earthen plate, is placed over another and smaller vessel, and the two luted together, and then placed in a pit about 2½ feet deep and nearly as wide, with a smaller pit at its bottom just sufficient to hold the smaller vessel; the pot is finally surrounded with cakes of dry cow-dung [bratty], which are set on fire till they are consumed; on removing the vessels when cool, the smaller one at the bottom will be found to contain a thick, black, very acrid and smoky oil in proportion to the quantity of the nuts used in the process; the oil is to be strained through thin muslin [q.v.] if it is intended for internal use. The oil can however be got by compression, and thus prepared is more pure and quite free from smoke. An electuary is prepared as follows; take by weight one part of the marking-nut, six parts of the kernel of cashew-nut without the testa or skin in coarse powder, and one part of clarified honey [shahad]; bruise and rub well separately the marking-nut in a stone mortar, add gradually the cashew-nut powder and the honey, and rub them all into a uniform mass. Doses; of the acrid oil, from 60 to 150 minims; of the electuary, from 60 to 150 grains. Substituted; internally, for salicylate of soda, salicylic acid, colchicum, ether, belladonna, iodide of potassium, perchloride of mercury, aconite root, valerianate of zinc, and strychnia; externally, for cantharides. An oil is also made by boiling entire nut; with much the same properties. Juice employed to remove rheumatic pains, aches, and sprains; a powerful vesicant; employed for making fictitious bruises; employed in every kind of venereal complaint; also given internally in small doses in leprous and scrofulous affections [cooshtam]. Oil used externally. The farina of anthers of flowers is narcotic and irritating; people of a peculiar habit sleeping under tree when in blossom, or even going near the flowers are stupefied, and have their faces and limbs swollen. Bruised nut applied by native women to procure abortion. Gives to pharm. juice between laminæ of shell, non-officinal; used in veterinary practice. The yellow mature corolla and receptacle are fleshy and of a sweetish sour taste, and are eaten roasted; seeds also eaten, supposed to stimulate the mental powers and especially, the memory. The whole nuts are used as a mordant [cauram]; the black juice is used to mark cotton cloth; by the mixture of quicklime [choonam] and water the color is improved, prevented from running, and fixed; juice also used as a varnish [rangh]; in caulking ships; the bark mildly astringent gives out in decoction a deep color, which dyes brown of various shades [shauyam]; the bark wounded yields a dirty looking, brownish, soft gum [gond]; the green nuts, well pounded into a paste, make good bird lime; the dark tenacious oil from seeds is used as a preventive against the attacks of white-ants [q.v.]. Wood greyish-brown, often with yellow streaks; contains like the nut an acrid juice which causes swelling and irritation, and timber-cutters object to felling; sometimes used for charcoal [adoopp kary].——*Jungle marking nut* (കാട്ടുചേർ - káttuchér, Mal.). Same as Holigarna.——*Lowly marking nut* (నేలజీడి - nélajídi, Tel.). Same as Wild jamalgota.

MARLEMUND (ಮಾಲೇಮಂದು - málémandu, *Can.*). From (mále, can. recess in a wall + mandu, can. todah village).—"*a*" Village, Hill; Neilgherry dist., Todanaud division; lat. 11° 26′; long. 76° 44′; from Ootacamund N. 3 miles. With large tank and plantation.—"*b*" Tea [q.v.], cinchona [koinah], and gum [blue gum] estates, Todanaud, Neilgherries; from Marlemund tank N. ½ a mile. 142 acres.

MAROO (മറു - maru, *Mal.*). Next, other.——*Maroomakkal* (മരുമക്കൾ - marumakkal, Mal.). From (above + makkal, mal. children). Sister's sons.——*Maroomakkatoyem* (മരുമക്കത്തായം - marumakkattáyam, Mal.). From (above + makkal, mal. children + táyam, mal. portion). The right which accrues to a man's sisters' sons of inheriting whatever may belong to that man, as distinguished from Makkatoyem [q.v.], the right of his sons to inherit it. This custom prevails among the Nayars [q.v.] and other classes in Malabar and Canara. In the latter district it is called Aliya santauna [q.v.]. The rule is otherwise known in English as nepotism in the female line. Under this rule of descent, a man's sons are not anywhere in the list of his heirs. His property goes to his sisters, sister's sons, sister's daughters, sister's daughter's sons and daughters, mother, mother's sisters, their children, and to his maternal grandmother, her sisters, and their children. Failing these and their stock in the same way of descent, it goes, as in the other parts of the Presidency, to the man's disciple, and fellow-student, and then escheats. The origin of the rule is said by the Bramins [q.v.] to have been thus. Parshooraman [q.v.], the first king of Malabar, introduced Bramins into the district, and gave them possesions there, and, to prevent these properties from being split up, decreed that they should vest in the elder brothers, whom alone he permitted to contract marriage. The sons of these were to be accounted as sons for the whole family. The junior brothers being without

wives were allowed to consort with females of lower castes. The offspring of these unions not being legitimate could not take rank as Bramins, or inherit from their fathers. Their inheritance was hence made to follow from their mothers. The lower castes fell into the same system of promiscuous intercourse among themselves. Though the fact about the Bramins however may be so, it will not sufficiently account for a domestic custom among a large race of people; and it is quite certain that the Bramins utilized the custom [auchanram] only and did not invent it. Friar Jordanus, who resided at Quilon, and wrote his description of the wonders of the East some five centuries and a half ago, states as follows the reasons for the nepotistic law:—"In this India, never do even the legitimate sons of great kings, "or princes, or barons, inherit the goods of their parents, but "only the sons of their sisters; for they say that they have no "surety that those are their own sons; but 'tis not so with the "sister, for whatever man may be the father, they are certain "that the offspring is of their sister, and is consequently thus "truly of their blood." The nepotistic method of inheritance is known to exist also among the aborigines of Hispaniola and tribes of New granada and Bagota; among negro tribes of the Niger; among certain sections of the Malays of Sumatra; in the royal family of Tipperah and among the Kasias of the Sylhet mountains; in a district of Ceylon adjoining Bintenne; in Madagascar; in the Fiji islands; and among the Hurons and Natchez of North america. In fact it is a not unnatural result of polyandry other than that which is restricted to brothers. For the consideration of this see what is set out at vol. I (106) and (107) in the text. The polyandry of the west coast is explained in some detail at vol. I (111), foot-note. See also vol. II, 100. Under this law of succession, the sister being the mother of the heirs becomes a person of great importance, daughters are desired, and sons are treated as of less account. The whole arrangement tends to give Nayar women much influence, admits of their being to some extent educated, and saves them from the privations of Braminical widowhood. The castes that follow this rule of Maroomakkatoyem are all excepting Bramins; Agapodwauls a class of pagoda [q.v.] servants; the artisans, namely carpenters, brasssmiths, blacksmiths and goldsmiths; and some of the lowest denominations, such as the Cheroomar, the Malayar and the Paniyar. The Teeyar or toddy-drawers and the Moocwas or fishermen of North malabar follow Maroomakkatoyem, while those to the south observe Makkatoyem. In North malabar most of the Moplahs, although Mahomedans, follow the rule of Maroomakkatoyem, in this respect having conformed to Hindoo usage. The above regards the rule of descent or inheritance [dauyam]. As to the rights which descend or are inherited, these can be seen for the higher castes under the head tarwaud, which is the undivided family of these castes; in the case of the lower castes the rights are the ordinary rights in movable and immovable property [maryauday].——*Mautt* (മാറ്റ - máttu, Mal.; மாற்று - máttu, Tam.). From (máru, tam. change). Touch or fineness of the precious metals [loham]. Very pure gold is said to be of 9 mautt, inferior gold of 5 or 6 mautt; the figures being in inverse proportion to amount of alloy [carat]. Distinguish from Mautt [q.v.], ambuscade.

MAROO (மரு - maru, *Tam.*). Fragrance.——*Marookkauray* (மருக்காரை - marukkárai, Tam.). From (above + kárai, tam. canthium parviflorum, lam.). Same as Common emetic nut.——*Marootham* (कटफल - katp'hala, San.; कायफळ - káyap'hala, Mahr.; ازوری - azúrí, Ar.; درخت هیشعان - darakhtishíshaán, Pers.; کائی پھل کا پیڑ - káiphalkáper, Hind.; کائی پھل کا جھاڑ - káiphalkájhár, Dec.; కైదర్యము - kaidaryamu, Tel.; മരുതു - marutu, Mal.; மருதம் - marutham, Tam.). Title from tamul. San. from (katu, san. pungent + p'hala, san. fruit). Mahr. from sanscrit. Hind. from (katap'hala, san. the tree + per, hind. tree). Dec. from hindostany. Tam. from (maru, tam. fragrance); from aromatic bark [black murdah]. San. also (kaidarya), meaning juice + praised, from medical properties of juice [curry-leaf tree]; (sugandhí), meaning fragrant, from slightly aromatic bark [indian sarsaparilla]. Ar. also (audulbark), meaning fragrant + lightning; (kandol). Title otherwise Box myrtle, Marootham bark tree. Botanically Myrica sapida, wall., myricaceæ [vricsham]. Tree; leaves laneolate, acuminate or obtuse at the apex, quite entire, glabrous, coriaceous; aments cylindric, alternate, remote, with a pubescent rachis; male flowers with an ovate puberulous bract; stamens three to five, longer than the bract; anthers glabrous; female flowers with a pear-shaped [amrood] granular fruit; nut very hard, attenuated at both ends. Bark aromatic stimulant, rubefacient and sternutatory; similar in action to kino [q.v.]; quoted in pharm., non officinal; powder of bark mixed with ginger [q.v.] and camphor [q.v.] used for rubbing on body of cholera patients to promote reaction; combination with gingelly [q.v.] oil a remedy in aphthæ; milky juice escharotic, powerful application for removing warts and other excrescences. Bark gives a dye [shauyam]. Another species is integrifolia. Maroötham, with the same ultimate root, means also agricultural land [desham].——*Maroothaud naud* (மருதநாடுநாடு - maruthádunádu, Tam.). From (marutham, tam. agricultural land + kádu, tam. forest + nádu, tam. country); country of forest and agricultural land. Part of Vengoondra cottam [q.v.] in the ancient Tondaimundalam [q.v.]. In the present Wandiwash talook, North arcot district.——*Maroothiyaur* (மருதையார் - maruthaiyár, Tam.). From (marutham, tam. tree, terminalia alata, don. + áru, tam. river). River; Trichinopoly dist. Drains Perambalore and Oodayarpolliem talooks and falls into Coleroon.——*Maroothoo* (மருது - maruthu, Tam.). From (maru, tam. fragrance). Tree, Terminalia alata. At the temple of Neinaurcoil, in Ramnaud zemindarry, Shiva [q.v.] is in shape of a lingam [q.v.] at foot of a Maroothoo tree [murdah]. Family name of the Sherogars [q.v.] of Shivagunga in last century.

MAROOL (मूर्वा - múrvá, *San.*; घोणसकांडें - ghónasakándém, *Mahr.*; مرغابی - murghábí, *Hind.*; مرگابی - murgábí, *Dec.*; ಮಂಜಿನಾರು - manjináru, *Can.*; చాగ - chága, *Tel.*; കരുമ്പ - kurumpa, *Mal.*; නියඳ - niyada, *Singh.*; மருள் - marul, *Tam.*). Title from tamul. San. from (murv, san. to bind); from fibres making bowstrings. Mahr. from (ghónasa, mahr. the snake); antidote to bite of that snake. Hind. and dec. from sanscrit. Can. from (manji, can. hemp plant + náru, can. fibre). Tel. from (ságu, tel to be elastic). Tam. means devil from strength of fibre; properly (maral). San. also (kharabusa), meaning hard thread; (déví), meaning shining; (madhurasá), meaning honey juice; (móratá), meaning entwining; (téjaní), meaning kindling; (sravá), meaning shedding; (madhúliká), meaning having honey; (madhushréní), meaning collection of honey; (gókarní), meaning having leaves like cow's ear; (píluparní), meaning having leaves like peeloo, salvadora persica, linn. Mahr. also (múra). Can. also (maruva). Tel. also (sága), meaning elastic; (chéga); (chámakáda), meaning colocasia antiquorum, schott. + stalk; (vishamakonda); (vishamangalapuchettu). Mal. also (perunkurumpa), meaning large + the plant. Singh. also (niyanda); (mahaniyanda), meaning large + the plant. Tam. also (aralai); (malaimañji), meaning mountain + the plant, crotalaria juncea, linn. Title otherwise Bowstring hemp, Ceylon sanseviera, Hyacinth aloe, Munchy naur. Botanically Sanseviera roxburghiana, schult., liliaceæ [vricsham, 136]. Alias Aletris hyacinthoides, zeylanica; Aloe hyacinthoides, zeylanica; Sanseviera æthiopica, zeylanica. Stemless; roots perennial; leaves radical, exterior ones shorter, spreading, and more broad, interior ones nearly erect, 1-4 feet long, semicylindric, grooved on the upper side, sharply acuminated at the apex, somewhat striated, smooth; scapes rising from the centre of the leaves, 1-2 feet long, erect, with four or five alternate sheaths between the raceme or flower-bearing part and the base; racemes erect, about as long as, or longer than, the scape below the flowers, striated, smooth; flowers greenish white, erect, fascicled, four to six together; pedicels short, one-flowered; corolla one-petalled, funnel-shaped; calyx none. Flowers somewhat fragrant; abundant along coasts; fleshy creeping root warm to taste, unpleasant odour. Fibre ordained by menoo [q.v.] to form the sacrificial zone [jandiram] of the military classes. The method of preparing the fibres [naur] is to steep the leaves, which are 3 or 4 feet long, in water for several days, in order that the pulpy part may rot; the fibres are then easily separated, but putting them in water is apt to discolor them; in other cases they are first beaten to separate the fibres more easily, and placed on a board and scraped with a piece of rough stick or iron till all the pulp is removed. The root is electuary in chronic cough and consumption; juice of tender shoots given to children as expectorant. The fibre from leaves is very soft silky, and pliant, resembling that of pine-apple [ananas]; used for ropes, twine, thread, bowstrings, cord and paper manufacture. Another species is lanuginosa.

MARSIYA (مرثیہ - marsiyah, *Hind.*). From (rasa, ar. to bewail). A funeral eulogium; a Moharram hymn [manaukib].

MARTABAN (مرتبان - martabán, *Hind.*). Port in Lower burmah formerly of great trade, but in decay. Large glazed jars are exported from this port.——*Martaban camphor* (مرتبان کا کافور - martabánkákáfúr, Hind.). Same as Martaban cinnamon.——*Martaban cinnamon* (مرتبان کا دارچینی - martabánkádárchíní, Hind). See under Cinnamon.

MARTEES (सौगन्धिक - saugandhika, *San.*; جبلقوم - jabalkúm, *Ar.*; مرطیس - martís, *Hind.*; ಮಾಣಿಕ್ಯ - mánikya, *Can.*; కురువిందరాయి - kurivindaráyi, *Tel*; செவ்வந்திக்கல் - shevvandikkal, *Tam.*). Title from hindostany. San. from (sugandha, san. sweet scent); epithet of blue water-lily, nymphæa stellata, wild. Tel. from (kurivindamu, tel. ruby + ráyi, tel. stone). Tam. from (shevvandi, tam. chrysanthemum indicum, linn. + kal, tam. stone). Amethyst. Quartz or rock crystal of a pink or purple color, the color being due to the presence of manganese [q.v.] or iron [auhan]. Those found in the bed of the Godavery are only purple colored mountain crystals [palingoo cull]. A gem however of this name is imported from Burmah, which is a variety of perfect corundum [q.v.] and the real oriental amethyst [ratnam].

MARYAH (मर्या - maryá, *San.*). Limit [avadhy].——*Maryauday* (मर्यादा - maryádá, San.; മര്യാദ - maryáda, Mal.). From (above + dá, san. to give). In Tamul means honor, respect; in Malabar, the customary respect due to any status, and so

custom [auchauram, maumool]. See vol. I (97) to (109), and the following foot-notes:—clothing I (98), wearing hair I (99), arms I (100), habitations I (100), dietary I (101), occupations I (102), iron industry I (103), music I (103), mode of address I (104), mahomedan proper names I (104), family life I (107), ceremonies I (107), magic I (109), special tribes I (109); ceremonies II, 235.

MARYAM (مریم - maryam, *Ar.*). From (ráma, ar. to love). Mary. Common female alam; as Maryam bee, alam + alaumat [ism].——*Mariyamma* (மரியம்மா - mariyammá, Tam.). Mary, the virgin; used by the Romanists. Native christian female proper name [peyar]. Distinguish from Mauriyamman.

MASAB (మసబు - masabu, *Tel.*). Clay soil [munn].

MASAUL (مشعل - mashal, *Hind.*). From (shola, pers. flame). Torch. A torch made of rags wrapt round a stick and fed at intervals with oil from an earthen pot [pandam].——*Masaul chory* (مشعل چوری - mashalchorí, Hind.). From (above + chorí, hind. theft). Torch robbery [dacoity].——*Masaulchy* (مشعلچی - mashalchí, Hind.). A torch-bearer; also domestic servant for lamps.——*Masaul tree* (مشعل کا جہاڑ - mashalkájhár, Hind.). Means torch tree; boughs of the tree used for torches. Same as Large jungle geranium.

MASAULAY (مسالہ - masálah, *Hind.*). Materials, drugs, curry-stuffs.——*Masaulay grass* (ہزار مسالہ - hazármasálah, Dec.). Title as used to flavour curries [q.v.]. Same as Lemon grass.

MASAUT (مساحت - masáhat, *Hind.*). From (masáh, ar. to measure). Survey of lands [peimash].

MASEEH (مسیح - masíh, *Ar.*). From (masaha, ar. to anoint). Anointed, Messiah. Part of lacab; as Maseeh ood dowla, messiah of the empire [ism].

MASHEIKH (مشائخ - masháikh, *Hind.*). Plural of masheekha, which is again the plural of sheikh. Mahomedan elders or holy persons; mostly hold Soofee [q.v.] doctrines. Alias Peers [q.v.], Moorshids [q.v.]. They are of two kinds, Jaddee and Khoolfaee. Jaddee means ancestral, i.e., family in which the system of making mooreeds [q.v.] has been hereditary. Khoolfaee means deputed, i.e., family which acquired right by deputy. Some of them, independently of making mooreeds, gain additional subsistence by fortune-telling, composing amulets and charms, practising medicine, pronouncing blessings, or exercising incantations. Fakeers who are Masheikhs have necessarily at the commencement or in the middle of their names the word shah, and at the termination the words cawdiry, chishty, tabacauty, or shoottaury; thus, Shah abdool lah cawder cawdiry, Hameed ool lah shah chishty; tabacautiya and shoottauriya are rare [fakeer].

MASHY (मसि - masi, *San.*; మసి - masi, *Tel.*; മഷി - mashi, *Mal.*; மசி - masi, *Tam.*). Ink. The Tamulians occasionally make ink on nearly the European system. But that which is used by native writers in cutcherries [q.v.] is prepared by the following process. First, burnt rice-water is made. Half a seer of rice [q.v.], burnt black, is well boiled in a seer-and-a-half of water till but one seer [q.v.] remains; then strain off the dregs. To this seer of burnt rice-water is added two pollums of lac [q.v.]; boil them well together, and strain off the dregs. Half a seer [q.v.] of lamp black [caujal] and half a pollum [q.v.] of gum arabic [q.v.] are then well rubbed into a fine powder and gradually added to the decoction of lac and burnt rice-water, when the whole are rubbed together and well shaken at different intervals for three days. The Mahomedans prepare their ink [shirah, shye] in the following manner. Take of lamp black and gum arabic equal quantities, and pound together to very fine powder. This powder is then moistened with the juice of the pulp of the cuttaulay or small aloe [q.v.] and well rubbed at intervals for two days together; after which it is formed into small cakes which are put on plantain [q.v.] leaves and dried in the sun. The Tamulians prepare red ink by adding water to shempunjy or red cotton [q.v.].——*Mashicauran* (മഷിക്കാരൻ - mashikkáran, Mal.). From (above + kára, san. doer). A conjurer, who detects theft by applying a black powder to his eyes, or by rubbing it on his hand, or on a plate, and viewing in it the person of the thief.

MASILAUMANY (மாசிலாமணி - másilámani, *Tam.*). From (másu, tam. stain or spot + il, tam. not + mani, san. gem); spotless gem. Hindoo 2nd or pers. name. Common among non-bramins [peyar].

MASOOM (معصوم - masúm, *Hind.*). From (asama, ar. to guard against sin). Innocent. Infant or sinless. A necessary qualification for an imaum [q.v.] according to shiahs [q.v.]. Prefixed to an alam forms a lacab; as Masoom ally, infant of ally. Mostly taken by Shiahs [ism].

MASOOR (मसूर - masúra, *San.*; عدس - adas, *Ar.*; مرجومک - marjúmak, *Pers.*; مسور - masúr, *Hind.* and *Dec.*; చిరిశనగ - chirishanaga, *Tel.*; මසූර - masura, *Singh.*; மைசூர்ப்பருப்பு - maisúrpparuppu, *Tam.*). San. from (mas, san. to ripen). Tel. from (chiru, tel. small + shanaga, tel. bengal gram, cicer arietinum, linn.). Tam. means mysore pulse but really from sanscrit. San. also (mangalyaka), meaning auspicious. Greek φακὸς; latin Lens. The lentil of scriptures, of which Esau's pottage was made. Revalenta arabica is Lentil flour, the name being a corruption of Ervum lens. Title otherwise Lentil, Lentil tare, Red pottage, Small bengal gram. Botanically Ervum lens, linn., leguminosæ [vricsham, 48]. Alias Cicer lens; Vicia lens. Weak, pea-like [calauyam], wing-leaved, annual; flower small, pale blue; a mysore pulse; highly esteemed as article of food, containing 27·96 per cent. of nitrogenous matter and 56·36 of starch; meal also used by natives as substance for washing; no other species here. Same title is given to Vicia hirsuta, koch., or tare [dholl].

MASTIC (रूमीमस्तकी - rúmímastakí, *Mahr.*; شجر مصطکی - shajarimastakí, *Ar.*; درخت کندر رومی - darakhtikundurirúmí, *Pers.*; مصطکی کا پیر - mastakíkáper, *Hind.*; رومی مصطکی کا جہاڑ - rúmímastakíkájhár, *Dec.*; పిల్లికండ్లగుగ్గిలము - pillikandlagugilamu, *Tel.*; பூனைக்கண்குங்கிலியம் - púnaikkangungiliyam, *Tam.*). Title from arabic; hence english mastication. Mahr. from deccany. Ar. from (shajar, ar. tree + mastakí, ar. mastich). Pers. from (darakht, pers. tree + kundur, pers. olibanum + rúmí, pers. turkish). Hind. from (rúm, hind. turkey + mastakí, ar. mastich + per, hind. tree). Dec. from hindostany. Tel. from (pilli, tel. cat + kannu, tel. eye + guggilamu, tel. dammer). Tam. from (púnai, tam. cat + kan, tam. eye + kungiliyam, tam. resin); from glossy pale yellow like cat's eye. Ar. also (shajarimastakíirúmí), meaning turkish mastic tree. Pers. also (kinnah) [galbanum]. Greek σχῖνος. Title otherwise Cat's eye resin, Lentisk, Manna of lebanon, Turkish mastic, Turkish olibanum. Botanically Pistacia [pistah] lentiscus, linn., anacardiaceæ [vricsham, 45]. Diœcious evergreen shrub; leaves evergreen, fruits very small, pea shaped [calauyam], reddish when ripe; flower small green, imported. Yields by incision of its trunk an aromatic resin called mastic; this occurs in oval tears, smooth diaphanous, brittle, breaking with plane brilliant, glassy, and pale yellow surfaces, and owing to its brittleness being usually covered with its own dust; odour agreeable; flavor balsamic; melts at a moderate heat, and then exhales a sweet odour; insoluble in water. Softening in the mouth, medicinally slightly tonic and astringent, and much used here to perfume the breath and strengthen the gums; officinal in pharm.; diuretic and astringent; dentists employ it dissolved in alcohol, ether, or chloroform for filling carious teeth. It is employed in europe to flavour wines and for varnishing pictures; its place is generally supplied here in the arts by less costly resins [raul], such for example as dammer [q.v.], together with gum sandrach [q.v.], gum elemi [q.v.], lac [q.v.], alcohol, and in conjunction with turpentine [ganda firoza]; jewellers lay it under the diamond [vajram] to add to lustre.

MASULAH (مچھلی - macchlí, *Hind.*; మసూలా - masúlá, *Tel.*). Hind. means fish, as frequently used by fishermen [mad]. Cf. Masulipatam. A boat used for crossing the surf on the Coromandel coast [q.v.]. It is formed with a flat bottom, for the purpose of taking the beach in the surf when European boats cannot approach it. 30 to 35 feet long, 10 to 11 feet broad, and 7 to 8 feet in depth. The planks are sewed together with coir yarns, crossing the seams over a wadding of coir [q.v.], which presses on the joints and prevents leakage. By this the boat remains as pliable as a basket, and yields to the shock which it receives on taking the ground. Takes cargo and passengers from ships outside surf. Rowed by twelve men in double banks, with paddles or boards about ten inches broad and fourteen inches long fixed at the end of a pole. Steered by a tindal or cockswain, and one or two men constantly bale out the water. The steersman gives time by a song. Eight or ten passengers can be carried, and great quantities of goods can lie in the well of the boat, being supported and kept out of the wet by dunnage.——*Masulipatam** (మచిలీపట్టణము - machilípattanamu, Tel.). From (machhlí, hind. fish + pattana, san. town), from an old tradition of a whale stranding on shore; greek μαισωλία in ptolemy, μασαλία in periplus. Sanscrit name (matsyapura), meaning fish + town. Hind. name (machhlíbandar), meaning fish + port.—"*a*" A former district of the British government named from its principal town. Area about 5,14 square miles. Between lat. 15° 45′—16° 26′, long. 80° 52′—81° 36′. Bounded north by the territory of the Nizam; north-east and east by the district of Rajahmundry; south-east by the Bay of Bengal; and south-west by the Kistna, which divided it from the district of Guntoor. Masulipatam, Condapully, and Ellore were the principal places. For history see under next head. Masulipatam district is represented now by Bezwada, Bunder, Goodivauda, Noozveed, Nundigauma and Tirvore talooks of the Kistna district and Ellore, Pentapaud and Relangy talooks of the Godavery district.—"*b*" Town, Port, Municipality, Headquarters of Collector, Judge, talook and division; Kistna dist., Bunder tal.; pop. 38,809; acres 11,219; lat. 16° 11′; long. 81° 10′; from Bezwada E.S.E. 40 miles; from Guntoor E. 44 miles; from Madras N.N.E. 218 miles; from Nizampatam E.N.E. 36 miles; from Vinoocondah E. 92 miles. The town is on Golcondah coast [q.v.], north of mouth of a branch of Kistna, in an unhealthy situation, and in an extensive plain stretching westwards to the ghauts [q.v.]. It is still the principal port of Kistna district

though it has few natural advantages, and suffers in addition from competition with Cocanada with which the Kistna delta [conamoogam] has inland communication by water. Large ships cannot anchor nearer than five miles from the shore; and during the north-east monsoon [q.v.], all communication is suspended. Light in the fort; lat. 16° 10′; long. 81° 12′. White; fixed, 6 miles range. Visible from all directions seaward. Flagstaff. Guide for vessels to the anchorage. The Chinnacaupooram canal communicates with the sea about a mile and a half south-east of the fort, and passing close on the south side of its rampart, is navigable up to it for small craft. It joins the Kistna, about 15 miles farther to the north-west. It can be entered from the sea, even by boats, only at high water. Barges and native craft come up the river and go on by canal to Bezwada. The port was founded in the 14th century by Arabs. The first reliable date is 1425 when the Hindoo rajahs of the Carnatic [q.v.] gave permission for the erection of a Mahomedan mosque [musjid]. In 1478, the Bahmany [q.v.] king Mahomed II entered Masulipatam. An English agency was established in 1611. Factory established 1621; removed to Armegam 1628; reestablished under the Firmaun [q.v.] of the King of Golcondah, 1632. The station then became the centre of English trade in these parts and was managed by a chief and council. Factory established by Dutch in 1660 and by French in 1669. In 1686 Dutch took possession of the town forbidding the English to trade. Factory seized by the local Governor owing to the rupture between Aurungzeeb and the Company, 1689. Cowle [q.v.] for the factory renewed, firmaun dated 28th December 1690, from Zoolfacar khan, the Moghul [q.v.] general. Captured by the French in 1750; formally ceded to France by the Nizam with the rest of the Circar [q.v.], 1753; retaken from the French by Colonel Forde, 7th April 1759; bestowed on the English company as an inam [q.v.] together with the whole of the Circar of Masulipatam and eight districts, the Circars of Nizampatam and the districts of Condaveed and Acoolamannaud, by Nizam salaubut jung, 14th May 1759; grant confirmed by the Moghul's firmaun, 12th August 1765. The small Circar of Masulipatam is not to be confounded, with the extensive district afterwards so called. For details regarding the territory ceded by the foregoing treaty see vol. II, 277. The family of the Masulipatam nawaubs [q.v.] trace their descent from the Ameer yauwar ahmed najm e sauny, Commander-in-Chief of the armies of Shah ismail safavee, Emperor of Persia, about three centuries ago. His son, Baukir khan najm e sauny, came to Delhi and rose high in the service of the Emperor Jehaungeer. He married a niece of the famous Noor jehaun and his name is perpetuated in Baukirabad near Mooltaun. His only son Feiyauz khan najm e sauny left two sons. The elder, Ally coolee khan, was Aurungzeeb's vizier. The vizier's younger son, Yoosoof khan, died in his father's lifetime, leaving an infant son Mahomed takee khan, who left the protection of his uncle, Mahomed beg khan, and obtained from the Nizam of Hyderabad a Jagheer [q.v.] in the Godavery district which his descendants hold to this day. Mahomed takee khan had two sons, Hoossain ally khan, who died childless, and Hassan ally khan, whose name is conspicuous in early records. Hassan ally khan entered the service of the Nizam, and after distinguishing himself in the province of Aurungabad became the Soobahdar [q.v.] of the Northern circars [q.v.]. He suggested to the Madras government the idea of taking the Condapully and Ellore circars from Nizam ally khan and he fought by the side of the English troops at Rajahmundry and elsewhere. In the arrangements necessary when the Circars were taken over he administered the provinces of Condapully, Ellore, and Rajahmundry for three years. He subsequently was compelled to disband his troops, and to content himself with the life-rent of the Jagheer. He died in 1771 and the Jagheer was at once resumed, an annual allowance of one lakh [q.v.] of rupees [q.v.] being granted for the maintenance of his numerous family. Masulipatam is the centre of missionary labour in Teloogoo country. A storm wave in 1864 swept over the entire town at night and destroyed 30,000 lives. A similar calamity happened during Dutch occupation. The fort has fallen into decay since the withdrawal of the garrison in 1865. A large square in the native town, in which the markets are held, bears the name of Mr. Robertson. In the Native quarter is the sight of the French lodge. An interesting memorial is Eliza's tree, so called from Mrs. Draper, the correspondent of Sterne. In the centre of the native quarter, stands a collection of 33 upright slabs, of compact limestone [choonamcull], carved with figures in alto-relievo. They were brought from the ruins of a pagoda [q.v.] 7 miles from the town and are Jeina [q.v.] relics. Weavers form a large portion of the inhabitants. Their operations, besides weaving, include printing, bleaching, washing and dressing. In former days the chintzes [q.v.] of Masulipatam had a great reputation and there is still a small demand for them in Burmah, the Straits, and the Persian gulf. Another speciality was madapollems [q.v.]; but this industry was ruined by the refusal of the West indian negroes to wear these kerchiefs after their emancipation. Tartans, ginghams [q.v.], towels, and table linen are still manufactured to a small extent. The export trade is partly to Europe; imports are chiefly local. Trig. station is in Lat. 16° 8′ 55·41″; long. 81° 11′ 39·35″. From Masulipatam S.E. 3 miles. From the sea W. 1½ miles. The following are the travelling distances from Masulipatam to different places:—

To	Via	Miles and Furlongs.	
Bangalore	Baupatla, Nellore and Chittore	407	4

MATHAGOO (மதகு - mathagu, *Tam.*). A covered gutter or channel [mada].——*Mathagoo moolgy* (மதகுமுழுகி - mathagumuzhugi, Tam.). From (above + muzhugu, tam. to dive). One whose business it is to dive and stop cracks in bund [q.v.] of a tank [q.v.], or mend the sluices [inam, maday, madayvetty].

MATHIL (மதில் - mathil, *Tam.*). The wall that encloses a temple [coil, pagoda, praucauram].

MATOORAY (मथुरा - mat'hurá, *San.*). From (mat'h, san. to kill), place where madhoo, an asooran [q.v.] was killed. Muttra in n. india, sacred to Krishnan [charitram, krishnan, madura]. Greek *μεθόρα*. Distinguish from Madura [q.v.].

MATSYAM (मत्स्य - matsya, *San.*). From (mad, san. to be lively) [mad]. Fish. Pisces of naturalists [jantoo]. Cold-blooded animals with a two-chambered heart, which breathe by means of gills, and have their limbs developed in the form of fins.——(1)—"*a*" Fish are classified into six sub-classes as follows. First Teleostei, or fishes with a complete bony skeleton, which includes all the most perfectly organised forms; by far the greater number of existing fishes are included in this sub-class. Secondly Dipnoi, of which only two species are known. Thirdly Ganoidei, in which are the sturgeons and a few other forms. Fourthly Chondropterygii, fishes with a cartilaginous skeleton, which includes all the sharks [soorah] and rays [tenky]. Fifthly Cyclostomata, round-mouthed or sucking fishes, including the lampreys [aural] and their allies. Sixthly Leptocardii, only one species known.—"*b*" The next division is into orders. The first sub-class or Teleostei, which is practically the only one of any consequence, is divided into five orders, as follows. Acanthopterygii or spiny-finned. This order comprises those fishes of which the perch [calavye] may be taken as a type. They have usually a number of sharp spines forming part of the fin on the back, and some of the other fins. They have frequently two dorsal fins, but both of them are composed of rays, and the adipose or gristly fin does not appear in this order. When there are two dorsal fins, the first is composed entirely of spinous rays, or the two fins may be united.

The acanthopterygian fishes do not exist in any numbers in the inland freshwaters of S. india, being mostly confined to either within, or but a short distance removed from, tidal influence, or above the sea level. The larger the river, the greater is the probability of their extending their range up it. The hard-rayed fishes captured in the fresh-waters mostly belong to one of the following genera :—Lates, Ambassis, Nandus, Badis, Pristolepis, Sciæna, Equula, Gobius and allied genera, Mugil, members of the Labyrinthiform and Ophiocephaloid families, as well as the spined eels, and the Etropli. Anacanthini or spineless. This order have all their fin rays soft and flexible, such as the cod-fish and the soles. The order has been divided into sub-orders, thus :—Anacanthini gadoidei, the two sides of the head symmetrical; Anacanthini pleuronectoidei, the two sides of the head apparently unsymmetrical. Physostomi. This order contains the greater number of freshwater fishes. The fishes of this order have frequently one strong bony ray in front of the back fin, but the remaining rays of that fin are soft and branched. Lophobranchii. This order is unimportant. The fishes which comprise it normally swim in a vertical position, the dorsal fin being the principal propeller, and which while in motion it rapidly undulates from end to end. Plectognathi. This order is unimportant, mostly oceanic. Mouth narrow, the bones of the upper jaw united, sometimes produced into the form of a beak. The second and third sub-classes do not require special mention. The fourth sub-class Chondropterygii as at present constituted is divided into two orders, the first of which has not any representatives in India, thus :—Holocephala, with only one external gill-opening and a rudimentary cartilaginous gill-cover; four branchial clefts inside gill-cavity; the palatal and maxillary apparatus coalescent with the skull. Plagiostomata, with five to seven external gill-openings and no cartilaginous gill-cover; jaws distinct from the skull. The order of Plagiostomata has been sub-divided as follows :—First sub-order, Selachoidei or Sharks; trunk gradually passing into the tail; gill-openings lateral. Second sub-order, Batoidei or Skates and Rays; gill-openings ventral; body depressed, forming, due to largely-developed pectoral fins, a more or less flat disk, and having usually a thin and slender tail; dorsal fin, when present, in the caudal portion of the body; anal absent. The fifth and sixth sub-classes require no special mention.—"*c*" The next division is that of families, and these form the most natural of the groups into which fishes can be divided, each making generally a well-defined congregation.—"*d*" A genus of fishes is a group which closely resemble one another in all important details of their structure, and differ from all other genera in one or more essential points.—"*e*" As to species all the individuals of a species resemble each other both in structure and habits; they breed freely together and their progeny resemble themselves.—"*f*" Sea-fishes are properly speaking divisible into real marine fish, and marine fish which ascend within or even above tidal influence to deposit their ova in suitable localities, or to obtain sustenance. In some of the real marine forms also the fry are hatched along the coast, and subsequently pass into small estuaries, creeks, rivers and streams, in order to find security and food suitable to their condition.—"*g*" Nearly every fish either salt water or fresh water is eaten by natives. Even sharks [soorah] are valued. In the bazaars [q.v.] it would be possible to obtain some two or three hundred different kinds of dried fish, including different preparations of the same species. The fish most in repute for European tables are the seer [q.v.], Cybium commersonii, the pomfrets [q.v.], species of stromateus, and mullets [q.v.]. The first-named of these, the seer, is sold in cuts like salmon in Europe. The gouramy [q.v.] was introduced lately from the Mauritius and is as yet confined to a few private ponds. The fresh-water fishes fit for European tables are few in number, and embrace some carps [kenday], the hilsa [q.v.] or Clupea ilisha, the murrel [q.v.] or Ophiocephalus, and some siluroid [keliroo] species. The fish which afford the best sport with rod and line are a large barbus [carp], the mahaseer [q.v.], which rises to the fly and runs like salmon; and the murrel, which may be caught with live-bait or gorge-tackle.——**(2)** The following is a key synopsis of the s. indian fishes, marine and freshwater, ranged down to species, connecting the european and native terminology; the small capitals indicate the sub-class, the small capitals in inverted commas indicate the order, the italics indicate the family, the italics in inverted commas indicate the sub-family, and the ordinary type indicates the genus and species :—TELEOSTEI. "ACANTHOPTERYGII."—1 *Percidæ.*—Lates calcarifer [cock-up]. Serranus hexagonatus [spotted perch], flavo-caeruleus [yellow perch], lanceolatus [sore-headed perch], malabaricus, salmoides, bœnack [striped perch], sonnerati [red perch]; Lutjanus sebæ, bengalensis, rivulatus, marginatus [bride fish], erythropterus, sillago, johnii, jahngarah, argentimaculatus [red-rock cod], roseus, fulviflamma, lineolatus; Ambassis gymnocephalus [white chandwah], nama [striped chandwah], ranga [red chandwah], thomassi; Therapon [kitchaun] puta, jarbua, theraps; Pristipoma furcatum [pyekeely], maculatum [caratchy], hasta [caukkan], dussumieri, guoraca; Lobotes surinamensis; Scolopsis vosmeri; Synagris japonicus, tolu; Gerres filamentosus.—2 *Squamipinnidæ.*—Heniochus macrolepidotus; Holacanthus imperator, annularis; Scatophagus argus; Ephippus orbis; Drepane punctata.—3 *Mullidæ.*—Upeneus indicus [red mullet].—4 *Nandidæ.*—Badis buchanani, dario; Nandus marmoratus.—5 *Sparidæ.*—Lethrinus carwa; Pagrus spinifer; Chrysophrys sarba, berda [black rock cod]; Pimelepterus cinerascens.—6 *Cirrhitidæ.*—Cirrhitichthys aureus.—7 *Scorpænidæ.*—Pterois volitans [flying toomby], miles [black toomby]; Apistus carinatus; Minous monodactylus.—8 *Teuthididæ.*—Teuthis java, vermiculata.—9 *Berycidæ.*—Myripristis murdjan, botche; Holocentrum rubrum.—10 *Kurtidæ.*—Kurtus indicus; Pempheris mangula.—11 *Polynemidæ.*—Polynemus indicus [screwpine robaul], tetradactylus [golden robaul].—12 *Sciænidæ.*—Umbrina russellii, dussumieri; Sciæna maculata [striped cuttalay], diacanthus, miles [white cuttalay], coitor [black cuttalay], belangeri [rusty cuttalay], aneus, albida [gray cuttalay]; Sciænoides pama; Otolithus maculatus, argenteus.—13 *Xiphiidæ.*—Histiophorus immaculatus [peacock fish], gladius.—14 *Trichiuridæ.*—Trichiurus haumela [moorman's vaulay], savala.—15 *Acanthuridæ.*—Acanthurus matoides, triostegus.—16 *Carangidæ.*—Caranx rottleri [shark pauray], kurra, gymnostethoides, djeddaba, leptolepis [rama pauray], affinis, kalla [thief pauray], melampygus, hippos, ire [black-headed pauray], jarra, carangus, malabaricus, sansun, atropus [striped pauray], armatus [golden pauray], nigrescens [gray pauray]; Seriolichthys bipinnulatus; Chorinemus sancti-petri, moadetta, lysan [thick skin pauray], tala, toloo; Trachynotus baillonii, ovatus; Psettus argenteus, falciformis; Platax vespertilio, teira; Equula edentula, fasciata, insidiatrix, bindus, splendens, daura; Lactarius delicatulus.—17 *Stromateidæ.*—Stromateus cinereus [white pomfret], sinensis [bat faced pomfret], niger [black pompfret].—18 *Coryphænidæ.*—Coryphæna hippurus [dolphin fish]; Mene maculata [barber pauray].—19 *Scombridæ.*—Scomber microlepidotus; Thynnus thunnina; Cybium guttatum, commersonii [seer]; Elacate nigra [sea murrel]; Echeneis neucrates.—20 *Uranoscopidæ.*—Ichthyscopus inermis.—21 *Trachinidæ.*—Sillago domina, sihama [indian whiting].—22 *Cottidæ.*—Platycephalus insidiator [false bummelo], scaber, tuberculatus.—23 *Gobiidæ.*—Gobius giuris [river goby], malabaricus, striatus [ringed goby], viridipunctatus [scorpion goby]; Apocryptes lanceolatus [black ramah], bato; Eleotris fusca, butis, amboinensis; Gobioides anguillaris [eating ramah], cæculus [crooked ramah]; Trypauchen vagina.—24 *Rhynchobdellidæ.*—Rhynchobdella aculeata [aural]; Mastacembelus pancalus, armatus [rock aural], guentheri.—25 *Sphyrænidæ.*—Sphyræna jello [jella].—26 *Mugilidæ.*—Mugil cunnesius, seheli [gray mullet].—27 *Aulostomateidæ.*—Fistularia serrata.—28 *Centriscidæ.*—Amphisile scutata.—29 *Ophiocephalidæ.*—Ophiocephalus marulius [murrel], micropeltes, striatus [pariah murrel], gachua [pariah doke], punctatus [spotted doke].—30 *Labyrinthidæ.*—Anabas scandens [palmyra fish]; Polyacanthus cupanus; Osphromenus olfax [gouramy]; Trichogaster fasciatus.—31 *Glyphidodontidæ.*—Glyphidodon sordidus, cælestinus.—32 *Labridæ.*—Cossyphus diana, axillaris; Platyglossus dussumieri; Pseudoscarus rivulatus.—33 *Chromidæ.*—Etroplus suratensis, maculatus [crow carp].—"ANACANTHINI."—34 *Pleuronectidæ.*—Plagusia bilineata [jerripotoo]; Cynoglossus lingua.—"PHYSOSTOMI."—35 *Siluridæ.*—Plotosus canius [variegated keliroo]; Clarias magur; Silurus wynaadensis; Saccobranchus fossilis [scorpion fish]; Wallago attu [vaulay]; Callichrous bimaculatus [two-spotted shark], malabaricus [malabar shark]; Ailia coila; Pseudeutropius taakree, skyesii [dog keliroo], atherinoides [leaf jella], garua; Pangasius buchanani [mud jella]; Silundia gangetica [slippery keliroo], skyesii; Macrones aor [snouted keliroo], chryseus [golden keliroo], carcio, punctatus, cavasius [white keliroo], vittatus [fiddler keliroo], malabaricus, armatus [black keliroo], oculatus; Rita pavimentata [gogra]; Osteogeniosus militaris [cat keliroo]; Bagarius yarrellii [goonch].—36 *Scopelidæ.*—Saurida tumbil [false bummelo]; Harpodon nehereus [bummelo].—37 *Scombresocidæ.*—Belone annulata [green pike], strongylurus [stork pike]; Hemiramphus far, limbatus; Exocœtus pœcilopterus [flying pike].—38 *Cyprinodontidæ.*—Haplochilus melastigma, lineatus, rubrostigma.—39 *Cyprinidæ.* "*Cyprininæ.*"—Homaloptera brucei [rock carp]; Discognathus lamta [rock doke]; Labeo fimbriatus [fringed labeo], calbasu [black labeo], nigrescens, gonius, kontius [red labeo], dussumieri [scaled labeo], ariza, bata, boga; Cirrhina cirrhosa, reba; Catla buchanani; Thynnichthys sandkhol; Amblypharyngodon mola [streaked robaul], melettinus; Barbus sarana [sarana carp], pinnauratus, dubius, micropogon, carnaticus [carnatic carp], jerdoni [red carp], tor [mahseer carp], neilli, pulchellus, melanampyx, dorsalis [shell carp], chrysopoma [golden carp], chola [bitter carp], parrah [flying carp], mahicola, kolus [gray carp], curmuca, lithopidos, thomassi, denisonii, amphibius, arulius, ambassis, ticto, punctatus [spotted carp], gelius, stigma, filamentosus, vittatus; Nuria danrica; Rasbora daniconius, buchanini; Aspidoparia morar; Rohtee vigorsii, ogilbii; Barilius bendelisis, bakeri, canarensis, gatensis [indian trout]; Danio rerio, albolineatus, neilgherriensis; Chela gora, untrahi, argentea, clupeoides, phulo, bacaila.—"*Cobitidinæ.*"—Lepidocephalichthys thermalis; Jerdonia maculata; Nemacheilus semiarmatus, sinuatus, striatus, notostigma, denisonii, triangularis, guentheri, rubidipinnis.—40 *Clupeidæ.*—Clupea brachysoma, longiceps, fimbriata, ilisha [hilsa], toli; Pellona motius, indica, brachysoma, megaloptera; Chatoessus nasus, chacunda; Engraulis malabaricus, kammalensis, setirostris, indicus, purava; Coilia dussumieri; Dussumieria acuta; Elops saurus; Megalops cyprinoides [large-eyed carp]; Chanos salmoneus [white mullet].—41 *Notopteridæ.*—Notopterus kapirat [barber vaulay].—42 *Murænidæ.*—Muræna punctata, polyzona; Anguilla bengalensis, bicolor; Murænesox talabon [talabone].—"LOPHOBRANCHII."—43 *Syngnathidæ.*—

Syngnathus serratus [whip fish]; Ichthyocampus carce; Doryichthys cunculus, bleekeri; Hippocampus guttulatus.—"PLECTOGNATHI."—44 *Sclerodermidæ.*—Triacanthus brevirostris, strigilifer; Balistes mitis, conspicillum; Monacanthus setifer, monoceros, scriptus; Anacanthus barbatus [bottle-nosed pike]; Ostracion turritus [bony plautchy], cubicus, cornutus [bull plautchy].—45 *Gymnodontidæ.*—Tetrodon patoca, cutcutia, lunaris, sceleratus, fluviatilis, reticularis; Diodon hystrix [prickly plautchy].—DIPNOI.—Not represented.—GANOIDEI.—Not represented.—CHONDROPTERYGII. "PLAGIOSTOMATA. SUB-ORDER SELACHOIDEI."—46 *Carchariidæ.*—Carcharias laticaudus [white shark], acutus [red shark], macloti [gray shark], menisorrah [black shark], gangeticus; Galeocerdo rayneri [yellow shark]; Zygæna malleus, blochii [hammer-headed shark]; Mustelus manazo [dun shark].—47 *Scylliidæ.*—Stegostoma tigrinum [zebra shark]; Chiloscyllium indicum [fawn-colored shark].—"PLAGIOSTOMATA. SUB-ORDER BATOIDEI."—48 *Pristidæ.*—Pristis cuspidatus, zysron [great white shark].—49 *Rhinobatidæ.*—Rhynchobatus djeddensis, ancylostomus [ground goby]; Rhinobatus granulatus.—50 *Trygonidæ.*—Urogymnus asperrimus [bristly tenky]; Trygon uarnak [tiger tenky], zugei, sephen [shark tenky]; Pteroplatea micrura [large tenky].—51 *Myliobatidæ.*—Myliobatis nieuhofii [banded tenky]; Ætobatis narinari [black-tail tenky]; Rhinoptera adspersa [flat tenky]; Dicerobatis eregoodoo; Ceratoptera ehrenbergii.—CYCLOSTOMATA.—Not represented.—LEPTOCARDII.—Not represented.——**(3)** The following is a list of the principal families alphabetically arranged, with the Sanscrit equivalent, references to the key-synopsis, and brief description.——*Acanthuridæ* (कण्टकवालकुल - kantakaválakula, San.). Means spine + tail. Acanthopterygii, 15. Body oblong or elevated and compressed; eyes of moderate size and lateral.——*Aulostomateidæ* (नालींमुखकुल - nálímukhakula, San.). Means pipe + mouth. Acanthopterygii, 27. Form of body elongated; the anterior bones of the skull produced, forming a long tube and having a small mouth at its anterior extremity.——*Carangidæ* (रुक्ममत्स्यकुल - rukmamatsyakula, San.). Means bright fish. Acanthopterygii, 16; the horse mackerel [pauray] family; body oblong, elevated, or subcylindrical and compressed; eyes lateral; scales usually small, unless absent; contains the cobbler fish [golden pauray], equula, and others.——*Carchariidæ* (कर्करमकरकुल - karkaramakarakula, San.). From (karkara, san. hard + makara, san. shark). Selachoidei, plagiostomata, 46. The snout may be produced longitudinally or laterally [soorah].——*Centriscidæ* (आयतास्यकुल - áyatásyakula, San.). Means long-mouthed. Acanthopterygii, 28. Form of body oblong or elevated and compressed; the anterior bones of the skull produced, forming a long tube and having a small mouth at its anterior extremity.——*Chromidæ* (रुचिरमत्स्यकुल - ruchiramatsyakula, San.). Means shining fish. Acanthopterygii, 33. Body oblong or elevated; fresh-water fishes [kenday].——*Cirrhitidæ* (शुक्रमत्स्यकुल - shukramatsyakula, San.). Means resplendent fish. Acanthopterygii, 6. Body oblong and compressed; mouth in front of snout having a lateral cleft; eyes of moderate size.——*Clupeidæ* (इलीसकुल - ilísakula, San.). From (il, san. to go). Physostomi, 40; herring family; this is a large family; differs from carp [kenday] in being essentially marine; there are however several freshwater species; body covered with scales, which are generally thin, and often easily detached; berbels none; abdomen generally compressed into an edge which is often serrated; dorsal fin rather short; adipose fin none; anal fin often very long [hilsa, kenday, mullet, poorva].——*Coryphænidæ* (चित्रमत्स्यकुल - chitramatsyakula, San.). Means variegated fish. Acanthopterygii, 18. Dolphin fish [q.v.] family. Body oblong or elevated and compressed; eyes lateral [dolphin fish, pauray].——*Cottidæ* (गोशीर्षकुल - góshírshakula, San.). From (gó, san. bull + shírsha, san. head). Acanthopterygii, 22. Body oblong, compressed or sub-cylindrical; eyes lateral or partly directed upwards and outwards; some bones of the head armed [bummelo].——*Cyprinidæ* (शफरकुल - shap'harakula, San.). From (shap'hara, san. carp). Physostomi, 39. Carps [kenday]. Body oblong or elongated; head scaleless, body scaled or scaleless, never covered by osseous plates; freshwater. By far the greater number of S. indian fresh-water fish belong to this family. The Carp [kenday], Barbel [kenday], Roach, Bream, &c., are english representatives [chilwah, doke, indian trout, kenday, rohitam]. The family are not such foul feeders as the siluroides [keliroo]; and enter largely into the diet of the indigenous population. But Indian carps do not restrict themselves so much to a vegetable diet as do those in Europe.——*Cyprinodontidæ* (दन्तशफरकुल - dantashap'harakula, San.). From (danta, san. tooth + shap'hara, san. carp). Physostomi, 38. Eyes lateral; scales on head and body; have been sub-divided into Cyprinodontidæ carnivoræ and C. limnophagæ.——*Glyphidodontidæ* (कर्षदन्तकुल - karshadantakula, San.). From (karsha, san. furrowed + danta, san. tooth). Acanthopterygii, 31. Eyes lateral; body more or less short and compressed; bones of head armed or smooth.——*Gobiidæ* (चित्रवाजीकुल - chitravájíkula, San.). Means variegated + fin. Acanthopterygii, 23. Body elongate. Two dorsal fins, the spinous portion being always the less developed, and composed of flexible spines. The Gobies [ooloovay] are carnivorous fishes, living in the freshwaters and off the coasts of temperate and tropical regions. They reside mostly at the bottom of the water [ooloovay, ramah].——*Gymnodontidæ* (नग्नदन्तकुल - nagnadantakula, San.). From (nagna, san. naked + danta, san. tooth). Plectognathi, 45. Body more or less short. Some possess the means of dilating an elastic portion of the œsophagus, or an abdominal sac, with air. Most of the forms are highly indigestible as food or even virulently poisonous [frog fish, plautchy].

——*Kurtidæ* (कुटिलकुल - kutilakula, San.). From (kutila, san. curved); from form of body. Acanthopterygii, 10. Body oblong and compressed; eyes large; lower jaw prominent.——*Labridæ* (ओष्ठीयकुल - ósht'híyakula, San.). From (ósht'ha, san. lip); from lip form. Acanthopterygii, 32. Body oblong or elongated. Many adorned with gorgeous colors, generally abundant in the neighbourhood of rocks and coral reefs [atoll]. Some provided with excessively strong teeth to enable them to crush the shells of marine molluscs [chippy].——*Labyrinthidæ* (मण्डलगात्रकुल - mandalagátrakula, San.). From (mandala, san. coil + gátra, san. body). Acanthopterygii, 30. The Climbing perch [palmyra fish] family; freshwater; body compressed, oblong, or elevated; eyes lateral; freshwater and estuary fishes; capable of living a considerable period out of their natural element; good for eating. Some reputed to have medicinal stimulating properties. These fishes are remarkable for the length of time they are able to live without water, their gills being especially adapted to breathe the air direct. Even when in water they are obliged to ascend to the surface constantly to breathe, otherwise they are soon drowned. Anabas scandens [palmyra fish] and Trichogaster fasciatus are common examples [gouramy, palmyra fish].——*Mugilidæ* (श्वेतमल्लकुल - shvétamallakula, San.). From (shvéta, san. white + malla, san. the fish). Acanthopterygii, 26. Grey mullets [q.v.]. Body oblong, compressed; the head and anterior portion may be depressed; eyes lateral; marine forms, some ascending tidal rivers or estuaries; freshwater forms, confined to the larger rivers; esteemed as food. Mullets putrefy very rapidly in hot climates [mullet].——*Mullidæ* (मल्लकुल - mallakula, San.). From (malla, san. the fish). Acanthopterygii, 3. Red mullet or Wood-cock of the seas. Body rather elongate; eyes of moderate size, lateral; mouth in front of snout rather small; sea fish. Many young and some adults have been captured in rivers; excellent as food [mullet].——*Murænidæ* (कुञ्चीयकुल - kuñchíyakula, San.). From (kuñchí, san. eel). Physostomi, 42. Eels [vilaung]. Body elongated, cylindrical, or band-shaped. Eels have by some authors been considered as hermaphrodites [talabone, vilaung]. Very common at Madras. The natives catch them just at the edge of the surf by bruising a crab [nundoo] in their hands and throwing it into the surf, then walking about over the spot and when they feel the eel about their feet, stoop down and suddenly dash it on to the sand with both hands. If placed on the moist sand they burrow themselves, tail foremost, almost instantaneously.——*Myliobatidæ* (समुद्रपिशाचकुल - samudrapisháchakula, San.). From (samudra, san. sea + pishácha, san. devil). Batoidei, plagiostomata, 51. Devil fishes, Eagle rays, Sea devils. Fins are not present on the sides of the head, but appear at the end of the snout [tenky].——*Nandidæ* (नन्दकुल - nandakula, San.). Acanthopterygii, 4. Body oblong and compressed; scales covering the body; some are marine, others freshwater. The colors are liable to variations; carnivorous fishes.——*Notopteridæ* (नितंबपत्रकुल - nitambapatrakula, San.). From (nitamba, san. back + patra, san. wing). Physostomi, 41. Barber's knife [barber vaulay] family. Strange-shaped fishes; body oblong, or more or less elongated and compressed; tail prolonged and tapering; head and body with small scales; fresh and brackish waters [vaulay].——*Ophiocephalidæ* (अहिकपालकुल - ahikapálakula, San.). Means serpent + head. Acanthopterygii, 29. Walking fish [q.v.] family or Snake-headed fishes [doke, murrel, walking fish]. Are found only in the East indies. Are a fresh-water family, and of carnivorous habits. Like the labyrinthici, they are able to exist for a long time out of the water; they afford a light and wholesome but rather insipid diet; they are long in shape, with a large mouth, the head and body being covered with scales; they have long dorsal and anal fins, without any spines, teeth in the jaws, and on the palate. Jugglers exhibit these fishes walking on the land. Some grow to a large size. Rather voracious, but appear to consider a frog [bhaicam], mouse [shoondely], or rat [ely] as luscious a morsel as a fellow fish; keep water pure by destroying either animal or vegetable substances which may come in their way. These fishes may be conveyed long distances alive; inhabit both ponds and rivers; able to change their place of abode by traversing moist pieces of ground between one piece of water and another. Those which inhabit rivers are better flavored than the others which live in sluggish or stagnant water. Some of them bury themselves in the mud, when the waters of the tank or ditches are dried up; and are enabled to live for sometime in a torpid state, till a fresh supply of water calls them into renewed existence.——*Percidæ* (श्यामाकुल - shyámákula, San.). From (shyáma, san. dusky). Acanthopterygii, 1. Perch [bride fish, calavye, caratchy, caripey, caukkan, chandwah, cook up, kitchaun, pyekeely, rock cod, taumbam]. Are carnivorous fishes, and are found in the seas and freshwaters of all parts of the globe. The only representatives of real perch in South indian

freshwaters are small fishes belonging to the genus Ambassis [chandwah]. They are all small fishes, with the body deep and compressed, more or less transparent. The so called Climbing perch, anabas scandens, belongs to the family Labyrinthici [palmyra fish]. The Red perch of the west coast, called Kembairy by the natives, is an estuary fish frequenting the rocks.——*Pleuronectidæ* (पार्श्वप्लवकुल - párshvaplavakula, San.). From (párshva, san. side + plava, san. swimming). Anacanthini, 34. Flat fishes [indian sole]. Common both on Coromandel and Malabar coasts; in last particularly large. Should more correctly be termed deep or thin fishes than flat fish, as they rest on one side, either left or right. They carry both eyes on one side of the head, the right or left side, whichever is uppermost; when young their eyes are placed as in other fish, but become twisted round as they grow larger. The upper side is always dark and the under side light-colored. The Turbot, Brill, and Flounder are English similar fish.——*Polynemidæ* (बहुतन्तुकुल - bahutantukula, San.). From (bahu, san. many + tantu, san. thread); from free thread like appendages below pectoral fin. Acanthopterygii, 11. Body oblong, somewhat compressed; eyes large, lateral, more or less covered by an adipose membrane; mouth on the lower side of a prominent snout and having a lateral cleft [robaul].——*Pristidæ* (क्राकचिककुल - krákachikakula, San.). From (krákachika, san. sawyer). Batoidei, plagiostomata, 48. Saw fishes. Snout much produced, flattened, and having a saw-like appearance. Great injuries are inflicted by these fishes, which strike sideways with their formidable snouts. Large ones have been known to cut a bather entirely in two. Sea fish [soorah].——*Rhinobatidæ* (खरत्वक्कुल - kharatvakkula, San.). From (khara, san. rough + tvak, san. skin). Batoidei, plagiostomata, 49. Tail thickened, moderately elongated, and with a longitudinal fold along either side. Very destructive amongst marine crustacea [kavachiny] and molluscs [chippy]; said to live in large droves. Sea fish [ooloovay].——*Rhynchobdellidæ* (कण्टककुञ्चिकाकुल - kantakakuñchikákula, San.). From (kantaka, san. thorn + kuñchika, san. eel). Acanthopterygii, 24. Spiny eels. Body elongated, eel-shaped; fresh and brackish waters; found far inland and often at great elevations; excellent as food, although owing to their resemblance to eels or snakes [sarpam] some people object to them. They salt well, but their flesh is reputed to be slightly heating [aural].——*Sciænidæ* (घर्घरमत्स्यकुल - ghargharamatsyakula, San.). Means gurgling fish. Acanthopterygii, 12. The Maigre family. This family has several representatives. Some species, such as the Maigre, have the power of producing a drumming or grunting sound beneath the surface of the water. Body somewhat compressed and rather elongate; eyes lateral, of moderate or small size; mouth in front of or below the snout; scales covering the head and snout, placed in oblique and often sinuous rows on the body. Afford isinglass [meen vajram] which is exported to China and elsewhere. As food their flesh is rather tasteless whilst young and coarse when large. Throughout the seas they are numerous, many entering estuaries and rivers [cuttalay].——*Sclerodermidæ* (कठिनत्वक्कुल - kat'hinatvakkula, San.). From (kat'hina, san. hard + tvak, san. skin). Plectognathi, 44. Body compressed or angular; snout somewhat produced; skin rough or spinate; marine fishes [colah, plautchy].——*Scombresocidæ* (उड्डीनमत्स्यकुल - uddínamatsyakula, San.). Means flying fish. Physostomi, 37. Mackerel pike family. Scales present, frequently a keeled row along either side of the free portion of the tail. The genus Exocætus, or Flying-fish, belongs to this family [colah].——*Scombridæ* (चित्रांकमत्स्यकुल chitránkamatsyakula, San.). Means variegated fish. Acanthopterygii, 19. Mackerel family. Are well-known on account of their importance as an article of food. Marine fishes. The family includes the common Mackerel, the Tunny, the Albacore, the Bonito, the Pilot fish, the Remora or Sucking fish, the Seer [q.v.], the John dory, and the Coryphene or dolphin fish [q.v.] of sailors [murrel, seer].——*Scopelidæ* (कूपकीयकुल - kúpakíyakula, San.). From (kúpaka, san. rock). Physostomi, 36. Are deep sea fishes, among them is included Harpodon nehereus, the Bombay duck [bummelo], a well-known article of food on the other coast when dried and smoked. They have an adipose fin but no barbels, and sometimes are covered with scales, entirely, or partially [bummelo].——*Scorpænidæ* (वृश्चिकीयकुल - vrishchikíyakula, San.). From (vrishchika, san. scorpion). Acanthopterygii, 7. Body oblong, compressed or sub-cylindrical; eyes lateral; cleft of mouth lateral; body scaled or scaleless [toomby].——*Scylliidæ* (विनयनपुटमत्स्यकुल - vinayanaputamatsyakula, San.). Means without eyelid. Selachoidei, plagiostomata, 47. Eye without any nictitating membrane; teeth small, several rows being generally in use [soorah]. *Siluridæ* (शृङ्गीयकुल - shringíyakula, San.). From (shringí, san. shad). Physostomi, 35. Cat-fish family [butter fish, gogra, goonch, jella, keliroo, scorpion fish, soorah, vaulay]. The family is a large one, and very numerously represented in s. indian waters. It is, like the carp [kenday] family, essentially a freshwater group of fishes; but some few species belonging to it are also found in salt water keeping however near the coast. Many are credited with causing poisonous wounds; in which respect they may be divided into two classes, those in which the

wounds are of a distinctly venomous description, and those in which their jagged spines occasion intense inflammation often of a dangerous character. They are eaten by the poorer classes. They are forbidden to Jews and Mahomedans. They are very foul feeders. The Siluridæ family are to be distinguished chiefly by the absence of scales; but they have sometimes bony plates on certain parts of the body. They are provided with barbels, often of great length, and generally numerous. They have frequently a second dorsal fin which is gristly, or adipose, and without rays, and their mouths are furnished with teeth, which however, vary much in form and disposition.——*Sparidæ* (नासाग्रास्यमत्स्यकुल - náságrásyamatsyakula, San.). Means nose + front + mouthed. Acanthopterygii, 5. Sea-breams. Body oblong and compressed; eyes of moderate size, lateral; mouth in front of snout. Sea fish; some entering fresh waters [rock cod].——*Sphyrænidæ* (मौद्गरीयकुल - maudgaríyakula, San.). From (mudgara, san. hammer). Acanthopterygii, 25. Body elongated, sub-cylindrical; eyes lateral; carnivorous fishes; not much esteemed for the table [jella].——*Squamipinnidæ* (शल्कवाजकुल - shalkavájakula, San.). From (shalka, san. scale + vája, san. fin). Acanthopterygii, 2. Scaly finned fish family. Body elevated and compressed; eyes lateral and of moderate size; mouth generally small, with a lateral cleft and situated in front of snout; are, as a rule, marine. This family consists mostly of bright-colored fishes, with bodies very deep in comparison to their length and very narrow with small mouths. It is distinguished by the scales extending over a large portion of the dorsal and anal fins.——*Stromateidæ* (बहुवर्णकुल - bahuvarnakula, San.). From (bahu, san. many + varna, san. color). Acanthopterygii, 17. Body oblong or slightly elongated and compressed; eyes lateral; sea fish [pomfret].——*Syngnathidæ* (हनुमत्कुल - hanumatkula, San.). From (hanu, san. jaw). Lophobranchii, 43. Gill-openings small, round [whip fish].——*Teuthididæ* (विदरीमुखमत्स्यकुल - vidarímukhamatsyakula, San.). Means cleft-mouth. Acanthopterygii, 8. Body oval and strongly compressed; eyes of moderate size, lateral; mouth slightly cleft.——*Trachinidæ* (परुषकुल - parushakula, San.). Means rough. Acanthopterygii, 21. Body more or less elongated, posteriorly compressed; head often large; eyes more or less lateral. Body scaleless, scaled, or with a single series of plate-like scales. The fishes of this family are generally of a long shape and inhabit salt water [varawa].——*Trichiuridæ* (रोमवालकुल - rómaválaku, San.). Means hairy tail. Acanthopterygii, 14. Hair-tails [moorman's vaulay]. Body elongated and compressed. Along the coasts of India esteemed mostly, because being thin or ribbon-shaped they can be dried without salting. Afford very delicate eating when fresh though never brought to the table of Europeans [vaulay].——*Trygonidæ* (शंकुवालकुल - shankuválakula, San.). From (shanku, san. sting + vála, san. tail). Batoidei, plagiostomata, 50. Electric rays; tail long and slender without any lateral folds; the forms with armed tails occasion exceedingly dangerous injuries; sea fish [tenky]. Skates and rays [tenky] generally exist in enormous numbers in these seas, where they attain to a great size, and some are dreaded by fishermen because of the wounds inflicted by their caudal spines, while others cause great injury to the oysters [auly]. Skates are gregarious. Rays lie concealed in the sand, and are able to suddenly oncircle fish or prey swimming above them with their long whip-like tails, and then wound them with their serrated tail spine. Their skins were formerly valuable as shagreen, being considered superior to those of sharks [soorah], owing to the scales being of somewhat larger dimensions. Irrespective of being employed for shagreen, they are occasionally used as rasps or sand-paper, to give the first surface to wood or horn [sing] which it is desired to polish. Their fins are exported along with those of the sharks to China, where they are used for soups, while from their livers an oil [malabar oil, yennay] is extracted. The thin horny cases, inside which are the fœtal rays, are more square in form and comparatively smaller than what are observed among the sharks. Many of these cases are square, with a horn-like projection from each corner.——*Xiphiidæ* (खड्गमत्स्यकुल - khadgamatsyakula, San.). From (khadga, san. sword + matsya, san. fish). Acanthopterygii, 13. Sword fish. Sea fish. Eyes lateral; body compressed; upper jaws produced into a long, sword-shaped process. Sword-fishes [macaram] are known to occasionally attack vessels [peacock fish].——**(4)** The following is a list of the principal geners contained:— alphabetically arranged, with the family in which Ailia, Acanthurus, acanthuridæ, 15; Ætobatis, myliobatidæ, 51; Ailia, siluridæ, 35; Ambassis, percidæ, 1; Amblypharyngodon, cyprinidæ, 39; Amphisile, centriscidæ, 28; Anabas, labyrinthidæ, 30; Anacanthus, sclerodermidæ, 44; Anguilla, murænidæ, 42; Apistus, scorpænidæ, 7; Apocryptes, gobiidæ, 23; Aspidoparia, cyprinidæ, 39; Badis, nandidæ, 4; Bagarius, siluridæ, 35; Balistes, sclerodermidæ, 44; Barbus, cyprinidæ, 39; Barilius, cyprinidæ, 39; Belone, scombresocidæ, 37; Callichrous, siluridæ, 35; Caranx, carangidæ, 16; Carcharias, carchariidæ, 46; Catla, cyprinidæ, 39; Ceratoptera, myliobatidæ, 51; Chanos, clupeidæ, 40; Chorinemus, carangidæ, 16; Chatœssus, clupeidæ, 40; Chela, cyprinidæ, 39; Chiloscyllium, scyllidæ, 47; Chrysophrys, sparidæ, 5; Cirrhina, cyprinidæ, 39; Cirrhitichthys, cirrhitidæ, 6; Clarias, siluridæ, 35; Clupea, clupeidæ, 40; Coilia, clupeidæ, 40; Coryphæna, coryphænidæ, 18; Cossyphus,

labridæ, 32; Cybium, scombridæ, 19; Cynoglossus, pleuronectidæ, 34; Danio, cyprinidæ, 39; Dicerobatis, myliobatidæ, 51; Diodon, gymnodontidæ, 45; Discognathus, cyprinidæ, 39; Doryichthys, syngnathidæ, 43; Drepane, squamipinnidæ, 2; Dussumieria, clupeidæ, 40; Echeneis, scombridæ, 19; Elacate, scombridæ, 19; Eleotris, gobiidæ, 23; Elops, clupeidæ, 40, Engraulis, clupeidæ, 40; Ephippus, squamipinnidæ, 2; Equula, carangidæ, 16; Etroplus, chromidæ, 33; Exocætus, scombresocidæ, 37; Fistularia, aulostomateidæ, 27; Galeocerdo, carchariidæ, 46; Gerres, percidæ, 1; Glyphidodon, glyphidodontidæ, 31; Gobioides, gobiidæ, 23; Gobius, gobiidæ, 23; Haplochilus, cyprinodontidæ, 38; Harpodon, scopelidæ, 36; Hemiramphus, scombresocidæ, 37; Heniochus, squamipinnidæ, 2; Hippocampus, syngnathidæ, 43; Histiophorus, xiphiidæ, 13; Holacanthus, squamipinnidæ, 2; Holocentrum, berycidæ, 9; Homaloptera, cyprinidæ, 39; Ichthyocampus, syngnathidæ, 43; Ichthyscopus, uranoscopeaæ, 20; Jerdonia, cyprinidæ, 39; Kurtus, kurtidæ, 10; Labeo, cyprinidæ, 39; Lactarius, carangidæ, 16; Lates, percidæ, 1; Lepidocephalichthys, cyprinidæ, 39; Lethrinus, sparidæ, 5; Lobotes, percidæ, 1; Lutjanus, percidæ, 1; Macrones, siluridæ, 35; Mastacembelus, rhynchobdellidæ, 24; Megalops, clupeidæ, 40; Mene, coryphænidæ, 18; Minous, scorpænidæ, 7; Monacanthes, sclerodermidæ, 44; Mugil, mugilidæ, 26; Muræna, murænidæ, 42; Murænesox, murænidæ, 42; Mustelus, carchariidæ, 46; Myliobatis, myliobatidæ, 51; Myripristis, berycidæ, 9; Nandus, nanaidæ, 4; Nemacheilus, cyprinidæ, 39; Notopterus, notopteridæ, 41; Nuria, cyprinidæ, 39; Ophiocephalus, ophiocephalidæ, 29; Osphromenus, labyrinthidæ, 30; Osteogeniosus, siluridæ, 35; Ostracion, sclerodermidæ, 44; Otolithus, sciænidæ, 12; Pagrus, sparidæ, 5; Pangasius, siluridæ, 35; Pellona, clupeidæ, 40; Pempheris, kurtidæ, 10; Pimelepterus, sparidæ, 5; Plagusia, pleuronectidæ, 34; Platax carangidæ, 16; Platycephalus, cottidæ, 22; Platyglossus, labridæ, 32; Plotosus, siluridæ, 35; Polyacanthus, labyrinthidæ, 30; Polynemus, polynemidæ, 11; Pristipoma, percidæ, 1; Pristis, pristidæ, 48; Psettus, carangidæ, 16; Pseudeutropius, siluridæ, 35; Pseudoscarus, labridæ, 32; Pterois, scorpænidæ, 7; Pteroplatea, trygonidæ, 50; Rasbora, cyprinidæ, 39; Rhinobatus, rhinobatidæ, 49; Rhinoptera, myliobatidæ, 51; Rhynchobatus, rhinobatidæ, 49; Rhynchobdella, rhynchobdellidæ, 24; Rita, siluridæ, 35; Rohtee, cyprinidæ, 39; Saccobranchus, siluridæ, 35; Saurida, scopelidæ, 36; Scatophagus, squamipinnidæ, 2; Sciæna, sciænidæ, 12; Sciænoides, sciænidæ, 12; Scolopsis, percidæ, 1; Scomber, scombridæ, 19; Seriolichthys, carangidæ, 16; Serranus, percidæ, 1; Sillago, trachinidæ, 21; Silundia, siluridæ, 35; Silurus, siluridæ, 35; Sphyræna, sphyrænidæ, 25; Stegostoma, scylliidæ, 47; Stromateus, stromateidæ, 17; Synagris, percidæ, 1; Syngnathus, syngnathidæ, 43; Tetrodon, gymnodontidæ, 45; Teuthis, teuthididæ, 8; Therepon, percidæ, 1; Thynnichthys, cyprinidæ, 39; Thynnus, scombridæ, 19; Trachynotus, carangidæ, 16; Triacanthus, sclerodermidæ, 44; Trichiurus, trichuiridæ, 14; Trichogaster, labyrinthidæ, 30; Trygon, trygonidæ, 50; Trypauchen, gobiidæ, 23; Umbrina, sciænidæ, 12; Upeneus, mullidæ, 3; Urogymnus trygonidæ, 50; Wallago, siluridæ, 35; Zygæna, carchariidæ, 46.——**(5)** Title heads in this glossary cover each genus, and contained species, clearly known to be distinguished by the natives. When all the aliases are taken into account, the majority of known S. indian fishes have attached to them a generic or specific name derived from the vernaculars. These are however chiefly from the Bengalee aud the Marhatta, the observers having been residents of the more northern provinces. Further-more in the case of those scientific terms which can be connected with the S. indian vernaculars, the terms themselves, borrowed as they have been from a fisherman's patois, are so corrupt as to be almost beyond recognition. On these two grounds the number of fish items may be found comparatively inconsiderable.——**(6)** For insects see Poochy; for batrachians see Bhaicam; for reptiles see Sarpy; for birds see Pacshy; for mammals see Sastanam. A general conspectus of the fauna [jantoo] of s. india was given in vol. II, appendix IV.——**(7)** *Matsya avatar* (मत्स्य - matsya, San.). From (mad, san. to rejoice); the gay one. The first or fish avatar [q.v.] of Vishnoo [q.v.]. Statements concerning it appear in the Matsya, Bhagavat, and Agny pooraunams [q.v.]; in the Narayana oopanishad; and in the Mahabhaurat [q.v.]. The substance as taken from South indian literature is that in a time of great wickedness Satyavratan [q.v.] was doing penance in the Dravida [q.v.] country; that he took up a small fish in his water vessel which increasing in bulk he put it into another; that after constant increase of bulk in different vessels he transferred it to the ocean; that it then announced to him an approaching great flood, and warned him to take refuge with his wife and the seven rishies [q.v.] and their wives, in a machine to be provided, directing him also to take pairs of all living things with necessary provision of food; that soon after torrents began to pour down, and the sea began to swell, when a vessel appeared floating on the waves, into which Satyavratan entered accompanied as above; that when the deluge had ceased, the god who had accompanied and towed the vessel in his fish-like form appointed Satyavratan, the seventh Menoo [q.v.], by name of Veivaswatan [q.v.] child of the sun, whence the solar line of kings [soorya vamsham]. The correspondence with the Noachian deluge is very exact [matam].

MATTAM (മട്ടം - mattam, *Mal.*). Level.——*Matagherry* (ಮಟ್ಟಗಿರಿ - mattagiri, Can. matigiri *). From (matta, can. flat + kere, can. bund). Town; Salem dist., Oossoor tal.; pop. 782; acres 1,048; lat. 12° 42′; long. 77° 51′; from Oossoor S.S.W. 3 miles; from Salem N.N.W. 75 miles. The Government Remount depôt was removed here from Coongal in 1828. All indents for horses for the cavalry and artillery in the presidency are supplied from here. Weekly fair with much traffic especially in oil and garden produce.——*Mattancherry* (മട്ടാഞ്ചേരി - mattáñchéri, Mal.). From (mattam, mal. level + chéri, mal. village). Village, Cochin state; pop. 3,987; lat. 9° 57′; long. 76° 17′; from Ernacolum W.S.W. 3 miles; from the sea E. ¼ mile. Suburb of Cochin. The Rajah has a palace used on state occasions. Immediately adjoining the palace is the synagogue of the Jews [jonaca], with a belfry, with rude clock more than 200 years old. The floor of the synagogue is paved with neat porcelain [kaolin] tiles [wode].——*Mattigay* (மட்டிகை - mattigai, Tam.). From (matti, tam. to affix). Seal impressed on cow-dung [shauny], &c., and put upon a heap of rice-corn in the threshing floor [calam], or upon sacks.

MAU (मा - má, *San.*). To measure, form, make.——*Macaram* (मकर - makara, San.). From (máyá, san. illusion + kri, san. to do). A monster in dolphin [cadal pundry, punrimeen] form, perhaps derived from the whalebone whale [timingilam]. Also called Asita damshtram or black-teethed, and Jala roopam or water formed. It is the vauhan [q.v.] or vehicle of Varoonan [q.v.], the god of the ocean, and is on the banner of Manmatan [q.v.], god of love. Also the tenth sign [raushy] of the solar zodiac [raushy chuckram] corresponding to Capricorn ♑. Winter solstice or oottarauyanam [q.v] occurs at present when the sun [sooryan] enters this sign. The macaram is represented in sculpture with the head and forelegs of an antelope [jinka] and the body and tail of a fish [matsyam]. As a modern term is the sword fish family xiphiidæ [matsyam, 13], of naturalists. ——*Macara sancramanam* (మకరసంక్రమణము - makarasankramanamu, Tel.). Means the tenth sign of zodiac + passage; entrance of the sun [sooryan] into macaram about the 12th of january when the pongal [q.v.] feast is observed, a solar [maunan.] festival [pundigay, 2a]. Otherwise Macara sancraunty. The period from this day till the arrival of the sun at the N. point [carcatacam] of the zodiac [raushy chuckram], or oottarauyanam [q.v.] is lucky and from that time till he returns to Macăram or Dacshinauyanam [q.v]. is unlucky [jyotisham, maryanday, mausam].——*Maderpauk* (மாதர்ப்பாக்கம் - mátharppákkam, Tam.). From (máthu, tam. woman + pákkam, tam. village).—"*a*" Sub-magistracy, North arcot district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; North arcot dist., Calastry zemindarry, Maderpauk division; pop. 636; lat. 13° 27′; long. 80° 03′; from Arnee N.E. 72 miles; from Calastry S.E. 30 miles; from Chittore E.N.E. 64 miles; from Madras N.W. 31 miles; from Ranipett N.E. 59 miles; from Tripatty E.S.E. 42 miles; from Vellore E.N.E. 70 miles. 3 miles from Suttivaid in Chingleput district. Rude stone implements have been found. A great many Jendravar [q.v.] live here and export cloths to Madras.——*Mah* (मा - má, San.; ماه - máh, Pers.). Means measurer. Moon [cumr]. Month [maheena].——*Maheena* (مهينا - mahíná, Hind.). See sep. title.——*Mahtaub* (ماهتاب - máhtáb, Hind.). From (máh, pers. moon + táb, pers. splendour). Fireworks. Bengal light [baunam]. ——*Mahwar* (مهوار - mahwár, Hind.). Monthly [maugwar].

——*Mauchicoy* (मायाफल - máyáp'hala, San.; عفص - afs, Ar.; مازو - mázú, Pers.; ماپهل - máphal, Hind.; ماجو پهل - májúphal, Dec.; ಮಾಚಿಕಾಯಿ - máchikáyi, Can.; మాచికాయ - máchikáya, Tel.; മാചിക്ക - máchikka, Mal.; மாச்சக்காய் - máççakkáy, Tam.). San. from (máyá, san. illusion + p'hala, san. fruit); unreal fruit. Drav. from sanscrit through hindostany (májúphal). Galls. Gallæ chinenses and Gallæ japonicæ of chemists. Spherical concretions and other tubercular excrescences, made by the puncture of female gall flies, provided with ovipositors, by means of which they pierce bark or leaves of trees with a view of having a nidus for their ova, causing an unnatural growth that becomes a gall and contains the pupa of the future insect. If the insect has escaped they are yellow and inferior, and are called white galls. Oak galls are from the dyer's oak [q.v.], quercus infectoria, oliv. Tamarix galls are from the indian tamarix, tamarix gallica, linn. [manna jhow]; these are small. Terminalia galls are from the myrobalan [q.v.] trees; chiefly from leaves and twigs of terminalia chebula, retz. [chebulic myrobalan]. In veterinary practice, for cancer and thrush, take finely powdered galls, rub over the part with a spatula, dropping lime [q.v.] juice while rubbing. Galls are used in dyeing, ink-making, &c. [cauram, chamrah, mashy, myrobalan, shauyam, shye]. Compare:—Ophiorrhiza mungos, malayan earth gall; Quercus infectoria, oak galls; Quercus robur, oak galls; Rhus succedania, sumach galls; Tamarix articulata, atlee galls; Tamarix gallica, indian tamarix galls. See gloss. paragraphs [moy].——*Maudicoty* (ಮಾಡಿಕೋತಿ - mádikóti, Can.). From (mádi, can. female + kóti, can. monkey). Hill-tribe female proper name [peyar].——*Maudry* (ಮಾದ್ರಿ - mádri, Can.; మాదిరి - mádiri, Tel.; மாதிரி - máthiri, Tam.). A pattern [muster].

——*Maudy* (ಮಾಡಿ - mádi, Can.). Means a female. Hill-tribe female proper name [peyar].——*Maugwar* (مهوار - mahwár, Hind.). From (máh, pers. month). Month by month [mahwar].——*Maujoo* (ماجو - májú, Hind.). Means mother's soul. In composition makes a lacab; as Maujoo bee, soul of mother [ism]. Cf. Mah.——*Maulaty* (మాలతి - málati, Tel.). Means jasmine flower. Tel. also (késaripalli), meaning lion + village. Village, Hill; Ganjam dist., Goomsoor tal.; pop. 387; acres 485; lat. 19° 44′; long. 80° 40′; from Chetterpore N.W. 36 miles; from Russellcondah S. 15 miles. Ancient village 4 miles from Gungoopooram. Old fort at the foot of the hill. Gold coins and fragments of golden images have been found. On the hill is a lamp carved in stone which holds 250 seers [q.v.] of oil. The oil-pan is turned upside down and set on the stone pedestal of the lamp. Old temple excavated from the foot of the hill. The image of Sooryanarrain moorty, the sun-god, was carried to Boogoodah, where it was consecrated in a new temple built in its honor in the shape of the sun-car [rath]. In former times a Kesary rajah lived here, and carved stones and unusually large bricks [shengal] are shown on the hill. Several images, probably either Jeina [q.v.] or Booddhist [booddha] have been removed from the hill. Trig. station in lat. 19° 44′ 54·35″; long. 84° 39′ 35·97″; height 1,719 feet; from Kesarpully W.N.W. 4 miles; from Gungoopooram S. 3 miles; from Russellcondah S. 13 miles; on Aska Russellcondah road.——*Maulay* (माला - málá, San.; مالا - málá, Hind.; ಸರ - sara, Can.; దండ - danda, Tel.; മാല - mála, Mal.; தாழ்வடம் - tázhvadam, Tam.). From (má, san. to arrange). Tam. from (tázh, tam. to hang down + vadam, tam. string). Necklace. These are made of various seeds; as of:—Elæocarpus ganitrus, roxb. [roodrauck], Leucæna glauca, benth. [large chakondah], Nelumbium speciosum, willd. [nelumbo], &c. Also of wood of toolsy, Ocimum sanctum, linn. [common toolsy]. Also of pearls [moty], corals [moongah], gold beads [munkah], &c. Maulay means also a group, series, vocabulary [acarauthy] dictionary [nigantoo]. Also a kind of elegy consisting of couplets. For the inam called maulaiyeed see under Inam.——*Maulee* (आरामिक - árámika, San.; مالی - málí, Hind.; ತೋಟದವ - tótadava, Can.; తోటవాడు - tótavádu, Tel.; തോട്ടക്കാരൻ - tóttakkáran, Mal.; தோட்டக்காரன் - tóttakkáran, Tam.). Anglo-indian for a gardener. The following are two key-lists of the garden trees and plants of s. india for which vernacular equivalents are with certainty known; further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Achras sapota, sapodilla; Adansonia digitata, baobab; Ægle marmelos, bael; Albizzia lebbek, common sirissa; Albizzia odoratissima, fragrant sirissa; Alpinia nutans, nodding galangal; Amarantus caudatus, red stem spinach; Amarantus gangeticus, garden spinach; Amoora rohituka, rohitacam; Anacardium occidentale, cashew; Anona muricata, sour sop; Anona reticulata, bullock's heart; Anona squamosa, sweet sop; Areca catechu, areca; Argemone mexicana, mexican poppy; Artabotrys odoratissimus, foreign champak; Artocarpus incisa, ratadel; Artocarpus integrifolia, bread-fruit; Bauhinia variegata, variegated mountain ebony; Beta vulgaris, indian beet; Bombax malabaricum, red-cotton tree; Boswellia serrata, yellow dammer; Butea frondosa, bengal kino; Calophyllum inophyllum, common poon; Camellia theifera, tea; Canavalia ensiformis, hussar bean; Capsicum frutescens, shrubby chilly; Capsicum grossum, caffrie chilly; Capsicum minimum, bird's eye chilly; Cardiospermum halicacabum, balloon vine; Caryota urens, bastard sago palm; Cassia fistula, indian laburnum; Cassia siamea, sumatra senna; Cedrela toona, toon; Celosia cristata, cock's comb; Chickrassia tabularis, chickrassy; Chloroxylon swietenia, satin-wood; Citrus aurantium, var. aurantium proper, sweet orange; Citrus decumana, pummelow; Citrus medica, var. acida, sour lime; Citrus medica, var. limetta, sweet lime; Cocos nucifera, cocoanut; Coffea arabica, coffee; Coleus aromaticus, country borage; Corchorus olitorius, wild jute; Costus speciosus, arabian costus; Cryptostegia grandiflora, paulay silk cotton; Cupressus sempervirens, cypress; Curcuma longa, turmeric; Cynodon dactylon, hurrially; Dalbergia sissoo, sissoo; Delphinium ajacis, lark spur; Dillenia indica, chaltah; Dodonæa viscosa, bog-myrtle; Eriobotrya japonica, loquat; Eriodendron anfractuosum, silk cotton; Eugenia jambolana, common jaumoon; Feronia elephantum, wood-apple; Ficus carica, european fig tree; Filicium decipiens, pehimbia; Garcinia indica, mate mangosteen; Gardenia florida, cape jasmine; Gardenia lucida, decamallee; Garuga pinnata, garooga; Gomphrena globosa, bachelor's buttons; Graptophyllum hortense, face plant; Grewia asiatica, falsah; Helianthus annuus, sun flower; Hibiscus esculentus, common bendy; Hibiscus mutabilis, lotus bendy; Hibiscus rosa-sinensis, china rose bendy; Hibiscus sabdariffa, red-hemp bendy; Hibiscus syriacus, thorny-hemp bendy; Hibiscus tiliaceus, cork-wood bendy; Ipomæa batatas, sweet potato; Ipomæa quamoclit, indian pink; Ixora coccinea, flame of the woods; Jatropha multifida, small physic nut; Lagerstrœmia indica, china privet; Lawsonia alba, henna plant; Linum usitatissimum, flax; Lobelia nicotianæfolia, wild tobacco; Lycopersicum esculentum, tomato; Mangifera indica, mango; Melia azadirachta, margosa; Melia azedarach, large neem; Meriandra bengalensis, bengal sage; Mesua ferrea, nauga champak; Methonica superba, wild bachnaug; Michelia champaca, champak; Millingtonia hortensis, indian cork; Mimusops elengi, ilanjy; Mirabilis jalapa, false jalap; Murraya exotica, andaman satin-wood; Musa paradisiaca, plantain; Musa superba, wild plantain; Myrtus communis, common myrtle; Nelumbium speciosum, sacred lotus; Nephelium litchi, litchy; Nephelium longana, longan; Nerium odorum, oleander; Nyctanthes arbor-tristis, coral jasmine; Nymphæa lotus, red indian water-lily; Nymphæa stellata, blue indian water-lily; Ocimum basilicum, sweet basil; Ocimum sanctum, holy basil; Papaver somniferum, opium poppy; Parkia biglandulosa, nitta; Phœnix acaulis, stemless date; Phœnix dactylifera, arabian date; Physalis peruviana, indian winter cherry; Plumeria acutifolia, pagoda tree; Pogostemon patchouli, patchouli; Poinciana regia, indian poinciana; Polyalthia longifolia, ashocam; Portulaca oleracea, indian purslane; Prunus persica, peach; Psidium guyava, red guava; Pterospermum acerifolium, maple-leaved pterospermum; Pterospermum suberifolium, velanga; Punica granatum, pomegranate; Pyrus malus, apple; Ricinus communis, castor oil; Saccharum procerum, wild sugar-cane; Saraca indica, bengal ashocam; Sesbania grandiflora, west-indian sesban; Solanum melongena, brinjaul; Solanum tuberosum, potato; Soymida febrifuga, rohan tree; Tabernæmontana coronaria, adam's apple; Tabernæmontana dichotoma, eve's apple; Tamarindus indica, tamarind; Terminalia catappa, country almond; Thespesia populnea, portia; Thymus vulgaris, thyme; Viola odorata, violet; Vitis vinifera, grape vine; Zingiber officinale, ginger.—"*b*" Adam's apple, tabernæmontana; Almond, terminalia; Apple, pyrus; Ashocam, polyalthia, saraca; Bachelor's buttons, gomphrena; Bachnaug, methonica; Bael, ægle; Balloon vine, cardiospermum; Baobab, adansonia; Basil, ocimum; Beet, beta; Bendy, hibiscus; Bog myrtle, dodonia; Borage, coleus; Bread-fruit, artocarpus; Brinjaul, solanum; Bullock's heart, anona; Cape jasmine, gardenia; Cashew, anacardium; Castor oil, ricinus; Chaltah, dillenia; Champak, artabotrys, mesua, michelia; Chickrassy, chickrassia; Chilly, capsicum; Cock's comb, celosia; Cocoanut, cocos; Coffee, coffea; Cork, millingtonia; Cypress, cupressus; Dammer, boswellia; Date, phœnix; Decamallee, gardenia; Eve's apple, tabernæmontana; Face plant, graptophyllum; Falsah, grewia; Fig, ficus; Flame of the woods, ixora; Flax, linum; Galangal, alpinia; Garooga, garuga; Ginger, zingiber; Guava, psidium; Henna, lawsonia; Hurrially, cynodon; Hussar bean, canavalia; Ilanjy, mimusops; Jalap, mirabilis; Jasmine, nyctanthes; Jaumoon, eugenia; Jute, corchorus; Kino, butea; Laburnum, cassia; Larkspur, delphinium; Lime, citrus; Litchy, nephelium; Longan, nephelium; Loquat, eriobotrya; Lotus, nelumbium; Mango, mangifera; Mangosteen, garcinia; Margosa, melia; Mexican poppy, argemone; Mountain ebony, bauhinia; Myrtle, myrtus; Neem, melia; Nitta, parkia; Oleander, nerium; Orange, citrus; Pagoda tree, plumeria; Patchouli, pogostemon; Peach, prunus; Pehimbia, filicium; Physic nut, jatropha; Pink, ipomæa; Plantain, musa; Pomegranate, punica; Poon, calophyllum; Poppy, papaver; Portia, thespesia; Privet, lagerstrœmia; Pummelow, citrus; Purslane, portulaca; Ratadel, artocarpus; Red cotton, bombax; Rohan, soymida; Rohitacam, amoora; Sage, meriandra; Sago palm, caryota; Sapodilla, achras; Satin-wood, chloroxylon, murraya; Senna, cassia; Sesban, sesbania; Silk cotton, cryptostegia, eriodendron; Sirissa, albizzia; Sissoo, dalbergia; Sour sop, anona; Spinach, amarantus; Sugar-cane, saccharum; Sun-flower, helianthus; Sweet potato, ipomæa; Sweet sop, anona; Tamarind, tamarindus; Tea, camellia; Thyme, thymus; Tobacco, lobelia; Tomato, lycopersicum; Toon, cedrela; Turmeric, curcuma; Velanga, pterospermum; Vine, vitis; Violet, viola; Water-lily, nymphæa; Winter-cherry, physalis; Wood-apple, feronia.——*Mauligay* (मालिका - máliká, San.; മാളിക - málika, Mal.; மாளிகை - máligai, Tam.). Buildings arranged as flowers are in a garland. Palace.——*Mauliny* (मालिनी - máliní, San.). Bhadra cauly [q.v.]; the garland wearer.——*Maulipooram* (മാലിപ്പുറം - málippuram, Mal.). From (máli, mal. coir net + pura, mal. house). Village, Port; Cochin state, Cochin tal.; pop. 316; lat. 10°; long. 76° 17′; from Bombay S.S.E. 660 miles; from Cochin N. 2 miles; from Ernacolum W. 3 miles; from Naracal S. 3 miles. Small port between British Cochin and Naracal, to which pertains a flagstaff of the Cochin native state. Used in fine weather by native craft.——*Mauly* (మాలి - máli, Tel.). From (mála, san. garland). A class of Poojarries [q.v.] in Ganjam. See sep. title.——*Maunam* (मान - mána, San.). Measure.——*Maunasauram* (मानसार - mánasára, San.). From (mána, san. measure + sára, san. essence). The essence of proportion. Ancient Sanscrit treatise on the building of sacred edifices, of great celebrity in S. india. The first chapter treats of the measures [alavay] used in architecture, sculpture, carpentry, &c. The second describes the qualification of a Shilpy [q.v.], and gives a brief account of the origin of the five different classes of artists said to have been descended from Vishwacarman and to have followed respectively the occupations of sculptors, joiners, braziers, jewellers, and blacksmiths [punchaula]. The third, fourth, and fifth chapters explain the nature and qualities of the soil [desham, munn] on which buildings should be erected; such as temples, palaces, and private dwelling-houses for the several classes of people. The sixth contains directions for constructing

a gnomon [shunk], for the purpose of determining the several points of the compass [ashtadic]. The seventh treats of the parts into which the ground plan of the cities, towns, temples, palaces and houses should be divided. The eighth chapter gives a minute description of sacrifices and other devotional rites to be performed on various occasions in the building of temples, houses, &c. The ninth chapter treats of villages and towns, and prescribes rules for the formation of streets [veety], and the allotment of fit places for the erection of temples, and for the residence of the different classes of people [oor, veed]. The tenth contains a description of the different sorts of cities. The eleventh treats of the dimensions of the several sorts of edifices; the twelfth of the garbha vinyausam or laying the foundation-stone in the centre of the intended building; the thirteenth of oopapeetam or pedestals; the fourteenth of adhishtaunam [q.v.] or basements; the fifteenth of the several species of pillars [stambham], with their respective dimensions; the sixteenth of prastaram [q.v.] or entablature; the seventeenth of the junction of the several parts of timber work with reference to their points; the eighteenth of vimaunams [q.v.], temples, or palaces in general. Twelve successive chapters, from the nineteenth to the twenty-eighth, contain descriptions of temples surmounted by pyramidal domes, consisting of from one to twelve storeys, with their respective dimensions. The twenty-ninth chapter treats of praucaurams [q.v.] or outer courts of temples; the thirtieth of the attendant deities, and the parts respectively assigned to each within the walls of the temple; the thirty-first of gopoorams [q.v.] or pyramidal buildings raised over the gateways leading into temples; the thirty-second of mantapams [q.v.] or porticos, or resting places for the deity; the thirty-third of shaulays [q.v.] or halls; the thirty-fourth of cities; the thirty-fifth of private dwelling-houses; the thirty-sixth and thirty-seventh of gates and doorways, with their dimensions; the thirty-eighth and thirty-ninth of the palaces and their appendages; the fortieth of princes with their titles; the forty-first of the building of cars [rath] and other vehicles [vauhan] of the gods; the forty-second of couches, cushions, and the like; the forty-third of the thrones [simhausanam] for the gods and for princes; the forty-fourth of ornamental arches [toranam]; the forty-fifth of the calpa taroo [calpacam] or the all-productive tree, which is planted in Indra's heaven and supplies all the wants of those who take shelter under it. The forty-sixth chapter treats of abhishaicams [q.v.] or ablutionary rites, by which images are sanctified; the forty-seventh of jewels and ornaments worn by the gods and mortals; the forty-eighth of statues [vigraham] of Bramha [q.v.] and other deities; the forty-ninth of the lingam [q.v.], the emblem of Shiva [q.v.]; the fiftieth of seats and forms raised for the reception of images; the fifty-first of the form of Shacty [q.v.], the goddess of nature; the fifty-second and fifty-third of the images worshipped by the Booddhists [booddha] and Jeinas [q.v.]. The fifty-fourth describes the statues of Yacshans [q.v.], Vidhyaudharans, and other choristers; the fifty-fifth those of the saints or holy men; and the fifty-sixth and fifty-seventh those of the Devas [q.v.] or gods, with their respective vehicles. The fifty-eighth concludes with rules for chiselling the eyes of a statue and the ceremonies to be performed on the occasion. A stapaty, architect; a sootra grauhy, measurer; a vardhaky, joiner; and tutchan, carpenter; are indispensably necessary to the building of an edifice. Among other moral qualities enumerated as requisite in the architect is "sincerity." The Hindoo orders consist of four principal parts: the oopapeetam or pedestal, the adhishtaunam or base, the stambham or pillar, and the prastaram or entablature. The writers invariably treat of a pedestal and base as separate bodies, as they are sometimes employed without pillars. The parts of the orders are compared to the several parts of the human body [shareeram]. The difference in the orders consists chiefly in the proportion between the thickness and height of pillars. The columns are diminished gradually in their diameter from the base to the summit of the shaft. The general rules adopted by the architects, in this respect, is that the thickness at the bottom, being divided into as many parts as there are diameters in the whole height of the column, one of these parts is invariably diminished at the top. The plan of the columns admits of every shape, and is frequently found in the quadrangular and octangular form, and richly adorned with sculptured ornaments. The capitals are varied at pleasure, though not without regard to the diameter and length of the shaft. The entablature of the order admits of little variety. The massiveness of the entablature offers a striking contrast to the lightness of the Grecian. Various examples are to be met with in which human figures, as well as representations of animals, are employed in relief in the sides of pillars in temples and porticos. Compare the Greek Atlantes and Caryatides [coil, pagoda, staupatyam].——*Maund* (من - man, Hind.; మణుగు - manugu, Tel.; மணங்கு - manangu, Tam.). Title is the old english word for basket, applied by corruption as an equivalent of the hindostany munn. Hind. from (mána, san. measure); Drav. from (manaka, san. measure). Compare the Hebrew maneh, the Greek μνᾶ, and the Roman mina.—"*a*" A measure of weight, and principal standard thereof. 8 visses = 1 maund; 20 maunds = 1 bhauram or candy [niray, 2 a, b, c, e]. Approximate actual value, 1 maund = 960 tolahs or 25 lbs. avoir. Used in every district except Malabar, Trichinopoly, and Tinnevelly. In Bellary it is 25 lbs. 14 oz. 12 drs. avoir. in South canara 28 lbs. 12 oz. 12⅔ drs. avoir., in South Arcot 25 lbs. 11 oz. 6⅑ drs. avoir., and in every other district 25 lbs. avoir.—"*b*" The above is usually called the Madras maund. The Indian maund consists of 40 seers of 80 tolahs each and is equal to 82⅝ lbs. 27 Indian maunds are equal to a ton. Used on railways. Bombay maund is 28 lbs. That of Surat 41 lbs. The smallest Indian maund is that of Colachel in Travancore and = 18 lbs. 12 oz. 13 drs.—"*c*" Compare Toolaum. See vol. I, 609; II, 505-519.——*Maunica* (మానిక - mánika, Tel.). From (má, san. to measure).—"*a*" Liquid measure. 2 coodavams = 1 maunica; 2 maunicas = 1 prasta [alavay, 4b]. Approximate actual value, 1 maunica = 52½ cubic inches. Obsolete. Same as San. sharauvam.—"*b*" Measure of capacity. 2 tavvas = 1 maunica; 4 maunicas = 1 cooncham [alavay, 3b]. Approximate actual value, 1 maunica = 140 cubic inches, but very variable. Used in Vizagapatam, Kistna, Kurnool, and Nellore. In Vizagapatam a maunica is equal to 2 seers [q.v.] of 90 tolahs [q.v.] or 157½ cubic inches. In Kurnool very variable. In Vizianagram it is equal to 1 seer of 90 tolahs or 78¾ cubic inches. In Nellore a maunica is equal to 122½ cubic inches. In Kistna there are three maunicas measuring 140, 131¼ and 122½ cubic inches, respectively. Same as Adda in Kistna. Compare Puddy. See vol. I, 609; II, 512-520. ——*Mausam* (मास - mása, San.). Month. See sep. title.—— *Maush* (माष - másha, San.; ماش - máshah, Hind.; ماش - másh, Dec.; మాషము - máshamu, Tel.). Means black gram. Goldsmith's weight, 8 goomchies = 1 maushan; 4 maushams = 1 miscal [niray, 3e]. Approximate actual value, 1 mausham = 15 grains. Used by Mahomedans, and in medical books by Hindoos. There is a Hindostany proverb:—گهڑی میں تولہ گهڑی میں ماشہ—"A tolah [q.v.] one hour, and a mausham the next"; said of a capricious person. See vol. I, 609; II, 507.——*Mausha parny* (माषपर्णी - máshaparní, San.). From (másha, san. phaseolus bean + parna, san. leaf); from leaves and pods like phaseolus. Title otherwise Kidney-bean tree. Botanically the Glycine genus, leguminosæ [vricsham, 48]. Slender twining herbs; leaves made up of three to seven dissimilar leaflets; flowers small, yellow or violet; legume linear, cylindrical, nearly straight, many-seeded, with partitions. The species best known to the natives are:—javanica [javanese country bean], soja [japanese cow gram], tomentosa [horse-gram shrub].—— *Mautah* (माता - mátá, San.). See sep. title.——*Mautray* (मात्रा - mátrá, San.). From (má, san. to measure). Measure of time. 60 mautrays or indian seconds = 1 vinaudicay or indian minute [caulam]. Approximate actual value, 1 mautray or indian second = ·4 english seconds. Same as caushtacalay [caulam, 6], vipalam [caulam, 6], param [caulam, 5]. See vol. I, 609, ——*Mauyan* (மாயன் - máyan, Tam.). Vishnoo [q.v.].—— *Mauyay* (माया - máyá, San.). From (má, san. to form). Illusion personified. The visible world regarded as only a phantom, and so the vanities of the world that lead men astray. Mythologically, the shacty [q.v.] or female energy of Bramha [q.v.] as creator; in this sense nearly synonymous with pracrity [q.v.], matter. In all Hindoo documents of a religious or philosophical kind, not founded on the oopanishads [q.v.], matter is regarded as inseparable from the notion of deity, as a creative power; and the office of creator was to mould pre-existent matter into shape and form. Mauyam, in the neuter gender, is used more extensively for power or form [matam]. A Tamul shastram [q.v.] says:—மாயாலட்சணம் (ரு) அசத்து, சடம், துக்கம், அநித்தம், கண்டம், மாயை யின்வித்து (ச) தேகம், மனம், மனஅசைவு, வாதனை— "The properties of Mauyay are five:—unreality, matter, distress, "transiency and division. The seeds of Mauyay are four:— "body, mind, emotions of mind and knowledge of motions."—— *Mauyone* (மாயோன் - máyón, Tam.). Vishnoo.——*Mauyone maroogan* (மாயோன்மருகன் - máyónmarugan, Tam.). From (máyón, tam. vishnu + marugan, tam. nephew). Soobramanyan, as son of Parvaty [q.v.] sister of Vishnoo in the Krishnan [q.v.] avatar [q.v.].——*Mayavaram* (மாயவரம் - máyavaram, Tam.). See sep. title.——*Mitam* (मित - mita, San.). From (má, san. to measure). Measured.——*Mitaucsharam* (मिताक्षर - mitákshara, San.). From (mita, san. measured + akshara, san. syllables). Commentary by Vinyauneshwaran [q.v.] on the Code of Yannyavalcyan [q.v.]. This work is the chief authority of the Benares school of laws, which is the prevailing one in Middle india.——*Mugger* (नक्र - nakra, San.; تمساح - timsáh, Ar.; نهنگ - nahang, Pers.; مگرمچه - magarmachh, Hind.; مگر - magar, Dec.; ಮೊಸಳೆ - mosale, Can.; మొసలి - mosali, Tel.; മുതല - mutala, Mal.; කිඹුලා - kimbulá, Singh.; முதலை - muthalai, Tam.). Title from hindostany. San. from (na, san. not + kram, san. to move), slow in motion; cf. coormam. Hind. from (makara, san. alligator + matsya, san. fish). Dec. from (makara, san. alligator). Mal. from (mun, mal. front + tala, mal. head); from its head being prominent. Terms co-extensive with family Crocodilidæ, sauria [godhicay], reptilia [sarpy, 5], of naturalists [jantoo]. These are generally called here alligators. Alligator from Spanish lagarto, a lizard. Friar Jordanus, the Quilon Bishop of the fourteenth century, has the following:— "There be also coquodriles, which are vulgarly called calcatix.

"Some of them be so big that they be bigger than the biggest "horse [ghorah]. These animals be like lizards [chipkalee], and "have a tail stretched over all, like unto a lizard's; and have a "head like unto a swine's, and rows of teeth so powerful and "horrible that no animal can escape their force, particularly in the "water. This animal has, as it were, a coat of mail; and there is "no sword nor lance nor arrow which can anyhow hurt him, on "account of the hardness of his scales. In the water, in short, "there is nothing so strong, nothing so evil, as this wonderful "animal." In the word calcatix, crocodile and cockatrice, the fabulous serpent [cobra, naugam], appear to be confounded. Have head with the snout produced; body depressed, covered above and below with square shields arranged in longitudinal and transverse series. Are thoroughly aquatic. Their short limbs are limbs of secondary use for locomotion in the water. Being more or less webbed, these prevent the animals from sinking in the mud when walking on the shore. The tail is not only the principal organ for locomotion, but, at the same time, a powerful weapon. The armour, which protects the body also serves as ballast, by aid of which the animal can sink instantaneously on being disturbed. The gullet is too narrow to allow of the passage of the entire body of the victim. The teeth being adapted for seizing and holding fast only and not for biting, they are obliged to mangle the carcase of their prey, tearing off single pieces by sudden strong jerks. They live much on fish. Alligators are found in the Kistna, Godavery and Cauvery. In calm weather they float two or three miles out to sea. Some bury themselves in the mud and remain in a state of torpor during the time of the drought; during that period, after they have been released from the state of enforced fasting, they are most formidable. A man seized by an alligator has only one way of saving his life, namely to force his fingers into the eyes; it then immediately lets go its victim. All alligators are oviparous; young alligators are of rather rapid growth. There is a Tamul proverb:—ஆனையைத் தண்ணீரில் இழுக்கிற முதலை பூனையைத் தரையில் இழுக்குமா—"Can an alligator, which draws an elephant [q.v.] in water, drag a cat "[poonay] on dry ground?" There is a Hindostany proverb:—دریا میں رهنا اور مگرمچھ سے بیر—"to live in the river and be at "enmity with the crocodile," or to be on bad terms with him under whose authority one is placed. The following are the species known in Southern india:—"*a*" Crocodilus palustris. Alias Bombifrons trigonops; Crocodilus biporcatus, bombifrons, trigonops, vulgaris. Upper surface of snout covered with numerous small, rounded, irregular prominences; Malabar.—"*b*" Crocodilus porosus. Alias Crocodilus biporcatus; Oopholis porosus. Common species along all rivers; grows to the size of 30 feet.

MAU (மா - má, *Tam.*). Animal.——*Maud* (पशु - pashu, San.; مواشی - mavåshí, Ar. and Pers.; گائی گورو - gáígorú, Hind.; جوی - jawi, Malay; ದನಕರು - danakaru, Can.; ಕೈಕಂಜಿ - kaikanji, Too.; పశువు - pashuvu, Tel.; ଷଣ୍ଢ - sandha, Oor.; കാലി - káli, Mal.; மாடு - mádu, Tam.). Title from tamul. San. from (pash, san. to bind); as bound to the stake during sacrifice. Ar. and pers. from (máshiya, ar. quadruped). Hind. from (gái, hind. cow + gorú, hind. horned cattle). Can. from (dana, can. cattle + karu, can. calf). Tel. from sanscrit. Mal. from (kál, mal. leg). Tam. from (má, tam. animal). Title otherwise Indian ox, Indian zebu. The bull is called Braminy bull [q.v.]. Bos indicus, bovinæ, bovidæ, ruminantia, mammalia [sastanam, 23], of naturalists [jantoo]. Comprises several varieties, all of which are remarkable for having long pendulous ears and a fatty elevated hump on their withers. The upper castes of natives consider it a sin to kill them, and pollution to eat their flesh. The bull is worshipped under the name of Nundy [q.v.], being the vehicle of Shiva [q.v.]. Cattle vary much in the districts as to size and form, and as to the growth of their horns. The cattle of Mysore are celebrated as draught cattle; they are quick in their paces, somewhat firey in disposition. The height of the Mysore bullock varies from 12 to 15 hands, the horns are straight and long, extending from 2–3 feet in length. The principal breeds of horned cattle in Mysore are the Amrit mahaul, Mandeshwarabetta, the Cancanhully, and the village cattle. Almost all other cattle seen in the country are importations or crosses between these. The Amrit mahaul, literally milk department, is a breeding establishment. The Amrit mahaul cattle comprise three varieties, called the Hullicaura, Haugalvandy and Chitaldroog, from the districts which originally produced them. Maudeshwarabetta cattle come from the jungles and hills near Biligherry runga mullay on the south-eastern frontier of Mysore. They are larger than the Amrit mahaul cattle. They are very slow animals. Cancanhully cattle come from Cancanhully in the south-east of Mysore; they are very like the Maudeshwarabetta breed, but are generally smaller than the Amrit mahaul breed. Nellore cattle are the best breed within this Presidency, especially for milking purposes. A good specimen of the Nellore breed stands from 15 to over 17 hands in height. Their powers of draught and spirit of endurance are great. The horns are short, barely 3–6 inches in length, inclined outwards, tapering to a blunt point. Countenance, dull; eyes, large, prominent and heavy-looking; face, short with greater breadth of forehead and muzzle; large lop ears; eye, hoof and tail-tuft black; head, erect and well carried on a short stout-neck rising over the withers into a huge hump which frequently inclines to one side; back, short and straight; tail, high and well-set, a fair depth and width of chest; carcase, compact and solid-looking, with a large heavy dewlap; legs, clean but massive, straight and fairly apart to support the carcase. Skin, fine and covered with soft short hair; prevailing color, white. From their docility the nose string is seldom used. The influence of this breed extends north as far as the Kistna district. In Vizagapatam, Godavery, Ganjam, and Orissa, an inferior breed of cattle exists. They are small, under 12 hands in height, with small short horns never exceeding 6–12 inches in length. Their chief value is as pack animals, being well adapted to the hilly districts. About the Kimedy hills in Ganjam there is a more diminutive breed with short and frequently crumpled horns. Cuddapah and Bellary districts import their cattle chiefly from Nellore. North arcot cattle or Mysore are bred chiefly in the Poongamore zemindarry, this estate being a continuation of the Mysore tableland. Cattle are also bred in the hilly villages in the vicinity of Vellore, Canyambaudy, Goodiyattam, and Cungoondy. They are small, rarely exceeding 12–14 hands in height, and having much of the appearance of the Mysore breed, with long straight horns about 2 feet in length. They are of all colors, white, brown, black, &c.; and are chiefly used for agricultural purposes, to draw the cart [bandy] or plough [calappay, yair], or to act as pack animals to export and import produce. Among them are to be found some bullocks of fair size, which are good trotters. South arcot cattle are bred in the villages of Maumandore, Shirpaukam, and Shuncaraupooram. They are the usual small description, with horns of from 10–18 inches in length. Tanjore cattle are small and diminutive, and among them is a small variety which has a peculiar look from the complete absence of horns. Most of the latter have a small osseous protuberance in the centre of the forehead between the parts where the horns are usually found. Trichinopoly cattle are chiefly reared in the villages of Volcondapooram, Runjengoody, &c. They are small and useful, with horns from 10–15 inches long. Salem district is a good cattle-breeding country. The cattle are of small size and resemble the Mysore breed. They are very active and spirited and trot well when used to draw a carriage. They are chiefly bred in the villages of Ahtoor, Namcull, Dharmapoory, Krishnagherry, Oossoor, Ootancaray, Tripatore, and Vaniyambaudy, the hills in the vicinity affording good pasturage. The prevailing color is white, with moderately-sized horns from 15–18 inches in length. The face short, eyes expressive and prominent, of rather spare make of carcase, quick and active in their movements. Bullocks of this breed are exported from Salem and Palghaut to Madura and Tinnevelly. There is a very superior breed of cattle raised in the jungles reaching down from Aulambaudy, along the banks of the Cauvery. The Trichengode cows are also famous as good milkers. In the plains of Coimbatore district there is a small and sturdy breed of cattle. They are generally much tamer than most cattle. There is quite a different breed in the hilly parts of Coimbatore district, between which and the plains considerable trade is carried on. Coimbatore hill cattle are of light build and show something of the Mysore breed, having long horns, somewhat of a pendant dewlap, and a graceful figure. The prevailing color is white. Malabar is not a good cattle-producing country. The chief working cattle are imported thither from either Mysore or Salem, but there is a small breed indigenous to the coast, and these extend through Malabar and South canara. The prevailing color is black; in form and shape they would resemble English cattle but for their diminutive size. They have fine thin necks, a small well-shaped head, and prominent sparkling eyes. Between the Bos taurus or English cattle, and the Bos indicus alias Bos zebu or Indian cattle, a cross-breed has been obtained, but these have been continued by successive breeding. The cross-bred cows are mostly appreciated. Of English cattle, the North devon bulls are the best for obtaining crosses. The hump on the shoulder which distinguishes the Indian ox is when dressed extremely delicate and tender. The Mahomedans are fond of beef and know well how to make its various preparations, beef tea, &c. In the Padaurta chintaumany also beef is included and recommended as a proper diet in cases of jaundice [caumalay], dyspepsia and when the body requires to be strengthened. The ancient Aryans [q.v.] probably ate beef [maumsam]. Candles are seldom made of tallow here. For vegetable tallow see Piney. The yak or Bos gruniens is common in Nepaul and Thibet, the bushy tail of which called Chowry [q.v.] is here in use. For curd see Tyre. For cow's milk see Paul. For other species of the family bovidæ, see Gowr, Khoolgah. For the festival of Mautt pongal after the harvest see Pongal.——*Maun* (மான் - mán, Tam.). Deer [mrigam].——*Maunidamendy* (மானிடமேந்தி - mánidaméndi, Tam.). From (mán, tam. deer + idam, tam. left side + éndi, tam. one who holds). Shiva [q.v.].

MAUCHY (माची - máchí, *San.*). From (mánksh, san. to desire), useful plant. Same as Absinth.

MAUCHY (ಮಾಚಿ - máchi, *Can.*). Means an unmarriageable woman. Hill-tribe female proper name [peyar].

MAUD (മാട് - mátu, *Mal.*). Raised ground [mail, mett, mode]; hillock.——*Maudam* (മാടം - mátam, Mal.). Hut of the Paniyar [q.v.] mountaineers in Malabar. Also means royal palace.——*Maudambimaur* (മാടമ്പിമാർ - mádampimár, Mal.). From (mátam,

mal. palace + nambi, mal. the caste + mâr, mal. honorific plural suffix). West coast title, equivalent to lord of the manor. See vol. II, 135, 289.——*Maudan* (மாடன் - mádan, Tam.). Devil, imp. Coomfly maudan, from (kumizhi, tam. bubble) is the Bubble-devil of running water. There are many other devils similarly called. See vol. I (80).——*Maudye* (മാടായി - mátáyi, Mal.). From (mádan, mal. the ruler so called + ézhi, mal. the place so called), maudan's yezhy to distinguish from yezhy or delly, a few miles north. Mal. also (pazhayannáti) old + bazaar. Sanscrit name (nasamípapura), meaning the ruler so called + city. Portuguese maravia. Village, amshom, Port; Malabar dist., Chiracal tal.; pop. 7,825; lat. 12° 02′; long. 75° 19′; from Belliapatam N.W. 9 miles; from Bombay S.S.E. 491 miles; from Calicut N.N.W. 62 miles; from Cannanore N.N.W. 14 miles; from Yetticoolam E.N.E. 4 miles. Ancient Moplah [q.v.] town in Mount delly bay. A place of trade. Boats of large size come up to it. Small redoubt, bungalow [q.v.] for travellers, and handsome mosque [musjid]. In hamlet of Payyangaudy is an old tank called the Jewish tank, near which stands the old Yezhy palace of the Colattiry rajahs. Two cave sepulchres.

MAUDA (మాడ - máda, *Tel.*). Also known as Camala mauda. Silver coin; half pagoda. Also goldsmith's weight. 4 chowlas = 1 mauda; 2 maudas = 1 pagoda weight [naunyam, 2b]. Approximate actual value, 1 mauda = 27 grains. Compare Sanscrit mausham. See vol. I, 609.

MAUDIGA (ಮಾದಿಗ - mádiga, *Can.* and *Tel.*). From (mátanga, san. self-willed); as being beyond the caste pale. The corresponding terms are:—Tam. chuckler, Mal. tolcollan. The Chamaur of Upper india. The Maudigar are the lowest of the whole left-hand faction. They are therefore also called Yedagay [yidangay]. They are divided into two tribes, the Canarese and the Teloogoo. They are looked upon as a very low caste. They dress hides, make shoes, and some of them cultivate the ground. They are divided into small tribes of ten or twelve houses and intermarry with the daughters of these houses only, in order to be certain of the purity of their race. Some of them take two or more wives. Wives are only divorced for adultery. They eat carrion and animal food and drink spirits. At marriages the bridegroom has to provide thirty-five new pots and a sum of Rs. 5, which is spent in drink consumed by the guests. The ceremony is performed by their own priests, for no Bramin [q.v.] will approach their haunts. They are the drummers and horn-blowers of their village, their horn being called 'banka' and their drum 'tappattay'. They claim the privilege of taking free of payment the hides [chamrah] of all animals dying in the village. They have a priestly tribe called Jumboo [q.v.], who never intermarry with the laity, and live entirely on their contributions. There is a Mutt [q.v.] of Jumboos at Cuddapah, and the office of high priest there is hereditary. This official takes frequent rounds through the country, collecting money and admonishing his followers. Their tradition refers to one Aroondhaty [q.v.], a Maudiga girl, whom they say the rishy [q.v.] Agastyan [q.v.] made his wife. Proud of this distinction, the Maudigar often call themselves Aroondhaty's caste. Numbers in Presidency about 130,000; mostly in Kistna and Nellore [jauty].——*Madgole* (మాడుగుల - mádugula, Tel.). From (mádiga, tel. chuckler caste).—"*a*" Zemindarry; Vizagapatam dist., Veeravilly division; pop. 56,512. Contains 139 villages. Partly under the Agency administration of Vizagapatam. The zemindars [q.v.] claim descent from the rulers of Matsya desham who were closely connected with the Pandava [q.v.] race. They state that they established themselves first at Padair above the ghauts [q.v] to the north of Madgole. There is a rocky pool in the Matsyair in the hill mittahs [q.v.] of the zemindarry [q.v.] called Matsya goondam, containing numbers of sacred fish [matsyam] specially under the protection of the family. Before signing their names the Zemindars of Madgole inscribe the figure of a fish on the document, and the same is borne on their flags [dhwajam]. Another account is that they came into the country with the founder of the Jeypore family, whose cousins they are, and who gave them the Madgole country with the title of Bhoopaty. Linga bhoopaty of Madgole, joining in the general insurrection of the hill chiefs against Vizianagram, was in 1770 dispossessed by Poosapauty seetaram rauz with the aid of the Company's troops. He fled to Jeypore, where he died and where his family remained in exile till the death of Vijaya ram rauz in 1794, when they were recalled and sunnud [q.v.] for their ancient estate was given to Linga bhoopaty's eldest paternal nephew, Juggernaut bhoopaty. There have been numerous changes but the estate has reverted to the old family. Peshcush Rs. 30,999. The estate is now under mortgage to Jeypore and is likely to escheat to Government in a few years.—"*b*" Town; Vizagapatam dist., Veeravilly division; pop. 7,612; lat. 17° 55′; long. 82° 51′; from Chodavaram N.W. 9 miles; from Coraputt S. 60 miles; from Madras N. 368 miles; from Narsapatam N.E. 22 miles; from Parvatipore S.W. 70 miles; from Vizagapatam N.W. 34 miles; from Vizianagram S.W. 41 miles. Near the foot of the ghauts and on the road from Ankapully into the Jeypore country. Old temple of Bheemeshwaran.

MAUF (معاف - muáf, *Hind.*). From (afú, ar. pardon). Exemption, pardon, remission. Mauf saucshy is an approver.

MAUFOOZ (محفوظ - mahfúz, *Hind.*). From (hafiza, ar. to preserve). Safe. Proper name.——*Maufooz bunder* (محفوظ بندر - mahfúzbandar, Hind.; మాఫూసుబందరు - máfúsubandaru, Tel.). From (mahfúz, ar. mahomedan name + bandar, pers. port); after mahfooz khan, son of anwaroodeen [q.v.], first of the carnatic [q.v.] nawaubs. Chicacole.——*Maufooz khan* (محفوظ خان - mahfúzkhán, Hind.). Alam + honorific title. Brother of Nawaub [q.v.] wallajah [mahomed ally]. Taken prisoner at Amboor, where his father was killed, and subsequently released and appointed governor of Madura. A suburb of Black town in Madras city is still called after him [charitram]. See vol. I (122).

MAUGAUNY (మాగాణి - mágáni, *Tel.*). From (mágu, tel. to ripen well + káni, tel. land). Wet cultivation [nunjah]. Distinguish from the tamul maugauny [mah].

MAUJID (ماجد - májid, *Hind.*). From (majada, ar. to glorify). The glorious, attribute of God [allah]. Common alam; as Maujid ally, double alam [ism].

MAUL (مال - mál, *Hind.*). Property [milk], revenue therefrom [khirauj].——*Mauldar* (مالدار - máldár, Hind.). From (above + dár, pers. holder). A rich man.——*Maulgoozarry* (مالگزاری - málguzárí, Hind.). From (above + guzár, pers. pay). Land liable to pay revenue [khirauj] to Government in contradistinction to Lakhiraj [q.v.].——*Maul jaumeen* (مال ضامن - málzámin, Hind.). From (above + zámin, ar. security). Money security [nagad jaumeen].

MAULIM (معلم - muallim, *Hind.*). From (ilm, ar. knowledge) [ilm]. Pilot [maunjhee].

MAULISH (مالش - málish, *Hind.*). From (málídan, pers. to rub). Rubbing; the hand-grooming of a horse [ghorah]; also the threshing and treading out of corn.

MAUMAH (ماما - mámá, *Hind.*). From portuguese. Confidential female attendant [ayah].

MAUMLUT (معاملت - muámalat, *Hind.*) [amal]. From (amala, ar. to act). State affairs, revenue business.——*Maumlutdar* (معاملت دار - muámalatdár, Hind.). From (above + dár, pers. holder). Collector or farmer of revenues [khirauj, maul].

MAUN (مان - mán, *Pers.*). Suffix meaning like; as Asmaun mill-stone + like.

MAUNAM (मान - mána, *San.*; మాన - mána, *Tel.*; மானம் - mánam, *Tam.*). From (má, san. to measure) [mau]. Generally a measure or computation. Instrument for measuring, rule, standard. Proportion or ratio. Also proof, demonstration, means of proof. Compare Pramaunam.——**(1)** Superficial measure. 25 coontas = 1 maunam [alavay, 2b]. Approximate actual value, 1 maunam = 18,225 square feet or ·4,184 acres. Ganjam.——**(2)** Teloogoo measure of capacity. 4 solgas = 1 maunam; 4 maunams = 1 bullah [alavay, 3b]. Approximate actual value, 1 maunam = 1,120 cubic inches. Bellary. Compare Kulsy, Cooncham of Nellore, Toom of Godavery. See vol. I, 609; II, 508, 510.——**(3)** Tamul measure of capacity. 2 maunams = 1 puddy [alavay, 3a]. Approximate actual value, 1 maunam = 50 cubic inches. Used in Salem. Same as Chinnapuddy.——**(4)** In astronomy a system of reckoning the duration of the year; for instance Sowram, Chaundram, Sauvanam, Nacshatram, Baurhaspatyam, Bramhyam, Pitryam, or Prajaupatyam. Cf. Siddhauntam which is a treatise on the same. The principal mode of reckoning the year as now practised in S. india is either solar or luni-solar.—"*a*" The solar [madhyama sowra maunam] is the time which the sun [sooryan] takes to perform a complete revolution [bhaganam] round the heavens [bhagolam], beginning from a star [nacshatram] and returning to the same; this is therefore sidereal, but even thus it is taken to be of various durations, according to the systems and authorities which are followed [siddhauntam]. Whilst all the northern astronomers reckon the solar year to be of 365d. 6h. 12′ 34″, agreeably to the doctrines of the Soorya siddhauntam, those who reside south of the Nerbudda make it by Arya siddhauntam only 365d. 6h. 12′ 30″. From this last, however, must be excepted a certain sub-division of the Siddhaunties who belong to the southern-most part of the peninsula and whose year differs only one second of time in minus from that of the northern astronomers.—"*b*" The luni-solar year in most general use, or the common Chaundra maunam [q.v.], consists of 12 or 13 lunar months [chaundra mausam]; it commences with the new moon [amavausyay] at or next before the time when the sun enters the first sign [raushy] of the solar sidereal ecliptic [craunty mundalam]; its months are called Mookhyam [q.v.] or primary. The Baurhaspatya chaundra maunam, to be distinguished from Brihaspaty [q.v.] maunam though name is of same root, is another luni-solar year, which begins at the full moon [powrnimay] next preceeding the sun's entrance [sancramanam] into the sidereal ecliptic; its months are called Gownam [q.v.], or secondary. The Teloogoo luni-solar year [samvatsaram] rests on the calculations of the Soorya siddhauntam.—"*c*" The Brihaspaty maunam [q.v.], or Jupiter reckoning is properly based on the time during which that planet [graham]

describes one sign [raushy] or 12th part of its orbit [cacsham]; however in S. india it is taken by corruption to be equal to the solar year, and in present times serves only to give a specific name in a cycle [brihaspaty chuckram] of 60 years to each solar and luni-solar year.—"*d*" For Deva maunam and Bramha maunam see under Caulam, 2.——*Chaundra maunam* (चान्द्रमान - chándramána, San.). From (chandra, san. moon + above). Lunar measure of time. The luni-solar year [samvatsaram] of the Teloogoos. As the so called solar year here is really soli-sidereal, so the lunar year is really luni-solar. Accordingly the solar calender [punchaungam] must first be constructed, at least to a certain extent, according to the rules laid down in Madhyama sowra maunam [q.v.], before anything can be done with Chaundra maunam; such a document being indispensable at every step of the luni-solar problems.—"*a*" The elements which are required for computing the articles of the luni-solar calendar are principally as follows:—The sun's mean place in the hindoo ecliptic [craunty mundalam] called ravy madhya graham [q.v.]. The moon's mean place in the hindoo ecliptic called madhyama chundra graham. The place of the sun's apogee in the hindoo ecliptic called generally his upper apsis, or ravy toonga mandotcham [q.v.]. The moon's apogee in the hindoo ecliptic called chundra mandotcham. The ayanaumsham [q.v.] or ayana bhaugam; meaning the arc comprised between the vernal equinoctial point [maishauyanam] and the first point in the hindoo sidereal ecliptic; this latter element is required for referring all the computations made on the fixed, sidereal, to the movable or tropical sphere. The obliquity of the ecliptic which the hindoos take to be constantly 24°. There are also certain quantities and expressions which are constantly required in the processes. Such are the names of the Hindoo signs [raushy] of the zodiac [raushy chuckram], with their numerical succession, both current and complete; the absolute number of days which the sun takes to move through each sign, the number of complete natural days [sauvana dinam] in each solar month [mausam], both civil and sidereal; and lastly, the numbers which are to be added to the solar, or luni-solar Aharganams [q.v.] on the beginning of the proposed year, for obtaining the epochs of recurrence of mean conjunctions during the whole of its duration.—"*b*" The luni-solar year is ordinarily accounted to begin at the true instant of conjunction [arcaindoo sangamam], or new moon, which precedes the commencement of the solar year [varsham], with which it is mainly to concur; but see Gownam for another method. The Chaundra maunam year [samvatsaram] is divided into twelve months [mausam], subject by intercalation [adhicam] to a thirteenth month. The Chaundra maunam month [chaundra mausam] is divided into two parts of fifteen Tities [q.v.] each, called Pacsham [q.v.], the first fortnight being denominated Shooclam [q.v.] the lightening, the second Krishnam [q.v.] or Bahoolam the darkening half of the month. The instant of true conjunction which determines the commencement of the lunar month is called Arcaindoo sangamam, literally meaning conjunction of the sun and moon [amavausyay, darsham]. Although the instant of conjunction is that which determines the commencement of the year or months; yet the day on which it occurs, and which on that account is called the Amavausyay tity, is always reckoned in the calendar [puchaungam], as well as in account, as the 30th Tity of the lunar month, because it ends on that instant. The Pratamay [q.v.] or first Tity of the ensuing month is always accounted to be the next, for the same reason. The day of opposition is called Powrnimay [q.v.] tity, and is always the 15th of the first Pacsham [q.v.]. The lunar day [tity] of the Hindoo calendar is thus independent of sunrise or sunset, and means the time occupied by the moon [chundran] in traversing a thirtieth part of its circuit [cacsham]. In the Punchaungam [q.v.] the days are numbered no farther than fifteen, but in computations the series is followed up to thirty.—"*c*" In dating, notation will be as follows:—Chittrabaun samvatsaram, Adhica aushweejam, Shooddha dwiteeyay, Mungala vauram, Kaliyoog 4924, Saca 1745; in the year Chittrabaun the 16th of the cycle of 60 [brihaspaty chuckram], of the intercalary month Aushweejam the second day of waxing moon of bright fortnight; Tuesday; Kaliyoog 4924, and Saca 1745.—"*d*" For lunar mansion see Nacshatram.—"*e*" The moon with her phases [calay, piray] is of great importance with the Hindoos; nearly all their feasts [pundigay] and fasts [vratam] are regulated by the moon. Regarding the phases of the moon the Pudma pooraunam [q.v.] explains that Dacshan [q.v.], the son-in-law of Bramha [q.v.], and of the nine progenitors of mankind, gave twenty-seven of his daughters as wives to the moon [chundran] who is in Indian mythology of the masculine gender, expecting that he would attach himself to all equally. But the moon lived with Rohiny [q.v.], the Hyades [aldebaran], more than the others for which conduct Dacshan cursed him with the sickness of consumption. And he grew less and less till he disappeared. On this the gods [deva] asked Dacshan to remove his curse; but he would not revoke it altogether, and only consented to mitigate it if the moon lived equally long with every one of his wives. The moon dwells now with all his twenty-seven wives equally long, but always for one fortnight [pacsham] grows, and for another wanes.—"*f*" The following is an eleven year chronological table showing the principal circumstances of the common Luni-solar year [samvatsaram] and the concurring Vicramadityan [q.v.] and Fusly [q.v.] years:—

1	2	3	4	5	6	7	8	9	10	11	12
Christian years.	Years expired of the Kali yoog [q.v.].	Character of the year.	Last feria in the Luni-solar year.	Date of the last mean conjunction in the Luni-solar year.	Date in Cheitram of Solar year.	Sidereal duration of Cheitram.	Civil duration of Cheitram.	Solar Aharganam [q.v.], or Yoog dinam [q.v.], to be counted from Friday.	Luni-solar Aharganam to be counted from Thursday.	Years of Æra [saca] Vicramadityan.	Fusly years expired.

A — Adhicam [q.v.]; the year contains one intercalary lunar month [mausam], and is of 384 solar days, against 354 solar days ordinary.

——*Madhyama sowra maunam* (मध्यमसौरमान - madhyamasauramána, San.). From (madhyama, san. middle + saura, san. solar). Means solar measure of time. The mean solar year [samvatsaram, varsham] used by the Tamuls and forming the foundation of the luni-solar year of the Teloogoos. It should much more properly be called sidereal. It contains that space of time during which the sun departing from a star [nacshatram] returns to the same.—"*a*" The actual point of time at which a solar or sidereal year may be held to begin, viewed as marking a physical fact or a certain conjunction of the heavenly bodies in space, is a matter upon which many others both in science and general chronology depend, and the subject may here be suitably set out. The best means for obtaining an initial datum of this sort is to mark the instant when the sun in his apparent path [cacsham] or ecliptic [craunty mundalam] seems to touch the equinoctial [naudy mundalam] or prolongation of the earth's equator [niracsham] which happens twice a year. On the days when this happens the sun approximately seems to travel round the earth in the line of the equator, and day is the same length as night all over the world; hence the vernal and autumnal equinoxes [maishauyanam, toolauyanam]. Modern European astronomers accept this method as an ultimate fact for such practical purposes as calculating celestial longitude [sauyanam], regulating the calendar [punchaungam], &c.; and disregard other consequences. Of the latter class are the effects of precession [craunty pauta gaty], whereby the equinoctial points [ayanam] owing to the earth's oblate figure [andagolam], &c., move all round the heavens in a westerly direction against the order of the zodiacal signs [raushy] in 25,868 years, and the appearance of the heavens in relation to the sun, moon and earth and even to a small extent in respect of the mutual relations of the fixed stars themselves is changed in a corresponding manner. But another method is possible. At the point of the equinox in any year the heavenly bodies must be in a certain position relatively to each other. This conjunction in say the vernal equinox [maishauyanam] of any year may be taken as the fixed datum, and all further and subsequent calculations of chronology may be made by the mere application of tables and without either observation or corrections for precession [craunty pauta gaty].—"*b*" General history shows the employment of both these methods. But that of a fixed vernal equinox retained after it has ceased to be true to the

facts and so with a new year's day always getting later and later in relation to the seasons [ritoo] is the ancient method; while that of a vernal equinox shifting with precession, and a new year's day consequently having always the same relation to the seasons is the modern method.—"*c*" The earliest indication of an Indian epoch dependent on the facts of the equinoxes is that derived from the month terminology of the Hindoo soli-lunar calendar. The moon's constant daily path in the heavens for the period of a lunar month [chaundramausam] is mapped out by twenty-seven constellations [nacshatram, 7], whose names were as far as at present appears assigned fancifully. When the luni-solar [chaundra maunam] method of reckoning time was instituted, or at any rate when a year of twelve lunar months began to be recognized, twelve out of these twenty-seven mansions were chosen to give the names to the months; the moon being always in the period of those months full in those or approximately in those mansions [nacshatram]; reference to the diagram at Raushy [q.v.] will show that while the sun occupies one and the same zodiacal sign [raushy] in any given month in each year, the moon which to be full must be opposite or at six signs distance has a choice of only 2¼ mansions to be full in; the selection of 1 out of these 2¼ to make into a month-name may have been arbitrary, or may have arisen from the moon actually being full in those particular mansions in the year when the Chaundra maunam [q.v.] was arranged. Now at the present day for the purposes of the hindoo soli-lunar calendar the equinoctial colure [maishauyanamundalam] is or is assumed to be among the stars in the same meridian [raikhay] with the beginning of the mansion Ashwiny [q.v.], or near hamel [q.v.] in the head of the ram [maisham], while the first month of the year speaking for india generally is Veishaukham, named after the mansion vishaukham [q.v.] six signs distant from ashwiny; the shastrams state that at a previous date the colure was at Oottarabhaudram [q.v.] or near aldebaran [q.v.] in the eye of the bull [vrishabham], and the first month was Cheitram, named from the mansion chitta [q.v.] six signs distant from oottarabhaudram; the shastrams similarly state that yet earlier the colure was at Shatabhishay [q.v.] or near betelgeux [q.v.] in the right shoulder of orion [ardray, jabbaur], and the first month was Phaulgoonam, named from the mansion poobbam [q.v.] six signs distant from shatabhishay; so shravanam, maugham, magham; so poorvashaudham, pooshyam, pooshyam; so jyeshtay, margashiram, mrigashiras; so vishaukham, caurteecam, kritticay; so chitta, aushweejam, ashwiny. There can be no doubt about the meaning of these statements. The matter is expressed in the shastrams by saying that the line of the Rishies [q.v.] intersected the first points of the mansions [nacshatram] first-named, which is the same thing as saying that the equinoctial colure [maishauyanamundalam] was there. The line of the Rishies is a great circle [mundalam] drawn through the pole [dhroovam] of the ecliptic [craunty mundalam], that is to say through a point one-third way between the head of the dragon and polaris, and the equinoctial colure; it cut in its course the square of the Great bear [doobhe acbar] about 5,000 years B.C., and the shastrams contain reference to this; some commentators indeed write as if it was still cutting the Bear when the colure was in Raivaty [q.v.] or within the christian era, which is probably a simple error, for consideration of the longitudes [sauyanam] will show such to have been impossible. Even supposing ayanaumsham [q.v.] to be under some definition or other libratory, as appears advanced in one or two native writers, this cannot affect the above plain statement of the shastrams as to the eight successive stages of the line of the Rishies, &c., for there are not two methods by which the sun and moon could respectively and simultaneously travel into the named mansions; they could only do so by constant westerly precession [crauntypauta gaty] as defined by european science. The earliest conjunction according to this month nomenclature history, or the point of time when the month Aushweejam headed the soli-lunar year, would have been at or earlier than 15291 B.C., at about $\frac{7}{12}$ths of the distance of one entire precessional course. It is open to those who disbelieve in very high antiquity for history to consider that the earlier of the above month datings were not in fact at any time used by the hindoos or other races, and were merely inferred backwards from the known facts of the later month datings. It is equally possible however to believe that the above are bonâ fide human traditions; throughout these pages it is held that hindoo antiquities involve much more distant dates than is generally supposed. Varauha mihiran [q.v.] of the sixth century christian era opens one of his chapters with an allusion to the time when the sun was recorded to have had its summer solstice [dacshinauyanam] a month and a half earlier than it was in his time, which would be an event considerably prior to the kaliyoog [q.v.]. and the aldebaran [q.v.] epoch. The European scholar Bentley has made a theory that because 3,056 lunations [chaundra mausam] make 247 years + 1 month, therefore the bramins changed the name of the first month of the year every 247 years; doing this from 1192 B.C. to 538 A.D., and there stopping, as the last date brought them to a coincidence with the constellation of ashwiny [q.v.]. But there is no foundation whatever for this in the shastrams, and the dates are brought in to suit the theory. Probably Bentley had not heard of the traditions of the line of the Rishies. It was said above that the month veishaukham was the first month of the year for india generally; southern india has for some reason not yet explained stopped in its nomenclature at the penultimate stage when cheitram month headed the year and the bull [vrishabham] headed the zodiac [raushy chuckram], and has not adopted the last correction to veishaukham; this makes no difference to the conclusions to be drawn as above shown from the whole series of first month titles.—"*d*" The adoption of the months later than Aushweejam to head the soli-lunar year indicates approximate epoch dates as follows:—Caurteecam, 13143 B.C.; Margashiram, 10995 B.C.; Pooshyam, 8847 B.C.; Maugham, 6699 B.C.; Phaulgoonam, 4551 B.C.; Cheitram, 2403 B.C.; Veishaukham, as at present for India generally, 255 B.C.—"*e*" The present Kaliyoog destined according to hindoo authorities to last altogether 432,000 years began in 3101 B.C. The shastrams say that there was in that year no ayanaumsham [q.v.]. This means that that year was made into an epoch beginning with the point in the heavens occupied by the vernal equinox [maishauyanam] of the year. The vernal equinox was then about at Aldeberan [q.v.] in the eye of the bull, or at the position assigned above for the epoch designated by cheitram as first month of the soli-lunar year.—"*f*" According to the solar, as opposed to soli-lunar, division of the hindoo year, the months are named not from mansions [nacshatram] but from zodiacal signs [raushy]; that is to say from the same stars of the zodiacal region, but with these differently grouped according to the well-known division of the bull, the ram, &c. Here also the astronomical year has always begun with the vernal equinox, and the month taken to head the year is that having the name of the constellation [nacshatram] where the sun at the vernal equinox of the epoch year was residing. An epoch recognized in many shastrams, equally with many Greek and Latin writings, as having existed within historical times, is that when the sign of the bull [vrishabham] headed the zodiac [raushy chuckram] and so the year. This epoch may be taken as co-incident more or less with that last named, as well as with the Cheitram epoch.—"*g*" Under the nomenclature for solar months now current in this as in most other countries, the ram [maisham] heads the year. The real commencement of this epoch may be supposed to have been when the vernal equinox was somewhere in a line with the bright star Hamel [q.v.] in the head of the ram, or at about 274 B.C. Hipparchus who is said to have determined the then existing place of the equinoxes among the stars, and to have discovered the true nature of their precession, lived at the beginning of the following century. This epoch has made such an impression on history and science, that, where as in the case of modern European astronomy the idea of a fixed sidereal starting point has been abandoned and the epoch changes every year with the precessional motion of the vernal equinox, the old nomenclature of the ram is nevertheless still retained. In that case the first 30 degrees of the sun's course after leaving the vernal equinox are still called the sign of the ram, though the constellation of the ram has long since been left behind, to the extent indeed of a full sign [raushy]. The astronomical name for the vernal equinox is still the first point of Aries, with sign of ram's horn ♈, though this is a movable point in the heavens and has now nothing to do with the constellation of the ram. The zodiacal signs which follow the ram are similarly shifted. The Hindoos do the same as this in their higher astronomy, having a movable or tropical Maisham, &c., like the European movable or tropical ram, &c. The movable epoch will be considered at the close of these remarks, and is only mentioned here to show that it bears the old names of the Hamel epoch.—"*h*" As above indicated the epoch designated by Veishaukham as first month of the soli-lunar year must have been about identical with the Hamel epoch; calculating back by intervals of 30° it comes to about 255 B.C. It seems probable that from this time onwards Greek astronomy greatly influenced Hindoo astronomy. This nomenclature too has remained constant during subsequent epochs.—"*i*" The present date for the new year in India, wherever the new year plainly is intended to represent the vernal equinox, as among the Tamuls, is 12th April, Gregorian reckoning. This is twenty-two days behind the real present vernal equinox, or 21st March, Gregorian reckoning. Calculating back these twenty-two days by the precession rate of European science, or 50″ per annum, there would have been an epoch at about 317 A.D., when the vernal equinox stood at the point which is now R.A. 1h. 28′, or nearly in a line with the comparatively bright star in the tail of the eastern fish, η Piscium [meenam].—"*j*" According to the more modern shastrams there is a distinct record of an epoch having been made at 3600 kaliyoog, or 499 A.D. The tradition is that this was the epoch, and that it was reduced to table subsequently in 4070 kaliyoog, or 969 A.D. The vernal equinox was in 499 A.D. at the point which is now R.A. 1h. 18′, but there is still no principal star nearer to that point than η Piscium.—"*k*" Raivaty is in the lunar mansion [nacshatram] or lunar constellation [nacshatram] scheme the last of the twenty-seven; while Ashwiny [q.v.] is the next, beginning the series again. Raivaty [q.v.] consists of thirty-two stars in the Fishes [meenam], Ashwiny is the head of the Ram [maisham]. The last point of Raivaty and first of Ashwiny is in many of the more modern shastrams said to mark the position of the vernal equinox for the most recent of the epochs. Then according to some authorities the yogam [q.v.] star of a mansion is at the exact limit between it and the next. This is impossible for the whole

twenty-seven for non-telescopic stars; however Veidhrity [q.v.] the yogam of Raivaty is said to have been such a limiting star between Raivaty and Ashwiny, to have been the southernmost star in the mansion, and to have had no latitude [vicshaipam] or little latitude. Adopting these definitions as authoritative, Veidhrity has been held to represent ζ Piscium in the string of the Fishes, whose R. A. is now 1h. 7′, and whose declination is now 7° N. If this star had to be taken with precision as marking by its longitude a vernal equinox, that would have to be put at about 692 A.D. But nothing further is known of such a date.—"*l*" If the system of the modern European precessional year be called an epoch in the above sense, then that epoch begins at the present date at a point not far from the longitude of Alpheratz [q.v.], α Andromedæ, whose R. A. is 0h. 3′. The Hindoos use this year for the higher astronomical purposes, and they call the distance along the ecliptic between this position of the vernal equinox and its position assumed for their old and unchanging sidereal starting point, the ayanaumsham [q.v.]. The value of the ayanaumsham is a matter of constant discussion, on account of the embarrassing ambiguities which exist among the native writers as to the date of epoch, rate of precession, and precision or otherwise of a sidereal starting-point.—"*m*" To sum up this matter as far as the modern fixed epoch is concerned. The most natural epoch to take is that given by the evidence of the Hindoo new year date brought out in Gregorian style, viz., 12th April. This, as above seen, gives an epoch date, with the 50″ rate of precession, of about 317 A.D. and an ayanaumsham of about 20°. But if with an initial date of 499 A.D. which is the date fixed by the native authorities the 54″ or native rate of precession is adopted, 12th April will still be reached as the present new year's day; the ayanaumsham being then 19° 28′, and this is a figure often quoted. It appears then that this last is the truth as to the origin of the present Hindoo new year. 499 A.D. was the epoch, and some star of the fishes which may have been either η or ζ Piscium was the sidereal starting-point, though inexact. ζ Piscium happens to tally exactly in longitude [sauyanam] with a position calculated back by the European rate of precession, but need not necessarily have had anything to do with the matter. In the absence of proof against ζ Piscium having been the star observed in 499 A.D., for this and η Piscium are about equally distant in longitude from the true vernal equinox of that date on two opposite sides, the custom of the last century has been followed in these pages in inserting it in the tables as the equivalent of Veidhrity or yogam star of the mansion Raivaty.—"*n*" The following statement shows the above information tabularly and in detail. The rate taken for precession is the true rate of 1° in 71·6 years or about 50″:—

Serial number of epoch.	Name and nature of epoch.	Year of Christian era.	Year of Kaliyoog [q.v.].	How many years ago from present date.	How many degrees back from present position of vernal equinox, by the march of precession [craunty pauta gaty]; in other words the value of Ayanaumsham [q.v.]; precession at 50″ per annum.	The same in Right ascension [lagnam].	The nearest principal star, with its present Right ascension and Declination; + means north declination, and − means south declination.

"*o*" To avoid confusion mention has been omitted above of the yearly date of commencement of the Teloogoo luni-solar year [teloogoo new year], which happens at the new moon [amavausyay] prior to the opening of the solar year, and so has a range of twenty-nine days; it is from the present point of view merely a variant of the solar year, and was probably devised in part to increase the complexity of the calendar [punchaungam] in the interests of astrology [jyotisham]. Similarly the fact that the Parshoorama era [saca] on the W. coast begins its year with the autumnal [toolauyanam] instead of the vernal equinox [maishauyanam] indicates nothing new regarding the astronomical epoch. The European civil year begins in midwinter on 1st January, but is none the less regulated astronomically by the vernal equinox.—"*p*" An every day manner of determining the commencement of the solar year consists in observing the passage [sancramanam] over the meridian [raikhay] of some yogam [q.v.] star the position of which is given in the hindoo tables. Thus Harshanam [q.v.], the yogam of and only star in the lunar mansion [nacshatram] Chitta [q.v.], is accounted to be exactly six signs [raushy] in longitude [sauyanam] from the beginning of the solar zodiac [raushy chuckram]. It is taken in these pages to be Spica virginis [simauk ool azal]. When it is observed to pass over the meridian at midnight anywhere, the mean hindoo solar year ought to begin. Veidhrity, the yogam star of the lunar mansion Raivaty, taken in these pages to be either η or ζ Piscium, is the last point of the sign Meenam [q.v.], the Indian pisces; or what comes to the same thing, the first of Maisham [q.v.], the Indian aries.

So that when it is observed to pass the meridian anywhere at midnight, it should mark the mean sidereal beginning of the Tamul month Arpisy [q.v.], from which that of the year may be deduced. But from the above remarks it will be seen that this opposition of Harshanam and coincidence of Veidhrity to and with the commencement of the Hindoo solar zodiac, must necessarily be a somewhat rough one.—"q" For purposes of calculating the almanac [punchaungam] observation is not attempted, but figures are projected from the commencement of an epoch [kaliyoog]. The rule for finding the mean epoch of the commencement of the Tamul solar year will be seen under Aharganam [q.v.]. It is to be observed that Tamul astronomers have adopted the details of the Arya siddhauntam [q.v.] treatise, in preference to that of the Soorya siddhauntam, using the Vaukyam [q.v.] process of calculation in their operations. The general element to be ascertained is the Aharganam or time elapsed from the beginning of the kaliyoog to that of any proposed year. This includes the initial feria of the year, called Shooddha dinam [q.v.]. After this has to be determined the beginning and duration of the twelve months [mausam] of the year.—"r" Each solar month [mausam] contains as many days and parts of days as the sun [sooryan] actually stays in each zodiacal sign [raushy]. The portion of time assigned to each month, is affected by the time occupied by the sun in moving through the northern and southern signs of the ecliptic [craunty mundalam], the time for the former being 186 days 21 hours 38 minutes and 24 seconds, and for the latter 178 days 8 hours 34 minutes and 6 seconds. The odd hours and minutes of this are applied to the beginning of the year and months; and being so distributed there is no need for leap or bissextile years, because the astronomical beginning of each year is reckoned from the hour and minute over 365 days when the last year and month expired. The civil differs from the astronomical account only from its rejecting fractions of days, each year and month being accounted to begin at sunrise, instead of the time of his mean entrance into the respective signs; observing that if the said fraction exceeds 30 Indian hours [ghadiya] which lapse of time is conceived to be the mean half of the day [dinam] then the civil year, or month, are accounted to begin one day later than the astronomical ones; whereas if the time falls below that quantity, both coincide. It results from this arrangement that civil time is sometimes longer, sometimes shorter, than the astronomical.—"s" The following is an eleven year chronological table referring to various solar styles and years; and showing the numerals or names, and the epoch of the commencement of the latter according to European account:—

1	2	3	4		5	6	7		8		9
Christian years.	Years expired of the kaliyoog [q.v.].	Years expired from the birth of Shalivahanum [q.v.].	Expired years of the 4th cycle of the era [saca] parshooraman. Years of the Cycle.	Initial date in September.	Years of the 22nd Cycle of Graha parivritty [q.v.].	Years of the S. indian Brihaspaty cycle [chuckram] of 60 years. Name and Numeral.	Initial feria of Tamul civil year.	Date in April.	Initial feria of Tamul sidereal year.	Date in April.	Point in time of beginnings of Tamul years counted from Sunday [caulam]. D. G. V. P.

MAUNAM (மானம் - mánam, *Tam.*). Sky [vaun].——*Maunavaury* (மானவாரி - mánavári, Tam.). From (above + vári, san. water). Land of which the cultivation depends solely upon rain [mazhay].

MAUNJHEE (مانجهی - mánjhí, *Hind.*). The steersman of any native river craft [maulim].

MAUNOO (మాను - mánu, *Tel.*). Tree. Suffix in place names; as Caukamaunoo, meaning crow's tree.——*Maurella* (మారెళ్ల - mărélla, Tel.). From (máredu, tel. tree, ægle marmelos, corr.). Village; Nellore district, Canigherry talook. Belongs to Vencatagherry and gives name to Zemindarry talook.

MAUR (മാറു - máru, *Mal.*). A fathom. Distance between the finger tips of either arm extended sideways. Linear measure. 4 moolams or cubits = 1 maur; 2,000 maurs = 1 crosham [alavay, 1a, d]. Approximate actual value, 1 maur = 6 feet. In Madura it is 6½ feet. In Salem there are two maurs, one of 6 feet 4½ inches, and another of 8 feet. Same as San. vyaumam, dandam, Hind. baum, Can. bauroo, Tel. niloovoo, Tam. bauham. See vol. I, 609.

MAURISHAM (मारिष - márisha, *San.*). From (mrish, san. to endure). Title otherwise Amaranth, Spinach, Velvet flower. Botanically the Amarantus genus, amarantaceæ [vricsham, 106]. Cf. Malabar nightshade. Tropical annual plants; leaves alternate; flowers small; in axillary or spiked clusters; fruits one-seeded, splitting circularly round when ripe; seeds orbicular, compressed; several cultivated for their ornamental, bright-colored leaves. The species best known to the natives are shown below.——*Brown spinach* (حبق بستانی - habakibustání, Ar.; بستان افروز - bustánafroz, Pers.; لال ساگ - lálság, Hind.; راج گیرا - rájgirá, Dec.; ಕಿಲುಹರಿವೆ - kíluharive, Can.; රනතම්පලා - ranatampalá, Singh.; பூங்கீரை - púngírai, Tam.). Title from foliage. Ar. from (habak, ar. mentha pulegium, linn. + bustán, pers. garden). Pers. from (bustán, pers. garden + afroz, pers. illuminator). Hind. from (lál, hind. red + ság, hind. pot-herb). Can. from (kílu, can. inferior + harive, can. the greens). Singh. from (rana, singh. forest + tampalá, singh. greens). Tam. from (pú, tam. flower + kírai, tam. vegetable), from red color. Pers. also (tájikhurús), meaning cock's comb, celosia cristata, linn. Can. also (kiresoppu), meaning small + greens. Tam. also (shánini), by corruption from (shákiní), meaning vegetable. Title otherwise Cock's-comb greens, Flowering greens, Prince's feather. Botanically Amarantus [maurisham] paniculatus, linn., amarantaceæ [vricsham, 106]. Alias Amarantus frumentaceus. A large species 4 to 6 feet, leaves of a reddish brown color. Stem herbaceous, erect; leaves long-petioled, broad-lanceolate, acute; panicles terminal, erect; sepals subulate, acute; stamens five; stigmas three; seed sub-compressed, smooth; utricles wrinkled. Extensively cultivated in coimbatore and neilgherries. Cultivated by hill tribes for the seeds, which are ground into flour, and form a principal article of diet; leaves used as greens.——*Common spinach* (मारिष - márisha, San.; तांबडीमाठ - támbadímát'ha, Mahr.; भाज्जि - bhájji, Conc.; ماٹ کی بھاجی - mátkíbhájí, Dec.; ಹರಿವೆಸೊಪ್ಪು - harivésoppu, Can.; ಪಡ್ಪೆ - padpe, Too.; తోటకూర - tótakúra, Tel.; සුදුතම්පලා - sudutampalá, Singh.; தண்டுக்கீரை - tandukkírai, Tam.). San. from (mrish, san. to endure). Mahr. from (támbadá, mahr. red + mát'ha, mahr. pot-herb). Dec. from sanscrit. Can. from (hari, can. to cut + soppu, can. greens). Tel. from (tóta, tel. garden + kúra, tel. herb). Singh. from (sudu, singh. white + tampalá, singh. greens). Tam. from (tandu, tam. stem + kírai, tam. vegetable). Mahr. also (bhájí), meaning esculent vegetable. Hind. also (dat); (datkíbhájí). Can. also (chivikesoppu), meaning to chew + greens; (kunambavugida). Tel. also (perugutótakúra), meaning plucking + the plant; (mokkatótakúra), meaning stump + the plant; (errratótakúra), meaning red + the plant; (perugukúra), meaning plucking + herb; (tellatótakúra), meaning white + the plant; (peddatótakúra), meaning large + the plant. Singh. also (sulukúra). Tam. also (tandangírai), meaning stem + vegetable; (kullattandukkírai), meaning short + the plant; (vellaittandukkírai), meaning white + stem + greens. Title otherwise Garden greens. Botanically Amarantus [maurisham] blitum, var. oleraceus, linn., amarantaceæ [vricsham, 106]. Alias Euxolus oleraceus. Stem erect or ascending, striated, glabrous, whitish; leaves petioled, ovate, very obtuse, emarginate, rather wrinkled, pale green; spikelets axillary, shorter than the petiole, a little branched; spikes terminal, erect, abbreviated, thickish, rather obtuse, dense, rigid; flowers closely clustered, pale green; calyx twice the length of the bracts; utricles ovate, rather acute, smooth. Superior stems are peeled and eaten as asparagus.——*Field spinach* (अल्पमारिष - alpamárisha, San.; چری کی بھاجی - churíkíbhájí, Dec.; ಗಿರಕಸಾಲೆ - girakasále, Can.; చిర్రికూర - chirrikúra, Tel.; ചെറുചീര - cheruchíra, Mal.; சிறுகீரை - shirugírai, Tam.). San. from (alpa, san. small + márisha, san. amarantus blitum, var. oleraceus, linn.). Dec. from tamul. Can. from (gíru, can.

small + kasále, can. herb). Tel. from (chiru, tel. small + kúra, tel. herb). Mal. from (cheru, mal. small + chíra, mal. greens). Tam. from (shiru, tam. small + kírai, tam. vegetable). San. also (ghanarava), meaning cloud + roar; (méghanáda), meaning cloud + roar. Can. also (kírakasále), meaning parrot + herb; (handikíre), meaning pig + greens. Tam. also (kammai), meaning that which is dark. Title otherwise Pig's greens. Botanically Amarantus [maurisham] campestris, willd., amarantaceæ [vricsham, 106]. Of rapid growth; root demulcent.——*Garden spinach* (لال ساگ - lálság, Hind. and Dec.; ಬಿಳಿದಂಟು - bilidantu, Can.; కొయ్యతోటకూర - koyyatótakúra, Tel.; அறைக்கீரை - araikkírai, Tam.). Hind. from (lál, hind. red + ság, hind. greens). Can. from (bili, can. white + dantu, can. stalk). Tel. from (kóyu, tel. to cut + tótakúra, tel. amarantus blitum, var. oleraceus, linn.). Tam. from (aru, tam. to cut + kírai, tam. vegetable); from leaves being plucked for use; as distinguished from (mulaikkírai), where the whole plant is pulled out with roots for use. Can. also (kempudantu), meaning red + stalk. Tel. also (tótakúra), meaning garden + herb. Tam. also (kuppaikkírai), meaning dung hill vegetable. Title otherwise Flower gentle, Joseph's coat, Round-headed amaranth, Three-colored amaranth, Tricolor. Botanically Amarantus [maurisham] gangeticus, linn., amarantaceæ [vricsham, 106]. Stem erect, furrowed and striated, glabrous, dark red, or greenish; leaves long-petioled, ovate or lanceolate-ovate, somewhat obtuse, dark green, sometimes purple below; spike terminal, very short, ovate, stiff; glomerules axillary, ovate; flowers thick, reddish-green; calyx shorter than the bracts; utricles enclosed in the calyx, two to three-toothed at the apex, smooth; flowering in the rains. Varieties many, differing chiefly in color from green to bright red.——*Red spinach* (ఎర్రతోటకూర - erratótakúra, Tel.; செந்தண்டுக்கீரை - shendandukkírai, Tam.). Title from foliage. Tel. from (erra, tel. red + tótakúra, tel. herb, amarantus blitum, var. oleraceus, linn.). Tam. from (shem, tam. red + tandu, tam. stem + kírai, tam. vegetable). Title otherwise Purple spinach. Botanically Amarantus [maurisham] atropurpureus, roxb., amarantaceæ [vricsham, 106]. Erect; leaves lanceolate, reddish-purple above, dark purple beneath; sepals four to five, cuspidate; stamens eight; spike terminal; glomerules axillary; utricles shorter than the calyx, wrinkled.——*Rose spinach* (گل تاش - gulitásh, Dec.; ఎర్రకాడతోటకూర - errakádatótakúra, Tel.). Tel. from (erra, tel. red + káda, tel. stem + tótakúra, tel. amarantus blitum, var. oleraceus, linn.). Title otherwise Floramor, Florimer, Lovelies-bleeding, Thrumwort, Velvet flower. Botanically Amarantus [maurisham] caudatus, linn., amarantaceæ [vricsham, 106]. Alias Amarantus cruentus. Difficult to distinguish from brown spinach; plant smaller, with the leaves obtuse at the tip; more globose softer masses of smailer red-green or white flowers on the thryse, the terminal spike of which is very long, thick and drooping; acicular bracts shorter and not squarrose; sepals shorter, broader, more obtuse and usually obovate-oblong; utricle and seeds smaller; drooping tail-like flower-stems of crimson flowers.——*Stunted spinach* (ದಗ್ಲಿಸೊಪ್ಪು - daglisoppu, Can.; చిలకతోటకూర - chilakatótakúra, Tel.; குள்ளத்தண்டுக்கீரை - kullattandukkírai, Tam.). Title from size. Can. from (taggu, can. sort + soppu, can. greens). Tel. from (chilaka, tel. parrot + tótakúra, tel. amarantus blitum, var. oleraceus, linn.). Tam. from (kullam, tam. shortness + tandu, tam. stem + kırai, tam. vegetable). Tel. also (chilakalakúra), meaning parrot + herb. Title otherwise Parrot spinach. Botanically Amarantus [maurisham] viridis, linn., amarantaceæ [vricsham, 106]. Alias Amarantus fasciatus; Euxolus caudatus. Stem erect, angularly striated, glabrous, green; leaves long-petioled, ovate or rhomb-ovate, narrowing at both ends, bluntish, emarginate, glabrous, green; spikes ascending, somewhat interrupted below, more compact and sub-cylindrical above; flowers sessile, aggregated in dense glomerules, green; bracts longer than the sepals; utricle globose, pointed very rough; sepals three; in waste ground.——*Thorny spinach* (कण्टकशाकिनी - kantakashákiní, San.; कांटेमाठ - kántémát'ha, Mahr.; کانٹے ماٹ - kántemát, Hind. and Dec.; ಮುಳ್ಳುದಂಟು - mulludantu, Can.; ముండ్లతోటకూర - mundlatótakúra, Tel.; മുള്ളഞ്ചീര - mullañchíra, Mal.; කටුතම්පලා - katutampalá, Singh.; முள்ளுக்கீரை - mullukkírai, Tam.). Title from spines on leaves. San. from (kantaka, san. thorn + sháka, san. greens). Mahr. from (kántá, mahr. thorny + mát'ha, mahr. amarantus gangeticus, linn.). Hind. from (kantá, hind. thorn + mát, hind. amarantus gangeticus, linn.). Can. from (mullu, can. thorn + dantu, can. stalk). Tel. from (mullu, tel. thorn + tótakúra, tel. amarantus blitum, var. oleraceus, linn.). Mal. from (mullu, mal. thorn + chíra, mal. greens). Singh. from (katu, singh. thorny + tampalá, singh. greens). Tam. from (mullu, tam. thorn + kírai, tam. vegetable). Mahr. also (kántébhájí), meaning thorny pot-herb. Hind. also (kántárájgírá), meaning thorny amaranth. Can. also (mulluharive), meaning thorn + amarantus gangeticus, linn. Tel. also (nalladoggali), meaning black + amarantus polygamus, linn.; (erramulugórinta), meaning red + barleria prionitis, linn. Title otherwise Prickly spinach, Red nail-dye. Botanically Amarantus [maurisham] spinosus, l., amarantaceæ [vricsham, 106]. Erect. 1-3 feet, somewhat striated, glabrous, reddish; leaves long, petioled, rhomb-ovate, or lanceolate-oblong, with two spines in the axils; panicles sparingly branched; spikes erect, cylindric, acute, terminal ones long, stiffish, lateral ones middle-sized; flowers dense, green; utricles two to three-cleft at the top, somewhat wrinkled; bracts unequal, bearded; seed lenticular, polished, black; troublesome to gather on account of thorns. Poultices made of bruised leaves. Makes tolerable spinach. Ashes used as mordant [cauram].——*Wild spinach* (காட்டுச்சிறுகீரை - káttuççirugírai, Tam.). Tam. from (kádu, tam. forest + shiru, tam. small + kírai, tam. vegetable). Title otherwise Fine-leaved amaranth. Botanically Amarantus [maurisham] tenuifolius, willd., amarantaceæ [vricsham, 106]. Alias Mengea tenuifolia. Herbaceous; stem erect, angled, striated, green; leaves lanceolate-linear or linear, much attenuated at the base, glabrous, glaucous-green; nerves prominent below; glomerules shorter than the petiole, subternate, few-flowered, rather lax; bracts lanceolate, green, nerved; sepal lanceolate, pale-greenish; stamens one rarely two; ovary obovate; utricle five-ribbed, smooth, green; seed lenticular, polished, black; flowers green; flowering in the rainy season. A weed, with clusters of green flowers proceeding from the axils of the leaves; stem much branched; found everywhere.

MAURITIUS (مورش - moras, *Hind.*; மோரிசு - mórísu, *Tam.*). Known also as Isle of France. An island in the Indian ocean belonging to Great Britain. Used by the lower orders as synonym for transportation.——*Mauritius elemi* (مورش کانری - moraskánari, Malay). Same as Elemi.——*Mauritius plum* (पहार - pahára, Mahr.; مورش کا پھل - moraskáphal, Hind.; కానరేగు - kánarégu, Tel.; ବଳିବଇଁଚ - balibainoho, Oor.; උගුරැස්ස - ugurassa, Singh.; சொத்தைக்களா - shottaikkalá, Tam.). Title from habitat Tel. from (kána, tel. forest + régu, tel. jujube tree, zizyphus jujuba, lamk.). Tam. from (shottai, tam. worm eaten + kalá, tam. the plant, carissa genus) [forest bair, tomi tomi]. Oor. also (bonicha). Title otherwise Batoko plum, Shining-leaved flacourtia. Botanically Flacourtia [swaudoocantacam] ramontchi, l'her., bixineæ [vricsham, 14]. Alias Flacourtia sapida; Stigmarota africana. Tree; thorns few, naked; leaves roundish-ovate or oblong; flowers diœcious; stigmas five to nine; racemes terminal; flowers minute, greenish; flowering in the cold season. Fruit roundish, pulpy, edible; hard and close-grained wood.

MAURY (மாரி - mári, *Tam.*). Rain [mazhay]. There is a saying of Avvay:—மாரியல்லது காரியமில்லை—"Without "rain there is no doing;" nothing succeeds.——*Maury caulam* (மாரிக்காலம் - márikkálam, Tam.). From (above + kála, san. time). Monsoon [q.v.] season.——*Maury caur* (மாரிக்கார் - márikkár, Tam.). From (above + kár, tam. the crop). Caur crop growing and maturing during rains [caur, paddy].

MAUSAM (मास - mása, *San.*; మాసము - másamu, *Tel.*). From (má, san. to measure) [mau]. Month [caulam]. Primarily the time in which the moon [chundran] revolves round the earth [bhoomy]. But according to the details of astronomical calculation [maunam] there are several varieties even of this. There is also the artificial month formed by dividing the time of the earth's revolution [bhaganam] round the sun [sooryan] into twelve more or less equal portions. There is also the civil month formed by counting one of the other forms of month by sunrises only.——(1) For purposes of the S. indian calendar [punchaungam] the month may be regarded under five principal heads:—the synodical in its simplest relations; the soli-sidereal, generally called for short solar; the synodical in its special relations to the Hindoo luni-solar year; the luni-sidereal; the tropical.—"*a*" The synodical month is that from new moon to new [amavausyay, shooclaudy]. It appears in its simple form in the year of the Hijra [q.v.] era [saca] only. This is a purely lunar event; so much so that it is reckoned from the time of actually seeing the new crescent moon [piray], allowing however not more than a day's variation to occur for this [maheena]. The mean value of the synodical month is 29 days 12 hours 44 minutes 2·8 seconds.—"*b*" The solar, otherwise soli-sidereal, month here in use is the twelfth part of the period during which the sun makes a complete apparent circuit [bhaganam] round the heavens [bhagolam] from star to star, such being a mean period allowing for nutation of 365 days 6 hours 9 minutes 9·6 seconds [madhyama sowra maunam]. The twelfth part is however not an exact duodenary division, but the period during which the sun so apparently travelling traverses an arc equal to a twelfth or 30° of the great circle [mundalam] described; and that owing to the varying rate of progress in northern and southern declination [ayanam] is a variable quantity. The following are the durations of the solar months, according to the computations [maunam] of Soorya siddhauntam:—

Month.				Absolute duration of each.	The same collectively.
No.	Solar Names.	Soli-lunar names.	Zodiacal sign.		
				D. G. V. P. S.	D. G. V. P. S.

The duration of these months, which is that used by Telinga astronomers, differs from those of the Arya siddhauntam only in the ratio of 365 d., 15 g., 31 v., 31 p., 24 s., to 365 d., 15 g., 31 v., 15 p. The strictly orthodox Tamul astronomers however prefer the Arya siddhauntam reckonings even in their lunar computations. These solar months are used in the year of the Bengalee san, Tamul saca, and Malayalam parshoorama eras; see description of the solar reckoning at vol. I, 610 [maunam]. The original theory of the solar year and months was that the year began with the vernal equinox [maishauyanam], and that the months represented the sun's path in certain fixed tracts of the visible fixed stars [nacshatram] mapped out from the vernal equinox as a starting point. But this assumed a permanent correspondence between the equinoctial points [ayanam] and the sphere of stars which does not exist, the equinoctial points really travelling round the earth's equator [niracsham] against the stars at a rate giving a complete revolution in 25,868 years, sufficient to cause complete dislocation within the period of astronomical observations. The present Indian nomenclature of solar months, which this country shares with several other nations, must have had its origin when the sun stood somewhere in the constellation or tract of stars designated Maisham [q.v.] or the Ram, the European aries, at the same time that he was at the vernal equinox; and probably when he was about in the same longitude with Hamel [q.v.] the brightest star in the Ram. This was so about 250 years B.C. The first arc of 30° of the sun's course in the ecliptic [craunty mundalam] dating from the vernal equinox continues to be called Maisham, but the stars which were then the first constellation [nacshatram] of the solar zodiac [raushy chuckram] continue also to be called Maisham, though they have now receded so as to be about 30° of space or a month in time behind the real solar zodiac. Hence a double system of astronomy; one part allowing for precession [crauntypauta gaty] and following the sun [sooryan] in its relation to the earth [bhoomy] and the seasons [ritoo], the other not allowing for precession and following the sun in its relation to the stars alone. As a further complication the present Sowra maunam or computation of solar or soli-sidereal years from a fixed sidereal starting-point, though still retaining the Maisham terminology, had its epoch or epochs later than the above. See the whole matter set out in detail under Madhyama sowra maunam [maunam]. These sidereal starting-points are very obscure, there having been no observations in correction for a long time past, and the present calendar [punchaungam] depending solely on tables giving the number of revolutions [bhaganam] of heavenly bodies [graham] in assumed periods. The most definite epoch is that given by working back from the present retarded date of the new year, which is at 12th April, while the real vernal equinox is at 21st March. The net result of all the above circumstances is represented in the three following propositions:—Indian astronomers for the finer portions of astronomy [jyotisham] and astrologers recognize precession [ayanaumsham] and consequently the moveable character of the true solar and lunar zodiacs [raushy chuckram]; for the purposes of the calendar [maunam, punchaungam], the year is held to begin when the sun is in the meridian of some fixed point in the anciently conceived fixed sidereal zodiac, and owing to precession begins now about 12th April or twenty-two days behind the true vernal equinox; the names of the months in astrology follow the nomenclature instituted when the equinox coincided with the beginning of the stars Maisham, and are called Maisham [q.v.], Vrishabham [q.v.], &c., or in other words adopt the nomenclature of the old Chaldean solar zodiac. The soli-sidereal month varies in length, as above said, with declination [ayanam, craunty]; its period being that during which the sun stays in each sign [raushy]. Its mean theoretic length is thirty days ten hours twenty-nine minutes four seconds. For ordinary civil purposes the duration of the above months are modified in the following way:—if the sun enters a new division between sunrise and midnight, the day of his entrance is the 1st of the month; if he enters a new division between midnight and sunrise, the month commences at the following sunrise. Before leaving the question of the soli-sidereal year and months, it may be repeated here, as was said under Madhyama sowra-maunam [q.v.], that there was an ancient period when the bull and not the ram was the first constellation even of the solar zodiac; and this fact is recognized alike in Hindoo, Greek, and Roman literature. Indeed it will appear from certain inference, to be mentioned later on, that the luni-solar year of southern as opposed to northern india had its epoch during this period.—"*c*" The synodical month of the Hindoo luni-solar year, Chaundra maunam [q.v.], is the month adopted to make up the luni-solar N. indian year of the Samvat [q.v.] era [saca], and similarly to make up the luni-solar Teloogoo and Canarese year of the Vicramadityan [q.v.] era; the two eras here being the same under different names. See description of the lunar reckoning at vol. I ,611. It is the same in length with the synodical lunar month first mentioned. It is in S. india the lunar month from new to new, mathematically computed [amavausyay, mookhyam, shooclaudy]. Owing however to the peculiar grafting of the lunar principle on the solar year, it has special features as to its commencement, its liability to intercalation [adhicam], and its nomenclature. The first month of the luni-solar year in S. india begins with the moment of true conjunction between sun and moon [arcaindoo sangamam] next preceding the beginning of the solar year [tamul new year] as above computed by either Soorya or Arya siddhauntam [q.v.]. This gives a date varying by about twenty-nine days before 12th April, Gregorian style, at the present period. In some parts of N. india as a variation the year begins with the full moon which precedes the beginning of the solar year as above computed by the Soorya or Arya siddhauntam [gownam, krishnaudy], and gives similarly a date varying by about twenty-nine days before 12th April, Gregorian style, at the present period. Twelve of these months fall short of the soli-sidereal year by about eleven days each year, and require an intercalary month about every three years; for mode of intercalation see Adhicam and Chaundra maunam. For nomenclature a selection has been made of twelve names from the twenty-seven fixed constellations of the lunar zodiac [nacshatram]. In those months the moon is held to be full in those nacshatrams; probably this was so in the year when the Chaundra maunam was arranged. It may be noted that, under such system of nomenclature, the sidereal division [raushy, sancraunty], which gives the name to the solar month, owing to the sun being therein, will be exactly opposite in the heavens to this sidereal division [nacshatram] which gives its name to the coincident luni-solar month, owing to the full moon being therein; for the full moon [powrnimay] must always be in an opposite part of the heaven sidereally to the sun. For civil purposes the same practical arrangement is made as above said for the soli-sidereal year. For divisions of the synodic month, see Pacsham and Tity.—"*d*" The luni-sidereal month is the period of the return of the moon from star to star. It has a mean length of 27 days 7 hours 43 minutes 11·5 seconds. It is used only by astrologers [nacshatram, chaundra maunam].—"*e*" The tropical month is the month of the moveable lunar zodiac abovementioned, and is from the moon passing the equinox till her return thereto. Its value is 27 days 7 hours 43 minutes 4·7 seconds. It is used here by astrologers and for the finer parts of astronomy.——**(2)** The following table shows certain astronomical data, and the nomenclature of the months according to seven different styles beginning in each case with about 12th April.—"*a*" As to the astronomical data which precede the month nomenclature columns. Columns 1 and 2 show the time divisions of the Hindoo year exhibited in terms of the European reckoning; the Hindoo year is supposed to date from the vernal equinox, but from having neglected precession for about 1400 years it begins now in European reckoning not on 21st March which is the true vernal equinox but on 12th April [madhyama sowra maunam]. Column 3 is the list of the corresponding real arcs of the sun's path, which allows for precession, is adopted by Europeans for all purposes, and is adopted by Hindoos for scientific calculations [ayanaumsham, madhyama sowra maunam]. Column 4 is the list of corresponding zodiacal constellations in which the sun at the periods named in column 1 now stands; it will be seen that as the Hindoo year begins nearly a month late, so the sun is at that later period about among the original stars which gave their names to the solar month. This comparative agreement in the nomenclature is claimed by the Hindoo system as an advantage, but it is of course at the expense of any agreement in respect of the seasons [ritoo]. Column 5 is the list of constellations originally designed to map out the moon's path, one to a day; but used also to indicate the corresponding stages of the sun's path, dividing the year into twenty-seven [cauntey]. Column 6 is the list of constellations on the opposite side of the heavens from those just mentioned, being those in one of which with slight variations the full moon always stands at the present day in that particular solar month; shown here as being the origin of the names in columns 11, 12 and 13.—"*b*" As to the month nomenclature columns. The solar columns are placed

Month-names. See Mausam (2) page 495.

Number of the month.	Astronomical Data.					Solar nomenclature. Used for purposes of astrology all through presidency. Used for purposes of civil calendar [punchaungam] in Malabar, where Parshooraman [q.v.] era [saca] employs them.				Soli-lunar nomenclature. Used for purposes of civil calendar except in Malabar and N. of presidency. Brihaspaty [q.v.] cycle and Shalivauhanan [q.v.] Saca [q.v.] employ them.		Lunar nomenclature. Used for all purposes of the civil calendar in N. of presidency. Vicramadityan [q.v.] era employs them.	Number of the month.
	Period in terms of Gregorian calendar.	Approximately corresponding monthly arc of sun's path [caesham] in ecliptic or moveable solar zodiac [craunty mundalam] beginning with vernal equinox [maishauyanam]. Latin, Sanscrit, English, number in european system, and sign.	Sidereal constellation [nacshatram] of the fixed Hindoo soli-sidereal zodiac [raushy] in which the sun now stands; being about 1 month later than column 3. Sanscrit, English, number, and sign.	Sidereal constellation [nacshatram] of the fixed lunar zodiac [bhamundalam] in which the sun now stands. Called for this purpose in Tel. and Can. countries Caurtey [q.v.].	Sidereal constellation of same in one of which full moon [powrnimay] now stands; being 6 months different from col. 5; hence titles in cols. 11—13.	Coorg fixed solar months.	Tooloo fixed solar months.	Malayalam fixed solar months.	General fixed solar months.	General Dravidian fixed solar months borrowing lunar names. Here called soli-lunar names.	N. indian fixed solar months; same as in column 11, shown here because names are shifted one month forward.	Approximately corresponding Teloogoo and Canarese moveable lunar months.

first, for though there may have been in S. india an anterior lunar reckoning, for which see vol. I, 609, it has not left any trace that is yet known in the nomenclature; and the original indigenous nomenclature is the solar held in common with such nations as the Chaldeans, followed in point of time by the luni-solar borrowed from the Aryans. Column 7 are the old Coorg solar months, the names being mainly from the Sanscrit names of solar zodiacal signs [raushy]. Column 8 or the old Tooloo solar months, the names being mostly original. Columns 9 and 10 are the general old solar months, with names corrupted from the Sanscrit names of the solar zodiac [raushy chuckram]; see the heading for usage. Column 11 are for period identically the same months as column 10, but the lunar names have been borrowed and attached; see the heading for usage. Column 12 is explained by the heading, and see below. Column 13 are pure lunations [chaundramausam] and are for period variable differing from the other columns by from ten to thirty days, and being kept from going beyond that by the triennial intercalations [adhicam]; it is on account of the great inconvenience of this month system that the Teloogoo and Canarese use caurteys [q v.], otherwise solar residences in the lunar mansions [nacshatram], for purposes of agriculture [vellaumay] and the seasons [ritoo]; see column 5.—"*c*" The singular fact should finally be noticed that though the N. india year begins at the same time as in S. india, there is an advance by one, in the names merely, of the months in the soli-lunar nomenclature, as per column 12; Veishaukham in that case being first month of year in N. india, and Chittray being first month in S. india. It is evident that this terminology arose when the Bull [vrishabham] headed the zodiac [raushy chuckram], and has not since been corrected. For this see the remarks under Madhyama sowra maunam:—[*See page* 494].

—(3) The following are particulars about each of the above named months showing the derivation of the names.——*Aghan* (اگہن - aghan, Hind.). From (agra, san. front + háyana, san. year). So called as being first month of a most ancient style when this or Margashiram headed the list [madhyama sowra maunam]. Eighth N. indian soli-lunar.——*Alpisy* (ஐப்பசி - aippasi, Tam.). Corruption of eippasy.——*Arpisy* (ஐப்பசி - aippasi, Tam.). Corruption of eippasy.——*Ashaudh* (اساڑھ - asárh, Hind.). From (ashádha, san. invincible, epithet of twentieth and twenty-first nacshatram); from the full moon occurring in that month in or near that nacshatram. Third N. indian soli-lunar.——*Ashaudham* (आषाढ - áshádha, San.). See Ashaudh. Fourth lunar.——*Audrey* (ಅಡ್ರೆ - ádre, Coorg). From (árdrá, san. sixth lunar mansion). Third Coorg solar.——*Audy* (ஆடி - ádi, Tam.). Corruption of ashaudham. Fourth Dravidian soli-lunar.——*Auny* (ஆனி - áni, Tam.). From (háni, san. loss). Third Dravidian soli-lunar. This refers to S.W. monsoon [q.v.]. Also applied in Tamul to Jyeshtay, the eighteenth nacshatram.——*Aushweejam* (आश्वयुज - áshvayuja, San.). From (ashva, san. horse + yuj, san. to join); from the full moon joining the nacshatram Ashwiny [q.v.] in that month. Otherwise Aushwinam. Seventh lunar.——*Aushwinam* (आश्विन - áshvina, San.). From (ashvini, san. the first and horse-headed nacshatram); from the full moon occurring in that month in or near that nacshatram. Otherwise Aushweejam. Seventh lunar.——*Ausin* (آسن - ásin, Hind.). Corruption of aushwinam. Sixth N. indian soli-lunar.——*Auty* (ಅಟಿ - áti, Can.). Corruption of ashaudham. Fourth Tooloo solar.——*Auvany* (ஆவணி - ávani, Tam.). Corruption of shrauvanam. Fifth Dravidian soli-lunar. Cf. Auny.——*Baisha* (ಬೇಶ - bésha, Can.). Means sultry. Second Tooloo solar.——*Beisaukh* (بیساکہ - baisákh, Hind.). Corruption of veishaukham. First N. indian soli-lunar.——*Bhaudon* (بھادون - bhádún, Hind.). Corruption of bhaudrapadam. Fifth N. indian soli-lunar.——*Bhaudram* (भाद्र - bhádra, San.). Short for bhaudrapadam. Sixth lunar.——*Bhaudrapadam* (भाद्रपद - bhádrapada, San.). From (bhadrapadá, san. auspicious-footed; epithet of the twenty-fifth and twenty-sixth nacshatram); from the full moon of the month occurring about that nacshatram. Sixth lunar.——*Bontail* (ಬೊಂತೆಲ್ - bontél, Can.). Seventh Tooloo solar.——*Britchiyaur* (ಬ್ರಿಚ್ಚಿಯಾರು - briççiyáru, Coorg). From (vrishchika, san. the month so called + ñáyar, mal. month). Eighth Coorg solar.——*Cakkada* (ಕಕ್ಕಡ - kakkada, Coorg). Corruption of carcatacam. Fourth Coorg solar.——*Canyay* (कन्या - kanyá, San.). From (kanyá, san. virgin); as the sun stands in that zodiacal constellation. Sixth general solar.——*Carcatacam* (कर्कटक - karkataka, San.). Means crab; as sun stands in that zodiacal constellation. Otherwise Catacam. Fourth general solar.——*Cartail* (ಕಾರ್ತೆಲ್ - kártél, Can.). Third Tooloo solar.——*Catacam* (கடகம் - kadagam, Tam.). Corruption of carcatacam. Fourth general solar.——*Caudyaur* (ಕಾಡ್ಯಾರು - kádyáru, Coorg). Second Coorg solar.——*Caurteecam* (कार्तिक - kártika, San.). From (krittiká, san. the pleiades or third nacshatram); from the full moon of the month occurring in or near that nacshatram. Eighth lunar.——*Caurtigay* (கார்த்திகை - kárttigai, Tam.). Form of caurteecam. Eighth Dravidian soli-lunar.——*Caurtik* (کارتک - kártik, Hind.). Form of caurteecam. Seventh N. indian soli-lunar.——*Cheit* (چیت - chait, Hind.). Form of cheitram. Twelfth N. indian soli-lunar.——*Cheitram* (चैत्र - chaitra, San.). From (chitrá, san. the fourteenth nacshatram); from the full moon of the month occurring in or near that nacshatram. First lunar.——*Chingom* (ചിങ്ങം - chinnam, Mal.). Corruption of simham; means lion. Fifth Mal. solar.——*Chingyaur* (ಚಿಗ್ನ್ಯಾರು - chignyáru, Coorg). From (simha, san. the month, so called + ñáyar, mal. month). Fifth Coorg solar——*Chittray* (சித்திரை - shittirai, Tam.). Form of cheitram. First Dravidian soli-lunar. There is a Tamul proverb:—சித்திரை மாதத்திற் செல்வன் பிறந்தால் சீரும் சிறப்பும் கெடும்—"If a son is born in Chittray, "the state and reputation of the family will be ruined."——*Coombham* (कुम्भ - kumbha, San.; കുംഭം - kumbham, Mal.). Means water-pot; as the sun stands in that zodiacal constellation. Eleventh general solar.——*Coombyaur* (ಕುಂಬ್ಯಾರು - kumbyáru, Coorg). From (kumbha, san. the month so called + ñáyar, mal. month). Eleventh Coorg solar.——*Coony* (ಕೂನಿ - kúni, Can.). Corruption of canyay. Sixth Tooloo solar. Otherwise Nirnaula.——*Coony* (கூனி - kúni, Tam.). Short for Pungoony in poetry. Twelfth Dravidian soli-lunar. There is a Tamul proverb:—ஆனி அடியிடாதே கூனி குடிபோகாதே—"Do not begin to build in Auny, nor set out to occupy "a house in Coony."——*Cunny* (കന്നി - kanni, Mal.; கன்னி - kanni, Tam.). Corruption of canyáy. Sixth Malayalam solar.——*Cunnyaur* (ಕನ್ನ್ಯಾರು - kannyáru, Coorg). From (kanyá, san. the month so called + ñáyar, mal. month). Sixth Coorg solar.——*Darmeyaur* (ದರುಮೆಯಾರು - darumeyáru, Coorg). From (dhanus, san. the month so called + ñáyar, mal. month). Ninth Coorg solar.——*Dhanoo* (ധനു - dhanu, Mal.). Means bow. Ninth Malayalam solar.——*Dhanoos* (धनुस् - dhanus, San.; ധനു - dhanu, Mal.). Means bow; as the sun stands in that zodiacal constellation. Ninth general solar.——*Eippasy* (ஐப்பசி - aippasi, Tam.). From (asuvathi tam. corruption of ashvayuj, san. ashvini, the first nacshatram); from the full moon occurring in that month in or near the nacshatram ashwiny. Otherwise Arpisy. Seventh Dravidian soli-lunar.——*Jaith* (جیٹھ - jeth, Hind.). Corruption of jyeshtam. Second N. indian soli-lunar.——*Jaurdey* (ಜಾರ್ದೆ - járde, Can.). Eighth Tooloo solar.——*Jyeshtam* (ज्येष्ठ - jyésht'ha, San.; జ్యేష్ఠము - jyéshtamu, Tel.). From (jyésht'há, san. eldest, the name of the eighteenth nacshatram); from the full moon occurring in that month in or near that nacshatram. Third lunar.——*Macaram* (मकर - makara, San.; മകരം - makaram, Mal.). Means dolphin; as the sun stands in that zodiacal constellation. Tenth general solar.——*Maidom* (മേടം - métam, Mal.). Corruption of maisham. First Malayalam solar.——*Maisham* (मेष - mésha, San.; மேடம் - médam, Tam.). Means ram; as the sun stands in that zodiacal constellation. First general solar.——*Margasheersham* (मार्गशीर्ष - márgashírsha, San.). From (mrigashiras, san. the fifth deer-headed nacshatram); from the full moon occurring in that month in or near that nacshatram. Also called Agrahayanam, as beginning old style solar year. Ninth lunar.——*Margashiram* (మార్గశిరము - márgashiramu, Tel.). Ninth lunar.——*Maugh* (ماگھ - mágh, Hind.). Form of maugham. Tenth N. indian soli-lunar.——*Maugham* (माघ - mágha, San.). From (maghá, san. tenth lunar asterism); from the full moon occurring in that month in or near that nacshatram. Eleventh lunar.——*Maulyaur* (ಮಾಲ್ಯಾರು - málváru, Can.). From (mágha, san. the month). Tenth Coorg solar.——*Maurgaly* (மார்கழி - márgazhi, Tam.). Corruption of margasheersham. Ninth Dravidian soli-lunar. There is a Tamul proverb:—ஐப்பசிமாதத்து எருமைக்கடாவும் மார்கழி மாதத்து நம்பியானும்சரி—"A buffalo in Arpisy and a Veishnava bramin in Maurgaly are "alike."——*Maushy* (மாசி - mási, Tam.). Corruption of maugham. Eleventh Dravidian soli-lunar.——*Meenam* (मीन - mína, San.; മീനം - mínam, Mal.). Means fish; as the sun stands in that zodiacal constellation. Twelfth general solar.——*Meenyaur* (ಮೀನ್ಯಾರು - mínyáru, Coorg). From (mína, san. the month so called + ñáyar, mal. month). Twelfth Coorg solar.——*Mitoonam* (मिथुन - mit'huna, San.; മിഥുനം - mit'hunam, Mal.). Means the twins; as the sun stands in that zodiacal constellation. Third general solar.——*Mye* (ಮಾಯಿ - máyi, Can.). Corruption of maushy. Eleventh Tooloo solar.——*Nijaushwinam* (निजाश्विन - nijáshvina, San.). From (nija, san. real + áshvina, san. the month). The proper month of Aushwinam in contradistinction to Adhica aushwinam, the intercalated lunar month.——*Nirnaula* (ನಿರ್ನಾಲ - nirnála, Can.). Otherwise Coony. Sixth Tooloo solar.——*Pagg* (ಪಗ್ಗು - paggu, Can.). First Tooloo solar.——*Perardey* (ಪೆರಾರ್ದೆ - perárde, Can.). Ninth Tooloo solar.——*Phaugoon* (پھاگن - phágun, Hind.). Corruption of phaulgoonam. Eleventh N. indian soli-lunar.——*Phaulgoonam* (फाल्गुन - p'hálguna, San.). From (p'halguní, san. the eleventh and twelfth nacshatrams); from the full moon occurring in that month in or near that nacshatram. Twelfth lunar.——*Poorataushy* (புரட்டாசி - purattási, Tam.). From (prósht'hapáda, san. bench-footed, epithet of the twenty-fifth nacshatram); from the full moon

occurring in that month in or near the nacshatram Proshtapadam, more commonly Bhaudrapadam. Sixth Dravidian soli-lunar.——*Poosh* (پوس - pús, Hind.). Corruption of pooshyam. Ninth N. indian soli-lunar.——*Pooshyam* (पुष्य - pushya, San.). Means flower, epithet of the eighth nacshatram; from the full moon occurring in that month in or near that nacshatram. Otherwise Powshnam or Powshyam. Tenth lunar.——*Pooyintel* (ಪುಯಿಂತೆಲ್ - puyintél, Can.). Corruption of pooshyam. Tenth Tooloo solar.——*Powshnam* (पौष्ण - paushna, San.). Form of pooshyam. Tenth lunar. Otherwise Pooshyam.——*Pungoony* (பங்குனி - panguni, Tam.). From (p'halguní, san. name of the eleventh and twelfth nacshatrams); from the full moon occurring in that month in or near that nacshatram. Twelfth Dravidian soli-lunar.——*Sauwan* (ساون - sávan, Hind.). Corruption of shrauvanam. Fourth N. indian soli-lunar.——*Shrauvanam* (श्रावण - shrávana, San.). From (shravana, san. the twenty-second nacshatram); from the full moon occurring in that month in or near that nacshatram. Fifth lunar.——*Simham* (सिंह - shimha, San.; சிங்கம் - shingam, Tam). Means lion; as the sun stands in that zodiacal constellation. Fifth general solar.——*Sona* (ಸೋಣ - sóna, Can.). Corruption of shrauvanam. Fifth Tooloo solar.——*Sooggy* (ಸುಗ್ಗಿ - suggi, Can.). Means the spring season. Twelfth Tooloo solar.——*Toleyaur* (ತೊಲೆಯಾರು - toleyáru, Coorg). From (tulá, san. the month so called + ñáyar, mal. month). Seventh Coorg solar.——*Toolaum* (तुला - tulá, San.; തുലാം - tulám, Mal.). From (tulá, san. balance); as the sun stands in that zodiacal constellation. Seventh general solar.——*Tye* (தை - tai, Tam.). From (taisha, san. ancient name for pausha, san. the tenth month); from the full moon occurring in that month in or near the nacshatram Tishyam or Pooshyam. Tenth Dravidian soli-lunar. There is a Tamul proverb:—தை ஈனுப் புல்லும் இல்லே, மாசி ஈனு மரமும் இல்லே—"There is no grass that does not grow in January, nor tree "that does not sprout in February."——*Veishaukham* (वैशाख - vaishákha, San.). From (vishákhá, san. the forked, sixteenth nacshatram); from the full moon occurring in that month in or near that nacshatram. Second lunar.——*Veiyaushy* (வைகாசி - vaigási, Tam.). Corruption of veishaukham. Second Dravidian soli-lunar.——*Vrishabham* (वृषभ - vrishabha, San.). Means bull; as the sun stands in that zodiacal constellation. Second general solar.——*Vrishan* (वृषन् - vrishan, San.). Form of vrishabham. Second general solar.——*Vrishchicam* (वृश्चिक - vrishchika, San.; വൃശ്ചികം - vrishchikam, Mal.). Means scorpion; as the sun stands in that zodiacal constellation. Eighth general solar.——*Yadamyaur* (ಯಡಮ್ಯಾರು - yadamyáru, Coorg). From (edam, can. good + ñáyar, mal. month). First Coorg solar.——*Yedavam* (ഇടവം - itavam, Mal.). Corruption of vrishabham. Second Malayalam solar.——**(4)** The following are different kinds of mausam in astronomy or theology.——*Adhica mausam* (अधिकमास - adhikamása, San.). Means additional + month. An intercalated lunar month [adhicam, chaundra maunam].——*Brahma mausam* (ब्रह्ममास - brahmamása, San.). From (brahma, san. the god + mása, san. month). Thirty of Bramha's days [caulam, 2].——*Chaundra mausam* (चान्द्रमास - chándramása, San.). Means moon + month. Tingal [q.v.]. Ordinary lunar month, the synodical month [shooclaudy]. Under the exceptional Krishnaudy method, the period taken is from full moon to full moon [powrnimay], instead of from new moon [amavausyay] to new moon [caulam, 4, maheena].——*Cshaya mausam* (क्षयमास - kshayamása, San.). From (kshaya, san. destruction + mása, san. month). An expunged lunar month.——*Deva mausam* (देवमास - dévamása, San.). From (déva, san. god + above). Thirty sidereal years [caulam, 2].——*Gowna chaundra mausam* (गौणचान्द्रमास - gaunachándramása, San.). From (gauna, san. secondary + chándramása, san. lunar month). Otherwise Gownam. The lunar month, when reckoned as beginning at full moon instead of new.——*Mookhya chaundra mausam* (मुख्यचान्द्रमास - mukhyachándramása, San.). From (mukhya, san. principal + chándramása, san. lunar month). Otherwise Mookhyam. The lunar month, when reckoned in the ordinary way from new moon to new moon [shooclaudy].——**(5)** The following are the Tamulians' views about the weather in the different months. Cf. Caurtey, Caulam and Caur:—Chittray or april; சித்திரைக்குழப்பம்—"rough "weather or storm in chittray"—fore-runner of the s.w. monsoon [q.v.]; ஆறுமீன்றவோட்டம்—"the transit of the sun "through the pleiades;" regarded by seamen, as a critical or disastrous season, when rough weather is to be looked for. Veiyaushy or may; சோதிமின்னல்—lightning in n.e. before s.w. monsoon; வைகாசிமாதம் ஆற்றில் தண்ணீர்—"in "veiyaushy the river is in flood." Auny or june; ஆனித்தூக்கம்—"auny sleep;" calms in june; ஆனியனையாறு ஆவணிமுழு ஆறு—"in auny half river, in auvany full river." Audy or july; ஆடிக்கரு—"audy clouds;" indicative of plentiful rain in ensuing monsoon; ஆடிக்கருவழிந்தால் மழை குறைந்துபோம்—"if the teeming clouds in audy fail, rains will decrease "in the ensuing season;" ஆடிக்காற்றில் அம்மி ஆகாயத்தில் பறக்கும்—"in audy wind the grindstone roller will fly "in the air." Auvany or august; ஆவணி அழுகற்றூறல்—"in auvany incessant drizzling." Arpisy or october; ஐப்பசிமாதத்து வெய்யலில்அன்று உரித்ததோல் அன்றுகாயும்—"in heat of arpisy the skin dries, the day it is stript off;" ஐப்பசிமாதம் அழுகற்றூறல், கார்த்திகைமாதம் கனமழை;—"in arpisy drizzling; in caurtigay heavy rains;" ஐப்பசிக்கும் கார்த்திகைக்கும் மழை யில்லாவிட்டால் அண்ணனுக்குஞ்சரி தம்பிக்குஞ்சரி—"if the rains of arpisy "and caurtigay fail, the elder and younger brother will be "on a par;" that is, all labour is in vain. Caurtigay or november; கார்த்திகைக்குமேல் மழையுமில்லே கர்ணனுக்குமேல் கொடையுமில்லே—"no rain after caurtigay and "no gift after carnan [q.v.]." Maurgaly or december; கருப்போட்டம்—the southern passage of the clouds, from about december 13th till december 27th, carrying away the surplus water as a reserve for the following months. Tye or january; தையும் மாசியும் வையகத்துறங்கு—"in tye and maushy, "sleep under thatch." Pungoony or march; பங்குனிமாதம் பகல்வழி நடந்தவன் பெரும்பாவி—"he who travels by "day in pungoony is a great sinner;" the sun is so hot [mazhay].

MAUTAH (माता - mátá, *San.*; மாதா - máthá, *Tam.*). From (má, san. to cause) [mau]. A mother.——**(1)** The seven great mautahs or mothers are the following. Cauvery and Chamoondy are sometimes included.——*Brahmy* (ब्राह्मी - bráhmí, San.). The shacty [q.v.] of bramha [q.v.].——*Cauly* (काली - kálí, San.). The black deity.——*Cowmaury* (कौमारी - kaumárí, San.). The shacty of soobramanyan or the son-god.——*Eindry* (ऐन्द्री - aindrí, San.). The shacty of indran [q.v.].——*Maheshwary* (माहेश्वरी - máhéshvarí, San.). The shacty of shiva [q.v.] the great lord.——*Narayany* (नारायणी - náráyaní, San.). The shacty of vishnoo [q.v.].——*Varauhy* (वाराही - várâhí, San.). The shacty of vishnoo in the form of a boar [varauham].——**(2)** *Oolagamautah* (लोकमाता - lókamátá, San.; உலகமாதா - ulagamáthá, Tam.). From (lóka, san. world + máthá, tam. mother). Saraswaty [q.v.]; also lutchmy [q.v.].

MAUTT (మాటు - mátu, *Tel.*). Tel. means screen or covering. An ambuscade for shikar [q.v.].

MAUZY (ماضی - mází, *Hind.*). From (mazú, ar. to precede). Late, former.

MAYAVARAM (மாயவரம் - máyavaram,* *Tam.*). From (máyá, san. goddess kálí + áviram, tam. shepherd village) [man]. Sanscrit name (mayúrapura), meaning peacock + town; also (shrímushna), meaning holy excellent city. Commonly Mauyooram or Gowry mauyooram.——**(1)** Talook, Tanjore district. Tahsildar's pay Rs. 225. Area 282 square miles; pop. 244,835; language Tamul; N. coast of district. Bounded on the south by Nunnilam talook and the French settlement of Caricaul, on the west by Combaconam talook, and on the east by Shiyally talook and the Bay of Bengal, on the north by Shiyally and Chidambaram talooks of South arcot district. The land slopes from west to east. The lands cannot be classed as very fertile. The western portion is best. Soil, western portion clay, eastern portion near the sea sandy. Cloths worn by Hindoo females [sheelay], form the chief article of manufacture. The Cauvery and its branches and the Rajah vycaul branching from the Coleroon furnish irrigation. Camping grounds:—Aukkore, Coottaulam, Illooppaputt, Mayavaram, Perambore, and Tircadayore. Places of archæological interest:—Auttore, Coottaulam, Illooppaputt, Korkay, Manamode, Mayavaram, Moovalore, Nadoocarsy, Nullauday, Peroomullay, Tairezhandore, Tirnandriyore, Tirvaudootoray, Tirvaulolipoottore, Tranquebar, Trivengaud, Vazhoovore. Principal trig. stations, &c.:—Tircadayore, Tranquebar tower. The leading places, &c., in the talook are the following.——*Antaundavapooram* (ஆனந்ததாண்டவபுரம் - ánaithándavappuram, Tam. antándavapuram *). Title from Sanscrit. Sanscrit name (ánandatándavapura), meaning town of shiva, the delightful dancer. Village, Railway station; pop. 1,617; acres 1,369; lat. 11° 09′ 14″; long. 79° 42′; height 27 feet; from Mayavaram N. 3 miles; from Tanjore N.E. 42 miles; from the sea W. 14 miles.——*Cadalangoody* (கடலங்குடி - kadalangudi, Tam.). From (kadalan, tam. a fisherman + kudi, tam. village). Village; pop. 1,326; acres 1,136; lat. 11° 11′; long. 79° 36′; from Mayavaram N.W. 8 miles; from Tanjore N.E. 39 miles; from the sea W. 20 miles.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Coleroon* (கொள்ளடம் - kolladam, Tam.). See sep. title.——*Comal* (கோமல் - kómal, Tam.). From (kó, tam. greatness + mal, tam. fertility). Village; pop. 4,036; acres 3,080; lat. 11° 01′; long. 79° 38′; from Mayavaram S.S.W. 7 miles; from Tanjore N.E. 33 miles; from the sea W. 17 miles.——*Conairirajapooram* (கோனேரிராசபுரம் - kónérirásappuram, Tam.). From (kónéri, tam. proper name + rájá, san. king + pura, san. town); conairirajan's town. Village; pop. 2,097; acres 2,028; lat. 10° 59′; long. 79° 35′; from Mayavaram S.W. 12 miles; from Tanjore E. 30 miles;

from the sea W. 22 miles. Name given originally by Tirmalayya cholan to a tract of country made over to Bramins as a gift at the request of Conairiyappan, one of his ministers.——*Coottaulam* (குற்றாலம் - kuttálam, Tam.). Title from sanscrit. Sanscrit name; ancient (drutikshétra), meaning sacred place of a sage drooty; modern (kuddála), meaning mountain ebony, bauhinia variegata, linn.; from the tree in shiva temple. Village, Railway station; pop. 3,537; acres 1,628; lat. 11° 04′; long. 79° 36′; height 53 feet; from Mayavaram W.S.W. 7 miles; from Tanjore N.E. 34 miles; from the sea W. 20 miles. Old Shiva temple with inscriptions. Weaving centre.——*Mayavaram* (மாயவரம் - máyavaram, Tam.). See below.——*Munjalaur* (மஞ்சளாறு - manjaláru, Tam. manjayár *). From (mañjal, tam. saffron, curcuma longa, roxb. + áru, tam. river); so called as it is munjal cawny or saffron property, i.e., female property [streedhanam], having been dug by poligar [q.v.] shivanauta naick for his daughter to bathe in. Sanscrit name (haridránadí), meaning the same. River.——*Oolava mungalam* (உழவன்மங்கலம் - uzhavanmangalam, Tam.). From (uzhavan, tam. ploughman + mangala, san. prosperity). Village; pop. 2,249; acres 1,373; lat. 11° 02′; long. 79° 52′; from Mayavaram E.S.E. 12 miles; from Tanjore E. 49 miles; from the sea W. 2 miles.——*Perambore* (பெரம்பூர் - perambúr, Tam.). From (pirambu, tam. cane + úr, tam. village). Village; pop. 720; acres 1,088; lat. 11° 02′; long. 79° 46′; from Mayavaram S.S.E. 6 miles; from Tanjore E. 41 miles; from the sea W. 11 miles.——*Porayaur* (பொறையார் - poraiyár, Tam.). From (porai, tam. a mountain + áru, tam. river). Town; pop. 5,725; acres 2,287; lat. 11° 01′; long. 79° 53′; from Mayavaram E.S.E. 13 miles; from Tanjore E. 49 miles; from the sea W. 1¼ miles. Suburb of Tranquebar. Weaving centre. S.P.G. mission station. — *Tillayaudy* (தில்லையாடி - tillaiyádi, Tam.). From (tillai. tam. a tree, excæcaria agallocha, mueller, var. camettia + vádi, tam. enclosure). Village; pop. 3,695; acres 1,461; lat. 11° 03′; long. 79° 51′; from Mayavaram E.S.E. 11 miles; from Tanjore E. 48 miles; from the sea W. 3 miles.——*Tircadayore* (திருக்கடையூர் - tirukkadaiyúr, Tam.). From (tiru, tam. sacred + kadai, tam. last + úr, tam. village); the last place of worship by marcandeyan, before made immortal. Sanscrit name (amritaghatapura), meaning nectar + pot + town. Village; pop. 2,689; acres 1,976; lat. 11° 05′; long. 79° 51′; from Mayavaram E. 10 miles; from Tanjore E. 48 miles; from the sea W. 4 miles. Trig. station in lat. 11° 04′ 23·72″; long. 79° 50′ 51·12″; from Manamode N. ½ mile; from Mayavaram E. S.E. 11 miles; from the sea W. 4 miles.——*Tirvaudootoray* (திருவாடுதுறை - tiruváduthurai, Tam.). From (tiru, tam. sacred + ádu, tam. sheep + turai, tam. ford). Tam. also (ávaduthurai), meaning cow + liberation + place. Sanscrit name (gómuktipura), meaning cow + absolution + town; also (kshirinívana), meaning forest of csheeriny, the moon-plant, sarcostemma brevistigma, w. and a. [somam]. Village; pop. 3,115; acres 1,348; lat. 11° 02′; long. 79° 34′; from Mayavaram W.S.W. 10 miles; from Tanjore E. 31 miles; from the sea W. 23 miles. Wealthy Shoodra mutt [q.v.].——*Tranquebar* (தரங்கம்பாடி - tarangambádi, Tam.). See sep. title.——*Vicramanaur* (விக்கிரமனாறு - vikkiramanáru, Tam.). Means vicraman's river. Canal; Canal from the Cauvery, constructed by Vicraman, a Chola king.——**(2)** Town, Municipality, Railway station, Talook and Moonsif's head-quarters and place of pilgrimage; Tanjore dist., Mayavaram tal.; pop. 23,765; acres 1,434; lat. 11° 06′; long. 79° 42′; height 47 feet; from Combaconam E.N.E. 21 miles; from Madras S.S.W. 141 miles; from Munnargoody N.N.E. 33 miles; from Negapatam N.N.W. 26 miles; from Tanjore E.N.E. 40 miles; from the sea W. 14 miles. On the Cauvery. Coranaud is a suburb. Has a large temple, Mayooranauta sawmy, and is one of the chief seats of Braminical religion in the district. Parvaty [q.v.] in the form of a peacock [mayil] is said to have worshipped Shiva [q.v.] here. The Toolah cauvery [q.v.] festival, extends over thirty days of the Tamul month of Arpisy [mausam], October and November. During this time ablutions in the river are considered to confer special spiritual benefit; and on the more important days there is an immense gathering from all parts of the district. Station of German lutheran mission and Pondicherry roman catholic mission.

MAYIL (मयूर - mayúra, *San.*; मोर - móra, *Mahr.*; طاؤس - táús, *Ar.*; مور - mor, *Pers.*; مہر - muhr, *Hind.* and *Dec.*; ನವಿಲು - navilu, *Can.*; నెమలి - nemali, *Tel.*; ମୟୂର - moyuro, *Oor.*; മയിൽ - mayil, *Mal.*; மயில் - mayil, *Tam.*). Title from tamul. San. from (mí, san. to injure). Ar. from (tásá, ar. beautiful). Pers., &c., from sanscrit. Oor. from sanscrit. Mal. from (mayi, mal. black). Tam. from (mai, tam. black). Ar. also (sarrákh), meaning vehement crier. Hind. also (manjír). Can. also (navilu). Title otherwise Common peacock. Pavo cristatus, pavoninæ, phasianidæ [jeevanjeevam], rasores [pacshy, 32], of naturalists [jantoo]. Frequents forests especially in mountainous districts; domesticated; venerated by natives; many temples have large flocks; easily caught in snares; in confinement they destroy snakes [sarpam] and other reptiles; common in jungles resorted to by tigers [pooly]; on the islands of chilka lake, there are great numbers; young pea-hens at certain seasons are not inferior to turkeys [feel moorghy], as food; by natives they are preferred. Native practitioners [veidyan] consider peacock's fat valuable external application in cases of rigid joints, and in certain paralytic affections. As early as days of Solomon imported into Judea by the fleets which traded to Malabar. Mayil is a common plant first term. Ex., where transl. is of second term:—Actiniopteris dichotoma (mayirchikki), crest; Adiantum caudatum (mayirgondai), crest; Apluda aristata (mayirgondaippul), crest + grass; Cæsalpinia pulcherrima (mayirgonrai), cassia fistula; Chloris barbata (mayirgondaippul), crest + grass; Lawsonia alba (mayiláñchi), to stretch; Poinciana regia (mayirgonrai), cassia fistula; Sida rhombifolia, var. retusa (mayilumánikyamu), ruby; Vitex altissima (mayilmaram), tree. See gloss. paragraphs.——*Mayil vauhanan* (மயில்வாகனன் - mayilváhanan, Tam.). From (above + váhana, san. vehicle). Soobramanyan [q.v.], whose vehicle [vauhan] is a peacock.

MAYOORAM (मयूर - mayúra, *San.*). Peacock. Mayoora vurman, from (above + varman, san. coat, title), was regal title among Cadambas [q.v.].——*Mor* (مور - mor, Hind.). Peacock.——*Morah* (मोर - móra, Mahr). Peacock, pavo cristatus. Compare:—Aquila fulvescens (móraghára), peacock vulture.——*Morpankhy* (मयूरशिखा - mayúrashikhá, San.; मोरशिखा - mórashikhá, Mahr.; مور پنکھی - morpankhí, Hind.; నెమలిజుట్టు - nemalidzuttu, Tel.; மயிற்சிக்கி - mayirchikki, Tam.). Title from hindostany. San. from (mayúra, san. peacock + shikhá, san. crest). Mahr. from sanscrit. Hind. from (mor, pers. peacock + pankhá, hind. fan); from appearance of tree. Tel. from (nemali, tel. peacock + dzuttu, tel. crest). Tam. from (mayil, tam. peacock + shikhá, san. crest). Tel. also (nemalishikha), meaning peacock + crest. Title otherwise Peacock crest [moorgha], Peacock fan. Botanically Actiniopteris dichotoma, forsk., filices [vricsham, 157] A fern like a miniature palm [taur]. Medicinally anthelmintic and styptic.

MAZHAR (مظهر - mazhar, *Ar.*). From (zahara, ar. apparent). A place where any spectacle is represented; manifestation. Prophet's lacab. Common alam; as Mazhar ally, double alam [ism].

MAZHAY (वर्ष - varsha, *San.*; مطر - matarr, *Ar.*; باران - bárán, *Pers.*; مینہہ - menh, *Hind.*; برسات - barsát, *Dec.*; اوجن - újan, *Malay*; ಮಳೆ - male, *Can.*; ಬರ್ಸ - barsa, *Too.*; వాన - vána, *Tel.*; മഴ - mazha, *Mal.*; වැසි - wesi, *Singh.*; மழை - mazhai, *Tam.*). San. from (vrish, san. to shower). Pers. from (vári, san. water). Hind. from (mégha, san. cloud). Dec. from sanscrit. Mal. from (mazhu, mal. to grow dim). Singh. from sanscrit. Rain [maury]. The Tamul Cooral [q.v.] has the following:—வானின்றுலகம்வழங்கிவருதலாற றானமிழ்த மென்றுணரற் பாற்று. துப்பார்க்குத் துப்பாய துப் பாக்கித் துப்பார்க்குத் துப்பாய தூஉமழை. விண் ணின்று பொய்ப்பின் விரிநீர் வியனுலகத் துண்ணின் றுடற்றும் பசி. ஏரி னுழாஅ ருழவர் புயலென்னும் வாரி வளங்குன்றிக் கால். கெடுப்பதூஉங் கெட்டார்க் குச் சார்வாய்மற் றாங்கே யெடுப்பதூஉ மெல்லா மழை. விசும்பிற் றுளிவீழி னல்லான்மற் றாங்கே பசும்புற் றலைகாண் பரிது. நெடுங்கடலுந் தன்னீர்மை குன்றுந் தடிந்தெழிலி தானல்கா தாகி விடின். சிறப்பொடு பூசனை செல்லாது வானம் வறக்குமேல் வானோர்க்கு மீண்டு. தானந் தவமிரண்டுந் தங்கா வியனுலகம் வானம் வழங்கா தெனின். நீரின் றமையா துல கெனின் யார்யார்க்கும் வானின் றமையா தொழுக்கு— "By the continuance of rain the world is preserved in existence; "it is therefore worthy to be called ambrosia [amritam]; rain "produces good food, and is itself food; if the cloud [maigham], "withholding rain, deceive, hunger will long distress the "sea-girt spacious world; if the abundance of wealth-imparting "rain diminish, the labor of the plough [calappay, vellaumay] "must cease; rain by its absence ruins men; and by its "existence restores them to fortune; if no drop falls from the "clouds, not even the green blade of grass will be seen; even "the wealth of the wide sea will be diminished, if the cloud "that has drawn up gives not back again; if the heaven dry "up, neither yearly festivals [pundigay], nor daily worship will "be offered in this world, to the celestials; if rain fall not, "penance [tapas] and alms-deeds [dharmam] will not dwell "within this spacious world; if it be said that the duties "of life cannot be discharged by any person without water, "so without rain there cannot be the flowing of water [neer]." There is a Teloogoo proverb:—వానరాక ప్రాణంపోక తెలియదు— "When rain [vaun] comes, when life goes, no one knows." The natives hold that clouds which appear in certain seasons of the year are pregnant clouds and yield rain later at particular times and places. The following are Varauha mihiran's remarks thereon. Note that his month names are all north indian names as per column 12 of the month table under Mausam, and he means one month earlier in each case than would be understood by the same names here:—"As food is the support of life and food "depends upon rain, it is important to discover the laws of rain "by any means; the predictions of an astronomer who pays

exclusive attention both day and night to the indications of rain afforded by pregnant clouds [maigham], will as little fail of success as the words of rishies [q.v.]; what science can possibly excel in interest the science relating to the prediction of rain, by a thorough study of which one though ignorant in other matters passes for a great astrologer in this iron age [kaliyoog]. The days on which clouds are to be deemed pregnant commence from the day when the moon [chundran] reaches the asterism [nacshatram] of poorvashaudham [q.v.] or the first quarter of oottarashaudham [q.v.] on any of the lunar days [tity], from the first, of the bright half [shooclapacsham] of the lunar month of margashiram [q.v.]. If pregnant clouds appear when the moon is in a certain asterism the delivery of rain will occur 195 days after. Clouds conceiving originally during the bright half [shooclapacsham] will be delivered eventually during the dark half [krishnapacsham] of a lunar month [chaundramausam] and clouds conceiving during the dark half will be delivered during the bright half; also clouds conceiving during the day will be delivered at night and clouds conceiving at night will be delivered during the day; also clouds conceiving in the twilight of the morning will be delivered in the twilight of the evening and clouds conceiving in the twilight of the evening will be delivered in the twilight of the morning. Clouds that conceive in the bright and dark halves of the month [mausam] of margashiram [q.v.] and in the bright half of pooshyam [q.v.] will be delivered of rain respectively in the dark half of jyeshtam [q.v.] and in the bright and dark halves of ashaudham [q.v.]; but the fall of rain in these cases will only be moderate; and clouds that conceive in the dark half of pooshyam will be delivered of rain in the bright half of shrauvanam [q.v.]. Clouds that conceive in the bright half of maugham [q.v.] will be delivered of rain in the dark half of shrauvanam and those that conceive in the dark half of maugham will be delivered in the bright half of bhaudrapadam [q.v.]. Clouds that conceive in the bright half of phaulgoonam [q.v.] will be delivered of rain in the dark half of bhaudrapadam and those that conceive in the dark half of phaulgoonam will be delivered in the bright half of aushweejam [q.v.]. Clouds that conceive in the bright half of cheitram [q.v.] will be delivered of rain in the dark half of aushweejam and those that conceive in the dark half of cheitram will be delivered in the bright half of caurteecam [q.v.]. Clouds that conceive in the east will be delivered in the west and clouds that conceive in the west will be delivered in the east; the same rule holds with regard to the other directions and also with respect to the winds that appear both at the times of conception and delivery. If gentle and agreeable winds blow from the north, north-east and east, if the sky should be clear, if the sun [sooryan] and moon [chundran] should appear surrounded by bright, white, thick halos; if the clouds should appear huge, bright, dense, or shaped like a needle or a sword and red, if the sky should appear dark as the crow's egg, if the moon and stars should appear white; if the twilight [sundhyay] should be marked by the rainbow, by the low rumbling roar of thunder, by lightning, by the mock-sun, if it be of agreeable appearance, if groups of birds and animals should sound sweet music from the north, north-east and east; if the planets [graham] should appear of large bright disc, if their course should lie to the north of the constellations [nacshatram], if they should be free from abnormal affections, if the trees should grow well and be free from disease; if men and cattle should be happy; these are indications of a healthy pregnancy, and in such cases the clouds will yield abundance of rain. We will now proceed to state the indications of a healthy pregnancy of rain-clouds in the several seasons [ritoo] of the year. In the months of margashiram [q.v.] and pooshyam [q.v.], if the sky should appear very red just before sunrise and just after sunset; if the clouds should appear surrounded by halos; if the month of Margashiram should be found to be very cold and if the fall of snow should be excessive in the month of pooshyam; in the month of maugham [q.v.], if strong winds should blow, if the discs of the sun and moon should be dimmed by the fall of snow, if at rising and setting the sun should be hid by clouds and it be then exceedingly cold; in the month of phaulgoonam [q.v.] if strong and violent winds should blow, if fine clouds should be found marching from place to place, if broken or imperfect halos should appear in the sky, if the sun should appear of the color of gold or red; in the month of cheitram [q.v.] if the sky should be marked by winds, clouds, rain and halos; in the month of veishaukham [q.v.] if there should be rain, lightning and thick clouds; in all these cases it may be concluded that the pregnancy of the clouds is a healthy one. If the pregnant clouds should be of the color of pearls or silver or of the color of the bark of the tamaulam [yellow mangosteen] tree or of the blue lotus [blue nelumbo] or of collyrium, they will yield abundance of rain. If the pregnant clouds should be exposed to the hot rays of the sun, if they should be accompanied by gentle winds and appear as if covered by drops of rain, they will yield abundance of rain. If the appearance of the pregnant clouds should be marked by meteoric falls, by thunder-bolts, dust-storms and the appearance of mock-fires about the horizon; or if at the time of such appearance, clouds should present the shape of cities and towers and if spots should appear in the solar disc or if there should be planetary conjunctions at the time; or, if there should be a shower of blood, if halos or rainbows should appear in the sky, if there should be a solar or lunar eclipse [grahanam] at the time; in all these cases the pregnancy will miscarry. If the symptoms of a healthy pregnancy assigned for the several seasons [ritoo] of the year should fail, the pregnancy will miscarry and the clouds will yield little or no rain. Clouds that conceive when the moon is in the asterisms of poorvabhaudram [q.v.], oottarabhaudram [q.v.], poorva-shaudham [q.v.] and oottarashaudham [q.v.] and rohiny [q.v.] will yield abundance of rain. Clouds that conceive when the moon is in the asterism of shatabhishay [q.v.], aushlaisham [q.v.], ardray [q.v.], swauty [q.v.] and magham [q.v.] will yield rain continuously for several days unless the pregnancy should have suffered in any of the ways stated above. Clouds that conceive when the moon is in any one of the five asterisms referred to in the last stanza in the six months from margashiram to veishaukham, will yield rain respectively for eight, six, sixteen, twenty-four, twenty, and three days continuously. If either the sun or moon should be attended by a malefic planet at the time of conception, the subsequent rainfall will be marked by hail, thunder, and fish; if on the other hand either the sun or moon should be attended by or within view of a benefic planet at the time of conception the rainfall will be abundant. If there should be fall of heavy rain at the time of conception, the pregnancy will miscarry and there will be no rain; this will be the case only when the quantity of rainfall exceeds one-eighth of a dronam. If, owing to adverse planetary influences, the pregnant clouds should fail to yield rain at the seasons described, they will do so at the period of the next conception and in such a case the rain will be marked by a shower of hail. If milch animals should remain unmilked for a long period, the milk will become solidified; so the rain which the clouds fail to yield at the proper season becomes congealed after a time in the sky. If a healthy pregnancy should be established in the five ways given below, the rainfall will extend to 100 yojanams [q.v.] all round; if one of the five indications be wanting, the extent will be reduced to one-half; if two should be wanting, to one-fourth, and so forth. If the pregnancy should be marked by all the five indications, the quantity of subsequent rainfall will be a dronam; if in such a case the rain should be attended by strong winds, the quantity will only be 3 audaks [q.v.]; an audak is one-fourth of a dronam or 50 pollums; if by lightning, the quantity will be 6 audaks; if then the sky should be overcast by clouds, the quantity of rainfall will be 9 audaks; if there should be the roar of thunder then 12 audaks of rain will fall. The signs of a healthy pregnancy are winds, rain, lightning, roar of thunder, and the appearance of clouds at the time of conception; in such a case the subsequent rainfall will be abundant; but if the rainfall should be excessive at the time of conception, there will only be a poor drizzling shower during the rainy season." Certain days again are considered Dharanam or rain support days. The following is what Varauha mihiran says of these :—"The four days commencing from the eighth day in the light half [shooclapacsham] of the month of jyeshtam [q.v.] are known as vayoo dharanam days, that is to say days from the winds that blow on which the nature of the health of the pregnancy of the rainclouds might be determined; if the winds should be gentle and agreeable, and then if the sky should be covered by fine bright clouds, there will be good rain; but if, in the said light half of jyeshtam, there should be a fall of rain in the four days when the moon passes through the asterism of from swauty [q.v.] to jyeshtay [q.v.], there will be rain in the rainy season, from shrauvanam [q.v.] to caurteecam [q.v.]; if the four dharanam days should be exactly alike in their indications, there will be happiness in the land; if different from one another, there will be misery and there will also be fear from robbers; if on the dharanam days the sun and moon should be covered by wet clouds attended by lightning and dust-storm, there will be good rain; if on the dharanam days the sky should be marked by beautiful lightning alternately appearing in opposite benefic quarters, every species of crop [dhannyam] will thrive; if on the same days there should fall a shower of rain attended by dust-storm [pishauch] or if children should in play blow through their mouths or birds sing or play in the dust or in water; if the halos round the sun and moon should appear bright and not much disfigured there will be rain and all crops will thrive; if, on the dharanam days, the clouds should appear beautiful and collected together with their course from left to right, there will be immediate rain and such rain will be exceedingly useful to the crops." The following are Varauha mihiran's remarks on the connection between rain and the celestial phenomena :—"Judging from the rain that falls on the days when the moon passes from the asterism of poorvashaudham [q.v.] to that of moolam [q.v.] in the lunar month of jyeshtam and after the full-moon [powrnimay], an astronomer should predict the agricultural condition of the country as well as the quantity of rainfall in the coming rainy season. Falling rain should be collected in a vessel with a circular mouth, a cubit in diameter and the collected rain should be measured with a vessel whose capacity is an audak [q.v.], which is equal to 50 pollums [q.v.]; parausharan defines an audak to be the capacity of a vessel with a circular mouth 20 inches in diameter and whose depth is 8 inches. There will be

"continuous rain for as many days of the moon's course from "poorvashaudham [q.v.] onwards as the number of asterisms, "through which, when the moon passes, a shower of rain "occurs just marking the earth, from the same asterism of "poorvashaudham in the lunar month of jyeshtam [q.v.]; or "there will be rain for as many days as there are number of "rain drops sticking to the edge of the blades of grass; the "quantity of subsequent rainfall can also be ascertained from "such rain; if such first shower should be excessive there will "be no rain in the rainy season; some writers say that the "subsequent rainfall will be confined to the spot where the "first shower falls; others say that the extent of the subsequent "rainfall will be 10 yojanams all round. If there should be "rain when the moon passes through certain asterisms from "poorvashaudham to moolam in the lunar month of jyeshtam "then there will also be rain when the moon passes through the "same asterisms in the rainy season; if there should be no "rain in the month of jyeshtam, there will be no rain in the "rainy season; if there should be a fall of rain when the moon "passes through the asterisms of hastam [q.v.], poorvashau-"dham [q.v.], mrigashiras [q.v.], chitta [q.v.], raivaty [q.v.] "and shravishtam [dhanishtay] in the month of jyeshtam, "there will fall 16 dronams of rain in the coming rainy season; "if there should be a fall when the moon passes through shata-"bhishay [q.v.], jyeshtay [q.v.] and swauty [q.v.], in the month "of jyeshtam, the subsequent rainfall will be 4 dronams; if "there should be a fall when the moon passes through kritticay "[q.v.], the quantity of subsequent rainfall will be 10 dronams; "if there should be a fall of rain when the moon passes through "shravanam [q.v.], magham [q.v.], anooraudhay [q.v.], bharany "[q.v.] and moolam [q.v.], the quantity of subsequent rainfall "will be 14 dronams; if when through poorva phalgoony "[poobbam], the quantity will be 25 dronams; if when through "poonarvas [q.v.], the quantity will be 20 dronams; if there "should be a fall of rain, when the moon passes through the "asterisms of vishaukham [q.v.] and oottarashaudham [q.v.] "in the lunar month of jyeshtam, the quantity of subsequent "rainfall will be 20 dronams; if when through aushlaisham "[q.v.], the quantity will be 13 dronams; if when through "oottarabhaudram [q.v.], oottaraphalgoony [ottaram] and "rohiny [q.v.], the quantity will be 25 dronams; if there should "be a fall of rain when the moon passes through the asterisms "of poorvabhaudram [q.v.] and pooshyam [q.v.] in the lunar "month of jyeshtam, the quantity of rainfall in the coming "winter will be 15 dronams; if when through ashwiny [q.v.], "the quantity will be 12 dronams; if when through ardray "[q.v.], it will be 18 dronams; in all the above cases the "subsequent rainfall depends upon the asterisms remaining "unaffected by comets, meteors and the like from the month of "jyeshtam to the rainy season. If the asterisms should suffer "by the meeting together in them of the sun [sooryan], saturn "[shany] and kait [q.v.], or by the course of mars [coojan] "through them or by meteoric falls comets [dhoom kait] or "planetary conjunctions, there will be neither rain nor prosperity "in the land; but if benefic planets should pass through the "asterisms or if the asterisms should remain unaffected in any "of the ways described above, mankind will be happy." Aday mazhay, from (adai, tam. to shut) is continual rain. Álaungatty mazhay, from (álángatti, tam. hail) is a hailstorm. Caur mazhay, from (kár, tam. blackness) is rain in rainy season [caur] proper. Cautt mazhay, from (káttu, tam. wind + mazhai, tam. rain) is a storm. Coday mazhay, from (kódai, tam. hot season) is rain in the hot season, deemed pernicious. Munn maury mazhay, meaning mud rain, is a shower of sand or dust; cf. Pishauch. Toottal mazhay, from (túru, tam. to drizzle) is drizzling rain. Yidy mazhay, from (idi, tam. thunder) is a thunder storm.

MAZHOO (மழு - mazhu, *Tam.*). Means blunt. A battle-axe [parshoo]; weapon of Shiva [q.v.].

MAZRAH (مزرع - mazra, *Hind.*). From (zara, ar. to sow). A detached hamlet. A smaller division of Mowza [q.v.].

McDONALD'S CHOULTRY (மகுடன்சாவடி - magudansávadi, *Tam.*). Village, Railway station; Salem dist., Trichengode tal.; pop. 250; lat. 11° 33′; long. 78° 02′; height 786 feet; from Salem W.S.W. 14 miles; from Trichengode N.N.E. 14 miles. Named after Colonel Macdonald who built a choultry [q.v.] when he was stationed with troops at Shunkerrydroog.

M. E. (കൊല്ലമാണ്ടു - kollamántu, *Mal.*). Mal. from (kollam, mal. the place + ántu, mal. year). Abbreviation of Malabar era. Otherwise Quilon era, Parshooraman era [collam, mausam, saca]. See vol. I, 611.

MEADOW GRASS (مرغزار - marghzár, *Hind.*; నక్కతోకగడ్డి - nakkatókagaddi, *Tel.*). Tel. from (nakka, tel. fox + tóka, tel. tail + gaddi, tel. grass. Title otherwise Fox-tail grass. Botanically Poa species, graminaceæ [vricsham, 156]. The inflorescence in spreading or close panicles, the spikelets mostly several-flowered and without awns; outer glumes unequal, generally keeled, many-nerved; lower pales keeled, five-nerved, sometimes with three intermediate nerves; upper pales shorter and narrower, with inflexed membranous margins.

MECCA (مکہ - makkah, *Ar.*). The capital of Arabia and sacred city of Mahomedans. Celebrated as the birth-place of Mahomed [q.v.] and the site of Caaba [q.v.]. Prefixed to plant names as having been introduced by pilgrims from mecca.——*Mecca hay* (کاہ مکہ - káhimakkah, Pers.). Title from food of cattle. Same as Roussa grass.——*Mecca wheat* (گندم مکہ - gandumimakkah, Pers.). Same as Mecca cholum.

MEEN (मीन - mína, *San.*; மீன் - mín, *Tam.*). From (mí, san. to move). A fish [matsyam].——*Meenachel* (മീനച്ചിൽ - mínaççil, Mal.). From (mín, mal. fish + chál, mal. channel).—"*a*" Talook; Travancore state, Cottayam division. Contains ninety caras [q.v.] or villages; pop. 57,102; sub-division. Subdivided into six praverties [q.v.]. Its greatest length N. to S. is 14 miles and the greatest breadth E. to W. is 11 miles. Bounded N. and E. by Todoopoya talook, S. by Tungacherry, Cottayam and Yaittmanore talooks, and W. by Mooatpoya talook. Hilly; soil very fertile. Areca-nut [q.v.] forms an important article of trade in this part of the country, as the soil is peculiarly adapted to its growth. Pepper [q.v.] dry ginger [q.v.] and turmeric [country saffron] are also produced. The soil is irrigated by the Meenachel river.—"*b*" Village; Travancore state, Cottayam division, Meenachel tai.; pop. 8,669; lat. 9° 41′; long. 76° 44′; from Laulam S.S.E. 3 miles; from Trivandrum N.N.W. 82 miles; from the sea E. 27 miles. Consists of a few straggling Nayar [q.v.] habitations and a pagoda [q.v.].—"*c*" River; Travancore state, Cottayam division, Meenachel, Cottayam and Yaittmanore talooks. Formed by the union of several mountain streams which descend from the Codiyattore and Coodamoorty mountains and unite at Yirattipettah. On passing Cottayam the waters dispersed in minor channels unite with the Vembanaud lake by several embouchures. Pullykidangore and Cottayam are on its banks. Length 35 miles. 26 miles are navigable for small boats during a considerable portion of the year; they cannot ascend beyond Yirattipettah, although timber is floated down from some distance above that place. While passing through Meenachel talook, both banks are well planted with areca-nut trees.——*Meenautchy* (மீனாட்சி - minádchi, Tam.). From (above + ádchi, tam. rule). The name is often considered to mean fish-eyed on the analogy of Caumautchy or wanton-eyed, Vishaulautchy or large-eyed. The true meaning is fish rule. Goddess worshipped especially at Madura and regarded as a form of Parvaty [q.v.]. Hindoo 2nd or pers. name. Applied to males and females. As a female name it is shortened into meena and meenoo, otherwise meenaumbah [peyar]. This was the name of widow of Chokkanautan, twelfth Naick [q.v.] ruler of Madura, 1731-1736, who killed herself when Chundah sahib conquered Madura. See vol. I (121); II, 137.——*Meenavan* (மீனவன் - mínavan, Tam.). Means fish-flag man. Title of Paundy [q.v.] rulers. The fish was their special cognizance [meenautchy]. The particular fish is a carp [kenday] or barbel found in the larger rivers, mahseer [mahseer carp] of English sportsmen. Same is used in heraldry of N. india.——*Minicoy* (മെനക്കായത്ത് - menakkáyat, Mal.). From (mín, mal. fish + kayam, mal. deep pool). Island; Malabar dist.; lat. 8° 20′ to 8° 24′ N.; long. 72° 58′ to 73° 03′ E.; from Calicut S.W. 272 miles. Between the Laccadives and Maldives. Though nominally one of the Laccadives as being Cannanore property, it belongs ethnologically to the Maldives which are attached to Ceylon. Separated from the head of the Maldives proper by the Eight-degree channel, 68 miles in breadth, which is adopted by vessels bound to the Malabar coast or Ceylon during the south-west monsoon [q.v.]. The island is a narrow strip of low land, seven miles long, and less than a mile in width, in direction N.E. and S.W. From its N.W. face an irregular coral [moongah] reef projects; on the S.E. side there is no reef [atoll]. Within 100 yards of the reef no bottom is found. The reef encloses a large lagoon [cauyal], which has three entrances from the sea, one with a depth of two fathoms. It abounds in turtle [aumay] and fish [matsyam]. The soil is coarse powdered coral with a little vegetable matter. The island is flat, and no part is destitute of vegetation; the south side is thickly covered with tall cocoanut [q.v.] trees, visible from a vessel 10 or 12 miles; the north inhabited by a people of Maldive race and language. Formerly under the Maldive sultans but since the seventeenth century it has been subject to the rajahs of Cannanore, and is at present the personal property of Ally rajah. The islanders export fish, coir [q.v.] and cocoanuts to Goa, the Malabar ports, Ceylon and Bengal; bringing home chiefly rice [q.v.], salt [ooppoo], spices and cotton cloth. To south of the main island and separated from it by a channel about one-fourth of a mile wide, is the small island of Viringilly, to which small-pox patients are transported. The island is demarcated into nine large blocks;—the great north Pundauram; north Mowlood grant, leper settlement; south Mowlood land; Malikhana land; central Pundauram; Attiry pundauram, containing most of the village site; eastern block, containing rest of the village Tottams; and Pundauram plots and great southern Pundauram. The village is divided, for purposes of administration, into Attiries [q.v], *i.e.*, sea-shore or male assemblies; and Varaungies [q.v.] or female assemblies. Of the latter, there are ten. The land is the property of the community and is managed by the Pundauram. Private property in the soil is unknown, but improvements, such as houses, cocoanut and other trees, &c., belong to the persons who make them. Every tree in the inhabited part of the island has the mark of its owner cut

upon it. The inhabitants are divided into four classes, viz., Malikhanas, corresponding to Carnaver [q.v.] of the other islands; Maulims [q.v.] or pilots; Takkar or sailors and boatmen; Melacherries or tree-climbers. In personal appearance and in their dress, manners and customs they differ considerably from the inhabitants of the other islands. They are much smaller in stature, darker, and have very round faces. In disposition they are quiet and obliging. The customs are in many respects remarkable. One without parallel amongst any society of Mussalmans is that the men are monogamous. The women appear in public freely with their heads uncovered and take the lead in almost everything except navigation. Every woman in the island is dressed in silk. Their gowns fit closely round the neck and reach to the ankles. The upper classes wear red silk and earrings of peculiar fashion. The Melacherry women are restricted to the use of a dark-striped silk [puttoo] of a coarser quality. The language spoken is Mahl [q.v.]. The inhabitants are exclusively Mahomedans. The cultivation is almost entirely the cocoanut palm. Marine product is the maas fish, of which large quantities are annually cured and exported chiefly to Ceylon. Cattle cannot be bred in the island, as they are killed by mosquitoes [q v.] and a kind of poisonous grass. The few to be found on the island are imported for slaughter at religious ceremonies. The manufactures are the same as those of other islands. Coir is a little dark in color, but much finer in quality. One-sixth of the adults perished in a cyclone in 1867. A light-house was erected in 1885. See vol. I (51), 53.

MEENAUR (مینار - mínár, *Hind.*). Tower of a mosque [musjid]. Cf. Minaret.

MEER (میر - mír, *Pers.*). Contraction of ameer, lord, chief or head of a department. Tribal prefix attached to the names of Mahomedans of the Syed [q.v.] class. Also part of lacab; as Meer aulam, lord of world [ism].——*Meeraun* (میران - mírán, Hind.). From (mír, ar. lord). Lacab of the chief saint [abdool cawder]. Taken as alam; as Meeraun hoossain, double alam [ism].——*Meeraun sahib* (میران صاحب - míránsáhib, Hind.). Name of saint buried at Nagore. Also known as Cawder wally [q.v.].——*Meer moonshee* (میر منشی - mírmunshí, Hind.). Chief secretary.——*Meer zauda* (میرزاده - mírzádah, Hind.). From (mír, ar. lord + zádah, pers. born). Tribal surname of the children of Moghuls [q.v.].——*Mirzah* (مرزا - mirzá, Hind.). From (mír, ar. lord + zah, pers. offspring). A prince. Moghuls [q.v.] prefix this title to their names and add Beg after them, as Mirzah mahomed beg.——*Mirzayee* (مرزائی - mirzaí, Hind.). From (mirzá, pers. lord); moghul title. A cotton [q.v.] or muslin [q.v.] jacket, with long loose sleeves and open cuffs; worn under the cabah [q.v.].

MEHKARY (مهکری - mehkarí, *Hind.*). From (mehkr, ar. place in arabia); whence emigrated. Lacab of a class of Mahomedans [ism]. Of the sect of nivayats [q.v.].

MEHMAN (میمن - maiman, *Hind.*). From (momin, ar. true believer). Converts from Hindooism. They are Soonnee [q.v.] mahomedans, and wear a peculiar Scinde hat. Have settled themselves in Madras as traders and merchants.

MEHR (مهر - mehr, *Pers.*). Sun, love. Prefixed to an alam forms a lacab; as Mehr ally, ally's love [ism].

MEIDA (میدا - maidá, *Hind.*). Flour.——*Meida lukdy* (गजपिप्पली - gajapippalí, San.; मैदालकडी - maidálakadí, Mahr.; مغاث هند - mughásihind, Ar.; کلز - kilz, Pers.; میدا لکڑی - maidálakrí, Hind. and Dec.; నారమామిడి - náramámidi, Tel.; முசைப்பேயெட்டி - musaippéyetti, Tam.). Title from deccany. San. means elephant long pepper [q.v.]. Mahr. from hindostany. Hind. from (maidá, hind. flour + lakrí, hind. wood). Tel. from (nára, tel. fibre + mámidi, tel. mango tree, mangifera indica, linn.). Mahr. also (ránaámbá), meaning wild mango, properly spondias mangifera, willd. Tel. also (narrachettu), meaning fibre + tree; (meda); (narramámidi), meaning fibrous mango. Tam. also (maithálagadi); (pisinbattaiççedi), meaning gum + bark + tree. Title otherwise Fibre mango, Wild mango. Botanically Tetranthera monopetala, roxb., lauraceæ [vricsham, 111]. Tree, middling size; dark-greenish, rusty-colored smooth bark; leaves alternate, short-petioled, oblong, entire, smooth on the upper surface, pubescent beneath; smell like cinnamon [q.v.]; flowers male and female; peduncles axillary, numerous, short; flowers small, yellowish green. Bark mildly astringent, balsamic, used by hill people in diarrhœa, also applied to wounds and bruises. Leaves are given to silk [puttoo] worms; berries yield an oil, used for ointment and candles. Wood olive-grey, soft, not durable; is readily attacked by insects; aromatic. Other common species are:—Cordifolia, small tree; Glabrata, willow-leaved laurel; Glauca; Læta; Laurifolia; tree; many-flowered; one of the best known and most popular of native drugs, used internally, demulcent in diarrhœa and dysentery, externally emollient application to bruises, &c.; oil from berries used in rheumatism; bark triturated in water or milk or dry applied to bruises; wood greyish-brown or olive-grey, moderately hard, shining, close and even-grained, seasons well, durable, and is not attacked by insects; there are varieties citrifolia and platyphylla. Laurifolia, var. roxburghii; small tree; many-flowered; bears small, greenish, yellowish flowers; comes from chittagong, cochin-china, and java; the fruit is globose, black, and about the size of a pea [calauyam]; fruit yields a kind of greasy exudation, from which the chinese manufacture candles of a bad quality; Ligustrina, small tree; many-flowered; there is a variety celastroides; Oleoides; Panamonja; Tomentosa, or ganapaty tree; many-flowered; found in all the western forests; wood soft greyish-yellow with an unpleasant odour when fresh cut; there is a variety glabrescens; Venulosa; Wightii.

MEIDAUN (میدان - maidán, *Hind.*). From the persian. An open space, parade ground.

MEILAM (మైల - maila, *Tel.*). Pollution [mal].——*Meilavaram* (మైలవరము - mailavaramu, Tel.). From (maila, tel. pollution + pura, san. city).—"*a*" Zemindarry; Kistna dist., Bezwada tal.; square miles 135. Comprises the greater portion of the old Havelly [q.v.] lands of Condapully pergunnah [q.v.]. The Soorinainy family came to this neighbourhood about A.D. 1670 as cultivators, and rented villages from the Killadar [q.v.] of Condapully. Later Soorinainy vencatapaty assumed the title of Moostaujar and his son, Soorinain narayanan, took the title of zemindar [q.v.], claimed to be independent of Condapully, and built the fort at Meilavaram.—"*b*" Village; Kistna district, Meilavaram zemindarry; pop. 4,481; lat. 16° 46′; long. 80° 41′; from Bezwada N. 17 miles; from Guntoor N.N.E. 35 miles; from Madras N. 253 miles; from Masulipatam N.W. 51 miles; from Vinoocondah N.E. 75 miles.

MEIPAUD (మైపాడు - maipádu, *Tel.*). From (mai, tel. sidewise + pádu, tel. village). Village, Port; Nellore dist., Nellore tal.; pop. 2,151; acres 2,212; lat. 14° 30′; long. 80° 12′; from Kistnapatam N. 15 miles; from Madras N. 96 miles; from Nellore E.N.E. 13 miles; from Varny S.S.E. 10 miles. On the coast on Buckingham canal [q.v.] and near mouth of Pennair. Open roadstead. Visited by many vessels. Grain is the chief article of export. Is the market for grain grown in the Pennair delta [conamoogam]. Formerly trade in cloths, &c.

MEL (மெல் - mel, *Tam.*). Soft.——*Mellinam* (மெல்லினம் - mellinam, Tam.). From (mel, tam. soft + inam, tam. class). Soft letter. One of the three Tamul classes of consonants [mey]. ங், ஞ், ண், ந், ம், ன். Each letter is the corresponding nasal to the strong class. Only ஞ், ந், and ம் are initial. All except ங் may be final. See vol. I (52); II, 205, 209.

MELLORPETTAH (మిల్లరుపేట - millarupéta, *Tel.*). From (name of a former collector + péta, tel. suburb). Suburb of Bellary included in Brucepettah.

MELOE (میلو - mílo, *Hind.*). Same as Telini fly.

MELON TREE (കമ്മൊസ് - karmmós, *Mal.*). Title from fleshy fruit. Same as Papaw.

MERAH (ಮೇರೆ - mére, *Can.*; మేర - méra, *Tel.*; மேரை - mérai, *Tam.*). Boundary, limit. A portion of the crop given as a perquisite to the holders of a proprietary right [cawnyautchy, mirass] in the village lands, or to the hereditary village officers and servants [balootah], out of the common stock from the threshing-floor [calam].——*Merangy* (మేరంగి - mérangi, Tel. merangi *). From (méra, tel. boundary + angu, tel. beauty). Zemindarry, Village; Vizagapatam dist., Parvatipore division; pop. 3,867; acres 695; lat. of village 18° 49′; long. 83° 36′; from Parvatipore E. 9 miles; from Vizagapatam N.N.E. 78 miles. When Vishwambhara deo reigned in Jeypore, the Zemindar of Merangy rebelled and fled to Parlakimedy, whence he was given up on Jeypore agreeing to cede Buttaly talook to Kimedy. He was then put to death, his estate being made over to Jugganath rauz, who was required to marry his widow. Jugganath rauz was then styled Shatricherla. The estate was later incorporated with Cooroopaum and brought under Vizianagram, but in 1795 restored to old family. There were numerous disputes and disturbances in the family in early part of century, one Veerabhadra rauz being specially concerned. This man was in 1821 imprisoned in Chingleput where he lately died. The estate was bought in by Government for arrears in 1833. At this time the three principal leaders in the Palcondah rebellion known as the Attsapavalsa brothers were still at large. The Diwaun of Merangy attacked the rebels near the village of Gorye. After a desperate conflict, all three brothers were killed and their forces scattered. For this service Government restored Merangy to young Jugganath rauz, the son of the last Zemindar. The family belongs to the Condarauz tribe, of the same branch as the Cooroopaum and Andra zemindars. Ooriya [q.v.] is their vernacular, but they cultivate Teloogoo [q.v.].

MERAKA (మెరక - meraka, *Tel.*). From (mirru, tel. elevation). High ground. Suffix in place names.

MERGUI (مرگوئی - marguí, *Hind.*). Southernmost district of Lower burmah.——*Mergui arrowroot* (காருக்கருணை - kárák-karunai, Tam.). Same as Otaheite salep.

MERIAH (మెరయ - meraya, *Tel.*). A human victim. The rite among the Khonds [q.v.] of sacrificing human beings to

the earth god. The practice was put a stop to in 1836; see vol. I (51).

MEROO (मेरु - méru, *San.*). From (mi, san. to fix). Otherwise Maha meroo or great meroo, Soomeroo or good meroo. The terrestrial orb [golam]; yolk of the mundane egg [bramhaundam]. Indian Olympus. Supposed centre of earth [bhoomy] in far north, having on one of its summits the paradise Keilausam [q.v.], from whence the seven patriarchs [rishy] came. The form of the mountain is that of the seed-cup of the sacred lotus flower [nelumbo]. The sun [sooryan] turns round it, hence resembles north pole [oottara dhroovam]. Its height is 84,000 yojanams [q.v.], 16,000 of which are below the surface of the earth. See vol. I (2), (11). There is a Tamul proverb:— பூர்வோத்திரம் மேரு காத்திரம்போல் இருக்கிறது— "His pedigree is the size of Mount meroo." Meroo is sometimes held to mean the highland of Tartary, immediately to the north of the Himalaya mountains.

MEROOGENNEY (कुकुभ - kukkubha, *San.*; روغن - raughan, *Pers.*; وارنس - várnas, *Dec.*; ಮೆರುಗೆಣ್ಣೆ - merugenne, *Can.*; ರೋಗಣೆಣ್ಣೆ - róganenne, *Too.*; మెరుగునూనె - merugunúne, *Tel.*; மெருகெண்ணெய் - merugenney, *Tam.*). Title from tamul. Can. from (merugu, can. polish + enne, can. oil). Too. from (róganu, too. polish + enne, too. oil). Tel. from (merugu, tel. glitter + núne, tel. oil). Tam. from (merugu, tel. glitter + ennéy, tam. oil). Varnish [gond, rangh]. Various substances used in solution with spirit, or in the natural condition, or liquified by heat. Of the commercial varnishes the following are the more important here in use:—Lac or spirit varnish [lac]; Singhalese varnish, semecarpus anacardium, linn. f. [marking-nut]; Japanese varnish, rhus succedanea, linn. [red-lac sumach].

MESHAMSHANA (മെശംശന - meshamshana, *Mal.*). Deacon with the Malabar syrian christians [syrian].

MESQUIT (مسقیط - miskít, *Mexican*). Title otherwise Texas algaroba, Texas mesquit. Botanically Prosopis [shivah] glandulosa, tor., leguminosæ [vricsham, 48]. Introduced. Interior of pods filled with sweet pulp; this by fermentation and boiling, makes a pleasant drink; seeds or beans, powdered and mixed with water, forms a paste, which, on being dried in the sun, makes an article of food, and keeps for a considerable time. Wood exceedingly hard and durable, with a fine grain; used for furniture, picket poles, and charcoal [adoopp kary].——*Screw mesquit* (مسقیط پیچ دار - miskítipechdár, Hind.). Title from shape of pods. Title otherwise Californian screw-bean mesquit, Screw bean, Tornillo bean, True mesquit bean. Botanically Prosopis [shivah] pubescens, bth., leguminosæ [vricsham, 48]. Introduced. Beans or pods, screw-shaped, contain much saccharine and nutritious matter from which molasses [jaggery] is made by boiling; pods form important article of food to natives; largely devoured by cattle; great caution required in their use as fodder for horses [ghorah].

METHEL (میتهل - methal, *Hind.*). Same as Poison nut.

METRAUN (മെത്രാൻ - metrán, *Mal.*). From syriac, corruption of metropolitan. Bishop of the Syrian church in Malabar.

METT (మెట్ట - metta, *Tel.*; மேட்டு - mettu, *Tam.*). From (médu, tam. high ground) [mail, maud, mode]. Ground not capable of irrigation [gadda, moott]. So a custom-house [chowky], as placed high for supervision.——*Metla* (మెట్ల - metla, Tel.). From (metta, tel.). Locative plural. Mound. Suffix in place names; as Narimetla, meaning the mound of the women.——*Metta* (మెట్ట - metta, Tel.). Dry land. Plant first term. Ex., where transl. is of second term:—Cassia alata (mettatámara), nelumbium speciosum; Curcuma angustifolia (mettatámara), nelumbium speciosum; Ipomæa digitata (mettapálatíga), milk + creeper; Ipomæa sepiaria (mettatúti), ipomæa aquatica; Ocimum adscendens (mettatulasi), ocimum sanctum. See gloss. paragraphs.——*Mettapolliem* (மேட்டுப்பாளையம் - méttuppálaiyam, Tam. mettupálaiyam *). From (médu, tam. high ground + pálaiyam, tam. fortified village).—"*a*" Deputy tahsildarry, Coimbatore district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station, Railway station; Coimbatore dist., Coimbatore tal.; pop. 614; acres 1,178; lat. 11° 18′; long. 76° 59′; height 1,070 feet; from Coimbatore N. 22 miles; from Erode W. 53 miles; from Madras W.S.W. 256 miles; from Ootacamund E.S.E. 18 miles; from Pollachy N. 44 miles; from Suttimungalam S.W. 25 miles. Terminus of Neilgherry branch of Madras railway, and starting of Neilgherry ghaut [q.v.]. Railway projected from here to Coonoor. Hot and unhealthy. Bhawauny runs by and gives fishing. Game of all sorts abundant. 100 dolmens [coday cull] in fields in neighbourhood, showing existence of old population at foot of Neilgherries.——*Mettavazhy* (മേട്ടുവഴി - métttuvazhi, Mal.). From (métu, mal. high + vazhi, mal. way). A path through a mountain [ghaut].——*Mettoocauran* (மேட்டுக்காரன் - mettukkáran, Tam.). From (above + káran, tam. possessor). Means custom house man. One who examines persons entering or leaving a village.——*Mettoocherry* (மேட்டுச்சேரி - méttuççéri, Tam.). From (médu, tam. high ground + shéri, tam. village). Village; Neilgherry dist., Todanaud division; lat. 11°24′; long. 76° 44′; from Ootacamund W. ½ a mile from the bazaar. Hamlet forming part of Ootacamund, and site of the Roman catholic church. The first church was near Nediwuttam. The next was at Caundal. The present is the third. There is a convent of the Society of Marie Réparatrice in a building adjoining the church, established in January 1875, and bearing the name of Nazareth.——*Mitta* (మిట్ట - mitta, Tel.). Mound [mode]. Distinguish from Mittah.

MEY (மெய் - mey, *Tam.*). Means the body. A consonant. Also truth. In Tamul there are eighteen consonants, divided into three classes:—"*a*" Vallinam [q.v.] or hard consonants are க், ச், ட், த், ப், ற்;—"*b*" Mellinam [q.v.] or soft consonants are ங், ஞ், ண், ந், ம், ன்;—"*c*" Yidaiyinam [q.v.] or middle consonants are ய், ர், ல், வ், ழ், ள் [bhaushay]. See vol. II, 205.——*Menaricam* (మేనరికము - ménarikamu, Tel.). From (ménu, tel. body + rikamu, tel. suffix meaning state). State of being connected through the body of the parents. The relationship between a man's son and the man's sister's daughter. First cousins. Among the Comaties [q.v.] these are usually married to each other.——*Meynyaunapooram* (மெய்ஞானப்புரம் - meyñánappuram, Tam. megnánapuram *). From (mey, tam. true + ñána, san. knowledge + pura, san. town). Village, Post office; Tinnevelly dist., Tencaray tal.; pop. 2,049; acres 1,181; lat. 8° 28′; long. 78° 03′; from Shreeveicoontam S.S.E. 13 miles; from Tinnevelly S.E. 28 miles; from the sea W. 8 miles. Early Protestant mission station. Fine church built in 1837, the spire of which is a landmark.

MEZ (میز - mez, *Hind.*). Table. Corr. of English 'mess.'

MHOTE (उद्घाटन - udghátana, *San.*; موٹ - moth, *Hind.*; ಕಪಲಿ - kapali, *Can.*; మోటు - mótu, *Tel.*; ഏത്തക്കൊട്ട - éttakkotta, *Mal.*; கவலை - kavalai, *Tam.*). Title from hindostany. San. from (ud, san. prefix meaning up + ghat, san. to move). Mal. from (éttam, mal. rising + kotta, mal. basket). The large bucket of a draw well [capiley, picottah, yaittachaul].

MIDDEY (మిద్దె - midde, *Tel.*; மெத்தை - mettai, *Tam.*). From (mída, tel. above). A house with an upper story, with a flat or terraced roof.

MIH (मिह् - mih, *San.*). To sprinkle.——*Maigham* (मेघ - mégha, San.). From (mih, san. to sprinkle). Cloud. According to ancient shastrams, clouds are known by particular names which are either seven or nine in number; and special characters, meteorological and astrological are predicated of each by ancient writers.——*Maigha recoola poda* (మేఘరేకులపోడ - mégharékulapoda, Tel.). From (mégha, san. cloud + réku, tel. scale + poda, tel. spot). Cynophis helena, colubiridæ [paumb], ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 17], of naturalists [jantoo].——*Maisham* (मेष - mésha, San.). From (mish, san. to sprinkle). Ram.—"*a*" The first sign [raushy] of the solar zodiac [raushy chuckram] whether fixed or moveable [mausam]. European Aries.—"*b*" The month in which the sun [sooryan] enters the fixed Maisham, or April-May [ayanam, maunam] as assumed by the Hindoos.—"*c*" The first arc of 30° in any circle [chuckram].——*Maishauyanam* (मेषायन - mésháyana, San.). From (mesha, san. aries + ayana, san. equinoctial point). Vernal equinoctial point [ayanam, vishoo]. Maishauyana mundalam is the equinoctial colure.——*Meetah* (میٹھا - míthá, Hind.). From (mishta, san. sweet). Sweet. Plant first term. Ex., where translation is of second term:—Aconitum ferox (mítházahar), poison; Citrus medica, var. limetta (míthálimba), (míthálímú) and (míthánímbú), lime, citrus; Diospyros tomentosa (míthátendú), diospyros embryopteris, from berries; Glycirrhiza glabra (míthílakri), stick; Ipomæa batatas (míthäálú), potato; Sesamum indicum (míthátel), oil; Wrightia tinctoria (míthäindarjaukájhár), holarrhena antidysenterica + tree. See gloss. paragraphs.——*Mihiran* (मिहिर - mihira, San.). From (mih, san. to rain down moisture). An epithet of the sun [sooryan, varauha mihiran].——*Mithye* (مٹھائی - mithái, Hind.). From (míthá, hind. sweet). An intoxicating sweetmeat [halwah].

MIHRAUB (محراب - mihráb, *Hind.*). From (harb, ar. fight); a person praying is said to war with the devil. Niche in a mosque [musjid] where the priest [imaum] prays before the congregation [jamaut] with his face towards Mecca. Also any niche.

MILK (ملك - milk, *Hind.*). Property [maul].——*Milkyat* (ملكيت - milkiyat, Hind.). Proprietary right [cawnyautchy, mirass, sawmyam].——*Milkyat i istimrar* (ملكيت استمرار - milkiyatiistimrár, Hind.). From (milkiyat, hind. proprietary right + istimrár, ar. continued). Proprietary right in perpetuity.

MILK-HEDGE (वज्री - vajrí, *San.*). Title from milky juice of plant. San. from (vajra, san. adamant); from hard spines. Title otherwise Devil's milk, Gum thistle, Spurge, Wolf's milk. Cf. Tiger's milk. Botanically the Euphorbia genus, euphorbiaceæ [vricsham, 118]. Herbaceous in temperate regions but shrubby or tree-like here; these plants resemble in having a milky-juice and in the arrangemant of flowers, which are monœcious, collected into heads, surrounded by bracts, constituting

an involucre; fruit consists of three single-seeded carpels. Distinguish from opuntia [prickly pear]. The species best known to the natives are :—antiquorum [square milk-hedge], cattimandoo [cuttimandoo], indica [ammaun putcharisy], nereifolia [leafy milk-hedge], tirucalli [round milk-hedge], tortilis [twisting milk-hedge]. Other s. indian species indigenous are :—acaulis, bracteolaris, corrigioloides, dracunculoides, elegans, erythroclada, fimbriata, halophila, notoptera, oreophila, pulcherrima, pycnostegia, sanguinea, serpens, trigona, zornioides. There is a Tamul proverb :—கள்ளி பெருத்து என்ன ? காய் உண்டா நிழல் உண்டா ?—"What if the cully grow large? "has it any fruit or any shade ?" There is another :—கள்ளிக் கொம்புக்கு வெள்ளிப்பூண் கட்டினது போல—"Like "attaching a silver ferule to a cully stick." And another :—கரும்பிலும் தேன் இருக்கும் கள்ளியிலும் பால் இருக்கும்—"There is honey [shahad] in sugar-cane [q.v.], there is "sap in milk-hedge." Term Milk-hedge includes also Cacalia, Echium, Opuntia, and Sarcostemma species.——*Buffalo tongue milk-hedge* (ఎనుబోతునాలుకజెముడు - enubótunálukajemudu, Tel.). Same as Gowzabaun.——*Creeping milk-hedge* (கொடிக்கள்ளி - kodikkalli, Tam.). Same as Somam.——*Leafy milk-hedge* (स्नुहि - snuhi, San.; निवडुंग - nivadunga, Mahr.; पानानिवलि - pánánivali, Conc.; سیج - síj, Hind.; کتے کی جیب کا پتا - kuttekíjibkápattá, Dec.; ಎಲೆಕಳ್ಳಿ - elekalli, Can.; ಇರೆಕಳ್ಳಿ - irekalli, Too.; ఆకుజెముడు - ákujemudu, Tel.; ഇലക്കള്ളി - ilakkalli, Mal.; පතුක් - patuk, Singh.; இலைக்கள்ளி - ilaikkalli, Tam.). Title from leaves on toothed shoots. San. from (snuh, san. to vomit), from being an emetic. Hind. from sanscrit. Dec. from (kuttá, hind. dog + jíb, hind. tongue + pattá, hind. leaf). Can. from (ele, can. leaf + kalli, can. milk-hedge). Too. from (ire, too. leaf + kalli, too. milk-hedge). Tel. from (áku, tel. leaf + jemudu, tel. milk-hedge plant). Mal. from tamul. Tam. from (ilai, tam. leaf + kalli, tam. euphorbia tirucalli, linn.). San. also (pattrasnuk), meaning leaf + euphorbia antiquorum, linn.; (shvarasaná), meaning dog's tongue. Dec. also (kuttókejíbkisendh), meaning dog-tongue-shaped milk-hedge. Title otherwise Dog's tongue, Five-angled spurge, Holy milk-hedge, Leafy tree spurge, Oleander-leaved spurge. Botanically Euphorbia [milk-hedge] nereifolia, linn., euphorbiaceæ [vricsham, 118]. Alias Euphorbia ligularia. Tree, 20 feet; young shoots five-sided, somewhat spirally disposed, and armed with large teeth, each of which supports a leaf, and a pair of short, black, stipulary thorns; leaves alternate about the ends of the branches, wedge-shaped, waved, fleshy; peduncles solitary between the serratures of the angles of the branchlets, one to three dichotomous, with a larger sessile flower in the forks; petals five, fringed with a ragged margin inserted into the calyx; flowers greenish yellow; cultivated near villages; has a whitish dead appearance, except during the rains; every part abounds with the acrid milky juice. Plant is sacred to snake [naugam] deities; natives offer milk and sugar, praying to be delivered from snake-bites. Root mixed with black pepper [q.v.] employed medicinally in snake-bites, both internally and externally; on the western coast bark of root boiled in ricewater and arrack [q.v.] considered useful in dropsy; root quoted in pharm., but non-officinal. Juice used to remove warts and cutaneous eruptions; also as purge and deobstruent, in visceral obstructions and dropsical affections; also mixed with margosa [neem] oil, as external application in cases of contracted limb. Leaves simply warmed in the fire will promote urine, while their juice warmed is a good remedy in ear-ache, and is occasionally rubbed over the eyes to remove dimness of sight. The pulp of the stem, mixed with green ginger [q.v.] is given to persons who have been bitten by mad dogs, previous to the appearance of hydrophobia. Veidyans [q.v.] purify arsenic [paushaunam] as follows :—they make a hole in the trunk of this tree, filling it up with solid arsenic; then after being covered with the bark of the same plant, the whole is exposed to a strong fire, until the external parts of the trunk are completely charred, when the arsenic is taken out and is fit for use. Forms a good fence round fields; gives ashes used as mordant [cauram].——*Round milk-hedge* (दण्डस्नुहा - dandasnuhá, San.; वज्रदुद् - vajraduhú, Mahr.; बड्डिनिवलि - baddinivali, Conc.; زقوم هندی - zakkúmihind, Ar.; زقوم نیاء هندی - zakúniyáihindí, Pers.; کونپل سینڈھ - konpalsendh, Hind.; کاری کی سینڈھ - káríkisendh, Dec.; ಕಲ್ಲಿಮರ - kallimara, Can.; ಕೊಡುಕಳ್ಳಿ - kódukalli, Too.; జెముడు - jemudu, Tel.; ଲୋଧୋକାସିଜୁ - lodhokasiju, Oor.; കോൽക്കള്ളി - kólkalli, Mal.; නවහැන්ඩි - navahandi, Singh.; கள்ளி - kalli, Tam.). Title from branches not being angular, but round and polished. San. from (danda, san. stick + snuhá, san. euphorbia antiquorum, linn.). Mahr. from (vajra, san. diamond + dugdha, san. milk); hard, milky plant. Ar. from (zakkúm, ar. a thorny tree + hindí, hind. indian). Pers. from arabic. Hind. from (konpal, hind. tender shoot + sendh, hind. milk-hedge). Dec. from (kárí, hind. stick + sendh, hind. milk-hedge). Can. from (kalli, can. milk-hedge + mara, can. tree). Too. from (kódu, too. branch + kalli, too. milk-hedge). Tel. from (simhunda, san. milk-hedge plant). Mal. from (kól, mal. stick + kalli, mal. milk-hedge). Singh. from (nava, san. nine + handi, singh. joint). Tam. compare prickly pear. San. also (trikantaka), meaning three-thorned. Hind. also (sehnd), meaning milk-hedge; (síj), from sanscrit; (shirthohar), meaning milk-hedge plant. Dec. also (bárkísend), meaning hedge euphorbia. Can. also (mundukalli), meaning joint + milk-hedge; (kódukalli), meaning branch + milk-hedge; (bontekalli), meaning entangled + milk-hedge. Tel. also (kádajemudu), meaning stick + milk-hedge plant. Mal. also (tirukkalli), meaning twisted milk-hedge; properly euphorbia tortilis, rottl.; (kátterumakkalli), meaning wild buffalo + milk plant. Tam. also (kombukkalli), meaning stick + euphorbia tirucalli, linn.; from cylindrical branches. Title otherwise Common tree spurge, Round tree spurge. Botanically Euphorbia [milk-hedge] tirucalli, linn., euphorbiaceæ [vricsham, 118]. Specific name from tamul; really applies to Euphorbia tortilis. Alias Tithymalus tirucalli. Tree unarmed, 20 feet; leaves alternate, remote, sessile, linear, smooth; flowers at the end of the twigs and in the divisions of the branchlets, crowded, sub-sessile, pale yellow; calyx campanulate, with three to five flat peltate horizontal segments; capsule villous, five-lobed, three-celled; seeds solitary; common hedge plant; branches round, polished, very lactescent, leaves small; milk sap is like that of antiquorum [square milk-hedge], evaporated, resembles indian rubber [q.v.]. Fresh juice is vesicatory; juice mixed with butter is given as a purgative on west coast; juice quoted in pharm., but non-officinal; decoction of tender branches is given in colic. Goats [velland] eat this plant. The whole used as manure; fish are destroyed by placing pieces in water [common emetic nut, indian berry, marotty, sooptee, tejbul, zanzibar indigo]; the bark and small branches are employed in dyeing leather [chamrah] black; much planted as a hedge; hung up in rooms keeps off eye-flies; burnt ashes are used for preparing dye [shauyam]. When found of sufficient size the wood is used for tile [wode] and terrace dunnage; wood is white, close grained, and rather hard; also used for veneering and for toys. The root of old shrubs is adapted for gun-stocks, but plants of sufficient age are seldom met mith.——*Snake milk-hedge* (నాగజెముడు - nágajemudu, Tel.) From leaves like cobra hood. Same as Prickly pear.——*Square milk-hedge* (वज्री - vajrí, San.; निवलि - nivali, Mahr.; निवलि - nivali, Conc.; زقوم نیاء هندی - zakúniyáihindí, Pers.; تدھارا سینڈھ - tidhárásendh, Hind.; ಜೆಡೆಕಳ್ಳಿ - jedekalli, Can.; ದಾರೆಕಳ್ಳಿ - dárékalli, Too.; బొంతజెముడు - bontajemudu, Tel.; ଡୋକାନାସିଜୁ - dokánásiju, Oor.; ചതുരക്കള്ളി - chaturakkalli, Mal.; දළුක් - daluk, Singh.; சதுரக்கள்ளி - shathurakkalli, Tam.). Title from branches being angular instead of round. San. from (vajra, san. hard); from large piercing thorns of branches which make good fences against elephants [q.v.] and wild buffaloes [khoolgah]. Pers. from (zakkúm, ar. thorn tree + hindí, ar. indian) [round milk-hedge]. Hind. from (tidhárá, hind. triple edged + sendh, hind. euphorbia tirucalli, linn.). Dec. from (tin, hind. three + dhárí, hind. edged + send, hind. euphorbia). Can. from (jede, can. matted + kalli, can. milk-hedge). Too. from (dare, too. sharp + kalli, too. milk-hedge). Tel. from (bonta, tel. large + jemudu, tel. milk-hedge plant). Mal. from tamul. Tam. from (chaturashra, san. quadrangular + kalli, tam. euphorbia tirucalli, linn.). San. also (vajrakantaka), meaning having adamantine thorns; (snuhi), meaning causing vomiting, being an emetic; (simhunda), meaning lion-faced; (tridháraka), meaning three-edged; from triangular branches. Mahr. also (shéranivadanga), meaning euphorbia tirucalli, linn. + prickly-pear bush, opuntia dillenii, haw.; (tidharinivadunga), meaning three-edged + prickly-pear. Hind. also (tidhárá), meaning three-edged; (nárásej), meaning fibrous milky hedge; (sihand), meaning causing cut; (sendkájhár), meaning milk-hedge tree. Dec. also (tidhárísendh), meaning three-edged euphorbia. Can. also (bontekalli), meaning entangled + milk-hedge. Tel. also (bommajemudu), meaning god + milk-hedge plant; (bhúmijemudu), meaning earth + milk-hedge plant; (mudumúlajemudu), meaning three + corner + milk-hedge plant; (bontachemudu), meaning large + milk-hedge plant. Mal. also (katakkalli), meaning sea milk-hedge. Tam. also (shuthággi); (keníravam); (tirugukkalli), meaning to twist + euphorbia tirucalli, linn. Title otherwise Ancient spurge, Euphorbium plant, Triangular spurge. Botanically Euphorbia [milk-hedge] antiquorum, linn., euphorbiaceæ [vricsham, 118]. Alias Tithymalus antiquorum. Bush; stems jointed, erect, ramous, three to four or more angled; angles furnished with numerous protuberances, each armed with two short spreading stipularly spines; joints straight; peduncles solitary or in pairs, usually three-flowered a little above the axils of the stipules; flowers greenish yellow; very common in waste places; distinguishable from other species by the straight untwisted stems, and by peduncles being one or two only from each bud; milky gum reisn [googal] which flows from the wounded stems is an acrid poison and is collected in leather bags. Plaster, prepared from roots and mixed with asafœtida [q.v.] applied externally to the stomachs of children suffering from worms; bark of root is purgative; stem is given in decoction in gout. Juice from the branches diluted used in rheumatism, in toothache, and internally when diluted as a purgative in cases of obstinate constipation; it has acrid, narcotic, drastic, and emetic qualities; it is used in dropsy and as an errhine in chronic affections of the ears, eyes, or brain; it is quoted in pharm., but non-officinal. The inspissated juice was at one time considered to be the Euphorbium of medicine; this really gum of Euphorbia resinifera.——*Twisting milk-hedge* (वज्रतुण्ड - vajratunda, San.; پیلی سینڈھ - pílísendh, Hind.;

తిరుగుజెముడు - tirugujemudu, Tel.; සිනුක් - sínuk, Singh.; திருகுக்கள்ளி - tirugukkalli, Tam.). Title from spiral stems. San. from (vajra, san. adamant + tunda, san. stem). Hind. from (pílí, hind. yellow + sendh, hind. + euphorbia tirucalli, linn.). Tel. from (tirugu, tel. screw + jemudu, tel. milk-hedge plant). Tam. from (tirugu, tam. to twist + kalli, tam. euphorbia tirucalli, linn.); from spiral stems. Tam. also (áttángallí), meaning goat + euphorbia tirucalli, linn.; goats [vellaud] eat the plant, though other animals do not touch the plant for the acrid juice. Title otherwise Spiral spurge, Twisted spurge. Botanically Euphorbia [milkhedge] tortilis, rottler, euphorbiaceæ [vricsham, 118]. Shrubby, three to four-cornered; branches spirally twisted, angles compressed, repandly toothed; prickles diverging; cymes fascicled in the sinuses of the ribs, short-peduncled, three-headed; floral leaves oblong, minute; involucres campanulate; styles very short, united at the base, dilated at the apex, two-lobed; common. Milky juice very similar to euphorbia antiquorum, linn.; drastic, cathartic and deobstruent; prescribed in conjunction with palmyra [q.v.] jaggery [q.v.]; undiluted acts as vesicatory; when mixed with castor-oil [lamp-oil] forms embrocation in palsy and chronic rheumatism.

MILLAT (ملت - millat, *Ar.*). Religion. Part of lacab; as Taujool millat, crown of the faith.

MILLET (موٹا اناج - motáanáj, *Hind.*). Means coarse grain as opposed to rice [q.v.]. Common name for various species of small seed corn, especially panicum miliaceum [varagoo] and panicum miliare [shaumay].——*Bulrush millet* (باجرا - bájrá, Hind.). Same as Bajrah.——*Chenna millet* (چینا - chíná, Hind.). Same as Varagoo.——*Coix millet* (रानजोंधळा - ránajóndhalá, Mahr.). Same as Coratty pausy.——*Common millet* (باجرا - bájrá, Hind.). Same as Varagoo.——*German millet* (ولایتی باجرا - viláitíbájrá, Hind.). Same as Tinay.——*Great millet* (جواری - javárí, Hind.). Same as Cholum.——*Guinea-corn millet* (گینی کا اناج - gíníkáanáj, Hind.). Same as Cholum.——*Horse-tail millet* (குதிரைவாற்சாமை - kuthiraivárchámai, Tam.). Same as Sticky grass.——*Indian millet* (جوار هندی - jawárihindí, Hind.). Same as Cholum and Varagoo.——*Italian millet* (ولایتی باجرا - viláitíbájrá, Hind.). Same as Tinay.——*Juar millet* (جواری - javári, Hind.). Same as Cholum.——*Kangnee millet* (کنگنی - kangní, Hind.). Same as Tinay.——*Khoda millet* (کودو چاول - kodocháwal, Hind.). See Khoda.——*Little millet* (अणु - anu, San.). Same as Shaumay.——*Marua millet* (منروی - manraví, Hind.). Same as Raggy.——*Sanwa millet* (سانوا - sánwá, Dec.). Same as Shaumay.——*Spiked millet* (باجرا - bájrá, Hind.). Same as Bajrah.——*Sugar millet* (शर्कराजूर्ण - sharkarájúrna, San.). Same as Sweet cholum.

MILLY (మిల్లి - milli, *Tel.*). Small hamlet. Suffix in place names [hully, pully, villy].

MIMAUMSAM (मीमांस - mímámsa, *San.*; மீமாஞ்சை - mímáñjai, *Tam.*). From (man, san. to think). Mental reflection [man].——*Oottara mimaumsam* (उत्तरमींमांसा - uttaramímámsá, San.). From (uttara, san. latter). System of philosophy, commonly called Vedauntam [q.v.], founded by Baudarauyanan. It is so called as being founded on the Oopanishad [q.v.] or latter part of the Vedas [q.v.]. It is also called Brahma mimaumsam, as regarding knowledge of Bramh [q.v.].——*Poorva mimaumsam* (पूर्वमीमांसा - púrvamímámsá, San.). From (púrva, san. first). Inquiry into the first or ritual portion of the Vedas. Hence also Carma mimaumsam. It is attributed to Jeiminy [q.v.]. It is usually called Mimaumsam simply, in opposition to Oottara mimaumsam of Baudarauyanan, which is called Vedauntam [matam]. See vol. I (74), (87).

MIMBAR (منبر - mimbar, *Hind.*). From (nabar, ar. raised). The pulpit in a mosque [musjid] from which the sermon [khootbah] is recited. It consists of three steps and is sometimes a movable wooden structure and sometimes a fixture of brick and stone built against the wall. The sermon is usually preached from the middle step.

MIN (மின் - min, *Tam.*). To flash.——*Minnal* (तडित् - tadit, San.; برق - bark, Ar.; بجلی - bijlí, Hind. and Dec.; کلت - kilat, Malay; ಮಿಂಚು - minchu, Can.; ಮೆಂಚಿ - menchi, Too.; మెరుపు - merupu, Tel.; മിന്നൽ - minnal, Mal.; மின்னல் - minnal, Tam.). San. from (tad, san. to shine). Ar. from (baraka, ar. to flash) [boorauk]. Hind. from (vidyut, san. lightning). Tel. from (meriyu, tel. to flash). Lightning. According to the Champoo ramayanam the following predictions may be formed from the color of the lightning. If it is of an impure green color, it precedes strong wind; if red, the weather will be afterwards hot; if yellow, strong thunder and rain will follow; and if white, or black, it presages a season without rain and dearth [caur, caurtey, maigham, mazhay].——*Moonnay* (முன்னை - munnai, Tam.). See sep. title.

MINCHERRY (మించేరి - minchéri, *Tel.*). From (mintsu, tel. abundant + éri, can. tank).—"*a*" Village; Bellary dist., Bellary tal.; pop. 602; acres 2,805; lat. 15° 04′; long. 76° 57′; from Bellary S. 5 miles.—"*b*" Range of hills; Bellary dist., Bellary tal. Highest peak, the Copper mountain [q.v.].

MINDIE (मेन्धिका - méndhiká, *San.*; मेंधी - méndhí, *Mahr.*; मेत्येझाड - métyéjháda, *Conc.*; حنا - hinná, *Ar.*; حنا - hiná, *Pers.*; مہندی - mhíndí, *Hind.*; مہیندی - mhendí, *Dec.*; حانا - hána, *Malay*; ಗೋರಂಟಿ - góranti, *Can.*; ಮದಿರೆಂಗಿ - madirengi, *Too.*; గోరంట - góranta, *Tel.*; ମଙ୍ଘାଟି - manghati, *Oor.*; മയിലാഞ്ചി - mayiláñchi, *Mal.*; මරිතොන්ඩි - maritondi, *Singh.*; மருதாணி - maruthání, *Tam.*). Title from sanscrit through hindostany. Ar. from (haná, ar. to become green); from pale greenish flowers. Malay from arabic. Too. from (mada, san. intoxication + ranga, san. colour); from soporific and dye-giving properties. Tel. from (góru, tel. nail + antu, tel. to stick). Mal. from (mayil, mal. peacock + áñchu, mal. to stretch). Tam. from (maru, tam. fragrance + tónri, tam. blood); from fragrant red dye. San. also (sahachara), meaning accompanying, useful companion as a medicine; properly a nail dye [q.v.]. Ar. also (yuranná). Can. also (madarangi), meaning intoxication + dye. Tel. also (maida), meaning deceitful. Mal. also (poytalaççi), corr. of (púttalaççi), meaning flower + head. Tam. also (aivanam), meaning beautiful; (maruthónri). Greek κύπρος. Title otherwise Camphire, Egyptian privet, Fragrant nail dye, Henna plant, Jamaica mignonette, Mendhee, Sweet-smelling camphire. Botanically Lawsonia alba, lamk., lythraceæ [vricsham, 58]. Alias Alcanna spinosa; Lawsonia inermis, spinosa. Shrub, 6–10 feet; calyx four-partite; petals four, unguiculate, alternate with the lobes of the calyx, obovate, spreading; stamens in pairs alternating with the petals; small neat foliage resembling myrtle; leaves opposite, oval-lanceolate, quite entire, glabrous; flowers panicled; ovary sessile, four-celled; capsule globose, three to four-celled; seeds numerous; large compact panicles of small greenish-white flowers, fragrant; flowering nearly all year; a hedge plant, resembling english privet; indigenous on coromandel coast; flowers religious. Has vulnerary and astringent properties; decoction of leaves used to purify the blood, applied externally in ulcers and other sores and skin diseases; leaves used for disease called burning-of-hands and feet to which madras sepoys [q.v.] in burmah are very subject; they are then reduced to pulp, made into a poultice with vinegar [caudy], and applied to soles of feet; flowers used as a sodorific, being placed in a pillow; oil and essence are rubbed over the body to keep the body cool; seeds and roots tonic gives to pharm. henna leaves, non-officinal. Very common in gardens as a hedge plant. From leaves red henna dye is prepared; this is used by women to stain the palms of the hands and the soles of the feet, and the tips of the fingers and toes; for this purpose the freshly gathered leaves are pounded with catechu [q.v.] or lime [choonam]; mussalmans use it also to dye their beards, the orange color being afterwards turned to a deep black by application of indigo [q.v.]; as a dye [shauyam] for fabrics it is very fleeting and therefore rarely used; a fragrant volatile otto [attar] is distilled from the flowers; wood grey, hard, close-grained. There is a variety with red flowers; the species called spinosa is the same plant growing in a dry sterile oil.——*China mindie* (چینی حنا - chíníhiná, Pers. and Hind.; చీనాచెట్టు - chínáchettu, Tel.; சீனப்பூ - shinappú, Tam.). Title as being a privet brought from china; mindie, from resembling lawsonia alba, lamk. Hind. from (chíní, hind. chinese + hiná, pers. lawsonia alba, lamk.). Tel. means china tree. Tam. from (shínam, tam. china + pú, tam. flower). Title otherwise China privet, Tsjinkin. Botanically Lagerstrœmia [cadaly] indica, linn., lythraceæ [vricsham, 58]. Shrub showy in flower; leaves 2 inches, glabrous, elliptic or oblong, sessile, acute or somewhat obtuse at each end, never acuminate; panicle not condensed, minutely pubescent or glabrous; petals bright pink; calyx-teeth on the fruit long-triangular, erect, but distant, thin not woody; seed ¼ inch including its wing. Erect-growing shrub, three feet high; smooth oval leaves; large panicles of rather small, fringe-petalled, flowers ranging from pale rose to dark crimson; also white and lilac; flowers religious.——*Foreign mindie* (آس - ás, Ar.; مورد - múrad, Pers.; ولایتی مہیندی - viláitímenhdí, Hind.). Hind. from (viláití, hind. foreign + mhendí, hind. lawsonia alba, lamk.). Ar. also (hakas). Greek μυρσίνη. Title otherwise Common myrtle. Botanically Myrtus communis, linn., myrtaceæ [vricsham, 56]. Shrub; white flowers succeeded by blue black berries in cold season; dark-green foliage, pleasant odour; introduced. Leaves useful in cerebral affections; fruit carminative and emetic; gargle of leaves used in aphthæ; paste of seeds applied to scorpion bites. Buds and berries used as spices. Seeds ground down and mixed with antimony [soorma] used to color eyelids. Compare:—Dodonæa viscosa, bog myrtle; Eugenia caryophyllæa, clove myrtle; Myrica sapida, box myrtle; Rhodomyrtus tomentosa, woolly myrtle. See gloss. paragraphs.——*Gool mindie* (दुष्पत्रि - dushpatri, San.; तेरडा - téradá, Mahr.; گل مہیندی کا جھاڑ - gulmhendíkájhár, Dec.; ಕಾಡುಕರ್ಣಕುಂಡಲಗಿಡ - kádukarnakundalagida, Can.; కాశితుమ్మి - káshitummi, Tel.; ହରଗାର - haragára, Oor.; കാശിത്തുമ്പ - káshittumpa, Mal.; காசித்தும்பை - kásittumbai, Tam.). Title from deccany. San. from (dus, san. bad + patra, san. leaf); from bursting on slight contact. Dec. from (gul, pers.

flower + mhendí, hind. lawsonia alba, lamk. + jhár, hind. tree), from its yielding a similar dye. Can. from (kádu, can. wild + karnakundala, san. earring + gida, can. plant). Tel. means benares toombay. Mal. from tamul. Tam. from (kási, tam. benares + tumbai, tam. leucas). San. also (divipatra), meaning divine leaf; (dvipatra), meaning double-leaved. Title otherwise Balsam flower, Snapweed, Touch-me-not. Botanically the Impatiens genus, geraniaceæ [vricsham, 31]. Glabrous herbs, with thick succulent stems enlarged at the joints, where the alternate undivided leaves are given off; flowers axillary, often handsome; capsule oblong, sub-cylindrical or with five blunt angles; largely cultivated in gardens for the beauty of the flowers, which are rose-pink, white, blue or variegated; ripe capsules on being touched, fly open and scatter their seeds. Hence generic name. The S. indian species indigenous or naturalized are:—acaulis, auriculata, balsamina, campanulata, chinensis, crenata, dasysperma, diversifolia, elegans, fruticosa, gardneriana, goughii, grandis, inconspicua, jerdoniæ, kleinii, latifolia, leschenaultii, ligulata, maculata, modesta, munronii, mysorensis, oppositifolia, parvifolia, pendula, racemosa, repens, rivalis, scabriuscula, scapiflora, setosa, stocksii, tangachee, tenella, tomentosa, umbellata, uncinata, verticillata, vridiflora, viscida, viscosa, wightiana.

MINHAH (منها - minhá, *Hind.*; మిన్హా - minahá, *Tel.*). From (min, ar. from + há, ar. that). Deduction; as from the assessed revenue of a village, on account of uncultivable tracts of wood or water, wilderness or waste, &c.——*Ashalminhah* (حشو منها - hashominhá, Hind.; అసల్మినహా - asalminahá, Tel.). From (hasho, ar. credit side of account + minháí, ar. deduction). Deductions from the total revenue [beriz, jumma] entered on the credit side of the account with government. The term is therefore applied to rent-free [inam] and other favorably assigned lands [jody]. Commonly used for unoccupied and unassessed land. See vol. I, 112.

MINTAKA (منطقه - mintaka, *Hind.*). From (niták, ar.) Zone.——*Mintaka i mabrooda* (منطقه مبروده - mintakahimabrúdah, Hind.). From (above + mabrúd, ar. cold). Frigid zone.——*Mintaka i mahrooca* (منطقه محروقه - mintakahimahrúkah, Hind.). From (above + mahrúk, ar. hot). Torrid zone.——*Mintaka i mooaddila* (منطقه معتدله - mintkahimuaddilah, Hind.). From (above + muaddil, ar. moderate). Temperate zone.——*Mintakat ool boorooj* (منطقة البروج - mintakatulburúj, Hind.). The Zodiac [nacshatram, noojoom, raushy].

MIRASS (ميراث - mírás, *Hind.*). From (irs, ar. to inherit). Right derived from inheritance [cawnyautchy, milkyat, sawmyam]. Mirassy is hereditary, and mirassidar is hereditary proprietor or landholder. See vol. I, 112, 125.

MIS (مس - mis, *Pers.*). Copper [taumram].——*Missee* (مسی - missí, Hind.). An oxide of copper used against toothache and to stain teeth black.

MISBAH (مصباح - misbáh, *Ar.*). Lamp. Lacab of the prophet. Prefixed to allah makes a lacab; as Misbah ool lah, lamp of allah [ism].

MISCAL (مثقال - miskál, *Hind.*). From (sikal, ar. weight). Goldsmith's weight. 4 maushams = 1 miscal; 3 miscals = 1 tolah [niray, 3e]. Approximate actual value, 1 miscal = 60 grains troy. Compare Varauhaniday, Cutlay pagoda. See vol. I, 609.

MISHAMMAH (మిస్సమ్మ - missamma, *Tel.*). Native term for a female missionary or zenana [q.v.] lady.

MISHMEE (مشمی - mishmí, *Hind.*). A tract of land at the head of Assam valley from which the best mamiraun [q.v.] comes.——*Mishmee teeta* (مشمی تیتا - mishmítíta, Hind.). From (above + títá, hind. bitter). Same as Mamiraun.

MISHMISH (مشمش - mishmish, *Ar.*; زردآلو - zardálú, *Pers.*, *Hind.* and *Dec.*). Pers. from (zard, pers. yellow + álú, pers. plum, prunus). Ar. also (tuffáhiarmaní), meaning armenian apple; (kashmíripistah), meaning cashmere pistachio. Hind. also (khúbání), meaning dried plum; (chúari) [cherry]. Title otherwise Apple of the bible, Apricot, Armenian apple, Cashmere pistachio, Moon of the faithful, Yellow plum. Botanically Prunus [auloo] armeniaca, linn., rosaceæ [vricsham, 49]. Deciduous fruit tree, 15 feet high; leaves sub-cordate; flowers sessile, white, flowering in february and march; introduced on Neilgherries; a gum [gond] exudes from wounds in bark.

MISL (مثل - misl, *Hind.*). From arabic. Similitude, appointment.——*Misl bundy* (مثل بندی - mislbandí, Hind.). From (above + bandí, dec. binding). Register containing the names of persons holding village offices [balootah] in each village.——*Misl curnum* (మిసల్కరణము - misalkaranamu, Tel.). From (above + karanamu, tel. curnum). The regularly appointed Curnum [q.v.].

MISR (مصر - misr, *Hind.*). Egypt.——*Misry* (مصری - misrí, Hind). From (misr, ar. egypt); the original source of supply. Sugar-candy [candy].——*Salep misry* (ثعلب مصری - salabmisrí, Pers.). From being exported from egypt. Same as Salep.——*Shaulah misry* (ثعلب مصری - salabmisrí, Hind.; సాలామిసిరి - sálámisiri, Tel.; சாலாமிசிரி - shálámisiri, Tam.). Means Egyptian salep. From being exported from Egypt. See Salep.

MISWAUK (مسواك - miswák, *Hind.*). A twig of a tree, of which several kinds are in use, as that of the margosa [neem] tree, used as a substitute for a tooth brush. It is about a span long, split at one end and chewed to render it softer.

MITCHAM (മിച്ചം - miççam, *Mal.*). From (míru, tam. to remain). Surplus.——*Mitchauram* (മിച്ചാരം - miççáram, Mal.). From (above + város, mal. rent). Remaining share. Rent due to Jenmy [q.v.] after deducting the interest of the caunom advanced by the tenant [caunom].

MITHY (తొక్కుడుకర్ర - tokkudukarra, *Tel.*; മെതി - meti, *Mal.*; மிதி - mithi, *Tam.*). Title from tamul. Tel. from (tokku, tel. to tread + karra, tel. stick). Tam. means to tread. Treadle [nesavoo].

MITTAH (مٹھا - mitthá, *Hind.*). From (makta, ar. fixed). Sub-division of a district. A small polliem [q.v.] or zemindarry [mootah, zemindarry].——*Mittahdarny* (مٹھاداری - mitthadární, Hind.). A female mittahdar.——*Mootah* (مٹھا - mutthá, Hind.). A sub-division.

MIYAUN (میان - miyán, *Pers.*). From arabic. A term of respectful address amongst Mahomedans; like title 'father' given to monks. A schoolmaster. Also term of endearment for a boy.

MIYAUNAH (میانه - miyánah, *Hind.*). From (miyán, pers. waist). A litter used at marriage ceremonies of Mahomedans.

MLECHA (म्लेच्छ - mléççha, *San.*). Onomatopoeic. From (mlichh, san. to speak indistinctly). Impure [neecha]. A foreigner, one who is not a Hindoo [q.v.]. The term is as old as the Mahabhaurat [q.v.], in which the tribes of Southern india are called by this name, and also Nishaudan [q.v.]. See vol. I (2).

MOBALAG (مبلغ - mablagh, *Hind.*). From (balagha, ar. to attain the utmost point). Sum of money. Total.

MOCHA (يمن - yaman, *Ar.*). Fortified sea-port near the strait of Babelmandeb. 130 miles north-west of Aden. Principal export is coffee [q.v.].——*Mocha aloes* (صبر يمنی - sibriyamaní, Hind.). Same as Bombay aloe.——*Mocha senna* (سناء يمنی - sanáiyamaní, Hind.). Same as Tinnevelly senna.

MODAM (मोद - móda, *San.*). From (mud, san. to rejoice). Glad.——*Modacam* (मोदक - módaka, San.). From (mud, san. to rejoice). A small round sweetmeat made of rice flour, sugar, &c.——*Modaca priyan* (मोदकप्रिय - módakapriya, San.). From (módaka, san. the cake + priya, san. loving). Vigneshwaran [q.v.], who is fond of rice-flour cake.——*Moodgam* (मुद्ग - mudga, San.). From (mud, san. to be glad).——Botanically the Phaseolus genus, leguminosæ [vricsham, 48]. Annuals or herbaceous perennials; leaves have three leaflets; flowers often showy; pod straight or slightly curved containing several seeds. The species best known to the natives are:—aconitifolius [moorman's gram], adenanthus [wild green gram], lunatus [country lobyah], mungo [green gram], mungo, var. radiatus [black gram], semi-erectus [needle chacondah], trilobus [field gram], trinervius [tufted green gram], vulgaris [lobyah].——*Moong* (مونگ - múng, Hind.). Same as Green gram. Ground nut is Foreign moong.

MODE (മേട് - métu, *Mal.*; மேடு - médu, *Tam.*). High ground [maud, mett, mitta]. Suffix in place names.——*Modan* (മോടൻ - mótan, Mal.). From (métu, mal. high land). A hill paddy in Malabar. Carroottary modan is a black, and Veloottary modan is a white variety [paddy].——*Mody* (மோடி - módi, Tam.). From (módu, tam. height). A forest deity [caudcaul].——*Mootfily* (మోటుపల్లె - mótupalle, Tel.). Corr. from tel. meaning uneven village [motoopully]. Ancient province, now part of Baupatla talook.——*Moott* (முட்டு - muttu, Tam.). Rising ground [mett].——*Moottam* (മുട്ടം - muttam, Mal.). From (métu, mal. high ground). Town, Port, Rocky promontory; Travancore state, Pudmanaubhapooram division, Yerraneel tal.; lat. 8° 07′; long. 77° 22′; from Yerraneel S. 6 miles; from Bombay S.S.E. 795 miles; from Cadiapatam S. E. 1¼ miles; from Colachel S.E. 5 miles; from Shaunaurgoody W. 16 miles; from Trivandrum S.E. 35 miles. On the coast near Colachel. Abounds with palmyras [q.v.]. The soil is red and the promontory shows red. London mission bungalow [q.v.]. Resorted to by Europeans. Light in lat. 8° 07′; long. 77° 21′. White; fixed. 16 miles range. Visible from all directions seaward. Dark grey granite column. Intended to mark the vicinity of the Crocodile rock, ¾ miles off Cadiapatam.——*Moottanaud* (முட்டநாடு - muttanádu, Tam.). From (muttu, tam. high ground + nádu, tam. country). Village, Hill; Salem dist., Salem tal. Highest summit on the Shevaroy hills [green hills].——*Moottaul* (முட்டாள் - muttál, Tam.). From (muttu, tam. impediment + ál, tam. person). A dunce; term of abuse.——*Mott* (மோடு - módu, Tam.). High ground. Prefix in place names; as Mottere, meaning high village.

MOEEN (معين - muín, *Ar.*). From (ána, ar. to aid). Aider. Part of lacab; as Moeen ood deen, support of religion; Moeen ool moolk, support of the kingdom [ism].

MOFUSSIL (مفصل - mofassal, *Hind.*). From (fasl, ar. division). Separated, detailed. The subordinate divisions of a district, in contradistinction to the sudder [q.v.] or chief seat of government. So the country in general, including large towns, as distinct from the capital of a province.

MOGA (మొగ - moga, *Tel.*). Male [makkal]. Plant first term; as Anisomeles malabarica (mogabíra), male elæodendron glaucum.

MOGALINGAM (மொகலிங்கம் - mogalingam, *Tam.*). From (magga, can. loom + vilangu, tam. to shine); wood polishes well and used for weaver's beam. Same as Weaver's beam.

MOGALY (మొగలి - mogali, *Tel.*). Screw-pine [q.v.].——*Mogultoor* (మొగలితుర్రు - mogaliturru, Tel. mogaltur*). From (mogali, tel. fragrant screw-pine, pandanus odoratissimus, linn. + turru, tel. village). Sanscrit name (kétakipura), meaning same. Town, Head-quarters of Rajah of Mogultoor; Godavery dist., Narsapore tal.; pop. 5,970; acres 7,463; lat. 16° 25'; long. 81° 39'; from Cocanada S.W. 55 miles; from Narsapore W. 5 miles; from the sea N. 4 miles. In 1758, the Rajah of estate of this name assisted in expelling French from Narsapore. In 1763, the Rajah was defeated by Seetaram row of Vizianagram. In 1787, estate was taken under management, Zemindar having fallen into arrears. In 1791 an insurrection raised by one Jagaraus was quelled and a company of sepoys [q.v.] was stationed here. The Rajah, Culdindy tripatty rauz, died on the 28th of August 1791. He had adopted a very distant relative as his successor, but the child was not permitted to succeed, and the estate was annexed to the Company's dominions, and became a portion of the Government lands of Masulipatam. About 1794 the town was the head-quarters of the second division, comprising the old Rajahmundry and Masulipatam districts. The town is at present noteworthy for its salt [ooppoo] manufacture. The Narsapore canal is connected at this place with the Ooppooteroo. Old fort. Protestant mission. Trig. station in lat. 16° 25' 38·06"; long. 81° 40' 4·12"; from Mootyaulapully N.E. 3 miles.

MOGHUL (مغل - mughal, *Hind.*). From (mongol, turk. native of mongolia). Name given by Hindoos to the Mahomedan dynasty [raj] founded by Baber and made paramount in India by Acbar. The race to which these rulers belonged was mixed Mongolian and Caucasian. Mahomedans now called Moghuls in S. india are those bearing tribal adjuncts of Aghah [q.v.] and Beg [q.v.]. They are very poor. All soonnees [q.v.]. About a thousand all told in the presidency, of which North arcot has the most [mahomedan]. Moghul, as the name of a period of a Mahomedan school of architecture, is applied only to the time of Acbar and Jehaungeer [staupatyam]. See vol. II, 204.

MOGRAH (موگرا - mográ, *Hind.*). Jasmine, jasminum sambac. Plant second term. Ex., where transl. is of first term:—Gynocardia odorata (chálmográ), bark; Jasminum auriculatum (suímográ), needle; Jasminum grandiflorum (jáychémógré), jasminum; Jasminum pubescens (kastúrimógré), musk; Tabernæmontana coronaria (dúdhmográ), milk. See gloss. paragraphs.

MOHAM (मोह - móha, *San.*). From (muh, san. to stupify). Bewilderment; one of the effects of Manmatan's arrows [caumabaunam]. Spiritual ignorance which leads men to believe in the reality of worldly objects, and to addict themselves to mundane or sensual enjoyment.——*Mohan* (मोह - móha, San.). Manmatan [q.v.].——*Mohiny* (मोहिनी - móhiní, San.). A female form assumed by Vishnoo [q.v.] at the time of the Coorma [q.v.] avatar [q.v.]. Shiva [q.v.] became enamoured of Mohiny, who bore him a son, named in the north Hariharan [q.v.]; in the south Ayenaur [ayen]. See vol. I (77).

MOHARRAM (محرم - muharram, *Hind.*; పీర్లపండుగ - pirlapanduga, *Tel.*; அல்லாப்பண்டிகை - allappandigai, *Tam.*). From (haruma, ar. prohibited and so sacred); cf. latin sacer. First month of Mahomedan lunar year [hijra, maheena]. Also the commemorative function celebrated by Mussalmans on the first ten days of that month [hoossain]. The latter has been sufficiently described at vol. I (96). In certain traditional works it is stated that it was on the tenth day of Moharram that the following events took place:—"*a*" the first fall of rain;—"*b*" Adam and Eve's descent on earth and the establishment of the propagation of the species;—"*c*" divine mission granted to the souls of ten thousand prophets;—"*d*" the creation of Arsh, the ninth heaven or the empyrean throne of the divine glory and majesty; and—"*e*" Coorchy, the eighth or crystaline heaven, supposed to be the judgment seat of god;—"*f*" Bheest, or the seven heavens;—"*g*" Dozak, or hell;—"*h*" Lowh, or the tablet on which the decrees of the deity are inscribed;—"*i*" Calam, the pen wherewith they are written;—"*j*" Takdeer, fate or destiny;—"*k*" Hayaut or life;—"*l*" Mamaut or death.

MOHEE (محي - muhí, *Hind.*). From (hai, ar. to live). The restorer. An attribute of God [allah].——*Moheé ood deen* (محي الدين - muhíuddín, Hind.). The reviver of the faith. Lacab of the chief Mahomedan saint [abdool cawder]. Assumed as ordinary alam at present [ism].

MOHIB (محب - muhib, *Ar.*). From (hubba, ar. to love). Attached. Prefixed to an alam forms a lacab; as Mohib ally, friend of ally [ism].

MOHIRY (మోహిరి - móhiri, *Tel.*). From (móharamu, tel. battle-array). Tel. also (kerandimala), whence called Kerandy hills. Village, Talook, Hills; Ganjam dist., Berhampore tal.; acres 17,920; lat. 19° 18'; long. 84° 43'; from Berhampore W. 8 miles; from Chetterpore W.S.W. 22 miles; from the sea W. 17 miles. The name given to the Government talook [q.v.] under the direct jurisdiction of the Tahsildar [q.v.], Berhampore. Formerly a zemindarry [q.v.]. The last zemindar [q.v.] was of unsound mind and without issue. He fell into arrears and the estate was brought in by Government for Rs. 100 fifty years back. The hills lie in the centre of the Senior assistant's division and occupy about 20 square miles of territory. They separate the Government lands from the Pedda kimedy and Cheekaty zemindarries. The boundary line between the Government and zemindarry lands runs through the centre of the range. The range is about 2,500 feet high and contains some thirty hamlets inhabited by Tinka khonds [q.v.]. The more remote hills and valleys contain fair bamboo [q.v.] jungle and a few forest trees, but the more accessible slopes have been almost denuded for the supply of fuel to Berhampore town and the neighbourhood. The station of Sircote in the hills was occupied during the disturbances of 1818 by the Collector's sibbundy [q.v.] corps.

MOHSAL (محصل - mohassil, *Ar.*). From (hasula, ar. to remain over and above). A guard placed over a person to enforce payment of a demand.

MOHTASIB (محتسب - muhtasib, *Hind.*). From (hasiba, ar. to calculate). A superintendent of markets and police [inam].

MOHUR (مهر - mohr, *Hind.*; మొహరీ - moharí, *Tel.*; மோரா - mórá, *Tam.*). From persian. A seal [moodray]. A gold coin equal in Bengal, to sixteen sicca [q.v.] rupees [q.v.]; in Madras, to fifteen Arcot rupees; in Bombay, to fourteen soonnat rupees. From 4 to 5 pagodas [q.v.], called otherwise gold mohur. A gold rupee similar to a mohur was coined under the reign of the Emperor Shah alam, which began in 1770. There was also the mohur of Tippoo. Cf. Nishkam.——*Charyauree mohur* (چهار یاری مهر - chaháryárímuhr, Hind.). From (chahár, hind. four + yár, pers. companion). A gold mohur of Shah jehaun; reverse his name, obverse Mahomedan creed and the four companions, viz., aboo bakr, oomr, osman, ally.——*Chinnamaila mohur* (சின்னமேளமோகரா - shinnamélamógará, Tam.). From (shinna, tam. small + mélam, tam. a musical instrument + above). Tinnevelly coin, equal to 3 pagodas 34 fanams 7 cash.——*Shree ram mohur* (ಶ್ರೀರಾಮಮೊಹರ - shrírámamohará, Can.). From (shrirāma, san. holy ráma). Cup-like form stamped in three different ways; one with figure of Rama [q.v.] on concave side, another with figure of Rama and Seetay [q.v.] on concave side and of Rama yantram on convex, and third with figure of Hanooman [q.v.] on convex. See vol. I, 609.

MOHURRER (محرر - muharrir, *Hind.*). From (harra, ar. to write). A clerk.

MOHWAH (مهوا - mohwá, *Hind.*). From (madhuka, san. sweet) [mad]. Botanically the Bassia genus, sapotaceæ [vricsham, 82]. Trees; inhabitants of india and malay islands; alternate, silky leaves; flowers whitish, with fleshy corolla; fruit pulpy with three or four one-seeded cells. The species best known to the natives are shown below. Other species are:—malabarica, microphylla. The vernacular term includes also Achras sapota and Terminalia belerica.——*Butter mohwah* (پهلوارا - phalwárá, Hind.). Title from semi-solid oil from seeds. Hind. from (phalwá, hind. the oil). Title otherwise Butter tree, Epie oil plant, Fulwa butter, Indian butter. Botanically Bassia [mohwah] butyracea, roxb., sapotaceæ [vricsham, 82]. Deciduous tree, 30–40 feet; leaves obovate, tomentose beneath; corolla eight-cleft; stamens thirty to forty on longish filaments; pedicels aggregate, and, as well as the calyx, woolly; drupes oval; flowers smallish, white. By pressure seeds yield a semi-solid oil [yennay], which thickens and becomes like lard; used for culinary purposes, for soap [sauboon], and for anointing the body; in pharm. non-officinal. The flowers abound in honey, scarcely differing in the raw state from hive honey [shahad], except that it is more limpid; it is manufactured into sugar [q.v.], in every respect equal to that of the sugar-cane [q.v.]. Pulp of fruit eaten.——*Common mohwah* (मधूक - madhúka, San.; मोह - móha, Mahr.; درخت گل چکان - darakhtigulchakán, Pers.; مهوا - mahuá, Hind.; موہا - mohá, Dec.; ಇಪ್ಪೆ - ippe, Can. and Too.; ఇప్ప - ippa, Tel.; ഇരിപ്പ - irippa, Mal.; මීගස - migasa, Singh.; இலுப்பை - iluppai, Tam.). San. from (madhu, san. sweet); from flowers. Mahr. from (muh, san. to intoxicate); from flowers [atimathooram, kamela]. Pers. from (darakht, pers. tree + gul, pers. flower + chakán, pers. shedding). Hind. from (muh, san. to intoxicate). Dec. from sanscrit. Can.

from (impu, can. sweetness). Too. from canarese. Tel. from (impu, tel. sweetness). Mal. from tamul. Singh. from (mí, singh. honey + gasá, singh. tree). Tam. from (irumbu, tam. iron), iron-like. Tel. also (pinnaïppa), meaning small + the tree. Singh. also (telmí), meaning oil + bassia. Tam. also (iruppai). Title otherwise Flower-dropping tree, Honey tree, Iloppay, Ilpa, Ippa, Long-leaved bassia, Wild sapota. Botanically Bassia [mohwah] longifolia, linn., sapotaceæ [vricsham, 82]. The species generally found in southern districts, but also found in circars [q.v.]. Oak like [belote] umbrageous tree, 40 feet; trunk 6 or 7 feet in circumference, leaves 4–8 inches long, 2–4 inches broad; ovate-lanceolate, entire, crowded about the ends of the branchlets, immediately above the peduncles; young shoots and petioles slightly villous; calyx of two opposite pairs of leaflets; corolla eight-cleft; filaments scarcely any; pedicels axillary, drooping, crowded, one-flowered; stamens sixteen to twenty, within the gibbous tube of the corolla; flowers whitish; fruit olive-shaped, yellowish when ripe, eight to nine-seeded; seeds solitary; flowers in hot weather. Bassia bark is thick and red colored, with a rough brown surface and astringent taste. The dried flowers at a little distance have the appearance of raisins, on closer inspection they are seen to be fleshy, sticky, compressed, hollow bodies, about $\frac{6}{10}$ of an inch long, and nearly as broad, with an aperture at both ends, the upper being much the larger and serrated; upon being soaked in water they assume an almost globular form, and the numerous anthers are seen attached by very short filaments to the inside of the corolla; the taste is acid and sweet; the fleshy substance of the corolla, which is about $\frac{1}{16}$ of an inch in thickness and translucent, consists of a parenchyma which may be divided into two portions: an outer or cortical, consisting of smaller cells, and an inner consisting of large cells; it is traversed by numerous bundles of spiral vessels; some of the cells contain crystalline masses of sugar [q.v.]; all of them granular matter; there is no starch. The seeds are from 1–2 inches long, and enclosed in a chestnut colored thin shell; they have a peculiar odour and bitter aromatic taste; the seeds yield a fatty oil, greenish yellow in color, which concretes immediately it is expressed and is used as butter [q.v.]. The latex of these trees is a milky liquid, sticky to the touch, when kept it develops a rancid sour odour; it contains, besides the guttapercha [q.v.], some starch and about 88 per cent. of water. Not found at great elevation; cultivated in topes [q.v.] and elsewhere on account of its oil; where cultivated, soil most suitable, red and black loam or sandy soil; planted in pits; after five years the trees fruit; on w. coast not cultivated; the wild tree produces fruits after twenty years; a bad mohwah harvest has never been known; the flowers are produced in enormous quantities in march and april, after the old leaves have fallen and before the new leaves have appeared; the flowers fall off and cover the ground beneath the trees, and are gathered by the natives; the flowers when dried have somewhat the odour and appearance of sultauna raisins; so distributed over this country like dried grapes in europe; from the quantity of sugar contained, the flowers yield when fermented a large quantity of vinous juice; the flavor of the spirit roughly distilled from juice is very similar to that of irish whisky; strong, smoky, and rather mouse-like [shoondely] odour and flavor; this latter disappears with age; this spirit is distilled in southern districts. Gummy juice employed by veidyans [q.v.] in rheumatic affections; the bark used in decoction as an astringent and emollient and as a remedy in itch; flowers used in coughs in the form of a decoction; gives to pharm. fixed concrete oil and spirit distilled from the flowers; non-officinal; whole plant is stimulant, demulcent, and emollient, heating, astringent, tonic, and nutritive; seeds yield thick concrete oil, applied to the head in cephalalgia; residuum or cake left after the expression of the oil is employed as an emetic. Flowers are eaten raw; jackals [q.v.] are fond of them; they have a sickly sweet taste resembling manna [q.v.]; the flowers also dried and preserved; the part eaten is the succulent corollas; the flowers are again roasted and eaten; also bruised and boiled to a jelly, and made into small balls, which are exchanged by the natives for fish [matsyam] and rice [q.v.]. In ganjam, mohwah spirit [arrack] is largely used by the gonds [q.v.] and others; the fresh spirit is, owing to the quantity of aromatic or empyreumatic oil which it contains, very deleterious; the fresh refuse or marc after the extraction of the spirit is attractive to animals; the flower is exported to france for the manufacture of liqueurs [mooskiraut, sharaub]. Oil is to the common people a substitute for ghee [q.v.]; cakes are made of it; sold as ilooppay butter; oil also used in lamps especially in temples [coil], and to make soap [sauboon]; the oil cake [poonauk], is used for washing the head, and carried as a small article of trade to those countries where the tree is not to be found; gum [gond] is not turned to any use. Wood is hard, and nearly as durable as teak [q.v.], but not so easily worked, nor is it procurable of such length for beams and planks; it is not liable to be deteriorated by immersion in water, or to suffer from the attacks of the teredo navalis; it is not much used; not being of sufficient value to compensate for the loss of the flower and fruit, tree is seldom cut down. There is a Tamul proverb:—இலுப்பைப்பூவைத் திருப்பிஞல் இருபுறமும் பொத்தல்—"If the flower of ilooppay be turned, it "will be found hollow on both sides;" it looks like a globule, character needs close examination.——*Foreign mohwah* (کاجہار - sapotekájhár, Hind.; సీమఇప్ప - símaippa, Tel.; മണിലക്കാര - manilakkára, Mal.; சீமையிலுப்பை - shímaiyiluppai, Tam.). Title from being introduced from america and from taste and flavor of fruit like that of mohwah. Hind. from english. Tel. from (síma, tel. foreign + ippa, tel. bassia longifolia, linn.). Mal. from (manilla, mal. manilla, the place + kára, mal. canthium) [edible paulay]. Tam. from (shímai, tam. foreign + iluppai, tam. bassia longifolia, linn.). Hind. also (chakotíkájhár). Title otherwise American bully, Australian cranberry, Bully, Mazeberry, Naseberry, Neesberry, Nisberry, Rough chaff, Sapodilla, Sapota, Sapotilla. Botanically Achras sapota, linn., sapotaceæ [vricsham, 82]. Sapota from Mexican through Spanish. Alias Mimusops manilkara; from (manilakkára, mal. manilla canthium, mimusops kauki). Evergreen fruit tree, 30 feet high; leaves lanceolate-ovate; flowers solitary, white. Of low growth; from jamaica; fruit size and form of an orange [q.v.], with a rough, brown, dark-looking, but thin and tender rind; interior, containing black almond-formed [baudam] seeds, consists of a pale-brown juicy pulp. Gives a gum [gond].——*Jungle mohwah* (காட்டிலுப்பை - káttiluppai, Tam.). Same as Belleric myrobalan.——*Wild mohwah* (अटविमधूक - atavimadhúka, San.; मोह - móha, Mahr.; درخت گل چکان صحرائی - darakhtigulchakánisahrái, Pers.; مہوا - mahuá, Hind.; موہا - mohá, Dec.; ಕಾಡಿಪ್ಪೆ - kádippe, Can.; ఇప్పె - ippe, Too.; అడవిఇప్ప - adaviippa, Tel.; ମୋହ - moha, Oor.; കാട്ടിരിപ്പ - káttirippa, Mal.; காட்டிலுப்பை - káttiluppai, Tam.). San. from (atavi, san. forest + madhúka, san. bassia). Mahr. from sanscrit. Pers. from (darakht, pers. tree + gulchakán, pers. bassia longifolia, linn. + sahrái, pers. wild). Hind. from sanscrit. Dec. from hindostany. Can. from (kádu, can. wild + ippe, can. bassia). Tel. from (adavi, tel. forest + ippa, tel. the tree). Oor. from sanscrit. Mal. from (kátu, mal. forest + irippa, mal. the mohwah tree). Tam. from (kádu, tam. forest + iluppai, tam. plant, bassia longifolia, linn.) [belleric myrobalan]. San. also (priyála), meaning desired [chironjee]; (lóddhrapushpá), meaning symplocos racemosa, roxb. + flower; perhaps from similarity in flowers. Hind. also (múva), from sanscrit. Can. also (honge); (ippemara). Tel. also (ippa). Mal. also (irippa); (punna), meaning golden [common poon, kamela, malabar poon]. Title otherwise Broad-leaved bassia, Piyal, Quindah, Yallah oil plant. Botanically Bassia [mohwah] latifolia, roxb., sapotaceæ [vricsham, 82]. Alias Madhura indica. Madhura from sanscrit. The species usually found in northern india and circars [q.v.]. Tree, 40 feet; leaves alternate, oblong or elliptic, crowded about the extremities of the branches, smooth above, somewhat whitish below; stamens twenty to thirty within the gibbous tube of the corolla, on short filaments; corolla thick, fleshy, with a more than eight-lobed limb; lobes cordate; sepals four; pedicels drooping, terminal; flowers white, with a tinge of green and cream color, numerous, crowded from the extremities of the branchlets, peduncled, and bent with the mouth of the flowers directly to the ground; flowering in march and april; berry size of a small apple [seb], one to four-seeded. Flowers used as famine food; mohwah spirit [arrack] distilled as in longifolia.

MOIZ (معز - muiz, *Ar.*). From (azza, ar. to strengthen). Dear, honored. Attribute of God [allah]. Common alam. Also part of lacab; as Moiz ood deen, dear to religion [ism].

MOKADDAM (مقدم - mukaddam, *Hind.*). From (kidama, ar. to go before). Placed above. The head of a village or caste.——*Mokaddamah* (مقدمه - mukaddamah, Hind.). A subject matter, case, law-suit.——*Mokaddim* (مقدم - mukaddim, Hind.). The bringing forward. Attribute of God [allah]. Common alam; as Mokaddim hoossain, double alam [ism].

MOKARRER (مقرر - mukarrar, *Hind.*). From (karra, ar. to settle) [caraur]. Appointed, fixed.

MOKEEM (مقیم - mukím, *Hind.*). From (kauma, ar. to stand). Steadfast. Used as alam; as Mahomed mokeem, double alam [ism].

MOKHAUBILA (مقابله - mukábalah, *Hind.*). From (kabala, ar. opposite). Examination. Compared with the original draft and found to agree.

MOKHAUSA (مخاصه - mukhásah, *Hind.*). From (khassa, ar. to particularize). Private. Grant of land by zemindar [q.v.] for support of relatives, followers, and dependents, or for military service [inam].

MOKKA (మొక్క - mokka, *Tel.*). Stump. Plant first term:—often joining two genera. Ex., where transl. is of second term: Andropogon bladhii (mokkadzanumu), crotalaria juncea; Bignonia sp. (mokkavépa), melia azadirachta; Stereospermum chelonoides (mokkavépa), melia azadirachta; Zea mays (mokkadzonna), sorghum vulgare. See gloss. paragraphs.

MOKOOP (موقوف - maukúf, *Hind.*). From (vakafa, ar. to stop). Dismissed [bartarf, tagheir]. Suspended.

MOLUCCAS (ملوک - mulúkah, *Hind.*). Means royal islands. Otherwise Spice islands. Strictly the five clove islands, Batjan, Makian, Motir, Ternate and Tidore, lying to the west of Gilolo and washed by the Moluccas strait which separates Gilolo from

Celebes. But term extended to all islands over nearly 11 degrees of latitude and longitude now under Dutch rule, between Celebes and N. guinea. The islands are divided into four residencies:—Amboyna, Banda, Manado and Ternate. Distinguish from Malacca.——*Molucca bean* (ملوکہ کا منکا - mulúkahká-manká, Hind.). Same as Bonduc.——*Molucca bramble* (ملوکہ کا گوری پھل - mulúkahkágauríphal, Hind.). See Gowry's fruit. ——*Molucca grain* (حب الملوکہ - habbulmulúkah, Hind.). Same as Jamalgota.——*Molucca nut* (جوز ملوکہ - jauzimulúkah, Hind.). Same as Bonduc.

MOM (मधुज - madhuja, *San.*; मेण - ména, *Mahr.*; شمع - shama, *Ar.*; موم - mom, *Pers.*, *Hind.* and *Dec.*; لِلن - lilin, *Malay*; ಮೇಣ - ména, *Can.*; ಮಯಣ - máyana, *Too.*; మైనము - mainamu, *Tel.*; മെഴുക് - mezhuku, *Mal.*; මීඉටි - míiti, *Singh.*; மெழுகு - mezhugu, *Tam.*). Title from hindostany. San. from (madhu, san. honey + já, san. to be born). Mahr. from (madana, san. bees' wax). Singh. from (mí, singh. honey + iti, singh. wax). Tam. means to spread. Wax. Substance secreted by the bee [tainee] and used in the construction of the comb. The ordinary yellow wax, cera flava of chemists, is a solid substance, moderately heavy, and of yellow color. In odour it resembles honey. It is obtained by draining off or pressing out the honey from honey-combs and then giving repeated boilings and strainings. The wax skimmed off is eventually put into moulds. For the greater number of uses to which bees' wax is appropriated, it is however necessary that the wax should be rendered perfectly white. This is effected by exposing it in thin ribands on a bleaching ground, where it is subjected to the action of light, air, and moisture, and loses both color and odour. It there becomes white wax, cera alba of chemists. Waxes are worth more than greases, on account of their very high melting points. Their relative values depend upon color, transparency, and freedom from resinous matter. Resin [raul] may be easily detected by lighting a small piece of the wax; the more smoke, the greater proportion of resin, and therefore less value. The paler and more transparent the wax, the better. Medicinally wax is emollient and demulcent; ingredient in ointments, plasters and suppositories. Medicinally no difference between white and yellow. For honey see Shahad.——*Mom jauma* (موم جامہ - momjámah, Hind.). Wax cloth, used for covering packages in rainy weather, &c.——*Vegetable wax* (ಎಣ್ಣೆಮೇಣ - enneména, Can.; గూటిమైనము - gútimainamu, Tel.; എണ്ണക്കൂടി - ennakkúti, Mal.; எண்ணெய்மெழுகு - enneymezhugu, Tam.). Can. from (enne, can. oil + ména, can. wax). Tel. from (gúdu, tel. niche + mainamu, tel. wax); as found beneath lamp niches. Mal. from (enna, mal. oil + kútu, mal. to join). Tam. from (enney, tam. oil + mezhugu, tam. wax). Anglo-Indian term applied to solidified oil produced from oils [yennay], generally from the common lamp oil [q.v.] or castor [aumanac] oil of the country. Iloppay oil [mohwah] also produces a perfectly white substance of the consistency of good tallow and is mixed with castor oil for the manufacture of vegetable wax. Margosa [neem] oil, the oil of Melia azadirachta, produces a vegetable wax as hard as any made from the best lamp oil and of a light saffron [q.v.] color.

MOMIN (مومن - momin, *Hind.*). From (amn, ar. peace). A true believer. Orthodox mahomedan.

MOMIREE (पशुमारण - pashumárana, *San.*; مومیری - momírí, *Hind.*; پیلی جڑی - pílíjarí, *Dec.*). Title from hindostany. San. from (pashu, san. cow + márana, san. death). Dec. from (pílí, hind. yellow + jarí, hind. root). Hind. also (piyárangá), meaning lovely color. Title otherwise Cow-killer, Feathered columbine, Meadow rue, Meadow spice root, Piyaranga root, Yellow root. Botanically Thalictrum foliolosum, dc., ranunculaceæ [vricsham, 1]. Herbaceous, erect, branched; leaves large, supra-decompound, leaflets very numerous, small, oval, cut and lobed; petioles auricular at the base; sepals oblong, obtuse, five to seven-nerved, pale green or brownish purple; stamens numerous; filaments filiform; anthers mucronate; panicles much branched, leafless; bracts small; achenia few, oval-oblong, acute at both ends, narrowly ribbed; flowers yellowish. Root fibrous, fasciculate, about the thickness of a crow quill, dark-brown externally, internally yellow, rather difficult to pulverize, bitter to the taste; yields to water 25 per cent. of a yellow bitter extract, to alcohol 15 per cent. In pharm. non-officinal; preparations, powder, tincture, and extract. Thalictrum flavum in france is called Poor man's rhubarb. There is another indian species, javanicum.

MONDAN (மொந்தன் - mondan, *Tam.*). From (mottam, tam. bulk); from large fruit. Same as Plantain.

MONDY (మొండి - mondi, *Tel.*). Bare. Suffix in place names, as Yadoormondy, meaning bamboo waste.——*Mondem* (మొండెము - mondemu, Tel.). A salt heap part of which has been sold. Distinguish from Mundem.

MONGOOSE (नकुल - nakula, *San.*; मुंगूस - mungúsa, *Mahr.*; ابن عرس - ibniirs, *Ar.*; راسو - rású, *Pers.*; نیولا - neulá, *Hind.*; منگوس - mungús, *Dec.*; ಮುಂಗುಲಿ - munguli, *Can.*; ಕೀರ - kíra, *Coorg*; ಮುಂಗಿಲಿ - mungili, *Too.*; ముంగిస - mungisa, *Tel.*; ନେଉଳ - nevulo, *Oor.*; കീരി - kiri, *Mal.*; මුගටියා - mugatiyá, *Singh.*; கீரிப்பிள்ளை - kírippillai, *Tam.*). Title from deccany. San. from (na, san. negative particle + kula, san. family). Ar. from (ibn, ar. son + irs, ar. lioness). Hind. from sanscrit. Oor. from sanscrit. Mal. from (kíru, mal. to squeak). Tam. from (kíri, tam. mongoose + pillai, tam. diminutive suffix of birds and animals). Can. also (mungisi). Tel. also (yentawa). Title otherwise Indian ichneumon, Pharoah's cat. Herpestes mungo, viverrinæ, viverridæ, digitigrada, carnivora mammalia [sastanam, 11], of naturalists [jantoo]. Alias Herpestes ferrugineus, frederici, griseus, malaccensis, pallidus; Ichneumon griseus; Mangusta grisea, mungo, nyula; Viverra mungo. Nyula, from hindostany. The mongoose is a well-defined genus of animals, with long vermiform bodies, clad with long, harsh grizzled hair, long muscular tails, thick at the base, and tapering to a fine point; semi-plantigrade feet with five toes, and partially retractile claws; the eyes are small, but glittering and snake like; the tongue rough like a cat's [poonay]. Their extreme agility prevents their being bitten, and the stiff rigid hair, which is excited at such times, and a thick loose skin, are an additional protection. If the poison of a snake [sarpam] is injected into the veins of a mongoose it proves fatal. The cry of the mongoose is a mew. When angry it growls.—"*a*" The species mentioned at head is tawny yellowish gray, the hairs ringed with rufous and yellowish, the general result being an iron gray tinge, with less of the yellow tint than in the next species from Northern india, which it otherwise much resembles in size and form, whilst in the character of its fur it is more like Herpestes nipalensis. The muzzle is concolorous with the body, as is the tail, which is not tipped with black, and is nearly equal in length to the body. Frequently domesticated.—"*b*" Akin is the Long-tailed mongoose or the ruddy mongoose. Herpestes smithii of naturalists. Colors much as in Griseus, but somewhat more yellow in its general tone; tail longer, tipped with maroon and black, and more hairy; feet dark reddish-brown; muzzle not dark, slightly tinged with reddish. Larger than Griseus. Tail nearly equal in length to the head and body. Procured from the Eastern ghauts inland from Nellore, where it inhabits forests among the hills.—"*c*" Also the Brown Neilgherry mongoose. Herpestes fuscus of naturalists. General color brown, the hair being ringed black and yellow, and tawny at the base; throat dusky yellowish; tail nearly equal in length to head and body. Procured on the Neilgherries, probably in other elevated hill regions of Southern india.—"*d*" Lastly the Stripe-necked mongoose. Herpestes vitticollis of naturalists. Of a grizzled gray color more or less tinged with rusty reddish, especially on the hinder part of the body and tail; a dark stripe from the ear to the shoulder; tail rufous black at the tip. Found on the Western ghauts and in Travancore.—"*e*" Indian species of Herpestes not here found are:—Auropunctatus or gold-speckled, Burmanicus, Fulvescens, Pallidus, Urva or crab-eating.—"*f*" There is a Tamul proverb:—நன்றிசெய்த கீரிப்பிள்ளையைக் கொன்றகதைப்போல—"Like the story of killing a mongoose "that had done well"; the story being the same as Llewellyn's dog.——*Mongoose plant* (नाकुली - nákulí, San.). Same as Greater galangal.——*Mongoose snake root* (सर्पाक्षि - sarpákshi, San.; गर्डपातालि - gardapatáli, Conc.; ಪಾತಾಳಗರುಡ - pátálagaruda, Can.; ಪಾತಾಳಗರುಡೆ - pátálagarude, Too.; సర్పాక్షి - sarpákshi, Tel.; അവിൽപുരി - avilpuri, Mal.; දත්කටියා - datkatiyá, Singh.; கீரிப்புரண்டான் - kírippurandán, Tam.). Title because the mongoose has recourse to the plant when bitten by cobra; cf. greater galangal. San. from (sarpa, san. serpent + akshi, san. eye). Conc. from (garuda, san. braminy kite + pátála, san. nether-world). Can. from (pátála, san. low regions + garuda, san. braminy kite). Too. like canarese. Tel. from sanscrit. Mal. means rice bruised and dried. Singh. from (dat, singh. sharp edged + katiya, singh. pittosporum ceylanicum). Tam. from (kiri, tam. mongoose + pural, tam. to roll over). San. also (sarpári), meaning serpent's enemy; (garudaputa), meaning garoodan's shoot; (pátálabhédi), meaning dividing the nether-world. Can. also (garudapátála). Singh. also (ekávériya), meaning rauwolfia serpentina, benth. (nágavalli), meaning serpent creeper, being considered a specific for bite of ribband snake. Tam. also (kírippúndu), meaning mongoose + plant. Title otherwise Indian snake root, Malayan earth gall, Mongoose plant, Pautaula garoodan, Sarpaury, Snake eye. Botanically Ophiorrhiza mungos, linn., rubiaceæ [vricsham, 71], specific from singhalese meaning mongoose. Perennial 1 to ½ foot; stem when old, suffruticose; leaves opposite, elliptic-lanceolate, acuminated at both ends, glabrous, very thin, unequal in size; calyx tube turbinate, limb five-cleft; corolla tube infundibuliform, short, hairy within, limb five-lobed; stamens enclosed; capsule compressed, crowned with the calycine segments, two-celled, two-valved; seeds numerous, somewhat hexagonal; cymes peduncled, terminal, branched; flowers nearly sessile white. The root consists of several hard, woody, contorted branches, about six inches in length, covered with a thin brown bark; the lower portions of the stem are generally collected along with the root. Root intensely bitter, used as a tonic, believed to be a remedy against the bites of venomous snakes, mad dogs, &c.; in pharm.

non-official. Several varieties slightly differ in form of inflorescence. Other common species are:—brunonis, eriantha, grandiflora, harrisiana, roxburghiana.

MONKEY (कपि - kapi, San.). Plant first name, either from fruits being eaten by monkeys [bandar], or from leaves and stalks being covered with hairs like those of the lungoor [q.v.], or from red seeds resembling face of white monkey.——*Monkey fruit* (कपित्थ - kapitt'ha, San.). Monkeys eat it. Same as Wood-apple.——*Monkey-leaf plant* (कीशपर्णी - kíshaparní, San.). Title from hairy leaf. Same as Indian burr.——*Monkey turmeric* (കുരങ്ങുമഞ്ഞൾ - kurannumaññal, Mal.). Same as Monkey country saffron.

MONSOON (वर्षाकाल - varshákála, *San.*; موسم - mausim, *Ar.* and *Pers.*; موسم - mosam, *Hind.* and *Dec.*; موسم - musim, *Malay*; ಮೋಸುಮಾ - mósumá, *Can.*; ಮಾರ್ಯಾಲ - maryála, *Too.*; వర్షాకాలము - varshákálamu, *Tel.*; വർഷം - varsham, *Mal.*; වැසිකල - vasikala, *Singh.*; மழைகாலம் - mazhaigálam, *Tam.*). Title from arabic through portuguese. San. from (varsha, san. rain + kála, san. time). Ar. from (vasama, ar. sign). Mal. from (vrish, san. to shower). Tam. from (mazhai, tam. rain + kálam, tam. time). Malay also (kutika); (kátika). Can. also (malekála), meaning rainy season. Tam. also (márigálam), meaning rainy season [maury]. Nothing can be added to what is said at vol. II, 5. Monsoons are not understood by Dravidians whose observation is too local. See Caulam, Caur, Mausam, Mazhay and Caurtey for their views on rainfall [land wind, longshore wind, sea breeze].

MOO (மு - mú, *Tam.*). Forward, prominent, old.——*Macoorty* (ಮುಕುರ್ತಿ - múkurtí, Can.). From (múgu, can. nose + aru, can. to cut + ti, can. feminine suffix); from a badaga tradition that a woman whose nose was cut off transformed herself into the mountain. Mountain; Neilgherry dist., Todanaud division; lat. 11° 22′ 05″; long. 76° 33′ 37″; height 8,330 feet; from Ootacamund W.S.W. 12 miles. One of highest peaks of Neilgherries; at junction of latter with Western ghauts [q.v.], about 10 miles behind Culcoodiyore. Commands a good view. Pycarrah river rises here. The ascent is by a zigzag path cut on E. face. Its western is an almost unbroken wall-like precipice, several thousand feet in depth. There was formerly a Todah [q.v.] boa [q.v.]; now in ruins. The spirits of men and buffaloes [khoolgah] are supposed by the Todahs to take a leap together into the next world from this peak.——*Minnal* (முன்னல் - munnal, Tam.). From (mun, tam. antiquity + il, tam. place). Title otherwise Menil. Village, Railway station; North arcot dist., Wallajahpett tal.; pop. 2,652; acres 3,564; lat. 13° 03′; long. 79° 37′; height 351 feet; from Chittore E.S.E. 33 miles; from Wallajahpett E.N.E. 17 miles. Station to which the Madras railway was first projected. Old Vishnoo temple.——*Molay* (മുള - mula, Mal.; முளை - mulai, Tam.). A young plant first springing from the ground. Bamboo [q.v.]. Prefix in place names; as Molancadav, meaning bamboo ford.——*Monagooddaly* (మొనగుద్దలి - monaguddali, Tel.). From (mona, tel. point + guddali, tel. spade). Pickaxe.——*Monapollem* (మొనపాలెము - monapálemu, Tel.). From (mona, tel. end + pálemu, tel. fortified village); as bordering on the sea. Title otherwise Armegam. A hamlet of Poody royadorvoo belonging to Vencatagherry zemindarry; Nellore dist., Goodore tal.; pop. 1,861; lat. 13° 53′; long. 80° 15′; from Goodoor S.E. 29 miles; from Nellore S.S.E. 41 miles. Fishing village on one of the islands of the Poolicat lake. Lighthouse has been erected inside of the Armegam shoal [armegam, blackwood's harbour, doogarauzpatam].——*Monay* (మొన - mona, Tel.; முனை - munai, Tam.). Point. A cape. Principal capes of presidency are:—Cape comorin, most southern point of peninsula; Point calimere, south of Tranquebar and opposite Ceylon. For other headlands, &c., see Coast survey at vol. II, 146.——*Moodbidry* (ಮೂಡಬಿದ್ರಿ - múdabidri, Can.). From (mudu, can. east + bidu, can. vishnu + adri, san. mountain). Sanscrit name (púrvavénupura), meaning east + bamboo + town. A hamlet composed of portions of Prauntya and Pothigay villages; South canara dist., Mangalore tal.; pop. 921; lat. 13° 04′; long. 75° 03′; from Mangalore N.E. 18 miles; from the sea E. 14 miles. Ruined town. Once contained many thousands of inhabitants. Formerly subject to Jeina [q.v.] rajahs of the Chowtara family, whose descendants have still a palace here. Subsequently subject to the rajahs of Ikkairy until these were overthrown by Hyder. Still an important Jeina centre and visited by pilgrims even from Goozerat and other distant places. There are eighteen basties or Jeina temples, and a Mutt [q.v.] occupied by one of the chief gooroos [q.v.] of that sect. The basties illustrate the attempt to copy wooden forms which characterizes all Hindoo stone workings, especially those on the west coast. There are also several tombs of Jeina priests, lofty erections of several storeys, and interesting as being some of the few Hindoo tombs in Southern india. Their forms are quite unlike any other building now known to be standing in India. The rajah's old palace has an insignificant appearance as the roof is made only of thatch, but the stone sculptures inside are of a superior order. There is a handsomely carved wooden roof. The walls are covered with paintings. There is an old bridge near the Jeina basty, illustrating the efforts of Hindoos to bridge a stream while still ignorant of the principal of the arch. On the road to Caurcal, north of Moodbidry, is another ancient Jeina basty [q.v.].——*Moodelliar* (முதலியார் - muthaliyár, Tam.). Honorific form of Moodelly. Used in the Tamul districts of Ceylon, and formerly here also, for a native headman [peyar]. ——*Moodelly* (முதலி - muthali, Tam.). From (muthal, tam. first). The first one. Hindoo third name. Common among Vellaular [q.v.], and Keikkilar [q.v.]; also taken by males of the Devadausy [q.v.] class [peyar]. There is a Tamul proverb:— ஆழாக்கு அரிசி மூழாக்குப்பானை முதலியார் வருகிற சீருப்பைப்பாரும்— "With an olluck [q.v.] of rice in hand "and a pot that will suffice to boil 3 ollucks, look at the ostentation the Moodelliar displays [jauty];" they are considered to have this quality.——*Moodevy* (மூதேவி - múthévi, Tam.). From (mú, tam. old + déví, san. goddess, elder goddess). As poverty often precedes wealth, so Moodevy is poverty personified. The elder sister of Lutchmy [q.v.] and the goddess of unhappiness. She is said in literature to have her habitation with the glutton, the irascible, with liars and other abandoned characters, with those clothed in rags, with vicious women, in a flock of sheep [aud], and in the face of the dead. No special books are written about her, but the poets mention her here and there, and give her various names, viz., Calathy or she who confuses; Indreik moottaul or the elder sister of indray, or lutchmy; Jyeshtay or the elder sister; Kettay or she who ruins; Moogady or poverty; Tavvay or elder sister. She receives no offerings, nor is she worshipped in any pagoda [coil]. The Tamul cooral [q.v.] has the following:—அவ்வித்தழுக்கா றுடையானைச்செய்யவ டௌவையைக்காட்டி விடும்— "Lutchmy envying the prosperity of the envious man will depart "and introduce her sister to him." And again:—மடியுளாள் மாமுகடி யென்ப மடியிலான் றாளுளாடமாமரையினாள்— "They say that the black Moodevy dwells with laziness and that "Lutchmy dwells with the labor of the industrious [matam]." See vol. I (79).——*Moodiyootty* (ಮುದಿಗುಟ್ಟಿ - mudigutti, Can.). From (mudi, can. old + gutti, can. grave). Hill-tribe proper name [peyar].——*Moodroo* (ముదురు - muduru, Tel.). Means mature; hot season. Season and crops under S.W. monsoon. Same as Poonausa [caur].——*Moody* (ಮುದಿ - mudi, Can.). Old.——*Moogady* (முகடி - mugadi, Tam.). Means misfortune. Moodevy. ——*Mookk* (மூக்கு - múkku, Tam.). From (mú, tam. prominent). Nose.——*Mookkala* (ముక్కల - mukkala, Tel.). From (mukka, tel. portion). Locative pl. Suffix in place names; as Donimookkala, meaning boatmen's portions.——*Mookkan* (மூக்கன் - múkkan, Tam.). From (múkku, tam. nose); large-nosed. Pariah proper name [peyar].——*Mookkootty* (മൂക്കുത്തി - múkkutti, Mal.; மூக்குத்தி - múkkutti, Tam.). From (múkku, tam. nose + kuttu, tam. to pierce). Ornament worn on alæ of nose [nagay].——*Moolapett* (మూలపేట - múlapéta, Tel.). From (múla, san. corner + péta, tel. suburb). Tel. also (múlast'hánéshvarapéta), meaning shiva, the lord of the principal sacred place + suburb. Village; lat. 14° 27′; long. 80° 01′; from Nellore W.S.W. ½ mile; from the sea W. 14 miles. Suburb of Nellore. ——*Moolay* (మూల - múla, Tel.; மூலை - múlai, Tam.). Corner. ——*Mooll* (ಮುಳ್ಳು - mullu, Can.; ముల్లు - mullu, Tel.; മുള്ള് - mullu, Mal.; முள் - mul, Tam.). Thorn.—"*a*" Plant first term, often joining two genera. Ex., where transl. is of second term:—Barleria prionitis (mullugórante), lawsonia alba; Berberis aristata (mullukkilá), carissa species; Bombax malabaricum (mullilavu), eriodendron anfractuosum; Bridelia retusa, var. genuina (mulvéngai), pterocarpus marsupium; Erythrina indica (mullumurikku), butea frondosa; Opuntia dillenii (mullukalli), euphorbia. See gloss. paragraphs.—"*b*" Plant second term. Ex., where transl. is of first term:—Acanthus illicifolius (kazhuthaimulli), ass, (kózhimulli), fowl; Barleria cristata (nilasemmulli), black + red, (úthámulli), brown; Barleria cuspidata (vellaimulli), white; Barringtonia speciosa (shemmulli), red; Cæsalpinia mimosoides (tímullu), fire; Dædalacanthus nervosus (nílamulli), blue; Flacourtia sepiaria (kurumulli), small; Hygrophila spinosa (nírmulli), water; Opuntia dillenii (nágamullu), cobra; Pedalium murex (kákkamullu), crow; Polycarpæa corymbosa (páramullu), rock; Zizyphus œnoplia (túrimullu), meaning piercing. See gloss. paragraphs.—"*c*" Fish first term. From spines. Ex., where transl. is of second term:—Ambassis thomasis (mullujubbu), globe; Chirocentrus dorab (mulluválai), wallago attu; Diodon hystrix (mullambiláççai), sea frog, ostracion genus; Urogymnus asperrimus (mullandirukkai), stinging ray or thorn back, trygon genus. See gloss. paragraphs.——*Moonair* (మునేరు - muniyéru, Tel. muniyur *). From (muni, tel. point + éru, tel. river). River; Kistna dist., Nundigauma tal. The largest tributary of Kistna in district. Rises in Nizam's dominions; crosses Hyderabad road at Keesara, 25 miles N.W. by W. of Bezwada, being there called the Keesara; and joins the main stream about 20 miles above the anicut [q.v.] at Bezwada. Fordable except for a few days in the rainy season.——*Moondlapaud* (ముండ్లపాడు - mundlapádu, Tel.). From (mullu, tel. thorn + pádu, tel. village). Sanscrit name (mundéshvara), meaning

shiva, the shaven-headed + lord. Village; Kurnool dist., Cumbum tal.; pop. 3,047; acres 8,159; lat. 15° 20′; long. 78° 57′; from Cumbum S.W. 22 miles; from Kurnool S.E. 66 miles. On the Yenoomoolair. Built by shepherd, Caumana boyanna and held by his family till the downfall of the Vijianugger dynasty [raj] when it was seized by a Naidoo chief of Velgode, the ancestor of the present Vencatagherry rajah [velgode]. In 1659, it passed into the hands of the Golcondab king. A Pataun [q.v.] obtained Talapully, a hamlet, in jagheer [q.v.]. In 1696 Chalchalmala narsimha reddy of Nossam obtained Bramhanapully, Moondlapaud, Vaimlapaud, and two other viliages in jagheer. In 1749 his son Runga reddy built a fort in the fields of Tallapully, calling it Cottacote [q.v.]. Deserted temple to Bheiravan [q.v.]. Temple of Bhawauny shuncarasawmy. Ruined fort. At Tallapully is an old mosque [musjid].——*Moongaur* (ಮುಂಗಾರು - mungáru, Can.). From (munde, can. before + káru, can. crop). Season and crop of S.W. monsoon [caur, poonausa].——*Moonnadiyaur* (முன்னடியார் - munnadiyár, Tam.). From (mun, tam. before + adiyán, tam. slave). Head-servants; the two door-keepers [dwaura paulacan] standing at the entrance of the temple of Ayenaur [ayen].——*Moonnone* (முன்னோன் - munnón, Tam.). Means the first. Vigneshwaran [q.v.], the elder son.——*Mooppan* (மூப்பன் - múppan, Tam.). An elder, the headman of a class or business, especially among agriculturalists.——*Mooppapanam* (മൂപ്പപ്പണം - múppappanam, Mal.). From (múppan, mal. head man + panam, mal. money). A premium made to an owner by tenant.——*Moopp cashivoo* (மூப்புக்கழிவு - múppukkazhivu, Tam.). From (múppu, tam. seniority + kazhivu, tam. exemption). Dues payable to the headman of a village.——*Moopp staunam* (മൂപ്പുസ്ഥാനം - múppust'hánam, Mal.). From (múppu, mal. seniority + st'hána, mal. place). Headship.——*Moosaliyaur* (മുസലിയാർ - musaliyár, Mal.). From (mutaliyár, mal. headman). Moplah [q.v.] title.——*Moosiry* (மூசிரி - musiry, Tam.). See sep. title.——*Moossad* (മൂസ്സത് - mússatu, Mal.). See sep. title.——*Mootchy* (മൂച്ചി - múçççi, Mal.). From (múkka, mal. to grow). An old mango [q.v.] tree.——*Moothal* (മുതൽ - mutal, Mal.; முதல் - muthal, Tam.). Means first [moodelly]; hence capital, property.——*Moothalady* (முதலடி - muthaladi, Tam.). From (muthal, tam. first + adi, tam. to thresh). First crop.——*Moothalaulan* (മുതലാളൻ - mutalálan, Mal.). From (mutal, mal. property + álu, mal. to own). The native term for Jenmy [q.v.].——*Moothalavacausham* (മുതലവകാശം - mutalavakásham, Mal.). From (mutal, mal. property + avakásha, san. right). Right to property.——*Moothal cadan* (முதற்கடன் - muthargadan, Tam.). From (muthal, tam. capital + kadan, tam. debt); loan of capital. Advance of money to ryots [q.v.] for bullocks and seed to enable them to cultivate [tuccauvy].——*Moothal maday* (முதல்மடை - muthalmadai, Tam.). A field first watered from a tank [q.v.].——*Moothal palisha* (മുതൽപലിശ - mutalpalisha, Mal.). From (mutal, mal. property + palisha, mal. interest). Principal and interest.——*Moothal sambandham* (മുതൽസംബന്ധം - mutalsambandham, Mal.). From (mutal, mal. property + sambandha, san. relationship). Community of property. On the West coast those who are members of the same family are said to be connected by Moothal sambandham, whilst those who were once of the same family and have separated from one another are said to be connected by Poolasambandham [q.v.] or community of pollution. In questions of inheritance [dauyam], on failure of the former class who are termed Anandraven [q.v.], the latter inherit and are termed Attaladakkam heirs [maryauday].——*Moothoo* (முது - muthu, Tam.). Ancient.——*Moothoocoolatore* (முதுக்குளத்தூர் - muthukkulattúr, Tam. mutukulatur *). From (muthu, tam. old + kalam, tam. tank + úr, tam. village).—"*a*" Deputy tahsildarry, Ramnaud zemindarry, Madura district. Pay Rs. 70. Sub-registrar's office.—"*b*" Village; Madura dist., Ramnaud zemindarry; pop. 3,172; lat. 9° 20′; long. 78° 34′; from Dindigul S.S.E. 79 miles; from Kodaykarnal S.E. 93 miles; from Madras S.S.W. 282 miles; from Madura S.S.E. 48 miles; from Rameshwaram W. 56 miles; from Ramnaud W. 22 miles. Head-quarters of a Zameen [q.v.] talook [q.v.] of the same name. Weekly market on Thursday.——*Moothoomullay* (മുതുമല - mutumala, Mal.). From (mutu, mal. old + mala, mal. mountain). Tract of country. Forest; Neilgherry dist., Wynaud S.E. division; square miles 73; lat. between 11° 32′ and 11° 42′; long. 76° 29′ and 76° 40′; from Goodalore N. 8 miles; from Ootacamund N.W. 19 miles. On the Goodalore-Mysore road. Consists principally of teak [q.v.], vengay [q.v.] and bamboo [q.v.]. In the forests is a deserted temple in good preservation.——*Moothooray* (முதுரை - múthurai, Tam.). From (múthu, tam. old + urai, tam. speech). One of Avvay's [q.v.] five aphoristic works taught in schools [auttisoody, calvy oloocam, condray vendan, nalvazhy].——*Moottad* (മൂത്തതു - múttatu, obl.; മൂത്തവൻ - múttavan, pers. sing.; മൂത്തവർ - múttavar, pers. pl., Mal.). From (mútta, mal. old). Caste-title. Class of ambalavausies [q.v.]; cf. Moossads, who are however bramins.——*Moottan* (முத்தன் - muttan, Tam.). Pariah proper name [peyar].——*Moottaul* (மூத்தாள் - múttál, Tam.). Means the elder. Moodevy.——*Mooyiricode* (മുയിരിക്കോട്ട - muyirikkótta, Mal.). From (mutiru, mal. to grow old + kótta, mal. fort). Greek μούζιρις. Old name of Krishnamcottah opposite to Cranganore [q.v.].

MOO (ಮೂ - mu, *Tel.*; மு - mu, *Tam.*). Three.——*Mooatpoya* (മൂവാറ്റുപുഴ - muváttupuzha, Mal.). From (mú, mal. three + áru, mal. river + puzha, mal. river); literally river formed of three rivers.—"*a*" Talook, Travancore state, Cottayam division. Population 95,460. Sub-divided into eight praverties [q.v.] and containing 162 caras [q.v.] or villages. Greatest length N. to S. is 30 miles, and greatest breadth E. to W. is 18 miles. Bounded N. by Aulangaud talook, E. by Todoopoya and Meenachel talooks, S. by Yaittmanore talook and W. by Coonnatnaud and the Cochin territory. Hilly. Areca nut [q.v.] is principal produce and is exported. Mooatpoya river irrigates.—"*b*" Town; Travancore state, Cottayam division, Mooatpoya tal.; pop. 11,874; lat. 9° 59′; long. 76° 37′; from Cottayam N. 27 miles; from Madras S.W. 330 miles; from Nagarcoil N.N.W. 134 miles; from Paravore E.S.E. 27 miles; from Quilon N. 73 miles; from Trivandrum N.N.W. 105 miles; from the sea E. 23 miles. Agreeably situated at junction of two rivers, and in neighbourhood of a third. Small town inhabited by Christians and Lubbays [q.v.].—"*c*" River; Travancore state, Cottayam division, Todoopoya, Mooatpoya, and Wycome talooks. The three branches rise in the mountainous tract stretching eastward of the village of the same name, uniting immediately in its vicinity. These streams pass through a wild country, but their joint flood proceeds over a sandy bottom and between banks which gradually diminish as river approaches the town of Wuddiyaur, where its water separating into a variety of channels [q.v.] are discharged into Vembanaud lake 28 miles below Mooatpoya. The river runs a course north-west generally of sixty-two miles, forty-three of which are navigable during the rains. Boats ascending to Codamungalam and Todwully at this period float a greater distance.——*Mooccanty* (ಮುಕ್ಕಂಟಿ - mukkanti, Tel.). From (múdu, tel. three + kannu, tel. eye). An epithet of Shiva [q.v.]. See vol. I (129); II, 112. Mookkanteshwaran is the same.——*Mooccoty yecaudashy* (ಮುಕ್ಕೋಟ್ಯೇಕಾದಶಿ - mukkótékádashi, Tel.). Means three crores + eleventh lunar day; from tradition that all the gods [deva] visit the place on the occasion. Otherwise Swarga dwaura yecaudashy, Swarga vausal yecaudashy, Veicoonta yecaudashy. Lunar [chaundramaunam] festival [pundigay, 3e], subject to intercalation [adhicam]. The eleventh tity [q.v.] of the waxing moon [shooclapacsham], of ninth lunar month Margashiram [mausam] between 26th November and 25th December. A general fast observed in honor of Vishnoo [q.v.], and kept all day and night; no one should indulge in sleep during the whole of the tity. The day of the great festival of the Vishnoo pagoda [q.v.] at Shreerungam [cottye ootsavam, maryauday]. See vol. I (92).——*Mooccunnan* (முக்கண்ணன் - mukkannan, Tam.). Three-eyed. Epithet of Shiva.——*Mooccunny* (முக்கண்ணி - mukkanni, Tam.). Bhadra cauly; the three-eyed goddess. Also cocoanut, the three-eyed fruit.——*Moocooppey* (ಮುಕುಪ್ಪೆ - múkuppe, Can.). From (above + kuppe, can. heap). Mode of cultivation by which crop is divided into three parts, one for rent, one for labor, third for seed and implements.——*Moommay* (மும்மை - mummai, Tam.). From (above + mai, tam. suffix of condition). The three different states of existence, viz.:—Oommay the former birth, Immay the present birth, and Ammay futurity [tritwam].——*Moommoorty* (மும்மூர்த்தி - mummúrtti, Tam.). From (above + múrtti, san. body). The Hindoo triad [trimoorty]. See vol. I (74).——*Moonanaud* (മൂന്നാനാട് - múnnanátu, Mal.). From (múnnu, mal. third + nádu, mal. country); country of third chief. Amshom; Neilgherry dist., Wynaud S.E. division; pop. 1,243; acres 38,784; lat. between 11° 28′ and 11° 39′; long. between 76° 19′ and 76° 30′; from Goodalore N.W. 6 miles; from Ootacamund W. 20 miles. Prior to consolidation of Keralam [q.v.] into one empire under Cherma permaul [q.v.], divisions were held by chieftains. Moopnaud was country of First chief; Moonanaud tract held by Third chief. This amshom [q.v.] consists of the three deshoms [q.v.] of Moonanaud, Nelacottah, and Nelliyaulam. The temple of Ponnairy is of great repute. Its present trustee is the Vandoor numboodripaud. The Phœnix, Glenrock, and Consolidated are gold mines.——*Moonneer* (முந்நீர் - munnír, Tam.). From (above + nír, tam. water). Three kinds of water [neer], viz., spring, rain, and river.——*Mooppararah* (മൂപ്പറ - múppara, Mal.). From (above + para, mal. a measure). Three measures, that is to say three in ten. Assessment of three-tenths of the average of full tax on paddy [q.v.] lands.——*Mooppath* (முப்பது - muppathu, Tam.). From (above + pattu, tam. ten). Three tens or thirty. Title of numerous poems.——*Mooppow* (ಮುಪ್ಪಾವು - muppávu, Tel.). From (above + pávu, tel. a quarter). Three-quarters of any coin.——*Mootchundy moopan* (முச்சந்திமூப்பன் - muççandimúppan, Tam.). From (above + shandi, tam. meeting + múppan, tam. president). The president of the three periods of the day. One of the Tamulian devils [pey].

MOOABAUDAL (जलशोषणी - jalashóshaní, *San.*; اسفنج - isfanj, *Ar.*; ابر مرده - abrimurdah, *Pers.*; مبادل - muábádal, *Hind.*; ಸಮುದ್ರದಪಾಚಿ - samudradapáchi, *Can.*; సముద్రపుపాచి - samudrapupáchi, *Tel.*; നീരൊപ്പി - níroppi, *Mal.*; கடற்காளான் - kadargálán, *Tam.*). Title from hindostany. San. from (jala, san. water + shush, san. to dry). Pers. from (abr, pers. cloud + murdah, pers. dead). Hind. from (muá, hind. lifeless + bádal, hind. cloud). Can. from (samudra, can. sea + páchi, can. moss). Tel. ditto. Mal. from (nír, mal. water + oppu, mal. wipe). Tam. from (kadal, tam. sea + kálán, tam. fungus). Ar. also (sahábulbahr), meaning sea-cloud. Pers. also (abrikuhan), meaning old cloud. Sponge. A skeleton of cells and pores, secreted by numerous associated gelatinous animalcules. The animal matter is removed by soaking in salt water. This leaves the skeleton. Found by divers attached to bottom of rocks. When properly prepared, very porous, light, soft and brownish yellow.

MOOAZZAZ (معزز - muzzaz, *Ar.*). From (azzu, ar. to strengthen). Honored. Part of lacab; as Mooazzaz ood dowlah, honor of the empire [ism].

MOOAZZIN (موذن - muazzin, *Hind.*). From (izn, ar. permission). The herald of the mosque [musjid] who calls persons to prayers [azaun, namauz].

MOOBAUDALAH (مبادله - mubádalah, *Hind.*). From (badl, ar. exchange) [budl]. Sums lent and paid on running accounts without the use of receipts.

MOOBAURAK (مبارک - mubárak, *Ar.*). Propitious. Prefixed to an alam forms a lacab; as Moobaurak ally, blessed of ally [ism].

MOOCARRAM (مکرم - mukarram, *Ar.*). From (karuma, ar. to respect). Venerable; respected. Prefixed to an alam forms a lacab; as Moocarram jung, venerable in war [ism].

MOOCH (मुच् - much, *San.*). To liberate.——*Mocha* (मोच - mócha, San.). From (much, san. to liberate). Same as Red-cotton tree. Ch is soft; distinguish from Arabian town, where ch is hard.——*Mocharas* (मोचरस - mócharasa, San.; موچرس - mocharas, Hind.; ಬೂರಗದಅಂಟು - búragadaantu, Can.; బూరగబంక - búragabanka, Tel.; പൂളപ്പശ - púlappasha, Mal.; ඉඹුල්ඇටු - imbullátu, Singh.; இலவம்பிசின் - ilavambisin, Tam.). Ch is soft. Title from hindostany. San. from (mócha, san. the tree, bombax malabaricum, dec. + rasa, san. juice). Hind. from sanscrit. Can. from (búraga, can. bombax malabaricum, dec. + antu, can. gum). Tel. from (búraga, tel. bombax malabaricum, dec. + banka, tel. gum). Mal. from (púla, san. the tree, bombax malabaricum, dec. + pasha, mal. gum). Singh. from (imbul, singh. silk-cotton tree + látu, singh. gum). Tam. from (ilavu, tam. silk-cotton tree + pisin, tam. gum). The gum of Bombax malabaricum, dec. [red-cotton tree]. Also stands for that of Moringa pterygosperma, gærtn. [moringa]. Both occur in very irregular nodular, smooth, and shell-like pieces, opaque and dark-brown in color; the moringa mocharas is very hard and broken with difficulty, and the red-cotton mocharas is brittle and easily broken and less astringent in taste. The latter is the inferior of the two.——*Mochcoondam* (मुचकुन्द - muchukunda, San.). From (much, san. to abandon + kunda, san. jasminum pubescens, willd.); from white fragrant flowers excelling jasmine. Botanically the Pterospermum genus, sterculiaceæ [vricsham, 26]. Trees or shrubs; leaves alternate, entire or toothed, and usually very oblique; flowers usually large, white and fragrant; capsule woody containing many winged seeds; wood reddish, moderately hard. The species best known to the natives here are:—acerifolium [kaniyaur], suberifolium [velanga]. Some species in Moluccas give Amboyna wood, Kyaboca wood, or Lingo wood.——*Mocsham* (मोक्ष - móksha, San.). From (much, san. to set free). Emancipation. Especially of the soul, and its exemption from further transmigration [samsauram]. Mocsha dharmam is rules for attaining final emancipation.——*Mooc* (मुकु - muku, San.). Liberation.——*Moocoondan* (मुकुन्द - mukunda, San.). From (muku, san. liberation + dá, san. to give). Vishnoo [q.v.].——*Moocoondapooram* (മുകുന്ദപുരം - mukundapuram, Mal.). From (mukunda, san. vishnu, the giver of absolution + pura, san. town).—"*a*" Talook, Cochin state; area 418¼ square miles; pop. 115,212. Divided into Arippaulam, Codacherry, Coratty, Maupraunam, Moocoondapooram, Patinettarayaulam, Paulatingal, Poothoocaud and Taulacaud divisions. Principal places:—Adoor, Annamanada, Caroopadanna, Chaulacoody, Codacherry, Coondoor, Coratty, Irinyaulacode, Keeyoor, Maupraunam, Poothoocaud, Rappaul, and Tirvanjicoolam.—"*b*" Village; Cochin state, Moocoondapooram talook.——*Moocty* (मुक्ति - mukti, San.). From (much, san. to deliver). Final beatitude, exemption from further transmigration, re-absorption of the emancipated spirit [autmam], into its great primary source, identification with God. Moocty is of two kinds, partial and complete deliverance. There are three impediments to Moocty, viz., ignorance, doubt, and perversion [matam, samsauram].——*Moty* (موتی - motí, Hind.). See sep. title.

MOOCHEE (موچی - mochí, *Hind.*). One who works in leather [chamrah], either as shoemaker, book-binder or saddler. Also employed in painting [rangh], gilding, and upholsterer's work, &c. One who serves out paper, quills, &c., in a public office; the duftery of N. india.——*Moochee wood* (ముచ్చికర్ర - muççikarra, Tel.). Product of Erythrina [coral tree] indica, lam., leguminosæ [vricsham, 48]. Among timber trees the following also are found with soft light wood, but they are not specifically called moochee-wood:—Bombax malabaricum [red-cotton tree]; Eriodendron anfractuosum [silk cotton]; Euphorbia tirucalli [round milk-hedge]; Givotia rottleriformis [white tanakk]; Hymenodictyon excelsum [wild anaur]; Sesbania ægyptiaca [common sesban]; Sterculia urens [false kateerah].

MOOCHILKA (مچلکا - muchalkah, *Hind.*). From turkish. An agreement in writing. Generally the counterpart of a lease executed by the tenant to the landlord. See vol. I, 112.

MOOCTIAR (مختار - mukhtár, *Hind.*). From (khára, ar. to choose). Principal, independent. An attorney; not allowed in general to plead, which is the function of the vakeel [q.v.]. Mooctiar nauma is a power-of-attorney [iktiarnauma]. Part of lacab; as Mooctiar oon nissa, chief of ladies; Mooctiar ool moolk, absolute lord of the kingdom [ism].

MOOCWA (ಮುಕ್ಕವ - mukkava, *Can.*; മുക്കുവർ - mukkuvar, *Mal.*). From (muzhugu, tam. to dive); as diving for pearls. Fishermen in Canara and Malabar, said to be immigrants from Ceylon, and are probably allied to the Ilavar [q.v.]. The corresponding terms are:—Tam. shembadava, Tel. besta. Their proper business is that of fishermen, or palankeen-bearers [boy] for persons of low birth or of no caste; but they serve also as boatmen. In some places they cultivate the cocoanut [q.v.]. In the southern parts of the coast most of them have become Mahomedans, but continue to follow their usual occupations. These are held in contempt by those of the north. They have hereditary chiefs called Aryan [q.v.], who settle disputes, and, with the assistance of a council, punish by fine or excommunication those who transgress the rules of the caste. Some of the Moocwas marry, which ceremony consists in a feast without any religious rite. In this case, the marriage can only be dissolved on account of the woman's infidelity. They have another kind of marriage called Parastry, in which the man and woman may separate whenever they please; the children always go along with their mother. The Moocwas can eat all kinds of animal food, except beef and may lawfully drink intoxicating liquors. They have no gooroo [q.v.], nor poorohit [q.v.]. The deity of the caste is the goddess Bhadra cauly [q.v.], who is represented by a log of wood, which is placed in a hut that is called a temple. Four times a year the Moocwas assemble, sacrifice a cock, and make offerings of fruit to the log. One of the caste acts as poojarry [q.v.], but his office is not hereditary. They are not allowed to enter any of the temples of the great gods, worshipped by the Bramins [q.v.], but they sometimes stand at a distance and send their offerings by more pure hands. They know nothing of a state of future existence, but believe in pishauch, or evil spirits, who inflict diseases and occasion other evils. A class of men called Caniyaun are employed to drive away pishauch [q.v.]. They bury the dead [janty, shavacaud]. Among these and among the corresponding class of Paravar [q.v.] on the East coast, Xavier's most noted labors in India occurred. See vol. I (16), (68); II, 100.

MOODA (മൂട - múta, *Mal.*). From (mútu, mal. to cover).—"*a*" A fastening package. Especially the packages in a circular form, like a Dutch cheese, fastened with wisps of straw, in which rice is made up in Malabar and Canara.—"*b*" A measure of capacity. 2½ parrahs = 1 mooda [alavay, 3c]. Approximate actual value, 1 mooda = 1 cubic foot and 1,116 cubic inches. In South canara, it is equal to 3 kulsies. Same as Robin. See vol. I, 609; II, 508.——*Moody* (ಮುಡಿ - mudi, Can.). From (mútu, mal. to cover). See vol. I, 609; II, 508.—"*a*" Measure of capacity. 3 kulsies = 1 moody; 42 moodies = 1 corjy [alavay, 3c]. Approximate actual value, 1 moody = 2,940 cubic inches. South canara. Varies. A moody of grain weighs about one Indian maund. Same as Robin. Compare Toom of Kistna, and Calam of Tanjore.—"*b*" Superficial measure [alavay, 2c]. Land requiring a moody of seed. Standard measure of S. canara. In measuring land a moody is taken at 60 pucka seers. The extent for wet land about an acre. Compare Cawny. See vol. I, 609; II, 508.

MOODAUM (مدام - mudám, *Hind.*). Constant. Moodaum sibbundy is a fixed establishment. In the eastern districts they are a kind of extra peon [q.v.] placed in villages for general service.

MOODAY (முடை - mudai, *Tam.*). To plait.——*Moodasal* (முடசல் - mudasal, Tam.). From (mudai, tam. to plait). A screen formed with bamboos [q.v.] and cocoanut [q.v.] or palmyra [q.v.] leaves for protection of banks of rivers from action of stream.——*Moodipp* (ముడుపు - mudupu, Tel.; முடிப்பு - mudippu, Tam.). A tie; money wrapt in a cloth and tied up. Moodippcauran is a person who makes or holds the purse, collector of revenue in primitive village arrangements [tandalgar].——*Moody* (முடி - mudi, Tam.). A knot, especially

bundle of young rice tied in small bundles for transplanting [nautt moody, paddy].

MOODRAY (मुद्रा - mudrá, *San.*; முத்திரை - muttirai, *Tam.*). From (mud, san. to unite). Intertwining of the fingers practised in religious worship and symbolical. Also a seal.——(1) *Moodracurta* (முத்திரைக்கர்த்தா - muttiraikkarttá, Tam.). From (above + kartá, san. doer). Bramin sheivites are under the religious supervision of high priests [acharry]. These religious heads make their pastoral visitation according to their convenience once in five, ten or fifteen years. But they have deputies or Moodracurtas, generally one for each talook, to look after the people and report from time to time any irregularity on their part in the observance of religious rites or caste rules. These Moodracurtas, who are always of the same persuasion as the high priest, are not paid any fixed salaries. They rent the privileges and perquisites of the high priest for a fixed number of years. At the close of the period they are either reappointed or superseded by others at the discretion of the high priest. Sometimes the appointment of Moodracurta is hereditary. The religious or moral offences of which the high priest or his agents take cognizance are the following :—Disobedience to shreemookhams or orders of the priest; Disregard of the local sabhay or assembly of bramins; Co-habitation with a shoodra woman; Drunkenness; Non-observance of annual ceremony to the deceased; Bramin widows of more than twenty years of age not shaving their heads; Omission to perform the ceremonies prescribed in the case of a somayaujee's death; Eating flesh; Illicit intercourse by a widow or a married woman; Other minor offences. The penalties imposed for any of these offences are fine and excommunication from caste. Besides Shrotriems [q.v.] and minor Inams [q.v.] in various parts of the country possessed by the priest, he is entitled by custom to receive the following fees and perquisites :—Varshaushanam or annual tax, payable by a bramin according to a list originally prepared, from 4 annas upwards; House-tax at 4 annas, payable by the comaties and merchants; a marriage fee, payable by bramins and comaties, the fee varying according to the circumstances of the family; Agrapoojay paid in acknowledgment of priest's title for precedence; Yeda paid by comaties on the occasion of funeral ceremonies, consisting of money, rice and sundries; Badimauda or schoolmaster's fee at two rupees paid by pyall masters in expiation of the sin committed by them by selling learning, almost obsolete. Besides these, the priest receives large sums on his pastoral visitation [matam]. Cf. Jiyyangar.——*Moodrah dhauranam* (मुद्राधारणा - mudrádháraná, San.). From (above + dhri, san. to bear). Bearing an indelible mark on some part of the body made with a hot iron, representing the insignia of a deity, as the shell of Vishnoo [q.v.], as a sectarial indication. ——*Moodray munn* (முத்திரைமண் - muttiraiman, Tam.). From (above + man, tam. mud). The earth seal affixed to a grainheap, and stamped with some mark.——*Moodray palagay* (முத்திரைப்பலகை - muttiraippalagai, Tam.). From (above + p'halaka, san. board). A wooden stamp for sealing a heap of corn.——*Moodrola* (മുദ്രോല - mudróla, Mal.). From (above + óla, mal. cadjan). Stamped cadjan [q.v.].——*Mothiram* (மோதிரம் - móthiram, Tam.). From (mudrá, san. stamp). Finger-ring.——(2) *Matsya moodray* (మత్స్యముద్ర - matsyamudra, Tel.). From (matsya, san. fish). Hindoo gold coin struck by Paundy kings.——*Nauga moodray* (ನಾಗಮುದ್ರೆ - nágamudre, Can.). From (nága, san. snake). Hindoo gold coin struck by Moraury row; also known as Moraury row hana.——*Padava moodray* (పడవముద్ర - padavamudra, Tel.). From (padava, tel. ship). Old Hindoo copper coin [naunyam].

MOOFTY (مفتی - muftí, *Hind.*). From (fatá, ar. to decide). Pronounced Mufty by Anglo-indians. In former times the officer who assisted the Cauzy [q.v.] or judge, and supplied him with decisions on legal points. The word is commonly used also to denote the civilian dress worn by a military or naval officer when off duty.

MOOHAUJIR (مهاجر - muhájir, *Hind.*). From (hijr, ar. separation). A class of Mahomedan sheikhs, descendants of the exiles and refugees who accompanied the prophet [mahomed] in his flight from Mecca to Medina.

MOOHOO (मुहु - muhu, *San.*). In a moment.——*Moohoorta caul* (முகூர்த்தக்கால் - mugúrttakkál, Tam.). From (muhúrta, san. auspicious moment + kál, tam. pillar). The first pillar put to a marriage pandaul. It is ornamented with alternate stripes of white and red, either in paper or in choonam [q.v.] and red ochre [cauvy]. To the top is tied a bunch of mango [q.v.] leaves. The pillar is fixed in an auspicious moment, decided on by the poorohit [q.v.].——*Moohoortam* (मुहूर्त - muhúrta, San.). From (muhus, san. often). Measure of solar time. 30 calays = 1 moohoortam; 30 moohoortams = 1 dinam or day [caulam, 2]. Approximate actual value, 1 moohoortam = 48 English minutes. Same as San. cshanam. Moohoortam is also taken as equal to 3¾ ghaticams or 1⅕ English hours. Distinguish from Moortam [caulam, 3]. See vol. I, 609.

MOOJAUHID (مجاهد - mujáhid, *Ar.*). From (jahada, ar. to strive after truth). Persevering in religious cause. Part of lacab; as Moojauhid ood deen, the hero of faith [ism].

MOOJAUWIR (مجاور - mujávir, *Hind.*). From (javar, ar. near). An attendant at a Mahomedan shrine [durgah], hermitage, or other consecrated spot [goombaz].

MOOJEEB (مجیب - mujíb, *Hind.*). From (vajaba, ar. to approve). Acceptor of supplications. Attribute of God [allah] part of common alam; as Abdool moojeeb [ism].

MOOJTABAH (مجتبی - mujtabá, *Hind.*). From (jába, ar. to choose). Approved. Lacab of the prophet. Common alam; as Moojtabah hoossain, double alam [ism].

MOOJTAHID (مجتهد - mujtahid, *Hind.*). From (jihada, ar. to strive after truth). Doctor of law, whose exposition of doctrines is accepted and followed by the orthodox moslems [soonnee] without the exercise of private judgment [takleed].

MOOKHADIRAUT (مخدرات - mukhaddirát, *Hind.*). From (khadira, ar. to become languid). Narcotics; substances which are either anodyne in their action or sodorific. For intoxicants see Mooskiraut. The following are two key-lists of the principal narcotic substances used by the natives of s. india; further information must be traced in the glossary paragraphs through the small type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Aconitum ferox, indian aconite, root; Anamirta cocculus, indian berry, berry; Cannabis sativa, indian hemp, whole plant, except large stem; Cerbera odollam, odallam, nut; Cinnamomum camphora, camphor cinnamon, camphor; Datura fastuosa, purple datura, seed; Hydnocarpus venenata, fish poison tree, seeds; Nicotiana tabacum, tobacco, leaf; Papaver somniferum, opium; Solanum melongena, brinjaul, leaf; Solanum nigrum, indian hound's berry, leaf; Strychnos nux-vomica, poison nut, seed; Withania somnifera, asgand, root.—"*b*" Aconite, aconitum; Asgand, withania; Brinjaul, solanum; Camphor, cinnamomum; Fish poison, hydnocarpus; Hemp, cannabis; Hound's berry, solanum; Indian berry, anamirta; Odallam, cerbera; Opium, papaver; Poison nut, strychnos; Tobacco, nicotiana.

MOOKHAM (मुख - mukha, *San.*). Face.——*Mookhyam* (मुख्य - mukhya, San.). From (mukha, san. face). Front, chief [mookhya mausam].——*Mookhyastan* (മുഖ്യസ്ഥൻ - mukhya-st'han, Mal.). From (mukhya, san. chief + st'ha, san. stand). A modern term, introduced since Hyder's invasion of Malabar, meaning Tarwaudcaurar. See vol. I, 117.

MOOKHAUTIB (مخاطب - mukhátib, *Hind.*). From (khataba, ar. to converse with) [khitaub]. In person.

MOOLAINAGHERRY (ಮುಳ್ಳಿನಗಿರಿ - mulainagiri, *Can.*; mulaingiri, *Mys. Gov.*). From (muluku, can. arrow or arrow-head + giri, san. hill). Mountain. Highest point in the Bababooden range, 6,317 feet, and is the loftiest mountain between the Himalayas and the Neilgherries.

MOOLAM (मूल - múla, *San.*). From (múl, san. to be rooted). Original. Root. Vegetable; organic body destitute of sense and motion, but furnished with pores and vessels, by the help of which it draws nourishment from other bodies; natives consider that it has sense and partial motion.——*Moola dhanam* (मूलधन - múladhana, San.). From (above + dhana, san. property). Capital [moothal].——*Moola lingam* (मूललिङ्ग - múlalinga, San.). From (above + linga, san. emblem of shiva). Chief lingam [q.v.].——*Moola muntram* (मूलमन्त्र - múlamantra, San.). From (above + mantra, san. hymn). The five-lettered incantation [punchauchsharam]. The foundation of all spiritual wisdom and religion, and the means prescribed for obtaining emancipation from births [jenmam] and all the evils thereunto belonging, and union [moocty] with the supreme [muntram, samsauram]. There is however a Tamul proverb :—அரிது அரிது அஞ்செழுத்து உணர்தல்—"It is difficult indeed to comprehend the purport "of the five letters."——*Moola pooroshan* (मूलपुरुष - múlapurusha, San.). From (above + purusha, san. person). Original ancestor.——*Moolapracrity* (मूलप्रकृति - múlaprakriti, San.). From (above + prakriti, san. cause). Germ out of which all apparent forms are evolved. See Pracrity and Poorsham.——*Moola staunam* (मूलस्थान - múlast'hána, San.). From (above + st'hána, san. place). The sanctuary of a temple [coil].——*Moolgueny* (ಮೂಲಗೇಣಿ - múlagéni, Can.). From (above + géni, can. rent). A permanent, unchangeable rent [gueny].——*Moolwurg* (ಮೂಲವರ್ಗ - múlavarga, Can.). Original proprietary right in land [cawnyautchy, milkyat, mirass, sawmyam].

MOOLAM (മുഴം - muzham, *Mal.*; முழம் - muzham, *Tam.*). Cubit measured from the elbow to the tip of the middle finger. Linear measure. 2 jauns = 1 moolam; 4 moolams = 1 bauham [alavay, 1, a.d]. Approximate actual value, 1 moolam = 18 inches. But it is often up to 20 inches. Same as San. hastam, Hind. haut, Can. mola, Tel. moora. See vol. I, 609; II, 505.

MOOLAUM (ملمع - mulamma, *Hind.*). From (lama, ar. to shine). Plating with gold [pon] and silver [velly].

MOOLK (ملك - mulk, *Ar.*). Means empire. Part of lacab, as Nizam ool moolk, regulator of the empire.——*Moolkgeery*

(ملك گیری - mulkgírí, Hind.). From (above + gírí, pers. taking). The periodical incursion of a military force for collection of tribute or revenue.——*Moolky* (ملکی - mulkí, Hind.; ముల్కి - mulki, Tel.; ಮುಲ್ಕಿ - múlki, Can.). Means pertaining to civil administration. Town, consisting of Baupanaud, Cusbah bazaar and a portion of Manampady village, Port; South canara dist., Mangalore tal.; pop. 3,776; lat. 13° 05′; long. 74° 50′; from Bombay S.S.E. 420 miles; from Goorpore N.W. 14 miles; from Madras W. 370 miles; from Mangalore N. 16 miles; from Padbidry S. 4 miles; from the sea E. 1 mile. On an inlet of the sea receiving the Shumbavaty. Opposite the mouth of the inlet is a group of islets known as the Moolky or Premeira rocks [premeira]. Formerly seat of a petty kingship subdued by the Bednore rajah in the beginning of the seventeenth century. Considerable trade in rice [q.v.]. Seat of Basel mission. Here the New testament was translated into Tooloo [q.v.]. A weekly fair is held here every Saturday. There is a Jeina [q.v.] basty [q.v.] besides two Hindoo temples belonging to the Concany and Shivully bramins, respectively. Has a military encamping ground.

MOOMTAUZ (ممتاز - mumtáz, *Ar.*). From (máza, ar. to separate). Select, distinguished. Part of alam, as Moomtauz hoossain, distinguished hoossain, double alam. Also part of lacab, as Moomtauz ool oomrah, the illustrious of nobles [ism].

MOON (चन्द्र - chandra, *San.*). Prefix. Plant first name; from round leaves, or from shining white flowers, or from flowers opening at night.——*Moon creeper* (चांदवेल - chándavéla, Mahr.). Same as Gandhaulee.——*Moon flower* (मन्दवल्ली - mandavallí, San.; गुलचांदणी - gulachándaní, Mahr.; चन्द्रकान्ति - chandrakánti, Conc.; گل چاندنی - gulichándní, Hind. and Dec.; ಚಂದ್ರಕಾಂತಿ - chandrakánti, Can.; పండితివంకాయ - panditivankáya, Tel.; മുണ്ടവള്ളി - mundavalli, Mal.; අලංගා - álangá, Singh.; நாகமுக்கொற்றி - nágamúkkotti, Tam.). Title from flowering after sunset. Mahr. from (gula, mahr. flower + chandra, san. moon). Hind. from (gul, pers. flower + chándní, moon-light); from opening at night. Tel. from (pandili, tel. pandal + vankáya, tel. brinjaul, solanum melongena, linn.). Mal. from (munda, san. branchless + valli, mal. creeper). Tam. from (nága, san. cobra de capello + múkkotti, tam. inula indica); as antidote against snake-bites. Tel. also (nagaramukkatte), by corruption from tamul. Mal. also (mandavalli). Title otherwise Good-night flower, Moon creeper, Pandaul brinjaul. Botanically Ipomœa [calamby] bonanox, linn., convolvulaceæ [vricsham, 93]. Alias Calonyction speciosum; Convolvulus muricatus, roxburghii; Ipomæa grandiflora, longiflora, roxburghii. Herb; stem climbing to a great extent; leaves large, quite smooth, cordate, pointed; peduncles very long, one to five-flowered; flowers very large, pure white, opening at sunset, fading next morning, flowering in rainy season. Contains in its roots resin, fatty matter, volatile oil, albumen, starch, fibre, malic acid, and various salts. Bark of root used as purgative; seeds eaten when young. Ipomæa grandiflora, roxb., is another species. A well-known variety is Ipomæa bonanox, linn., var. grandiflora; large climber with soft thorns on the stems; cordate, ovate, acute, entire smooth leaves; pure white circular flowers 3 to 4 inches in width, opening in the evening and fading next morning; the peduncle is club-shaped and supports a membraneous fruit enclosing four large seeds, white, red, or black in color; as a creeper for trellis work in gardens, has a very striking appearance; dried these capsules and seeds as well as flowers, leaves and root, supposed to have virtues in snake-bites; the seeds are eaten when young.——*Moon leaf* (इन्दुपर्णी - induparní, San.). Title from round white back of leaf. Same as Country lavender.

MOONAGA (మునగ - munaga, *Tel.*). Same as Moringa.——*Moonagavalsa* (మునగవలస - munagavalasa, Tel.). From (munaga, tel. horse-radish tree, moringa pterygosperma, gærtn. + valasa, tel. colony).—"*a*" Zemindarry, Ganjam dist., Chicacole tal.; pop. 4,125; acres 3,054. Peshcush Rs. 3,948.—"*b*" Village; Ganjam dist., Chicacole tal.; pop. 495; acres 3,054; lat. 18° 28′; long. 83° 57′; from Chetterpore S.W. 92 miles; from Chicacole N. 12 miles; from the sea N. 18 miles. Remains of extensive mud fort of Danta vactran, a giant killed by Vishnoo [q.v.]. Old gold and silver coins found.——*Moongaula* (మునగాల - munagála, Tel.). From (munaga, tel. horse radish, moringa pterygosperma, gærtn.).—"*a*" Zemindarry talook, Kistna district.—"*b*" Zemindarry; Kistna dist., Nundigauma tal.; pop. 17,360; sq. miles 100. This family are Reddies [q.v.] and claim centuries of uninterrupted residence at Moongaula, going back to the days when another Reddy family left Hanoomacondah and established themselves at Condaveed. Moongaula lies out in the Nizam's territory in the track of Mahratta and other freebooters, so has been sacked often. Peshcush Rs. 4,527.—"*c*" Village; Kistna dist., Moongaula zemindarry tal.; pop. 1,439; lat. 17° 3′; long. 79° 53′; from Bezwada N.W. 61 miles; from Guntoor N.W. 66 miles; from Madras N. 273 miles; from Masulipatam N.W. 101 miles; from Vinoocondah N. 67 miles. Zemindar's station.

MOONDAM (मुण्ड - munda, *San.*). From (mund, san. to be pure). Skull [capaulam].——*Moonda* (മുണ്ട് - muntu, Mal.). Means anything short. The cloth worn round the waist by natives of both sexes in Malabar.——*Moondagampaula* (മുണ്ടകംപാല - muntakampála, Mal.). From (muntam, mal. dwarf + pála, mal. milky paddy). A Malabar paddy. Carootta moondagampaula is black; Chonna moondagampaula, from (chukanna, mal. red) is red; Velootta moondagampaula is white [paddy].——*Moondagan* (മുണ്ടകൻ - muntakan, Mal.). From (muntam, mal. dwarfish); from absence of tail to ear. A Malabar paddy. Of slow growth, yields best straw. Caroo moondagam is black; Chempan moondagam, from (chempu, mal. copper) is red; Cheroo moondagam is small; Chonna moondagam, from (chukanna, mal. red) is red [paddy].——*Moondamaulay* (मुण्डमाला - mundamálá, San.). From (above + málá, san. garland). A necklace of skulls worn by Shiva [capauly].——*Moondappa* (ಮುಂಡಪ್ಪ - mundappa, Can.). From (above + appa, can. father). Hindoo 2nd or pers. name [peyar].——*Moondavully* (മുണ്ടവള്ളി - mundavalli, Mal.). Means branchless creeper. Same as Tooty coora.——*Moondy* (முண்டி - mundi, Tam.). A bald-headed person. Hill-tribe proper name [peyar]. Also botanically the Sphæranthus genus, compositæ [vricsham, 74]. Low annuals with spreading branches; leaves alternate, toothed, decurrent, oblong or lance-shaped; flower-heads in dense spherical clusters; florets pink; nut oblong, smooth or downy, containing a single seed. The species best known to the natives are:—amaranthoides [fever toolsy], indicus [seed toolsy].——*Mottay* (மொட்டை - mottai, Tam.). Means bald-head. Proper name among the lower caste. Common to both sexes [peyar].

MOONEEB (منیب - muníb, *Hind.*). From (naub, ar. to supply one's place). The principal who sends out his goomastas [q.v.].

MOONEER (منیر - munír, *Ar.*). From (nára, ar. to shine). Lacab of the prophet. Common alam; as Mahomed mooneer, double alam. Also part of lacab; as Mooneer ood dowla, splendour of the empire [ism].

MOONGA (మునగ - munga, *Tel.*). Plant crotalaria [ghantaravam] sessiliflora, linn.——*Moongamore* (మునగమూరు - mungamúru, Tel.). From (above + úru, tel. village). Village; Nellore dist., Cauvaly tal.; pop. 2,110; acres 3,724; lat. 14° 48′; long. 80° 04′; from Cauvaly S.S.E. 8 miles; from Nellore N. 25 miles; from the sea W. 5 miles. Wealthy village. Soil fertile. Good tank. Large trade in grain and cattle. Trig. station in lat. 14° 48′ 46·56″; long. 80° 3′ 39·70″; from Cauvaly S.S.E. 7 miles; from Gavaravaram S.E. 2 miles; from the sea W. 5 miles.

MOONGAH (विद्रुम - vidruma, *San.*; مونگا - múngá, *Hind.*; ಹವಳ - havala, *Can.*; పగడము - pagadamu, *Tel.*; പവിഴം - pavizham, *Mal.*; பவழம் - pavazham, *Tam.*). Title from hindostany. San. from (vi, san. prefix of excellence + druma, san. tree). Tel. and tam. from (pravála, san. sprout). Coral. Corallium of naturalists. The stony skeletons of zoophytes. These live in sea attached to rocks, and grow by process of budding and fissure, whereby a branching organism is produced. Off the south-west coast numerous islands and reefs are formed of the debris of the coral [atoll]. The stem of the zoophyte is divisible into two distinct parts, a central axis, hard and brittle like stone, which is the part used in commerce, and a soft epidermis which easily yields to the nail when it is fresh, but is friable or brittle when dry. Natives have a preference for so-called worm-eaten beads from a belief that gods dwell in the recesses. Veidyans [q.v.] prescribe calcined coral in cases of diabetes and bleeding piles. Coral is made by natives into personal ornaments, knobs, buttons, bracelets, necklace, &c., and worn by people of all classes. Compare:—Abrus precatorius, coral bead; Adenanthera pavonina, coral pea-tree; Erythrina indica, coral tree; Jatropha multifida, coral plant. See gloss. paragraphs. Moongah means also sore-throat in horses [ashwarogam, ghorah].

MOONJ (मुञ्ज - muñja, *San.*; मुंज - munja, *Mahr.*; مونج - múnj, *Hind.* and *Dec.*; ಮುಂಜಿ - munji, *Can.*; ముంజగడ్డి - munjagaddi, *Tel.*; മുഞ്ഞ - muñja, *Mal.*; முஞ்சி - muñji, *Tam.*). Title from deccany. San. from (muj, san. to sound); from sound when wind blows through a plot of the long grass. Mahr., &c., from sanscrit. Hind. also (sarpatá). Tel. also (ponika). Mal. also (mékhalappullu), meaning girdle grass; used in making bramin's girdle. Title otherwise Edible pith, Girdle grass. Botanically Saccharum [sharam] munja, roxb., graminaceæ [vricsham, 156]. Specific name from sanscrit. Kind of reed; culms straight, 8–12 feet, smooth; leaves channelled, long, linear, white-nerved, hispid at the base inside; panicles large, oblong, spreading; ramifications verticilled; flowers hermaphrodite; corolla two-valved. Leaves give fibre [naur].

MOONNAY (अग्निमन्थ - agnimant'ha, *San.*; चाम्हारी - chámhárí, *Mahr.*; هشت بندہ - hashtbandah, *Hind.*; పిన్నతెల్లి - pinnanelli, *Tel.*; മുഞ്ഞ - muñña, *Mal.*; මිඩි - midi, *Singh.*; முன்னை - munnai, *Tam.*). Title from tamul. San. from (agni, san. fire + mant'h, san. to churn); the wood serves to produce fire by

attrition. Hind. from (hasht, pers. eight + band, pers. tie); from nature of root. Tel. from (pinna, tel. small + nelli, tel. premna latifolia, rox.). Mal. from tamul. Tam. from (min, tam. flash) [min]; from shining leaves [indian nettle]. San. also (ganikáriká), meaning attractive as a courtezan; (kaniká), meaning having sparks of fire; (shríparna), meaning having beautiful leaves. Tel. also (gabbunelli), meaning stinking + the tree, premna latifolia, rox.; (karnika). Singh. also (mahamidi), meaning large + the plant. Tam. also (pasumunnai), meaning greenness + the plant. Title otherwise Entire-leaved premna, Indian headache tree. Botanically Premna [jayah] integrifolia, linn., verbenaceæ [vricsham, 102]. Alias Premna hircina, integrifolia, serratifolia, spinosa. A large shrub or small tree, blossoming in the rainy season; trunk short; branches numerous, often procumbent and rooting; bark smooth, dark brown, leaves opposite, petioled, cordate, serrate on the anterior margins, acute pointed, smooth on both sides, from 1–6 inches long and from 1–3 inches broad; flowers in corymbs, terminal or between two branchlets, primary divisions opposite, the last two-forked, flowers minute, numerous, of a pale greenish-white; berries black, the size of a pea [calauyam]; the plant has an agreeable aromatic odour and an acidulous and astringent taste. Root used medicinally in decoction [kwautam] as a cordial and tonic; leaves rubbed along with pepper [q.v.], administered in colds and fevers; whole plant used in form of decoction in rheumatism and neuralgia; root bitter, stomachic, useful in fever; anasarca, urticaria, &c.; soup made of the leaves, occasionally used as a stomachic and carminative; root forms an ingredient of dasha moolam [q.v.] preparation often prescribed by the native physicians in obstinate fevers. Leaves used by natives in soups and curry [q.v.], in spite of odour; also for feeding cattle. Wood white with purple streaks, moderately hard, close-grained; used for fire-wood.——*Buffalo moonnay* (పెద్దనెల్లి - peddanelli, Tel.; ଗଂଧୋନ - gondhona, Oor.; මහමිඩි - mahamidi, Singh.; எருமை முன்னை - erumaimunnai, Tam.). Title from large size. Tel. means large moonnay. Singh. from (maha, singh. large + midi, singh. premna integrifolia, linn.). Tam. from (erumai, tam. buffalo + munnai, tam. premna integrifolia, linn.). Tel. also (nelli) [curry moonnay, tirootauly]; (navuru). Title otherwise Broad-leaved premna. Botanically Premna [jayah] latifolia, roxb., verbenaceæ [vricsham, 102]. Tree; leaves round, cordate, entire, smooth; corymbs axillary and terminal; throat of corolla woolly; flowers dirty yellow; drupe size of a pea [calauyam], erect, wrinkled, four-celled; generally near coast; particulars same as integrifolia [moonnay].——*Conjee moonnay* (கூழ் முன்னை - kúzhmunnai, Tam.). Title from use. Tam. from (kúzh, tam. thick gruel + munnai, tam. premna integrifolia, linn.). Botanically Premna [jayah] cordifolia, roxb., verbenaceæ [vricsham, 102]. Shrubby; branchlets, cymes and petioles of the younger leaves, villous; leaves short-petioled, cordate, or cordate-ovate, acuminate, entire, bullate, glabrous on both sides, shining above, dull and pale beneath; panicles terminal, small, contracted-corymbose; flowers greenish white; flowering in may and june.——*Curry moonnay* (కూరనెల్లి - kúranelli, Tel.). Tel. from (kúra, tel. curry + nelli, tel. premna latifolia, roxb.). Tel. also (nelli). Title otherwise Coora nelly. Botanically Premna [jayah] esculenta, r., verbenaceæ [vricsham, 102]. Shrub; branchlets and cymes thinly mealy-puberulous; leaves very shortly petioled, oblong, acuminate, somewhat narrowed at the base, glabrous, coarsely and sharply toothed above, glaucescent below; cyme terminal, small, contracted; calyx two-lipped, unequally five-toothed; tube of the corolla greenish-yellow.——*Devil moonnay* (பேய்முன்னை - péymúnnai, Tam.). Same as Indian nettle.

MOONSHEE (منشی - munshí, *Hind.*). From (nishá, ar. to educate). A secretary, teacher, interpreter [jawaub navees]. Meer moonshee is chief secretary.——*Moonshee grass* (शर - shara, San.; سینٹھی - senthí, Hind.; ಲೇಖಿನಿಹುಲ್ಲು - lékhinihullu, Can.; గుండ్ర - gundra, Tel.; ശരപ്പുല്ല് - sharappullu, Mal.; எழுத்தாணிநாணல் - ezhuthugiranánal, Tam.). Title from use as pens. San. from (shrí, san. to split in pieces). Hind. from (senth, hind. merchant); as used by them. Can. from (lékhini, can. pen + hullu, can. grass). Tel. from (gundra, san. the plant). Mal. from (shara, san. the plant + pullu, mal. grass). Tam. from (ezhuthu, tam. to write + nánal, tam. reed, saccharum spontaneum, linn.). San. also (gundra), meaning sounding, as when wind blows through it; (téjanaka), meaning resisting. Title otherwise Moonshee-reed, Moonshee's pen, Pen-grass, Pen-reed. Botanically Saccharum [sharam] sara, roxb., graminaceæ [vricsham, 156]. Specific name from sanscrit. Culms perennial, erect, 6–16 feet, smooth, very strong; lower leaves 4–8 feet long, narrow, upper ones shorter, broader, tapering from the base to a fine acumination, concave above, with hispid margin; sheaths 12–18 inches long, with a tuft of hair above their mouths on the inside; panicles dense, open when in flower, condensed when in seed; ramification decompound, the inferior ones alternate, superior ones sub-verticilled, generally with their sharp angles armed with stiff bristles and covered with white silky hairs; flowers paired, one sessile, the other pedicelled; calyx two-valved, clothed with long silky hairs; corolla three-valved, fringed. Root burned near women after delivery and near burns and scalds, its smoke being considered beneficial. Fibre inferior to moonj [q.v.] grass; reeds used for matting, thatching, chairs, &c.; flower tops may be used as a paper material; leaves sometimes made into mats [boriyah], and bundles of the stems used for floating heavy timber on the rivers. Species fuscum also is used for pens.

MOONSIF (منصف - munsif, *Hind.*; మునసబు - munasapu, *Tel.*; முனிசிப்பு - munisíppu, *Tam.*). From (nisf, ar. half). Just. A minor native judge. Certain headmen of villages have been constituted village moonsifs by the British, and given police, magisterial, and civil court powers in a small degree. When there is a monigar [q.v.] or peddacaup [q.v.] in a village in addition to a moonsif, the latter takes precedence [balootah]. The headman of a village is always the moonsif now, where there is a moonsif.

MOONTA (ముంత - munta, *Tel.*). Vessel. See vol. I, 609; II, 508, 516.—"*a*" Measure of capacity. 4 solas = 1 moonta; 16 moontas = 1 toom [alavay, 3b]. Approximate actual value, 1 moonta = 245 cubic inches. In Bellary moonta is 4 seers of 84 tolahs or 294 cubic inches. Same as solga. Compare Cooncham of ganjam and godavery, Mercaul of tanjore, Bullah of salem and coimbatore.—"*b*" Liquid measure [alavay, 4b] = 70 cubic inches. Used in Bellary for toddy [q.v.].

MOONY (मुनि - muni, *San.*). From (man, san. to think) [man]. Any great sage. In Southern india they are reckoned as forty-eight thousand. These are holy persons who by different kinds of austerities have acquired power to bless and curse effectually. They need neither sleep nor rest, eating nor drinking; and yet perform severe penance before god continually. Distinguish from rishy [q.v.] who is rather an ancient patriarch. In common usage moony is used also to denote a demon. In the lower castes it is a name applied to males and females. Also suffix in proper names, as Nauthamoony [peyar].——*Mahamoony* (महामुनि - mahámuni, San.). From (mahá, san. great + muni, san. sage). Thirty-one in number, viz., Agastyan, Atry, Angeerasan, Hiranyan, Roman, Herandan, Calaicottan, Caushyapan, Gowtaman, Shattacoon, Satchidaunandan, Jamadagny, Sanacan, Sanatcomauran, Shoocan, Dadheechy, Doorvausan, Nauradan, Patanjaly, Bharadwaujan, Parausharan, Pudman, Bhrigoo, Pinauky, Poolastyan, Maurcandan, Vasishtan, Vaulmeeky, Vishwaumitran, Vyaughrapaudan, and Vyausan.——*Mooniyammah* (முனியம்மா - muniyammá, Tam.). From (above + ammá, tam. mother). Hindoo female proper name [peyar].——*Mooniyan* (முனியன் - muniyan, Tam.). Pariah proper name [peyar].——*Moonoosawmy* (முனுசாமி - munusámi, Tam.). From (above + svámí, san. lord). Hindoo 2nd or pers. name [peyar].

MOOR (मुर - mur, *San.*). To bind.——*Mooraleedharan* (मुरलीधर - muralídhara, San.). From (murali, san. flute + dhara, san. bearer). Krishnan [q.v.].——*Mooraly* (मुरली - murali, San.). Flute.——*Mooran* (मुर - mura, San.). Asooran, so called.——*Mooraury* (मुरारी - murári, San.). From (mura, san. the asura, so-called + ari, san. enemy). Vishnoo [q.v.].——*Moraury row* (मुरारिराव - murárirávu, Mahr.). Of the Sundoor ghorapadey [q.v.] family and chief of Gooty in 1743. Helped Mahomed ally against Chundah sahib. Joined the English against Hyder. See vol. I (122), 42.——*Mowrya* (मौर्य - maurya, San.). Matronymic, from (murá, san. mother of chandragupta). The name of a dynasty [raj] which began with Chundragooptan, the Sandracottus of the Greeks, about three centuries before Christ, and included Asoca [q.v.], the patron of the Booddhists [booddha]. Their capital was Palibothra, the present Patna [charitram]. See vol. I (132).

MOOR (துலுக்கன் - tulukkan, *Tam.*). Title from portuguese. Properly means a Mauritanian. Formerly used here for Mussalmans.

MOORA (മുറ - mura, *Mal.*). Custom.——*Moray* (முறை - murai, Tam.). Custom [moora].——*Morayneer* (முறைநீர் - murainír, Tam.). From (above + nír, tam. water). Water allowed to flow in turn, for a fixed term, to the fields of each cultivator. Settled by the village headman who gives orders to the neergunty [q.v.]. The matter very rarely requires adjustment by any higher authority, but if so the enquiry is confined to what is customary. In the minor tanks and water-works of the country the village headman regulates the whole water flow beginning with the tank sluice itself; but in the larger works the head sluices and vents are kept in the hands of the government engineering department.——*Moorjapam* (മുറജപം - murajapam, Mal.). From (above + japa, san. prayer). A feast in Travancore celebrated every sixth year in Dhanoo or december and Macaram [mausam] or january. Numboories [q.v.] assemble from all parts of the country and offer prayers for the maharajah [q.v.] and state. Three times a day some hundred of them stand immersed in water and repeat muntrams [q.v.]. Festival lasts for eight weeks during which time they are supplied with food and lodgings at the cost of circar [q.v.] and are then dismissed with liberal presents [daunam]. It is believed to be conducive to defence of kingdom and regular supply of rain [mazhay].

MOORAUD (مراد - murád, *Ar.*). From (arada, ar. to desire). Object of desire. Prefixed to an alam forms a lacab; as Mooraud ally, desire of ally [ism].

MOORDHAN (मूर्द्धन् - múrddhan, *San.*). From (múrv, san. to bind); that which binds all organs of body. Head.——*Moordhanyam* (मूर्द्धन्य - múrddhanya, San.). Cerebral. In all the languages and dialects of India, whether they belong to the Aryan [q.v.] or to the Dravidian [q.v.] families, much use is made of a series of consonants—ṭ ḍ, with their aspirates, and ṇ —pronounced far back in the mouth, with a hard, ringing sound. The following letters are considered cerebral for purposes of Tamul transliteration :—ட ண ள ழ. Similarly in Teloogoo :— ಟ ಡ ಣ ಳ ಱ. Similarly in the other Dravidian languages. See vol. II, 186, 206.

MOOREED (مريد - muríd, *Hind.*). From (arada, ar. to intend). Amongst Mahomedans a disciple, particularly of a moorshid [q.v.] or the head of order of dervishes [peer]. He is initiated by secret signs and words. The mooreeds have their own rules and customs [masheikh].

MOORGANA TALLOW (ಮುರುಗಿನಹುಳಿಬೆಣ್ಣೆ - murginahuli-benne, *Can.*). Means mate mangosteen + butter. Same as Cokum butter [mate mangosteen].

MOORGH (مرغ - murgh, *Hind.*). Cock.——*Moorgha* (मयूरशिखा - mayúrashikhá, San.; मोरशिखा - mórashikhá, Mahr.; تاج خروس - tájikhurús, Pers.; مرغ كيس - murghkes, Hind.; ಶಿಖಾವಳ - shikhávala, Can.; కోడిజుట్టుతోటకూర - kódidzuttutóta-kúra, Tel.; അടക്കമണിയൻ - atakkamaniyan, Mal.; කිරිහෙන්ද - kirihenda, Singh.; பன்னை - pannai, Tam.). Title from hindostany. San. from (mayúra, san. peacock + shikhá, san. crest). Mahr. from sanscrit. Pers. from (táj, ar. crown + khurús, pers. cock). Hind. from (murgh, hind. cock + kes, hind. comb). Tel. from (kódi, tel. cock + dzuttu, tel. crest + tótakúra, tel. amarantus blitum, var. oleraceus, linn., pot-herb). Mal. from (atakka, mal. closed fruit + mani, mal. globule). Singh from (kiri, singh. white + henda, singh. plant.). Tam. from (pan, tam. agricultural land); from place of growth. San. also (dípya), meaning promoting digestion; (shikhálu), meaning peacock's crest; (sahasránghri), meaning thousand rooted; (nilakant'hashikhá), meaning peacock's crest; (mayúra), meaning peacock; (mayúrachúdá), meaning peacock's crest; (lóchamastaka), meaning tears + head; (madhuchhada), meaning sweet cover,; (kékishikhá), meaning peacock's crest; (barhi-chúdá), meaning peacock's crest; (kharáshvá), meaning heat + accumulating; (lóchamarkata), meaning tears + monkey. Hind. also (pilámurghá), meaning yellow cock; (lálmurghá), meaning red cock; (dabkútí), meaning stunted stump; (sarpankhí), meaning head fan; (safedmurghkes), meaning white cockscomb. Can. also (shikhi); (shikhini); (annesoppu), meaning strong leaf. Tel. also (errakódidzuttutótakúra), meaning red + the plant; (gurugu) [indian heliotrope]; (panchechettu). Mal. also (cheri-yaatakkamaniyan), meaning small var.; (veluttaatakkamaniyan), meaning the white var. Tam. also (shávalgondaiççedi), meaning cock + crest + plant; (shévarbannai), meaning cock + pannay plant; (shembannai), meaning red + pannay plant. Title otherwise Cockscomb, Goolkesh, Peacock's crest [morpankhy]. Botanically Celosia cristata, linn., amarantaceæ [vricsham, 106]. Ornamental annual. Five or six varieties :—α bears numerous heads of bloom resembling so many golden sponges; β heads of flowers bright crimson; γ leaves as well as flower-heads bright crimson; δ dwarf variety, sponge-like heads of tawny-orange colored flowers. Leaves and young shoots are used as greens. Other common species are :—argentea, polygonoides, pulchella. ——*Moorghy* (कुक्कुट - kukkuta, San.; دجاج - dajjáj, Ar.; مرغ خانگی - murghikhánagí, Pers.; ككڑی - kukrí, Hind.; مرغی - murghí, Dec.; కోడి - kódi, Tel.; കോഴി - kózhi, Mal.; கோழி - kózhi, Tam.). Title from deccany. San. from the sound. Ar. from (dajja, ar. to walk leisurely). Pers. from (murgh, pers. fowl + khánah, pers. house). Tel. from the sound. Mal. from tamul. Tam. from (kózhai, tam. timidity). Gallus domesticus, Gallinæ [jungle fowl], phasianidæ [jeevanjeevam], rasores [pacshy, 32], of naturalists [jantoo]. House or domestic hen. Feel moorghy, from (píl, pers. elephant) is the Turkey, Meleagris genus, meleagridæ, rasores.——*Moorghbyeza* (مرغ بيضه - murgh-baizah, Hind.). From (murgh, pers. hen + baizah, pers. egg). Windgalls or soft puffy swellings, size of hen's egg on fetlock of horses [ashwarogam, ghorah].

MOOROO (முரு - muru, *Tam.*). Beauty.——*Mooroogan* (முருகன் - murugan, Tam.). From (murugu, tam. beauty or tenderness). Youth. Scandan [q.v.]. Non-bramin proper name [peyar].——*Mooroogappan* (முருகப்பன் - murugappan, Tam.). (murugan, tam. skanda + appan, tam. father, titular affix). Hindoo 2nd or pers. name. Common among non-bramins [peyar]. ——*Moorkinauty* (మురికినాటి - murikináti, obl., Tel.). From (murikinádu, tel. country so called in kistna). A section of Smarta [q.v.] bramins. They profess the White yajoor vedam [q.v.]. Numbers about 1,000 [jauty].——*Moorkkam* (முருக்கம் - murukkam, Tam.). From (murugu, tam. beauty). Same as Common coral tree.——*Mooroogesham* (முருகேசம் - muru-gésam, Tam.). From (murugan, tam. skanda + ísha, san. lord, soobramanyan, the lord). Hindoo 2nd or pers. name. Common among non-bramins [peyar].

MOORSHID (مرشد - murshid, *Hind.*). From (rushd, ar. to be in the right way). A religious teacher [peer]. He initiates disciples, styled mooreed [q.v.], into his sect [masheikh].

MOORTAM (मूर्त - múrta, *San.*). From (murchh, san. to settle into form); real. The practical division of time [caulam, 3]; as opposed to the imaginary division, Amoortam [q.v.]. Distinguish from Moohoortam.——*Moommoorty* (மும்மூர்த்தி - mummúrtti, Tam.). Means three deities. The Hindoo trinity [trimoorty].——*Moortiyappan* (மூர்த்தியப்பன் - múrttiyappan, Tam.). From (múrti, san. deity + appan, tam. father, titular affix). Hindoo 2nd or pers. name [peyar].——*Moorty* (मूर्ति - múrti, San.). From (múrchh, san. to take form). Manifestation, incarnation [avatar]. Greek μορφή. Image, and so deity. Hindoo 2nd or pers. name. Suffix in proper names as Krishna-moorty, Ramamoorty [peyar]. The eight forms of shiva are Ashtamoorty; which includes sun [sooryan], moon [chundran] and soul [autmam] besides the five elements [bhootam].——*Trimoorty* (त्रिमूर्त्ति - trimúrtti, San.). Means three deities. The Hindoo trinity [moommoorty].

MOORTEZAH (مرتضى - murtazá, *Ar.*). From (razú, ar. to be pleased). Approved. A title of Ally. Common alam; as Moortezah beg, alam + alaumat. Moortezah hoossain, double alam [ism].——*Moortezah ally* (مرتضى على - murtazáalí, Hind.). Double alam. Otherwise Ghoolaum moortezah ally khan. Married a daughter of Dost ally, nawaub of the Carnatic from 1732–1740. Murdered his brother-in-law, Sufder ally. Proclaimed Nawaub [q.v.] of the Carnatic [q.v.] by Dupleix in 1753 as a rival to Anwarood deen khan [q.v.] supported by the English. See vol. I (177).——*Moortezavee* (مرتضوى - murtazaví, Hind.). From (murtuzá, ar. lacab of ally). Title of a class of Mahome-dans tracing their pedigree to Ally [ism].

MOORY (మూరి - múri, *Tel.*; മുറി - muri, *Mal.*). From (muri, mal. to cut). A hamlet. Also a leaf, a bond. Blue cloth; principally manufactured in Nellore district, otherwise there called Salampore [q.v.]; also at Coonnatore in Chingleput; once largely exported to Straits.

MOOSA (موسى - músá, *Hind.*). Hebrew, drawn out of water. Moses. Common alam; as Moosa bee, alam + alaumat [ism].

MOOSADDY (متصدى - musaddí, *Hind.*). From (sada, ar. to come before). Writer in a public office. Distinguish from the Tel. moosaddy [moosh].

MOOSALLAS (مثلث - musallas, *Hind.*). From (suls, ar. three). Trigonometry. The following are the principal terms. ——*Fasala* (فصله - fasala, Hind.). From (fasl, ar. to divide). Segment.——*Hammarkaz* (هم مركز - hammarkaz, Hind.). From (ham, ar. same + markaz, ar. centre). Concentric circle.——*Jeb* (جيب - jeb, Hind.). From (jába, ar. to cut). Sine.——*Jeb i moostavee* (جيب مستوى - jebimustaví, Hind.). Cosine.——*Moomaus* (مماس - mumás, Hind.). From (massa, ar. to touch). Tangent.——*Saham* (سهم - sahm, Hind.). From (sahama, ar. to cut). Secant [ilm].

MOOSAMBAR (مصنبر - musambar, *Hind.*). Bitter aloes [aloe]. To be distinguished from scented aloe wood or eagle wood [q.v.].

MOOSAUFER (مسافر - musáfir, *Hind.*). From (safr, ar. journey). Traveller. Moosaufer khana is a place for the accom-modation of travellers, especially those who are not caste Hin-doos [chuttram, dharmashaulay].

MOOSAUHIB (مصاحب - musáhib, *Ar.*). From (sahiba, ar. to accompany). Associated. Attaché.

MOOSH (मुष् - mush, *San.*). To steal, break, kill.——*Moosha* *Moosaddy* (ముసడి - musadi, Tel.). Same as Mooshty.——(മൂശ - músha, Mal.). From (mush, san. to break), as used for melting. Mould.——*Moosham* (मूष - músha, San.). From (mush, san. to steal); from sly habits. Mouse. The genus Mus, murinæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. The species best known to the natives are:—bandicota [bandicoot], brunneus [maravely], cervicolor [varappoo shoondely], decumanus [ely], oleraceus [mara shoondely], urbanus [shoondely]. Other S. indian species are crassipes, infralineatus, nilagiricus, rattus, rufescens, terricolor.——*Mooshaury* (മൂശാരി - músházi, Mal.). From (músha, mal. mould + kári, mal. doer). Brass and coppersmiths in Malabar [jauty]. ——*Mooshicam* (मूषिक - múshika, San.). From (mush, san. to steal). Means rat. One of the four divisions of Keralam, Comprises S. travancore. extending from Cullada to Comorin. Other divisions are Coopam, Keralam proper, and Tooloovam. See vol. 1 (5).——*Mooshty* (मुष्टि - mushti, San.). From (mush, san. to steal), from what is stolen being concealed in closed hand. Handful. Measure of capacity. 12 mooshties = 1 coodavam [alavay, 3f]. Approximate actual value, 1 mooshty = 2½ tolahs

weight of grain or $2\frac{3}{16}$ cubic inches. See vol. I, 609. For Strychnos genus see sep. title.——*Moottliy* (مٹھی - mutthí, Hind.). Means the fist. Linear measure. 4 ungools = 1 moottliy; 3 mootthies = 1 bilisht [alavay, le]. Approximate actual value, 1 mootthy = 3 inches. See vol. I, 609.

MOOSHEER (مشير - mushír, *Ar.*). From (shára, ar. to point out). Minister. Part of lacab; as Moosheer ool moolk, regulator of the state [ism].

MOOSHRIK (مشرك - mushrik, *Hind.*). From (shirk, ar. to go in partnership). A polytheist; wide term for an infidel, [caufir] including moslem [q.v.], christian and jew [jonaca].

MOOSHTARY (مشترى - mushtarí, *Ar.*; برجيس - birjís, *Pers.*; برسپت - biraspat, *Hind.*). The planet Jupiter, the Hindoo brihaspaty [q.v.]. Also called (kázíifalak), meaning celestial judge. An auspicious star; one born under its influence being supposed to distinguish himself [najm]. Tippoo's copper coin [naunyam].

MOOSHTY (मुष्टि - mushti, *San.*). From (mush, san. to kill); poison nut [moosh]. Title otherwise Nux-vomica, Vomit-nut tree. Botanically the Strychnos genus, loganiaceæ [vricsham, 89]. Scandent shrubs with short tendrils, or trees, natives of tropical regions; leaves entire, strongly-nerved, opposite; flowers white or yellowish; fruit a globose or oblong berry with many seeds, which are flattened disk-like and silky, surrounded by pulp. The species best known to the natives are:—colubrina [snake-wood tree], ignatii [papeeta], nux-vomica [poison nut], potatorum [clearing nut]. Other S. indian species indigenous or naturalized are:—axillaris, cinnamomifolia. Includes also species in bischoffia and tiliacora.——*Black mooshty* (నలుపుముష్టి - nalupumushti, Tel.). Title from color of heart-wood. Same as Java cedar.——*Creeper mooshty* (بگلوٹا - baglútá, Hind.; నాగముసడి - nágamusadi, Tel.; വള്ളിക്കാഞ്ഞിരം - vallikkáññiram, Mal.). Tel. from (nága, san. snake + musadi, tel. strychnos nux-vomica, linn.). Mal. from (valli, mal. creeper + káññiram, mal. strychnos nux-vomica, linn.). Tel. also (tígamushini), (tivvamusidi), (tígamushti), all meaning creeper + strychnos nux-vomica, linn.; (kappatíga), meaning frog + creeper [chebulic myrobalan]; (pátavéru); (pátéru). Title otherwise Frog creeper, Nauga mooshty, Snake mooshty. Botanically Tiliacora racemosa, colebr., menispermaceæ [vricsham, 5]. Generic name from bengalee. Alias Cocculus acuminatus, radiatus; Menispermum acuminatum, polycarpum, radiatum; Tiliacora acuminata. Twining shrub; leaves ovate, acuminated, acute or truncate, or slightly cordate at the base, glabrous; racemes axillary, usually about half the length of the leaf; pedicels in the males, one or two from each bractea, two to three-flowered, in the females solitary, one-flowered; petals much shorter than the filaments; flowers small, cream-colored, fragrant; drupes numerous; common in hedges. Used as antidote to snake-bites, being rubbed between two stones and mixed with water; also in elephantiasis [cochin leg]; decoction of leaves applied externally in ulcers, &c.——*Snake-wood mooshty* (నాగముసడి - nágamusadi, Tel.). Same as Creeper mooshty.

MOOSHY (ముసి - mushi, *Tel.* múshi*). From (musí, tel. falsehood); from its being a treacherous river. River; Nellore district, Podily and Darshy divisions and Cundoocore and Ongole talooks. Rises near Dokkalashaula in the Veligondas and flowing first easterly and then southerly through Podily and Darshy divisions of Vencatagherry zemindarry and Cundoocore talook and forming the S.E. boundary of Ongole talook falls into the sea near Anantavaram. It is a dangerous river. There are freshes in September, October and November.

MOOSIRY (முசிறி - musiri,* *Tam.*). From (mú, tam. old + shirai, tam. place) [moo]. Sanscrit name (gópálakrishnapura), meaning cowherd + krishnan, the god + city.——**(1)** Talook, Trichinopoly district. Tahsildar's pay Rs. 225; pop. 282,619; language Tamul. Area 762 square miles. Lies entirely north of Cauvery. W. of district. Bounded N. by Ahtoor talook, and W. by Namcull talook of Salem district, S. by Coolitalay and Trichinopoly talooks, and E. by Perambalore talook. The surface is generally flat, the only range of hills being the Putchamullays which separate the talook from Perambalore talook. The Collimullays form boundary at N.W. corner, but they are entirely in Salem district. S.W. of the Collimullays is Talamullay, which forms the boundary of the district at one point, although it lies entirely outside it. The portion of the talook lying along the N. bank of Cauvery possesses a fertile soil and excellent means of irrigation. The country N. of valley of Cauvery and S. of Putchamullay hills is very uniform in character. Soil is black in the hollows and red on the higher levels and in neighbourhood of hills. Water is found, as a rule, near the surface, and both tanks and wells abound, especially in Toorayore zemindarry. Principal grains are paddy [q.v.], cholum [q.v.], cumboo [bajrah], raggy [q.v.], and horse-gram [q.v.]; varagoo [q.v.] is found but not extensively cultivated. The staple food of the people in villages along the Cauvery is paddy. Further north dry grains [q.v.] especially cholum, raggy and cumboo, are largely consumed. Turbans and cloths in Toorayore and Manamode villages. Mats [boriyah] in Varadarajapooram. Cotton [q.v.] trade on a small scale in the Toorayore division and plantain [q.v.] trade in Cautpoottore. The principal sources of irrigation are the Caraypottanaur, Cauvery and Eiyaur. The following are the more important of the channels [q.v.] from the Cauvery:—Nautt vycaul, Sheelapillapoottore, Shreenivasa nullore, Tottiyam chinna vycaul, and Tottiyam periya vycaul. There are fifty-three tanks [q.v.] of which the most important are Jambairy, the large irrigation tank in Toorayore zemindarry. Tirtalaiyore tank, and Mooroonga calattore. The centre and northern portions are, as a rule, unirrigated. There is one zemindarry in the talook that of Toorayore. Cautpoottore mittah is in the south-western corner. Camping grounds:—Cautpoottore, Chetticoolam, Cunnanore, Harikrishnavary, Ooppoolyapooram, Shiroogaanore, Shobhanapooram, Toorayore, Tottiyam, Yeragoody. Places of archæological interest:—Caraypottanaur, Caumautchipooram, Moosiry, Naugaya nallore, Pauleiyore, Tirvenginautamullay, Toorayore, Tripatore, Yedoomullay, Yeragoody. The leading places, &c., in the talook are the following.——*Caraypottanaur* (கரைப்போட்டானாறு - karaippottánáru, Tam.). See sep. title.——*Cautpoottore* (காட்டுப்புத்தூர் - káttupputtúr, Tam. kátuputúr*). From (kádu, tam. forest + puthu, tam. new + úr, tam. village). Mittah, Village; pop. 5,152; acres 2,519; lat. 10° 59′; long. 78° 16′; from Moosiry W.N.W. 16 miles; from Trichinopoly W.N.W. 34 miles. The only mittah in Trichinopoly district. Created by Government in 1802, and given to Sarwotama row, Head sheristadar of Salem collectorate. He sold the estate in 1810 to Goonnamareddy, who sold it to Annayyar and Sapta rishy reddy in 1813. These men are ancestors of present owners, and estate has always been enjoyed by two joint proprietors, one Bramin and the other Reddy. The mittah [q.v.] was transferred from Salem district to Trichinopoly in 1851. The village is well-built and prosperous. The country in the vicinity contains some of the best irrigated lands in the district. Peshcush Rs. 15,901.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Cunnanore* (கண்ணனூர் - kannanúr, Tam.). From (kannan, tam. krishna, the god + úr, tam. village). Sanscrit name (bhujabalarájapattana), meaning the strong armed king + town; named after bhoojabala royen who built there a temple for cunnan [q.v.], or krishnan [q.v.]. Village; pop. 2,645; acres 3,093; lat. 11° 05′; long. 78° 37′; from Moosiry N.E. 12 miles; from Trichinopoly W. by N. 21 miles. Head-quarters of the old Toorayore talook. Weekly market on Thursdays.——*Eiyaur* (ஐய்யாறு - aiyyár, Tam.). See sep. title.——*Keerambore* (கீரம்பூர் - kírambúr, Tam.). Village; pop. 4,714; lat. 11° 10′; long. 78° 41′; from Moosiry N.E. 19 miles; from Trichinopoly N. 25 miles. In Toorayore zemindarry.——*Moosiry* (முசிறி - musiri, Tam.). See below.——*Naugaya nallore* (நாகையநல்லூர் - nágayanallúr, Tam.). From (nágayya, tel. proper name + nal, tam. good + úr, tam. village). Village; pop. 3,740; acres 4,782; lat. 11° 01′; long. 78° 18′; from Moosiry W. 16 miles; from Trichinopoly W.N.W. 34 miles.——*Ooppoolyapooram* (உப்புலியப்புரம் - uppuliyappuram, Tam.). From (uppiliyan, tam. member of that caste + pura, san. city). Village; pop. 3,648; acres 1,606; lat. 11° 16′; long. 78° 34′; from Moosiry N.N.E. 22 miles; from Trichinopoly N. 33 miles. Originally founded by Ooppilyars [q.v.] or salt makers.——*Putchamullay* (பச்சைமலை - paççaimalai, Tam.). See sep. title.——*Shikkitambore* (சிக்கித்தம்பூர் - shikkittambúr, Tam.). Village; pop. 4,144; lat. 11° 12′; long. 78° 37′; from Moosiry N.N.E. 19 miles; from Trichinopoly N.N.W. 28 miles. In Toorayore zemindarry.——*Shreenivasa nullore* (ஸ்ரீனிவாசநல்லூர் - shínivásanallúr, Tam.). From (shrínivása, san. proper name + nal, tam. good + úr, tam. town). Village; pop. 1,019; acres 638; lat. 10° 58′; long. 78° 26′; from Moosiry W.N.W. 5 miles; from Trichinopoly W.N.W. 25 miles. Gives its name to a channel from the Cauvery.——*Talamullay* (தலைமலை - talaimalai, Tam.). See sep. title.——*Tirpangaly* (திருப்பங்கலி - tiruppangali, Tam.). From (tiru, tam. holy + pangu, tam. portion + kali, tam. clay); holy place with clayey soil. Devastaunam inam [q.v.] village; pop. 3,243; acres 5,366; lat. of village 10° 57′; long. 78° 42′; from Moosiry E. 14 miles; from Trichinopoly N.N.W. 9 miles.——*Toorayore* (துறையூர் - turaiyúr, Tam.). See sep. title.——**(2)** Town, Head-quarters of Talook and Division; Trichinopoly dist., Moosiry tal.; pop. 4,516; acres 2,489; lat. 10° 57′; long. 78° 30′; from Ariyalore W.S.W. 44 miles; from Madras S.W. 189 miles; from Shreerungam W.N.W. 18 miles; from Trichinopoly W. by N. 19 miles. On the Cauvery, almost exactly opposite to Coolitalay. Since 1867 head-quarters of the Head assistant collector. Very old Shiva temple. Peramore estate choultry [q.v.]. Weekly market on Wednesdays. Imposing-looking Roman catholic chapel built in 1876. In 1875 three flights of steps leading down to the Cauvery were built by local subscriptions, &c. Old bridge with Chola inscriptions.

MOOSKIRAUT (مسكرات - muskirát, *Hind.*). From (sakara, ar. to become intoxicated). Intoxicant. For narcotics see Mookhadiraut. The following are two key-lists of the principal intoxicating substances used by the natives of S. india; further information must be traced in the glossary paragraphs through the small type cross-references at the end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Anamirta cocculus,

indian berry, seed; Cannabis sativa, indian hemp, whole plant except stem; Datura fastuosa, purple datura, seed; Eleusine coracana, raggy, fermented drink; Grewia asiatica, falsah, fruit; Manihot utilissima, tapioca, juice; Papaver somniferum, opium, capsule infusion; Sarcostemma brevistigma, somam, juice; Sorghum vulgare, cholum, fermented drink; Strychnos nux-vomica, poison nut, seed; Vitis vinifera, grape vine, wine; Woodfordia floribunda, godaury, drink from blossom.—" *b* " Cholum, sorghum; Falsah, grewia; Godaury, woodfordia; Grape vine, vitis; Hemp, cannabis; Indian berry, anamirta; Opium, papaver; Poison nut, strychnos; Raggy, eleusine; Somam, sarcostemma; Tapioca, manihot.

MOOSLY (موسلي - músli, *Hind.*). Asparagopsis genus [shatamooly].——*Cauly moosly* (तालमूली - tálamúlí, San.; मुसली - musalí, Mahr.; भुयिमाड्डि - bhúyimáddi, Conc.; سیاه موسلي - siyáhmúslí, Hind.; کالی موسلي - kálímúslí, Dec.; ನೆಲತಾಳೆ - nelatále, Can.; ನೆಲಮುಂದ - nelamunda, Too.; నేలతాడి - nélatádi, Tel.; ତାଲମୂଳି - tálmúli, Oor.; നിലപ്പന - nilappana, Mal.; හින්බින්තල් - hínbintal, Singh.; நிலப்பனை - nilappanai, Tam.). Title from black root. San. from (tála, san. palm, borassus flabelliformis, linn. + múla, san. root). Hind. from (siyáh, pers. black + múslí, hind. asparagopsis sarmentosa, kunth.). Dec. from (kálí, hind. black + múslí, hind. asparagopsis sarmentosa, kunth.). Can. from (nela, can. ground + tále, can. palmyra, borassus flabelliformis, linn.). Tel. from (néla, tel. ground + tádi, tel. palmyra, borassus flabelliformis, linn.). Mal. from (nila, mal. ground + pana, mal. palm). Singh. from (hín, singh. low + bintal, singh. curculigo). Tam. from (nilam, tam. ground + panai, tam. palmyra tree, borassus flabelliformis, linn.); from leaf. San. also (bhúmitála), meaning ground palm; (bahulavalkala), meaning having thick bark; (bhúta), meaning existing; (váráhí), meaning hoggish; (musalí), meaning pestle-like, from cylindrical form of fresh roots. Hind. also (safedmúslí), meaning asparagopsis ascendens, kunth. Can. also (nelatátigadde); (neladáli). Tel. also (nallatádi), meaning black + palmyra, borassus. Tam. also (tirakkattáru), meaning wrinkled rooted palm; (talattádu), meaning ground palm. Title otherwise Black palm, Ground palm, Hog palm, Narrow-leaved curculigo, Nilapanay, Weevil root. Botanically Curculigo orchioides, gærtn., hypoxidaceæ [vricsham, 146]. Alias Hypoxis orchioides. Stemless; root tuberous, with many spreading fibres; leaves narrow-lanceolar, nerved, slender; petioles channelled, sheathing below; racemes solitary, axillary; flowers hermaphrodite, yellow; flowering nearly all year; apices of the leaves are viviparous and will produce young plants if allowed to rest on ground; grows in moist forests; tuberous and wrinkled root about 4 inches long; slightly bitter and mucilaginous to the taste. The root is used in gonorrhœa and has tonic qualities; in pharm. non-officinal. Other common species are:—brevifolia, malabarica, recurvata.——*Semul moosly* (سیمل موسلي - múslí-semal, Dec.). Aphrodisiac preparation from young root of Red-cotton tree [q.v.]. This root is like the tap-root of many other young plants, tapering, and varies a great deal in its size according to the age of plant; if the age is two years the tap-root is generally about the size of long radish; when fresh it is tuberous and cuts easily, grey, reddish-brown or brown externally, and white internally; taste mucilaginous, smell none; when dry, the root is much shrivelled, shrunken and wrinkled longitudinally, the epidermis is reddish-brown, brown or slightly ash-colored and generally loose and peels off easily, beneath the epidermis the root is reddish brown but white or pale-white internally, odourless and tasteless; the dry root is not easily powdered, but the dry slices of the fresh root are reduced to a fine powder without difficulty. There is no drug in this country which enjoys a greater reputation as an aphrodisiac and tonic in native medical works.——*Soofaid moosly* (शतावरि - shatávari, San.; शतावली - shatávalí, Mahr.; شقاقل - shakákul, Ar. and Pers.; سفید موسلي - sufedmúslí, Hind.; شقاقل - shakákul, Dec.; ಹಲವುಮಕ್ಕಳಬಳ್ಳಿ - halavumakkalaballi, Can.; ಉದುರಿಬುರು - uduriburu, Too.; చల్లగడ్డ - tsallagadda, Tel.; ശതാവരി - shatávari, Mal.; හාතාවාරිය - hátávàriya, Singh.; தண்ணீர்விட்டான் - tannírvittán, Tam.). Title from hindostany and white root. San. from (shata, san. hundred + ávri, san. to cover); from shaggy root. Mahr. from sanscrit. Hind. from (safed, hind. white + múslí, hind. asparagopsis genus). Can. from (halavu, can. many + makkalu, can. children + balli, can. creeper); useful tonic to children. Too. from (uduru, too. hanging down + búru, too. creeper). Tel. from (tsalla, tel. butter milk + gadda, tel. root). Mal. from sanscrit. Singh. from sanscrit. Tam. from (tannír, tam. water + vidu, tam. to leave); holds cool water. Hind. also (shakákul) [shakaukool]; (satwárí). Can. also (majjigegadde), meaning butter milk + lump; (shíbáribéruballi), meaning broom + root + creeper; (shaháválíballi); (áhéruballi), meaning asparagopsis floribunda + creeper. Tel. also (pillipítsara), meaning cat + the plant. Mal. also (shatávali), by corruption. Tam. also (tannírmuttán), by corruption; (sathámulam), meaning hundred + root; (sháttiravéri), hundred + root; (kilávarí), meaning branched root, from appearance of root in thin, long narrow pieces. Title otherwise Climbing asparagus. Botanically Asparagopsis [shatamooly] sarmentosa, kunth., liliaceæ [vricsham, 136]. Alias Asparagus sarmentosus. Malabar climber; stems woody, climbing, very much branched; branches grooved, ribbed, branchlets rather rough; thorns subulate, straight, turned downwards; leaves linear mucronulate; racemes many-flowered, flowers white, berries red. When a plant is dug out with roots, has appearance as if many large round worms were attached to it; the fresh root is very fleshy and succulent, about a foot or foot and a half in length, generally of the thickness of a finger, smooth and round, tapering to a very narrow and long point at both ends, of dull white or pale grey color, no smell, and taste slightly demulcent. Soofaid moosly of commerce is the fresh root dried and split longitudinally; this occurs in thin and long pieces like strings, curled upon itself once or twice, varies in length from three or four inches to a span or more, of pale-grey or dirty-white color, and devoid of any particular taste or smell. Root medicinally like shakaukool [q.v.]; specially boiled with oil, applied to cutaneous diseases. Soofaid moosly of other parts of india is the root of Asparagopsis ascendens, kunth. [indian salep], a substitute for salep [q.v.].

MOOSSAD (മൂസ്സത് - mússatu, obl.; മൂസ്സ് - mússu, pers. sing.; മൂസ്സന്മാർ - mússémár, pers. pl., *Mal.*). From (múkku, mal. to grow old) [moo]. Caste-title. A subordinate class of Bramins in Malabar. See vol. II, 100. Others are Elliads and Numbies. The following are the principal Moossads.——*Aulatore numby* (ആലത്തൂർനമ്പി - álattúrnampi, Mal.). Ponnany.——*Cheeratmana* (ചിരട്ടമന - chírattumana, Mal.). Valavanaud.——*Coottancherry* (കുട്ടഞ്ചേരി - kuttañchéri, Mal.). Ponnany.——*Plaundole* (പ്ലാന്തോൾ - plántól, Mal.). Valavanaud.——*Tycaut* (തൈക്കാട്ട - taykkáttu, Mal.). Cochin.——*Yeledat tycaut* (എളേടത്തു തൈക്കാട്ട - elétattutaikkáttu, Mal.). Cochin [jauty].

MOOSSANDA (बेल्लोटि - béllóti, *Conc.*; بیبنا - bebiná, *Hind.*; ಬೆಲ್ಲೊಟ್ಟಿ - bellotti, *Can.*; ಬೊಳ್ಳೆತಪ್ಪು - bolletappu, *Too.*; വെള്ളില - vellila, *Mal.*; මුස්සැන්ද - mussanda, *Singh.*; வெள்ளிமடந்தை - vellimadandai, *Tam.*). Title from singhalese. Can. means white plant. Too. from (bolle, too. white + tappu, too. leaf). Mal. from (vel, mal. white + ila, mal. leaf), from white leaves. Tam. from (vel, tam. white + madandai, tam. lady). Singh. also (valbutsarana), meaning creeper + canna indica, linn. Tam. also (vellilai), meaning white leaf. Title otherwise Creeping indian shot, Velilla, White lady, White-leaf plant, White-rag plant. Botanically Mussænda frondosa, l., rubiaceæ [vricsham, 71]. Generic name from singhalese. Alias Mussænda dorinia, flavescens, formosa, glabra, velilla, zeylanica. Velilla from malayalam. Erect shrub; leaves oval, acuminated, from villous or hirsute to nearly glabrous; branches and corymbs when young pubescent or tomentose; calyx-segments subulate, much longer than the ovary, hirsute, one of them in some of the axillary flowers of the corymb produced into a large pubescent or villous leaf; corolla externally hirsute; style the length of the tube; fruit at first hairy, afterwards glabrous, obovoid; flowers middle-sized, gold-colored; common; flowering nearly all the year. Used as a charm against demons. The root is given with cow's urine as a remedy for jaundice; the juice of the leaves and fruit, which is very mucilaginous, is used as an eye-wash; the flowers are attenuant and diuretic, and are used in cough, asthma, ague, and flatulence; externally applied they clean foul ulcers, and cure skin eruptions. Leaves boiled and eaten as a vegetable [keeray]. Other common species are:—corymbosa, tomentosa.

MOOSTAFAH (مصطفى - mustafá, *Ar.*). From (safu, ar. pure). Lacab of Mahomed. Common alam; as Moostafah ally, double alam; Moostafah beg, alam + alaumat [ism].——*Moostafah-nugger* (مصطفى نگر - mustafánagar, Hind.). From (above + nagar, hind. town). One of the five Circars [q.v.] obtained by the English from the emperor of Delhi [charitram]. See vol. I (179). Modern name is Condapully.

MOOSTAJARY (مستاجری - mustájirí, *Hind.*). From (ajr, ar. hire). Renting system as opposed to Ryotwarry [q.v.] tenure. Moostaujar is a farmer of revenue [goottadar].

MOOSTAKEEM (مستقيم - mustakím, *Ar.*). From (kauma, ar. to stand). Resolute. Part of lacab; as Moostakeem jung, resolute in war [ism].

MOOSTOWFY (مستوفی - mustaufí, *Ar.*). Auditor of accounts. Part of lacab; as Moostowfy ood dowla, comptroller of the empire [ism].

MOOTAH (متعه - mutah, *Hind.*). Literally enjoyment. Temporary marriages allowed by Shiah [q.v.] code, but, considered illegal by Soonnees [q.v.].

MOOTALIK (متعلق - mutaallik, *Hind.*). From (alaka, ar. to hang) [talook]. Dependent.

MOOTAMAD (معتمد - mutamad, *Ar.*). From (amada, ar. to confide). Faithful. Prefixed to an alam forms a lacab; as Mootamad hoossain, faithful to hoossain [ism].

MOOTAZALA (معتزله - mutazála, *Hind.*). From (azala, ar. to separate one's self). A dissenter; from the founder of this sect, Wausil, having seceded from his master Imaum hassan

basree on a question of dogma. The society of Ikhwaun oos safah or Brothers of purity, from which issued about the tenth century treatises on every department of human study, was founded by the members of this school. Rationalism was put down during the Abbaside period.

MOOTT (முட்டு - múttu, *Tam.*). Joint.——*Moottpoochy* (முட்டுப்பூச்சி -múttuppúççi, Tam.). Bug. See Poochy.

MOOTTOO (முத்து - muttu, *Tam.*). Pearl [moty]. As an affix in proper names it is common among the lower castes, as Showrimoottoo, Maurimoottoo. Also as prefix, as Moottookrishnan, Moottoosawmy. Also familiar contraction of all names which it begins [peyar].——*Atimooctah* (अतिमुक्ता - atimuktá, San.). Surpassing + pearl, alluding to flowers or wood. Plant name common to:—Chrysanthemum indicum; Hiptage madablota; Ougeinia dalbergioides. See gloss. paragraphs.——*Mootcore* (ముత్తుకూరు - muttukúru, Tel.). From (muttayya, tel. proper name + úru, tel. village); after moottayya, relative of krishna deva royel. Village; Nellore dist., Goodoor tal.; pop. 2,011; acres 2,933; lat. 14° 17′; long. 80° 08′; from Goodoor E.N.E. 19 miles; from Nellore S.E. 14 miles; from the sea W. 3 miles. Rising into importance as close to the basin of the Buckingham canal [q.v.] and the road to Nellore. Good private choultry [choultry, kistnapatam].——*Moottammah* (முத்தம்மா - muttammá, Tam.). From (above + ammá, tam. mother). Familiarly Moottoo. Hindoo female proper name [peyar].——*Moottaurammah* (முத்தாரம்மா - muttárammá, Tam.). From (above + áram, tam. pendant + ammá, tam. mother). A Tamulian demoness.——*Moottayyan* (முத்தய்யன் - muttayyan, Tam.). From (above + aiyyan, tam. master). Epithet of Soobramanyan [q.v.]. Hindoo proper name [peyar].——*Moottiaul* (ముత్యాలు - mutyálu, Tel.). Means pearls. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Moottiaulpaud* (ముత్యాలపాడు - mutyálapádu, Tel.). From (muttayya, tel. proper name + pádu, tel. village).—"*a*" Zemindarry; Nellore dist., Cundoocore tal.; square miles 20. Peshcush Rs. 2,000. Consists of three villages and ten hamlets in the Cundoocore talook.—"*b*" Village; Nellore dist., Cundoocore tal.; pop. 2,926; lat. 14° 59′; long. 79° 51′; from Cundoocore S.S.W. 16¼ miles; from Nellore N.N.W. 39 miles; from the sea W. 17 miles. Principal village of the Moottiaulpaud estate held by Bauley row [q.v.]. The founder of the Bauley row family obtained this jagheer [q.v.] from the Nizam [q.v.] of Hyderabad as a reward for his services in reducing the rebellious jagheerdars of Anama condah, Veligonda, &c. Large tank [q.v.]. Betel [q.v.] gardens. Two old temples of Vishnoo and Shiva. Festivals in November and December.——*Moottoocomauran* (முத்துக்குமாரன் - muttukkumáran, Tam.). From (above + kumára, san. son). Epithet of Soobramanyan [q.v.], the beautiful son-god. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Moottookrishnan* (முத்துக்கிருட்டிணன் - muttukkiruttinan, Tam.). From (above + krishna, san. the god); beautiful krishnan [q.v.]. Hindoo 2nd or pers. name [peyar].——*Moottoo krishnappa* (முத்துக்கிருட்டிணப்பன் - muttukkiruttinappan, Tam.). From (above + krishnappan, tam. proper name). Naick ruler of Paundyam, in whose reign Robert de Nobilibus preached at Madura. A.D. 1602–1609. See vol. I (121); II, 250.——*Moottoomaury* (முத்துமாரி - muttumári, Tam.). From (above + mári, tam. the goddess of small-pox). Village deity. Maury presiding over small-pox, white pearl-like variety. The other and more dreaded form is the dark variety.*——*Moottoopett* (முத்துப்பேட்டை - muttuppéttai, Tam. mutupet*). From (muttu, tam. pearl, proper name + péttai, tam. village). Town, Port, Sea-customs office; Tanjore dist., Tritrapoondy tal.; pop. 5,381; acres 1,453; lat. 10° 23′; long. 79° 32′; from Calimere point N.W. 27 miles; from Adiramputnam N.E. 9 miles; from Madras S.W. 191 miles; from Tanjore S.E. 36 miles; from Tritrapoondy S.W. 14 miles. On Coraiyaur in bay to west of Point calimere. Though but a mere boat harbour, upwards of 100 vessels, with an aggregate of 6,000 tons, annually frequent the port. Large Lubbay [q.v.] community trading with Ceylon and other places. Paddy [q.v.] largely exported to Ceylon.——*Moottoo ramalinga saitoopaty* (முத்துராமலிங்கசேதுப்பதி - mutturámalingaséthuppathi, Tam.). Name + title. Ruler of Ramnaud. Twice deposed and sent to Madras as state prisoner. It was at this time that the English becoming virtual rulers of the Carnatic [q.v.] the revenues of Ramnaud had to be assigned to them by Nawaub wallajah [charitram]. See vol. I (124).——*Moottoosawmy* (முத்துசாமி - muttusámi, Tam.). From (above + svámí, san. lord). Hindoo 2nd or pers. name [peyar].——*Moottoovail* (முத்துவேலு - muttuvélu, Tam.). From (above + vél, tam. spear). Epithet of Soobramanyan, the beautiful lance-holder. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Moottoo veerappan* (முத்துவீரப்பன் - muttuvírappan, Tam.). From (above + vírappan, tam. proper name). Naick ruler of Paundyam. A.D. 1609–1623. See vol. I (121); II, 250.

MOOTTY (बाल - bála, *San.*; முட்டி - mutti, *Tam.*). San. from (val, san. to cover). Tam. from (muttu, tam. to oppose); medicinal. Botanically the Pavonia genus, malvaceæ [vricsham, 25]. Small shrubs or herbs, natives of america; leaves various in form. The species best known to the natives are shown below.——*Peramootty* (बाल - bála, San.; कालावाला - kálávála, Mahr.; سگھندبالا - sughandbálá, Hind.; ಬಲರಕ್ಕಸಿಗಿಡ - balarakkasigida, Can.; ముత్తవపులగముచెట్టు - muttavapulagamuchettu, Tel.; பேராமுட்டி - péramutti, Tam.). Title from size of plant. San. from (val, san. to cover), medicinal. Mahr. from (kála, san. black + válá, mahr. andropogon muricatus, retz.). Hind. from (sughandha, san. odour + bálá, hind. andropogon); from its resemblance to stimulating and carminative action of musk. Can. from (bala, can. strong + rakkasí, san. giantess + gida, can. plant). Tel. from (mutta, tel. old + avva, tel. grandmother + pulagamu, tel. pudding + chettu, tel. plant) [common balah, lance-leaved balah, shoondy, shrubby balah], familiar household medicine. Tam. from (peru, tam. great + mutti, tam. pavonia). San. also (hrívéra), meaning shy + body. Tel. also (chittibenda), meaning small + hibiscus esculentus, linn.; (errakúti), meaning red + pulp. Title otherwise Chittibenda. Fragrant pavonia. Botanically Pavonia [mootty] odorata, willd., malvaceæ [vricsham, 25]. Alias Hibiscus chittlebenda, moriforius, odoratus; Pavonia sidoides. Chittlebenda from teloogoo. Shrub, 2–3 feet; calyx five-cleft; involucel twelve-leaved, ciliated, longer than the calyx; stems viscidly hairy; leaves cordate, roundish-ovate, upper one three-lobed, toothed, more or less hairy and viscid, lower ones sometimes entire; pedicels axillary, one-flowered; carpels five, two-valved, one-seeded, not prickly; flowers rose-colored; fragrant; flowering nearly all year. Roots 7–8 inches long, more or less twisted, not more than ¼ inch in diameter at the thickest part; giving off numerous thin fibres and having a delicate musk odour; bark light brown, nearly smooth, wood hard, yellowish; seeds brown, oily, not musky. Flower religious; one of the flowers with which arrows of cauman [cauma baunam] are tipped. Infusion of roots is a diet drink in fevers. Yields a fibre [naur].——*Shittamootty* (बाल - bála, San.; ಚಿಟ್ಟಮುಟ್ಟಿ - chittámutti, Can.; చిన్నముత్తవపులగముచెట్టు - chinnamuttavapulagamuchettu, Tel.; ගස්බවිල - gasbavila, Singh.; சிற்றுமுட்டி - shittámutti, Tam.). Title from size of plant. San. from (val, san. to cover), covering the earth with roots, also medicinal. Can. from tamul. Tel. from (chinna, tel. small + muttavapulagamuchettu, tel. pavonia odorata, willd.). Tam. from (shiru, tam. small + mutti, tam. pavonia sp.). Can. also (antutogarigida), meaning gum + cajanus indicus, spr. Tel. also (peramutti). Title otherwise Ceylon pavonia. Botanically Pavonia [mooty] zeylanica, cav., malvaceæ [vricsham, 25]. Alias Hibiscus zeylanicus. Annual; lower leaves somewhat roundish-cordate, crenated, upper ones deeply three to five-lobed, coarsely toothed; pedicels axillary, one-flowered; involucel leaves ten, ciliated, longer than the calyx; carpels unarmed; flowers middle-sized, whitish; flowering in the rainy season. Root has little taste or smell. An infusion of the root is given in fevers. Yields a fibre [naur].

MOOTWULLEE (متولی - mutawallí, *Hind.*). From (vilá, ar. near). A person appointed to the management of a religious building and endowment [dharmacurta, musjid].

MOOZUFFER (مظفر - muzaffar, *Ar.*). From (zafr, ar. victory). Victorious. Lacab of the prophet. Common alam; as Moozuffer hoossain, victorious hoossain, double alam [ism].——*Moozuffer jung* (مظفر جنگ - muzaffarjang, Hind.). Victorious in war. Alam + khitaub title. Grandson of the first Nizam. Disputed his uncle, Nausir jung's title to the throne, and, on his assassination became Nizam under the French protection. Killed in a mutiny of his troops [charitram]. See vol. I (177) and 9; II, 252.

MORABBA (مربا - murabba, *Hind.*; ಗೊಜ್ಜು - gojju, *Can.*; గుజ్జు - guddzu, *Tel.*; പാവു - pávu, *Mal.*; பாகு - págu, *Tam.*). Tel. from (gudzuru, tel. the pulp of fruits). Mal. from (pach, san. to cook). Tam. from (páka, san. boiling). Jelly. The principal fruit [pazham] jellies used by natives of s. india are:—Wood-apple jelly, from fruit of feronia elephantum, corr. wood-apple [q.v.] tree; has a peculiar flavor; agreeable and somewhat astringent. Rozelle jelly, from hibiscus sabdariffa, linn., red sorrel plant [red-hemp bendy]; contains a wholesome acid. Guava jelly, from psidium guyava, linn., var. pomiferum, linn., round-fruited guava [q.v.] tree; much used and exported to europe.

MORAH (موڑھا - morhá, *Hind.*). A foot stool. The usual form of the cane [rattan] morah is that of two truncated cones meeting at the smaller ends.

MORCHANG (مرچنگ - murchang, *Hind.*). From (munh, hind. mouth + chang, pers. lute). Jew's harp [sangeetam].

MORINDA (مورندا - morindá, *Hind.*). Same as Dyeing mulberry.

MORINGA (शोभाञ्जन - shóbhánjana, *San.*; शेगवा - shégavá, *Mahr.*; मशिंगु - mashingu, *Conc.*; سهجنا - shajná, *Hind.*; مونگے کا جھاڑ - múngekájhár, *Dec.*; کیلور - kelor, *Malay*; ನುಗ್ಗೆ - nugge, *Can.*; ನುರ್ಗೆ - nurge, *Too.*; మునగ - munaga, *Tel.*; ମୁନିଘ - munigha, *Oor.*; മുരിങ്ങ - murinna, *Mal.*; മുരംഗാ -

murungá, *Singh.*; முருங்கை - murungai, *Tam.*). Title from tamul through malayalam. San. from (shóbhá, san. brightness + añj, san. to clear); improves brightness. Mahr. from (shigru, san. the tree). Oor. from teloogoo. Mal. from (muram, mal. rough + káya, mal. fruit). Tam. from (murungu, tam. to perish); from soft wood. San. also (shigru), meaning sharp; (sanámaka), meaning with stripe; (dvishigru), meaning double moringa, from fruiting in pairs generally; (móchaka), meaning liberating, from gum; (haritapatra), meaning having green leaves; (kákshívaka), meaning stimulant; (janapriya), meaning liked by people; (chákshushya), meaning eye medicine; (murangí); (damshamúla), meaning pungent root; (ugragandhaka), meaning pungent odour; (madhushigru), meaning honey + the plant, is the red variety; (shvétamarícha), meaning white pepper, piper nigrum, linn., is the seed. Pers. also (moriaban). Hind. also (segwá); (ban). Dec. also (mungekíbhájí), meaning moringa greens; (múngekáphúl), meaning moringa flower; (mungekíjhárkíjar), meaning moringa root; (mungekíphallí), meaning moringa pod; (mungekágond), meaning moringa gum. Can. also (móchaka), meaning deliverer. Tel. also (adavimunaga), meaning forest + the tree; (kárumunaga), meaning wild + the tree; (erramunaga), meaning red + the tree; (tellamunaga), meaning white + the tree. Tam. also (úgadan), meaning stimulant; (shuligai), meaning stimulant; (karuñjanam). Greek βάλανος. Title otherwise Ben nut, Ben-oil tree, Country horse radish, Drumstick tree, Glans unguentaria, Indian horse radish, Segwah, Shajnah, Smooth horse radish. Botanically Moringa pterygosperma, gærtn., moringeæ [vricsham, 46]. Alias Anoma moringa; Guilandina moringa; Hyperanthera moringa; Moringa nux eben, oleifera, polygamá, zeylanica. Generic from dravidian. Tree 30-35 feet; leaves two to three pinnate with an odd leaflet; calyx five-cleft; petals five, nearly equal, the upper one ascending; filaments hairy at the base; racemes panicled; five stamens without anthers; seeds numerous, three-angled, the angles expanding into wings; flowers small yellowish white, irregular; flowering in hot season. Common about villages but wild in some jungles; easily raised from seed; fruit is a long whip-like bean, hence called drumstick; roots have flavor of horse radish, hence that term. The fruit is light brown when ripe, a foot or more in length, triangular, ribbed, and composed of three valves containing a soft white pith, and a single row of from twelve to eighteen seeds, which are dark brown, roundish, the size of a pea [calauyam] and furnished with three membranaceous wings; the kernel is white, oily and bitter. The fresh root of a large and well-grown tree varies in its diameter, in the thickest part, from 1-4 inches, and in its length, from 1-3 feet, tapering gradually towards its end; it is pale and yellowish-white internally and externally, porous, soft, slightly aromatic and disagreeable in smell, and pungent in taste; it is covered with a root bark, which has the same color, smell and taste, and is about one or two lines in thickness. The bark of the trunk is about ½ inch thick, and its taste and smell are similar to those of the root-bark, but somewhat weaker; it is covered with a rough and scaly epidermis, which is generally of a brown or greyish-brown color, and is easily removed; the inner bark is externally of a greenish, yellowish or pale white color, and its color internally is pale or yellowish white. The bark of the root has a reticulated light brown external surface; it is thick, soft, and internally white, and has a pungent odour and taste, exactly like horse radish; the wood of the root is soft, porous, and yellowish, and has the same properties in a less degree. The gum from bark, when it first exudes, is opaque and white; from exposure to the air it soon becomes pink, and finally of a dull red color on the surface, the interior remaining white; it occurs in pieces of considerable size, generally more or less vermicular in form, and is only produced upon trees which have been injured by insects; the taste is bland and mucilaginous; in dry air the gum becomes very friable, but in a damp climate it is tough and holds 20 per cent. of its weight of water; it resembles tragacanth [kateerah], for which it may be a substitute; one of the gums often called mocharas [q.v.]. From seeds comes a clear, limpid, almost colorless oil, called ben oil. The large branches planted in the ground root freely and soon become small trees, but produce from seedling plants is the best. Flowers, bark, root-bark and root are medicinal. The fresh root is stimulant, carminative, stomachic and stimulant-diuretic; the flowers slighly stimulant; the bark and root-bark, used externally, are rubefacient and vesicant. Compound spirit of moringa; take of the root, sliced, twenty ounces; orange [q.v.] peel, ten ounces; nutmegs [jautikye], bruised, two drachms and a half; proof spirit, four pints; water, one pint and a half; mix and distil four pints; dose from one to four fluid drachms. Internally, the compound spirit of moringa is a good substitute for spirit. ammon. arom., tinct. cascarillæ, tinct. valerianæ, tinct. moschi, tinct. cardamom comp., and spirit armoraciæ comp. Externally, the root-bark and the bark, particularly the former, is a fair substitute for the mustard flour imported from europe and for emplastrum cantharidis. Oil from seeds is used externally for pains in the limbs, gout, and rheumatism. Juice of the leaves mixed with pepper [q.v.] applied over the eyes in vertigo, mixed with common salt [ooppoo] given to children in flatulency; also used to hasten suppuration in boils. Bark, rubbed up in rice-water mixed with cummin seed [jeerah], is a cure for gum-boils and toothache. Leaves simply warmed applied in hydrocele, and also good for ulcers and guinea worm [nandy vranam]. The gum [gond] is used in headache, mixed with milk and externally rubbed on the temples, also locally applied to buboes and venereal pains in the limbs. Root quoted in pharm., but non-officinal, like armoracia. The leaf, flower, and long pod eaten as vegetables [keeray]; after the beans are taken off the tree, branches are lopped off and leaves given to cattle; scraped root furnishes horse radish for table; flower pickled; every part indeed is turned to some culinary account; root used in adulterating country mustard [rayaun]. Ben oil is used by watch-makers and jewellers, as it neither grows rancid nor freezes readily; also used by perfumers as an absorbent for some of the more delicate odours; bark yields coarse fibre [naur]; wood gives a dye [shauyam]; used as avenue [shaulay] tree. Timber very soft and useless, not even fit for fuel. There is a variety with red flowers, called red in vernaculars. Another species is aptera; native of palestine. Another is concanensis; very abundant on the hills in n. arcot district; like a variety of pterygosperma, but has much larger and rounder leaflets.——*Jungle moringa* (काननशेखर - kánanashékhara, San. - جنگلی منگے کا جھاڑ - janglí. mungekájhár, Hind.; ಕಾಡುನುಗ್ಗೆ - kádunugge, Can.; అడవిమునగ - adavimunaga, Tel.; കാട്ടുമുരിങ്ങ - káttumurinna, Mal.; காட்டுமுருங்கை - káttumurungai, Tam.). Title from similarity of pods. San. from (kánana, san. forest + shékhara, san. the plant, moringa). Hind. from (janglí, hind. wild + mungá, hind. moringa pterygosperma, gaert. + jhár, hind. tree); from similarity of pods. Can. from (kádu, can. wild + nugge, can. the moringa). Tel. from (adavi, tel. wild + munaga, tel. moringa). Mal. from (kátu, mal. forest + murinna, mal. the plant moringa). Tam. from (kádu, tam. forest + murungai, tam. moringa pterygosperma, gært.). San. also (kánanashigru), meaning wild + the plant, moringa. Tel. also (nallakáshana), meaning black + bauhinia acuminata, linn. Mal. also (punamurinna), meaning forest + the plant, moringa. Title otherwise Senna-leaved french honey-suckle. Botanically Ormocarpum sennoides, dec., leguminosæ [vricsham, 48]. Alias Hedysarum nallakashina, sennoides. Nallakashina from teloogoo. Shrub; young shoots, petioles, peduncles and calyx covered with glutinous hairs; leaves unequally pinnated; leaflets alternate, four to six pair, obovate, retuse; stamens equally diadelphous, five and five; legume two to five-jointed, covered with prickly warts; flowers yellow, fragrant; racemes short, axillary, flowering in the rainy season. Root stimulant and tonic; bark of root with gingelly [q.v.] oil makes liniment for lumbago.——*Wild moringa* (ಕಾಡುನುಗ್ಗೆ - kádunugge, Can.). Same as Poolah coral tree.

MORMASSY (मोडमस - módamasa, *Mahr.*; چلا - chillá, *Hind.*; కొండజుంగురు - kondadzunguru, *Tel.*; වල්වරික - valvarika, *Singh.*). Title from mahratta. Mahr. from (móda, mahr. pile + mashí, san. soft tumour); from curing piles. Tel. from (konda, tel. hill + dzungamu, tel. rivea hypocrateriformis, chois.). Hind. also (chilara), (bairí). Botanically Casearia esculenta, roxb., samydaceæ [vricsham, 60]. Alias Casearia championi, varians; Vareca zeylanica. Vareca from singhalese. Large shrub; leaves alternate, oblong, entire, smooth; flowers axillary, greenish-yellow; stamens eight. The root is from ½ to 2 inches in diameter, often very crooked, forming angular bends; it consists of a central red woody column, having seven or a less number of dark concentric rings; the bark is of a deep dull-red color, thick, and extremely hard, covered with a thin papery suber of an ochre-yellow color; the taste is astringent; the root yields to water an abundant dark reddish-brown extract; the powder has a cobweb-like character due to the length and silkiness of the liber cells. In western india the root has a great reputation as a remedy for hepatic enlargements and for piles; used here as a remedy for diabetes, for which disease it is considered specific. For tomentosa see Anavinga.

MORTT (ಮೊರ್ತ - mort, *Can.*). Todah village [mund, todah].

MOSAL* (शश - shasha, *San.*; ससा - sasá, *Mahr.*; ارنب - arnab, *Ar.*; خرگوش - khargosh, *Pers.* and *Hind.*; ಮೊಲ - mola, *Can.* and *Too.*; కుందేలు - kundélu, *Tel.*; ଖୁତୁରୋ - khuturo, *Oor.*; മുയൽ - muyal, *Mal.*; හාවා - haba, *Singh.*; முசல் - musal, *Tam.*). Title from tamul. San. from (shash, san. to jump); moves swiftly by leaps. Mahr. from sanscrit. Pers. from (khar, pers. donkey + gosh, pers. ear). Mal. from (muyal, tam. to be active). Hind. also (sussá), from sanscrit. Tam. also (muyal). Title otherwise Hare. Lepus nigricollis, leporidæ, rodentia, mammalia [sastanam, 19], of naturalists [jantoo]. Alias Lepus melanauchen. The habits of hares are well known; their timidity, watchfulness, increased by the situation of their eyes, which are so placed that they can see all round, and their great speed. The young are born, unlike the case of rabbits, with their eyes open. The hare lives in the open, and its lair or form is merely a slight depression in some secluded spot. It has been noticed that the hare always returns to its form, no matter to what distance it may have wandered or have been driven. There are no rabbits or burrowing hares in India. As the spots in the moon resemble the form of a hare, she is called in Sanscrit shashy [chundran]; but the Tamulians say that an old woman is seated in the moon spinning cotton. The Indian animal is much fleeter than in Europe. As food often dry; veidyans

prescribe it for incontinence of urine. The gall of this animal is used in medicine. Its blood is given to children suffering from cough.—" *a* " The species named at head is usually called the black-naped hare, and is the chief representative here of the family. Upper part grayish rufescent, slightly mottled with black; large nuchal spot extending to near the shoulders velvety black; ears grayish brown internally, dusky posteriorly, black at the base, and white fringed at the apex; lower neck yellowish, chin and abdomen white; tail grizzled black and yellowish-gray above, white beneath. The black-naped hare is found throughout the South of India, extending north to the Godavery river on the east, and on the west coast as high as the Tapty river and perhaps further. It is the hare of Ceylon also, and has been introduced into Java and the Mauritius. The black-naped hare of the Neilgherries is the same as that of the plains, only larger from the effect of climate.—" *b* " Akin is the common Indian hare of Upper india. Lepus ruficaudatus of naturalists. General hue rufescent mixed with blackish on the back and head; ears brownish anteriorly, white at the base and the tip brown; neck, breast, flanks and limbs, more or less dark sandy rufescent unmottled; nape pale sandy rufescent; tail rufous above, white beneath; upper lip, small eye mark, chin, throat, and lower parts, pure white. This hare is found southwards to the Godavery river.—" *c* " Indian species not here found are :—Craspedotis or large-eared hare, Hispidus or hispid hare, Hypsibius or mountain hare, Pallipes or pale-footed hare, Pamirensis or pamir hare, Peguensis or pegu hare, Stoliczkanus or stoliczka's hare, Tibetanus or thibet hare, Yarkandensis or yarkund hare.—" *d* " The rabbit is Lepus cuniculus, not here found.

MOSMOOSKY (अहिलेखन - ahilékhana, *San.*; चिराति - chiráti, *Mahr.*; اگمکی - agamaki, *Hind.*; ಮಡುತೊಂಡೆ - madutonde, *Can.*; ನುರ್ತೆಂಗಿ - nurtengi, *Too.*; నూగుదోస - núgudósa, *Tel.*; മുക്കാപ്പീര - mukkáppíra, *Mal.*; முசுமுசுக்கை - musumusukkai, *Tam.*). Title from tamul. San. from (ahi, san. snake + lékhana, san. mark); from vertical white stripes upon the fruit. Can. from (madu, can. hollow in river + tonde, can. cephalandra indica, naud.). Tel. from (núgu, tel. down + dósa, tel. cucumis melo, linn., var. utilissimus, roxb.). Mal. from (mukkál, mal. three-quarters + píra, mal. luffa). Tam. from (musumusu, tam. to feel a sensation like crawling of insects); from itching bristly fruit. San. also (ghantáli), meaning bell + row, from the vertical marks on the fruit resembling slits on bells worn by dancing girls. Tel. also (putribudama), meaning daughter + country cucumber, cucumis trigonus, roxb.; from being frequently given to children. Title otherwise Bryony, Bristly bryony, Globe-fruited bryony, Rough bryony. Botanically Mukia scabrella, arn., cucurbitaceæ [vricsham, 62]. Alias Bryonia althæoides, madraspatana, rottleri, scabra, scabrella; Cucumis madraspatanus. Plant hispid and scabrous; tendrils simple; leaves cordate, lobed or angled; flowers short-peduncled, male numerous, fascicled; female, one to four, small, campanulate, yellow; berry globular, size of a pea [calauyam], scarlet when ripe, marked with white vertical lines, smooth or sprinkled with a few bristly hairs; plant and fruit bitter; the fruits ripen in october to december. Gently aperient and stomachic, frequently given to children.

MOSQUE (مسجد - masjid, *Hind.*; మసీదు - masídu, *Tel.*; மசூதி - masúthi, *Tam.*). An English form derived through the Spanish mezquita. A Mahomedan church [musjid].

MOSQUITO (मशक - mashaka, *San.*; मच्छर - machhara, *Mahr.*; بق - bakk, *Ar.*; پشه - pashshah, *Pers.*; مچھر - maççhar, *Hind.* and *Dec.*; ناموك - námuk, *Malay*; ಸೊಳ್ಳೆ - solle, *Can.*; ಉಮಿಲ್ - umil, *Too.*; దోమ - dóma, *Tel.*; കൊതു - kotu, *Mal.*; මශක - mashaka, *Singh.*; கொசு - kosu, *Tam.*). Title from portuguese; diminutive of mosca, a fly. San. from (mash, san. to hum). Mahr. from (matsara, san. gnat). Ar. from (bakka, ar. to bring forth many children). Pers. from sanscrit. Hind. from (matsara, san. gnat). Mal. from tamul. Tam. from (ghósha, san. gnat). Malay also (agas). Tel. also (chíkatíga), meaning darkness + fly. The genus Culex, culicidæ, diptera, holometabola, insecta [poochy], of naturalists [jantoo]. Species known are Circumvolens, Regius, Laniger, Fuscanus. Abound near stagnant water. Have three stages of existence, in two of which they are a water insect, and in the third a winged insect. Preventatives are sprigs of worm-wood [absinth], the aloe [q.v.] indica [common indian aloe] suspended root upwards with an incision in each leaf so as to eject the aroma, branches of penny royal [poodeenah], pastilles containing sulphate of copper [toottam], &c.

MOTABAR (معتبر - mutabar, *Ar.*). From (ibr, ar. to regard). Trusted, confidential. Part of lacab; as Motabar jung, trusted in war [ism].

MOTRAH (موتھرا - mothrá, *Hind.*). Bog-spavin in horses [ashwarogam, ghorah].

MOTTAM (மொத்தம் - mottam, *Tam.*). Total. Mottafeisal, from (faisal, hind. settlement), a lump money assessment not liable to variation fixed on a village; prevails in Tanjore. Motta puttah is a lease of a whole village or district.

MOTURFA (محترفه - muhtarafah, *Hind.*). From (hirfah, ar. handicraft). Taxes formerly levied on the manufacturing and trading community, as loom tax, cooly tax, &c.; or on artizans, as weavers, cotton-cleaners, shepherds, goldsmiths, braziers, ironsmiths, carpenters, stone cutters, &c. See vol. I, 163.

MOTY (मुक्ता - múktá, *San.*; لولو - lúló, *Ar.*; مروارید - marwáríd, *Pers.*; موتی - motí, *Hind.*; ಮುತ್ತು - muttu, *Can.*; ముత్యము - mutyamu, *Tel.*; മുത്ത് - muttu, *Mal.*; முத்து - muttu, *Tam.*). Hind. and drav. from sanscrit. San. from (much, san. to set free) [mooch]. Homer's *ἕρματα τρίγληνα μορόεντα* are pearl earrings. Theophrastus and the Latin writers call a pearl *μαργαρίτης* and margarita, whence the French Marguerite, the Daisy; this is by error from Sanscrit (marakata), which is an emerald, not a pearl. Pearl [chippy]. A small, round or oval concretion, of bright translucent whiteness, found in the inside of the pearl oyster [sadaf] or mother-of-pearl fish, of great value when of the best quality. The most desirable color is a silver-like brightness, and with this quality the largest is of course the most valuable. The most beautiful shape is round; but the larger pearls have in very many cases the figure of a pear [amrood]. Seed pearls are those of smallest size. The pearl oyster is Meleagrina margaritifera, lamarck, of naturalists; alias avicula margaritifera, meleagrina, radiata; Margarita sinensis; Mytilus margaritiferus. Does not belong to same genus as edible oyster [auly] although in its internal structure it has a resemblance to it. It is found at a considerable depth at the bottom of the sea; is very coarse, and forms no part of the food of the natives. It resembles more the mussel tribe, more particularly as it has a byssus or cable by which it attaches itself to foreign substances or to others of its kind. It has no eyes. About one and a quarter inch from the rim of the shell is a pair of gills. The stomach is very small. It lives on minute algæ or weeds, animalcules, and shells called foraminifera. The native divers say that there are male and female pearl oysters. The large flat ones they call males, and those that are thick concave and vaulted they call females. The animal cannot detach the byssus from the rock to which it is attached, but it has the power of casting it off its own body and leaving it behind, in order to make another byssus, either on the same rock or on any other convenient place. It is highly tenacious of life. It can live even in brackish water, and in places so shallow that it must be exposed for three or four hours daily to the sun and other atmospheric influences. It will move about in search of food, if the locality in which it is originally placed is not rich in its natural supplies. It can live for a long time without forming a byssus. Taking the foregoing facts into account, there appears to be no reason why pearl oysters should not be translated from their native beds and made to colonize other parts of the sea. The young as well as the old are in spawn from March to September, and probably there is no stated period for spawning. The production of the pearl within some suppose to be an accretion within the animal of the superabundant matter called mother-of-pearl [sadaf] which coats over the inside of the shell; others consider it a disease of the fish, similar to bezoar [q.v.]. Tinnevelly has long been celebrated for its pearl fisheries. The Periplus states that pearls, *μαργαρίτης* or *πίνικον*, were exported in considerable quantity and of superior quality from *μούζιρις* and *νελκύνδα*. A pearl fishery, *πινικοῦ κολύμβησις*, was conducted in the neighbourhood of Korkay, in the kingdom of Paundyan, near the island of Epiodorus; the produce transported to the interior of the country, where muslin robes with pearl inwoven or *μαργαριτίδες σινδόνες* were fabricated. The modern fishery is very uncertain. This is due to the migrating habits of the pearl oyster. When there is any prospect of a fishery the custom is to send out vessels in different directions to test the localities [par], and from each vessel a few divers are let down, who bring up some thousands of oysters, which are heaped upon the shore and opened and examined. If the pearls found in each heap are found by appraisers to be sufficiently valuable it is publicly announced that there will be a fishery that year. Great crowds of people assemble on the coast on the day appointed for the commencement of the fishery; and traders come there with wares of all kinds. The fishery is conducted as a Government monopoly. When a vessel containing the divers reaches its place, the divers plunge into the sea, each with a heavy stone tied to his feet to make him sink rapidly, and furnished with a net in which to put his oysters, and having a rope tied round his body, the end of which is passed round a pully and held by some of the boatmen. On reaching the bottom the diver fills his net with oysters until his breath fails, when he pulls a string, and the signal being perceived he is hauled up. No artificial appliances of any kind are used to enable the men to stay under water for long periods. The diving over, the vessels return to the coast and discharge their cargoes, and the oysters are all thrown on to the ground and left for two or three days, at the end of which time they open. The pearls having been extracted from the shells and carefully washed, are placed in a metal receptacle containing some five or six colanders of graduated sizes, which are fitted one into another so as to leave a place between the bottoms of every two, and are pierced with varying sizes, that which has the largest holes being the topmost colander, and that which has the smallest the undermost. When dropped into colander No. 1,

all but the very finest pearls fall through to No. 2, and most of them pass to Nos. 3, 4 and 5, whilst the smallest of all the seeds are strained off into the receptacle at the bottom. When all have stayed in their proper colanders, they are classified and valued accordingly. The largest or those of the first class are the most valuable, and the value of any given pearl is appraised almost exclusively with reference to its size, and is held to be affected but little by its shape and lustre. The native belief is that pearls are produced by the pearl oyster drinking in the drops of rain; and that these and other precious stones [ratnam] cannot be formed, nor fish spawn, without rain [mazhay]. Vemana has the following:—చిప్పలోఁ బడ్డ చినుకు ముత్యంబాయె నీటఁబడ్డ చినుకు నీటఁగలసె ప్రాప్తముగలచోట ఫలమేల దప్పును— "The drop that falls into the oyster shell becomes a pearl; "while the drop that falls into the wave turns to water; if the "situation be suitable, the fruit shall not fail." There is a Tamul proverb:—சிப்பியிலே விழுந்த மழைத்துளி முத்தாகும்; அது போல, நல்லவர்க்குச் செய்த உதவி நிலைநிற்கும்— "A rain drop that falls on an oyster shell will become a pearl, "so a benefit conferred on the virtuous will endure." The Tamulians also suppose pearls to be formed in the elephant's tusk [dant], bamboo [q.v.], sugar-cane [q.v.], &c. Hakeems [q.v.] suppose powder of pearl to have virtues in weak eyes, palpitations, nervous tremors, atrabilious affections, and hæmorrhage. They hold, that when applied externally, while in its embryo state in the shell, it cures leprosy [cooshtam]. Veidyans [q.v.] give it calcined, in typhus fever [krishnadosham]. These prescriptions are for the affluent. Pearls are valued by two kinds of weights, real and nominal. By the former they are weighed, and by the latter sold. The real weight formerly used at Madras was the mangelin [q.v.] which was divided into sixteen parts, and is equal to six English grains. The nominal weight was the chow [q.v.], which was divided into sixty-four parts; and was deduced from the mangelin. Moty mahaul, the palace of pearls, is a common name for a palace. Moty is a common proper name [peyar].

MOULMEIN (مولمین - molmín, *Hind.*). The chief town of Tenasserim division of Lower burmah.——*Moulmein cedar* (صنوبر مولمین - sanobarimolmín, Hind.). Same as Toon.

MOUNTAIN EBONY (काञ्चन - káñchana, *San.*; ஆரா - árai, *Tam.*). San. from (káñch, san. to shine); beautiful tree. Tam. from (ár, tam. splendour). Botanically the Bauhinia genus, leguminosæ [vricsham, 48]. Trees or climbers found throughout tropics; leaves two-lobed; flowers showy; seeds albuminous; several yield dark colored heavy and durable timber. The species best known to the natives are shown below. Other species are:—cannabina, diphylla, macrostachya, richardiana, scandens. Term includes also one species of Dalbergia.——*Large mountain ebony* (चांबुळी - chámbúlí, Mahr.; ماهول - máhwal, Hind.; چمبولی - chambúlí, Dec.; అడ్డ - adda, Tel.; ଶିୟୋଳି - shiyóli, Oor.). Title from extent of branches. Title otherwise Chehoor, Mahwal Yaipy. Botanically Bauhinia [mountain ebony] vahlii, w. & a., leguminosæ [vricsham, 48]. Alias Bauhinia racemosa. One of the commonest species. Shrub, climbing to an immense extent, even 300 feet over highest trees; young shoots, petioles, peduncles, and tendrils covered with thick rusty-colored tomentum; leaves roundish, deeply cordate at the base, upper side nearly glabrous, under tomentose; leaflets oval, obtuse, united to a little above the middle, four to six-nerved; nerves covered with rusty tomentum; tendrils opposite, below the leaves, spiral; racemes terminal corymbiform; pedicels elongated, and with the calyx densely villous; calyx ovate, splitting to the base of the limb into two reflexed segments; petals densely clothed on the back with silky hairs, the three upper a little larger than the others; fertile stamens three, villous at the base; ovary densely villous, its stalk cohering on one side with the calyx tube; legumes pendulous, long, linear, compressed eight to twelve-seeded; flowers largish, white, gradually becoming cream-colored; flowers appear in march and april. Ripe seeds eaten raw, tasting like cashewnut [cashew]. Very useful wild plant; stems form natural ropes, used in the construction of huts; ropes are also made from the bark, boiled and beaten, but rot if kept too long in the water; leaves, often a foot each way, firm, tough, durable, sold in bazaars for plates, lining baskets, covering packets, thatching houses, &c.; a copious gum [gond] of little use. Wood porous, broad, irregularly broken concentric layers, alternating with red, juicy, bark-like tissue; the pith is cross-shaped.——*Malabar mountain ebony* (कोरळ - kórala, Mahr.; املی - amlí, Hind.; ಬಸವನಪಾದ - basavanapáda, Can.; పులిచింత - pulichinta, Tel.; ଗଉରୁବଟି - gaurubati, Oor.; புளியாரை - puliyárai, Tam.). Hind. from (amla, san. sour). Can. from (basava, can. an ox + páda, san. foot). Tel. from (pulla, tel. sour + chinta, tel. tamarind tree, tamarindus indica, linn.), from taste of leaves [sour auray]. Tam. from (puli, tam. sour + árai, tam. the tree, bauhinia). Hind. also (amlosa). Can. also (cheppura). Tel. also (pulladonda), meaning sour + cephalandra indica, naud. Title otherwise Cheppoora, Sour covay, Sour mountain ebony, Sour tamarind, St. Thomas' tree. Botanically Bauhinia [mountain ebony] malabarica, roxb., leguminosæ [vricsham, 48]. Large tree; leaves transversely broad-oval, cordate at the base; leaflets rounded, united far above the middle, four-nerved, parallel; calyx funnel-shaped, regular, five-cleft, pubescent; corolla regular; petals spathulate; stamens ten, all fertile, very slightly monadelphous at the base, alternately shorter; racemes axillary, corymbiform, almost sessile; legume long-stalked, linear, slightly falcate, marked longitudinally with waved lines; flowers white; flowering in october and november. Leaves very acrid. Wood moderately hard; numerous narrow wavy white, concentric bands of softer tissue alternate with bands of harder and red-colored wood of equal width, in which the numerous, fine, uniform and equidistant medullary rays are distinctly visible.——*Nirpa mountain ebony* (کندلا - kandlá, Hind.; నిర్ప - nirpa, Tel.). Hind. also (kanall); (kanlas); (kúayral); (semla). Title otherwise Semla gum [q.v.] tree. Botanically Bauhinia [mountain ebony] retusa, ham., leguminosæ [vricsham, 48.] Middling sized tree; leaves cordate at the base, emarginate or retuse at the apex, coriaceous, glabrous; leaflets almost connected to the top, five-nerved, broadly semi-ovate; panicle lax, terminal; petals ovate, unguiculate; anther-bearing stamens three, the rest sterile; flowers small, pale yellow, purple-dotted; flowering nearly all the year. Gives a clear gum [gond], resembling gum arabic [q.v.]; used medicinally. Wood reddish-white with irregularly shaped, darker masses near the centre, hard.——*Purple mountain ebony* (वनराजा - vanarájá, San.; देवकांचन - dévakánchana, Mahr.; جنگہورا - jinghorá, Hind.; ಕಂಚಿವಾಳ - kanchivála, Can.; పెద్దఆరె - peddaáre, Tel.; මෛල - maila, Singh.; நீலத்திருவாத்தி - nílattiruvátti, Tam.). Title from color of flowers. San. from (vana, san. forest + rájá, san. king). Mahr. from (déva, san. god + kánchana, san. bauhinia acuminata, linn.). Tel. from (pedda, tel. large + áre, tel. bauhinia racemosa, lam.). Tam. from (níla, blue + tiru, tam. holy + átti, tam. bauhinia racemosa, lam.). Can. also (sárulmara); (aupta). Tel. also (bódantachettu); (adaviavishi), meaning forest + sesbania grandiflora, pers.; (kánchanamu), meaning gold [champak, toddaly, white mountain ebony]. Tam. also (periyavátti), meaning large mountain ebony; (shegappumandárai), meaning red + bauhinia, from rose-colored flowers. Title otherwise Large mountain ebony, Shaurool autty, Wild sesban. Botanically Bauhinia [mountain ebony] purpurea, linn., leguminosæ [vricsham, 48]. Alias Bauhinia coromandeliana, triandra. Tree; leaves roundish, cordate at the base, coriaceous, glabrous; leaflets oval, obtuse, parallel, united to the middle, the free parts sometimes overlapping, four five-nerved; racemes terminal, panicled; calyx usually cleft to the base of the limb into two reflexed segments, the one emarginate, the other three-toothed, sometimes all cohering at the apex and spathaceous; petals oblong-lanceolate, attenuated at the base; fertile stamens three, sometimes four, long, ascending; legume long, linear, six to twelve-seeded; flowers very large, deep rose-color; flowering in the cold season. A large stout tree, 20–30 feet; found in jungles; cultivated in gardens. Medicinally bark is astringent, root carminative, flowers laxative. Flowers used as pot-herb [keeray] in curries [q.v.], also made into pickles; leaves given to cattle as fodder. Fibre from bark; gives one of the Sem gums [q.v.]. Wood pinkish-white, turning dark-brown on exposure, moderately hard, serviceable.——*Saffron mountain ebony* (पिवालाकांचन - piválákánchana, Mahr.). From pale sulphur flower. Same as Wild mountain ebony.——*Small-flowered mountain ebony* (वनराजा - vanarájá, San.; अपटा - apatá, Mahr.; کچنار - kachnár, Hind.; آرے کا جہاڑ - árekájhár, Dec.; ఆరె - áre, Tel.; ଅମ୍ଭୋଟ - ambhóta, Oor.; මයිල - mayila, Singh.; ஆத்தி - átti, Tam.). San. from (vana, san. forest + rájá, sán. king). Hind. means bauhinia acuminata, linn. Dec. from (árai, tam. bauhinia + jhár, hind. tree). Tam. from (ár, tam. brightness), shining tree [west-indian sesban]. San. also (shvétakáñchana), meaning white bauhinia. Tel. also (adaviavishi), meaning forest + tree, sesbania grandiflora, pers.; (yépi) [yaipy]; (ápa) by corruption. Tam. also (ár), meaning beautiful tree; (arikkámaram); (arinár); (árchi), meaning shining tree; cf. coromandel gendarussa. Title otherwise Autty, Great-leaved mountain ebony, Vana rajah, Wild sesban. Botanically Bauhinia [mountain ebony] racemosa, lam., leguminosæ [vricsham, 48]. Alias Bauhinia parviflora, stricta; Piliostigma racemosa. One of the commonest species. Small crooked very ramous tree, unarmed, bushy; branchlets drooping; leaves cordate at the base, upper side glabrous, under villous, or pubescent, or nearly glabrous; leaflets roundish or broadly ovate, united to about the midde, three-nerved; racemes solitary, terminal or leaf-opposed, leafless, much longer than the leaves; flowers scattered, small, white; calyx spathaceous, at length reflexed, five-toothed, pubescent; petals linear, lanceolate, slightly hairy outside; stamens all fertile, united at the base; filaments and anthers bearded; style none; stigma flat sessile; legumes linear, straightish or curved, scarcely dehiscent, many-seeded; flowering in may and june. Bark when stripped off, is of a reddish brown color. Gum [gond] used medicinally, one of the Sem gums [q.v.]. Leaves eaten by elephants [q.v.] and buffaloes [khoolgah]; ripe seeds eaten by the people raw, tasting like cashewnuts [cashew]. The fibre [naur] from bark makes very strong ropes, but it is not durable and rots if kept constantly in water; from bark, matchlockmen make their matches [coomby], burning long and slowly without any substance being mixed with it; leaves sometimes used for making native cigars [cheroot]. Wood light-brown, hard, with irregularly shaped

masses of darker-colored and harder wood near the centre; good, but not used.——*Snake-like mountain ebony* (नागवल्ली - nágavallí, San.). Title from peculiar foldings. San. means snake creeper. Title otherwise Snake-charm, Snake-climber. Botanically Bauhinia [mountain ebony] anguina, roxb., leguminosæ [vricsham, 48]. Climbing; leaves cordate, glabrous; leaflets three-nerved, half-ovate, acuminated, united on the young plants to the middle, on the older ones to the apex; tendrils simple or bifid; racemes long, simple, many-flowered, forming a terminal panicle; calyx cup-shaped, obtusely five-lobed; petals obovate; stamens three, all fertile; legume oblong, glabrous, one to two-seeded; flowers very small, white; flowering in the rainy season. Large climber; malabar; very destructive to trees; stems are bent generally in alternate folds and with a straight thick margin. Bark used in rope-making. Wood soft and porous.——*Variegated mountain ebony* (कोविदार - kóvidára, San.; कांचन - kánchana, Mahr.; तांबडेमन्दार - támbadémandára, Conc.; سونا - soná, Hind.; ಬಿಳಿಕಂಚವಾಳ - bilikanchivála, Can.; దేవకాంచనము - dévakánchanamu, Tel.; ବୋରର - borara, Oor.; ചുവന്നമന്ദാരം - chuvannamandáram, Mal.; செம்மந்தாரை - shemmandárai, Tam.). Title from color of flowers. San. from (ku, san. earth + vidri, san. to split) [indian hounds' berry]. Mahr. from (káñch, san. to shine). Can. from (bili, can. white + kanchivála, can. the tree). Tel. from (déva, san. divine + kánchanamu, tel. bauhinia acuminata, linn.). Mal. from (chuvanna, mal. red + mandára, san. bauhinia). Tam. from (shem, tam. red + mandárai, tam. bauhinia acuminata, linn.). San. also (káñchanára), meaning splendour giving; (yugapatra), meaning double-leaved, from two-lobed leaf; (kuddála), meaning earth-splitting; (támrapushpi), meaning copper-flowered. Mahr. also (raktakánchana), meaning red bauhinia. Hind. also (kanchár), meaning bauhinia. Can. also (kempumandára), meaning red + bauhinia; (karalbogi); (irkumbalithumara); (kanchivála). Tel. also (peddaáre), meaning large + bauhinia racemosa, lamk. Mal. also (unnu) [karanj]. Tam. also (shegappumandárai), meaning red + mandauray tree; (vellaippúvátti), meaning white + flower + bauhinia. Title otherwise Variegated St. Thomas' tree. Botanically Bauhinia [mountain ebony] variegata, linn., leguminosæ [vricsham, 48]. Alias Bauhinia candida, purpurea. One of the commonest species. Tree, 20–30 feet; unarmed; leaves roundish, upper side glabrous, under when young villous, cordate at the base; leaflets oval, obtuse, five-nerved, united far beyond the middle; petals oblong, nearly sessile, the upper one somewhat larger and on a rather longer claw than the others; fertile stamens five, all shortly united at the base; racemes axillary and terminal; calyx spathaceous, five-toothed at the apex; legumes straight five to twelve-seeded. Flower larger; for color see below; plant, becomes one entire mass blossom, the large handsome flowers in february-march; seeds ripen two months later; indigenous having a strong resemblance to those of a pelargonium or geranium; flowers in many jungles, also extensively planted in gardens, &c. The bark is grey, tolerably smooth, compact, fracture granular, reddish brown, the external surface is covered thickly with small elliptic warts of a darker color than the rest of the bark; the internal surface is white; the taste is feebly astringent. Gives a brown colored gum [gond], one of the sem gums [q.v.]; swells in water, very little only being soluble. Bark medicinally tonic in fevers; dried buds astringent in diarrhœa and worms. Buds eaten as vegetables when prepared with animal food. Bark is used for tanning [chamrah] and dyeing [shauyam]; bark for making rope; leaves used for packing; oil from seeds. Wood grey, moderately hard, with irregular masses of darker and harder wood in the centre. Two botanical varieties:—Purpurascens, four petals reddish and varied with purple, fifth variegated with purple brown and yellow, malabar, coromandel; Candida, four petals whitish fifth variegated on inner side with yellow and green.——*White mountain ebony* (काञ्चन - káñchana, San.; धवेमन्दारु - dhavémandáru, Conc.; كچنار - kachnár, Hind.; كچنال - kachnál, Dec.; ಬಿಳೇಮಂದಾರ - bilémandára, Can.; కాంచనము - káshanamu, Tel.; വെള്ളമന്ദാരം - vellamandáram, Mal.; வெள்ளைமந்தாரை - vellaimandárai, Tam.). Title from color of flowers. San. from (káñch, mal. to shine); beautiful tree [champak, purple mountain ebony, toddaly]. Conc. from (dhava, mahr. white + mandáru, mahr. bauhinia). Hind. and dec. from sanscrit. Can. from (bile, can. white + mandára, san. bauhinia). Tel. from sanscrit. Mal. from (vella, mal. white + mandára, san. bauhinia). Tam. from (vellai, tam. white + mandárai, tam. the tree). Tel. also (dévakánchanamu), meaning divine + the tree. Tam. also (kokkumandárai), meaning crane + the plant; (kokkiragumandárai), meaning crane + feather + the plant, from acuminate lobes of leaves; (mandárai), meaning beautiful bauhinia. Title otherwise Crane's feather, Taper-pointed mountain ebony. Botanically Bauhinia [mountain ebony] acuminata, linn., leguminosæ [vricsham, 48]. Alias Bauhinia candida. Large erect shrub; leaves cordate at the base, young ones slightly pubescent beneath; leaflets ovate, acute or acuminated, united to above the middle, parallel, four-nerved; calyx spathaceous, splitting at the apex into five setaceous teeth; stamens ten, all fertile and united at the base, alternately shorter; racemes solitary, leaf-opposed, or terminal, few-flowered; legumes eight to twelve-seeded, obliquely linear-lanceolate, the seed-bearing suture with three prominent ribs; flowers large, pure white; flowering all the year. Flowers offered at shrine of shiva [q.v.]. Flowers rubbed up with pepper [q.v.] applied to forehead in headache. Gives an oil.——*Wild mountain ebony* (फल्गु - p'halgu, San.; पिवळाकांचन - piválákánchana, Mahr.; काडरुम्बाडिरुकु - kádarumbádirúku, Conc.; كچنار - kachnár, Hind.; ಕಾಡತ್ತಿ - kádatti, Can.; ಕಾಟರ್ತಿಮರ - kátartimara, Too.; అడవిమందారము - adavimandáramu, Tel.; കാഞ്ചനപ്പൂ - káñchanappú, Mal.; පෙතම් - petam, Singh.; திருவாத்தி - tiruvátti, Tam.). San. from (p'hal, san. to split). Mahr. from (pivalá, mahr. yellow + káñchana, san. bauhinia); from pale sulphur flower. Can. from (kádu, can. wild + atti, can. the tree, ficus glomerata, miq.). Tel. from (adavi, tel. forest + mandáramu, tel. tree, bauhinia). Mal. from (káñchana, san. gold + pú, mal. flower). Tam. from (tiru, tam. sacred + átti, tam. bauhinia racemosa, lamk.), used in worship. San. also (úshmadughá), meaning heat giving. Can. also (vanasampige), meaning forest + michelia champaca, linn.; (kallatti), meaning stone + fig tree. Tel. also (kánchini), meaning gold-like tree. Mal. also (káttátti), meaning wild bauhinia. Singh. also (kahapetam), meaning curcuma longa, roxb. + the plant. Tam. also (káttátti), meaning wild bauhinia; (káttumandárai), meaning forest + bauhinia acuminata, linn. Title otherwise Downy mountain ebony, Golden flower, Holy mountain ebony, Saffron mountain ebony, St. Thomas' tree, Tomentose mountain ebony, Yellow mountain ebony, Wild champak. Botanically Bauhinia [mountain ebony] tomentosa, linn., leguminosæ [vricsham, 48]. Upright growing shrub, 6 to 12 feet; ash colored smooth bark; one of the commonest species, unarmed; leaves ovate or roundish at the base, under surface villous as well as the petioles, branches, peduncles and calyx; leaflets connected beyond the middle, oval, obtuse, three-nerved; peduncles two-flowered, leaf-opposed; pedicels each with three bracteas at the base; calyx spathaceous, five-toothed; petals oval; stamens all fertile; legumes flat, lanceolate, five to six-seeded. Flowers large, pale sulphur, drooping; one petal usually with a dark purple spot inside; flowering in july, august; all the tender part except the upper surface of the leaves, covered with a soft down; common on hills on eastern side of presidency, rarer on western; cultivated in gardens and about native temples; a native of ceylon, malabar, and coromandel. Seeds are medicinally tonic and aphrodisiac; seeds made into a paste with vinegar [candy], applied to poisned wounds; young leaves in powder given in dysentery; decoction of root of bark given in inflamed liver. Seeds are eaten. With the tough stringy fibres [naur] of the small branches a coarse rope is prepared; gives an oil. Wood very tough, heart often quite black.——*Yellow mountain ebony* (ಹಸರುಗುನ್ನಿ - hasarugunni, Can.; పట్సరి - pattsári, Tel.; പിയങ്ങാനി - piyangáni, Mal.; பச்செலைமரம் - paççelaimaram, Tam.). Title from color of wood. Can. from (hasaru, can. green + gunni, can. the tree, so called). Tel. from (pattsa, tel. yellow + áre, tel. bauhinia racemosa, lam.). Tam. from (paççai, tam. green + ilai, tam. leaf + maram, tam. tree). Can. also (paççári). Tel. also (porilasápara), meaning layer + tree, so called; (jálári), meaning net + bauhinia racemosa, lam.; (tellapattsári), meaning white variety. Title otherwise Jaulary, Pattsaury. Botanically Dalbergia [yooga pattricay] paniculata, roxb., leguminosæ [vricsham, 48]. Large tree; leaflets five to six pair, alternate, obovate-oblong or oval, usually emarginate, glabrous; petioles and peduncles pubescent; panicles terminal or axillary, compound; calyx pubescent or hairy, five-cleft, lowest segment long and narrow; vexillum without callosities; stamens ten, equally diadelphous; legume lanceolate, one to two-seeded; flowers small, bluish-white; flowering in the hot season; plains and subalpine dry forests throughout presidency. Gives a gum [gond]. Wood yellowish or greyish-white, soft, perishable; no heartwood; structure is remarkable, broad concentric masses of wood alternate with narrow, dark-colored belts of a fibrous substance, resembling the inner bark; planks cut out of old trees fall to pieces; wood not durable, subject to attacks of insects; but used by natives for building and other purposes.

MOUSE DEER (गिरिकामृग - girikámriga, *San.*; पिसोरा - pisórá, *Mahr.*; پسوري - pisúri, *Hind.*; پلندوق - pálandok, *Malay*; ಹುಲ್ಲೆ - hulle, *Can.*; కురుపంది - kurupandi, *Tel.*; ଗଣ୍ଡଵ - gandava, *Oor.*; ചെരുമാൻ - cherumáu, *Mal.*; මීමින්නා - miminná, *Singh.*; சிறுப்புள்ளிமான் - shiruppullimán, *Tam.*). Title from its size. San. from (giriká, san. mouse + mriga, san. deer). Tel. from (kuru, tel. small + pandi, tel. pig). Mal. from (cheru, mal. small + mán, mal. deer). Tam. from (shiru, tam. small + pulli, tam. spot + mán, tam. deer). Tel. also (jarinipandi); (podapandi), meaning spotted pig. Singh. also (valmiyá), meaning wild + deer or rat. Memimna indica, moschidæ, ruminantia, mammalia [sastanam, 25], of naturalists [jantoo]. Generic name from singhalese. Alias Memimna edwardsii; Moschus memimna; Tragulus memimna. The smallest of the deer tribe [mrigam]. Above olivaceous mixed with yellow gray; white below; sides of the body with yellowish white lines formed of interrupted spots, the upper rows of which are joined with those of the opposite side by some transverse spots; ears reddish-brown. Length of body about 22 to 23 inches; tail 1¼; height 10 to 12 inches; weight 5 to 6 lb. Much more abundant

in the south of India than towards the north. Abounds in the forests of Malabar, and also occurs in some of the denser portions of the woods of the Eastern ghauts [q.v.]. The animal walks on the tips of its hoofs, which gives the legs a rigid appearance, and the natives say that it has no knee-joint, and that in order to rest it is obliged to lean against a tree [elephant]. Easily domesticated. Compare Hog-deer, under head Cheetal.

MOWDA (موده - maudá, *Hind.*). Same as Chironjee.

MOWDOOD (مودود - maudúd, *Hind.*). From (vadda, ar. to love). Endeared. Suffixed to an alam forms a lacab; as Mahomed mowdood, endeared to mahomed [ism].

MOWLAH (مولا - maulá, *Hind.*). From (vilá, ar. to befriend). Lord. Prefixed to an alam forms a lacab; as Mowlah hoossain, the lord [ism].——*Mowlauna* (مولانا - mauláná, Hind.). From (maulá, ar. lord + ná, ar. possessive suffix). The highest title given to the learned amongst Mahomedans.——*Mowlvy* (مولوی - maulaví, Hind.). From (maulá, ar. a lord). Learned; a teacher of Arabic; an expounder of Mahomedan law. Used as a prefix to the names of learned men and professors of Mahomedan law and literature. Cf. Pundit.——*Moollah* (ملا - mullá, Hind.). Corruption of mowlah [q.v.]. The same as Mowlvy [q.v.]. Mahomedan learned man, judge, school-master who also has charge of the village mosque [musjid]. Prefixed to names of learned men; as Moollah abd oor rasool, prefix + lacab [ism].

MOWLOOD (مولود - maulúd, *Hind.*). From (valada, ar. born). Anniversary of a birth.——*Mowlood shareef* (مولود شریف - maulúdisharíf, Hind.). From (above + sharíf, ar. noble). Anniversary of the birth of the prophet.——*Mowloody* (مولودی - maulúdí, Hind.). From (maulúd, ar. born). An era [saca] instituted by Tippoo, reckoned from 1,200 hijra [q.v.], when a special faith was founded; did not survive.

MOWROOSY (موروسی - maurúsí, *Hind.*). From (irs, ar. to inherit). Hereditary [mirass].

MOWRY (موری - maurí, *Hind.*). Anise [q. v.] seed.

MOWZA (موضع - mauza, *Hind.*; మౌజె - mavuje, *Tel.*). From (vaza, ar. settlement). A village, understanding by that term one or more clusters of habitations and all the lands belonging to their proprietary inhabitants. The lands may sometimes have outlying portions intermixed with those of other villages.

MOY (مائی - mái, *Hind.*). Gall [mauchicoy].——*Burree moy* (بڑی مائی - barímái, Hind.; జమ్మికాయ - dzammikáya, Tel.; வன்னிக்காய் - vannikkáy, Tam.). Same as Manna jhow.——*Choti moy* (چھوٹی مائیں - chhótimáin, Hind.; چھوٹی مائی - chhótimáí, Dec.). Same as Red jhow.

MOY (మోయిచెట్టు - móyichettu, *Tel.*). Botanically Eugenia [jamboo] alternifolia, wight., myrtaceæ [vricsham, 56]. Alias Syzygium alternifolium. Leaves alternate, suborbicular, thick, and coriaceous, feather-nerved; calyx truncated, entire; petals calyptriated; cymes lateral, longish-peduncled, corymbose, dense, sometimes congested near the apex of year-old branches. Tree common in kurnool, cuddapah and north arcot; not on west coast; timber used.

MOY (மொய் - moy, *Tam.*). Elephant [aunay, cary, elephant, gajam, hasty].——*Moyaur* (ಮೋಯಾರು - móyáru, Can.; மொய் யாறு - moyyáru, Tam.). From (above + áru, tam. river). Can. also (badigihole), meaning north + river. River; Neilgherry dist., Todanaud division. Rises in Macoorty peak in lat. 11° 22′ N.; long. 76° 33′ E. and receiving the drainage waters of Pitchal and Pycarrah valleys, flows past Pycarrah and Nediwuttam, descending the hills at the north-west angle by a fall near Nediwuttam. After reaching plains it turns due east and flowing round base of Neilgherries on north and east faces, joins Bhawauny in lat. 11° 28′; long. 77° 08′ near Danaicken cottah.——*Moygarashoory* (முயகாசூரி - muyagarasúri, Tam.). From (above + kara, san. trunk + shúrí, san. heroine); heroine with the strength of an elephant's trunk in her arm. One of the seven matrons [mautah] in the temple of Ayenaur [ayen].

MOYEN (معین - muaiyan, *Hind.*). From (ána, ar. to keep a sharp look out). Fixed. Moyen zaubitah is the sanctioned establishment of an office, as opposed to temporary establishment [angaumy sibbundy].

MOZHY (மொழி - mozhi, *Tam.*). Word [shol].——*Mozhipeyarpp* (மொழிப்பெயர்ப்பு - mozhippeyarppu, Tam.). Means word + change. Translation [tarjooma].—"*a*" For the translation of English scientific terms into the vernaculars the following may be considered useful rules. In ordinary translation, either give a simple dictionary vernacular equivalent, or compound a vernacular word by uniting roots or a root and a particle. In a compound English word translate and join its several members. If the word cannot be satisfactorily rendered by the vernacular seek a term in the Sanscrit, with the same procedure. In an English compound if there be for any member of the compound a satisfactory Tamul word, combine it with the Sanscrit. Finding no term in the Tamul or Sanscrit transfer the English in the following way. Write the word preserving its accent and the sounds of its radical portion and terminate it in ordinary Tamul form. Modify it, when requisite, by the addition of an appropriate particle. In compounds, if there be for any member as satisfactory Tamul word, combine it with the English word. The following are examples. Tamul:—dome, தூபி; anthelmintic, கிருமிகொல்லி; tin-stone, தகரக்கல். Sanscrit:—febrifuge, சுரக்கினம்; forearm, சயம்; atmospheric electricity, நபமின்சாரம். English:—ether, ஈதர்; gum acacia, அசசிப்பிசின்.—"*b*" As regards grammar [lacshanam], the following can be observed. Introduce each term as a noun; make it as brief as possible consistent with the preservation of its radical sounds and accent, and so end it in some ordinary form that it may easily turn to the adjective or verb.—"*c*" The following rules are general. Among several terms designating the same thing, choose the one which will enter the Tamul most easily. As far as practicable, differentiate the term from any pre-existing Tamul word. Transpose syllables, when so doing favors cadence and termination. Chemical terminations show special difficulty. Some may be rendered thus. The first two forms are the English and Latin, respectively:—Ate, as, அசு; etted, eus, எற்று; id, idum, இரம்; ic, icum, இக்; ite, is, இசு; ous, osum, ஒசு. Similarly:—ated or ata, க; bi or deut, துவி; gen, த; hyper or super, அதி; hypo or sub, அத; per, பிர; prot, புர; sesqui, சார்த்த [bhaushay].

MRIDANGAM (मृदङ्ग - mridanga, *San.*; مردنگ - mirdang, *Hind.*). From (mrid, san. to strike). Same as Maddalam; double drum [paray, sangeetam].

MRIG (मृग् - mrig, *San.*). To pursue.——*Maurgaly* (மார்கழி - márgazhi, Tam.). The ninth tamul solar month [mausam].——*Maurgaly tirmanjanam* (மார்கழித்திருமஞ்சனம் - margazhittirumañjanam, Tam.). Means ninth Tamul solar month + ablution, of idol. Same as Ardrah darshanam.——*Maurgam* (മാർഗ്ഗം - márgam, Mal.). Means way; hence religion.——*Maurga cauran* (മാർഗ്ഗക്കാരൻ - márgakkár, Mal.). From (márgam, mal. way + kár, mal. doer). Literally, follower of law. So one of foreign religion, as Christian or Mahomedan, mostly the latter or Moplahs [q.v.]. But distinguish from Marcauyar [q.v.].——*Mrigam* (मृग - mriga, San.; هرن - haran, Hind.; ಜಿಂಕೆ - jinke, Can.; ఉరె - ure, Too.; జింక - jinka, Tel.; മാൻ - mán, Mal.; මුව - múva, Singh.; மான் - mán, Tam.). Sanfrom (mrig, san. to pursue). Hind. from (harina, san. deer). Tel. from (chimmu, tel. to butt). Singh. from sanscrit. Tam. from (má, tam. animal) [maud, maun]. Title otherwise Deer.—"*a*" Equivalent to family Cervidæ, ruminantia, mammalia [sastanam, 24], of naturalists [jantoo]. Deer are remarkable for their fine horns [sing], or osseous prominences, which are shed and renewed annually, more or less contemporaneously with the renewal of the hair, and are called antlers. In the reindeer alone of all the family the females possess horns normally, though very rarely old and barren females of other species have been known to assume them. The feet touch the ground only at the extremity of the two principal toes, and there are usually two rudimentary toes with small hoofs at the back of the foot. The end of the muzzle is bare in almost all deer, and is sometimes called the muffle. When the horns first appear they are covered with a hairy skin, commonly called the velvet, which becomes dry and is thrown off; and at each successive renewal of the horns, they become larger and more developed, getting additional branches in some, till excessive age, when they diminish at each renewal. In their early condition the horns are soft and yielding. As development goes on, progressive ossification takes place. The envelopes shrivel up and fall off, and the animals perfect the desquamation by rubbing their horns against trees, technically called burnishing. The rutting season immediately follows the development of the antlers. The sub-family Cervinæ comprises the true stags; the Red-deer of Scotland is the type of this group. The Sub-family Rusinæ have one basal tine and no median tine; summit more or less branched, generally with only one subterminal tine; muffle high; this group, which includes the Samber [q.v.], the spotted deer [cheetal], and the Jungle sheep [q.v.], is peculiar to the tropical and sub-tropical, regions of Asia and its archipelago. There is a Tamul proverb:—மான் கண்ணிலும் அழகு விசைவிலும் விரைவு—"The deer is beautiful in eye, and rapid in speed."—"*b*" Mrigam stands also for the genus Cirrhina, cyprininæ, cyprinidæ, physostomi, teleostei, pisces [matsyam, 39], of naturalists [jantoo]. From beauty of color. Large handsome fish, of importance as food. They are long in shape, elegantly formed, and of a brilliant golden, bronze, or silvery appearance. The lips are thin and clean, neither of them being fringed; there is a small knob on the centre of the lower jaw, at the junction of the two mandibular bones. The best known species are:—cirrhosa, reba.—"*c*" For Hindoo constellation so called see Mrigashiras under Nacshatram.——*Mrigsaul* (مرگ سال - mrigsál, Hind.). From (mirg, hind. deer); from the year commencing in the month of Ashaudham [maunam, mausam] or june when the sun is in mriga shiram [caurtey]. The fusly [q.v.] year [saul] so called in the north. See vol. I, 609.

M.R.RY. (महाराजराजश्री - mahárájarájashri, *San.*). From (mahá, san. great + rájá, san. king + rájá, san. king + shrí, san. prosperity); royal majesty of the great king. Title of address among Hindoos. Compare Sahib with mahomedans; and Mr. in english. See vol. I (104).

MUCKNA (مقنع - makna, *Hind.*). A veil worn by Mahomedan females over the head and reaching almost to the ground [boorca].

MUCTA (مقطع - makta, *Hind.*). From (kita, ar. to cut). Fixed. A contract. A special form of assessment fixed on the village as a whole, in vogue in the early period of Revenue settlement. See vol. I, 112.

MUD BAY (മഞ്ചിറ - mañchira, *Mal.*). From (man, mal. mud + chira, mal. reservoir). Otherwise Mud bank. Found at Northern collam near Quilandy, at Calicut, at Naracal in Cochin state, at Alleppey in Travancore. These are caused by subterranean passages communicating with rivers and back-waters [cauyal]; such become more active after heavy rains, particularly at the commencement of the monsoon [q.v.], and carry off the accumulating water and with it vast quantities of soft mud. The mud is unctuous and sticky; possibly indicating subjacent lignitiferous deposits.

MUDDY (మద్ది - maddi, *Tel.*). Same as Dyeing mulberry.——*Black muddy* (నల్లమద్ది - nallamaddi, Tel.). Same as Common saul. ——*Maddikera* (మద్దికెర - maddikera, Tel.). From (maddi, tel. a tree, terminalia arjuna, bedd. + kere, can. tank). Town; Railway station; Kurnool dist., Putticondah tal.; pop. 7,504; acres 22,591; lat. 15° 15′; long. 77° 28′; from Kurnool S.W. 58 miles; from Putticondah S.S.W. 12 miles. At foot of a granite [caroom cull] hill at source of the Hindry 2½ miles east of Nuncherla railway station. Most elevated town in the district. Former seat of a powerful poligar [q.v.]. Remains of poligar hill-fortress and old temple. Saltpetre [shorah] manufactories. Roman catholic chapel. Weekly market on Friday.

MUGHRIB (مغرب - maghrib, *Hind.*). From (gharaba, ar. to set). West.——*Mughriby* (مغربی - maghrabí, Hind.). Westerns, i.e., western Arabs, or Moors of Morocco.

MUJNOON (مجنون - majnún, *Pers.*). From (jinn, ar. demon). Insane. Name of a celebrated eastern lover, whose amours are the subject of many poems. Now applied to any true lover. There is a Hindostany proverb :—لیلی کو مجنون کے آنکھون سے دیکھو—"One must look at Leilee [q.v.], with Mujnoon's eyes;" for she is said to have been plain. Mahomedan proper name.

MUKKY (மக்கி - makki, *Tam.*). Tam. means whitish clay, from soil where the tree grows. Same as Gamboge [q.v.].

MUL (मल् - mal, *San.*; മൽ - mal, *Mal.*). To hold; to be strong.——*Malhary* (ಮಲ್ಹರಿ - malhari, Can.). From (malla, san. boxer, the asura, so called + ari, san. enemy). Krishnan [q.v.] or Vishnoo [q.v.] or Shiva [q.v.]. Madhwa second name. Familiarly Mullaury [peyar].——*Molla* (మొల్ల - molla, Tel.). Means a kind of jasmine, multiflorum or pubescens. A poetess of Coommara or potmaker caste. She lived in Padoogoopaud of the Nellore talook, and translated the Ramayanam [q.v.] into Teloogoo. This work is called after her name and known as Molla ramayanam.——*Mulla* (ಮಲ್ಲ - malla, Can.). Means a wrestler; title to certain later Chalookya [q.v.] kings as well as Concany [q.v.] bramins. Hindoo third name [peyar].——*Mullagashetty* (மல்லகசெட்டி - mallagasetti, Tam.). From (malla, san. athlete + shetti, tam. wrestler caste). Wrestler and boxer. Name of a minor deity.——*Mullam* (மல்லம் - mallam, Tam.). Strength.——*Mullammah* (மல்லம்மா - mallammá, Tam.). From (malla, san. athlete + ammá, tam. mother). Village deity.——*Mullappan* (மல்லப்பன் - mallappan, Tam.). From (malla, san. boxer + appan, tam. father, titular affix). Hindoo 2nd or pers. name [peyar].——*Mullarashtram* (मल्लराष्ट्र - mallaráshtra, San.). From (malla, san. wrestler + ráshtra, san. kingdom). Pooraunic name for Mahratta [q.v.] country. ——*Mulliah* (ಮಲ್ಲಯ್ಯ - mallayya, Can.). From (malla, can. a wrestler + ayya, can. father). Hindoo third name [peyar]. ——*Mullicah* (मल्लिका - malliká, San.). Jasmine flower.——*Mullicarjoonan* (மல்லிக்கார்ச்சுனன் - mallikkárççunan, Tam.). From (malliká, san. jasmine + arjuna, san. proper name); epithet of Shiva. Hindoo 2nd or pers. name [peyar]. Familiarly Mulloo. Title of the lingam [q.v.] at Srisheilam and formerly at Vijianugger; a book relating to this deity and his shacty [q.v.] exists in Teloogoo. Name of a Teloogoo astronomer, supposed to have flourished in 4279th year of the Kaliyoog [q.v.] or 1100 Saca [q.v.]; and who like Baulauditayacan referred his computations [maunam] to meridian [raikhay] of Rameshwaram.——*Mully* (மல்லி - malli, Tam.). From (mall, san. to hold); from jasmine garlands being largely in use. Jasmine [q.v.].

MULKANGHERRY (మలకనగిరి - malakanagiri, *Tel.*). From (malik, ar. proper name + giri, san. hill) [malik].——**(1)** Division; Vizagapatam district; population 28,277. Boundaries:—E. Pottinghy, Jeypore, Golcondah and Padair divisions; S. Godavery district; W. Central provinces; N. Bustar. A wild forest-clad region, watered by the Severy and Sillair, and sloping from the Toolsy toongaury which separate it on the north from the Ramgherry tannah [q.v.] to the Godavery. Average elevation 1,200 feet. There are fine saul [q.v.] and teak [q.v.] forests, and the whole tract abounds with large game. Places of archæological interest:—Anantapully, Condacambair, Garshipully, Mulkangherry, Nullacottah. Principal trig. stations:—Baly, Moonasa, Pantsa, Singanauma. The leading places, &c., in the division are the following.——*Baly* (బలి - bali, Tel.). Means sacrifice. Trig. station; lat. 18° 25′ 07·50″; long. 82° 19′ 30·49″; height 3,533 feet; from Gocarapaurya S.S.W. 2 miles; from Mulkangherry S.E. 26 miles.——*Moonasa* (మునస - munasa, Tel.). Means water-lift. Trig. station; lat. 18° 20′ 27·24″; long. 82° 00′ 08·19″; height 2,311 feet; from Mulkangherry E.S.E. 5 miles.——*Motoo* (మోటు - mótu, Tel.). Means the place where two rivers meet. Villages; lat. 17° 50′; long. 81° 26′; from Jeypore S.W. 103 miles; from Mulkangherry S.W. 49 miles; from Vizagapatam W. 124 miles. Trading station at confluence of Sillair and Severy rivers. Some trade in timber and forest produce.——*Mulkangherry* (మలకనగిరి - malakanagiri, Tel.). See below.——*Pantsa* (పంచ - pantsa, Tel.). Means a porch. Trig. station; lat. 18° 04′ 19·42″; long. 81° 57′ 58·67″; height 3,591 feet; from Bijikwaura S.E. 2 miles; from Mulkangherry S. 20 miles.——*Sillair* (సిల్లేరు - silléru, Tel.). See sep. title.——*Singanauma* (సింగనామ - singanáma, Tel.). From (singamu, tel. lion + náma, san. name). Trig. station; lat. 18° 04′ 22·28″; long. 81° 35′ 08·46″; height 1,576 feet; from Mulkangherry S.W. 30 miles; from Naudagherry S.W. 1½ miles. *Toolsy toongaury* (తులసితుంగారి - tulasitungári, Tel.). See sep. title.——**(2)** Deputy tahsildarry, Vizagapatam district. Pay Rs. 150.——**(3)** Village, Head-quarters of Deputy tahsildar and Ameen [q.v.] of Jeypore maharajah; Vizagapatam dist., Jeypore zemindarry, Mulkangherry magisterial division; pop. 855; lat. 18° 22′; long. 81° 56′; height 641 feet; from Coraputt S.W. 62 miles; from Jeypore S.W. 56 miles; from Madras N.N.E. 372 miles; from Narsapatam N.W. 67 miles; from Parvatipore W.S.W. 104 miles; from Vizagapatam N.W. 102 miles; from Vizianagram W.N.W. 100 miles. Old mud fort.

MULL (ململ - malmal, *Hind.*). Anglo-indian. Fine muslin [q.v.].

MULLAGATAWNY (چار - chár, *Hind.*; చారు - cháru, *Tel.*; ചാറു - cháru, *Mal.*; மிளகுத்தண்ணீர் - milaguttannír, *Tam.*). Tel., Mal. from (sára, san. essence). Tam. from (milagu, tam. pepper + tannír, tam. water). A soup with the ordinary ingredients of curry [curry, masaulay].

MULLET (బొంత - bonta, *Tel.*). Mugil genus, mugilidæ [madavay], acanthopterygii, teleostei [matsyam, 26], of naturalists. Includes also species of chanos, serranus and upeneus. ——*Gray mullet* (ମଗି - magi, Oor.; മാലാൻ - málán, Mal.). Title from color. Mal. from (mála, san. garland). Mugil seheli, mugilidæ [madavay], acanthopterygii, teleostei [matsyam, 26], of naturalists [jantoo]. Alias Mugil axillaris, cylindricus, parsia. Scales twenty-one or twenty-two between the snout and base of first dorsal fin. Colors silvery, with bluish-green tinge along head and back black mark in axilla. Ventrals white. Sea; a foot in length. No other common species here. ——*Red mullet* (రాతిగులివింద - rátigulivinda, Tel.; மணலை - manalai, Tam.). Title from color. Tel. means stone + seed of abrus precatorius, probably from color. Tam. from (manal, tam. sand); from frequenting shores. Title otherwise Indian sur-mullet. Upeneus indicus, mullidæ, acanthopterygii, teleostei [matsyam, 3], of naturalists [jantoo]. Alias Mullus barbatus, indicus, malabaricus; Parupeneus indicus, russellii; Upeneus malabaricus, russellii, waigiensis. Snout somewhat pointed. Air-vessel present; colors purplish-red, with large oval shining golden blotch on lateral-line opposite interspace between two dorsal fins, which usually disappears after death; purplish-black mark, lightest in centre, on either side of free portion of tail between end of dorsal and base of caudal fins; yellow lines or spots on abdomen. Light violet lines on upper surface of head; broad purple band from eye to snout, having a narrow violet one on either side; checks pink, variegated with yellow and tortuous blue lines; dark spot at corner of mouth. Dorsal purplish streaked with blue; a few yellow bands on anal, fins pinkish except caudal, which has rays purplish, membrane has greenish tinge. Sea; 16 inches in length. No other common species here. Upeneoides vittatus is English mullet, Striped red mullet, Sur mullet.——*Stone mullet* (రాతిబొంత - rátibonta, Tel.). Same as Striped perch.——*White mullet* (ಹೂಮೀನು - húmínu, Can.; ಪೂಮೀನು - púminu, Too.; పాలబొంత - pálabonta, Tel.; துளிர்க்கெண்டை - tulirkkendai, Tam.). Title from color. Can. from (hú, can. flower + mínu, can. fish). Too. from (pú, too. flower + mínu, too. fish). Tel. from (pála, tel. white + bonta, tel. mullet). Tam. from (tulir, tam. tender sprout + kendai, tam. carp, barbus genus); from brilliant gloss of head and back. Title otherwise Milk fish. Chanos salmoneus, clupeidæ, physostomi, teleostei [matsyam, 40], of naturalists [jantoo]. Alias Butirinus argenteus, maderaspatensis; Chanos arabicus, chanos, chloropterus, indicus, mento,

nuchalis, orientalis, pala, tolo; Cyprinus palah bontah, tooleloo; Leuciscus salmoneus, zeylonicus; Lutodeira chanos; Mugil chanos, salmoneus; palabontah from teloogoo. Body elongated; upper surface of head flat; upper jaw over-hanging the lower. Scales small, covering the body; there are some rows of enlarged ones over the nape. Summit of head and back of a brilliant glossy blue, fading into silvery on the abdomen; snout light brown. Dorsal and caudal rays grayish, which, as well as the membranes, are dotted with light brown, and both these fins are margined with black. Caudal semi-lunar laminæ of scales pale slate color, the pectorals and ventrals white, with the anterior halves of their external surfaces minutely dotted with dark brown, their elongated appendages bright silvery. The anal white, with the anterior half dotted with black. Iris silvery, orbital half pale brownish. Seas; attains 3 feet at least. In South canara Hyder ally introduced it from the sea into tanks of fresh and brackish water, where it still thrives. No other common species here.

MULLEY (మల్లె - malle, *Tel.*). Corruption of (palle, tel.) [pully]. Village. Suffix in place names, as Zargoomulley, meaning shifting village.

MUNCHY (మంచి - manchi, *Tel.*). From (mañju, san. beautiful). Goodness. Suffix in place names; as Caurmanchy, meaning season goodness. Plant first term. Ex.:—Aloe littoralis (manchikattáli), best aloe; Sesbania procumbens (manchijíluga), best æschynomene aspera. See gloss. paragraphs.

MUND (ಮಂದೆ - mande, *Can.*; మంద - manda, *Tel.*; மந்தை - mandai, *Tam.*).—"*a*" Cattle-herd. Suffix in place names [manda].—"*b*" A Todah [q.v.] village. The individual Todah hut is oval-shaped usually 10 feet broad, presenting a striking resemblance to the raths [q.v.] of Mauvellipore. The entrance or doorway measures 32 inches in height and 18 in width, and is not provided with any door or gate; but the entrance is closed by means of a solid slab or plank of wood from 4 to 6 inches thick and of sufficient dimension to entirely block up the entrance. This sliding door is inside the hut, and so arranged and fixed on two stout stakes buried in the earth and standing to the height of 2½ to 3 feet as to be easily moved to and fro. There are no openings or outlets of any kind either for the escape of smoke or for free ingress and egress of atmospheric air. The doorway itself is of such small dimensions that to effect an entrance those who enter must go down on all fours. Each building has an end wall before and behind, composed of solid blocks of wood, which slopes down to the ground. The inside is sufficiently high in the middle to admit of a tall man moving about with comfort. On one side there is a raised platform or pyall [q.v.] formed of clay, about two feet high and covered with samber [q.v.] or buffalo [khoolgah] skins, or sometimes with a mat. This platform is used as a sleeping-place. On the opposite side is a fire-place and a slight elevation on which the cooking utensils are placed. In this part of the building faggots of firewood are piled up from floor to roof, and secured in their places by loops of rattan [q.v.]. Here also the rice-pounder and pestle are fixed. The mortar is formed by a hole dug in the ground 7 to 9 inches deep and rendered hard by constant use. The other household goods consist of three or four brass dishes or plates, several bamboo [q.v.] measures, and sometimes a hatchet. Each cluster of huts is surrounded by an enclosure or wall formed of loose stones piled up from 2 to 3 feet high and includes a space or yard measuring 13 by 10 feet. A cluster of five or six of these houses, with a cattle kraal [q.v.], forms a mund or village. One hut is always used as a dairy, or paultchy [q.v.], and one or two give shelter to the calves. The rest are simply dwelling-houses. The presence of the buffaloes, seldom driven far away when pasture can be found near at hand, ensures a patch of short green velvet sward, sloping down to the stream which supplies the mund with water, or terminating in a marsh where the animals wallow. The inhabitants of a mund are generally related to one another, and although each household has its head, the whole together forms but one family. The practice of polyandry however tends to make the relationships confusing.——*Munda* (منڈا - mandá, Hind.; మంద - manda, Tel.; மந்தை - mandai, Tam.). Herd. Suffix in place names; as Yellamunda, meaning boundary herd [mund].——*Mundapauty* (మండపాటి - mandapáti, Tel.). From (mandapádu, tel. village in kistna), meaning herd village. Zemindarry family of the Ongole district. Ayyapparauz, the founder of the family, obtained from the nawaub of Hyderabad a grant of three villages, Conijaid, Mangamore, Pairanamitta, for the administration of the police. During the time of Raghoopatyrauz, sixth in descent from the founder, the estate comprised the whole of the Ongole talook. The estate was divided during the time of one Peddabhadrarauz. One Ramachendrarauz of this family was authorized by the Governor of Madras to keep an armed force of 5,000 men. When the district came under the British rule in 1792, the Zemindar was pensioned as his military services were no longer required; and the pension itself was stopped in 1842.——*Mundapett* (మందపేట - mandapéta, Tel.). From (manda, tel. cattle herd + péta, tel. suburb). Sanscrit name (mándavyapura), meaning maundavyan, the sage + town. Village, Canal; Godavery dist., Ramchendrapooram tal.; acres 5,301; lat. 16° 51′; long. 81° 58′; from Cocanada W.S.W. 21 miles; from Ramchendrapooram W.N.W. 7 miles. Village is one mile south of the canal which connects the Coringa and Cocanada canals. ——*Mundarauz* (మందరాజు - mandarája, Tel.). From (above + rájá, san. king). A Hindoo ruler of the lunar race [chundra vamsham], according to Sanscrit legends, from whom the town of Madras takes its name, through the Teloogoo. See vol. I (161).——*Mundarauzputnam* (مندراج - mandráj, Hind.). Madras [q.v.].——*Mundasa* (మందస - mandasá,. Tel. mandasa*). Ancient zemindarry, Town; Ganjam dist., Sompett tal., Deputy tahsildar's range; pop. 35,532; pop. of village 5,240; acres 82,899; lat. of village 18° 51′; long. 84° 30′; from Berhampore S.S.W. 37 miles; from Chetterpore S.W. 49 miles; from the sea W. 8 miles. Separated from Parlakimedy by the Mahendragherry. The paddy [q.v.] is best in Ganjam. Founder, Punchendra bommana sing, from the Punjaub. Number of villages, 166. Peshcush Rs. 14,035. Ten temples built by former zemindars. Contains Dandraushy [q.v.] and Maula [q.v.] trig. stations.——*Mundey* (ಮಂದೆ - mande, Can.). Subdivision of a hobly [q.v.] corresponding to a firkah [q.v.].

MUNDEM (మండెము - mandemu, *Tel.*). From (mandi, tam. warehouse). Factory. Distinguish from Mondem [mondy].

MUNGALAM (मङ्गल - mangala, *San.*). From (mang, san. to go); speed, good speed. Good fortune. Village in a rich agricultural tract. Hindoo proper name. Applied to males and females. Also Native christians [peyar].——*Mangalore* (ಮಂಗಳೂರು - mangalúru, Can.). See sep. title.——*Mungal* (منگل - mangal, Hind.). From (mangala, san. happiness). Tuesday. On this day the seven strata of the earth were created.——*Mungala* (మంగల - mangala, Tel.). Teloogoo barbers' caste. The corresponding terms are:—Hind. hajaum, Tam. ambattan, Can. nayinda, Mal. vilakkataravan. It is divided into the Reddy bhoomy, Moorkinauty, and Coorchy nauty sub-castes. Most are Veishnavites. They consider Tamul barbers as lower than themselves, because these consent to shave the whole body, while they only shave the upper portions. Besides their ordinary occupation, the members of this caste engage in surgery and their females practise midwifery. They are also employed as musicians on the occasion of marriages, funerals or other ceremonies. Flesh-eating is allowed, but not widow-marriage. Numbers about 350,000; mostly in Tel. districts, but there are many in Madura. See vol. II, 232.——*Mungala devy* (मङ्गलादेवी - mangaládévi, San.). From (above + dévi, san. goddess). Lutchmy [q.v.]; the goddess of good luck [shree devy].——*Mungalagherry* (మంగళగిరి - mangalagiri,* Tel.). From (mangala, san. auspiciousness + giri, san. hill).—"*a*" Deputy tahsildarry, kistna district. Pay Rs. 70.—"*b*" Town, Place of pilgrimage, Deputy tahsildar's head-quarters, Travellers' bungalow; Kistna dist., Guntoor tal.; pop. 6,426; acres 2,002; lat. 16° 26′; long. 80° 37′; from Bezwada S.S.W. 7 miles; from Guntoor N.E. 12 miles; from Madras N. 232 miles; from Masulipatam W.N.W. 40 miles; from Vinoocondah E.N.E. 60 miles. On the high road between Bezwada and Guntoor. In the last century old Mungalagherry, half a mile to south, belonged to Suttenapully zemindar; while Mungalagherry proper, the town close to the pagoda [q.v.] under the hills, was part of Nizampatam circar [q.v.]. Plundered by Hyder's cavalry in 1780, also by Pindarries [q.v.] in 1816. Up the hill is a rock-cut platform with Narsimhasawmy temple, behind which is a cave said to communicate with those near Oondavully. Large and deep square reservoir in the town, in which 9,840 matchlocks and forty-four iron bullets were found when it ran dry in 1832. Festival at full moon [powrnimay] in March. Trig. station. in lat. 16° 26′ 19·92″; long. 80° 36′ 55·04″.——*Mungalan* (மங்களன் - mangalan, Tam.). From (mangala, san. prosperity). The planet Mars [coojan]. Identical with Caurtikeyan [q.v.]. In the arts, he is represented as a red man [shevvye] with four arms riding on a sheep [aud]. He wears a red necklace and cloths of the same color. The Hindoo astrologers say:—if a person be born under the planet Mungalan, he will be full of anxious thoughts, wounded with offensive weapons, imprisoned, oppressed with fear of robbers, fire, &c., and will lose his land, trees, and good name. The motions of mungalan are greatly relied upon in astrology. The following are Varauha mihiran's remarks on that head:—"The "retrograde motion [vakra gaty] of mungalan is of five kinds, "known technically as ooshnam, ashroomookham, vyaulam, "lohitaunanam and nistrimsha moosalam. If mungalan should "begin to retrograde from the seventh, eighth or ninth constel-"lation from that in which he reappears after his conjunction "[crauntam] with the sun, such retrograde motion is technically "known as ooshnam; when mungalan should reappear after his "next conjunction with the sun [sooryan], persons who live by "fire will be afflicted with disease; mungalan disappears when "within 17 degrees [bhaugam] from the sun and reappears "when beyond that; if mungalan should begin to retrograde "from the tenth, eleventh, or twelfth constellation [nacsha-"tram] from that of his reappearance, such retrograde motion "is known as ashroomookham; when mungalan should reappear "after his next conjunction with the sun, juice will be injured "and there will be disease and drought; if he should begin to "retrograde from the thirteenth or fourteenth constellation

"from that of his reappearance, such retrograde motion is "known as vyaulam; when he should disappear before his next "conjunction with the sun, wild boars and fierce animals will "be afflicted with distress; if mungalan should begin to retro- "grade from the fifteenth or the sixteenth constellation from "that of his reappearance, such retrograde motion is known as "Roodhiraunanam; at the time of such reappearance mankind "will be afflicted with disease in the face and with various "fears, but there will be prosperity in the land; if he should "begin to retrogade from the seventeenth or the eighteenth "constellation from that of his reappearance such retrograde "motion is known as Asimoosalam; when mungalan is in his "re-retrograde motion, bands of robbers will be afflicted with "distress and there will be drought and wars in the land; if "mungalan should reappear in the constellation of Poorvaphal- "goony [poobbam] or in that of oottaraphalgoony [oottaram] "retrograde in the constellation of oottarashaudham [q.v.] and "disappear in the constellation of rohiny [q.v.] he will afflict "the three worlds with miseries; if mungalan, after his reappear- "ance in the constellation of Shravanam [q.v.], should retro- "grade in that of Pooshyam [q.v.], anointed monarchs will be "afflicted with miseries; those countries and those persons will "suffer in whose nacshatram [q.v.], mungalan should begin to "reappear; if he should pass through middle of the constellation "of Magham [q.v.] and retrograde back through the same, the "ruler of the Paundyan [q.v.] country will perish and mankind "will suffer from wars and drought; if mungalan should, after "cutting through the constellation of magham [q.v.], approach "the middle of vishaukham [q.v.], there will be famine in the "land; if he should cut through the constellation of rohiny "[q.v.], there will be fearful deaths in the land; if mungalan "should pass to the south of the constellation of rohiny, rulers "will suffer, prices will rise and there will be little rain; if "mungalan should appear enveloped in smoke or with a pointed "flame, the people of pauriyautram will perish; if mungalan "should pass through the constellation of rohiny [q.v.], shrava- "nam [q.v.], moolam [q.v.], oottaraphalgoony [q.v.], oottara- "shaudham [q.v.], oottarabhaudram [q.v.], and jyeshtay [q.v.], "he will destroy clouds charged with rain; if mungalan should "pass through the constellations of shravanam [q.v.], magham "[q.v.], poonarvas [q.v.], hastam [q.v.], moolam [q.v.], poorva- "bhaudram [q.v.], ashwiny [q.v.], vishaukham [q.v.], and rohiny "[q.v.] there will be prosperity in the land; if mungalan should "appear with a large and clear disc or red like the flower of "kimshoocam [palaus] or of ashocam [bengal ashocam] or of "clear and fine rays or like molten gold or if he should pass "through the northern path [avastaunam], rulers will be happy "and there will be prosperity in the land." Mungalavauram is Tuesday [vauram].——*Mungala sootram* (मङ्गलसूत्र - mangala-sútra, San.). From (above + sútra, san. thread). The lucky thread, the talee [q.v.].——*Mungala veety* (मङ्गलवीथी - mangala-vít'hí, San.). From (above + vít'hí, san. street). Street [veety] round a village [oor].

MUNGAY (மங்கை - mangai, *Tam.*). Woman. Lutchmy [q.v.].——*Mungammah* (மங்கம்மா - mangammá, Tam.). From (above + ammá, tam. mother). Lutchmy. Hindoo female proper name [peyar].——*Mungammaul* (மங்கம்மாள் - mangammál, Tam.). From (mangai, tam. woman + ammál, tam. mother). Grandmother and queen regent of Vijaya runga chokkanauta naick, ruler of Madura [charitram]. See vol. I (121).——*Mungay bhaugan* (மங்கைபாகன் - mangaibágan, Tam.). From (above + bhága, san. portion). Shiva [ardhanaury].——*Mungayya* (ಮಂಗಯ್ಯ - mangayya, Can.). From (above + ayya, can. master). Vishnoo [q.v.], lord of Lutchmy. Non-bramin. Hindoo 2nd or pers. name [peyar].——*Mungeshan* (ಮಂಗೇಶ - mangésha, Can.). From (above + ísha, san. lord). Vishnoo, lord of Lutchmy. Hindoo 2nd or pers. name. Common among Madhwas and Mahrattas [peyar].——*Mungimadoss* (ಮಂಗಿಮದಾಸ - mangi-madás, Can.). From (above + dása, san. slave). Adherent of Lutchmy. Hindoo 2nd or pers. name [peyar].

MUNJAL (മഞ്ഞ - maññа, *Mal.*; மஞ்சள் - mañjal, *Tam.*). Yellow. Same as Country saffron. Plant first term often joining two genera, meaning yellow. Ex., where transl. is of second term:—Adina cordifolia (maññakkadamba), anthocephalus cadamba; Crossandra undulæfolia (maññakkuriññi), barleria genus; Daucus carota (mañjalmullangi), raphanus sativus, radish; Morinda citrifolia (mañjalbávattai), pavetta indica; Thevetia nereifolia (mañjalalari), nerium odorum. See gloss. paragraphs.——(1) *Mangelin* (మంజాళి - manjáli, Tel.). Same as Munjaudy. Cf. Carat.——*Manjarabad* (ಮಂಜರಾಬಾದ - man-jarábád, Can.). From (manjaramani, can. seed of adenanthera pavonina, linn. + ábád, hind. town). Pass; South canara dist., Ooppinangady tal. Between Mysore and Canara.——*Munja-cooppam* (மஞ்சக்குப்பம் - mañjakkuppam, Tam.). From (mañjal, tam. saffron, curcuma longa, roxb. + kuppam, tam. village). Tam. also (kuppam), meaning maritime village. South arcot dist., Cuddalore tal.; acres 1,297; lat. 11° 46′; long. 79° 48′; from Cuddalore N. 3 miles; from the sea W. 2 miles. Suburb of Cuddalore.——*Munjalaur* (மஞ்சளாறு - mañjaláru, Tam.). From (mañjal, tam. saffron; curcuma longa, roxb. + áru, tam. river). Sanscrit name (haridránadí), meaning the same. River; Madura district, Dindigul and Periyacoolam talooks. Rises in Lower pulneys, and passing villages of Devaudanaputty and Gengoovaurputty of Periyacoolam talook and Batlagoondoo, Vunnambutty of Dindigul, flows into Veigay at Coonvaran cottay in Dindigul talook. Length 30 miles.——*Munjanutty* (மஞ்சணத்தி - mañjanatti, Tam.). From (mañjal, tam. turmeric, curcuma longa, roxb. + náru, tam. to smell); from timber. Same as Dyeing mulberry.——*Munjaudy* (മഞ്ചാടി - mañchátі, Mal.; மஞ்சாடி - manjádi, Tam.). From (manju, san. beautiful). Title otherwise Mangelin, Manjoty. Seed of Adenanthera pavonina [false red sanders].—"*a*" One of the earliest measures of weight. Of a bright scarlet color, hard, durable, and tolerably uniform in size and weight. For ordinary purposes place of the munjaudy has been taken by its representative the copper fanam [q.v.].—"*b.*" Artificial goldsmiths' munjaudy weights are made of brass in the form of an octahedron, the primitive crystal [palingoo cull] of the diamond [vajram]. The following is scale:—2 coondrimanies or goonj seeds = 1 munjaudy; 2 munjaudies = 1 pana tookkam [niray, 3a, d]. Approximate actual value, 1 munjaudy = 3 grains. But this is less than its usual actual weight. Same as Can. adda, manjoty. Compare Carat, Doogoola. Compare also coondrimany which is about half. See vol. I, 609; II, 518.——(2) *Custoory munjal* (கத்தூரிமஞ்சள் - kattúrimañjal, Tam.). From similar fragrance. Same as Long zedoary.——*Maramunjal* (மரமஞ்சள் - maramañjal, Tam.). From yellow wood. Same as False calumba.

MUNJAN (منجن - manjan, *Hind.*). From (mánjaná, hind. to scrub). Dentifrice. Gen. powdered charcoal [adooppkary].

MUNJEET (मञ्जिष्ठा - mañjisht'há, *San.*; मंजिष्ठ - manjisht'ha, *Mahr.*; فوة الصباغين - fuvvahussabbághín, *Ar.*; روناس - rúnás, *Pers.*; دار هلد - dárhald, *Hind.*; منجيٹ - manjít, *Dec.*; ಮಂಜಿಷ್ಠ - manjisht'ha, *Can.* and *Too.*; మంజిష్ఠ - manjisht'ha, *Tel.*; മഞ്ചെട്ടി - mañchetti, *Mal.*; වැල්මදල - valmadala, *Singh.*; மஞ்சிட்டி - mañjitti, *Tam.*). Title from sanscrit through deccany. San. from (mañju, san. beautiful + isht'ha, san. superlative affix). Mahr. from sanscrit. Ar. from (fuvváh, ar. madder + sabbágh, ar. dyer). Pers. from (rú, pers. color + nás, ar. man). Hind. from (dár, hind. wood + hald, hind. turmeric, curcuma longa, roxb.) [berberry, false calumba]. Dec., &c., from sanscrit. Singh. from (val, singh. creeper + maddata, singh. munjeet). Tam. from sanscrit [monkey-country saffron]. San. also (chitravallí), meaning many-colored creeper [chitramoolam]; (kálaméshiká), meaning black + the plant, nardostachys jatamansi, nees.; (gandári), meaning boils + enemy; (mandúkaparní), meaning frog-leaved [indian pennywort]; (samangá), meaning going or spreading in all direction; (vikasá), meaning blooming; (aruná), meaning red [nodding galangal, turbith]; (yójanavallí), meaning league + creeper; (bhándí), meaning mentioned; (bhandírí), meaning mentioned; (jingí), meaning spreading. Ar. also (fuvvah), meaning madder. Pers. also (royan). Hind. also (manjít). Can. also (manjettibíja), meaning madder + seed; (isht'hamadhúka), meaning desirable + honey. Tel. also (mánipasupu), meaning wood + turmeric, curcuma longa, roxb.; (támbravalli), meaning copper + creeper. Mal. also (púvattu), meaning flower + inside. Tam. also (shevvalli), meaning red creeper; (shávalgodi), meaning cock + creeper. Title otherwise Bengal madder, Copper creeper, Frog-leaf, Heart-leaved madder, Indian madder, Ulcer-killer. Botanically Rubia cordifolia, linn., rubiaceæ [vricsham, 71]. Alias Rubia cordata, manjith, munjista. Manjith from deccany; munjista from sanscrit. Herbaceous; stem rough, with prickles on the angles, rarely smooth; leaves in fours, long-petioled, oblong or ovate, acute, more or less cordate, three to seven-nerved, margins, middle nerve, and petioles rough with minute prickles; calyx tube ovate-globose; panicles in the upper axils peduncled, trichotomous; bracts opposite, not forming an involucre; flowers usually five-cleft, whitish; berries red or black; grows in elevated jungles. Root consists of a short stock, from which numerous cylindrical roots about the size of a quill diverge; these are covered by a thin brownish suber which peels off in flakes, disclosing a red-brown bark marked by longitudinal furrows; the taste is sweetish at first, afterwards acrid and bitter; fibres of root not so thick or succulent as those of european madder, rubia tinctorum, linn. Infusion of root used in medicine as a coloring agent; also as an astringent in external inflammations, ulcers, and skin diseases; made into a paste with honey [shahad], forms application to freckles and discolored skin; in pharm. non-officinal. The root has in a minor degree the same dyeing properties as the european madder; dyes pink, lake, purple, orange, yellow and brown [shauyam]; for calico [q.v.], linen [alsee], or wool [pashm]; used alone, or, in conjunction with the emboorel root [chayroot].

MUNJOOR (منظور - manzúr, *Hind.*). From (nazr, ar. sight). Acceptance. Approved.

MUNJY (മഞ്ചി - mañchi, *Mal.*). From port. manchua. Large boat on W. coast used for navigating a river and for coasting. Manned by Moplahs [q.v.]; are always laid up in the

monsoon [masulah]. The following are different kinds.——*Bottell munjy* (ബൊത്തെല്ലമഞ്ചി - bottellamañchi, Mal.). Title is portuguese. Navigates the Gulf of Manaar and the Southern coasts. Is about 50 to 60 feet in length, 16 to 18 feet in breadth, and 8 to 10 feet in depth. Has more of the European form than any of the others. The afterpart shows the construction to be of Portuguese origin. Has a deck fore and aft, and is built with jungle wood in a rough manner, and fastened with nails and bolts. Has one mast, which inclines forward, and a square lug-sail; also a small bowsprit, at about 45°, with a sort of jib foresail, one pair of shrouds, and a backstay, which completes the rigging.——*Bunder munjy* (ബന്തർമഞ്ചി - bantarmañchi, Mal.). From (bandar, hind. port + mañchi, mal. boat). Harbour boat for goods.——*Calicut munjy* (കോഴിക്കോട്ടുമഞ്ചി - kózhikkóttumañchi, Mal.). Like the Mangalore munjy, but has a raking stem, for the purpose of taking the beach, as the port of Calicut is open to the coast and there is no river. These boats are propelled by the paddle and sail, and generally carry eight men.——*Cochin bunder munjy* (കൊച്ചിവഞ്ചി - koççivañchi, Mal.). Canoe of burthen, cut from the largest timber. From 20 to 50 feet in length; breadth and depth being proportioned to the full size of the tree, so as to reduce its dimensions as little as possible. Carries about 18 tons burden.——*Mangalore munjy* (മംഗലപുരമ്മഞ്ചി - mangalapurammañchi, Mal.). A flat-bottomed boat of burden, about 25 to 35 feet long, 6 to 7 feet broad, and 4 to 5 feet deep. It is formed to suit the Mangalore river, which is shallow. Sewed together similar to the masulah [q.v.] boat of the East coast. Poled by bamboo [q.v.] poles.——*Paumban munjy* (പാമ്പൻമഞ്ചി - pámpanmañchi, Mal.). From (pámbu, mal. snake + mañchi, mal. boat). The snake boat of Cochin, a canoe used for conveyance on the rivers and backwaters [canyal], particularly on that between Cochin, Alleppey and Quilon. These boats are from 30 to 60 feet in length, worked from the solid tree.——*Ponnany munjy* (പൊന്നാനിമഞ്ചി - ponnánimañchi, Mal.). A coasting boat of about 50 feet long, 10 to 12 feet broad, and 5 to 7 feet deep. It is framed with timbers and planks, which are sewed together. The timbers are about 4 feet asunder, and on them inside some few planks are placed as bands and clamps, which are nailed to the frame. These are very rudely put together, and not of much importance either in form or construction. Have generally from eight to ten men.

MUNKAH (अक्ष - aksha, *San.*; منکا - manká, *Hind.*; ಮಣಿ - mani, *Can.*; ಮಣಿ - mani, *Too.*; పూస - púsa, *Tel.*; മണി - mani, *Mal.*; மணி - mani, *Tam.*). Bead. The seeds of various plants are used as beads. In some cases wood is cut into small globular bodies, as in the case of bael [q.v.], and toolsy [q.v.], and these answer the purpose of beads. The commonest beads in economic use are from:—Abrus precatorius, linn. [indian liquorice]; Adenanthera pavonina, linn. [false red sanders]; Areca catechu, linn. [areca]; Cæsalpinia bonducella, flem. [bonduc]; Canna indica, linn. [indian shot]; Caryota urens, linn. [bastard sago palm]; Coix lachryma, linn. [coratty-pansy]; Corypha umbraculifera, linn. [talipot]; Elæocarpus lanceolatus [roodrauck]; Melia azedarach, linn. [large neem]; Ocimum sanctum, linn. [common toolsy].

MUNN (भूमि - bhúmi, *San.*; خاک - khák, *Pers.*; مٹی - mittí, *Hind.*; مٹی - matti, *Dec.*; تنا - tanah, *Malay*; ನೆಲ - nela, *Can.*; ಮಣ್ಣು - mannu, *Too.*; మన్ను - mannu, *Tel.*; മൺ - man, *Mal.*; மண் - man, *Tam.*). San. from (bhú, san. to be) [bhoo]. Hind. from (mrit, san. earth). Malay from (st'hána, san. place). Earth, soil.——**(1)** Dividing soils according to their most general characteristics the scientific classification is as follows:—alluvial and exceptional soils, black-cotton soil, red ferruginous, white and grey cretaceous, arenaceous. The alluvial and exceptional series, includes the rich lunka [q.v.] or island soils deposited from rivers, and also provides for the garden and other soils, which have been permanently improved, and rank above the ordinary cultivation [adaimunn, vandalmunn]. The second series is the regar, or as it termed commonly the black-cotton soil [regar]; its character may be easily distinguished from that of other series, even when mixed with large proportions of sand, as in the case of the masab [q.v.] which is included in the general head of regar; the great fertility of the regar is ascribed to its containing, besides a large proportion of organic matter, to which it probably owes its color, much mineral matter in a fine comminuted state, so as to be available for the supply of nourishment to vegetation by the ordinary processes of chemical affinity and mechanical action, which are constantly going on. The red ferruginous series [shemmunn] is also easily distinguished, and has its origin mostly from ferruginous sandstone [manal cull], laterite [q.v.], or other rocks; the red color is generally the result of iron [auhan], and is separable from the reddish brown belonging to some of the regar soils, with which this series forms a contrast in its want of natural fertility, arising probably from the smaller proportion of organic matter, and of the richer constituent elements, and its general dryness. The color of the white and grey cretaceous series [sookkaunmunn] is chiefly dependent on the chalk or lime in the soil, and sometimes verges into a dark shade; this derives its character from a substratum of lime [choonam], the properties of which in the surface soil may be partially or wholly removed by influence to which it is exposed from the air, moisture, &c. The characteristic of the arenaceous series [vandal munn] is the seashore or flinty sand which forms the basis of the soil in littoral tracts of country; vegetation and cultivation have contributed much by introducing fertile elements, but even there the original character is easily discernible.——**(2)** The principal ingredients of all soils are clay, sand, lime, and vegetable or other organic matter, in varying proportions; there are smaller ingredients, such as potash [jharkanamak], soda [munn cauram], magnesia [caunta munn], phosphoric acid, oxide of iron, sulphuric acid [gandhac tezaub], chlorine, &c. The chief ingredients are derived from minerals and stones, which are gradually dissolved, or rather reduced to powder or grains by potash, and other small, but powerful ingredients above described, as well as by the action of the air and moisture; in some cases also decayed vegetable deposit forms or combines with soils; a portion of the soil is thus in a state of fine impalpable powder, while the remainder is hard and insoluble as the grains of sand, pebbles, &c. It is only from the fine portion or powder that the crops derive their nourishment; and, as a rule, the greater proportion of it, ceteris paribus, that a soil contains, the greater will be the source of fertility. Some of the richest regar soils are almost entirely composed of this impalpable powder. For the purpose of scientific classification this impalpable powder is called clay, though it includes vegetable matter, and the remainder is termed sand. The grades of minor classification are then for each series of soil as follows:—Clayey, containing more than $\frac{2}{3}$ of clay. Mixed or loamy, containing from $\frac{1}{3}$ to $\frac{2}{3}$ of clay; sandy or gravelly, containing not more than $\frac{1}{3}$ of clay. The saline ingredients of soils have to be considered in determining its value. Five kinds of saline ingredients are recognized by the natives of the country. These are in Teloogoo where the distributions are best recognized:—Ganzoo sowdoo [q.v.] or bangle salt; Paula sowdoo [q.v.] or carbonate of soda; Ooppoo sowdoo [q.v.], or common salt; Soonnapoo sowdoo [q.v.], or washerman's earth; and Soorabaurapoo sowdoo [q.v.], or saltpetre, or potash with its nitrate [sowdoo]. The soda is not injurious, unless in excess, when however it may be easily removed by irrigation; in small quantities it is a very valuable ingredient; the common salt cannot be removed easily, and it often takes many years before the character of this soil changes; the excess of soda in the fifth kind is not so hurtful as the last, and yields more readily to the influence of water; the potash is a useful ingredient, particularly for several garden crops to which it is applied as a manure, and its excess is rapidly removed by irrigation. Very stony and gravelly soils come at the end of the classification; but small stones and gravel scattered over the fields are not necessarily at all hurtful to vegetation. In the calcareous series, the value of the soil may in a measure be determined according to the lime being only in moderation, that is to say not more than 15 per cent.; or in excess, that is to say above that quantity.——**(3)** The darker-colored soils, as the black, brown and dark-red, absorb more heat than the white, grey and yellow, and are consequently hotter; while the light-colored soils reflect or throw back more heat than the dark soils, and thus tend more to scorch up the crops growing upon them; though, on the other hand, the moisture is less rapidly evaporated from them than from the dark soils. Color has also a great influence upon soils in their comparative retention of heat as opposed to its first absorption; a dark soil gives out or radiates the heat much more quickly than a light colored one in the absence of the sun's rays; thus sand will cool more slowly than clay, and clay more slowly than a dark soil with vegetable matter; the consequence is that the latter in dry weather begins to absorb the dew before the sandy soil, and thus may be enabled to sustain vegetation while the crops in the sandy soil languish for want of moisture; generally speaking the power of soils to retain heat is in proportion to their weight or specific gravity.——**(4)** Excepting hard sand, all kinds of soil have the property of absorbing moisture from the air, and this is greatest in the clay soils, especially when containing much vegetable matter, which is a powerful absorbent; the absorption of all soils is greatest at first, and less as they become more saturated with moisture; a portion is again evaporated by the heat of the sun, and this is again absorbed during the night; some soils, such as sands, have more than others the property of drawing up to the surface by capillary action the moisture which lies below.——**(5)** The power of retaining moisture as opposed to its first absorption is a very valuable property of soils in this part of the country, where there are long intervals without rain; sands have the least power of containing water, and vegetable matter has the greatest power of holding it; clays also will hold a large quantity when they are fully saturated; but some of the soils give out the moisture they contain much more quickly than do others; the degree of porosity or consistency of the ground affects the rapidity of drying; vegetable matter which is loose in texture gives off more moisture in the same time than clay and thus dries sooner, though in the first instance it holds more water than clay, when both are saturated.——

(6) Soils when moist have the power of absorption of oxygen, in different degrees; vegetable matter in the greatest, next the clays, and the last the sandy earths. When dry the soils lose the property of absorbing oxygen from the air [vayoo].——**(7)** A subsoil is that which immediately underlies the culturable surface soil; about one yard in depth may be considered as the proper surface soil, which is ample for the roots of all kinds of crops, and below this is the subsoil. Subsoils may consist of the same earthy substance as the soil itself, or it may be of similar character, differing only in degree or in kind,or it may be of quite an opposite character, or may consist of hard rock; thus soils and subsoils sometimes take their charactor from the underlying rocks of the country. The red soils are extensively found over ferruginous sandstone and laterite, and partake of the same elements. The regar soil is found sometimes over large tracts of country of which the volcanic, the gneiss, and other primeval rocks are the characteristic basis; at other times it is found overlying large tracts of limestone [choonam cull], chalk [sheemay choonam], and other rocks of different characters. The subsoil has generally a considerable influence on the condition and agriculture of the soil lying above it. If it is clay it is impervious to water, and tends to keep the upper soil wet or moist; on the other hand, a sandy, gravelly, or a calcareous subsoil will, from its porous nature, allow the moisture of the surface soil to drain through it. A porous soil on a porous subsoil will rarely suffer from excess of water except during the period of a long submergence. A tenacious soil, such as clay upon a similar subsoil, will generally suffer comparatively much from inundation, and the injurious effects of excess of moisture will be of longer continuance. The tenacious or retentive character of subsoils is an important consideration in irrigation, as some of the superjacent soils owing to these differences require very much more water than others. Rock may form either a retentive or porous subsoil; according as it is a massive structure, or as it is stratified so as to admit of the water percolating through it. The soil will not always be of one kind to the depth of one yard prescribed for the proper or surface soil; and gravel, sand, rock, or other substances may be found at the depth of a few inches below a more fertile surface.——**(8)** The following is the native classification of soils according to the Calpastaunam. There are five kinds:—"*a*" Soil in which the earthy principle prevails. Very fertile, shining brown yellowish, or black color, and very stiff. All large trees and grass and every kind of crop come to perfection in it.—"*b*" Soil in which there is much water. Is cold and has a whitish color, but its surface is covered with luxuriant plants and trees. Its tanks are constantly filled.—"*c*" Fire soil. It is light and has a greyish color. Trees have a sterile grey appearance. It produces climbing plants in abundance.—"*d*" Soil in which air prevails. It has an ash color. The trees are usually rotten inside. Its crops are thin, and it produces only such as grow in cold weather.—"*e*" Ether ground. Its color is blackish; it is stony and produces trees that yield resins [raul] and oil [yennay]. It will be perceived that the names and divisions of soils here are derived from the five elements [bhootam] of the Indian philosophy, namely, earth, water, fire, air, and ether. The following is a favorite Tamul classification:—Pottal, Vandal, Manal, Sevval, Carisal and Veppal. Pottal is a granular earth, very free from stones, with a small residue of granite and quartz; vandal is ordinary clay capable of retaining moisture and of a light red color; manal is arenaceous somewhat stony and of a light brown color; carisal is a black-cotton soil quite free from anything like stone; sevval is of a light red-color containing a considerable amount of quartz; veppal is a light greyish brown earth, lumpy, free from stones.——**(9)** *Manaar* (மன்னார் - mannár, Tam.). From (man, tam. sand. + áru, tam. river). Village; Tinnevelly dist., lat. 8° 58′; long. 79° 53′; from Tinnevelly E. 148 miles.——*Manaar gulf* (மன்னார்க்குடாக்கடல் - mannárkkudákkadal, Tam.). Greek κόλπος κολχικός. A portion of the Indian ocean, bounded west by the coast of Tinnevelly and Madura districts, north by Adam's bridge, and east by the coast of Ceylon. Extreme breadth from Cape comorin to Point de galle is about 200 miles. The length of the Tinnevelly and Madura coast is 135 miles. A current sets into the gulf during the south-west monsoon [q.v.]. During December and January the north-east monsoon blows strong out of the gulf. A bank has been formed in the gulf by the accumulation of sand carried out from the Malabar coast; due south of Comorin it stretches 45 miles off shore. Pearl-fisheries [moty] are carried on in the gulf both along the coast of Ceylon and off Tinnevelly and Madura. Its survey resulted in the formation of the Paumben passage. Though little frequented by large vessels in consequence of the obstruction northwards, it has on its north-west side the road-stead of Tuticorin, where ships may anchor throughout the year in considerable safety.——*Manaar island* (மன்னார்த்தீவு - mannárttívu, Tam.). Greek ἠπιοδώρουνῆσος. Island; Madura dist.; lat. 9° 03′; long. 79° 48′; from Madura E.S.E. 136 miles; from Ramnaud E.S.E. 75 miles. Off the coast of Ceylon, and at eastern extremity of Adam's bridge. It is 14 miles long and 3¼ broad, and with Rameshwaram island nearly connects the peninsula with Ceylon. Seat of the pearl fishery [chunk, moty].——*Manacoody* (മണക്കുടി - manakkuti, Mal.). From (manal, mal. sand + kuti, mal. dwelling).—"*a*" Village, Port; Travancore state, Pudmanaubhapooram division, Agasteeshwaram tal.; lat. 8° 5′; long. 77° 32′; from Sooshindram S. 5 miles; from Bombay S.S.E. 794 miles; from Comorin W. 4 miles; from Shaunaurgoody W.S.W. 5 miles; from Trivandrum S.E. 45 miles. Distinguished by its churches. Situated on edge of lake of same name.—"*b*" Lake; Travancore state, Pudmanaubhapooram division, Agasteeshwaram talook. Receives the Palayaur in its passage to the sea. Near Cape comorin salt pans at Taumara coolam and Vauriyore.——*Manal* (वालुका - váluká, San.; رمل - raml, Ar.; ریگ - reg, Pers.; بالو - bálú, Hind.; پسر - paser, Malay; ಉಸುವು - usuvu, Can.; ಪೊಯ್ಯೆ - poyye, Too.; ఇసుక - isuka, Tel.; മണൽ - manal, Mal.; වැලි - vali, Singh.; மணல் - manal, Tam.). Title from tamul. Hind. from sanscrit. Mal. from (man, mal. earth). **Sand.** Particles of stone. A common soil is pure river or shore sand with a comparatively insignificant proportion of argillaceous matter, often impregnated with salt [oóppoo] or lime [choonam]. This description of soil [múnn] is generally barren; and when cultivated it requires a considerable amount of manure to make it productive. The sand-binding plants of the Coromandel [q.v.] beach are a remarkable peculiarity of that coast. The wide-spreading roots and under-ground stems of these extend themselves in quest of food and thus become interwoven together, so as to sustain the soil in a sort of basket-work and consolidate the sands thrown up by the waves of the ocean. If it were not for the subterranean stems of these sea-side plants, which can vegetate amidst dry and drifting sand, the banks which man heaps up as a barrier against the sea would be blown away by the first hurricane. The following is a key-list of the plants arranged under the botanical names:—Ipomæa biloba, goat's foot; Ipomæa pestigridis, tiger's foot; Launea pinnatifida, style plant; Pandanus odoratissimus, screwpine; Pedalium murex, elephant nerinjy; Pupalia orbiculata, auday otty; Sesamum prostratum, wild gingelly; Spinifex squarrosus, ravanan's whiskers. For sandstorms, see Pishauch. For sandstone, see Manal cull [cull]. Caroomanal is black sand; used in sprinkling over wet writing to dry it. Irooppoo manal, from (irumbú, tam. iron) is sand containing iron [auhan]. Mergoo manal, from (merugu, tel. glitter) is red sand used by goldsmiths [tuttaun] in washing jewels to give them a glitter. Paroo manal, from (paru, tam. big) is coarse sand. Pody manal, from (podi, tam. powder) is fine sand. Pon manal, from (pon, tam. gold) is sand containing gold [pon]. Shemboo manal, from (shembu, tam. copper) is sand containing copper [taumram]. Shem manal is red sand. Shory manal, from (shori, tam. to scatter) is blown sand. Tootnaug manal is sand containing zinc [tootnaug]. Vellay manal is white sand.——*Manaly* (بالو کا ساگ - bálúkáság, Hind.; بالوکی بهاجی - bálúkíbhájí, Dec.; ఇసుకదాసరికూర - isukadásarikúra, Tel.; අත්තිරිල්ලපාල - attirillapála, Singh.; மணலி - manali, Tam.). Title from tamul. Hind. from (bálú, hind. sand + ság, hind. greens). Dec. from (bálú, hind. sand + bhájí, hind. greens). Tel. from (isuka, tel. sand + dásari, tel. vaishnava mendicant + kúra, tel. pot-herb). Tam. from (manal, tam. sand); from habitat [shiva's neem]. Tel. also (isukadontikúra), meaning sand + pile + pot-herb. Title otherwise Chickweed-like gisekia, Sand-greens, Trailing gisekia. Botanically Gisekia pharnaceoides, linn., ficoideæ [vricsham, 66]. Herbaceous; leaves short-petioled, elliptic lanceolate, very obtuse, scarcely mucronulate, pale green above, glaucous white beneath; cymes sub sessile, shorter than the leaf, ball-shaped, simple, five to ten-flowered, somewhat loose; flowers nearly equalling the pedicel, pale green; common weed in pasture grounds, flowering especially during rains. Seeds blackish, smooth, minutely glandular-punctate; embryo curved less than a semi-circle. Powerful anthelmintic in cases of tænia; fresh plant including leaves, stalks, and capsules is employed in doses of about an ounce with sufficient water to make a draught; quoted in pharm. but non-officinal. Leaves are used by natives in preparation of dholl [q.v.].——*Manapaud* (மணப்பாடு - manappádu, Tam.). From (manal, tam. sand + pádu, tam. place). Village, Cape; Tinnevelly dist., Tencaray tal.; pop. 1,648; lat. 8° 23′; long. 78° 06′; from Cape comorin E. 41 miles; from Shreeveicoontam S.S.E. 20 miles; from Tinnevelly S.E. 35 miles. Hamlet of Coolashekharaputnam. South-west of estuary of river Nauttaur. Portuguese settlement in 1542, subsequently a Dutch station. Demolished in 1782. Now inhabited entirely by Roman catholic fishermen. Some finely carved Dutch tombstones. A light here in lat. 8° 22′ 30″; long. 78° 6′ 30″; red; fixed; 6 miles; visible from all direction seaward; white masonry tower. Is intended to warn vessels off the dangerous shoal in the vicinity. The cape itself is a high sandy promontory, based on rock, jutting boldly into the sea and having a small white-washed church on its summit, visible in clear weather for 12 or 13 miles. The breakers extend 3 or 4 miles to the north-east of this point and about one mile to the south-east. The port of Coolashekharaputnam may be known by the ruins of a large church half-buried in sand and the mouth of a small river, too shallow for internal navigation, opening into the bay to the north of Manapaud point. The shoal above-mentioned has its nearest part five miles south-west from Manapaud point. A depth of twelve fathoms is found all round this extensive shoal. It extends east-north-east and west-south-west 10 miles, having an average breadth of one mile, from its centre a tongue projects in a northerly direction. There are other dangerous shoals and

rocks to the east and it is altogether a hazardous place for shipping.——*Manapauray* (மணப்பாறை - manappárai, Tam. manapárai*). From (manal, tam. sand + párai, tam. rock).— "*a*" Deputy tahsildarry, Trichinopoly district. Pay Rs. 70.— "*b*" Village, Deputy tahsildar's station, Railway station, Head assistant collector's division; Trichinopoly dist., Coolitalay tal.; pop. 3,158; lat. 10° 36′; long. 78° 29′; height 512 feet; from Aryalore S.W. 56 miles; from Coolitalay S. 22 miles; from Madras S.W. 208 miles; from Moosiry S. 23 miles; from Shreerungam S.W. 25 miles; from Trichinopoly S.W. 23 miles. Hamlet of Shivalore. A talook called after this town was in 1861 with old talook of Vetticooty made into Coolitalay talook. Public bungalow [q.v.] not built by English. Has lofty circular dome, and resembles large hall in Nawaub's palace in Trichinopoly. Built by Mungammaul as a chuttram [q.v.]. Weekly market, largest in the district, every Wednesday. Also cattle fair. Old Vishnoo temple. Seven miles N.E. are remains of a small military station.——*Manarchaul* (മണ്ണാർശാല - manárççála, Mal.). From (mannan, mal. king + chála, mal. palace). Village; Travancore state, Quilon division, Caurtigapully talook. The village is the principal seat of the serpent-worship in Travancore. It contains the largest temple dedicated to the snake-god, with an extensive cauv [q.v.] or sacred enclosure consisting of a thick shady grove, which many living cobras [q.v.] infest. The temple contains thousands of images of the snake-god and attracts many worshippers.——*Momatty* (खनित्र - khanitra, San.; پھاوڑا - pháurá, Hind.; ದೊಕ್ಕುಬಾರಿ - dokubári, Can.; పార - pára, Tel.; കൈക്കോട്ട് - kaikkóttu, Mal.; மண்வெட்டி - manvetti, Tam.). Title from tamul. San. from (khan, san. to dig). Hind. from (p'hala, san. blade of a weapon). Can. from (dóku, can. to grub + páre, can. crowbar). Mal. from (kai, mal. hand + kóttu, mal. digging instrument). Tam. from (man, tam. earth + vetti, tam. cutter); is digging tool; not in the shape of a spade, but in that of a hoe, with the helve at an acute angle with the blade.——*Munjery* (മഞ്ചേരി - mañchéri, Mal. manjeri*). From (man, mal. loose earth + chéri, mal. village). Town, Talook and Moonsif's head-quarters; Malabar dist., Yernaud tal.; pop. 9,840; lat. 11° 06′; long. 76° 10′; from Calicut E.S.E. 26 miles; from Cannanore S.E. 72 miles; from Madras W.S.W. 310 miles; from Malapooram N.E. 6 miles; from Manantoddy S.S.E. 47 miles; from Palghaut N.W. 42 miles; from Ponnany N.E. 25 miles; from Tellicherry S.E. 61 miles; from the sea E. 20 miles. A Moplah gooroocal family of this place rose in rebellion in 1785-86 A.D. against Arshed beg khan, Tippoo's principal officer. Scene of one of the worst Moplah outrages in 1849. Large dolmens [coday cull]. Public bungalow [q.v.]. Weekly market.——*Munnair* (మన్నేరు - mannéru, Tel. mannér*). From (mannu, tel. sand + éru, tel. river). River; Nellore dist., Canigherry, Oodayagherry, Cauvaly and Cundoocore. Rises in Veligondas near Chundrashekharapooram in Canigherry talook, and after traversing Canigherry, Oodayagherry and Cauvaly talooks in a south-easterly direction and Cundoocore in a north-easterly direction, falls into sea near Binginipully, in the last talook. Runs between August and December. A dangerous river. Feeder to Caraid tank. Not navigable. A causeway near Shingaroyacondah.——*Munnan* (മന്നൻ - mannan, Mal.; மன்னன் - mannan, Tam.). From (mannu, mal. earth). Means a king. Also a pariah proper name [peyar]. Also a tribe of mountaineers in travancore; hardy and very black, speaking bad tamul, employed by the circar [q.v.] to collect cardamoms [q.v.], keep watch, &c.; they cultivate raggy [jauty].——*Munnargoody* (மன்னார்குடி - mannárgudi, Tam.). See sep. title.——*Munnpully* (മണ്ണപ്പള്ളി - manppalli, Mal.). From (mannan, mal. king + palli, mal. village). Greek βαλίτα. Village; Travancore state. Trivandrum division, Cherankeel talook. A little north of Anjengo.——*Muttipaul* (மட்டிப்பால் - mattippál, Tam.). Title from (matti, tam. coarse + pál, tam. milk). Impure juice from trunk of Malabar ailanto.——*Mutty* (మట్టి - matti, Tel.). Earth.——*Mutty paumb* (میٹھے پانی کا سانپ - míthepáníkásámp, Hind.; మట్టిపాము - mattipámu, Tel.; മണ്ണൻ - mannan, Mal.). Title from teloogoo. Hind. from (míthá, hind. sweet + pání, hind. water + sámp, hind. snake). Tel. from (matti, tel. earth + pámu, tel. snake). Mal. from (man, mal. earth + an, mal. personal suffix). Tel. also (allipámu), meaning plant, nymphæa alba, linn. + snake; from likeness of body to stem of the indian water-lily [q.v.]. Terms co-extensive with the family Homalopsidæ ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 18], of naturalists [jantoo]. Fresh-water snakes; have the body of moderate length, cylindrical or slightly compressed; head rather thick, broad, not very distinct from neck; tail strong, of moderate length, tapering, more or less prehensile and compressed at its root, especially in the males; all have a grooved fang at the hinder extremity of the maxillary bone. Easily recognized by position of nostrils on the top of the snout, which enables them to breathe by raising but a very small part of their head out of the water; the same arrangement as that in the crocodiles [mugger], sea-snakes, and other aquatic animals; many have a distinctly prehensile tail, by means of which they hold on to projecting objects; food consists entirely of fish [matsyam], and, in a few species, of crustacea [kavachiny] also; all appear to be viviparous; do not grow to any size; gentle disposition, bite not dangerous, will not feed in captivity. Several of them enter the sea, and in several points approach the truly marine snakes. The following are the two South indian species:—"*a*" Cerberus rhynchops. Alias Cerberus boæformis, cinereus, obtusatus; Elaps boæformis; Homalopsis rhynchops, schneideri; Hurria schneideriana; Hydrus rhynchops. Upper parts blackish ash, with irregular, more or less distinct black cross bars; two or three outer series of scales yellowish; lower parts whitish, with numerous black blotches; labials spotted with black; attains nearly 4 feet.— "*b*" Hypsirhina enhydris. Alias Coluber aeydoux; Homalopsis aer, enhydris, olivaceus; Hydrus enhydris; Hypsirhina aer, bilineata et furcata, trilineata. Brownish olive above, outer series of scales and the belly whitish; blackish line along each margin of the belly. May be seen in rivers as well as in irrigated fields and estuaries, preying upon fishes which, however, it refuses in a state of captivity. Of timid and peaceful habits.——**(10)** *Adaimunn* (पुलिन - pulina, San.; వండ - vanda, Tel.; அடைமண் - adaiman, Tam.). Title and Tam. from (adai, tam. to settle + man, tam. mud). San. means river bank. Tel. from (vattu, tel. to dry up). Tam. also (vandal), meaning sediment; also (vandalman), meaning sediment earth. Alluvium. Clay [calimunn], silt [vandalmunn], sand [manal], and gravel [kankar] deposited from water, especially from rivers, lakes, and seas still existing, or which existed in very late geological times. The commonest case is of deposits formed by rivers overflowing their banks.——*Ayacaly munn* (அயக்களிமண் - ayakkaliman, Tam.). From (ayas, san. iron + kali, tam. clay + man, tam. mud). Clay ironstone. A mixture of carbonate of iron and clay [calimunn], found in beds and nodules, and especially common in the coalmeasures.——*Calar munn* (களர்மண் - kalarman, Tam.). From (kalar, tam. brackish ground + man, tam. mud). Alkaline earth.——*Calimunn* (कृष्णमृत्तिका - krishnamrittiká, San.; چکنی مٹی - chiknímattí, Hind.; బంక మన్ను bankamannu, Tel.; കളിമൺ - kaliman, Mal.; களிமண் - kaliman, Tam.). Title and Tam. from (kali, tam. thick glutinous mass + man, tam. mud). San. from (krishna, san. black + mrittiká, san. mud). Hind. from (chikní, hind. plastic + mattí, hind. earth) [chicken mutty]. Tel. from (banka, tel. gum + mannu, tel. earth). Clay. Argilla of chemists. Clays of every description are found in S. india, including all the varieties of tough plastic ball clays, fire clays, aluminous shales or slate clays, common potter's brown, yellow, grey and black clays, marls, and porcelain earths or kaolins [q.v.]. They are found chiefly amongst the primitive granite [caroomcull] and felspar [mauvayiracull] rocks or amongst the sedimentary and tertiary deposits at the base of granite hills, from the decay of which they are formed. The decaying felspars yield either the white plastic clays, or when mixed with iron and vegetable matter the darker colored varieties. Those granites which contain much mica [abruck], yield very soapy smooth clays in decaying. The pure white felspars [mauvayira cull] and pegmatitis produce the porcelain [kaolin] earths. These occur of the best qualities in Madura, Cuddapah, North arcot, the Neilgherries, and Travancore. In Salem they are accompanied by magnesian clays and armenian bole. The commoner clays are to be found in almost every district. Potter's clay* [chicken mutty] is greasy to touch, and adheres to the tongue; the finer kind, a sort of pipe clay [naumam], is used for the forehead marks [tirmunn]. Other varieties of clay, used in medicine by veidyans are Armenian bole [ghilarminy], Shilajit [q.v.] of nepaul, and Gopy [q.v.]. Alumina consists of pure clay; in its crystalline form it is the base of corundum [q.v.], emery, and other hard polishing substances used in the arts; combinations of it yield fuller's earth [dhoby's earth], pipeclay [tirmunn], ochres [cauvy], &c.; a dye for calico-printers is procured from it, and it enters into the manufacture of porcelain [kaolin].——*Carisal munn* (கரிசல்மண் - karisalman, Tam.). From (karisal, tam. darkness + man, tam. mud). Dark humus in Tamul districts; much resembles the regar [q.v.] or black-cotton soil of the Ceded districts [q.v.], and is soft and plastic when wet. It ranks next to Tamul sevval [sevval munn] in productive power.——*Caunta munn* (காந்தமண் - kándaman, Tam.). Magnesia. See sep. title.——*Jaidy munn* (ചേടിമൺ - chétiman, Mal.). Mal. from (chéti, mal. glutinous earth + man, mal. soil). White clay mixed with small pieces of quartz [vencull], with which, in conjunction with the ashes of the Muddy tree [murdah], the natives of Malabar prepare a whitewash for their houses.——*Morapa munn* (మొరపమన్ను - morapamannu, Tel.). From (moramu, tel. gravel + mannu, tel. earth). Gravelly soil.——*Oovar munn* (ऊषरभूमि - úsharabhúmi, San.; ریہمٹی - rehmittí, Hind.; ಚೌಳುಮಣ್ಣು - chaulumunnu, Can.; చవిటిమన్ను - tsavitimannu, Tel.; ഓരുമൺ - órman, Mal.; உவர்மண் - uvarman, Tam.). Title and Tam. from (uvar, tam. saltishness + man, tam. mud). San. from (úshara, san. saline + bhúmi, san. soil). Hind. from (reh, hind. impure carbonate of soda + mitti, hind. earth). Tel. from (tsavudu, tel. fuller's earth + mannu, tel. earth). Mal. from sanscrit. Dhoby's earth [q.v.].——*Pasalay munn* (பசலைமண் - pasalaiman, Tam.). From (pasalai, tam. sallowness + man, tam. mud). Loam. A soil composed of clay [calimunn] and fine sand [manal].—

Pashima munn (പശിമമണ്ണ് - pashimaman, Mal.). From (pashima, mal. softness + man, mal. soil). A deep, clayey soil. ——*Pashimaraushy munn* (പശിമരാശിമണ്ണ് - pashimaráshiman, Mal.). From (pashima, mal. softness + ráshi, san. heap + man, mal. soil). Loam with an admixture of sand [manal].——*Raushy munn* (രാശിമണ്ണ് - ráshiman, Mal.). From (ráshi, san. heap + man, mal. soil). Soil formed by the decomposition of heaped up substances. Sandy soil.——*Sevval munn* (ಎರೆಭೂಮಿ - erebhúmi, Can.; ఎర్రభూమి - errabhúmi, Tel.; செவ்வல்மண் - shevvalman, Tam.). Title and Tam. from (shevval, tam. red soil + man, tam. mud). Tel. from (erra, tel. red + bhúmí, san. soil). Reddish loam soil. Its chief constituent is ferruginous red sand [manal]. It is plastic when wet but friable when dry.——*Shavatt munn* (சவட்டுமண் - shavattuman, Tam.). Any earth containing sowdoo [q.v.].——*Shemmunn* (ఎర్రమన్ను - erramannu, Tel.; ചെമ്മണ്ണ് - chemman, Mal.; செம்மண் - shemman, Tam.). Title and Tam. from (shem, tam. red + man, tam. mud). Tel. from (yerra, tel. red + mannu, tel. earth). Ruddle.——*Sooddy munn* (ಸುದ್ದಿಮಣ್ಣು - suddimannu, Can.; సుద్దమన్ను - suddamannu, Tel.). From (shuddha, san. pure + mannu, can. mud). A kind of white pipe clay [tirmunn] used in terracing mud houses in cold countries.——*Sookkaun munn* (कर्करभूमि - karkarabhúmi, San.; சுக்கான்மண் - shukkánman, Tam.). Title and Tam. from (shukkán, tam. limestone + man, tam. mud). San. from (karkara, san. hard, nodular stone + bhúmi, san. earth). Otherwis kankar [q.v.] soil. Largely impregnated with carbonate of lime [sheemay choonam] and exhibits a whitish calcareous incrustation on its surface. This description of soil is exceedingly barren and unproductive.——*Tirmunn* (श्वेतमृत्तिका - svétamrittiká, San.; کھری - kharí, Hind. and Dec.; ನಾಮ - náma, Can.; ನಾಮ - náma, Too.; నామము - námamu, Tel.; നാമം - námam, Mal.; මකුල් - makul, Singh.; திருமண் - tiruman, Tam.). San. from (shvéta, san. white + mrittiká, san. clay). Can. means mark on forehead, from use [naumam]. Tam. from (tiru, tam. sacred + man, tam. mud). Singh. also (makulmati), meaning bright + pipe clay. Tam. also (námam), meaning mark on the forehead; (námakkatti), meaning forehead mark + lump. Pipe clay. With this Veishnavites prepare white tirchoornam [q.v.], with which they mark their foreheads perpendicularly. Of this natives make also white and finer kind of earthenware. It is in use amongst painters and is employed by the sepoys [q.v.] in cleaning their belts.——*Valayal munn* (வளையல்மண் - valaiyalman, Tam.). Bangle earth [gauzoo].——*Vandal munn* (ಎಕ್ಕಲುಗದ್ದೆ - ekkalugadde, Can.; వండ - vanda, Tel.; வண்டல்மண் - vandalman, Tam.). Title and Tam. from (vandal, tam. sediment + man, tam. mud). Silt. Fine sediment from water, especially from rivers. Alluvial soil [adaimunn]. This is a somewhat pulverized form of the soil called Sevval, which see. This soil produces good garden crops.

MUNNARGOODY (மன்னார்குடி - mannárgudi, *Tam.* mannárgudi*).——**(1)** From (mannan, tam. king + kudi, tam. town) [munn]. Sanscrit name (víranáráyanapura), meaning hero + vishnoo, the mover on the waters + town. Otherwise Munnaurcoil, or Cautt munnaurcoil to distinguish it from rajah munnaurcoil or munnargoody in Tanjore.—"*a*" Deputy tahsildarry, Chidambaram talook, South arcot district. Pay Rs. 70.—"*b*" Deputy tahsildar's station; pop. 1,936; acres 569; lat. 11° 16′; long. 79° 36′; from Chidambaram S.W. 13 miles; from Cuddalore S.S.W. 34 miles; from Madras S.S.W. 132 miles; from Tindivanam S.S.W. 67 miles; from Tricalore S.E. 53 miles; from Vriddhauchellam S E. 23 miles; from the sea W.S.W. 22 miles. Former head-quarters of talook of same name. Large tank and Vishnoo temple. French grain depôt was destroyed by the English in 1754. Weekly fair.——**(2)** From (mannan, tam. king + gudi, tel. temple); called after raghoonaut naick, the king who built the temple. Tam. also (mannárkkóyil), meaning king + temple. Sanscrit name (champakáranya), meaning champak tree, michelia champaca, linn. + forest; also (dakshinadváraká), meaning southern dwarca. Otherwise Rajah munnaurcoil to distinguish it from cautt munnaurcoil near chidambaram. Talook, Tanjore district; Tahsildar's pay Rs. 200; area 301 square miles; pop. 187,434; language mostly Tamul. Inland S. central. Boundaries N. Nunnilam and Combaconam talooks; E. Negapatam and Tritrapoondy talooks; S. Tritrapoondy and Puttoocottah talooks; and W. Puttoocottah and Tanjore talooks. Flat country. Soil, chiefly black clay, red soil in the west. Chiefly agricultural. Coarse mats; vessels of brass and other metals; rough paper; country cloth and paddy [q.v.] are the main articles of commerce. Irrigation by the Ayenaur, Coraiyaur, Harichendranuddy, Moollaiyaur, Paumaniyaur, and Vennaur and some tanks. Places of archæological interest:—Abhishaicacuttalay, Agravelacoody, Annaumalaynautancoil, Atchaulpooram, Caloovattore, Carappookilaur, Cazhappaul, Coilvunny, Coonniyore, Manacaray; Munnargoody, Narvalikilappaul, Nautyattaungoody, Needamungalam, Palashillaraytottam, Paulacoorchy, Paumany, Poothootevangoody, Poovanore, Pothoocoody, Shauttanore, Tircalary, Tirchattimoottam, Tirnellicauval, Trimacottah, Trirameshwaram, Trivandootoray, Tunneercoonnam, Veloocoody, Vicrapaundyam. Principal trig. station:—Moovanullore. The leading places, &c., in the talook are the following.——*Coilvunny* (கோவில்வன்னி - kóvilvanni, Tam.). From (kóvil, tam. temple + vanni, tam. prosopis spicigera, linn.). Village; pop. 1,953; acres 2,048; lat. 10° 47′; long. 79° 24′; from Munnargoody N.W. 11 miles; from Tanjore E. 15 miles. On the road from Needamungalam to Tanjore, two miles east of Ammapett railway station. Old Shiva temple.——*Cootanullore* (கூத்தாநல்லூர் - kúttánallúr, Tam.). From (kúttan, tam. a dancer + nal, tam. good + úr, tam. village). Village; pop. 3,266; acres 478; lat. 10° 42′; long. 79° 34′; from Munnargoody E.N.E. 5 miles; from Tanjore E.S.E. 27 miles. On the Vennaur. Old Shiva temple, betel [q.v.] vines largely cultivated. Mussulmans [q.v.] and Lubbays [q.v.] emigrate to Burmese ports.——*Coraiyaur* (கோரையாறு - kóraiyárú, Tam.). See sep. title.——*Cotore* (கோட்டூர் - kóttúr, Tam.). From (kódu, tam. bank + úr, tam. village). Village; pop. 1,653; acres 1,263; lat. 10° 37′; long. 79° 36′; from Munnargoody E.S.E. 8 miles; from Tanjore E.S.E. 30 miles. On the Adappaur, between Munnargoody and Tritrapoondy. ——*Mahadevaputnam* (மகாதேவப்பட்டணம் - magáthévappattanam, Tam.). From (mahádéva, san. shiva, the great god + pattana, san. town). Village; pop. 1,325; acres 2,092; lat. 10° 36′; long. 79° 27′; from Munnargoody S.W. 6 miles; from Tanjore S.E. 22 miles. On the trunk road from Munnargoody to Puttoocottah. Captured by Hyder ally in the latter part of the eighteenth century; recaptured by the English under Colonel Brathwaite. Tomb of a Mahratta ranee [q.v.] and a Vishnoo [q.v.] temple. Fort in ruins and a small chuttram [q.v.]. Weekly fair on Thursday.——*Mailnuttam* (மேலநத்தம் - mélanattam, Tam.). From (mél, tam. west + nattam, tam. village). Village; pop. 1,047; acres 750; lat. 10° 32′; long. 79° 29′; from Munnargoody S. 9 miles; from Tanjore S.S.E. 27 miles. Wesleyan mission station.——*Moovanullore* (மூவாநல்லூர் - múvánallúr, Tam.). From (múváy, tam. three ways + nal, tam. good + úr, tam. village). Lat. 10° 41′; long. 79° 28′; from Munnargoody W.N.W. 3 miles. ——*Munnargoody* (மன்னார்குடி - mannárgudi, Tam.). See below.——*Needamungalam* (நீடாமங்கலம் - nídámangalam, Tam.). See sep. title.——*Peinganaud* (பைங்காநாடு - paingánádu, Tam.). From (pai, tam. green + ká, tam. grove + nádu, tam. country). Village; pop. 1,923; acres 5,018; lat. 10° 35′; long. 79° 30′; from Munnargoody S. 5 miles; from Tanjore S.E. 24 miles.——*Peroovaundaun* (பெருவாழ்ந்தான் - peruvázhndán, Tam.). From (peruga, tam. prosperously + vázhndán, tam. one who lives). Village; pop. 4,075; acres 5,622; lat. 10° 30′; long. 79° 32′; from Munnargoody S. 13 miles; from Tanjore S.E. 31 miles. Between the Coraiyaur and the Paumaniyaur. Four small temples, two Vishnoo and two Shiva.——*Poovanore* (பூவனூர் - púvanúr, Tam.). From (pú, tam. flower + vana, san. garden + úr, tam. village). Sanscrit name (pushpavana), meaning flower garden. Village; pop. 1,299; acres 1,516; lat. 10° 45′; long. 79° 28′; from Munnargoody N.N.W. 6 miles; from Tanjore E. 17 miles. On the Paumaniyaur, on the road from Munnargoody to Needamungalam, two miles south of Needamungalam railway station. Old Shiva temple. ——*Trimacottah* (திருமக்கோட்டை - tirumakkóttai, Tam.). From (tirumal, tam. proper name + kóttai, tam. fort), trimal's fort. Sanscrit name (brahmapura), meaning bramha's city. Village; pop. 993; acres 3,300; lat. 10° 32′; long. 79° 30′; from Munnargoody S. 9 miles; from Tanjore S.E. 27 miles. Two well-endowed temples, one Shiva and the other Vishnoo. Weekly market on Sunday.——*Vadivore* (வடிவூர் - vadivúr, Tam.). From (vadivu, tam. beauty + úr, tam. village). Sanscrit name (dakshináyódhyá), meaning southern ayodhyay. Village; pop. 5,031; acres 1,474; lat. 10° 42′; long. 79° 22′; from Munnargoody W. 9 miles; from Tanjore E.S.E. 14 miles. On the road from Tanjore to Munnargoody. Old Vishnoo temple frequented by pilgrims. Large tank in the vicinity.——*Vicrapaundyam* (விக்கிரப்பாண்டியம் - vikkirappándiyam, Tam.). From (vikramapándya, san. a pándya king). Village; pop. 1,158; acres 1,424; lat. 10° 39′; long. 79° 38′; from Munnargoody E.S.E. 9 miles; from Tanjore E.S.E. 31 miles. On the southern bank of the Harichendranuddy. Two temples of Shiva and Vishnoo.——**(3)** Same etymologies. Town, Municipality, Head-quarters of Deputy collector, Tahsildar, District moonsif and D.P.W. Sub-division; Tanjore dist., Munnargoody tal.; pop. 20,395; acres 1,342; lat. 10° 40′; long. 79° 30′; height 196 feet; from Combaconam S.S.E. 20 miles; from Madras S.S.W. 173 miles; from Mayavaram S.S.W. 32 miles; from Negapatam W.S.W. 27 miles; from Tanjore E.S.E. 24 miles. On the southern bank of the Paumaniyaur, a branch of the Vennaur which irrigates the western portion of the talook. Considerable bramin population. Contains a bathing tank called Haridranuddy, 1,158 feet long, 837½ feet broad. There are nine old temples, four Vishnoo and five Shiva. Rajagopaulsawmy temple, the largest and most important, built by rajah Ragoonaut naick. Annual festival in March. Old Jeina [q.v.] temples in good order, and a mile west a ruined fort belonged to Ballaula raja. Car [rath] festival in connection with the pagoda [q.v.]. In the hamlets of Keilausanautapooram and Melamadapooram are two old Shiva temples; in the hamlet of Ashaisham three old temples of Shiva, Vishnoo, and Ganesh; and in the hamlet of Toondan cuttalay an

old Shiva temple. Considerable trade in country goods, paddy [q.v.], chiefly metal-ware of local manufacture. Chief seat of the Wesleyan mission. Weekly market every Tuesday.

MUNTJAC (منتجاك - mantják, *Malay*). Jungle sheep.

MUNTRAM (मन्त्र - mantra, *San.*; منتر - mantar, *Hind.*). From (mantr, san. to speak indistinctly). A prayer or charm. As distinguished from tantram [q.v.], it is the invocation only; tantram being the form or ritual or rubric. A muntram is either good or bad, from its nature and its intent. It is distinguishable from shaunty [q.v.], a litany; the latter being long and poetical, while the muntram is usually restricted to a few letters, syllables or words. The muntram is the simple original form; the maulay muntram is a string of comments, or paraphrases founded on the simple form. The good muntrams are few; the evil and malignant muntrams especially among the Sheivas and Shactibhactans [q.v.] are numerous. The tauntric system is founded on them, and the atarvanam vedam [q.v.] teaches them. The tri-literal (aum) or om [q.v.] is a primitive muntram, having extraordinary power [gayatry]. The Sheiva muntram is of five letters, representing the five elements (na ma si va ya); this also has miraculous power [moola muntram, punchaucsharam]. Another form is (om nama shivaya), six-lettered, used by the votaries of Soobramanyan [q.v.]. The veishnava muntram is eight-lettered, (om na mo na ra ya na ya) [matam]. Muntram also stands for the art of magic generally. The Tamuls enumerate sixty-four arts and sciences and of these twenty are connected with magic as follows:—the art of summoning by enchantment; exorcism; exciting hatred between parties by magical spells; libidinous fascinations produced by enchantment; the art of subduction by magic; charms against poison; information respecting anything concealed in the palm of the hand; the art of entering into the air and becoming invisible; the art of walking in the air; the power of leaving one's own body and entering another lifeless body or substance at pleasure; the power of making one's self invisible; the art of conjuring; the art of performing wonders in heaven and earth; restraining the action of fire; counteracting the yielding quality of water so as to be able to walk on its surface; the art of restraining the power of the mind; the art of fascinating the eyes; the art of fascinating the mouth; the art of preventing the discovery of things concealed; the art by which the power of the sword or any other weapon is nullified. For the nature of the magical rites used by the Tamulians see the foot-note on vol. I (109). By Mahomedans, incantation is held lawful only when the help of God is invoked in practising it, and when no one is associated with him; and is practised for good purposes. This science is generally resorted to, to establish friendship, to cause the cure of a certain person, to secure the accomplishment of one's wishes, to obtain victory in battle.——*Muntraula canama* (మంత్రాలకనమ - mantrálakanama, Tel.). From (mantrálamma, tel. a goddess + kanama, tel ravine). From muntraulammah, a wooden idol at the eastern foot, chiefly worshipped by lumbaudies [q.v.]. Also known as the Dornaul pass from dornaul, a village at the eastern entrance. Pass; Kurnool dist., Nundicotcore and Marcapore tals.; lat. 15° 54′; long. 78° 55′; from Cumbum N.W. 28 miles; from Kurnool E. 51 miles; from Nundicotcore E. 37 miles; from Madras N.N.W. 215 miles; from Nundiaul N.E. 34 miles; from Pyaupaly N.E. 85 miles. Northernmost pass on the Nullamullays, between Nundicotcore and Marcapore talooks, about 15 miles in length. Chiefly used by Brinjarries [q.v.], who export salt from the coast of Kistna district to inland districts on pack bullocks and asses. Wheeled traffic generally prefers the Nundicanama pass which is provided with a good road. About half-way is Rollapenta.——*Muntraulammah* (మంత్రాలమ్మ - mantrálamma, Tel.). From (above + amma, tel. goddess). Goddess of charms.——*Muntry* (मन्त्री - mantrí, San.). A minister [vizier]. In old South indian governments, the first of the three regular ministers. The Muntry is the prime minister, the king's adviser in matter, of state; especially in matters of internal government, and externally of peace or war. The Pradhauny [q.v.] is the Lord high treasurer; office often usurped by the Muntry. The Dalavoy [q.v.] is the commander of the forces. In modern, and weak governments, the latter sometimes assumed the other two offices, the king being in virtual confinement, and shown as a puppet occasionally to the people. The Tamul Cooral has the following:—எற்றென் றிரங்குவ செய்யற்க செய்வாரே னன் மற்றன்ன செய்யாமை நன்று—"Let a minister "never do acts of which he would have to grieve saying, What "is this I have done? but should he do them, it were good that "he grieved not."—தொகச்சொல்லித் தூவாத நீக்கி நகச் சொல்லி நன்றி பயப்பதாம் தூது—"He is an ambassador "who, in the presence of foreign rulers, speaks briefly, avoids "harshness, talks so as to make them smile, and thus brings "good."—கூறாமை நோக்கிக் குறிப்பறிவானெஞ் ஞான்று மாறாநீர் வையக் கணி—"The minister who by looking at "the king understands his mind without being told of it, will "be perpetual ornament to the world which is surrounded by a "never-drying sea." Muntry mahanaud is the minister and council of the nation. Muntry also means Coobairan [q.v.] as prime minister of Shiva [q.v.].

MUNTSOO (మంచు - mantsu, *Tel.*). Dew [pany].——*Muntsoocaur* (మంచుకారు - mantsukáru, Tel.). Dewy season [caurtey].

MURDAH (آسن - ásan, *Hind.*; جنگلی کرنج - janglíkaranj, *Dec.*; ಮತ್ತಿ - matti, *Can.*; మద్ది - maddi, *Tel.*; ସହଜ - sahajo, *Oor.*; മരുത - marutu, *Mal.*; කුඹුක් - kumbuk, *Singh.*; மருதம் - marutham, *Tam.*). Title from malayalam. Hind. from (asana, san. black murdah). Dec. from (janglí, hind. wild + karanj, hind. pongamia glabra, vent.). Tam. from (maru, tam. fragrance), from a fragrant species. Can. also (banipu); A common term for certain Terminalias.——*Black murdah* (असन - asana, San.; असणा - asaná, Mahr.; मत्तीरूकु - mattírúku, Conc.; آسن - ásan, Hind.; جنگلی کرنج - janglíkaranj, Dec.; ಕುದುರೆಕಿವಿಗನಮರ - kudurekiviganamara, Can.; నల్లమద్ది - nallamaddi, Tel.; କାଳସହଜ - kálásahajo, Oor.; കരിമരുത - karimarutu, Mal.; කුඹුක් - kumbuk, Singh.; கருப்புமருதம் - karuppumarutham, Tam.). Title from color of wood. San. from (as, san. to drive-away). Mahr. from sanscrit. Hind. from sanscrit. Dec. from (janglí, hind. wild + karanj, hind. pongamia glabra, vent.). Can. from (kudure, can. horse + kivi, can. ear + mara, can. tree). Tel. from (nalla, tel. black + maddi, tel. terminalia arjuna, bedd.). Oor. from (kálá, hind. black + sahajo, oor. terminalia). Mal. from (kari, mal. black + marutu, mal. terminalia tomentosa, bedd.). Tam. from (karuppu, tam. blackness + marutham, terminalia tomentosa, bedd.). San. also (pítasálaka), meaning yellow, shorea robusta, gærtn. Hind. also (sadrí); (arjan), meaning terminalia. Can. also (karimatti), meaning black + the tree; (sóhonne). Tel. also (inumaddi), meaning iron + terminalia arjuna, bedd. [common saul]. Oor. also (saháju). Mal. also (marutu). Tam. also (marutham) [marootham]; (karimatti), meaning black + terminalia paniculata, rottl. Title otherwise Ashanam, Black maroothum, Negroe's olive, Sahajo, Winged terminalia. Botanically Terminalia [antya parny] tomentosa, bedd., var. typica, combretaceæ [vricsham, 55]. Alias Chunco tomentosa; Pentaptera tomentosa; Terminalia alata. Large tree; bark deeply cracked; leaves nearly opposite, linear-oblong, somewhat cordate at the base, pubescent, but finally glabrous above, tomentose or pubescent beneath, with thick-stalked turbinate glands on the midrib near the base; fruit glabrous; spikes disposed in a brachiate panicle; flowers small, greenish white. Bark is reddish brown, unpleasant astringent taste. A sacred tree [poonyoshadhy]. Gives to pharm. bark, non-officinal, astringent and febrifuge; used both externally and internally; juice of leaves poured into ears for earache. Ashes from burnt bark produce a kind of choonam [q.v.] eaten with betel [q.v.] leaf [white murdah]; plant yields a gum [gond] used as an incense and cosmetic; bark imparts the characteristic red color to native leather [chamrah], gives a black dye [shauyam], with iron [auhan]; bark is used for tanning [chamrah]. Sap-wood reddish-white, heart-wood dark-brown, hard, variegated with streaks of darker color, showing on a radial section as dark streaks which are generally wavy or undulating; durable, seasons well, and takes a good polish; the wood splits however unless thoroughly seasoned; an excellent fuel, and makes good charcoal [kary]; used for the wheels [nemmy] of the heavy idol carts at the pagodas; when well polished resembles walnut [acroot].——*Flowering murdah* (किंजल - kinjala, Mahr.; ಹುಲುವೆ - huluve, Can.; నిమిరి - nimiri, Tel.; പൂമരുത - púmarutu, Mal.; பூமருதம் - púmarutham, Tam.). Mal. from (pú, mal. flower + marutu, mal. terminalia). Tam. from (pú, tam. flower + marutham, tam. terminalia). Can. also (honal); (kírijul); (kondul); (marwah). Tel. also (maddi). Mal. also (pullamarutu), meaning yellowish + terminalia. Tam. also (pillamarutham), meaning yellow murdah, common in anamullays and malabar. Title otherwise Poo murdah. Botanically Terminalia [antya parny] paniculata, roth., combretaceæ [vricsham, 55]. Alias Pentaptera paniculata. Tree with diverging branches; leaves nearly opposite, linear-oblong, cordate at the base, acute or obtuse at the apex, coriaceous, rugose above, with umbilicate glands beneath near the base; spikes forming a compound panicle; drupe with one large and two small wings; flowering in november and december. Flowers used, pounded with the root of cissampelos pareira [indian pareira], as a remedy in cholera; the juice of the flowers along with that of guava [q.v.] bark is administered as an antidote in poisoning by opium [aphainam]; if the flowers are not obtainable the bark may be used; the juice of the flowers or bark, with melted butter [q.v.] and rock salt [sondah namak], is applied externally in parotitis. Bark contains tannin; fruit brown-red, used in dyeing. Wood grey, with dark heart-wood, very hard, not equal to tomentosa; improved by being kept under water.——*Leathery murdah* (बणपु - banapu, Conc.; آسن - ásan, Hind.; ಬನಪು - banapu, Can.; ಬನ್ಪು - banpu, Too.; கருமருதம் - karumarutham, Tam.). Title from leaves. Hind. from (asana, san. black murdah). Tam. from (karumai, tam. blackness + marutham, tam. the tree, terminalia tomentosa, bedd.). Can. also (matti); (marthu). Tam. also (shathagam), properly terminalia bellerica, roxb. Title otherwise Banapoo. Botanically Terminalia [antya parny] tomentosa, bedd., var. coriacea, combretaceæ [vricsham, 55]. Alias Pentaptera coriacea; Terminalia coriacea. Tree; bark deeply cracked; leaves nearly opposite, short-petioled, coriaceous, oval, cordate at the

base, hard above, hoary and soft beneath, one to two sessile glands at or near the base of the midrib; spikes panicled; nut hoary; flowers small, dull yellow; flowering in july. Strong, hard, and heavy timber.——*White murdah* (अर्जुन - arjuna, San. and Mahr.; ارجن - arjan, Hind. and Dec.; ಬಿಳಿಮತ್ತಿ - bilimatti, Can.; తెల్లమద్ది - tellamaddi, Tel.; ହଂଜଳ - hanjal, Oor.; പുല്ലമരുതു - pullamarutu, Mal.; කුඹුක් - kumbuk, Singh.; வெள்ளைமருதம் - vellaimarutham, Tam.). Title from color of wood. San. means white. Hind. from sanscrit. Can. from (bili, can. white + matti, can. terminalia tomentosa, bedd., var. typica). Tel. from (tella, tel. white + maddi, tel. the tree). Mal. from (pulla, mal. yellowish + marutu, mal. terminalia). Tam. from (vellai, tam. white + marutham, tam. terminalia). San. also (nadísarja), meaning river + shorea robusta, gærtn.; (indradru), meaning indran's tree, as growing near water; (kakubha), meaning distinguished tree. Can. also (toramatti), meaning river + terminalia tomentosa, bedd., var. typica; (banipu). Tel. also (maddi); (erramaddi), meaning red + the tree; (érumaddi), meaning river + the tree. Oor. also (karedha). Mal. also (vellamarutu), meaning white + terminalia. Tam. also (vellaimatti), meaning white + the tree so called; (karumarutham), meaning black + terminalia. Title otherwise Arjoon tree, Mutty tree, River saul. Botanically Terminalia [antya parny] arjuna, bedd., combretaceæ [vricsham, 55]. Specific name from san. Alias Pentaptera angustifolia, arjuna, berryi, glabra; Terminalia berryi, crenulata, glabra. Gigantic tree; bark smooth; leaves nearly opposite, narrow-oblong, obtuse or acute at the apex, glabrous on both sides, often reddish beneath, with some nearly sessile glands near the base of the midrib; spikes terminal; drupe ovate, with five to seven equal longitudinal wings; flower small, greenish white; flowering in may, april; common near banks of rivers. The bark is generally sold in short half quills, from ⅛–¼ of an inch thick, and several inches long; it has a pinkish color, which is seen through the thin grey epidermis; its substance is fibrous and gritty under the teeth; it breaks with a short fracture, the internal surface being of a lighter color and finely striated; the taste is agreeably astringent; the ash amounts to 34 per cent. of almost pure calcium carbonate, watery extract is 23 per cent., 16 per cent. of tannin. Bark is medicinally a tonic internally, and a vulnerary externally. Ashes from burnt bark produce a kind of choonam [q.v.] which is eaten with betel [q.v.] leaf [black murdah]. Largely planted as an avenue [shaulay] tree, particularly in south; bark is astringent and used for dyeing black [shauyam] and for tanning [chamrah]; gives a brown translucent gum [gond]. Sap-wood reddish white; heartwood brown, variegated with darker-colored streaks; the wood is apt to split in seasoning and is not easy to work; boats are often made from it; inferior to tomentosa, but a valuable timber [maram]. There is a variety angustifolia.

MURREL (پھول مرل - phúlmaral, *Hind.*; مرل - maral, *Dec.*; ಹುವ್ವಿನಮರಳು - huvvinamaralu, *Can.*; పూచేప - púchépa, *Tel.*; ചൗരിവരാൽ - chaurivarál, *Mal.*; பூவிரால் - púvirál, *Tam.*). Title from deccany. Hind. from (phúl, hind. flower + maral, hind. murrel); from spots on body. Can. from (huvvu, can. flower + maralu, can. murrel). Tel. from (puvvu, tel. flower + chépa, tel. fish). Mal. from (chauri, mal. courageous + varál, mal. ophiocephalus genus). Tam. from (pú, tam. flower + virál, tam. caboz, ophiocephalus genus). Mal. also (kuruva), meaning small fish. Title otherwise Walking fish. Ophiocephalus [doke] marulius, ophiocephalidæ [walking fish], acanthopterygii, teleostei [matsyam, 29], of naturalists [jantoo]. Specific name from deccany. Alias Ophiocephalus aurolineatus, theophrasti. Scales on head are roughened by raised lines, which surround in an angular course a central spot, on the body the outer edge of the scales are smooth. Colors vary both with age and the water they reside in. Back grayish green, immature with brilliant orange band passing from eye to middle of caudal fin, but in more mature there are five or six cloudy bands descending to below lateral-line; abdomen orange, bases of each scale darkest; on posterior third of body, on dorsal, anal, and caudal fins are pearly-white spots, generally a large black ocellus at upper part of base or first third of caudal fin, which latter is gray, ventrals orange. Freshwaters, principally rivers; four feet in length. Very savage, protecting their young with great boldness. Take a live bait pretty well.——*Pariah murrel* (शाल - shála, San.; डाखु - dákhu, Mahr.; ڈھیری مرل - dherímaral, Hind.; ಕುಚ್ಚನಮುರಳು - kuççinamuralu, Can.; శవార - savára, Tel.; ଶୋଲ - sola, Oor.; വരാൽ - varál, Mal.; ලූලා - lúlá, Singh.; வரால் - varál, Tam.). Title from dark gray color. Mahr. means dark stained. Hind. from (dherí, hind. pariah + maral, hind. murrel). Can. from (kuççu, can. bunch + maralu, can. murrel). Tel. means beauty. Oor. from sanscrit. Mal. from (vara, mal. stripe). Tel. also (korramínu), meaning dart + fish; (púchépa), meaning flower + fish. Mal. also (kuruntala), meaning depressed head; (vrál). Singh. also (hálpatmálu). Tam. also (karuppuvirál), meaning blackness + caboz, ophiocephalus genus. Ophiocephalus [doke] striatus, ophiocephalidæ [walking fish], acanthopterygii, teleostei [matsyam, 29], of naturalists [jantoo]. Alias Chena sola; Ophiocephalus chena, wrahl. Sola from sanscrit; wrahl from tamul. Lower jaw longer. Scales plate-like on summit of head large and irregularly shaped, from eighteen to twenty rows between snout and origin of dorsal fin; nine rows between eye and angle of preopercle. Scales on head are roughened in lines parallel to margins, on body they are arched towards centre of each. Colors dark grayish or blackish superiorly, dirty-white or yellowish white beneath; cheeks and lower surface of mouth streaked and spotted with gray; bands of gray or black from sides to abdomen. Spots and bars at posterior end of dorsal fin; ventrals and anal grayish, with whitish lines or spots along base of latter. In the young there is occasionally a large black ocellus at the end of base of dorsal fin, and the body may be destitute of any marks. Freshwaters throughout the plains, especially delighting in swamps and grassy tanks; attain 3 feet or more in length. They take bait very readily, especially a frog, and rise to the salmon fly.——*Sea murrel* (शकल - shakala, Mahr.; పెద్దముట్టె - peddamutte, Tel.; கடல்விரால் - kadalvirál, Tam.). Title from habitat. Tel. from (pedda, tel. large + mutte, tel. fish, clupea longiceps). Tam. from (kadal, tam. sea + virál, tam. caboz, ophiocephalus genus). Elacate nigra, scombridæ, acanthopterygii, teleostei [matsyam, 19], of naturalists [jantoo]. Alias Centronotus gardenrii; Elacate bivittata, canada, malabarica, motta, pondiceriana; Meladerma nigerrima; Scomber niger, peddah mottah. Motta, from (mutte, tel. clupea longiceps); peddahmottah from teloogoo. Upper surface of head flat; olivaceous brown, having dark band along back below base of dorsal fin and another along centre of side. Fins brownish, with dark or black edges. Outer edges of caudal lobes white. Sea; 13½ inches in length. No other common species here.

MURRY (మఱ్ఱి - marri, *Tel.*). From (marugu, tel. shelter). Banyan tree. Suffix in place names.——*Marla* (మర్ల - marla, Tel.). From (marri, tel banyan tree). Locative plural. Suffix in place names; as Collimarla, meaning river banyans. Or prefix; as Marlapaud, banyan spot.——*Murry aukoo krishnan* (మఱ్ఱిఆకుకృష్ణుడు - marriákukrishnudu, Tel.). From (above + áku, tel. leaf + krishna, san. the god). Krishnan [q.v.] in one of his manifestations, where he is represented floating on a banyan [q.v.] leaf in the water [aulileimail pullicondone].

MURRY (మరి - mari, *Tel.*). Again.——*Murry caur* (మరికారు - marikáru, Tel.). From (above + káru, tel. crop). A second crop. Distinguish from Mauricaur [caur].

MURSOOL (مرسول - marsúl, *Hind.*). From (rasula, ar. to send) [irsaul]. Forwarded, especially with a letter.

MUSANG (موسڠ - músang, *Malay*). Toddy cat [q.v.].

MUSHNY (ಮಶಿನಿ - mashini, *Can.*). From (mashi, can. black); black goddess [cauly, parvaty]. Wife of shiva [q.v.] among the Coorumbar [q.v.] of neilgherries.——*Mushnigoody* (ಮಶಿನಿಗುಡಿ - mashinigudi, Can. masingudi *). From (masini, can. the goddess of that name + gudi, can. temple). Village; Todanaud division, Neilgherry dist.; pop. 1,361; acres 33,120; lat. 11° 34′; long. 76° 41′; from Ootacamund N.N.W. 12 miles. On the Seegore road. Most populous village in feverish Seegore valley.

MUSHROO (مشرو - mashrú, *Hind.*). From (shara, ar. law); from being permitted at prayers, where pure silk is prohibited. Fabric of satin with cotton back, used by well-to-do classes for trouserings of both sexes, for covering cushions, &c. Very strong and durable, washes well and preserves color. Manufactured at Madras, Trichinopoly, &c. Now going out of fashion [sheelay].

MUSJID (مسجد - masjid, *Hind.*; మసీదు - masídu, *Tel.*; പള്ളി - palli, *Mal.*; மசூதி - masúthi, *Tam.*). From (sajada, ar. to bow). The mosque or place of Mahomedan public prayer [namauz]. Mosques are generally built of stone or brick, in the form of a square, in the centre of which is an open courtyard, surrounded with cloisters for students. In the centre of the wall facing Mecca is the mihraub [q.v.] or niche, which marks the direction of the Caaba [q.v.] at Mecca, and on the right of this niche is the mimbar [q.v.] or pulpit from which the Friday oration [khootbah] is recited. In the centre of the open court-yard, there is usually a large tank [howz], in which the worshippers perform their ablutions, and adjoining the mosques are lavatories in which the legal washings can be performed. Along the front, within the doorway is a low barrier, a few inches high, which denotes the sacred part of the mosque, at which the Mahomedan stops, takes off his shoes, carries them in his left hand sole to sole, and puts his right foot first, as he passes into the square devoted to prayer. If he have not previously performed the ablution, he repairs to the tank to perform the necessary duty. Round each mosque there are either two or four high towers. These are called minarets [meenaur], and from them, instead of a bell, the people are called to prayers [azaun]. Most mosques have a kind of hospital belonging to them, in which travellers, of what religion soever, are entertained during three days. Each mosque has also a spot which is the burying-place of its founder. Women are forbidden in the Koran [q.v.] to go into the public mosques; therefore the wealthy have frequently a mosque in their own compound where females perform their devotions. The different

officers attached to large mosques are:—the cauzy or ecclesiastical judge, the khateeb or priest, the moollah or schoolmaster, two naibs or deputies, a furraush or sweeper called also moojauwir or devoutly employed, the ghassaul whose business is to wash the bodies of the dead; two rahbardaur, guides or messengers. In inferior mosques there are only a moollah [q.v.] and a mooazzin [q.v.]; and the latter has no pay, but lives upon what he can earn by carrying messages of invitation, or acting as a servant at marriage [shaudy] ceremonies. In mosques there are no sermons, no common prayer, and no singing. At the principal mosques no public service is held except there be forty persons present, exclusive of strangers, slaves, and the deformed. The first musjid was built on the spot where Mahomet's camel of its own accord stopped on his arrival at Medina after his flight from Mecca.

MUSK (مشك - mushk, *Hind.*). A secretion of Muskdeer, Moschus moschiferus of Himalayas [custoory]. Prefix in animal names as Musk duck, Musk ox, from musky smell; also in plant names, from smell. Compare:—Cucurbita moschata, musk melon; Hibiscus abelmoschus, musk mallow; Limonia acidissima, musk-deer plant; Rosa moschata, musk rose, musk scented rose. See gloss. paragraphs.——*Musk-rat* (गन्धमूषिक - gandhamúshika, San.; خلد - khuld, Ar.; موش كور - múshikor, Pers.; چھچوندر - chhachúndar, Hind.; چچوندری - chichundarí, Dec.; تكس كستورى - tikuskasturí, Malay; ಸುಂದಿಲಿ - sundili, Can.; ಕಿಚ್ಚಿಲಿ - kiççili, Too.; చుంచెలుక - tsuncheluka, Tel.; ଚଳୋମୁସ୍ସ - chalomussa, Oor.; കണ്ടെലി - kandeli, Mal.; කුනමීයා - kunamíyá, Singh.; மூஞ்சுறு - múñjuru, Tam.). Title from its smell. San. from (gandha, san. fragrance + múshika, san. rat). Pers. from (múshi, pers. musk + kor, pers. blind). Hind. from (chhuchhundara, san. musk rat). Malay from (tikus, malay, mouse + kastúri, san. musk). Can. from (shundu, tam. small + eli, tam. rat). Tel. from (tsuntsu, tel. the sound produced by the animal + eluka, tel. rat). Mal. from (gandha, san. smell + eli, mal. rat). Singh. from (kuna, singh. dirt + míyá, singh. rat). Tam. from (mó, tam. to smell + shúran, tam. shrew). Ar. also (fáratulmask), meaning musk mouse; (fáratulbísh), meaning poisonous mouse. Pers. also (múshbíshá), meaning poison + mouse. Can. also (múgili), meaning nose + rat. Tel. also (tsúreluka), meaning eaves + rat, from its inhabiting the eaves of houses. Title otherwise Grey musk shrew, Indian musk rat as opposed to those of america and pyrenees. Crocidura cærulea, sorecidæ, insectivora, mammalia [sastanam, 13], of naturalists [jantoo]. Alias Crocidura cærulescens, fulvosinera, sindensis, waldemarii; Sorex cærulescens, caeruleus, capensis, giganteus, indicus, murinus, myosurus, pilorides, sonneratii. The Shrews comprise a large number of small animals, which, from their general appearance and nocturnal habits, are popularly confounded with rats [ely] and mice [shoondely] known by a sharp shrill cry. Emit a musky odour. Food, chiefly insects [poochy]. Snakes [sarpam] are said to avoid the neighbourhood of the shrew. In Jeypore the body of a small musk rat is regarded as a powerful talisman.—"*a*" The animal specified at head is the common small musk shrew. Of an uniform bluish ash or pale gray color, very slightly tinged with ferruginous, and most so on the under parts; naked parts flesh-colored. The tail thick and tapering.—"*b*" Next is the Large musk rat. Crocidura murina of naturalists. Brownish, or dark brownish-gray above, grayish-brown beneath, the fur longer and coarser than in cærulescens; ears larger tail nearly equal in length to the body, rounded thick at the base, nearly nude with a few longish hairs scattered over it; feet and tail, fleshy. Found especially on the Malabar coast, where its bite is considered venomous. The odour is less powerful than in Cærulescens.—"*c*" Next is the Neilgherry wood shrew. Sorex niger of naturalists. Blackish brown with a rufescent shade on the upper parts; abdomen, dusky-grayish; tail, equal in length to the body, gradually tapering to a point; snout, much attenuated. The odour is of a very faint musky nature.—"*d*" Last is the Neilgherry pigmy shrew. Crocidura perroteti of naturalists. Back deep blackish brown; belly pale; limbs and feet brown, palms and plantæ clad with hairs; ears large conspicuous. A very small animal.—"*e*" Indian species of the sorecidæ not here found are:—Anurosorex assamensis or assam burrowing shrew, Chimarrogale himalayica or himalayan water-shrew, Crocidura macropus or large-footed shrew, Nyctogale elegans or thibet water-shrew, Soriculus caudatus or long-tailed shrew, Crocidura hodgsoni, or small-clawed pigmy-shrew, Soriculus nigrescens or mouse-tailed shrew, Crocidura fulginosa or Blyth's shrew.—"*f*" The Madras tree shrew, Tupaia ellioti, tupaiidæ, insectivora, mammalia [sastanam, 15], is known in Tamul by prefixing the term (mara) to the above. The tree-shrews, are diurnal in their habits, live on trees, and feed both on fruit and insects, which they hold in their paws like squirrels. At one time confounded with squirrels [anil]. The eyes are large and prominent, and the tail bushy; the toes are five in number, with strong claws; the shank-bones are not united as in the hedgehogs [moollely]. The Madras tree-shrew is above pale rufescent or reddish-brown, the hairs being grizzled red and brown; chin, throat, breast, and lower parts yellowish white; which is continued in a narrow line along the underside of the tail. Found on the hills west of Madras, the continuation of the Eastern ghauts.

MUSKET TREE (துபாக்கிமரம் - tubákkimaram, *Tam.*). From seeds resembling shot. Same as Roodrauck tree.

MUSLIM (مسلم - muslim, *Hind.*). From (salama, ar. submission). One who has received Islam; a Mahomedan believer [moslem].——*Moslem* (مسلم - muslim, Hind.). From (islám, ar. resignation to will of god). Mahomedan [muslim].——*Mussalman* (مسلمان - musalmán, Hind.). From (salama, ar. submission) [islam]; (muslim) is the name given by mahomed to the faithful; the persian plural of this is (muslimán), which was adopted as a singular, and the word (musalmán) thus formed. A follower of Islam [q.v.]. According to religion, Mussalmans are divided into Soonnees [q.v.] and Shiahs [q.v.], besides a few minor sects. The division dates from the death of Mahomet, though the leadership of both parties was for a short time united in the hands of Ally, who was fourth caliph [q.v.] of the Soonnees and first imaum [q.v.] of the Shiahs. According to origin, Indian mussalmans are of three classes:—"*a*" the descendants of foreign Mussalmans, who came with their families into India, such as the Syeds [q.v.], Sheikhs [q.v.], Moghuls [q.v.] and Pataans [q.v.];—"*b*" the descendants of Arabs and Persians, who came by sea and settled on the coast and took native wives, such as the Moplahs [q.v.] and Nivayats [q.v.];—"*c*" the descendants of converts from Hindooism; as a Mussalman of even the highest stock may take a wife from any other class, there are now few if any Mussalmans, who are not at least in part of Hindoo descent. See vol. II, 233 [jonacan, lubbay].

MUSLIN (अंशुक - amshuka, *San.*; ململ - malmal, *Hind.*; ರವೆಶಲ್ಲಾ - raveshallá, *Can.*; రవశల్లా - ravashallá, *Tel.*; ശല്ലാ - shallá, *Mal.*; கவணி - kavani, *Tam.*). Title from Mosul on the Tigris. San. from (amshu, san. filament). Can. from (rave, can. fine grain + shallá, can. cloth). The finest class of cotton goods. ὀθόνιον ordinary muslin and κάρπασος or fine muslin were according to Periplus exported from Southern india to Egypt. The finest is Mulmul khas or king's muslin; the second, Abrawaun or running water; the third, Shabnam or evening dew. Other muslins are:—Sullah, fine quality found in Cuddapah and Arnee; Doriyah, or striped muslin, from each thread in the stripes being composed of two threads twisted together; Charkhanah, or chequered muslin; Jamdauny, or loom-figured muslin, the highest work of the weaver [mull, sheelay].

MUSNUD (مسند - masnad, *Hind.*). From (sanada, ar. to lean against). A cushion [guddee]. The large cushion, &c., used by native princes in place of a throne [takt].

MUSTER (మోస్తరు - móstaru, *Tel.*). Portuguese for pattern [maudry].

MUTT (मठ - mat'ha, *San.*). From (mat'h, san. to dwell). Cloister. A species of college where a celibate Hindoo priest lives with disciples making the same profession, one of whom becomes his successor. Generally comprehends a set of huts or chambers for the mahant [q.v.] or superior and his permanent pupils; a temple sacred to the deity whom they worship, or the samaudhy [q.v.] or shrine of the founder of the sect, or some eminent teacher; and a dharmashaulay [q.v.], viz., one or more sheds or buildings for the accommodation of the mendicants or travellers who are constantly visiting the mutt. Most mutts have endowments of land, generally of small extent. Besides lands, the monks receive presents from lay votaries, ask alms daily in their neighbourhoods, and sometimes traffic [inam]. The mutt at Shringairy, founded by Shuncaracharry [shuncaran], was once famous. A mutt of Veerasheivas at Madura was lately in repute for Tamul learning. For jiyyar mutts see Jiyyar.

MUTT (موٹھ - moth, *Hind.*). Same as Moorman's gram.

MUTTY (दुर्नामा - durnámá, *San.*; سیپی کا کیڑا - sípíkákírá, *Hind.*; ఆలిపురుగు - álipurugu, *Tel.*; കക്ക - kakka, *Mal.*; மட்டி - matti, *Tam.*). San. from (dur, san. bad + náma, san. name). Hind. from (sípí, hind. shell + kírá, hind. worm). Tel. from (áli, san. ridge + purugu, tel. worm). Mal. from (kal, mal. stone + káya, mal. fruit). Cockle [chippy]. Cardium edule of naturalists.

MUZCOOR (مذكور - mazkúr, *Hind.*). From (zikr, ar. mention). Before-mentioned [mailpady].

MUZMOON (مضمون - mazmún, *Hind.*). From (zamana, ar. to include). Contents of letter, &c.

MYNA (مينا - mainá, *Dec.*). Sturnidæ family, conirostres, insessores, aves [pacshy, 26], of naturalists [jantoo]. Starlings. Divided here into Sturninæ, starlings and mynas; Lamprotorninæ, glossy mynas, or grakles. The species best known to the natives are shown below.——(1) *Braminy myna* (بهمنى مينا - bahmanímainá, Hind.; پپائی مینا - papaímainá, Dec.; పాపటిగోరంకి - pápatigóranki, Tel.; വെള്ളക്കാരൻ - vellakkárán, Mal.; பாப்பாத்திமைனா - páppáttimainá, Tam.). Title from bright yellow legs, as if by use of saffron [country saffron] which bramin women use daily. Hind. from (bahman, hind. bramin + mainá, hind. starling). Dec. from (papaí, hind. fruit of carica papaya, linn. + mainá, hind. myna); from color of beak. Tel. from (pápata, tel. the parting of the hair on the forehead

+ góranki, tel. bird, acridotheres tristis, linn.). Mal. from (vella, mal. white + kárán, mal. the bird, edolius malabaricus, scop.). Tam. from (páppátti, tam. bramin women + mainá, tam. myna). Hind. also (papaia). Tel. also (pápataparige), meaning having parted hair on the head + ortolan. Tam. also (vellimainá), meaning silver + myna; (rawanati). Beng. also (monghyrpawi). Title otherwise Blackheaded myna. Temenuchus pagodarum, sturninæ. Alias Maina sylvestris; Pastor nigriceps. Frequently caged. No other common species here.——*Bush myna* (جھنڈی مینا - jhúndímainá, Hind. and Dec.; நாணவந்தான் - nánavandán, Tam.). Title from resort. Hind. from (jhándí, hind. bush + mainá, hind. starling). Tam. from (nánu, tam. to be shy + vá, tam. to come); from habit. Hind. also (pahárímainá), meaning hill myna; (jhontisálik), meaning bush myna. Acridotheres fuscus, sturninæ, Alias Acridotheres griseus; Gracula cristatella; Maina cristatelloides. No other common species here.——*Common myna* (सारिका - sáriká, San.; शाळुंकी - shálunkí, Mahr.; زوزر - zuzúr, Ar.; سار - sár, Pers.; مینا - mainá, Hind. and Dec.; ಗೊರವಂಕ - goravanka, Can.; గోరంకి - góranki, Tel.; ചിത്ര - chitra, Mal.; மயினா - mayiná, Tam.). From (shára, san. variegated). Can. from teloogoo. Tel. from (góru, tel. claw + vanka, tel. curved). Mal. means variegated. Hind. also (desímainá), meaning country myna; (sálik), from sanscrit; (bhatsálik), meaning bramin myna. Can. also (sárike), from sanscrit; (gorwantera). Tam. also (karuppu-mayiná), meaning black myna. Title otherwise Indian starling. Acridotheres tristis, sturninæ. Alias Gracula gryllivora; Maina tristoides. Whole head with moderate occipital crest, neck and breast glossy black; rest of plumage quaker or snuff brown, darkest on back and wing-coverts, lightest beneath; primaries black with white spot at base, forming conspicuous wing-spot; tail black with white tip, successively broader from centre pair; lower abdomen, vent and under tail-coverts white; bill and orbits deep yellow; legs dull yellow; irides red brown with white specks. Length about 10 inches. Very common. Roosts in large numbers in a tree, and morning and evening keeps up a noisy chattering; has a great variety of notes. Household bird, breeding almost exclusively in nooks and eaves of houses, under the roofs, in holes in walls, pots hung out for that purpose by the natives. Very commonly caged and domesticated, learns to pick up words and sentences. The following is a Hindostany proverb:—مینا جو میں نہ کہے دودھ بہات نت کہائے بکری جو میں—میں کہے اولٹہی کہال کہچائے "The Myna cries 'not I' and eats milk and rice for ever." "The "goat cries 'I, I' and loses his skin." Said to a boaster. "Main "ná" is "not I"; "I, I," stands for the bleating of the goat. The humble Myna is well treated and the boastful goat is killed. No other common species here.——*Hill myna* (کوکنی مینا - koknímainá, Hind.; కొండగోరంకి - kondagóranki, Tel.; മലച്ചിത്ര - malaççitra, Mal.). Title from resort. Hind. from (kokní, hind. tiny + mainá, hind. starling). Tel. from (konda, tel. hill + góranki, tel. myna, acridotheres tristis, linn.). Mal. from (mala, mal. hill + chitra, mal. myna). Eulabes religiosa, lamprotorninæ. Alias Eulabes indicus; Gracula minor. No other common species here.——*Pied myna* (ابلق مینا - ablakmainá, Hind.; వెండిగోరంకి - vendagóranki, Tel.). Title from variegated color. Hind. from (ablak, hind. piebald + mainá, hind. starling). Tel. from (vendi, tel. silver + góranki, tel. myna, acridotheres tristis, linn.). Sturnopastor contra, sturninæ. Alias Sturnus capensis. Often taken young and caged. No other common species here.——*Rosy myna* (گلابی مینا - gulábímainá, Dec.). From color of lesser plumage. See Cholum bird.——(2) *Mynautty* (مچھریا - maççhariyá, Hind.; దాసరిపిట్ట - dásaripitta, Tel.; മൈനാത്തി - mainátti, Mal.; விசிறிக்குருவி - visirikkuruvi, Tam.). Title from malayalam. Hind. from (maççhar, hind. mosquito); from food. Tel. from (dásari, tel. vaishnava mendicant + pitta, tel. bird); from white band on face resembling caste mark of the mendicant [dausary]. Mal. means female myna. Tam. from (visiri, tam. fan + kuruvi, tam. small bird); from fan-like tail. Hind. also (shámchurí), meaning evening bird. Title otherwise White-browed fantail. Leucocerca albofrontata, myiagrinæ, muscicapidæ [macsha granhy], dentirostres, insessores [pacshy, 20], of naturalists [jantoo].

MYROBALAN (त्रिफल - trip'hala, *San.*). Title from greek, meaning sweet juice acorn. San. means three fruits; referring to Emblic myrobalan, Chebulic myrobalan and Belleric myrobalan [tripalam].

MYRRH (مر - murr, *Ar.*). Gum resin [googal] obtained from Balsamodendron myrrha, nees. [bole]. Also similar product from other allied plants.——*Buffaloe myrrh* (بہینسا بول - bhainsábol, Hind.). Same as Indian bdellium.——*East india myrrh* (بہینسا بول - bhainsábol, Hind.). Hind. means buffalo myrrh. Same as African bdellium [q.v.].——*False myrrh* (گوگل - gúgal, Dec.). Any googal [q.v.].——*Turkey myrrh* (بول رومی - bolirúmí, Hind.). Title as being shipped from turkish ports. Same as Balm of gilead. Also the best myrrh of commerce.

MYSORE (महिषमण्डल - mahishamandala, *San.*; میسور - maisúr, *Hind.*; ಮೈಸೂರು - maisúru, *Can.*; మైసూరు - maisúru, *Tel.*; മൈസൂർ - maisúr, *Mal.*; மைசூர் - maisúr, *Tam.*). From (mahisha, san. buffalo + úru, can. town) [maha]. Ancient name for the province is Carnautam or Carnautacam [q.v.]; ancient name for the town is Pooragerey or place of tanks and streams. Protected state under the Government of India, but occupied entirely by a Dravidian race. For general description of the province see vol. I, 20. The following are the principal rivers:—Arcauvaty, Badary, Bauvaly, Bhadra, Bhrigoo, Cadamba, Cauvery, Chitrauvaty, Chuckrateertam, Coomadwaty, Coondaur, Cooshauvaty, Csheera, Cubbany, Dandauvaty, Goondlooholey, Haridrauvaty, Hemauvaty, Honnholey, Janagihulla, Jayamungaly, Locapauvany, Lutchmana teertam, Naliny, Nandiny, Netrauvaty, Paupughny, Pennair, Sharauvaty, Sharmanauvaty, Sheeta, Shimsha, Shunkhateertam, Somauvaty, Southern pinaukiny, or Ponniaur, Swarnamookhy, Swarnauvaty, Toonga, Toongabudra, Varada, Vedavaty, Yenneholey. The following are the large tanks:—Ayyankerey, Jogoo, Madagadkerey, Motitalaub, Samoodrakerey, Soolekerey, Vishnoo. The following are the principal hills and ghauts:—Agoomby ghaut, Ambaujidroog, Auvany betta, Bababooden, Baswanbetta, Beirandroog, Bellibetta, Bhasmaungy, Biligherryrunganbetta, Bramhagherry, Cabbaul droog, Careycullgoodda, Carigatt, Chamoondibetta, Chennakeshavabetta, Chennaroyandroog, Chitaldroog, Chundragootty, Coda sahyadry, Colaurbetta, Coloorghaut, Coordoomullay, Coothiraymookh, Devaroydroog, Dibbagherry, Doccalcondah, Doreygoodda, Gersoppah, Gungamoola, Harihareshwarabetta, Haimadevarbetta, Himad gopaulsawmybetta, Hoolaganmoradibetta, Hooliculldroog, Hooliyoordroog, Hoottaridroog, Hyderghurghaut, Madgherry, Mahacaulydroog, Mailcotebetta, Malecullrtripatty, Mauvinkereybetta, Midageshy betta, Moolbaugal betta, Moolainagherry, Moorgamullay, Mungalabetta, Nundidroog, Oottanhullybetta, Pauvoogada, Rungasawmybetta, Savandroog, Scandagherry, Shivagungey, Shravanabelgola, Soonnacullbetta, Tyaucull, Vakkalairy. The following are the places of pilgrimage, or places where great fairs are held:—Auvany, Bannairghatt, Bellauvy, Biligherryrunganbetta, Boppagondanpooram, Calaghatta, Carigatt, Chamoondibetta, Choonchancutty, Choonchangherry, Chundragootty, Coodaly, Cullhully, Devanhully, Devaroydroog, Ghauty soobramanyam, Goobby, Harihar, Hindiginaul, Hiriyore, Holalore, Mailcotebetta, Mailore, Moodookdorey, Moogore, Munchenahully, Mungalabetta, Naickanhutty, Nullore, Nundidroog, Oottanhully betta, Santekesalagherry, Shiby, Shravanabelgola, Shringairy, Tiptore, Tirmullay, Togarshy, Vasantapooram, Yedabetta, Yediyore. The following are the places of historical interest, or places where remarkable works of nature or art exist:—Auvaty, Bailore, Bangalore, Baswancote, Belgauvy, Bellibetta, Bhasmaungy, Cabbaul droog, Chamoondibetta, Chaumrajnugger, Chikkanaickenhully, Chitaldroog, Colaur, Devaroydroog, Goobby, Halabeed, Hassan, Hauranhully, Hebbore, Holoovanhully, Hoolicull, Hoscote, Jaumagal, Jogoo, Keidala, Kelady, Madgherry, Maharajandroog, Manjarabad, Moogore, Muddore, Mysore, Narsapore, Sargore, Seringapatam, Sharauvaty, Sheerah, Shravanabelgola, Somnautpore, Talacaud, Togarshy, Toorvekerey, Yelahunka, Yelwaul. The following are the towns, the population of which amounts to 5,000:—Aunecull, Bangalore, Chennaputna, Chikbullapore, Chikmagalore, Chintaumany, Closepett, Colaur, Dauvangerey, Devanhully, Dodbullapore, Hassan, Hoonsoor, Malvully, Nanjangode, Seringapatam, Shidlaghatt, Shimoga, Tarikerey, Toomcore. The following are places, &c., mentioned in connection with the history of this Presidency, the vernacular identifications being shown.——*Achalabetta* (ಅಚಲಬೆಟ್ಟ - achalabetta, Can.). Means immoveable + hill. Mountain in Malvully talook, Mysore district, near Closepett.——*Agoomby* (ಆಗುಂಬಿ - águmbi, Can.; agumbe, Mys. Gov.). Ghaut [q.v.], town in Teertahully talook, Shimoga district.——*Ajimpoora* (ಅಜಿಂಪುರ - ajimpura, Can.; ajjampur, Mys. Gov.). Means (azím, proper name + town). Town in Tarikerey talook Cuddore district, on the Tarikerey, Hosdroog road, 12 miles east of the cusbah [q.v.]. Weekly fair Tuesday.——*Ambaujidroog* (ಅಂಬಾಜಿದುರ್ಗ - ambájidurga, Can., Mys. Gov.). Means (ambáji, proper name + fort). Hill in Chintaumany talook, Colaur district, 4,399 feet; summit fortified by Tippoo. Until 1873 the surrounding hoblies formed Ambaujidroog talook, head quarters Chintaumanipett.——*Anantapoora* (ಅನಂತಪುರ - anantapura, Can.; anantapur, Mys. Gov.). Means (andásura, proper name + town). Sanscrit name (ánandapura), meaning pleasure + town. Town in 14° 5′ N. lat., 75° 17′ E. long., in Saugar talook, 15 miles south-south-east of the cusbah, on the Shimoga-Gersoppah road. In 1838 included in Nugger talook, but till 1875 again the head-quarters of a talook bearing its own name, Shimoga district.——*Antargunga* (ಅಂತರಗಂಗ - antaraganga, Can.). Means interior + ganges. River. Rises in the Shatashringa hill, north-west of the town of Colaur in the Colaur district. Signifying the subterranean Ganges is esteemed sacred.——*Arcauvaty* (ಅರ್ಕಾವತಿ - arkávati, Can.). See sep. title.——*Arkalgode* (ಅರ್ಕಲಗೂಡು - arkalagódu, Can.; arkalgód, Mys. Gov.). Means sun + hill-top. Sanscrit name (arkapuri), meaning sun + town, as gowtaman worshipped the sun here.—"*a*" Talook in the south, Hassan district. Head-quarters, Arkalgode. Contains the hoblies:—Arkalgode, Baswaputnam, Conanore, Kesavattore, Krishnarajcutty, Marore, Mullipatnam, Ponnatpore. Principal places:—Arkalgode, Baswaputnam, Cadaly, Carlapooram, Conanore, Hosahully, Hoscote, Roodraputnam.—"*b*" Town, Hassan district, in 12° 46′ N. lat., 76° 7′ E. long., 17 miles south of Hassan. Talook head-quarters

and municipality. Present town founded about 1568 by Krishnappa naick. Captured by canteroy narsa rajah of Mysore in 1647 and subsequently by Shivappa naick of Ikkairy. Again besieged by Chikka deva rajah in 1694 and finally annexed to Mysore.——*Arsikerey* (ಅರಶಿಕೆರೆ - arashikere, Can.). Means queen + tank. Talook in the north Hassan district. Head-quarters Arsikerey. Contains the hoblies:—Arsikerey, Coorvanka, Cullyaudy, Gandashy, Hauranhully, Kittanakerey. Principal places:—Hauranhully, Kenkerey.——*Ashtagram* (ಅಷ್ಟಗ್ರಾಮ - ashtagráma, Can.; ashtagram, Mys. Gov.). Means eight + village. Former division and talook [seringapatam].——*Atticooppey* (ಅತ್ತಿಕುಪ್ಪೆ - attikuppe, Can.; attikupa, Mys. Gov.). Means fig tree + heap.—"*a*" Talook in the south-east, Hassan district. Head-quarters, Atticooppey. Contains the hoblies:—Akkihebbaul, Atticooppey, Bookinkerey, Chincooraly, Cunnambaudy, Kikkairy, Santebauchhully, Sindhoogatt. Principal places:—Atticooppey, Bookinkerey, Cunnambaudy, Goommanhully, Hosaholaloo, Kikkairy, Sindhoogatt.—"*b*" Town, Hassan district, in 12° 41′ N. lat., 76° 33′ E. long., 41 miles south-east of Hassan, on the Seringapatam-Chenroyputnam road. Talook head-quarters and municipality.——*Aulore* (ಆಲೂರು - álúru, Can.). Means banyan tree + village. Hobly, Village, Channel. In Hassan talook, Hassan district, 7 miles west of Hassan. Means sweet + dish or shiva's face.—"*a*" District in the north-west, sub-divided into eight talooks:—Teertahully, Chennagherry, Honnauly, Nugger, Saugar, Shikarpore, Shimoga, Soraba.—"*b*" Talook in the south, Shimoga district. Head-quarters, Shimoga. Contains the hoblies:—Benkipore, Bidarey, Holalore, Holey, Honnore, Shimoga. Principal places:—Benkipore, Coppa, Holalore, Holey, Honnore, Moottore, Nadkerey, Shimoga.—"*c*" Chief town of the Shimoga district, situated in 13° 55′ N. lat., 75° 38′ E. long., on the left bank of the Toonga, 171 miles north-west of Bangalore, on the Bangalore-Gersoppah road.——*Shimsha* (ಶಿಂಶಾ - shimshá, Can.; shamsha, Mys. Gov.). Means (shimshapa tree, dalbergia sissoo). River. Sanscrit name (kadamba), meaning cadamban, the sage who lived on its banks. Also called Shimshoopa, Cadabacola, Cadaba or Cadamba [q.v.], Mysore and Toomcore districts, tributary of the Cauvery, enters the Cauvery a few miles below the Falls at Shivasamoodram.
——*Somauvaty* (ಸೋಮಾವತಿ - sómávati, Can.; somavati, Mys. Gov.). Means the moon plant + possessing. River. Tributary of the Hemauvaty, one of the chief tributaries of the Cauvery.
——*Somavauhiny* (ಸೋಮವಾಹಿನಿ - sómaváhini, Can.). Means the moon plant + river. River. Tributary of the Bhadra which it joins in Lakvully talook. Cuddore district.——*Soraba* (ಸೊರಬ - soraba, Can.; sorab, Mys. Gov.). Means the mythological cow of plenty.—"*a*" Talook in the north-west, Shimoga district. Head-quarters, Soraba. Contains the hoblies:—Anavutty, Chundragootty, Kyasanore, Soraba, Tavanandy, Telaguddey. Principal places:—Coobatore, Cooppagady, Moody, Oodry, Soraba.—"*b*" Town, Shimoga district, on the right bank of the Dandauvaty, in 14° 23′ N. lat., 75° 10′ E. long., on the Shikarpore-Soraba road, 46 miles north-west of Shimoga. Talook head-quarters and municipality. Principal residence of the sandalwood [sandal] carvers, whose delicate and elaborate workmanship is generally well-known.——*Swarnamookhy* (ಸುವರ್ಣಮುಖಿ - suvarnamukhi, Can.). Means gold + mouth. River. Toomcore district, after a course of about 15 miles, runs into the Jayamungaly.——*Talacaud* (ತಲಕಾಡು - talakádu, Can.; talkad, Mys. Gov.). Means (tala + kádu, two hunters, so called), otherwise Dalavanapuram. Town, Mysore district, in 12° 11′ N. lat., 77° 5′ E. long., on the left bank of the Cauvery, 28 miles to the south-east of Mysore and 10 miles to the south-east of Narsapore. Lately a talook cusbah.——*Tarikerey* (ತರೀಕೆರೆ - taríkere, Can.; tarikere, Mys. Gov.). Means tree, acacia catechu + tank.—"*a*" Talook in the north-east, Cuddore district. Head-quarters, Tarikerey. Contains the hoblies:—Ajimpoora, Amritapoora, Coodlore, Lingadhully, Oobrauny, Shivaney, Tarikerey. Principal places:—Ajimpoora, Coodlore, Dornaul, Lingadhully, Shivaney, Tarikerey, Tauvarkerey.—"*b*" Town, Cuddore district, in 13° 42′ N. lat., 75° 52′ E. long., on the Bangalore-Shimoga road, 30 miles north of Chikmagalore. Talook head-quarters and municipality.——*Teertahully* (ತೀರ್ಥಹಳ್ಳಿ - tírt'hahalli, Can.). Means sacred water + village.—"*a*" Talook in the south-west, Shimoga district. Head-quarters, Teertahully. Contains the hoblies:—Agoomby, Agrahauram, Auraga, Mandaguddey, Moottore. Principal place:—Teertahully.—"*b*" Town in 13° 41′ N. lat., 75° 17′ E. long., on the left bank of the Toonga, 30 miles south-west of Shimoga, on the Shimoga-Agoomby road. Head-quarters, Teertahully talook, Shimoga district.——*Tiptore* (ತಿಪಟೂರು - tipatúru, Can.; tiptur, Mys. Gov.). Means (tippe, hillock + village). Town, Place of pilgrimage.—"*a*" Talook in the west, Toomcore district. Head-quarters, Tiptore. Contains the hoblies:—Handlagerey, Haulacoorky, Honvully, Itchanore, Nonavinkerey, Tiptore. Principal places:—Aralgooppey, Handlagerey, Honvully, Nonavinkerey, Sauratahully, Tiptore.—"*b*" Trading place, in 13° 15′ N. lat., 76° 32′ E. long., 46 miles west of Toomcore, on the Toomcore-Shimoga road. Head-quarters of Tiptore talook, Toomcore district.——*Tirmacoodloo narsapore* (ತಿರುಮಕೂಡ್ಲುನರಸಾಪುರ - tirumakúdlunarasápura, Can.).—"*a*" Talook in the east, Mysore district, Head-quarters, Narsapore. Contains the hoblies:—Moogore, Narsapore, Poorigauly, Rungasamoodram, Sosiley, Talacaud, Tayore. Principal places:—Algoonjy Belakvaudy, Benakanhully, Bilgull, Caliyore, Chidravully, Dodda abaugil, Gaunaganore, Hemmigey, Holesaul, Hosa alsore, Kempanapooram, Kerey hully, Kiragoonda, Moogore, Nilasoghey, Somnautpore, Sosiley, Talacaud, Tayore.—"*b*" Town in 12° 13′ N. lat., 76° 58′ E. long., at the confluence of the Cauvery and the Cubbany, 18 miles south-east of Mysore, on the Mysore-Talacaud road. Since 1868 head-quarters, Talacaud talook, Mysore district.——*Tirmullay* (ತಿರುಮಲೆ - tirumale, Can.; tirumale, Mys. Gov.). Means sacred + hill. Village, Place of pilgrimage, two miles east of Maugady in Maugady talook, Bangalore district.——*Togarshy* (ತೊಗರ್ಶಿ - togarshi, Can. togarshi, Mys. Gov.). Means split pulse + heap. Village, Place of pilgrimage in Shikarpore talook, Shimoga district.——*Toomcore* (ತುಮುಕೂರು - tumukúru, Can.; tumkur, Mys. Gov.). Means drum + village.—"*a*" District. Sub-divided into the following talooks:—Chikkanaickenhully, Coongull, Goobby, Madgherry, Pauvoogada, Sheerah, Tiptore, Toomcore.—"*b*" Talook in the centre eastwards, Toomcore district. Head-quarters, Toomcore. Contains the hoblies:—Bellauvy, Cheelore, Colala, Goolore, Honnoodikey, Kora, Oordoogerey, Toomcore, Tovinkerey. Principal places:—Bellauvy, Bidarey, Cheelore, Goolore, Honnoodikey, Kestore, Kyautasundra, Oordoogerey, Toomcore, Tovinkerey.—"*c*" Chief town, Toomcore district, in 13° 20′ N. lat., 77° 9′ E. long., 43 miles north-west of Bangalore.——*Varada* (ವರದ - varada, Can.; Mys. Gov.). Means boon + give. River. Tributary of the Toongabudra, Shimoga district. Rises at Varadamoola near Ikkairy, and running north past Chundragootty and Banavausy turns north-east.——*Vayooparvata* (ವಾಯುಪರ್ವತ - váyuparvata, Can.). Means wind + hill. Mountain. One of the Bababoodens 6,214 feet. Also called Bababoodengherry and Marootsheila.——*Vedah* (ವೇದಾ - védá, Can.). Means sacred writing. River. Its immediate source is the Gowrihulla, which is embanked at a gorge near Shaknigherry expanding into the Ayyankerey lake, the stream on leaving which takes the name of the Vedah.
——*Yedatorey* (ಎಡತೊರೆ - edatore, Can.; yedatore, Mys. Gov.). Means left + river.—"*a*" Talook in the north, Mysore district. Head-quarters, Yedatorey. Contains the hoblies:—Byaudarhully, Hallimysore, Hardanhully, Mirley, Shalagram, Tippore, Yedatorey. Principal places:—Ballore, Byaudarhully, Chundagaul, Cooppey, Haliyore, Hebbaul, Humpapore, Jeerya, Kestore, Mailore, Mirley, Moondore, Shalagram, Sigavully, Tippore, Yedatorey.—"*b*" Town, Mysore district, in 12° 28′ N. lat., 75° 27′ E. long., on the right bank of the Cauvery 24 miles north-west of Mysore. Talook head-quarters and municipality.——*Yelandore* (ಎಳಂದೂರು - elandúru, Can.; yelandur, Mys. Gov.). Means (elache, jujube tree + village).—"*a*" Talook in the south-east, forming the estate of a Jagheerdar, Mysore district. Head-quarters, Yelandore. Contains the hoblies:—Agara, Muddore, Yelandore, Yereyore, Yergampully. Principal places:—Agara, Ambaley, Honnore, Kestore, Muddore, Yelandore, Yereyore, Yergampully.—"*b*" Town in 12° 3′ N. lat., 77° 5′ E. long., on the Honnholey. Cusbah of the Yelandore jagheer, Mysore district. Prosperous town. Contains temple and inscription.——*Yenneholey* (ಎಣ್ಣೆಹೊಳೆ - ennehole, Can.; yennehole, Mys. Gov.). Means oil + river. River. Tributary of the Sharauvaty which it joins near Baurangy in Saugar talook, Shimoga district.——*Yettinhulla* (ಎತ್ತಿನಹಳ್ಳ - ettinahalla, Can.). Means ox + pit. River in Manjarabad talook, Hassan district.——**(2)** The southernmost portion of Mysore and of the former Ashtagram division. Sub-divisions consist of eleven talooks and one jagheer:—Ashtagram, Chaumrajnugger, Goondloopett, Heggadadevancote, Hoonsoor, Malvully, Mandya, Mysore, Nanjangode, Tirmacoodloo narsapore, Yedatorey, Yelandore jagheer.——**(3)** Talook towards the centre, Mysore district. Head-quarters, Mysore. Contains the hoblies:—Anandore, Coodloohully, Lingamboodhy, Mysore, Navashahar, Sindhoovully, Vaurcode, Yilvaula. Principal places:—Ayravutty, Bhandipaulya, Cadacola, Degore, Dhanagahully, Mysore, Oodabore, Rampore, Sindhoovully, Vajamungalam, Vaurcode, Yedacola, Yilvaula.——**(4)** Capital of the province and residence of the Maharajah; situated in 12° 18′ N. lat. and 76° 42′ E. long, at the north-western base of the Chamoondy hill, Mysore district. Contains three suburbs and covers an area of about 3 square miles.——**(5)** *Mysore thorn* (चिलार - chilára, Mahr.; حیدرکا جهاڑ - haídarkájhár, Hind. and Dec.; ಕುರುಡುಗಜ್ಜಿಗಿಡ - kurudugajjigagida, Can.; புலித்தடுக்கி - pulittadukki, Tam.). Hind. from (haidar, hind. ruler + jhár, hind. tree); planted by hyder in defence of his forts. Can. from (kurudu, can. black + gajjigagida, can. cæsalpinia bonducella, flem.); from color of seeds which are oblong, smooth and dark and variegated, of the size of a large pea [calauyam]. Tam. from (puli, tam. tiger + tadukku, tam. to obstruct); from prickles said to obstruct passage of tiger. Mahr. also (chilhári). Hind. also (chillur). Can. also (hotsige). Tam. also (pulittodakki), by corruption. Title otherwise Bahama braziletto, Bahama sappan, Black bonduc, Hyder's tree, Tiger stopper. Botanically Cæsalpinia [coobairaucshy] sepiaria, roxb., leguminosæ [vricsham, 48]. Alias Reichardia decapetala. Scandent shrub with powerful thorns and small-leaved foliage; branches and petioles armed with short, strong, sharp, recurved prickles; pinnæ of the leaves six to ten pair; leaflets eight to twelve pair, linear-oblong, obtuse; petioles pubescent; stipules broad, semi-sagittate; racemes axillary, solitary; calyx colored, the segments soon reflexed;

legumes linear-oblong, glabrous, with a long cuspidate point, four to eight-seeded; flowers bright-sulphur; flowering nearly all the year; indigenous to mysore, but now generally diffused. When kept closely clipped, forms impenetrable hedges [vaily].

N (न - na, *San.*; ن - nún, *Hind.*; ந - ná, *Tam.*). San. means booddha [q.v.] and ganesh [q.v.]. Hind. symbol for numeral 50; conjunct aspect of stars [nacshatram, noojoom].

NA (न - na, *San.*). Not.——*Nagaram* (नगर - nagara, San.; نگر - nagar, Hind.). From (above + gam, san. to go); a fixed habitation. Large city, especially ancient and fortified. Once applied by pre-eminence to Ahmednugger in the north and Vijianugger in the south. Compare Putnam. Suffix in place names, especially in Bellary and the northern districts; as Poothoonagaram, meaning new + city [graumam, nugger]. Specially used of the seven [saptam] sacred cities which confer eternal happiness:—Avanticay or Oojjein, Ayodhyay, Canjy, Caushy, Dwarca, Matooray, Maya. Caushy is Benares; Maya is Gayay; Canjy is Conjeeveram in this presidency. Gandharvanagarams are Cloud castles.——*Nagary* (नगरी - nagarí, San.; نگری - nagarí, Hind.; నగరి - nagari, Tel.).—"*a*" Small city. Suffix in place names; as Alwar tirnagary, meaning alwar + holy + city [nugger]. Nagary nilam is unassessed cultivable land, so called in contradistinction to Putcut nilam, or land in private puttahs [q.v.].—"*b*" Sanscrit name (kushast'halí), means wild tract of coosham [q.v.] grass. Village, Range of hills, Railway station, River; North arcot dist., Carvetnugger zemindarry, Narrainavaram division; pop. 3,196; lat. 13° 20′; long. 79° 38′; height 397 feet; from Arcot N.E. 33 miles; from Carvetnugger S.E. 12 miles; from Chittore E.N.E. 34 miles; from Narrainavaram S. 8 miles; from Poottore S.S.E. 8 miles. Village is on the Cooshastaly, 5 miles south of Nagary nose. One and-a-half miles N.E. of Railway station. Once a large city. Busy trading place. Fair on Fridays. The range forms the extreme S.E. spur of Eastern ghauts [q.v.]. It runs N. from Carvetnugger along eastern side of Swarnamookhy as far as Calastry. Geological formation is similar to that of Table mountain at the Cape of Good hope, near which coal [nila kary] and diamond [vajram] conglomerates have been found. Among the hills are caves which, by means of rough stone walls, have been turned into habitable chambers. Braminical tradition ascribes the work to the five Pandavas [q.v.]. The conas [q.v.] are wooded and stocked with game.——*Nagary nose* (ముక్కుకొండ - mukkukonda, Tel.). From (mukku, tel. nose + konda, tel. mountain). Hill; North arcot dist., Carvetnugger zemindarry, Narrainavaram division; lat. 13° 23′; long. 79° 38′; height 2,824; from Carvetnugger E.S.E. 10 miles; from Chittore E.N.E. 36 miles; from Narrainavaram S. 3 miles. Highest peak in Nagary hills. Forms the summit of a small range, which rises gradually from the east and then terminates in a sheer precipice about 200 feet high, up to the base of which the ground from the west rises. Landmark for ships from N. ports. 50 miles from coast, but first piece of land sighted. Vigneshwaran [q.v.] temple on the summit. On each full moon [powrnimay] night a bonfire is kindled at the top, and early in January the local idols [vigraham] make their circuit of the hill. Trig. station in Narrainavaram division; lat. 13° 22′ 47·88″; long. 79° 38′ 14·26″; from Narrainavaram S. 3 miles; from Poottore S.E. 5 miles.——*Nagry* (नागरी - nágarí, San.). From (nagara, san. a town). Sanscrit character. Otherwise Devanagry, or the divine city character. With more or less of modification is used also for the Hindee, Bengalee, Mahratta, and other Aryan [q.v.] derived languages. See vol. I (48).——*Naregamia* (നാരകം - nárakam, Mal.). Title from malayalam. Generic term [shrub orange].——*Naustican* (नास्तिक - nástika, San.). From (above + asti, san. exists); non-existence. An atheist. As Chaurvaucau [q.v.], &c. Bowddhans [booddha] are thus designated, or any one who denies the divine authority of the Vedams [q.v.], or doubts the legends of the Pooraunams [q.v.].——*Nugger* (नगर - nagara, San.; نگر - nagar, Hind.). Town [nagaram].

NABEE (نبی - nabí, *Ar.*). Way. Lacab of the prophet [mahomed]. Common alam; as Nabee khan, alam + alaumat [ism].

NACODAH (ناخدا - nákhudá, *Hind.*). From (náu, pers. ship + khudá, pers. master). Captain of a ship [serang, tindal].

NACSHATRAM (नक्षत्र - nakshatra, *San.*; نچھتر - nachhattar, *Hind.*). From (naksh, san. to ascend).——**(1)** A star in general. The fixed sidereal year [maunam], month [mausam], and day [dinam], are called Nacshatra samvatsaram, N. mausam, and N. dinam respectively.—"*a*" The following abstract with glossary terms bracketed will enable a comparison to be made of the European and native systems [siddhauntam] of astronomy [golayantram, jyotisham]. Terrestrial longitude [deshauntaram] is measured on the equator [niracsham], terrestrial latitude [acsham] on the meridian [raikhay] of a place; as is also co-latitude [lambam], the elevation [oonnatam] of the equator [niracsham] equal to the co-latitude [lambam], and the elevation [oonnatam] of the pole [dhroovam] equal to the latitude [acsham]. Right ascension [lagnam] and the hour angle [nata naudicay] are measured on the equinoctial [naudy mundalam]; declination [craunty], and polar distance or co-declination [crauntycoty], on circles of declination or the celestial meridians [raikhay]. Altitude [avanataumsham], and zenith distance [nataumsham] are measured on vertical circles [drik mundalam]; the amplitude [agram] and azimuth [agracoty] of a celestial body, on the horizon [cshitijam]. The meridian altitude [oordhwaavanataumsham] and the meridian zenith distance [oordhwanataumsham] are measured on the celestial meridian [raikhay] of the place. The angles at the pole [dhroovam] are hour angles [nata naudicay]; and the angles at the zenith [oordhwam, ootcham] are azimuth [agracoty] angles. In celestial latitude [vicshaipam] and longitude [dhroovacam, sauyanam] there is practically a difference between the two systems. In European astronomy use is made of great circles [mundalam] drawn perpendicular to the ecliptic [craunty mundalam] from the poles [dhroovam] thereof, called circles of celestial latitude; then the latitude of a celestial body is the arc of such a circle of celestial latitude intercepted between the object and the ecliptic; and the longitude of a celestial body is the arc of the ecliptic intercepted between the first Point of Aries [craunty pautam, maishauyanam] and the circle of celestial latitude passing through the object, being reckoned in the order of the signs [raushy]. In native practical astronomy the poles [dhroovam] of the ecliptic [craunty mundalam] are disregarded; then the vicshaipam [q.v.] or celestial latitude is an arc of the terrestrial meridian [raikhay] which intersects the star and the ecliptic [craunty mundalam]; and first the sauyanam [q.v.] or tropical [ayanaumsham, craunty pautagaty, maunam, mausam] celestial longitude is the portion of the ecliptic which is intersected by the same meridian and the equinoctial colure [craunty pautam, maishauyanamundalam]; while secondly the dhroovacam [q.v.] or fixed [ayanaumsham, maunam, mausam] celestial longitude is the same, substituting the origin [maunam, mausam, rishy raikhay, veidhrity] of the Hindoo sidereal zodiac [raushy chuckram] for the equinoctial colure [maishauyanamundalam, vishoomundalam]. There have been anciently real celestial latitudes and longitudes here, but they are now quite out of use [sauyanam].—"*b*" As regards nomenclature of the stars it has always been customary in the east to distinguish the brightest stars by proper names, as Aldebaran [q.v.], Rigel [q.v.], Fomalhaut [q.v.], &c.; and the position of any such star is referred to as being in some part of a constellation. Thus, Aldebaran, in the eye of the Bull [sowr]; Rigel, in the foot of Orion [jabbaur], &c. Europeans have adopted the plan of using small letters of Greek and Roman alphabets; α being generally or at least according to the original idea the brightest star, β the next, and so on; to which is added the name of the constellation in genitive case. Aldebaran becomes α Tauri, Rigel becomes β Orionis, &c. When Greek letters are exhausted, recourse is had to Roman, as a, b, c, &c. When Greek and Roman letters are exhausted, numerals are brought into use. Though the system is not always as rigorously observed as is here set out.—"*c*" The following are approximate mean places, with hours of rising [oodayam] and period of being above horizon [cshitijam] in lat. 13°, of the principal fixed stars for which native names are known, arranged according to their Right ascension [lagnam]. In the early part of any month given in columns 8–19, in the case of stars whose declination does not differ very largely from 13° N, if observing at 6 p. m. [sooryan], 6 hours stands roughly for being on the western horizon, 9 for being midway in the western arch of the heavens, 12 for culmination, 15 for being midway in the eastern arch of the heavens, and 18 for being on the eastern horizon. If observing at 7 p. m., add 1 to all the hour figures; if at 9 p. m., add 3; if at midnight, add 6; and so on. Taking the eye down the month column between those limits the stars in a very broad central belt can be traced from west to east. To suit the visible span of heavens north and south when observing in this latitude, plus declinations must be decreased by 13, and minus declinations must be increased by 13. The following 12 considerable stars culminate almost vertically in this latitude:—Aldebaran [q.v.], α Tauri; Algenib [q.v.], γ Pegasi; Arcturus [haursool samah], α Boötis; Denebola [q.v.], β Leonis; Markab [q.v.], α Pegasi; Nautih [q.v.], γ Tauri; Regulus [kalb ool asad], α Leonis; Roomhool simauk [q.v.], η Boötis; Rasalgethy [q.v.], α Herculis; Rasal hagne [q.v.], α Ophiuchi; Shoobham [q.v.], α Delphini; Shoolam [q.v.], α Cancri. In the case even of stars whose period above the horizon differs much from 12 hours, such as Canopus [sooheil], α Argûs or Doobhe [q.v.], α Ursæ majoris, and these are few in the arabian or hindoo systems, the above calculations can first be suitably modified by consulting column 20, and then applied. If the points of the compass [tisay] are not known, a very rough N. and S. bearing can be taken from the Polar star [alrooccabah] α Ursæ minoris to the bottom of the southern cross the un-named α Crucis [trishunkoo], or to the conspicuous star α Centauri [hazaur], or to Achernar [q.v.] α Eridani, whichever of the last three is visible. By the manipulation of this table, and especially with the help of the cross-references shown in column 4, all main fixed stars appearing on a starry night can be traced and identified without a star map. Beyond 30° S. hindoos recognize only one star, Canopus; and its name Agastyan [q.v.] shows that it was a late discovery after bramins had reached S. india. The Arabian system recognizes Fomalhaut [q.v.], Canopus [sooheil], Achernar [q.v.] and α and β Centauri [hazaur, wazn]:—

Principal fixed stars for which native names are known.

No.	Arabic name. See section 8.	Sanscrit name. See section 8.	Scientific and popular european name. For cross-references see section 8.	Magnitude.	Approximate Right Ascension [lagnam], hours and minutes.	Approximate Declination [craunty], degrees and minutes. + is north,—is south.	Approximate time of rising [oodayam] in latitude 13°, hours and minutes of Madras mean time reckoning from midnight, on date: Jan. 1.	Feb. 1.	Mar. 1.	Apr. 1.	May 1.	June 1.	July 1.	Aug. 1.	Sept. 1.	Oct. 1.	Nov. 1.	Dec. 1.	Approximate period during which it is above horizon [cshitijam], hours and minutes of mean time.	No.

——(2) The following is the approximate time of the culmination [oordhwasancramanam] of the First point of Aries [maishanyanam], in hours and minutes of Madras mean time from midnight. The Right ascension [lagnam] of any fixed star, though not in above table, reduced to mean time added to these figures will give the hour of the culmination of the fixed star. Near the equator [niracsham]; subtracting 6 hours again from the latter figure, the time of the star's rising [oodayam] will be given; or adding 6 hours to the same figure the time of the star's setting will be given. For latitude 13° a star not in the equator rises one minute earlier for each degree of N. declination, and one minute later for each degree [bhaugam] of S. declination [craunty]:—

——(3)—"*a*" The following stars are of the first magnitude, and the cross-references show those known to the natives. North, of the equator, 9:—α Aurigæ, capella, 46° n. [oyook]; α Lyræ, vega, 39° [nasr ool wauky]; β Geminorum, pollux, 28° [alzirah]; α Boötis, arcturus, 20° [haurs ool samah]; α Tauri, 16° [aldebaran]; α Leonis, regulus, 13° [kalb ool asad]; α Aquilæ, 9° [altair]; α Orionis, 7° [betelgeux]; α Canis minoris, procyon, 6° [ghoomeisah]. South of the equator, 10:—β Orionis, 8° s. [rigel]; α Virginis, spica, 10° [simauk ool azal]; α Canis majoris, sirius, 17° [shira]; α Scorpii, antares, 26° [alkalb]; α Piscis australis, 30° [fomalhaut]; α Argûs, canopus, 53° [sooheil]; α Eridani, 58° [achernar]; β Centauri, 60° [wazn]; α Centauri, 60° [hazaur]; α Crucis, 62°.—"*b*" The following stars are of second magnitude, with similar remark. North of the equator, 29:—α Ursæ minoris, polaris, 89° n. [al rooccabah]; β Ursæ minoris, 75° [kochab]; α Ursæ majoris, 62° [doobhe]; α Cassiopeæ, schedir, 56°; γ Ursæ majoris, megrez, 54°; γ Draconis, 52° [etenin]; η Ursæ majoris, 50° [benetnasch]; α Persei, 49° [mirfak]; β Aurigæ, 45°; α Cygni, deneb or aridad [q.v.], 45° [deneb]; β Persei, 40° [algol]; β Andromedæ, mirack, 35° [batn ool hoot]; α Geminorum, castor, 32°; ε Boötis, 28° [ghafr]; β Tauri, 28° [nath]; α Andromedæ, 28° [alpheratz]; β Pegasi, scheat, 27° [mankib]; α Coronæ borealis, gemma, 27° [alphacca]; α Arietis, 23° [hamel]; γ Leonis, 21° [algeiba]; δ Leonis, 21° [zoobra]; γ Geminorum, 17° [alhena]; β Leonis, 15° [denebola]; α Pegasi, 14° [markab]; α Ophiuchi, 13° [rasal hague]; ε Pegasi, enif, 9° [fomal fars]; α Serpentis, 7° [oonuk]; γ Orionis, bellatrix, 6° [mirzam]; α Ceti, menkar, 4° [menkar]. South of equator, 20:—δ Orionis [nazm], 0° s.; ε Orionis, 1° [nitauk ool jowzah]; α Hydræ, cor hydræ, 8° [alphard]; β Libræ, 9° [zubenelg]; α Libræ, 15° [zubenesch]; β Ceti, 19° [deneb kyetos]; β Scorpii, 19°; β Corvi, 23°; ε Canis majoris, 29°; α Columbæ, 34°; γ Argûs, 47°; α Gruis, 48°; γ Crucis, 56°; α Pavonis, 57°; ι Argûs, 59°; β Crucis, 59°; η Argûs, 59°; θ Argûs, 63°; β Argûs, 69°; α Trianguli australis, 69°.—"*c*" The following are of 3rd magnitude, with similar remark. North of equator, 37:—γ Cephei, 77° n. [al royee]; β Cephei, 70°; δ Ursæ majoris, phegda, 68°; α Draconis, 65° [thuban]; α Cephei, alderamin [q.v.], 62°; η Draconis, 62°; β Cassiopeæ, 58° [cuff ool khazeeb]; β Ursæ majoris, merak, 57° [alanak]; ε Ursæ majoris, 57° [alioth]; ζ Ursæ majoris, mirzar, 56°; β Draconis, rastaban, 52° [alwaida]; θ Ursæ majoris, 52°; ι Ursæ majoris, 49°; γ Andromedæ, alanak [q.v.], 42°; 12 Canum venaticorum, cor caroli, 39°; ι Aurigæ, 33°; β Lyræ, 33°; ζ Herculis, 32°; ζ Cygni, 30°; μ Herculis, 28°; ε Leonis, 24°; η Tauri, 24° [ayooshmat]; μ Geminorum, 23°; δ Geminorum, 22°; β Arietis, 20° [shartein]; η Boötis, 19° [roomhoolsimauk]; α Herculis, 15° [rasalgethy]; γ Pegasi, 14° [algenib]; ζ Aquilæ, 14°; γ Aquilæ, 10°; ζ Pegasi, 10°; κ Ophiuchi, 10°; ε Hydræ, 7°; δ Aquilæ, 3°; γ Ceti, 3°; ζ Virginis, 0°; η Virginis, 0°. South of equator, 13:—ε Virginis, vindemiatrix, 1° s.; α Aquarii, 1°; δ Ophiuchi, 3°; β Aquarii, 6°; θ Ceti, 9°; α Capricorni, 13°; δ Hydræ et crateris, 14°; γ Eridani, 14°; α Leporis, 18° [arsh ool jowzah]; ε Corvi, 22°; 15 Argûs, 24°; θ Ophiuchi, 25°; β Hydri, 78°.——(4) The following 9 fixed stars are those whose lunar distances are tabulated in English Nautical almanac, for finding Greenwich date, and thence longitude [dhroovacam, sauyanam]:—α tauri, aldebaran [q.v.]; α scorpii, antares [alkalb]; α aquilæ, altair [q.v.]; α arietis, hamel [q.v.]; α piscis australis, fomalhaut [q.v.]; α pegasi, markab [q.v.]; β geminorum, pollux [alzirah]; α leonis, regulus [kalb ool asad]; α virginis, spica [simauk ool azal].——(5) Secondly Nacshatram means generally a constellation. The following are the principal constellations for which native names are known arranged according to present european R.A. [lagnam], with their leading stars [yogam] and references; for tracing at night see last column and (1) "*c*" above:—

Constellations for which native names are known.

Arabic const., lun. mansion or sign. See sec. 8.	San. name, ditto. See sec. 8.	How made up on Eur. system. For cross-ref. see sec. 8.	Scientific, &c., name of principal star [yogam], with its no. on star table.	Ditto of other stars contained.	Present R.A. of col. 4.	Present Decl. of col. 4.
1	2	3	4	5	6	7
Mirat i moosalsila.	......	Andromeda [mirat i moosalsila].	α Andromedæ, alpheratz, eindram, 1.	β Andromedæ, mirack, batn ool hoot, 4; γ Alanak.	0-3	+ 28-29
Mooakhar, 27th.	Oottara bhaudram, 26th.	Pt. of An. [mirat i moosalsila] and Peg. [farasoolazam].	α Andromedæ, lpheratz, eindram, 1.	γ Pegasi, algenib or janah ool faras, mahendram, 2.	0-3	+ 28-29
Zaut ool coorsy.	Caushyapy ...	Cassiopea [zautoolcoorsy] ...	α Cassiopeæ	β Cassiopeæ, cuff ool khazeeb.	0-34	+ 55-56
Kyetos ...	......	Cetus [kyetos]	β Ceti, deneb kyetos, 3	α Ceti, menkar or cuff ool jazmah; ζ batn kyetos, 8; ο mira.	0-38	— 18-35
Alrishah, 28th...	......	String of pisces [hoot] ...	ε Piscium	δ Piscium	0-57	+ 7-19
......	Raivaty, 27th.	32 stars in pisces [hoot] ...	ζ Piscium, veidhrity, 5	Many others	1-7	+ 7- 0
Hoot, XII ...	Meenam, XII	Pisces [hoot]	η Piscium	ζ Piscium, veidhrity, 5; ι ...	1-26	+ 14-47
Nahr	......	Eridanus [nahr.]	α Eridani, achernar, 7	β γ Eridani	1-34	— 57-47
Shartein, 1st ...	Ashwiny, 1st.	Horns of aries [hamel] ...	α Arietis, hamel, 10	β Arietis, shartein, 9	2- 1	+ 22-57
Hamel, I ...	Maisham, I ...	Aries [hamel]	α Arietis, hamel, 10	β Arietis, shartein, 9; γ ...	2- 1	+ 22-57
......	Bharany, 2nd.	Part of Aries [hamel] or Musca.	35 Arietis, preety, 11	39, 41 Arietis	2-37	+ 27-15
Bootein, 2nd ...	......	Part of Aries [hamel]	ε Arietis	π υ Arietis	2-53	+ 20-55
Haumil i raus ool ghowl.	......	Perseus [haumil i raus ool ghowl].	α Persei, mirfak, 13	β Persei, algol, 12	3-17	+ 49-28
Sooreiyah, 3rd...	Kritticay, 3rd.	Pleiades [sowr]	η Tauri, alcyone, ayooshmat, 14.	......	3-41	+ 23-46
Aldebaran, 4th.	Rohiny, 4th...	Hyades [sowr]	α Tauri, aldebaran, sowbhaugyam, 16.	β Tauri, nath, agny, 20; γ nautih, 15; δ ε θ.	4-30	+ 16-17
Sowr, II... ...	Vrishab., II.	Taurus [sowr]	α Tauri, aldebaran, 16	β Tauri, nath, agny, 20 ...	4-30	+ 16-17
Mausik ool inaun.	......	Auriga [mausik ool inaun] ...	α Aurigæ, capella, oyook or rakeeb, bramhahridayam, 17.	δ Aurigæ, prajaupaty, 24; ε alanaz; β γ ζ η ι θ.	5- 9	+ 45-53
Jabbaur ...	......	Orion [jabbaur]	β Orionis, rigel, 18	α Orionis, Betelgeux, 23; γ bellatrix, mirzam, 19; ε nitauk, 21; ζ fakaur, 22; &c.	5- 9	— 8-20
Arnab	......	Lepus [arnab]	α Leporis, arsh ool jowzah ...	......	5-28	— 17-54
Hakah, 5th ...	Mrigash., 5th.	Head of Orion [jabbaur] ...	λ Orionis, shobhanam	Two others	5-29	+ 9-52
Fakaur ool jowzah.	......	Belt of Orion [jabbaur] ...	ε Orionis, nitauk ool jowzah, 21.	δ Orionis, mintaka, nazm; ζ fakaur ool jowzah, 22.	5-31	— 1-16
Hanah, 6th ...	Ardray, 6th ...	Shoulder of Orion [jabbaur].	α Orionis, betelgeux, 23 ...	......	5-49	+ 7-23
Safeenah ...	......	Argo navis [safeenah] ...	α Argus, canopus, sooheil, 25 ...	β γ δ ε ζ θ η, 6 Argûs ...	6-22	— 52-38
Kalb i acbar ...	......	Canis major [kalbi acbar]. ...	α Canis majoris, dog star or sirius, 26.	β Canis majoris, mirzam; ε.	6-40	— 16-34
Kalb i asghar ...	......	Canis minor [kalbi asghar]....	α Canis minoris, procyon, 27 ...	β Canis minoris, mirzam ...	7-34	+ 5-30
Jowzah, III ...	Mitoonam, III.	Gemini [jowzah] ...	β Geminorrum, pollux, alzirah, soocarmam, 28.	α Geminorum, castor; γ, alhena; ξ alzirr.	7-39	+ 28-17
Zirah, 7th ...	Poonarvas, 7th.	Head of Gemini, [jowzah] ...	Ditto.	α θ τ Geminorum	7-39	+ 28-17

Constellations for which native names are known—continued.

Arabic const., lun. mansion or sign. See sec. 8.	San. name, ditto. See sec. 8.	How made up on Eur. system. For cross-ref. see sec. 8.	Scientific, &c., names of principal star [yogam], with its no. on star table.	Ditto of other stars contained.	Present R.A. of col. 4.	Present Decl. of col. 4.
1	2	3	4	5	6	7
Sartaun, IV ...	Carcatac., IV.	Cancer [sartaun]	β Cancri, præsepe, milaf ...	α Cancri, shoolam; δ dhrity; γ &c.	8-11	+ 9-31
Nasara, 8th ...	Pooshyam, 8th.	Nebula, &c., in Cancer [sartaun].	δ Cancri, dhrity, 29	β Cancri, milaf; γ.	8-39	+ 18-33
Tarafa, 9th ...	......	Part of Leo [asad] and Cancer [sartan].	α Cancri, shoolam, 30	λ Leonis	8-53	+ 12-16
......	Aushlai., 9th.	Part of Cancer [sartaun] ...	α Cancri, shoolam, 30	4 others	8-53	+ 12-16
Shoojah	......	Hydra [shoojah]	α Hydræ, corhydræ, alphard, 31.	......	9-22	− 8-11
Asad, V	Simham, V ...	Leo [asad]	α Leonis, cor leonis or regulus, kalbool asad, gandam, 32.	β Leonis, denebola, dhroovam, 37; γ algeiba; δ vriddhy, 36.	10-3	+ 12-30
Jabaha, 10th ...	......	Part of Leo [asad]	α Leonis, cor leonis, 32	γ algeiba; ζ η Leonis... ...	10-3	+ 12-30
......	Magham, 10th.	Part of Leo [asad]	α Leonis, cor leonis, 32	γ algeiba; s μ ν Leonis ...	10-3	+ 12-30
Zoobra, 11th ...	P. phalgoony, 11th.	Part of Leo [asad]	δ Leonis, vriddhy, 36	θ Leonis	11-8	+ 21-7
Bautiya	......	Crater [bautiya]	δ Crateris	α Hydræ et crateris, alkes, &c	11-14	− 14-12
Sarafa, 12th ...	O. phalgoony, 12th.	Part of Leo [asad]	β Leonis, denebola, 37	......	11-43	+ 15-11
Ghooraub ...	......	Corvus [ghooraub]	α Corvi, algoreb, 38	β Corvi; δ vyaughautam, 39.	12-3	− 24-8
Arsh ool simauk.	......	Part of Virgo [soomboola] ...	η Virginis	δ Virginis, aupas, 40; γ ε.	12-14	− 0-3
......	Hastam, 13th.	Part of Corvus [ghooraub] ...	δ Corvi, vyaughautam, 39 ...	α Corvi, algoreb, 38; β γ ε.	12-24	− 15-43
Doobhe acbar ...	Maha ricsham.	Ursa major [doobhe acbar].	ε Ursæ majoris, alioth or jaddy ool far kad.	α Ursæ majoris, doobhe, 35; β alanak, 34; η benetnasch or kauyid or alkaid, 42; γ, δ.	12-49	+ 56-32
Awwah, 13th. ...	......	Part of Virgo [soomboola] ...	δ Virginis, aupas, 40	γ η Virginis; ε vindemiatrix.	12-50	+ 3-59
Simauk ool azal, 14th.	Chitta, 14th ...	Spike of Virgo [soomboola] ...	α Virginis, spica, harshanam, 41.	......	13-19	− 10-35
Soomboola, VI.	Canyay, VI ...	Virgo [soomboola]	Ditto.	δ Virginis, aupas, 40; ε vindemiatrix.	13-19	− 10-35
Ghafr, 15th ...	......	Part of Virgo [soomboola] ...	ι Virginis	κ λ Virginis	14-10	− -29
Awwah	Swauty, 15th.	Boötes [awwah]	α Boötis, arcturus, haurs ool samah or simauk &c., vajram, 44.	η Boötis, alroomh, roomhool simauk, 43; ε izaur.	14-11	+ 19-45
Cantooras ...	......	Centaurus [cantooras] ...	α Centauri, hazaur	β wazn; ζ θ Centauri ...	14-32	− 60-23
Saboo	......	Lupus [saboo]	α Lupi	......	14-35	− 46-55
......	Vishauk., 16th.	Part of Lib. [meezaun], & Sc. [akrab].	α Libræ, siddhy, 46	ι ν Libræ; λ Scorpii	14-45	− 15-36
Doobhe asghar.	Cshoodra ricsham.	Ursa minor [doobhe asghar].	β Ursæ minoris, kochab, 47 ...	α Ursæ min., polaris, alrooccabah, dhroovam, 6; γ δ ε ζ η.	14-51	+ 74-36
Farkdaun ...	......	Watches of U. m. [doobhe asghar].	β Ursæ minoris, kochab, 47 ...	γ Ursæ minoris	14-51	+ 74-36
Meezaun, VII ...	Toolaum, VII.	Libra [meezaun]	β Libræ, zubenelg	α Libræ, siddhy, zubenesch ...	15-11	− 8-59
Zoobaunah, 16th.	......	Part of Libra [meezaun] ...	β Libræ, zubenelg	α Libræ, siddhy, 46; γ ...	15-11	− 8-59
Yikleel i shoomauly.	......	Corona borealis [yikleeli shoomauly].	α Coronæ borealis, gemma, alphacca, 48.	......	15-30	+ 27-5
Hooweiyah ...	......	Serpens [hooweiyah]	α Serpenti, oonuk, 49	......	15-39	+ 6-46
Yikleel, 17th ...	Anoora. 17th.	Part of Scorpio [akrab] ...	δ Scorpii, vyateepautam, 50 ...	β υ π ρ Scorpii	15-54	− 22-19
Akrab, VIII ...	Vrishchic., VIII.	Scorpio [akrab]	α Scorpii, antares, 52	β Scorpii &c.	16-23	− 26-11
Kalb, 18th ...	Jyeshtay, 18th.	Part of Scorpio [akrab] ...	α Scorpii, antares, 52	σ τ Scorpii	16-23	− 26-11
Jausy	......	Hercules [jausy]	β Herculis	α Herculis, rasalgethy, 54; ζ.	16-25	+ 21-43
Kyekows ...	......	Triangulum aust. [kyekows].	α Trianguli australis	β γ Trianguli australis ...	16-37	− 68-49
Mijmarah ...	......	Ara [mijmarah]	β Aræ	α γ Aræ	17-16	− 55-25
......	Moolam, 19th.	Part of Scorpio [akrab] ...	λ Scorpii	ε μ &c. Scorpii	17-26	− 37-2
Showla, 19th ...	......	Part of Scorpio [akrab] ...	λ Scorpii	ν Scorpii, parigham, 51 ...	17-26	− 37-2
Heiyah	......	Ophiuchus [heiyah]	α Ophiuchi, rasalhague, 55 ...	......	17-30	+ 12-38
Tinneen ...	......	Draco [tinneen]	γ Draconis, etenin, 56	α Thuban; β alwaida; μ rauks, 53.	17-54	+ 51-30
Nauyim, 20th ...	P. ashau., 20th.	Bow of Sagittarius [kows] ...	δ Sagittarii, shivam, 57	ε Sagittarii	18-14	− 29-53
Balda, 21st ...	Dhanoos ...	Bow of Sagittarius [kows] ...	δ Sagittarii, shivam, 57	ε μ χ Sagittarii	18-14	− 29-53
Kows, IX ...	Dhanoos, IX.	Sagittarius [kows]	ε Sagittarii	λ Sagttariii, royinauyim; ν ayeen, &c.; δ μ θ σ τ ζ.	18-17	− 34-26
Shalyauk ...	Abhijit, 21st, α	Lyra [shalyauk]	α Lyræ, vega, 58	β γ Lyræ	18-33	+ 38-41
......	O.ashau., 21st.	Body of Sagittarius [kows] ...	τ Sagittarii, siddham, 59 ...	ζ Sagittarii	19-0	− 27-53
Yikleelijoonooby.	......	Corona aus. [yikleel i joonooby].	β Coronæ australis	......	19-2	− 39-33
Ookaub	Shravan., 22nd.	Aquila [ookaub]	α Aquilæ, altair, 60...	β alshain; γ η Aquilæ ...	19-45	+ 8-35
Saham	......	Sagitta [saham]	γ Sagittæ	......	19-53	+ 19-12
Jaddy, X ...	Macaram, X...	Capricornus [jaddy]	α Capricorni	β δ Capricorni	20-12	− 12-52
Zaubih, 22nd ...	......	Horns of Capricornus [jaddy].	α Capricorni	β Capricorni	20-12	− 12-52
Doolfeen ...	Dhanisht. 23rd.	Delphinus [dool feen]. ...	α Delphini, shoobham, 61 ...	β γ δ Delphini	20-35	+ 15-32
Dajjajah ...	......	Cygnus [dajjajah]	α Cygni, aridad, deneb, 62 ...	γ Cygni, sadr ool dajjajah; ζ.	20-38	+ 44-53
Kita ool faras ...	......	Equuleus [kita ool faras]. ...	α Equulei	......	21-10	+ 4-48
Boola, 23rd ...	......	Part of Aquarius [dalo] ...	β Aquarii	ε μ Aquarii...	21-26	− 6- 2
Dalo, XI ...	Coombham, XI.	Aquarius [dalo]...	β Aquarii	λ ν ζ Aquarii	21-26	− 6- 2
Sood, 24th ...	......	Part of Aquarius [dalo] ...	β Aquarii	ξ Aquarii	21-26	− 6- 2
Faras ool azam	......	Pegasus [faras ool azam] ...	ε Pegasi, enif, fomal fars or sad ool hoomaum, 63.	α Pegasi, markab, 68; β mankib, 67; γ algenib, 2; δ.	21-39	+ 9-23
Akbee, 25th ...	......	Part of Aquarius [dalo] ...	γ Aquarii	ζ η π Aquarii	22-16	− 1-56
......	Shatabhishay, 24th.	Right leg of Aquarius [dalo].	λ Aquarii, shooclam or shoobhram, 65.	......	22-47	− 8-10
Hoot i joonooby.	......	Piscis aus. [hoot i joonooby].	α Piscis australis, fomalhaut, 66.	......	22-52	− 30-12
Mokaddam, 26th.	P. bhaudram, 25th.	W. sq. of Peg. [faras ool azam].	α Pegasi, markab, 68	β Pegasi, scheat, mankib, 67; ζ.	22-59	+ 14-37
Farghaun ...	......	Sq. of Peg. [faras ool azam]...	α Pegasi, markab, 68	β Pegasi, scheat, 67; γ algenib, 2; δ.	22-59	+ 14-37

No.	Name.	Sign used in native astronomy.	Approximately corresponding European constellation.	Index star [yogam] and corresponding European scientific and popular name, with number on fixed star table, and present R.A.	Presiding deity.	Quality in nativities; *i.e.*, when the moon stands in this constellation at time of a birth.	Character of each nacshatram, and favorite animals, &c., in astrology [jyotisham, vaunashastram]. Ganam.	Animal.	Tree.	Bird.	Corresponding section of the Solar zodiac [raushy chuckram], sign [raushy], and Solar month [mausam].	Veety [q.v.].	Avastaunam [q.v.].	No.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1	Ashwiny ...	Horse's head	Part of Aries [hamel].	Vishcambham, α Arietis, Hamel (10), 2 h. 1 m.	Twin-gods.	Good. Shaunty.	Devam.	Horse [ghorah].	Yetty [poison nut].	Rajauly [shyainam].	Maisham, ♈, Chittray.	Naugam.		1
2	Bharany ...	Yony, triangle, or fire place.	Musca [hamel] ...	Preety, 35 Arietis (11), 2 h. 37 m ...	Yaman ...	Bad	Maunoosham.	Male elephant [q.v.].	Nelly [emblic myrobalan].	Crow [caurvam]				2
3	Kritticay ...	Razor	Pleiades [sowr]. ...	Ayooshmat, η Tauri, Alcyone (14), 3 h. 41 m.	Agny ...	Very bad. ...	Raucshasam.	Ewe [aud] ...	Atty [q.v.] ...	Mayil [q.v.] ...				3
4	Rohiny ...	Cart	Hyades [sowr] ..	Sowbhaugyam, α Tauri, Aldebaran (16), 4 h. 30 m.	Prajaupaty.	Good	Maunoosham.	Male cobra [q.v.].	Nauval [jaumoon].	Owl [ooloocam].	Vrishabham, ♉, Veiyaushy.	Gajam ...	Eirauvatam.	4
5	Mrigashiras.	Antelope's head	Head of Orion [jabbaur].	Shobhanam, λ Orionis, 5 h. 29 m. ...	Soman ...	Good	Devam.	Female rat-snake [q.v.].	Caroongauly [sundra].	Cock [moorghy]				5
6	Ardray ...	Gem, coral, or burning coal.	Part of Orion [jabbaur].	Atigandam, α Orionis, Betelgeux (23), 5h. 49 m.	Roodran.	Bad	Maunoosham.	Male dog [nye]	Red caroongauly.	Anril				6
7	Poonarvas...	House, bow, or large sea boat.	Part of Gemini [jowzah].	Soocarmam, β Geminorum, Pollux (28), 7 h. 39 m.	Adity ...	Good	Devam.	Female cat [poonay].	Bamboo [q.v.]	Hamsam [q.v.].	Mitoonam, ♊, Auny.			7
8	Pooshyam...	Arrow, string, or looking glass with handle.	Part of Cancer [sartaun].	Dhrity, δ Cancri (29), 8 h. 39 m. ...	Bribaspaty.	Good. Shaunty.	Devam.	Ram [aud] ...	Peepul [q.v.].	Water crow [jala caukkay].		Eirauvatam.		8
9	Aushlaisham	Potter's wheel, serpent, or sloping stone.	Part of Cancer [sartaun].	Shoolam, α Cancri (30), 8 h. 53 m.	Sarpam ...	Bad	Raucshasam.	Male cat [poonay].	Poon [q.v.] ...	Shitchily [kilkilah].	Catacam, ♋, Audy.			9
10	Magham ...	House, palanqueen, or yoke.	Part of Leo [asad] ...	Gandam, α Leonis, Regulus (32), 10 h. 3 m.	Pitri ...	Good. Shaunty.	Raucshasam.	Male rat [ely].	Banyan [q.v.].	Male vulture [gidh].				10
11	Poobbam ...	Couch, two small squares, or legs of bedstead.	Part of Leo [asad] ...	Vriddhy, δ Leonis (36), 11 h. 8 m. ...	Bhagam ...	Medium ...	Maunoosham.	Female rat [ely].	Palaus [q.v.].	Female vulture [gidh].	Simham, ♌, Auvany.	Arshabhoo.		11
12	Oottaram ...	Bed, two small squares, or legs of bedstead.	Part of Leo [asad] ...	Dhroovam, β Leonis, Denebola (37), 11 h. 43 m.	Aryamay.	Medium ...	Maunoosham.	Bull [maud].	Araly [ganniair].	Shil vandoo ...				12
13	Hastam ...	Hand	Part of Corvus [ghooraub].	Vyaughautam, δ Corvi (59), 12 h. 24 m.	Savitry ...	Good	Devam.	Female buffalo [khoolgah].	Autty [mountain ebony].	Kite [chillam].	Canyay, ♍, Pooratau-shy.	Go ...	Veishwaunary.	13
14	Chitta ...	Pearl	Part of Virgo [soomboola].	Harshanam, α Virginis, Spica (41), 13 h. 19 m.	Twashtay.	Bad. Shaunty.	Raucshasam.	Male tiger [pooly].	Bael [q.v.] ...	Marangotty. [q.v.].				14
15	Swauty ...	Coral bead, ruby, or small brinjaul.	Part of Boötes [awwah].	Vajram, α Boötis, Arcturus (44), 14 h. 11 m.	Vayoo ...	Good	Devam.	Male buffalo [khoolgah].	Marootham [murdah].	Tainee [q.v.] ...	Toolaum, ♎, Arpisy.			15
16	Vishaukham	Circle, gateway or arch ...	Pt. of Lib. [meezaun] and Sc. [akrab] ..	Siddhy, α Libræ (46), 14 h. 45 m. ...	Indran and Agny.	Bad. Shaunty.	Raucshasam.	Female tiger [pooly].	Wood apple [q.v.].	Shevvaul coorvy or red tail bird.				16
17	Anooraudhay.	Row of oblations, umbrella in hand, or bow.	Part of Scorpio [akrab].	Vyateepautam, δ Scorpii (50), 15 h. 54 m.	Mitran ...	Good	Devam.	Female deer [mrigam].	Magizham [ilanjy].	Chautacam [koel].		Jauradgavam.		17
18	Jyeshtay ...	Ring, umbrella in hand, or spear.	Part of Scorpio [akrab].	Vareeyas, α Scorpii, Antares (52), 16 h. 23 m.	Indran ...	Bad. Shaunty.	Raucshasam.	Male deer [mrigam].	Pirye [stunted jack].	Chuckravaucam [bram. duck].	Vrishchicam, ♏, Caurtigay.			18
19	Moolam ...	Lion's tail, leaping lion, or trumpet.	Part of Scorpio [akrab].	Parigham, λ Scorpii 17 h. 26 m. ...	Prajaupaty.	Very bad. Shaunty.	Raucshasam.	Female dog [nye].	Marah ...	Shempottoo [cr. pheasant].	Dhanoos, ♐, Maurgaly.	Mrigam.		19
20	Poorvashaudham.	Elephant's tooth, two double squares, or legs of bedstead.	Part of Sagittarius [kows].	Shivam, δ Sagittarii (57), 18 h. 14 m. ...	Aupas ...	Medium ...	Maunoosham.	Male monkey [bandar].	Vanjy [goolancha].	Paganday [teetar].				20
21	Oottarashaudham.	Elephant's tooth, two double squares, or legs of bedstead.	Part of Sagittarius [kows].	Siddham, τ Sagittarii (59), 19 h. 0 m.	Vishwedevah.	Good	Maunoosham.	Barren cow [maud].	Pilah [jack].	Valiyan [king crow].				21
21*a*	Abhijit ...	Triangle	Part of Lyra [shalyauk].	Abhijit, α Lyræ, Vega (58), 18 h. 33 m.	Bramha ...	......	......	......	......	......				21*a*
22	Shravanam.	Triangle or three foot-steps.	Part of Aquila [ookaub].	Saudhyam, α Aquilæ, Altair (60), 19 h. 45 m.	Vishnoo ...	Good	Devam.	Female monkey [bandar].	Yercum [q.v.].	Nauray [blue heron].	Macaram, ♑, Tye.	Ajam ...	Jauradgavam.	22
23	Dhanishtay.	Drum	Part of Dolphin [doolfeen].	Shoobham, α Delphini (61), 20 h. 35 m.	Vasoo ...	Bad. Shaunty.	Raucshasam.	Female lion [simham].	Vanny [shamee].	Pon vandoo [zeerangy].				23
24	Shatabhishay.	Circle	100 stars of Aquarius [dalo].	Shooclam, λ Aquarii (65), 22 h. 47 m.	Varoonan.	Bad	Raucshasam.	Mare [ghorah].	Cadamba [q.v.].	Andam caukkay [carrion crow].				24
25	Poorva bhaudram.	Couch, double headed figure, two double squares, or legs of ravanan's bedstead.	Part of Pegasus [faras ool azam].	Bramham, α Pegasi, Markab (68), 22 h. 59 m.	Ajeicapaud.	Medium ...	Maunoosham.	Male lion [simham].	Taimah [mango].	Oollaun [q.v.].	Coombham, ♒, Maushy.			25
26	Oottara bhaudram.	Couch, double headed figure, two double squares, or legs of ravanan's bedstead.	Part of Andromeda [mirat i moosal si lah] and Pegasus [faras ool azam].	Eindram, α Andromedæ, Alpheratz (1), 0 h. 3 m.	Ahirboodnay.	Medium ...	Maunoosham.	Cow [maud].	Vaimboo [neem].	Cottaun [ooloocam].		Dahanam.		26
27	Raivaty ...	Tabor, or fish	32 Stars in Pisces [hoot].	Veidhrity, ζ Piscium (5), 1 h. 7 m. ...	Pooshan.	Good. Shaunty.	Devam.	Female elephant [q.v.].	Ilooppay [common mohwah].	Vallooroo [shyainam].	Meenam, ♓, Pungoony.			27

(6)—"*a*" The following are the constellations north of the zodiac [raushy chuckram]:—Andromeda [mirat i moosalsila]; Aquila, the eagle [ookaub]; Auriga, the charioteer [mausik ool inaun]; Boötes, the herdsman [awwah]; Camelopardus, the giraffe; Canes venatici, the greyhounds; Cassiopea [zaut ool coorsy]; Cepheus [zaut ool coorsy]; Coma berenicis, berenice's hair; Corona borealis, the northern crown [yikleel i shoomauly]; Cygnus, the swan [dajjajah]; Delphinus, the dolphin [doolfeen]; Draco, the dragon [tinneen]; Equuleus, the little horse [kita ool faras]; Hercules [jausy]; Lacerta, the lizard; Leo minor, the little lion; Lynx, the lynx; Lyra, the harp or lyre [shalyauk]; Monoceros, the unicorn; Ophiuchus, or serpentarius, the serpent bearer [heiyah]; Pegasus, the winged horse [faras ool azam]; Perseus [haumil i rausoolghowl]; Sagitta, the arrow [saham]; Serpens, the serpent [hooweiyah]; Triangulum, the triangle; Ursa major, the great bear [doobhe acbar]; Ursa minor, the little bear [doobhe asghar]; Vulpecula, the fox.—"*b*" The following are the constellations of the zodiac. Northern:—Aries ♈, the ram [hamel]; Taurus ♉, the bull [sowr]; Gemini ♊, the twins [jowzah]; Cancer ♋, the crab [sartaun]; Leo ♌, the lion [asad]; Virgo ♍, the virgin [soomboola]; Southern:—Libra ♎, the balance [meezaun]; Scorpio ♏, the scorpion [akrab]; Sagittarius ♐, the archer [kows]; Capricornus ♑, the goat [jaddy]; Aquarius ♒, the water-bearer [dalo]; Pisces ♓, the fishes [hoot].—"*c*" The following are the constellations south of the zodiac:—Antlia pneumatica, the air pump; Apparatus sculptoris, the sculptor's tools; Apus, the bird of paradise; Ara, the altar [mijmarah]; Argo navis, the ship argo [safeenah]; Canis major, the great dog [kalb i acbar]; Canis minor, the little dog [kalb i asghar]; Cela sculptoris, the engraver's tool; Centaurus, the centaur [cantooras]; Cetus, the whale [kyetos]; Chameleon; Circinus, the pair of compasses; Columba, the dove; Corona australis, the southern crown [yikleel i joonooby]; Corvus, the crow [ghooraub]; Crater, the cup [bautiya]; Crux, the cross [trishunkoo]; Dorando, the sword fish; Equuleus pictorius, the painter's easel; Eridanus, the river eridanus [nahr]; Fornax, the furnace; Grus, the crane; Horologium, the clock; Hydra [shoojah]; Hydrus, the water snake; Indus, the indian; Lepus, the hare [arnab]; Lupus, the wolf [saboo]; Microscopium, the microscope; Mons mensæ, the table mountain; Musca, the fly [bharany]; Norma, the square; Octans, the quadrant; Orion [jabbaur]; Pavo, the peacock; Phœnix; Piscis australis, the southern fish [hoot i joonooby]; Piscis volans, the flying fish; Reticulum, the net; Sextans, the sextant; Telescopium or tubus, the telescope; Toucanus, the toucan; Triangulum australe, the southern triangle [kyekows].——(7) Thirdly nacshatram means the special form of constellation called an asterism in the moon's path [cacsham], otherwise a lunar mansion, in which the moon [chundran] happens to be each day [tity], this being one of the important entries in the native calendar [punchaungam]. Of these according to the earlier reckoning twenty-seven are enumerated, but in the later astrology [jyotisham] more usually twenty-eight [abhijit], distinct in name, figure and number of stars.—"*a*" In the vedams [q.v.], the asterisms are considered to be the abodes of the gods or the visible forms of pious persons after death [samsauram]. In the later mythology they are regarded as wives of moon [chundran] and daughters of Dacshan [q.v.]. Note that Bel of Chaldea meant the sun; and the Chaldean serpent or dragon was the moon's course through these asterisms; the effect of which, in connexion with ecliptic [craunty mundalam], is to form a serpentine figure like the Caduceus of the Greeks. Compare Kait and Rahoo. A modern notion is that the nacshatrams of the moon are human beings who have been exalted to that honor, but that when their stock of merit is exhausted they again descend to earth as shooting stars [samsauram].—"*b*" An ordinary lunar mansion contains an arc of 13° 20′ of the circumference [paridhy] of the zodiac [raushy chuckram], $27 \times 13° 20′$ being $= 360°$; therefore a solar zodiacal sign [raushy] contains $2\frac{1}{4}$ Nacshatrams, $30° \div 13° 20′$ being $= 2\frac{1}{4}$. There are a fixed and a movable lunar zodiac, as well as a fixed and movable solar zodiac [raushy chuckram]; therefore there are fixed and movable Nacshatrams, the motion of the latter being equal to the progress of the Ayanaumsham [q.v.], or 54″ per annum according to Soorya siddhauntam [maunam, mausam], against the 50″ about of european science. The number of stars in the constellations from ashwiny [q.v.] are according to Varauha mihiran [q.v.]:—3, 3, 6, 5, 3, 1, 5, 3, 6, 5, 8, 15, 5, 1, 1, 5, 4, 3, 11, 2, 8, 3, 5, 100, 15, 8 and 32; these numbers also represent the various stellar periods of astrology; in matters connected with marriage these numbers represent years after which the effects indicated will be felt; recovery from fever and the like will begin after so many days. Authorities vary as to the numbers; those given in these pages are based on a collation of several. In the 6 lunar mansions beginning from Raivaty [q.v.] the 27th, the stars are towards the east; and in the 12 beginning from Ardray [q.v.] the 6th, they are in the centre; and in the 9 beginning from Jyeshtay [q.v.], the 18th, they are in the west of the several mansions; the moon's conjunction [sangamam] with the lunar mansions is said to take place when the moon is in the middle of these mansions. For Abhijit see that head, and for the stars supposed to lie at the junction between different nacshatrams see Yogam. Each mansion is itself divided into 60 ghadiyas, the ghadiay into 60 vighadiyas, &c., so that 1 ghadiya is equal to 13′ 20″, a vighadiya to 13″ 20‴, and a para to 13‴ 20⁗; which denominations must not be confounded with the measures of time of the same names [caulam]. The mansions are in more common usage divided into four quarters, called Paudams [q.v.], giving to the whole ecliptic 108 paudams.—"*c*" The astrologers make lunar mansions of great practical consequence from their assumed good or evil influence; not only at time of birth, but during life. They are spoken of as quasi-deities, whose favor needs to be propitiated, and whose frown is fatal to health and life. The test of application is the situation of the moon [chundran] in this or that Nacshatram at the moment of an event occurring. Thus the so called star of a person through life is that nacshatram or mansion in which the moon was at the moment of his or her birth. There is no question that the nacshatrams are a source of infinite terror to natives of all castes. They are consulted at births and marriages and in all times of difficulty, sickness, and anxiety. Journeys are begun under their direction [rijaul ool gheib], and, according to their decision days and events become lucky or unlucky. The consultation of the nacshatrams is in fact part of an orthodox native's life, and is as important in his eyes as the institution of caste [jauty] or the worship [poojah] of the gods. The nacshatrams are classified into ganams, as devam divine, maunoosham human, raucshasam savage; see table of hindoo lunar mansions opposite; if two parties to be married are born in the same class according to this arrangement, it is well; if one asterism be divine, the other human, it may pass; but divine and savage is a cross that may not be permitted [zyecha]. In the list below it will be observed that 'shaunty' is affixed to names of mansions; it means rest and shows that the ill-natured deity, to whom it refers, requires a ceremony of pacification to be performed in the event of a child being born at the time of their rising, in order that calamities and dangers which it threatens to send upon the child or its parents or other relatives, or on its friends, or on its caste, may be averted. Modern astrologers consider the nacshatrams as good, bad, and indifferent, according as they are male, female, or neuter. Natives observe anxiously the course of the moon [chundran] with respect to the four stars of the tenth constellation, magham [q.v.], when the sun [sooryan] is in the sign coombham [q.v.], i.e., from about february 10th to march 10th with a view to ascertain the future agricultural [vellaumay] prospects of the land; the market price [agavilay] of food-grains [dhaunyam] is at once lowered or raised according as the moon's course lies to south of the four stars or more and more to north of Regulus, the southernmost star; it is also stated in shastrams that if the moon should pass to the north of all the four stars the world would be at an end; similarly if saturn [shany] should enter the fourth constellation, rohiny [q.v.]. Cf. Calky, Calpam, Caulam. Oottaraphalgoony [oottaram], Oottarashaudham [q.v.], and Oottarabhaudram [q.v.], together with Rohiny [q.v.], are in astrology known as Dhroovam or stable asterisms. Moolam [q.v.], Ardray [q.v.], Jyeshtay [q.v.], and Aushlaisham [q.v.], are known as Teecshnam or sharp asterisms. Poorvaphalgoony [q.v.], Poorvashaudham [q.v.], Poorvabhaudram [q.v.], Bharany [q.v.], and Magham [q.v.], are known as Oogram or severe asterisms. Hastam [q.v.], Ashwiny [q.v.], and Pooshyam [q.v.], are known as Laghoo or light asterisms. Anooraudhay [q.v.], Chitta [q.v.], Raivaty [q.v.], and Mrigashiras [q.v.], are known as Mridoo or soft asterisms. Kritticay [q.v.] and Vishaukham [q.v.] are known as Mridoo teecshnam, or soft and sharp asterisms and they produce effects of mixed character. Shravanam [q.v.], Shravishtay [dhanishtay], Shatabhishay [q.v.], Hastam [q.v.] and Swauty [q.v.] are asterisms through which when the moon passes should be commenced works of a moving character. The following are varauha mihiran's [q.v.] dogmas regarding lunar asterisms in simple nativity [jenma puttricay]:—"a person born at the moment "when the moon [chundran] passes through ashwiny [q.v.] "will be fond of ornaments, will be of fine appearance, will "be popular, skilled in work and intelligent; when the moon "passes through bharany [q.v.] will be successful at work, "truthful, free from diseases, able and free from grief; when "the moon passes through kritticay [q.v.] will be a glutton, "fond of the wives of other men, of bright appearance and "of wide-spread fame; when the moon passes through rohiny "[q.v.] will be truthful, will not covet the property of other "men, will be of cleanly habits, of sweet speech, of firm "views, and of fine appearance; when the moon passes through "mrigashiras [q.v.] will be of no firm principles, will be able, "timid, of good speech, of active habits, rich and will indulge "in sensual pleasures; when the moon passes through ardray "[q.v.] will be insincere, of irascible temper, ungrateful, "troublesome and addicted to wicked deeds; when the moon "passes through poonarvas [q.v.] will be devout and of patient "habits, will live in comfort, will be good-natured, quiet, of "wrong views, sickly, thirsty and pleased with trifles; when the "moon passes through pooshyam [q.v.] will have a control over "his desires, will be generally liked, learned in the shastrams "[q.v.], rich, and will be fond of acts of charity; when the moon "passes through aushlaisham [q.v.] will not be attentive to the "work of other men, will be a promiscuous eater, will be sinful, "ungrateful and skilled in cheating other men; when the moon "passes through magham [q.v.] will have numerous servants, "will worship the devas [q.v.] and pitries [q.v.] and will be "engaged in important works; when the moon passes through

"poorvaphalgoony [poobbam] will be of sweet speech, will "be liberal in his gifts, of wandering habits, and will serve "under kings; when the moon passes through oottaraphalgoony "[oottaram] will be generally liked, will earn money by his "learning, and will live in comfort; when the moon passes "through hastam [q.v.] will be of active habits, full of resources, "shameless, merciless, and a thief and a drunkard; when the "moon passes through chitta [q.v.] will wear cloths and flowers "of various colors and will have beautiful eyes and limbs; when "the moon passes through swauty [q.v.] will be of a mild and "quiet nature, will control his passion, will be skilled in trade, "will be merciful, unable to bear thirst, of sweet speech, and "disposed to do acts of charity; when the moon passes through "vishaukham [q.v.] will be jealous of another's prosperity, will "be a niggard, of bright appearance, of distinct speech, skilled "in earning money, and disposed to bring about quarrels among "men; when the moon passes through anooraudhay [q.v.] will "be rich, will live in foreign lands, will be unable to bear "hunger, and disposed to wander from place to place; when the "moon passes through jyeshtay [q.v.] will have few friends, "will be very cheerful, virtuous, and of irascible temper; when "the moon passes through moolam [q.v.] will be haughty, rich, "happy, not disposed to injure other men, of firm views and will "live in luxury; when the moon passes through poorvashaudham "[q.v.] will have an agreeable wife, will be proud and attached "to friends; when the moon passes through oottarashaudham "[q.v.] will be obedient, will be learned in the rules of virtue, "will possess many friends, will be grateful and return favors "received, and will be generally liked; when the moon passes "through shravanam [q.v.] will be prosperous and learned, will "have a liberal-minded wife, will be rich and of wide-spread "fame; when the moon passes through dhanishtay [q.v.] will "be liberal in gifts, rich, valiant, fond of music, and will be a "niggard; when the moon passes through shatabhishay [q.v.] "will be harsh in his speech, will be truthful, will suffer grief, "will conquer his enemies, will thoughtlessly engage in work, "and will be of independent ways; when the moon passes "through poorvabhaudram [q.v.] will suffer from grief, will "place his wealth at the disposal of his wife, will be of distinct "speech, will be skilled in earning money, and will be a niggard; "when the moon passes through oottarabhaudram [q.v.] will be "an able speaker, will be happy, will possess children and "grandchildren, will conquer his enemies, and will be virtuous; "when the moon passes through raivaty [q.v.] will possess "perfect limbs, will be liked by all the people, will be deeply "learned, will never covet the property of other men, and will "be rich."—"*d*" For the application of the lunar mansion series on the full moon [pownimay] principle to the month nomenclature see Mausam, and for their application on the solar residence [sancramanam, sancraunty] principle to the 27 seasonal divisions of the year see Caurtey; it is owing to this three-fold use of the mansion names for the daily stations [tity] of the moon [chundran], for the monthly stations of the full moon [pownimay], and for the 27 stations [caurtey] of the sun [sooryan], that the whole of the complexity of the luni-solar [chaundramaunam] calendar [punchaungam] nomenclature arises.—"*e*" The following is the list of Nacshatrams. They reckon from the beginning of the solar zodiac [raushy chuckram] whether that is movable or fixed [craunty pautam, maishauyanam, maunam, mausam, rishy raikhay, veidhrity]. The numbers run from west to east, so that the lower number rises before the higher:—[*See page* 544].—"*f*" The 28 Arabian lunar mansions or manzils [q.v.] can be readily seen from the Constellation Table on pages 542, 543.——**(8)** The following is an alphabetical list of all the fixed stars and constellations for which native names are known, showing their derivation, and the scientific or European equivalents with a few particulars. The Arabian and European constellations largely correspond; the Hindoo constellations rarely exceed limits of solar or lunar zodiac [raushy chuckram]. The figures appended to star-names or star-letters show where the corresponding fixed stars are to be found in the Table of Fixed Stars at pages 540, 541.——*Abhijit* (अभिजित् - abhijit, San.). From (abhiji, san. to conquer). Otherwise Nasr ool wauky [q.v.], 58. Intercalary [adhicam] hindoo lunar mansion, between 21st and 22nd. Figured as a triangle or as the nut of the floating trapa [singhaura]. Does not occupy an equal portion of the ecliptic [craunty mundalam] with the other nacshatrams, but is taken out of the contiguous divisions; is very remote from the zodiac [raushy chuckram]. Principal star is Vega, α Lyræ [shalyauk], 58. 1st magnitude. Cf. Asaufy, Azfaur.——*Achernar* (اخرالنهر - ukhrunnahar, Ar.). From (ukhr, ar. end + nahar, ar. river). Star of first magnitude in the southern hemisphere. α Eridani [nahr], 7. Not known to Hindoos.——*Agastyan* (अगस्त्य - agastya, San.). Means the sage so called.—"*a*" Otherwise Coombha yony [q.v.]. Same as Sooheil [q.v.], 25; or Canopus. Only known to Hindoos after coming to s. india.—"*b*" Also Atry [q.v.] in mahariesham [q.v.]. His wife Atreyee [q.v.] or Anoosya [q.v.] is κ Draconis [tinneen].——*Agny* (अग्नि - agni, San.). Means fire; from brightness. Otherwise Nath [q.v.]. Star of second magnitude, β Tauri [sowr], 20; which star is also known as γ Aurigæ [mausik oolinaun]. Title is also name of 3rd hindoo lunar mansion Kritticay [q.v.].——*Ajooz ool asad* (عجزالاسد - ajúzulasad, Hind.). From (ajúz, ar. rump + asad, ar. leo). Same as Arsh ool simauk.——*Akbee* (اخبيه - akhbíh, Ar.). From (khibá, ar. grain of barley); from the circular figure of the constellation. Otherwise Sad ool akbee [q.v.]. ζ, η, β, γ, π, Aquarii [dalo]. 25th arabian lunar mansion. Compare hindoo mansion Shatabhishay. It is said that when it rises aurorally reptiles which are under ground by reason of cold come forth.——*Akhzar* (اخضر - akhzar, Ar.). Means verdant, fresh; being a rainy star. Same as Fomal haut.——*Akrab* (عقرب - akrab, Ar.). From (akaraba, ar. to twist). Scorpio [vrishchicam]. Eighth constellation of the ancient zodiac [raushy chuckram]. Distinguished by a remarkable star of a reddish color, having two small stars close to it; this is α Scorpii or Antares, 52 [alkalb, vareeyas]. From it a line of small stars of the 3rd and 4th magnitude trends first to the S. and then E. into Milky way [kahkashaun]; these mark the tail of Scorpion, where is to be traced the yogam [q.v.] star [parigham] of 19th hindoo mansion, λ, ν or υ. To the W. of Antares is another line of small stars, ranged nearly W. and S., which show the claws; among them is β Scorpii. On a line drawn from Vega, 58 [abhijit, nasr ool wauky] through α Ophiuchi [heiyah], 55 [rasalhague], and produced rather more than the same distance, lies Antares. Or, a line produced to the southward from α Coronæ borealis [yikleel i shoomauly], 48 [alphacca], through α Serpentis [hooweiyah], 49 [oonuk], leads to the stars forming the head of the Scorpion; the principal star of the group is β Scorpii, to the south-eastward of which is Antares. Arcturus, 44 [haurs ool samah, vajram], Spica, 41 [harshanam, simauk ool azal], and Antares, 52, form a right-angled triangle, Spica being at the right angle. Antares passes meridian at midnight about end of May. For Kalb ool akrab or heart of scorpio, see Alkalb and Kalb. For claw of scorpio, see Zubenelg and Zubenesch. For δ Scorpii, 50, see Vyateepautam. For λ or ν Scorpii, 51, see Parigham. For arabian extension of scorpio into Libra see Zoobaunah. For other stars see Anooraudhay, Jyeshtay, Moolam, Showla, Yikleel.——*Alanak* (العناق - alanák, Ar.). From (unuk, ar. neck) [oonuk].—"*a*" Star of third magnitude, β Ursæ majoris [doobhe acbar, mahariesham], 34. Is Poolahan in hindoo system.—"*b*" Also (anákularz). γ Andromedæ [mirat i moosalsila].——*Alanaz* (العنز - alanz, Ar.). From (anaza, ar. to turn away); being on the left elbow of the constellation. Star, ε Aurigæ [mausikoolinaun]. Cf. Alinauz.——*Alasah* (العصى - alasá, Hind.). Means staff. Orion's belt [fakaur ool jowzah].——*Aldebaran* (الدبران - aldabarán, Ar.). From (al, ar. the + dabarán, ar. follower); also called Towbee [q.v.] or follower, from its following pleiades; Haudy oon najm [q.v.], meaning urger of the asterism or pleiades; Taulyoon najm [q.v.], meaning the follower of pleiades [kritticay, sooreiyah]; Kalb oos sowr [q.v.], meaning heart of taurus. As a constellation it corresponds to Hyades, and is α, β, γ 15, δ, ε Tauri [sowr]; 4th Arabian lunar mansion; compare hindoo mansion Rohiny. As a star it is α Tauri [sowr], 16 [ayeen ool sowr, sowbhaugyam], of the first magnitude. This is about longitude of equinoctial colure at commencement of present Kaliyoog [madhyama sowramaunam].——*Alderamin* (الدرامين - aldaramin, Ar.). Star of third magnitude, α Cephei [caushyapy, zaut ool coorsy].——*Alfirk* (الفرق - alfirk, Ar.). Star. β Cephei [caushyapy, zautool coorsy].——*Alfoorood* (الفرود - alfurúd, Ar.). Means apart from other stars. Certain bright stars round pleiades [kritticay, sooreiyah]. Cf. Alphard.——*Algeiba* (الجابه - aljába, Ar.). From (al, ar. diminutive + jába, ar. lion). Star, γ Leonis [asad].——*Algenib* (الجناح - aljanáh, Ar.). From (al, ar. the + janáh, ar. wing). Otherwise Janah ool faras [q.v.], meaning wing of the horse; also Mahendram [q.v.]. Star of third magnitude, γ Pegasi [faras ool azam], 2.——*Algol* (الغول - alghúl, Ar.). From (al, ar. the + ghúl, ar. goblin); from its variations in light, fading and brightening at intervals. Star usually of second magnitude but changes to fourth every third day. β Persei [haumil i rausool ghowl], 12. Also known as β Medusæ, in the head of Medusa held in Perseus's hand.——*Algoreb* (الغراب - alghuráb, Ar.). From (al, ar. the + ghuráb, ar. corvus). Otherwise Alchiba. Star, α Corvi [ghooraub], 38. 4th or 5th magnitude.——*Alhena* (الهنعه - alhana, Ar.). From (al, ar. diminutive + hana, ar. group in orion). Star, γ Geminorum [jowzah]. Cf. Hanah, the mansion.——*Alinauz* (العناز - alináz, Ar.). Pl. of (alanz). Two stars on the left wrist of the charioteer, η ζ Aurigæ [mausik ool inaun], together with α Aurigae or Oyook [q.v.], 17. Cf. Alanaz.——*Alioth* (الجدى - aljadí, Ar.). From (al, ar. diminutive + jadí, ar. kid). To be distinguished from constellation Jaddy [q.v.] or capricornus. Compare also the same word Aljaddy as synonym of Alrooccabah. The present star is otherwise Jaddy ool farkad [q.v.] or the kid of the small bear guards. Is Angiran in hindoo system. Star of third magnitude, ε Ursæ majoris [doobhe acbar, mahariesham], the one in the tail next body.——*Alkaid* (القائد - alkáid, Hind.). From (al, ar. the + káid, ar. mourner); from stars in tail being taken as mourners accompanying the bier formed by 4 stars of Bear's body [naash]. η Ursæ majoris [doobhe acbar, mahariesham], at the end of tail, 42. Also called Benetnasch [q.v.], and Kauyid [q.v.]. Is Mareechy in hindoo system.——*Alkalb* (القلب - alkalb, Ar.). From (al, ar. the + kalb, ar. heart). Otherwise Kalb ool akrab [q.v], meaning heart of scorpio. Star of first magnitude, α Scorpii [akrab], 52; otherwise Antares and

Vareeyas [q.v.]. See also Kalb, the arabian mansion.——*Alkes* (الكأس - alkásah, Ar.). From (al, ar. the + kásah, ar. the cup). Star of 4th magnitude, α Hydræ et crateris [bautiya], 33. Compare the terms in Casat ool masaukeen and Causa i darvishaun.——*Alnitak* (النطاق - alniták, Ar.). From (al, ar. diminutive + nitak, ar. belt). Star, ζ Orionis [jabbaur]; at eastern end of belt [alasah, fakaur ool jowzah].——*Alphacca* (الفكة - alfakkah, Ar.). From (fakka, ar. opening), from semi-circular shape of the constellation of which this is the leading star. Otherwise Gemma. Star of second magnitude, α Coronæ borealis [yikleel i shoomauly], 48.——*Alphard* (الفرد - alfard, Ar.). Means single, being apart from other visible stars. Cf. Alfoorood. Otherwise Oonuk shoojah [q.v.], meaning neck of hydra. Star of second magnitude, α Hydræ [shoojah], 31, or Cor hydræ.——*Alpheratz* (الفرس - alfaras, Ar.). From (al, ar. the + faras, ar. horse). Star of 2nd magnitude, α Andromedæ [miratimoosalsila], 1; also known as δ Pegasi [faras ool azam]. This is about the longitude of the present equinoctial colure [madhyama sowra maunam].——*Alrishah* (الرشاء - alrishá, Ar.). From (al, ar. the + rishá, ar. cord). Also called Kalb ool hoot [q.v.], meaning heart of the fish; also Batn ool hoot [q.v.], meaning belly of the fish. δ ε Piscium [hoot, meenam], with some neighbouring stars in the form of a fish with tail towards the south and head towards the north. 28th Arabian lunar mansion. Compare hindoo mansion Raivaty.——*Al riyaul* (الرئال - arriyál, Ar.). Plural of (rál), meaning young of an ostrich. Certain small stars in the neighbourhood of Nauyim [q.v.] the ostriches, regarded as their young ones.——*Al rooba* (الربع - alrubaa, Ar.). Means a fourth. Small star in middle of Awoyiz [q.v.] in head of Draco [tinneen].——*Al rooccabah* (الرقبة - alrukabah, Ar.). Means the guardian. Also Aljaddy meaning the kid; compare Alioth. Star of second magnitude, α Ursæ minoris [cshoodra ricsham, doobhe asghar], 6; otherwise Polaris the present pole star [dhroovam], a little less than 1¼° from the north pole of the equator [naudy mundalam]. Round this the other stars appear to revolve in the course of a day. For past and present pole-stars see under Doobhe asghar, where also see pointers to Alrooccabah. There is no bright star near south pole [dacshina dhroovam]; the only star near about it being of the sixth or last visible magnitude. For pointers of the south pole see Trishunkoo.——*Alroomh* (الرمح - alrumh, Hind.). From (al, ar. the + rumh, ar. spear). Same as Roomh ool simauk.——*Al royee* (الراعي - arrái, Hind.). Means a watcher. Star. Term for both α Ophiuchi [heiyah], 55 [rasalhagne] and γ Cephei [zaut ool coorsy]. Cf. Kalb ool royee for the attendant dog in each case.——*Alsamak* (السمك - assamak, Hind.). Means the fish. Same as Hoot.——*Alshain* (الشاهين - alsháhín, Ar.). From (al, ar. diminutive + sháhín, ar. falcon). Star, β Aquilæ [ookaub].——*Altahauyee* (التحايي - altaháyí, Ar.). From (hayá, ar. rain); from its setting aurorally in midwinter when there is much rain. Small constellation. Three stars over against Hanah [q.v.] between milky way [kahkashaun] and capella, 17 [bramhahridayam, oyook].——*Altair* (الطائر - attáir, Ar.). From (al, ar. the + táir, ar. bird); with wings expanded as if to fly. Otherwise Nasrooltair [q.v.]. Star of the first magnitude, α Aquilæ [ookaub], 60 [saudhyam].——*Alwaida* (العوائذ - alawáiz, Ar.). From (al, ar. diminutive + awáiz, ar. group in draco). Cf. Awoyiz. Star, β Draconis [tinneen].——*Alzirah* (الذراع - alzirá, Ar.). From (al, ar. the + zirá, ar. foreleg); cf zirah, leo's foreleg being here in the old arabian configuration. Otherwise Pollux. Star of the first magnitude, β Geminorum [jowzah], 28 [soocarmam].——*Alzirr* (الزر - alzirr, Ar.). Means a button. Star, ξ Geminorum [jowzah].——*Angiran* (अङ्गिर - angira, San.). From (ang, san. to go round). One of the seven stars [sapta rishy] of Maharicsham [q.v.], at end of tail next body, ε Ursæ majoris [doobhe acbar]. Is Alioth in arabian system.——*Anooraudhay* (अनुराधा - anurádhá, San.; അനിഴം - anizham, Mal.; அனுடம் - anudam, Tam.). From (anu, san. along + rádh, san. to succeed); causing welfare. 17th hindoo lunar mansion. Described as a row of oblations; also as umbrella in hand, or bow. Four stars, β, δ 50, π and ρ Scorpii [akrab]. For δ Scorpii see Vyateepautam. Cf. arabian mansion Yikleel.——*Anoosham* (அனுடம் - anudam, Tam.). Corruption of Anooraudhay [q.v.].——*Anoosya* (अनुस्या - anusyá, San.). Otherwise Atreyee [q.v.]. Wife of Agastyan [q.v.] or Atry [q.v.] in Maharicsham [q.v.]. κ Draconis [tinneen].——*Antacan* (अन्तक - antaka, San.). From (anta, san. end), from yaman [q.v.] or death, the presiding deity. Same as Bharany.——*Arcabhay* (अर्कभा - arkabhá, San.). From (arka, san. sun + bhá, san. to shine). Same as Hastam.——*Ardray* (आर्द्रा - árdrá, San.; ஆதிரை - áthirai, Tam.). Means wet or fresh. Tam. also (tiruváthirai), meaning holy + ardray. Otherwise Rowdray [q.v.]. Sixth hindoo lunar mansion, made up of a single bright star; described as a gem, coral, a burning coal. The star in the shoulder of Orion, α Orionis [jabbaur], 23 [atigandam, betelgeux]. 1st magnitude. Compare arabian mansion Hanah.——*Aridad* (الردف - arridf, Hind.). From (ridf, ar. hinder part). Star of second magnitude, α Cygni [dajjajah], 62 [deneb].——*Arnab* (ارنب - arnab, Ar.). Means a hare. Twelve stars. Lepus in S. hemisphere. Small constellation to the south of Orion [jabbaur]. Its principal star, α Leporis [arsh ool jowzah]; of third magnitude, is about same distance or 17° west of Sirius, 26 [loobdhacam, mrigavyaudham, shira] that it is south of the middle star [nitauk ool jowzah] of Orion's belt [fakaur ool jowzah]; the three stars form a right-angled triangle, α Leporis being at the right angle.——*Aroondhaty* (अरुन्धती - arundhatí, San.). From (a, san. negative prefix + rudh, san. to stop); not to be interfered with, chaste. A star near Maharicsham [q.v.] said to be wife of Vasishtan [q.v.]; α Draconis [tinneen] or Thuban [q.v.].——*Arsh ool jowzah* (عرش الجوزا - arshuljauzá, Ar.). Means throne of orion [jabbaur]. Four stars; two on forelegs and two on hind legs of Lepus [arnab]. Also specially applied to the single star α Leporis.——*Arsh ool simauk* (عرش السماك - arshussimák, Ar.). Means throne of boötes [awwah]. Otherwise Ajoozool asad [q.v.]. Certain stars in advance of simauk ool azal [q.v.], 41; probably γ, δ 40, ε, η Virginis [soomboola]. For δ Virginis, 40, see Aupas. Compare Awwah the 13th arabian mansion.——*Arsh ool sooreiyah* (عرش الثريا - arshussuraiyah, Ar.). Means throne of pleiades [kritticay, sooreiyah]. Certain small stars near them. Cf. Alfoorood.——*Asad* (اسد - asad, Ar.). Means a lion [simham]. Leo. Fifth constellation of ancient zodiac [raushy chuckram]. South of Great bear [doobhe acbar, maharicsham], on opposite side of it to Polaris, 6 [alrooccabah, dhroovam]. Its four principal stars, α, β, γ, δ, form a quadrilateral figure. To find α Leonis, 32 or Regulus [gandam, kalb ool asad], and β Leonis, 37 or Denebola [q.v.]; a line drawn from Polaris through the Pointers [alanak, doobhe] of the Great bear, and continued rather more than the same distance, will pass between these two stars, Regulus [gandam, kalbool asad], 32 being on the west and β Leonis [denebola, dhroovam], 37 on the east. A line drawn from Vega, 58 [abhijit, nasr ool wauky] through Cor caroli [doobhe acbar] and produced, leads to δ Leonis, 36 [vriddhy, zoobra], and then passes near Regulus, 32. Again, δ [atry] and γ Ursæ majoris [poolastyan], the two stars of the body next tail of Great bear, are nearly in the same line with γ Leonis [algeiba] and Regulus. Again a line drawn from middle star [nitauk ool jawzah] of Orion's belt [alasah, fakaur ool jowzah] through Procyon, 27 [ghoomeisah], in the Little dog [kalb i asghar], will lead directly to Regulus, 32. A line drawn from η Ursæ majoris, 42 [benetnasch], the last star in the tail of the Great bear, through Cor caroli [doobhe acbar], and produced about twice the distance, will lead to β Leonis, 37 [denebola, dhroovam]. It is the most conspicuous star on a line drawn from Arcturus, 44 [haurs ool samah, vajram] to Regulus, 32, but situated nearer the latter. γ Leonis [algeiba] is north, a little easterly and distant about 8° from Regulus. δ Leonis is N.W. of β Leonis, distant about 10°. α Leonis or Regulus is sometimes from its position called Cor leonis or the Lion's heart; Denebola [q.v.] is in tail. Regulus passes the meridian at midnight towards the end of February. Leo minor or the Little lion is a small constellation between Leo and Ursa major [doobhe acbar, maharicsham]. The old arabian Asad extended far west over Cancer [sartaun] and into Gemini [jowzah]. For Ajooz ool asad or rump of leo see Arsh ool simauk. For Jabhat ool asad or forehead of leo see Jabaha. For Kalb ool asad or heart of leo see sep. title. For Oorkoob ool asad or hock of leo see Awwah. For Coonb ool asad see sep. title. For Anfool asad or nose of leo see Nasara. For Zirah ool asad or foreleg of leo see Zirah. Compare arabian mansion Sarafa. Compare also Zirah, Zirah ool mabsoot, and Zirah ool makbooz for the extended arabian Asad. See also Jabaha, Magham, Oottaram, Poobbam, Tarafa, and Zoobra.——*Asaufy* (اثافي - asáfí, Hind.). From (asfiya, ar. one of the three stones on which a cooking pot is placed). A trivet. σ, τ, ν, Draconis [tinneen]. Also the three chief stars in Lyra [shalyauk]. Cf. Azfaur.——*Ashaudham* (आषाढ - áshádha, San.). From (ashádha, san. invincible). Epithet of 20th and 21st hindoo lunar mansions [oottarashaudham, poorvashaudham]. Also name of 4th luni-solar [chaundramaunam] month [mausam].——*Ashraut* (اشراط - ashrát, Ar.). Plural of Sharat. 3 stars in Aries [hamel], two bright [shartein] and one small towards the north of them.——*Ashwiny* (अश्विनी - ashviní, San.; அசுவதி - asuvathi, Tam.). Title and san. from (ashva, san. horse). Tam. from (ashva, san. horse + pati, san. master). The hindoo Dioscuri, horsemen. Probably originally the two twilights. Now first hindoo lunar mansion. Obtained its present situation at head of asterisms, when zodiac [raushy chuckram] started from first degree of the fixed Maisham [q.v.]. For the ancient zodiac headed by Kritticay [q.v.] see remarks under Maunam. Figured as a horse's head. Comprises three bright stars in the head of Aries [hamel], α β and γ; in conformity with Shartein [q.v.], the first lunar mansion of the arabs. For α Arietis, 10 see Hamel and Vishcambham; for β Arietis, 9 see Shartein.——*Atigandam* (अतिगण्ड - atiganda, San.). From (ati, san. prefix of intensity + ganda, san. prominent). Yogam star of sixth hindoo lunar mansion. α Orionis [jabbaur], 23 [betelgeux]. 1st magnitude.——*Atreyee* (अत्रेयी - átréyí, San.). Descendant of Atry. Same as Anoosya.——*Atry* (अत्रि - atri, San.). Means devourer. Otherwise Agastyan [q.v.]. One of seven stars [sapta rishy] in Maha ricsham [q.v.], in square, δ Ursæ majoris [doobhe acbar].——*Aupas* (आपस् - ápas, San.). Means water.

Otherwise (apámvatsa), meaning water + child. Star δ Virginis [canyay, soomboola], 40. 4th magnitude.——*Aushlaisham* (आश्लेष - áshlésha, San.; ஆயில்லியம் - áyilliyam, Tam.). From (á, san. intensive prefix + shlish, san. to cling). Embrace. Otherwise Ayilliyam [q.v.], and Sarpam [q.v.]. Ninth hindoo lunar mansion. Figured as a potter's wheel, serpent, or sloping stone. Contains five stars of which the principal or eastern is the bright star in the southern claw of Cancer, α Cancri [sartaun], 30 [shoolam]. Compare arabian mansion Tarafa.——*Avittam* (அவிட்டம் - avittam, Tam.). Corruption from shravishtay [q.v.] the 23rd hindoo lunar mansion. Same as Dhanishtay.——*Awoyiz* (عوائز - awáiz, Ar.). Four stars in the head of Tinneen [q.v.]; between Zeebaun [q.v.] and Nasr ool wauky, 58 [q.v.]. β Draconis is Alwaida [q.v.] or small Awoyiz.——*Awwah* (عوا - awwá, Ar.). Means a barking dog; also called Seiyyah meaning clamorous constellation; also called Tarood al bard meaning driver of cold, from rising in evening at close of cold weather.—"*a*" Constellation consisting of two and twenty stars within the figure and one without it; the figure being that of a man having in his right hand a staff, between the stars alphacca [q.v.], 48 and benetnasch [q.v.], 42; and the one without the figure is the red bright star between his thighs, Arcturus, 44 [haurs ool samah, vajram]. This is in the european system the herdsman Boötes, who in rising immediately follows Great bear [doobhe acbar, maharicsham], in early times figured as an ox. Arcturus, or α Boötis, 44 [haurs ool samah, vajram], is the brightest star in N. hemisphere. To find it, continue curve formed by the three stars in tail [banaut] of Great bear to about twice its length, and it will lead to it. η Boötis, 43 is Alroomh [q.v.] or Roomhoolsimauk [q.v.]. ε Boötis, 45 is Izar [q.v.], or Ghafr [q.v.]. Boötes was later called by greeks Arctophylax or the bear-watcher. For Zauviyat ool awwah or angle of boötes see sep. title.—"*b*" As 13th arabian mansion it consists of five stars in the wing of Virgo [canyay, soomboola]. Compare Hastam, 13th hindoo mansion.——*Ayeen ool faras* (عين الفرس - ainulfaras, Ar.). Means eye of the horse, pegasus. Otherwise Markab [q.v.], 68. Star of second magnitude, α Pegasi [faras ool azam], 68 [bramham]. Compare also Farghaun.——*Ayeen ool raumy* (عين الرامی - aínurrámí, Ar.). Means eye of sagittarius [kows]. Star, ν Sagittarii.——*Ayeen ool sowr* (عين الثور - ainussaur, Ar.). Means bulls' eye. Otherwise Kalb ool sowr [q.v.]. Star of first magnitude, α Tauri [sowr], 16 [aldebaran, sowbhaugyam].——*Ayilliyam* (ஆயில்லியம் - áyilliyam, Tam.). Corruption from aushlaisham [q.v.] the ninth hindoo lunar mansion.——*Ayooshmat* (आयुष्मत् - áyushmat, San.). From (áyus, san. life + mat, san. suffix of possession). Yogam star of third hindoo lunar mansion. Otherwise Alcyone. η Tauri [sowr], 14. 3rd magnitude.——*Azfaur* (اظفار - azfár, Hind.). From (zafr, ar. talon). Three small stars before α Lyræ [shalyank], 58 [abhijit, nasr ool wauky], forming the vulture's talon. Cf. Asaufy.——*Azfaur oolzeib* (اظفار الذيب - azfáruzzíb, Ar.). From (azfár, ar. claws + zíb, ar. wolf); cf. saboo. Certain stars before those called Zeebaun [q.v.] and near Farkdaun [q.v.].——*Balda* (بلدة - baldah, Ar.). Means breast, as in front of the archer. Six stars in Sagittarius [kows], including ε δ χ μ forming the bow. 21st arabian lunar mansion. Compare hindoo mansion Oottarabhaudram.——*Banaut* (بنات - banát, Ar.). Plural of (bint), daughter. Three stars in the tail of Ursa major [doobhe acbar].——*Batn kyetos* (بطن قيطس - batnkítas, Ar.). From (batn, ar. belly + kítas, ar. whale). Star of the third magnitude, ζ Ceti [kyetos], 8.——*Batn ool hoot* (بطن الحوت - batnulhút, Ar.). From (batn, ar. belly + hút, ar. fish). Otherwise Mirack [q.v.]. Bright star of the second magnitude above the drapery round the waist of Andromeda [miratimoosalsila]. β Andromedæ, 4. Also applied to Alrishah [q.v.].——*Bautiya* (باطية - bátiyah, Ar.). Means a cup. Constellation. Seven stars [milaf]. In the european system the Hydra and Goblet, S. hemisphere; is south of the Lion's tail [denebola]. The two principal stars, magnitude 3 and 4 are δ Hydræ et Crateris, and α Hydræ et Crateris, 33, sometimes called Alkes [q.v.], and are about 6° apart in N.E. and S.W. direction. They lie E.S.E., distant about 25° from Cor hydræ [alphard, 31], and south, a little westerly distant 30° from Denebola, 37 [q.v.] in the Lion's tail [asad].——*Benetnasch* (بنات النعش - banátunnaash, Ar.). From (banát, ar. daughters + naash, ar. dead body); cf. banaut. Means daughters of the dead following the bier. Same as Alkaid.——*Betelgeux* (ابط الجوزا - ibtuljauzá, Ar.). Title also written Betelgeuse; comes through french. From (ibt, ar. armpit + jauzá, ar. orion). Otherwise Mankib ool jowzah [q.v.], meaning orion's shoulder; also Yadd ool jowzah [q.v.], meaning arm of orion. Star of first magnitude. α Orionis [jabbaur], 23 [ardray, atigandam]. Variable, but variability extends over many years.——*Bharany* (भरणी - bharaní, San.; பரணி - parani, Tam.). From (bharana, san. nourishing). Also called Antacan [q.v.], from yaman the presiding deity. 2nd hindoo lunar mansion. Figured by yony, triangle, or fire place; comprises three stars in Musca or the fly, forming a triangle almost equilateral. Midway between ram's horn [shartein] and Pleiades [kritticay, sooreiyah]. Its influence is generally bad; but when at the nadir [q.v.] it is held to be a good time to begin to dig a foundation, a well, or a tank. Compare arabian mansion Bootein.——*Bhaudram* (भाद्र - bhádra, San.). Short for Bhaudrapadam [q.v.].——*Bhaudrapadam* (भाद्रपदा - bhádrapadá, San.). From (bhadra, san. auspicious + pada, san. foot), from being represented by legs of a bedstead. The 25th [poorvabhaudram] and 26th [oottarabhaudram] hindoo lunar mansion. For luni-solar [chaundramaunam] month so called see Mausam. Compare Fargh ool dalo.——*Boola* (بلع - bula, Ar.). Means voracious; so close that one of them swallows the other; cf. Zaubih. Otherwise Sad i boola. Two stars, ε, μ Aquarii [coombham, dalo]. 23rd arabian lunar mansion. Cf. hindoo mansion Dhanishtay.——*Bootein* (بطين - butain, Ar.). Diminutive of (batn, ar. belly). ε, π, υ Arietis [hamel]. 2nd arabian lunar mansion. Cf. hindoo mansion Bharany.——*Bramhahridayam* (ब्रह्महृदय - brahmahridaya, San.). From (brahma, san. the deity + hridaya, san. heart). Otherwise Capella, or Oyook [q.v.]. Star. α Aurigæ [mausik ool inaun], 17. 1st magnitude.——*Bramham* (ब्रह्म - brahma, San.). From (brahma, san. the deity). Otherwise Markab [q.v.]. Yogam star of 25th hindoo lunar mansion. α Pegasi [faras ool azam], 68. 2nd magnitude.——*Cantooras* (قنطورس - kuntúras, Ar.). From greek κένταυρος. Constellation of 37 stars. Centaurus, S. hemisphere. Begins 20° south of Spica, 41 [harshanam, simauk ool azal], and extends as far as Southern cross [trishunkoo]. It contains three principal stars, α, β and θ Centauri. α [hazaur] and β [wazn] Centauri are east, a little south, of the eastern arm of the Cross [trishunkoo], β Centauri being distant about 9¼°, and α Centauri 4½° more easterly still. θ Centauri, in the shoulder of Centaur, is south-westerly of α Libræ, 46 [siddhy, zubenesch], the chief star in Balance [meezaun, toolaum], and these two stars form with Spica, 41 [harshanam, simauk ool azal] a right-angled triangle. ζ Centauri, a star in the body of Centaur, is 13° northward of β [wazn] Centauri. α [hazaur] Centauri is the nearest fixed star to the earth, 20 billions of miles away; has parallax of $\frac{93}{100}$ ths of a second; light travelling 191,500 miles per second comes in 3¼ years.——*Canyay* (कन्या - kanyá, San.). Means virgin. 6th sign [raushy] of the zodiac [raushy chuckram]. Virgo, ♍ [soomboola].——*Carcatacam* (कर्कटक - karkataka, San.). Means crab. 4th sign [raushy] of zodiac [raushy chuckram]. Cancer, ♋ [sartaun].——*Casat ool masaukeen* (قصعة المساكين - kasatulmasákín, Hind.). From (kasa, ar. bowl + masákín, ar. pauper); cf. alkes; from configuration. Same as Yikleel i shoomauly.——*Causa i darvishaun* (كاسه درويشان - kásahidarwíshán, Hind.). From (kásah, pers. bowl + darwísh, pers. pauper); cf. alkes; from configuration. Same as Yikleel i shoomauly.——*Caushyapy* (काश्यपी - káshyapí, San.). From (kashyapa, san. the sage). Constellation. Cassiopea, wife of Cepheus or Cashyapan [zaut ool coorsy].——*Chitta* (चित्रा - chitrá, San.; చిత్త - chitta, Tel.). Means bright. Figured as a pearl. 14th hindoo lunar mansion; consists of single star of Virgin's spike, α Virginis [soomboola], 41, spica [harshanam, simauk ool azal]. 1st magnitude.——*Coombham* (कुम्भ - kumbha, San.). Means pot. 11th sign [raushy] of the zodiac [raushy chuckram]. Aquarius, ♒ [dalo]. See also Sood.——*Coombha yony* (कुम्भयोनि - kumbhayóni, San.). From (kumbha, san. pot + yóni, san. origin); from traditional origin out of a water jar. Otherwise Agastyan [q.v.]. Same as Sooheil [q.v.], 25, or Canopus.——*Coonb ool asad* (قنب الاسد - kumbulasad, Hind.). From (kumb, ar. sheath + asad, ar. leo). Star of second magnitude. Otherwise Denebola [q.v.]; also Dhroovam [q.v.]. β Leonis [asad], 37. Compare Sarafa, the arabian mansion.——*Cratoo* (क्रतु - kratu, San.). From (kri, san. to do). One of the seven stars [sapta rishy] of Maharicsham [q.v.], in square; α Ursæ majoris [doobhe acbar], 35. Doobhe [q.v.] in arabian system.——*Cshoodra ricsham* (क्षुद्रऋक्ष - kshudrariksha, San.). From (kshudra, san. little + riksha, san. bear). Constellation. Ursa minor [doobhe asghar].——*Cuff ool jazmah* (كف الجذماء - kaffuljazmá, Hind.). From (kaff, ar. hand + jazmá, ar. amputated); being a less distance from pleiades [kritticay, sooreiyah] in opposite direction than cuff ool khazeeb [q.v.]. Refers to some ancient figure. Otherwise Menkar [q.v.]. α Ceti [kyetos].——*Cuff ool khazeeb* (كف الخضيب - kaffulkhazíb, Hind.). From (kaff, ar. hand + khazíb, ar. extended); being farther off from pleiades [kritticay, sooreiyah] in opposite direction than cuff ool jazmah [q.v.]. Otherwise Chaph. β Cassiopeæ [caushyapy, zaut ool coorsy]. At the culmination [noojoom] of this the mahomedans believe every prayer to be favorably heard; this was recently the longitude of the equinoctial colure.——*Dajjajah* (دجاجة - dajjájah, Ar.). Means a domestic fowl. Also (attáir), meaning a bird. Constellation. Nineteen stars in the figure and two outside, of which four stars [fawauris] lie in Milky way [kahkashaun]. Cygnus, the Swan. The principal star is α Cygni, 62, or Deneb [q.v.] or Aridad [q.v.]. A line passing between last two stars of body [naash] of Great bear [doobhe acbar], γ [poolastyan] and δ Ursæ majoris [atry], thence between guards [farkdaun] of Little bear, β, 47 [kochab] and γ Ursæ minoris [cshoodra ricsham, doobhe asghar], and produced, will lead to α Cygni, or Deneb [q.v.]. A line drawn from α Persei, 13 [mirfak] through middle of Cassiopea [caushyapy, zaut ool coorsy] will lead to it. ζ Cygni is a

few degrees north of a line drawn from Alpheratz, 1 [q.v.], through Scheat, β Pegasi, 67 [mankib], and produced rather less than twice their distance; the double star, 61 Cygni, is 9° to north of ζ Cygni. γ Cygni is Sadr ool dajjajah; which see. For Zanab ool dajjajah or tail of cygnus see Deneb. See also Fawauris.——*Dalo* (دلو - dalo, Ar.). Means a bucket. Aquarius [coombham], the water-bearer. 11th constellation of ancient zodiac [raushy chuckram]. Contains a very great number of small stars situated to the south of Markab, 68 [q.v.] and Enif, 63 [fomalfars] in Pegasus [faras ool azam]. β Aquarii passes the meridian at midnight during the middle of August. λ Aquarii is Shoobhram [q.v.] or Shooclam [q.v.]. For others see Akbee, Shatabhishay, Sood. For Fargh ool dalo or side of dalo, see sep. title.——*Deneb* (الذنب - azzanab, Ar.). From (al, ar. the + zanab, ar. tail). Otherwise Zanab ool dajjajah [q.v.], 62, meaning the tail of cygnus; from resembling the tail of a horse; also Aridad [q.v.]. Star of first magnitude. α Cygni [dajjajah], 62.——*Denetalgedy* (ذنب الجدی - zanabuljadí, Ar.). From (zanab, ar. tail + jadí, ar. capricornus). Star of third magnitude. δ Capricorni [jaddy], 64. See also Sood.——*Deneb kyetos* (ذنب قیطس - zanabkítas, Ar.). From (zanab, ar. tail + kítas, ar. cetus). Star of second magnitude. β Ceti [kyetos], 3.——*Denebola* (ذنب الاسد - zanabulasad, Ar.). From (zanab, ar. tail + asad, ar. leo). Otherwise Coonb ool asad [q.v.]; also Dhroovam [q.v.]. Star of second magnitude. β Leonis [asad], 37. Compare Sarafa, the arabian mansion.——*Dhanishtay* (धनिष्ठा - dhanisht'há, San.; அவிட்டம் - avittam, Tam.). Means very rich. Otherwise Shravishtay [q.v.] or Avittam [q.v.]. 23rd hindoo lunar mansion. Represented by a drum or tabor. Four stars, α, β, γ and δ Delphini [doolfeen]. For α Delphini, 61 see Shoobham. Compare arabian mansion Sood.——*Dhanoos* (धनुस् - dhanus, San.). Means bow. Ninth sign [raushy] of the zodiac [raushy chuckram]. Sagittarius ♐ [kows].——*Dhrity* (धृति - dhriti, San.). Means holding fast. Yogam star of eighth hindoo lunar mansion. δ Cancri [sartaun], 29. 4th magnitude.——*Dhroovam* (ध्रुव - dhruva, San.). From (dhru, san. to be fixed).—"*a*" Otherwise Polaris, or Alrooccabah [q.v.]. For other pole stars see under Doobhe asghar. For south pole see Trishunkoo. Star of second magnitude. α Ursæ minoris [cshoodraricsham, doobhe asghar], 6.—"*b*" Yogam star of 12th hindoo lunar mansion, β Leonis [asad], 37. Same as Denebola [q.v.].——*Doobhe* (دب - dubb, Ar.). Means the bear. Star of second magnitude. α Ursæ majoris [doobhe acbar, maharicsham], 35; the european N. pointer, the S. pointer being β Ursæ majoris or alanak, 34 [q.v.]. Is Cratoo in hindoo system. ——*Doobhe acbar* (دب اکبر - dubbiakbar, Ar.). From (dubb, ar. bear + akbar, ar. great). Also (banátunnaashikubrá). Constellation. 27 stars. The Great bear, Ursa major [maharicsham], most conspicuous constellation of N. hemisphere. In European system distinguished by seven stars between first and third magnitudes; called from figure, when seen below the pole which is not the case here, Plough, Waggon, Charles's wain, Butcher's cleaver, &c. Four of these stars, α 35, β 34, γ, and δ Ursæ majoris, form a quadrilateral figure [naash], called Square of great bear [maharicsham]. They are in body of the animal; and because a line from two of the stars of this group, α and β Ursæ majoris, nearly falls into the Polar star, 6 [al rooccabah, dhroovam], these two are called pointers; the N. pointer, α Ursæ majoris, is Doobhe, 35 [q.v.] or the hindoo Cratoo [q.v.]; the S. pointer, β Ursæ majoris is Alanak, 34 [q.v.] or the hindoo Poolahan [q.v.]. δ Ursæ majoris [atry] has diminished in brightness during present century. The three stars ϵ, ζ, and η, are tail [banaut] of the Bear [ricsham]; the first, or that next body, is ϵ Ursæ majoris, or Alioth [q.v.], the hindoo Angiran [q.v.]; that at end of tail is η or Benetnasch, 42 [q.v.], the hindoo Mareechy [q.v.]. The middle of tail is ζ, the hindoo Vasishtan [q.v.]. Canes venatici, Hunting dogs or Grey-hounds, are not represented in the arabian system; these lie between Boötes [awwah] and Great bear [doobhe acbar, maharicsham], to south of tail; contain 12 Canum venaticorum, or Cor caroli. To find Cor caroli, a line from Arcturus, 44 [haurs ool samah, vajram] to β Ursæ majoris, 34 [alanak] is bisected by Cor caroli; or a line, from α Ursæ majoris, 35, Doobhe [q.v.], through γ Ursæ majoris [poolastyan], and produced nearly twice their distance, will point it out. Cor caroli, ϵ Ursæ majoris, and the S. pointer, β Ursæ majoris, 34 [alanak], form a triangle. See also Soohah. Cf. Ricsham, Rishy.——*Doobhe asghar* (دب اصغر - dubbiasghar, Ar.). From (dubb, ar. bear + asghar, ar. minor). Also (banátunnaashisughrá). Constellation. The Little bear, Ursa minor [cshoodraricsham], N. hemisphere. Seven principal stars, not unlike Great bear, but smaller; the tails of the two bears are in reversed directions. The quadrilateral figure is formed by β, γ, ζ, and η; in the tail are ϵ, δ, and α. α Ursæ minoris, 6, called Polaris, or the Pole star, or Al rooccabah [q.v.], or Dhroovam [q.v.], is of second magnitude, at end of tail. β 47, and γ of Little bear are used by sailors to mark hours of night; called guards, from the spanish meaning the night watches [farkdaun]. Polaris, 6 [al rooccabah] is found by pointers [alanak, doobhe] of Great bear, being first bright star on a line produced from β, 34 through α Ursæ majoris, 35 [doobhe]. North pole of heavens [oottaradhroovam] may be found by a line from ϵ Ursæ majoris [alioth], the first star in the tail, to Polaris, 6 and producing that line about $1\frac{1}{2}$°. When ϵ Ursæ majoris [alioth] is 6 hours from meridian, Polaris is at its greatest distance from meridian [raikhay], and its altitude [avanataumsham] in that position will be nearly same as elevation [oonnatam] of pole [dhroovam]; which is equal to latitude [acsham] of the observer. At present Polaris is approaching the pole, and about A.D. 2100 will be only 28′ off it, after which it will recede. Then the pole will pass from the Little bear to Cepheus [zaut ool coorsy] and then over the borders of the Swan [dajjajah]. 4,200 years ago α Draconis [tinneen] or Thuban [q.v.] or Aroondhaty was pole star, being at that time distant from pole only 10′. 2,000 years ago, β Ursæ minoris, 47 or Kochab [q.v.], was nearest the pole. In 6000 A.D. γ Draconis [tinneen], 56 [etenin] will be pole star. After 12,000 years, Vega, α Lyræ [shalyauk], 58 [abhijit, nasr ool wauky], will be the only pole star within about 5° of the pole [dhroovam]. Similarly Canopus, α Argûs [safeenah], 25 [agastyan, sooheil] will hereafter be bright star near south pole [dacshina dhroovam]. For pointers of south pole at present see Trishunkoo. These changes are connected with precession of equinoxes [ayanaumsham, craunty pauta gaty, maunam, rishy].——*Doolfeen* (دلفین - dulfín, Ar.). Means dolphin. Constellation. Ten stars. Delphinus [dhanishtay]. For α Delphini, 61 see Shoobham. See also Saleeb.——*Eindram* (ऐन्द्र - aindra, San.). Otherwise Alpheratz, 1 [q.v.]. Yogam star of 26th Hindoo lunar mansion, α Andromedæ [mirat i moosalsila], 1. 2nd magnitude. Compare Mahendram [q.v.] and Mankib [q.v.].——*Etenin* (تنین - tinnín, Ar.). Means a dragon. Star of third magnitude. γ Draconis [tinneen], 56.——*Fakaur ool jowzah* (فقار الجوزا - fakáruljauzá, Ar.). From (fakár, ar. spine + jauzá, ar. orion). Star of second magnitude. ζ Orionis [jabbaur], 22. Also as constellation the three bright stars δ, ϵ 21, ζ 22 disposed obliquely in the midst of jabbaur [q.v.], otherwise called warrior's belt or belt of orion [jabbaur]; also alasah [q.v.]. ζ Orionis, 22 is the eastern end of the belt [alnitak]; ϵ Orionis, 21 or nitauk ool jowzah [q.v.] is the centre, and δ Orionis or nazm [q.v.] or mintaka [q.v.] is the western end of the belt. The belt is known in english by various names as Golden yard, Jacob's staff and Three kings.——*Fakkah* (فکہ - fakkah, Hind.). From (fakk, ar. opening); from shape. Same as Yikleel i shoomauly.——*Faras ool azam* (فرس الاعظم - farasulazam, Ar.). From (faras, ar. horse + azam, ar. highest). Otherwise Faras ool acbar, meaning the greater horse. Constellation. Nineteen stars. Pegasus, the Winged horse. To south-westward of Andromeda [mirat i moosalsila], and south-eastward of Cygnus [dajjajah]; four remarkable stars, α, β, γ, δ of the second and third magnitudes, form the square [farghaun] of Pegasus, on opposite side of pole [dhroovam] to square of Great bear [doobhe acbar, maharicsham]; one constellation passes the meridian about 12 hours after the other. α Pegasi, 68 [ayeen ool faras, bramham] or Markab [q.v.], and β Pegasi, 67 [mankib] or Scheat, form the western side of the square, and pass the meridian [raikhay] first. α Pegasi, 68 is at the south-west angle of the square; β Pegasi, 67 is at the north-west angle, and distant about 13° from Markab, 68 [q.v.]. γ Pegasi, 2 [algenib, mahendram] is 14° south of α Andromedæ [mirat i moosalsila], 1 [alpheratz, eindram], and 16° east of Markab, 68 [q.v.]; it forms the south-east angle of the square [farghaun]. ϵ Pegasi, 63 [fomal fars, sad ool hoomaum] or Enif, a star between the second and third magnitude, lies about W. by S. from α Pegasi, 68, distant about 20°. Or a line drawn from β 4 to α 1 Andromedæ, and produced about twice their distance, will lead to it. Seven conspicuous stars in Pegasus, Andromeda [mirat i moosalsila], and Perseus [humiliraus ool ghowl], resemble the seven stars in the Great bear [doobhe acbar, maharicsham], but smaller. For others see Sad ool baury, Sad ool bihaum, Sad ool matar. For Ayeen ool faras or eye of horse see Markab. For Fomal fars or mouth of horse see sep. title. For Janah ool faras or wing of horse see Algenib. For Kita ool faras or small horse see sep. title. For Mankib ool faras or shoulder of horse see Mankib. For Matn ool faras or middle of horse see Mankib. See also Mokaddam, Mooakhar, Oottarabhaudram, Poorvabhaudram.——*Farghaun* (فرغان - farghán, Ar.). From (fargh, ar. width); from forming a square. Also (aldalo), the bucket. Constellation. Four stars α 68, β 67, γ 2, δ Pegasi [faras ool azam], forming a square, the apparent distance between each pair being the measure of a spear. Compare arabian mansion Fargh ool dalo, Fargh ool owval, Fargh ool sauny, Mokaddam, and Mooakhar. ——*Fargh ool dalo* (فرغ الدلو - farghuddalo Ar.). Means the breadth of a bucket. Name of the two arabian lunar mansions, 26th and 27th, distinguished by Mokaddam [q.v.] and Mooakhar [q.v.]. Compare hindoo mansions Poorvabhaudram and Oottarabhaudram.——*Fargh ool owval* (فرغ الاول - farghulawwal, Hind.). From (fargh, ar. width of a bucket + awwal, first). Westernmost or first rising side of square. Same as Mokaddam. Compare hindoo mansion Poorvabhaudram.——*Fargh ool sauny* (فرغ الثانی - farghussání, Hind.). From (fargh, ar. breadth + sání, ar. latter). Easternmost or later rising side of square. Same as Mooakhar. Compare hindoo mansion Oottarabhaudram.——*Farkdaun* (فرقدان - farkdán, Ar.). From (farkad, ar. calf + ar. dual sign). Small constellation. β 47 and γ Ursæ minoris [cshoodra ricsham, doobhe asghar]; by which one directs

one's course by sea and by land. Called 'guards' by sailors. For β Ursæ minoris, 47 see Kochab.——*Fawauris* (فوارس - favâris, Hind.). Constellation. Four stars in Cygnus [dajjajah] lying across the Milky way [kahkashaun].——*Fomal fars* (فم الفرس - fammulfaras, Ar.). From (famm, ar. mouth + faras, ar. horse). Otherwise Enif, 63. Star of second magnitude. ε Pegasi [faras ool azam], 63 [sad ool hoomaum]. See also Akhzar.——*Fomalhaut* (فم الحوت - fammulhût, Ar.). From (famm, ar. mouth + hût, ar. pisces). Star of first magnitude. α Piscis australis [hoot i joonooby], 66. See also Akhzar.——*Gandam* (गण्ड - ganda, San.). Means chief. Otherwise Regulus, 32. Yogam star of first magnitude of tenth hindoo lunar mansion. α Leonis [asad], 32 [kalb ool asad].——*Ghafr* (غفر - ghafr, Ar.). Means belly. Constellation. Three stars ι, κ, λ, of Virgo [soomboola]. 15th arabian lunar mansion. Compare hindoo mansion Swauty. Also a star of third magnitude, ε Boötis [awwah], 45 or Izar [q.v.].——*Ghoomeisah* (غميصاء - ghumaisâh, Ar.). From (ghamasa, ar. a flux from the eyes); from being affected with constant weeping. Otherwise Shiralghoomeisah [q.v.], meaning the shira with weeping eye on account of her separation from her sisters sirius, 26 [mrigavyaudham, shira] and canopus 25 [agastyan, sooheil]; also Shiralshaumiyah [q.v.] meaning the syrian or northern shira; also Roomeisah [q.v.], meaning having weeping eye. The european Procyon. Star of first magnitude. α Canis minoris [kalbiasghar], 27 [shira]. Compare Shiriyaun, the two sisters Shira [q.v.], and Ghoomeisah and Sooheil [q.v.].——*Ghooraub* (غراب - ghurâb, Ar.). Means crow. Constellation. Seven stars. The Crow, S. hemisphere, near the tail of Hydra [shoojah]; has four principal stars of the third magnitude in the form of a small quadrilateral figure, distant 15° to 20° in a S.W. direction from Spica, 41 [harshanam, simaukoolazal] in the Virgin [soomboola]. The northernmost star is δ Corvi, 39 [vyaughautam] and the southernmost star is β Corvi. Algoreb [q.v.] is α Corvi, 38. Compare Hastam.——*Hakah* (هقعه - hakaah, Ar.). Three stars in Orion [jabbaur]. Fifth arabian lunar mansion. Compare hindoo mansion Mrigashiras.——*Hamel* (حمل - hamal, Ar.). Means lamb. The star α Arietis, 10 [hamel, vishcambham]. Also Aries, the Ram [maisham], the first constellation in the ancient zodiac [raushy chuckram]. This contains two principal stars, α 10 and β Arietis, 9 [shartein]; which mark the base of the horns [shartein] of the ram, and are about 4° apart. To find α Arietis, 10, or Hamel, and β Arietis, 9, or Shartein [q.v.], a line drawn from Polaris, 6 [alrooccabah, dhroovam] through ε Cassiopeæ [caushyapy, zautool coorsy], the nearest to the Great bear [doobhe acbar, maharicsham] of the five stars, and produced thence through Alanak [q.v.], γ Andromedæ [mirat i moosalsila], leads to them nearly. Or, a line joining the Pleiades [kritticay, sooreiyah], and Algenib, 2 [q.v.], or γ Pegasi [faras ool azam], 2 [mahendram], is bisected by β Arietis, 9 [shartein]. β is to the south-westward of α Arietis, 10 [hamel] and close to β, about 1½° to the southward, is a star of the fourth magnitude, γ Arietis. The three stars are near each other, and in a line. Musca [bharany], the fly, is a group of small stars in the northern part of Aries not represented in arabic, and now called 35, 39, and 41 Arietis even in europe. See also Bootein [nowroz].——*Hanah* (هنعه - hanaah, Ar.). Means a mark on camel's neck. Five stars in Orion [jabbaur]. Sixth arabian lunar mansion. Compare hindoo mansion Ardray.——*Harshanam* (हर्षण - harshana, San.). From (hrish, san. to gladden). Yogam star of 14th hindoo lunar mansion. α Virginis [soomboola], 41. Spica [simauk ool azal]. 1st magnitude [madhyama sowra maunam, p].——*Hastam* (हस्ता - hastâ, San.; அத்தம் - attam, Tam.). From (hasta, san. hand). 13th hindoo lunar mansion. Figured as a hand; contains five stars, α, β, γ, δ, ε Corvi [ghooraub]. For α Corvi, 38 see Algoreb. For δ Corvi, 39 see Vyaughautam. Compare arabian mansion Awwah.——*Haudy oon najm* (حادي النجم - hâdiyunnajm, Hind.). From (hâdí, ar. urger + najm, ar. pleiades). Same as Aldebaran.——*Haumil i rausool ghowl* (حامل راس الغول - hâmilirâsulghûl, Ar.). From (hâmil, ar. carrier + râs, ar. head + ghûl, ar. goblin). Otherwise Parisiyawash [q.v.], meaning maiden's hair. Constellation. Twenty-six stars. Perseus, slayer of Medusa. Contains two principal stars, α Persei, 13 or Mirfak [q.v.], and β Persei, 12 or Algol [q.v.]; the latter is also known as β Medusæ, being in head of Medusa, which in european figure of constellation Perseus holds in his hand. A line drawn from γ Ursæ minoris, the southernmost guard [farkdaun] of Little bear [cshoodra ricsham, doobhe asghar] through Polaris, 6 [al rooccabah, dhroovam], and produced twice their distance, leads to α Persei, 13, which is the brightest of several stars forming an arc of a circle, the concave part of which is turned towards Great bear [doobhe acbar, maharicsham]. β Persei, 12 or β Medusæ lies to the south-west of α Persei, at distance of about 10°; it is also called Algol, 12 [q.v.], and is one of the variable stars, being usually of the second magnitude, and continuing so for 2 days 13½ hours; then it suddenly dims, and in 3½ hours is reduced to fourth magnitude, at which it continues for 15 minutes; it then increases, and in 3½ hours more returns to usual magnitude, going through all changes in 2d. 20h. 48m. 58s. A line drawn from Orion's belt [fakaur ool jowzah] through Aldebaran, 16 [q.v.] in the Bull [sowr], and produced twice their distance, will lead to Algol, 12 [q.v.]. Algol forms a triangle with Capella, 17 [bramhahridayam, oyook] and the Pleiades [kritticay, sooreiyah].——*Haurs ool samah* (حارس السماء - hârisussamâ, Ar.). From (hâris, ar. guardian + samâ, ar. sky); from its being seen always in the sky; also Haurs ool shimaul meaning guardian of the north; also Simauk ool raumih [q.v.], from its position with η boötis [awwah], 43 [roomhool simauk]; also Simauk ool mirzam [q.v.], the cold star, as distinguished from Simauk ool azal [q.v.] or spica virginis [soomboola], 41 [harshanam]. Otherwise Arcturus, and Vajram [q.v.]. Star of first magnitude. α Boötis [awwah], 44.——*Hazaur* (حضار - hazâr, Ar.). From (hazara, ar. to be present). α Centauri [cantooras]. Compare Moohlifaun and Wazn.——*Heiyah* (حيه - haiyah, Ar.). Means a serpent. Constellation. Also (alhawwâ). Eighteen stars. Ophiuchus, the serpent-bearer. N. hemisphere. To the south of Hercules [jausy], and west of Aquila [ookaub]. α Ophiuchi, 55 [alroyee, rasalhague] and α Herculis, 54 [rasalgethy] are about 5° apart, or the same distance as the Pointers [alanak, doobhe] of the Great bear [doobhe acbar, maharicsham]; α Ophiuchi being south-eastward of α Herculis. They are in a line between Arcturus, 44 [haurs ool samah, vajram] and Altair, 60 [q.v.], but nearer the latter; α Ophiuchi, 55, Altair 60, and Vega, 58 [abhijit, nasr ool wauky], form an equilateral triangle. α Ophiuchi is called Rasalhague [q.v.]; and α Herculis, Rasalgethy [q.v.]. For Hydrus the water snake see under Nahar. For Serpens the serpent see Hooweiyah. For Oonuk ool heiyah or neck of serpent see Oonuk.——*Hoot* (حوت - hût, Ar.). Means a fish. Otherwise Alsamak [q.v.]. Pisces [meenam]. 12th constellation of ancient zodiac [raushy chuckram]; two fishes linked together by a string [alrishah] tied to their tails; one is due south of Mirack [q.v.], or β Andromedæ [miratimoosalsila], 4 [batn ool hoot], the other is south of the square [farghaun] of Pegasus [farasoolazam]; ι Piscium in the latter fish passes the meridian at midnight during the middle of September; η Piscium [maunam], the principal star in the former fish, and situated to the S.W. of α Arietis, 10 [hamel, vishcambham], passes the meridian at midnight about the middle of October. For α Piscium see Ookda. For η and ζ Piscium see Raivaty and Veidhrity. For Batn ool hoot or belly of the fish see Alrishah. For Kalb ool hoot or heart of the fish see Alrishah.——*Hoot i joonooby* (حوت جنوبي - hûtijunûbí, Ar.). From (hût, ar. fish + junûbí, ar. southern). Constellation. Eleven stars. Piscis australis, the Southern fish. S. hemisphere. Southward of Aquarius [coombham, dalo], and contains one principal star, α Piscis australis, 66, or Fomalhaut [q.v.]. A line drawn from β Pegasi [faras ool azam], 67, Scheat [mankib] through α Pegasi [faras ool azam], 68, Markab [q.v.], the two stars forming the west side of the square [farghaun] of Pegasus [faras ool azam] and produced three times their distance, will lead to Fomalhaut [q.v.]. Menkar [q.v.], Mira, and Deneb kyetos [q.v.], 3, in the Whale [kyetos], and Fomalhaut in the southern fish, are nearly in a line running N.E. and S.W., Fomal haut being at the S.W. end.——*Hooweiyah* (حويه - huwaiyah, Ar.). Means a serpent. Constellation. Serpens. N. hemisphere. A long, winding constellation, which, commencing close to α Corona borealis [yikleel i shoomauly], 48 [alphacca,], passes to the southward on the west side of Ophiuchus [heiyah], and then turning to the eastward, through the latter, is found again on its east side stretching toward Aquila [ookaub]. It contains one principal star, α Serpentis, 49 [oonuk]. This is about 20° nearly due south, a little easterly, from Gemma, 48, the principal star of Corona borealis [yikleelishoomauly]; it is also about 25° S.E. from Arcturus, 44. The three stars, α Serpentis, 49, Gemma, 48 [alphacca], and Arcturus, 44 [haurs ool samah, vajram] form a conspicuous triangle. For Hydrus the water-snake see under Nahr.——*Izar* (ايسار - îsâr, Hind.). From (yusr, ar. left). Star, ε Boötis [awwah], 45 [ghafr].——*Jabaha* (جبهه - jabahah, Ar.). Means forehead; also (jabhatulasad), meaning forehead of leo. Tenth arabian lunar mansion. Four stars, ζ, γ, η, α of Leo [asad, simham]; some say five including ν Leonis. For α Leonis, 32 see Gandam and Kalb ool asad. For γ Leonis see Algeiba. Compare hindoo mansion Magham.——*Jabbaur* (جبار - jabbâr, Ar.). Means haughty and inaccessible; represented as a crowned king upon a throne. Otherwise Jowzah, or middle constellation, this largely entering into compounds for which see below; though Jowzah [q.v.] is also Gemini. No hindoo name for the whole. Constellation of 38 stars. Orion, lover of Diana. S. hemisphere. Lies to the south of Auriga [mausikoolinaun] and S.E. of Taurus [sowr]. Four bright stars, α, β, γ and κ, form a great quadrilateral; Betelgeux, 23 [q.v.], or α Orionis, the chief star, is at the north-east angle in the right shoulder of Orion; Rigel [q.v.], or β Orionis, 18, at the opposite angle, is in the left foot, compare Rigel ool jowzal yoosrah under Rigel; Bellatrix, or γ Orionis, 19 [mirzam], situated the same distance on one side of Aldebaran, 16 [q.v.] that Pleiades [kritticay, sooreiyah] are on the other side, is in left shoulder; κ Orionis [rigel ool jowz al yoomnah] is in right knee. In the middle of the quadrilateral, are three conspicuous stars, δ [mintaka, nazm], ε, 21 [nitauk ool jowzah], and ζ, 22 [alnitak, fakaur ool jowzah], ranged N.W. and S.E.; these are called the belt of Orion [alasah] or Fakaur ool jowzah [q.v.], whence to the southward there is a luminous train of small stars forming the sword, and among these are some nebulæ. For λ Orionis see Shobhanam. See also Hakah and

Hanah, Mrigashiras and Ardray, the arabian and hindoo mansions. For Arsh ool jowzah or throne of orion see sep. title. For Rigel ool jowzal yoomnah or right leg of orion see sep. title. For Rigel ool jowzal yoosrah or left leg of orion see Rigel. For Taujool jowzah or crown of orion see sep. title. For Zawauyib ool jowzah or pendent forelock of orion see sep. title. For arm of orion see Betelgeux and Yaddooljowzah. For belt of orion see Fakaur ool jowzah. For shoulder of orion see Betelgeux and Mankibool jowzah. For spine of orion see Fakaur ool jowzah. ——*Jaddy* (جدی - jadí, Ar.). Means a kid. Capricornus, the Goat [macaram]. Tenth constellation of ancient zodiac [raushy chuckram], distinguished by its two principal stars, α and β Capricorni, being in a line produced from Vega, 58 [abhijit, nasr ool wauky] through Altair, 60 [q.v.] or Saudhyam [q.v.]. The star δ Capricorni, 64, or Deneb algedy [q.v.], is nearly due south of Enif, 63 [fomal fars], in Pegasus [faras ool azam], at the distance of 26°. α Capricorni, which is in the horn of the Goat, passes the meridian at midnight towards the end of July. See also arabian mansion Zaubih; also Sadinaushira.——*Jaddy ool farkad* (جدی الفرقد - jadíulfarkad, Hind.). From (jadí, ar. kid + farkdán, ar. the guards of small bear). Same as Alioth. ——*Janah ool faras* (جناح الفرس - janáhulfaras, Hind.). From (janáh, ar. wing + faras, ar. horse). Same as Algenib.——*Jausy* (جاثی - jásí, Ar.). Means a strong man. Constellation. Twenty-eight stars. Hercules. N. hemisphere. South of the two principal stars in Draco [tinneen] west of Lyra [shalyauk], and east of Boötes [awwah] and Corona borealis [yikleelishoomauly]. α Herculis, 54, or Rasalgethy [q.v.] is one of the variable stars, going from 3 to 4 in 66 days. β Herculis is midway on a line between α Herculis, 54 and α Coronæ borealis, 48 [alphacca]. ζ Herculis is on a line between α Coronæ borealis [yikleelishoomauly], 48 and α Lyræ [shalyauk], 58 [abhijit, nasr ool wauky], but nearer the former star; it is a double star, with the shortest period known, viz., 36 years.——*Jowzah* (جوزا - jauzá, Ar.). From (jauz, ar. middle); from its culminating vertically in arabia. Gemini [mitoonam]. Third constellation of ancient zodiac [raushy chuckram]. To E. of Taurus [sowr], and S.E. of Auriga [mausikoolinaun], contains three principal stars, α Geminorum or Castor, β Geminorum, 28 [alzirah, soocarmam] or Pollux, and γ Geminorum [alhena]. α Geminorum, or Castor, and β Geminorum, 28 or Pollux [alzirah, soocarmam], form the heads of the Twins [mitoonam], and are about 5° apart, Castor to the N.W., Pollux to the S.E. A line drawn from the Pleiades [kritticay, sooreiyah] through β Tauri [sowr], 20 [agny, nath], and produced the same distance beyond, leads to them; as does also a line drawn from Rigel, 18 [q.v.], the bright star in the heel of Orion [jabbaur], through the middle star of his belt [fakaur ool jowzah]. Several small stars in a line running N.W. and S.E. form the feet of the Twins [mitoonam]; the brightest, γ Geminorum [alhena], is due east of Aldebaran, 16 [q.v.] at the distance of 28°; this star also bisects the line drawn from the centre of Orion's belt [alasah, fakaurool jowzah] to Castor. Castor and Aldebaran are the base of an isosceles triangle of which Capella, 17 [bramhahridayam, oyook] is the apex. Castor is a double star, period about 1,000 years. Pollux, 28 [alzirah, soocarmam] passes the meridian at midnight about middle of January. For ξ Geminorum see Alzirr. See also the arabian lunar mansion Zirah, which takes the heads of the twins.——*Jyeshtay* (ज्येष्टा - jyéshtá, San.; ത്രിക്കേട്ട - trikkétta, Mal.; கேட்டை - kéttai, Tam.). Means the eldest. Otherwise Kettay [q.v.], by corruption. Eighteenth hindoo lunar mansion; figured as a ring, umbrella in hand or spear; three stars, α, σ and τ Scorpionis [akrab]. α scorpii, 52 is Antares or Alkalb [q.v.] or Vareeyas [q.v.]. Compare arabian mansion Kalb.——*Kahkashaun* (شرج - sharaj, Ar.; کهکشان - kahkashán, Pers.; பால்வீதிமண்டலம் - pálvíthimandalam, Tam.). Ar. from (sharaja, ar. to collect together). Pers. from (káh, pers. straw + kashán, pers. drawn); from resemblance to trace of such in a sandy tract. Otherwise Oomoon noojoom [q.v.], meaning mother of stars; also Majarra [q v.], place where anything runs; also (darví ásmán), meaning gate of heaven. The Milky way, Galaxy, or Via lactea. A whitish, luminous band, of irregular form, which stretches across the heavens from one side of the horizon [cshitijam] to the other, containing nine-tenths of visible stars; nearly a great circle inclined at an angle of about 63° to the equinoctial [naudy mundalam], and cutting that circle twice in R. A. 10h 47m and 12h 47m, so that its northern and southern poles respectively are situated in R. A. 12h 47m N P D 63° and R. A. 0h 47m N P D 117°. If traced in order of R.A., the milky way is found traversing Cassiopeia [caushyapy, zaut ool coorsy], its brightest part passing about two degrees to north of δ in about 62° of N.D. or 28° N P D. Passing thence between γ and ε it sends off a branch to the south-preceding side, towards α Persei [haumili rausool ghowl], 13 or mirfak [q.v.], very conspicuous, so far prolonged faintly towards ε of ditto, and traceable towards Hyades [sowr] and Pleiades [kritticay, sooreiyah] as remote outlyers. The main stream passes on through Auriga [mausik ool inaun], over the three stars, ε [alanaz], ζ [alinauz], η [alinauz], preceding Capella [bramhahridayam, oyook] called the Hœdi, between the feet of Gemini [jowzah, mitoonam] and horns [nath, nautih] of Bull [sowr, vrishabham], where it intersects the ecliptic [craunty mundalam] nearly in the present solstitial colure [yaumyottara vrittam], and thence over the club [alasah, fakaurool jowzah] of Orion [jabbaur] to the neck of Monoceros, intersecting the equinoctial [naudy mundalam] in R. A. 6h 54m. Thence it passes over the head of Canis major [kalbiacbar] and enters the prow of Argo [safeenah], nearly on the southern tropic. Here it again subdivides, about *m* Puppis, sending off a narrow and winding branch on the preceding side as far as γ Argûs [safeenah], where the branch terminates abruptly. The main stream pursues its southward course to the 123rd parallel of N P D, where it diffuses itself broadly and again sub-divides, opening out into a wide fan-like expanse, nearly 20° in breadth, formed of interlacing branches, all which terminate abruptly in a line drawn nearly through λ and γ Argûs [safeenah]. At this place the continuity is interrupted by a wide gap, and where it recommences on the opposite side it is by a somewhat similar fan-shaped assemblage of branches, which converge upon the bright star η Argûs [safeenah]. Thence it crosses the hind feet of the Centaur [cantooras], and enters the Cross [trishunkoo] being here at its narrowest. After this it expands into a broad and bright mass, enclosing α and β Crucis [trishuukoo], and β Centauri [cantooras] or wazn [q.v.], and extending almost up to α Centauri or hazaur [q.v.]. In the midst of this bright mass occurs a dark pearshaped vacancy, called the coal-sack. This is the place of nearest approach to the South pole [dacshina dhroovam]. At α Centauri [cantooras], it again subdivides, sending off a great branch at an angle of about 20° with its general direction towards the preceding side, to η and *d* Lupi [saboo], beyond which the branch loses itself. The main stream passes on increasing in breadth to γ Normæ, where it makes an abrupt elbow, and again subdivides into one principal and continuous stream on the following side, and a complicated system of interlaced masses on the preceding. The main stream, making an abrupt bend to the following side, passes over the stars ι Aræ [mijmarah], θ and ι Scorpii [akrab, vrishchicam], and γ Tubi, to γ Sagittarii [dhanoos, kows], where it collects into an oval mass, about 6° in length and about 4° in breadth. Northward of this mass the stream crosses the ecliptic [craunty mundalam] in about longitude [sauyanam] 276°, and proceeds along the bow of Sagittarius [dhanoos, kows] into Antinous [ookaub]. Crossing the equinoctial [naudy mundalam] at R. A. 19h, it next runs through Aquila [ookaub], Sagitta [saham], and Vulpecula up to Cygnus [dajjajah], at which point is a vacuity, like the southern coal-sack, occupying space between ε, α, 62 [aridad, deneb] and γ Cygni [dajjajah]. Hence it proceeds irregularly to the point in Cassiopeia [caushyapy, zaut ool coorsy] whence it began.——*Kalb* (قلب - kalb, Ar.). Means the heart. Otherwise Kalb ool akrab [q.v.], meaning heart of scorpio. Three stars in Scorpio [akrab], α scorpii and two small stars close to it. 18th arabian lunar mansion. Compare hindoo mansion Jyeshtay.——*Kalbaun* (کلبان - kulbán, Ar.). Also (kulyatán). Two stars ι, κ Tauri [sowr].——*Kalb i acbar* (کلب اکبر - kalbiakbar, Ar.). From (kalb, ar. dog + akbar, ar. great). Constellation. Eighteen stars. Canis major, the Great dog. S. hemisphere. S.E. of Orion [jabbaur]. Three principal stars, one of which, α Canis majoris, or Sirius, or the Dog star [mrigavyaudham, shira], is the brightest in the firmament. α Canis majoris, 26, or Sirius, lies in the line of Orion's belt [fakaur ool jowzah], being as far to the S.E. of it as Aldebaran, 16 [q.v.] is to the N.W. Sirius, 26, Procyon, 27 [ghoomeisah] and Betelgeux, 23 [q.v.] or Atigandam [q.v.] form an equilateral triangle, Sirius being at the southern apex. Procyon and Sirius, the stars of the 2 dogs, are on opposite sides of the Milky way [kahkashaun]. β Canis majoris [mirzam, mirzamaun] lies 5° west, a little southerly, from Sirius; and a line drawn from Betelgeux, 23 [atigandam], passing between these two stars, will lead to ε Canis majoris in the flank of the Dog; Sirius, 26 is at the nose.——*Kalb i asghar* (کلب اصغر - kalbiasghar, Ar.). From (kalb, ar. dog + asghar, ar. minor). Otherwise Kalb ool mootakaddim [q.v.], meaning the foremost or easternmost dog, but as to rising it comes up last not first. Canis minor, the Little dog. S. hemisphere. Small constellation to the south of Gemini [jowzah, mitoonam]; contains two principal stars. α Canis minoris, 27, or Procyon [ghoomeisah], is very conspicuous; it is nearly due south of Pollux, 28 [alzirah, soocarmam], the brightest of the Twins [jowzah, mitoonam], and east of Betelgeux, 23 [q.v.] in Orion [jabbaur]; and thus Pollux, 28, Procyon, 27 and Betelgeux, 23 [atigandam] form a right-angled triangle, Procyon being at the right angle. β Canis minoris [mirzam, mirzamaun] lies N.W. of Procyon, nearly in the same position from that star that Castor is from Pollux, but the latter two, may be distinguished from the former, since Castor and Pollux are 1st and 2nd magnitude, whereas Procyon and β Canis minoris are 1st and 3rd magnitude. See also Zirah ool makbooz.——*Kalb ool akrab* (قلب العقرب - kalbulakrab, Hind.). From (kalb, ar. heart + akrab, ar. scorpio). Same as Alkalb and Kalb.——*Kalb ool asad* (قلب الاسد - kalbulasad, Ar.). Means heart of leo. Also (alasad). Star of first magnitude. Cor leonis or Regulus, α Leonis [asad], 32 [gandam].——*Kalb ool hoot* (قلب الحوت - kalbulhút, Ar.). Means heart of pisces [hoot]. Same as Alrishah.——*Kalb ool mootakaddim* (کلب المتقدم - kalbulmutakaddim, Hind.). From (kalb, ar. dog + mutakaddim, ar. going before). Same as Kalb i asghar [q.v.].——*Kalb ool royee* (کلب الراعی - kalburráyí, Ar.). From (kalb, ar. dog + arrái, hind., α ophiuchi); from being in

attendance on α Ophiuchi [alroyee], 55, rasalhague. Star; α Herculis, 54 Rasalgethy, third magnitude. Same title applies to κ Cephei [zaut ool coorsy], as attending on γ Cephei [alroyee] similarly.——*Kalb ool sowr* (قلب الثور - kalbussaur, Ar.). Means heart of taurus [sowr]. Otherwise Ayeen ool sowr [q.v.]. Same as Aldebaran.——*Kauyid* (قائد - káid, Hind.). From (kaud, ar. to mourn). Same as Alkaid or Benetnasch.——*Kettay* (கேட்டை - kéttai, Tam.). By corruption from jyeshtay [q.v.]. The 18th hindoo lunar mansion.——*Kita ool faras* (قطعة الفرس - kitaulfaras, Ar.). From (kita, ar. piece + faras, ar. horse). Constellation of 4 stars just west of the head of Pegasus. Equuelus. For the great horse or Pegasus see Fars ool azam.——*Kochab* (قطب - kutb, Ar.). Means axis. Star of second magnitude. β Ursæ minoris [cshoodraricsham, doobheasghar], 47.——*Kows* (قوس - kaus, Ar.). Means a bow. Also (arrámí), meaning the thrower. Sagittarius, the Archer [dhanoos]. Ninth constellation of ancient zodiac [raushy chuckram], lies to S. of Ophiuchus [heiyah] and Aquila [ookaub]. To the east of Antares, 52 [alkalb, vareeyas], four stars, ε δ λ [royinauyim], and μ Sagittarii, form a curve in the milky way [kahkashaun]; these are the bow; and immediately beyond are four others, θ, σ, τ, and ζ, in the figure of a quadrilateral, forming the body of the Archer. μ Sagittarii passes the meridian at midnight towards the end of June. For ν Sagittarii see Ayeen ool raumy. For λ Sagittarii see Royinauyim. See also the lunar mansions Balda, Nauyim, Oottarashaudham and Poorvashaudham. For Sagitta the arrow see Saham.——*Kritticay* (कृत्तिका - krittiká, San.; கார்த்திகை - kárttigai, Tam.). From (krit, san. to cut); a dagger, because of Configuration. Also called Agny [q.v.], because of regent. Third hindoo lunar mansion [maunam]. The six stars of Pleiades, formerly seven, in the shoulder of Taurus [sowr]; hence called Seven virgins. Represented as a flame or as a knife. Kritticay's influence is particularly evil; and when the moon [chundran] is near the Pleiades but especially when she is so in the month of Caurtigay [mausam] this is a time of fasting and prayer; children do not attend school on that day, and others if possible avoid doing anything of importance. The six stars were nymphs who nursed Soobramanyan [q.v.], or Scandan [q.v.] god of war, thence called Caurtikeyan [q.v.], each nurse suckling one of his six mouths. The Greeks called the Pleiades stormy, because of being orient in the evening in the winter season. Compare arabian mansion Sooreiyah. The principal star of the group is Alcyone, or η T.uri [sowr], 14; otherwise Ayooshmat [q.v.]. See alsc Alfoorood and Arsh ool sooreiya.——*Kyekows* (قيقاؤس - kaikáús, Ar.). Means a triangle. Constellation. Eleven stars. Triangulum australe, the Southern triangle. S. hemisphere. South-eastward of the two bright stars, α [hazaur] and β [wazn], in Centaurus [cantooras]; α and γ Trianguli australis are in the same line with γ and β Crucis [trishunkoo], α Trianguli australis being the most easterly; β and γ Triangu'i australis are on the opposite side of the Milky way [kahkashaun] to α Centauri [cantooras] or hazaur [q.v.]; β Trianguli australis is the northern apex of the triangle, at the distance of about 8° from α and γ Trianguli australis. α Trianguli australis is of the second magnitude; β and γ of third and fourth magnitudes. Pavo, the Peacock, eastward of Triangulum australe is not represented in Arabic; its principal and northernmost star, α Pavonis, of second magnitude, is in a line to the eastward with γ and β Crucis [trishunkoo], and γ and α Trianguli australis. α Pavonis, Achernar 7 [q.v.], and Fomal haut 66 [q.v.], form an equilateral triangle.——*Kyetos* (قيطس - kítas, Ar.). Constellation. Twenty-two stars. Cetus, the Whale. S. hemisphere. South of Aries [hamel, maisham], and Pisces [hoot, meenam], and S.W. of Taurus [sowr, vrishabham]. Contains two principal stars, α Ceti [cuff ool jazmah], or Menkar [q.v.], and β Ceti, 3, or Deneb kyetos [q.v.]; in it is also the variable star ο Ceti, otherwise Mira. A line drawn through β Andromedæ [miratimoosalsila], 4 [batn ool hoot], through α Arietis, 10 [hamel], and produced rather more than the same distance, leads to α Ceti [cuffool jazmah]; or, it lies a little to the south of a line drawn from Procyon or α Canis minoris, 27 [ghoomeisah], through Bellatrix, 19 [mirzam], in Orion [jabbaur], and produced about an equal distance. Menkar [q.v.], α Arietis 10 [hamel], and the Pleiades [kritticay, sooreiyah], form an equilateral triangle, Menkar being at the southern apex. About 7° to the eastward of a line drawn from α Andromedæ [miratimoosalsila], 1 or Alpheratz [q.v.], through γ Pegasi [faras ool azam], 2 [algenib, mahendram], and produced nearly twice their distance, is β Ceti, 3 [deneb kyetos]; or, it is a little to the southward of a line produced from Aldebaran, 16 [q.v.] through Menkar [q.v.] to about twice their distance. Menkar is in the head of the Whale and Deneb kyetos [q.v.] at the tail; between the two, but nearer the latter, are four stars of the third magnitude in the form of a quadrilateral figure, the easternmost of which is ζ Ceti, 8, or Batn kyetos [q.v.], in the centre of the body. Between Batn kyetos and Menkar, but nearer the former, is the variable Mira, or ο Ceti; this when brightest is of the second magnitude in which state it remains for a fortnight; during the three following months it diminishes to the fourth, fifth, &c., magnitude, and then for five or six months is completely invisible to the naked eye, after which it reappears; the exact period of its changes is 331 d 15 h 7 m; or it is seen as of the second magnitude about twelve times in eleven years.——*Loobdhacam* (लुब्धक - lubdhaka, San.). From (lubh, san. to covet); means hunter. Otherwise Mrigavyaudham [q.v.]. So called from a legend which narrates that shiva [q.v.] transformed himself into a hunter in order to shoot an arrow, represented by the three stars in the belt [fakaur ool jowzah] of orion [jabbaur] lying in a direct line with sirius, 26, at bramha [q.v.] transformed into a deer [mrigam] and pursuing his own daughter metamorphosed into a doe for the purpose of committing incest with her. Same as Shira [q.v.], or Sirius, the Dog star; α Canis majoris [kalbi acbar], 26.——*Macaram* (मकर - makara, San.). Means sea-monster, so called. Tenth sign [raushy] of the zodiac [raushy chuckram]. Capricornus, ♑ [jaddy]. See arabian mansion Zaubih; also Sadinaushira.——*Magham* (मघा - maghá, San.; மகம் - magam, Tam.). From (maghá, san. gift). Otherwise Pitryah. Tenth hindoo lunar mansion. Figured as a house, palankeen or yoke. α, γ, s, μ and ν Leonis [asad, simham]. The principal or southern one is Regulus or α Leonis, 32 [gandam, kalb ool asad]. Mahamagham [q.v.] is the occurrence of the full moon in or about this asterism along with other astronomical incidents, which event happens once in twelve years and gives a time auspicious for bathing, especially at Combaconam. Compare arabian mansion Jabaha.——*Maharicsham* (महाऋक्ष - mahá-riksha, San.). From (mahá, san. great + riksha, san. bear). Also called Sapta rishy [q.v.], meaning seven sages. Same as Doobhe acbar [q.v.] or Ursa major. The first three form the tail [banaut]; the last four make up the square of the bear [naash]. Varauha mihiran has the following regarding Maharicsham [doobhe acbar]; his notion about the stars of the constellation having a proper motion independent of precession [ayanaumsham, craunty pauta gaty] appears to be an error of confusion arising out of the question of the line of the rishies [rishy raikhay]:—"The seven rishies [q.v.] form as it were "a garland of the white lotus [nelumbo] to the maiden of "the northern quarter or look like her smile or seem to be "her masters; or by the direction of her lord the pole star "[alrooccabah, dhroovam], the maiden of the northern quarter "appears to dance round as the seven rishies move in their "course; during the reign of yoodhishtiran 2526 years before "the commencement of vicrama [q.v.] saca [q.v.] the seven "rishies were at the constellation of magham [q.v.]; the "rishies take a period of 100 years to go over each of the 27 "asterisms; they rise in the north-east and are accompanied by "the chaste aroondhaty [q.v.], the consort of vasishtan [q.v.]; "the easternmost of the group is bhagavan mareechy [q.v.]; "the next to him is vasishtan; the next is angiran [q.v.] and "the next two are atry [q.v.] and poolastyan [q.v.]; the next "in order are the rishies poolahan [q.v.] and cratoo [q.v.]." The identification of the stars will be seen from the references; easternmost in the quotation means when the Bear is above the pole.——*Mahendram* (महेन्द्र - mahéndra, San.). From (mahá, san. great + indra, san. the deity). Yogam star of the 26th hindoo lunar mansion. 2nd magnitude. Eindram, 1 [q.v.] or Alpheratz α andromedæ [miratimoosalsila], 1 [alpheratz, eindram]. 2nd magnitude. Otherwise Algenib [q.v.], γ Pegasi, 2. 3rd magnitude. Almost the longitude of present equinoctial colure.——*Maisham* (मेष - mésha, San.). Means ram. First sign [raushy] of the zodiac [raushy chuckram]. Aries, ♈ [hamel]. See also Ashwiny, Bharany, Bootein and Shartein.——*Majarra* (مجره - majarrah, Hind.) From (majarr, ar. a place along which a thing has been dragged); resembling such trace on sand. Same as Kahkashann——*Mankib* (منكب - mankib, Ar.). Otherwise Mankib ool faras meaning horse's shoulder; Matn ool faras, meaning middle of the horse; also Scheat. Star of magnitude 2 to 2·5. β Pegasi [faras ool azam], 67. See also Farghaun.——*Mankib ool jowzah* (منكب الجوزا - mankibuljauzá, Hind.). From (mankib, ar. shoulder + jauzá, ar. orion). Same as Betelgeux.——*Mareechy* (मरीचि - maríchi, San.). Means luminous. One of the seven stars [sapta rishy] of Maharicsham [q.v.], at end of tail, η Ursæ majoris [doobhe acbar] or Benetnasch [q.v.].——*Markab* (مركب - markab, Ar.). Means a saddle; also called Ayeen ool faras [q.v.] meaning horse's eye; also Bramham [q.v.]. Star of second magnitude. α Pegasi [farasoolazam], 68. See also Farghaun.——*Mausik ool inaun* (ماسك العنان - másikulinán, Ar.). From (másik, ar. holder + inán, ar. reins). Constellation. Fourteen stars. Auriga, the Charioteer, contains five principal stars, α, β, δ, γ, and ι Aurigæ which form a large irregular pentagon. The most conspicuous star, and one of brightest stars in N. hemisphere, is Capella, α Aurigæ, 17 [bramhahridayam, oyook]. A line drawn from δ [atry] to α Ursæ majoris [doobhe acbar], 35 [doobhe], the two northernmost stars in square of Great bear [doobhe acbar, maharicsham], and produced, leads to Capella, which is also distinguished by having close to it three small stars, ε [al anaz], η, and ζ Aurigæ [al inauz], forming isosceles triangle. In brilliancy Capella ranks next to Arcturus, 44 [haurs ool samah, vajram]. β Aurigæ is the star of the pentagon nearest Capella; from which it is distant above 13° to E. γ Aurigæ, the S. star of pentagon, is also β Tauri [sowr], 20 [agny, nath], being at the horn of the Bull [sowr], on which the foot of the Charioteer rests; it is also on the edge of the Milky way [kahkashaun]. For δ Aurigæ, 24, see Prajaupaty. For ε Aurigæ see Alanaz. For η and ζ Aurigæ see Alinauz. See also Tawaubyool oyook.——*Meenam* (मीन -

mína, San.). Means fish. Twelfth sign [raushy] of the zodiac [raushy chuckram]. Pisces, ♓ [hoot].——*Meezaun* (ميزان - mízán, Ar.). Means a balance. Libra, the Balance [toolaum], ♎. Seventh constellation of ancient zodiac [raushy chuckram]. Contains two principal stars of second magnitude, α and β Libræ [zoobaunah]. β Libræ, or Zubenelg [q.v.], in the Northern balance, is east, a little northerly, from Spica, 41 [harshanam, simauk ool azal], with which and Arcturus, 44 [haurs ool samah, vajram], it forms an isosceles triangle, Arcturus being the apex. About 9° south-westerly from β Libræ is α Libræ, or Zubenesch, 46 [q.v.], in the Southern balance; it passes the meridian at midnight about the beginning of May. For hindoo synonym of zubenesch see Siddhy. See also mansions Vishaukham and Zoobaunah.——*Menkar* (منكر - minkar, Ar.). Otherwise Cuff ool jazmah [q.v.]. Star of second magnitude. α Ceti [kyetos].——*Mijmarah* (مجمرة - mijmarah, Ar.). Means a furnace. Constellation. Seven stars. Ara, the Altar. S. hemisphere. Lies to north-eastward of Triangulum australe [kyekows]. Its principal stars, α, β, γ Aræ, are between third and fourth magnitude; α is the northernmost; and at the distance of 6° to the southward are β and γ Aræ, close together.——*Milaf* (معلف - milaf, Ar.). Means a manger. The nebula in Cancer [sartaun]. See also Nasara and Pooshyam.——*Mintaka* (منطقه - mintakah, Ar.). Means belt. Star, δ Orionis [jabbaur]; western star in belt [fakaur ool jowjah, nazm].——*Mirack* (مراة - mirat, Hind.). Means a lady. Otherwise Batn ool hoot [q.v.]. Star of second magnitude. β Andromedæ [mirat i moosalsila], 4.——*Mirat i moosalsila* (مراةسلسله - miratimusalsila, Ar.). From (mirat, ar. lady + musalsilah, ar. chained). Constellation. Twenty stars. N. hemisphere. Andromeda, daughter of Cepheus and Cassiopea [caushyapy, zaut ool coorsy], bound to a rock, exposed to a sea monster, rescued by Perseus [haumil i rausool ghowl]. To southward of Cassiopea and westward of Perseus, and is on a line produced from Polaris, 6 [al rooccabah, dhroovam], through Cassiopea. Three principal stars, α Andromedæ, 1 [alpheratz, eindram], β Andromedæ, 4, or Mirack [batn ool hoot], and γ Andromedæ, or Alanak [q.v.]. To find β Andromedæ, 4 or Mirack [q.v.]; a line drawn from α Pegasi [faras ool azam], 68 [bramham, markab] to α Andromedæ, 1 [alpheratz, eindram], and produced about the same distance, will lead a little to the northward of β Andromedæ, 4. To find γ Andromedæ, or Alanak [q.v.]; in the same north-easterly direction that α Andromedæ, 1 is from α Pegasi, 68, the star γ Andromedæ lies from α Andromedæ at the distance of about 13°; it is also about 13° in a westerly direction from Algol, 12 [q.v.], in Perseus [haumil i rausool ghowl]. To find α Andromedæ, or Alpheratz; this star, also known as δ Pegasi, is at the north-eastern angle of the square [farghaun] of Pegasus [faras ool azam]; it is also on a line drawn from δ Ursæ majoris [doobhe acbar, maharicsham], and produced through Polaris, 6 [alrooccabah, dhroovam], to the distance of 61°. See also Mooakhar and Oottarabhaudram.——*Mirfak* (مرفق - mirfak, Ar.). Means elbow. Star of second magnitude. α Persei [haumil i rausool ghowl], 13.——*Mirzam* (مرزم - mirzam, Ar.). From (ruzama, ar. cold); being rainy stars. γ Orionis [jabbaur], 19 or Bellatrix. Same term applied to β Canis minoris [kalbiasghar], and β Canis majoris [kalbiacbar]. See also Mirzamaun, Zirah ool makbooz.——*Mirzamaun* (مرزمان - mirzamán, Hind.). Means two mirzams. Also (mirzamashshirain) [shiriyaun]. The pair of stars, β Canis majoris [kalbiacbar] and β Canis minoris [kalbiasghar], Procyon and Sirius. See also Mirzam, Zirah ool makbooz.——*Mitoonam* (मिथुन - mit'huna, San.). Means twins. Third sign [raushy] of the zodiac [raushy chuckram]. Gemini, ♊ [jowzah].——*Mokaddam* (مقدم - mukaddam, Ar.). Means going before. Otherwise Farghool owval [q.v.], being the foremost or westernmost pair of the four stars forming a square [farghaun], thus rising first. Two stars, α, β Pegasi [faras ool azam], 26th arabian lunar mansion. For α Pegasi, 68 see Bramham and Markab. For β Pegasi, 67 see Mankib. Compare hindoo mansion Poorvabhaudram. See also Fargh ool dalo.——*Mooakhar* (موخر - muakkhar, Ar.). Means the last. Otherwise Fargh ool sawny [q.v.], the latter fargh, being the hindermost or easternmost or last rising pair of the four stars forming square [farghaun]. Two stars, α Andromedæ [miratimoosalsila], 1 [alpheratz, eindram] and γ Pegasi [faras ool azam], 2 [algenib, mahendram]. 27th Arabian lunar mansion. Compare hindoo mansion Oottarabhaudram. See also Fargh ool dalo.——*Moohlifaun* (محلفان - muhlifán, Ar.). From (halafa, ar. to swear); beholders swearing one against another as not able to distinguish them from canopus [agastyan, sooheil]. α [hazaur] and β [wazn] centauri [cantooras], rising at a different part of the year from Canopus, 25, which in general appearance they resemble.——*Moolam* (मूल - múla, San.; மூலம் - múlam, Tam.). Means root. Otherwise called Nirrity. 19th hindoo lunar mansion. It is of bad or malignant influence; next so to Kritticay [q.v.], to which it is nearly opposite. Represented by a lion's tail, leaping lion, or trumpet; ten stars, ϵ, μ, ζ, η, θ, ι, κ, λ, υ and ν, Scorpionis [akrab]. For λ or ν Scorpii, 51 see Parigham. Compare arabian mansion Showla.——*Mrigashiras* (मृगशिरस् - mrigashiras, San.; മകീരം - makíram, Mal.; மிருகசீரிடம் - mirugasíridam, Tam.). From (mriga, san. deer + shiras, san. the head). Fifth hindoo lunar mansion. Containing three stars in head of Orion jabbaur], the principal of which is λ. Compare arabian mansion Hakah.——*Mrigavyaudham* (मृगव्याध - mrigavyádha, San.). From (mriga, san. deer + vyádha, san. hunter). Otherwise Loobdhacam [q.v.], or hunter. Same as Sirius or Shira [q.v.], the Dog-star. α Canis majoris [kalbiacbar], 26.——*Naash* (نعش - naash, Ar.). Means dead body. Four stars forming the square in body of Ursa major [alkaid, benetnasch, doobhe acbar, maharicsham].——*Nahr* (نهر - nahr, Ar.). Means a river. Constellation. Thirty-four stars. Eridanus. S. hemisphere. Southward of Taurus [sowr] and south-eastward of Cetus [kyetos]; winds over considerable space extending between 4° and 60° S. Contains one principal star, Achernar [q.v.], or α Eridani, 7. This is on a line joining Fomalhaut, 66 [q.v.], or α Piscis Australis [hootijoonooby] and Canopus, α Argûs [safeenah], 25 [agastyan, sooheil], about midway between the two. β Eridani is a small star 3° northward of Rigel, 18 [q.v.], or β Orionis [jabbaur]. γ Eridani is on a line drawn from Procyon or α Canis minoris [kalbiasghar], 27 [ghoomeisah] to Rigel or β Orionis, 18 and extended to about half its length. Hydrus, the Water-snake, not represented in arabic, lies to the S. and S.E. of Achernar, 7, the principal star in Eridanus, from which α Hydri, mag. 3, is distant about 5°. β Hydri, mag. 3, lies S. by W. from Achernar, 7, distant about 21°, and is the most conspicuous star near the South pole [dacshina dhroovam], from which it is distant about 12°. For Hydra, feminine, the Snake, see Shoojah. For Ophiuchus or serpent-bearer see Heiyah. For Serpens or the serpent see Hooweiyah.——*Nasara* (نثرة - nasarah, Ar.). Means the nose. Also (anfulasad) or nose of the lion [asad]. Eighth arabian lunar mansion. Two stars in Cancer [sartaun], including the Nebula. The arabian Leo was once projected further westward. Compare hindoo mansion Pooshyam. See also Milaf.——*Nasrein* (نسرين - nasrain, Ar.). Means two vultures. Constellations Aquila [ookaub] and Lyra [shalyauk].——*Nasr ool tair* (نسرالطائر - nasrultáir, Hind.). From (nasr, ar. vulture + táir, ar. flying). The flying vulture. Same as Altair.——*Nasr ool wauky* (نسرالواقع - nasrulwáki, Ar.). From (nasr, ar. vulture + wáki, ar. to contract wings as if to alight upon a thing). The swooping vulture. Otherwise Vega. Star of first magnitude, with parallax of ¼ second. α Lyræ [shalyauk], 58 [abhijit]. See also Azfaur [q.v.].——*Nath* (نطح - nath, Ar.). Means a horn. Otherwise Agny [q.v.]. Star of second magnitude, β Tauri [sowr], 20; also known as γ Aurigæ [mausik ool inaun]. For the other horn see Nautih. For the horns of the ram [hamel] see Shartein.——*Nautih* (ناطح - nátih, Ar.). Means a horn. Star of fourth magnitude. γ Tauri [sowr], 15. For the other horn see Nath. For the horns of the ram [hamel] see Shartein.——*Nauyim* (نعايم - naáim, Ar.). Plural of (naím, ar. ostrich). 20th arabian lunar mansion. Two stars in Sagittarius [kows]. Royinauyim meaning guardian of nauyim is λ Sagittarii. Compare hindoo mansion Poorvashaudham. See also Alriyaul.——*Nazm* (نظم - nazm, Ar.). From (nazama, ar. to join in a row). Star. δ Orionis [jabbaur]. Westernmost of three stars forming orion's belt [fakaur ool jowzah]; the other two being ϵ Orionis, 21 or Nitauk ool jowzah [q.v.], and ζ Orionis, 22 or Fakaur ool jowzah [q.v.].——*Nitauk ool jowzah* (نطاق‌الجوزا - nítákuljauzá, Ar.). From (niták, ar. girdle + jauzá, ar. orion). Star of second magnitude. ϵ Orionis [jabbaur], 21. Middlemost of three stars forming orion's belt [fakaur ool jowzah]; the other two being δ Orionis or Nazm [q.v.] and ζ Orionis or Fakaur ool jowzah [q.v.].——*Ookaub* (عقاب - ukkáb, Ar.). Means an eagle. Constellation. Nine stars. Aquila. N. hemisphere. To the southward of Lyra [shalyauk] and south-westward of Pegasus [faras ool azam]; three principal stars, close together, and in a straight line, α, β, and γ Aquilæ; the centre is α Aquilæ, 60, or Altair [q.v.], on edge of Milky way [kahkashaun]. A line drawn from Polaris, 6 [al rooccabah, dhroovam] so as to pass between α Lyræ [shalyauk], 58 [abhijit, nasr ool wauky] and α Cygni [dajjajah], 62 [deneb], and produced an equal distance beyond them, will lead to α Aquilæ, 60 [altair, saudhyam]. Or it can be found by drawing a line from between the two bright stars of Draco [tinneen] to α Lyræ, 58, and continuing it twice that distance. For β Aquilæ see Alshain. η Aquilæ is variable, going from 3·4 to 4·5 in 7 days 4 hours. See also Nasrein and Shravanam.——*Ookda* (عقدة - ukdah, Ar.). Means a knot, being in the place of the knot of the two strings of the fishes. α Piscium [hoot].——*Oom oon noojoom* (ام‌النجوم - ummunnujúm, Hind.). From (umm, ar. mother + nujúm, ar. stars). Same as Kahkashaun.——*Oonuk* (عنق - unuk, Ar.), cf. alanak. Otherwise Oonuk ool heiyah, meaning neck of serpent or Unakalkay by corr. Star of second magnitude. α Serpentis [hooweiyah], 49.——*Oonuk shoojah* (عنق الشجاع - unukushshujá, Ar.). From (unuk, ar. neck + shujá, ar. hydra). Otherwise Alphard [q.v.]. Star of second magnitude. α Hydræ [shoojah], 31.——*Oorkoob ool asad* (عرقوب‌الاسد - urkúbulasad, Hind.). From (urkúb, ar. hock + asad, ar. leo). Same as Awwah, the lunar mansion.——*Oottara bhaudram* (उत्तरभाद्रपदा - uttarabhádrapadá, San.; உத்திரட்டாதி - uttirattáthi, Tam.). From (uttara, san. second + bhadra, san. prosperous + pada, san. foot). Otherwise Oottarattauthy [q.v.]. The second or later rising or inferior Bhaudram [q.v.]. Cf. Poorva bhaudram.

26th hindoo lunar mansion. Figured by a couch, double headed figure, two double squares, or legs of ravanan's bedstead and comprehending two stars; the most northerly is the bright star in the head of Andromeda [mirat i moosalsila], α Andromedæ, 1 [alpheratz, eindram], and the other is the star in the extremity of the wing of Pegasus [faras ool azam], γ Pegasi, 2 [algenib, mahendram]. See also Proshtapadam. Compare arabian mansion Mooakhir.——*Oottaram* (उत्तरफल्गुनी - uttarap'halguní, San.; உத்திரம் - uttiram, Tam.). The second or later rising Phalgoony [q.v.]; 12th hindoo lunar mansion, containing two stars, figured by a bed, two small squares, or legs of bedstead. Northernmost indicates β Leonis [asad], 37 [denebola, dhroovam]. Compare arabian mansion Sarafa.——*Oottarashaudham* (उत्तराषाढ़ - uttaráshádhá, San.; உத்திராடம் - uttirádam, Tam.). From (uttara, san. second + ashádha, san. invincible). Otherwise Oottaraudam [q.v.]. The second or later rising of the two Ashaudhams [q.v.]; 21st hindoo lunar mansion. Represented by a couch or by an elephant's tooth, two double squares, or legs of bedstead. Two stars, ζ and τ Sagittarii [kows]. For τ Sagittarii, 59 see Siddham. Compare arabian mansion Balda.——*Oottarattauthy* (உத்திரட்டாதி - uttirattáthi, Tam.). By corruption from oottara proshtapadam [q.v.]. The 26th hindoo lunar mansion [oottara bhaudram].——*Oottaraudam* (உத்திராடம் - uttirádam, Tam.). By corruption from oottarashaudham [q.v.]. The 21st hindoo lunar mansion.——*Oyook* (عيوق - aiyyúk, Ar.). From (áka, ar. to impede); impeding aldebaran, 16 [q.v.] from meeting pleiades [kritticay, sooreiyah], though it is not between them; also called Rakeeb [q.v.], meaning watcher from its rising shortly after pleiades; also Bramhahridayam [q.v.]. European Capella. Star of first magnitude. α Aurigæ [mausik ool inaun], 17. Compare Tawauby ool oyook.——*Parigham* (परिघ - parigha, San.). Means iron club. Yogam star of 19th hindoo lunar mansion. λ or ν Scorpii [akrab], 51. 4th magnitude.——*Parisiyawash* (پرسیاوش - parisiyáwash, Hind.). From (par, pers. hair + siyáwash, pers. maiden). Same as Haumil i rausool ghowl.——*Phalgoony* (फल्गुनी - p'halguní, San.). Means red. 11th or 12th hindoo lunar mansion. For Poorva phalgoony, the 11th, see Poobbam; for Oottara phalgoony, the 12th, see Oottaram. Compare arabian mansions Sarafa and Zoobra.——*Poobbam* (पूर्वफल्गुनी - púrvap'halguní, San.; పుబ్బ - pubba, Tel.; பூரம் - púram, Tam.). From (púrva, san. first + p'halguna, san. the star). Otherwise Pooram [q.v.]. 11th hindoo lunar mansion. Represented by a couch, two small squares, or legs of bedstead. Two stars, δ, 36 [zoobra] and θ Leonis [asad, simham]. For δ Leonis, 36 see Vriddhy and Zoobra.——*Poolahan* (पुलह - pulaha, San.). From (pul, san. to be high). One of the seven stars [sapta rishy] of Maharicsham [q.v.], in square; β Ursæ majoris [doobhe acbar] or Alanak [q.v.].——*Poolastyan* (पुलस्त्य - pulastya, San.). From (pul, san. to be high). One of the seven stars [sapta rishy] of Maharicsham [q.v.], in square; γ Ursæ majoris [doobhe acbar].——*Poonarvas* (पुनर्वसु - punarvasú, San.; പുണർതം - punartam, Mal.; புனர்பூசம் - punarppúsam, Tam.). From (punar, san. afresh + vasu, san. goods). Restoring goods. 7th hindoo lunar mansion. Part of Gemini [jowzah, mitoonam]. Represented by a house, or a bow, or a large sea boat. Name is properly dual, implying two stars; four are now assigned to it. Comprises stars in the heads of the twins [jowzah, mitoonam], α, β, Geminorum; to which, θ and τ may be added to complete the four. For β Geminorum, 28 or Pollux see Alzirah and Soocarmam. Compare arabian mansion Zirah ool mabsoot.——*Pooram* (பூரம் - púram, Tam.). By corruption from (púrva, san. first). Same as Poobbam.——*Poorattauthy* (பூரட்டாதி - púrattáthi, Tam.). From (próshťhapada, san. the 25th lunar asterism). Same as Poorvabhaudram. Compare Poorattaushy [proshtapadam].——*Pooraudam* (பூராடம் - púrádam, Tam.). Corruption from poorvashaudham [q.v.]. The 20th hindoo lunar mansion.——*Poorva bhaudram* (पूर्वभाद्रपदा - púrvabhádrapadá, San.; பூரட்டாதி - púrattáthi, Tam.). Otherwise Poorattauthy [q.v.]. 25th hindoo lunar mansion. Represented by a couch or else by a double-headed figure, or two double squares, or legs of ravanan's bedstead; two stars α and ζ Pegasi [faras ool azam]. For α Pegasi, 68 see Bramham and Markab. Compare arabian mansion Mokaddam.——*Poorvashaudham* (पूर्वाषाढा - púrváshádhá, San.; பூராடம் - púrádam, Tam.). From (púrva, san. first + áshádha, san. the lunar mansion). Otherwise Pooraudam [q.v.]. 20th hindoo lunar mansion. Figured as an elephant's tooth or as a couch, two double squares, or legs of bedstead; two stars, δ and ε Sagittarii [kows]. There is a Tamul proverb:—பூராடக்காரர் னோடுபோராட முடியாது—"one cannot strive with a man "born under the star pooraudam." For δ Sagittarii, 57 see Shivam. Compare arabian mansion Nauyim.——*Poosham* (பூசம் - púsam, Tam.). By corruption from pooshyam [q.v.]. The eighth hindoo lunar mansion.——*Pooshyam* (पुष्य - pushya, San.; പൂയം - púyam, Mal.; பூசம் - púsam, Tam.). From (push, san. to increase); a blossom. Also called Tishyam; also Poosham [q.v.]. Eighth hindoo lunar mansion. Described as an arrow, string, or looking glass with handle; consists of three stars, β, γ and δ in the body and claws of Cancer [sartaun], or the nebula [milaf] in Cancer. For δ Cancri, 29 see Dhrity. Compare arabian mansion Nasara.——*Powshnam* (पौष्ण - paushna, San.). From (púshan, san. sun). 27th hindoo lunar mansion, so called from the regent deity Pooshan or sun. It is also called Raivaty [maunam, raivaty, veidhrity].——*Prajaupaty* (प्रजापति - prajápati, San.). From (prajá, san. creature + pati, san. lord). Star δ Aurigæ [mausik ool inaun], 24. 4th magnitude.——*Preety* (प्रीति - príti, San.). Means happiness. Yogam star of second hindoo lunar mansion. 35 Arietis [hamel, maisham], 11. 5th magnitude.——*Proshtapadam* (प्रोष्ठपद - próshťhapada, San.). From (próshťha, san. bench + pada, san. foot); from being represented by the legs of a bedstead. Epithet of the 25th and 26th hindoo lunar mansion, more commonly Bhaudrapadam [q.v.]. Gives rise to the tamul name of the asterism Poorattauthy [q.v.] and the month [mausam] Poorattaushy [q.v.]. Cf. Oottarattauthy.——*Raivaty* (रेवती - révatí, San.; இரேவதி - irévathi, Tam.). Otherwise Powshnam [q.v.]. From (rayi, san. wealth, prosperity + vat, san. possessing). 27th hindoo lunar mansion. Figured as a tabor, or fish. Thirty-two stars; the principal marks according to some the star close to the ecliptic [craunty mundalam] in the string of the Fishes, ζ Piscium [hoot, meenam], 5 [veidhrity] of 6th magnitude. Or it may mean η Piscium at the tail of the eastern fish. As beginning the solar year see remarks under Madhyama sowra maunam [maunam]. Compare arabian mansion Alrishah.——*Rakeeb* (رقيب - rakíb, Hind.). From (rakaba, ar. to watch). Same as Oyook.——*Rasalgethy* (راس الجاثي - rásuljásí, Ar.). From (rás, ar. head + jásí, ar. hercules). Star of magnitude 3 to 4, going from 3 to 4 in 66 days. α Herculis [jausy], 54.——*Rasalhague* (راس الحيه - rásulhaiyah, Ar.). From (rás, ar. head + haiyah, ar. ophiuchus). Otherwise Alroyee [q.v.], meaning the guardian of α Herculis [jausy], 54. Star of second magnitude. α Ophiuchi [heiyah], 55.——*Rauks* (راقص - rákis, Ar.). From (raks, ar. dance). Star of fifth magnitude. μ Draconis [tinneen], 53.——*Rigel* (رجل - rijl, Ar.). Contraction of rigel ool jabbaur, meaning leg of orion; also Rigel ool jowzal yoosrah, meaning upon the left foot of orion. Star of 1st magnitude. β Orionis [jabbaur], 18.——*Rigel ool jowz al yoomnah* (رجل الجوزا اليمنا - rijluljauzalyumná, Hind.), meaning upon the right leg of orion. Star. κ Orionis [jabbaur].——*Rohiny* (रोहिणी - róhiní, San.; உரோகிணி - urógini, Tam.). Red one; from color of aldebaran, 16 [q.v.]. Fourth hindoo lunar mansion. Personified as a daughter of Dacshan [q.v.], and the favorite wife of the moon [chundran]. In astrology auspicious. Krishnan [q.v.] was born with the moon in Rohiny. See Krishna jayanty. Figured as a wheeled carriage. Comprises five stars, out of the seven which the Greeks named the Hyades; they probably are α, β, γ, δ, ε Tauri [sowr]. The Arabs agree. Compare arabian mansion Aldeberan. For α Tauri, 16 see Aldeberan and Sowbhaugyam. For β Tauri, 20 see Agny and Nath. For γ Tauri, 15 see Nautih. Rohiny yogam is the period of a day when the moon [chundran] passes through the asterism of rohiny in the dark half [krishna pacsham] of the lunar month [mausam] of Jyeshtam [q.v.] or june; it is part of an astronomer's duty to examine the weather [monsoon] indications on this day and to predict scientifically the future condition of the land [swanty yogam].——*Roomeisah* (رميصاء - rumaisá, Hind.). From (ramasa, ar. matter that collects in the eye). Same as Ghoomeisah.——*Roomh ool simauk* (رمح السماك - rumhussimák, Ar.). From (rumh, ar. spear + simák, ar. star arcturus). Otherwise Airoomh [q.v.], meaning the spear, from its position in relation to arcturus, 44 [haurs ool samah, vajram] which is just east of it. Star of third magnitude. η Boötis [awwah], 43.——*Rowdray* (रौद्र - raudrá, San.). Belonging to roodran [q.v.] or shiva [q.v.]. Otherwise Ardray [q.v.]. Sixth hindoo lunar mansion, so called because the presiding deity of the mansion is Roodran. Compare arabian mansion Hanah.——*Royiljowzah* (راعي الجوزا - ráyiljauzá, Ar.). Means guardian of orion. Same as Rigel.——*Royinauyim* (راعي النعايم - ráyinnaáim, Hind.). Means guardian of nauyim. λ Sagittarii [kows]. See also Nauyim.——*Saboo* (سبع - sabu, Ar.). Means a wolf; cf. azfaur ool zeib and zeebaun, two wolves. Constellation. Nineteen stars; Lupus.——*Sad i boola* (سعدبلع - sadibula, Ar.). Same as Boola.——*Sad i naushira* (سعد ناشره - sadináshira, Hind.). Means constellation of verdant herbage. Two stars in the tail of capricornus [jaddy, macaram].——*Sad ool akbee* (سعد الاخبيه - sadulakhbíh, Hind.). From (sad, ar. auspicious + akhbíh, ar. the constellation). The 25th arabian lunar mansion. See Akbee.——*Sad ool baury* (سعد البارع - sadulbári, Hind.). Means excellent constellation. Small constellation. Two stars μ and λ in the breast of Pegasus [faras ool azam].——*Sad ool bihaum* (سعدالبهام - sadulbihám, Hind.). Means constellation of the kids. Small constellation. ε, θ Pegasi [faras ool azam]. For ε Pegasi, 63 see Fomal fars.——*Sad ool hoomaum* (سعد الهمام - sadulhumám, Hind.). Means a magnificent constellation. Same as Fomal fars [q.v.], ε Pegasi [faras ool azam], 63.——*Sad ool malik* (سعد الملك - sadulmalik, Hind.). Means a royal constellation. Small constellation α, ο Aquarii

[coombham, dalo].——*Sad ool matar* (سعد المطر - sadulmatarr, Hind.). Means a rainy constellation. Small constellation. η, ο Pegasi [faras ool azam].——*Sad ool sood* (سعد السعود - sad us suúd, Ar.). Same as Sood——*Sadr ool dajjajah* (صدر الدجاجه - sadruddajjájah, Hind.). From (sadr, ar. breast + dajjájah, ar. swan). Star. γ Cygni [dajjajah].——*Safeenah* (سفينه - safínah, Ar.). Means a ship. Constellation. Forty-five stars. Argo navis. S. hemisphere. South-eastward of Canis major [kalb i acbar]. Extensive area. Besides the principal stars, α Argûs, 25 [agastyan, coombhayony, sooheil] or Canopus, and η Argûs which is variable in magnitude, it contains several others, β, γ, δ, ε, ζ, θ, and star 6, of the second and third magnitudes. α Argûs, 25 or Canopus [agastyan, sooheil], next to Sirius, 26 [loobdhacam, mrigavyaudham, shira], is brightest in the heavens; nearly on a line drawn from Rigel, 18 [q.v.], in Orion [jabbaur], through α Columbæ and produced half the distance. β Argûs is the southernmost of the conspicuous stars in this constellation, and lies nearly midway between Canopus, 25 and α Crucis [trishunkoo], the southernmost and brightest star in the Southern cross [trishunkoo]. η Argûs is as far to the westward of α Crucis [trishunkoo] as β Centauri [cantooras] is to the eastward; it goes from 1 to 4, but irregularly. θ Argûs is 5° due south of η Argûs. θ, 6, δ, γ and ζ Argûs are nearly in a straight line, γ Argûs being as far to the westward of θ Argûs as α Centauri [cantooras] is to the eastward. ε Argûs is nearly midway between β and γ Argûs. Grus, the Crane, opposite side of South pole [dacshina dhroovam] to the group, of bright stars in Argo navis, is not represented in Arabic; α Grus, of the second magnitude, is on a line drawn from α Centauri [cantooras] through α Trianguli australis [kyekows], and produced about three times their distance; it is also distant from Fomalhaut, 66 [q.v.] 20° in a S.S.W. direction, when η and θ Argûs are on the meridian [raikhay] above the South pole [dacshina dhroovam], β Gruis is very near the meridian below the pole [dhroovam], but at about twice the distance. Phœnix, not represented in Arabic, lies between Grus and Eridanus [nahr]; its principal star, α Phœnicis, is midway between Achernar, 7 [q.v.]; and Fomalhaut, 66 [q.v.]; when the two principal stars of the Southern cross [trishunkoo] are on the meridian below the pole, α Phœnicis is on the meridian above the pole.——*Saham* (سهم - saham, Ar.). Means arrow; also (sahamurrámí), meaning arrow of the archer. Constellation; five stars; Sagitta. For Sagittarius, the archer, see Kows.——*Saleeb* (صليب - salíb, Ar.). Means a cross. Small constellation of four stars in delphinus [doolfeen] behind Altair, 60 [q.v.].——*Sarafa* (صرفه - sarafah, Ar.). From (sarafah, ar. to turn away); from its driving away cold at its auroral setting, and heat at its auroral rising. Otherwise Coonboolasad [q.v.], meaning sheath of leo, from its position; also Denebola [q.v.]; also Dhroovam [q.v.]. β Leonis [asad], 37. Stands for 12th arabian lunar mansion. Compare 12th hindoo mansion Oottaram.——*Sarpam* (சர்ப்பம் - sharppam, Tam.). From (srip, san. to creep). Serpent. Otherwise Aushlaisham [q.v.], or Ayilliyam [q.v.]. Ninth hindoo lunar mansion. Compare 9th arabian mansion Tarafa.——*Sartaun* (سرطان - sartán, Ar.). Means a crab. Cancer [carcatacam]. Fourth constellation of ancient zodiac [raushy chuckram], with no star greater than fourth magnitude; lies to east of Gemini [jowzah, mitoonam]. Centre of constellation passes meridian at midnight about end of January. For α cancri, 30 see Shoolam. For δ cancri, 29 see Dhrity. For the nebula in cancer see Milaf. See also Aushlaisham and Pooshyam.——*Saudhyam* (साध्य - sádhya, San.). From (sádh, san. to accomplish). Yogam star of 22nd hindoo lunar mansion. Otherwise Altair [q.v.]. α Aquilæ [ookaub], 60. 1st magnitude.——*Sauk ool asad* (ساق الاسد - sákulasad, Hind.). From (sák, ar. shank + asad, ar. leo). Same as Simauk ool azal.——*Shalyauk* (شلياق - shalyák, Ar.). Also called (assulahfát), meaning a tortoise. Constellation. Ten stars. Lyra, the Lyre or Harp. Opposite side of the pole [dhroovam] to Auriga [mausik ool inaun]. One principal star, α Lyræ, 58, or Vega [abhijit, nasr ool wauky]. This is somewhat more than an equal distance on opposite side of pole with respect to Capella or α Aurigæ [mausik ool inaun], 17 [bramhahridayam, oyook]. It is also 24° in a W.S.W. direction from α Cygni [dajjajah], 62 [deneb]. In brilliancy, Vega, 58 is next to Capella, 17. The variable star β Lyræ lies south-east of Vega, at distance of 6°, and close to it is γ Lyræ; they are not far from the edge of the milky way [kahkashaun]. β Lyræ changes from 3·4 to 4·5 in 12 days 21¾ hours. See also Asaufy, Azfaur and Nasrein.——*Shartein* (شرطين - sharatain, Ar.). Means two marks. Otherwise Sheratan. Two stars α 10, β 9 Arietis which are its two horns. Also applied to the single star β Arietis, 9. First arabian lunar mansion. For α Arietis, 10 see Hamel and Vishcambham. Compare hindoo mansion Ashwiny. For the horns of the bull [sowr] see Nath and Nautih.——*Shatabhishay* (शतभिषा - shatabhishá, San.; சதயம் - shathayam, Tam.). From (shata, san. hundred + bhishaj, san. physician); one struck with disease when moon is in this mansion requires 100 physicians to cure him. Otherwise Shata tauracam, meaning hundred stars. Also Shathayam [q.v.]. 24th hindoo lunar mansion containing hundred stars. Figured by a circle. These may be sought in the stream from the Jar, and in the right leg of Aquarius [coombham, dalo]. Compare arabian mansion Akbee.——*Sheratan* (شرطان - sharatán, Ar.). Same as Shartein.——*Shira* (شعرى - shira, Ar.). Means a bitch. Otherwise Shiralaboor [q.v.], the crossing Sirius, from its having crossed the milky way [kahkashaun] following its sister Sooheil, 25 [q.v.] when the latter descended into the south. Whence also Shiralyamaniyah [q.v.], meaning yemenian or southern shira, as opposed to shiral shaumiyah [q.v.] which remained in its place. Otherwise Sirius; also Loobdhacam [q.v.]; also Mrigavyaudham [q.v.]. Star of first magnitude, with parallax of ¼ second. α Canis majoris [kalbiacbar], 26. See also Shiriyaun.——*Shiral aboor* (شعرى العبور - shiralabúr, Hind.). From (shira, ar. sirius + abúr, ar. crossing). Same as Shira.——*Shiral ghoomeisah* (شعرى الغميصاء - shiralghumaisá, Hind.). From (shira, ar. sirius + ghumaisá, ar. with eye affected). Same as Ghoomeisah.——*Shiral shaumiyah* (شعرى الشاميه - shiralshámmiyah, Hind.). From (shira, ar. sirius + shámmiyah, ar. syrian); from remaining where it was and not accompanying sirius, 26 when the latter followed sooheil, 25 to the south. Same as Ghoomeisah.——*Shiral yamaniyah* (شعرى اليمانيه - shiralyamániyah, Hind.). From (shira, ar. sirius + yamániyah, ar. yemenian). Same as Shira.——*Shiriyaun* (شعريان - shiriyán, Hind.), meaning two shiras, viz., shira, 26 [q.v.] and ghoomeisah, 27 [q.v.]. These two together are called the sisters of Sooheil, 25 [q.v.]. When Sooheil [agastyan, coomba yony] descended into the south, Sirius followed it crossing the milky way [kahkashaun], and Procyon or ghoomeisah remained in her place weeping for the loss of the two others.——*Shivam* (शिव - shiva, San.). Means deity. Yogam star of 20th hindoo lunar mansion. δ Sagittarii [kows], 57. 3rd magnitude.——*Shobhanam* (शोभन - shóbhana, San.). From (shubh, san. to shine). Yogam star of fifth hindoo lunar mansion. λ Orionis [jabbaur].——*Shoobham* (शुभ - shubha, San.). From (shubh, san. to shine). Yogam star of 23rd hindoo lunar mansion. α Delphini [doolfeen], 61. 4th magnitude.——*Shoobhram* (शुभ्र - shubhra, San.). From (shubh, san. to shine). Yogam star. λ Aquarii [coombham, dalo], 65. Same as Shooclam. 4th magnitude.——*Shooclam* (शुक्ल - shukla, San.). Means white. Otherwise Shoobhram, 65 [q.v.]. Yogam star of 24th hindoo lunar mansion. λ Aquarii [coombham, dalo], 65. 4th magnitude.——*Shoojah* (شجاع - shujá, Ar.). Means a snake. Constellation. Twenty stars. Hydra, the Snake. S. hemisphere. Beginning near Procyon. 27 [ghoomeisah], trends to the eastward in a serpentine form along the south of Cancer [carcatacam, sartaun], Leo [asad, simham], and Virgo [canyay, soomboola], and terminates near Libra [meezaun, toolaum]. It is represented in European system carrying on its back a goblet or cup, Crater [bautiya], and on its tail a crow, Corvus [ghooraub, hastam], and from its great length is divided into three parts; Hydra, at the head; Hydra et Crater, the middle part; and Hydra et Corvus, at the tail. It contains one principal star, α Hydræ, 31, or Alphard [q.v.], sometimes called Cor hydræ or Oonuk shoojah [q.v.]. A line drawn from γ Leonis [asad] through Regulus, 32 [gandam, kalb ool asad] and produced to the south-westward; or a line through Castor and Pollux, 28 [alzirah, soocarmam], produced to the south-eastward for a considerable distance, will pass through no brighter star than α Hydræ, 31, which may be known by its dark ruddy appearance. For Hydrus, the water-snake see under Nahr.——*Shoolam* (शूल - shúla, San.). Means pointed weapon. Yogam star of ninth hindoo lunar mansion. α Cancri [sartaun], 30. 4th magnitude.——*Shothy* (சோதி - shóthi, Tam.). By corruption from swaunty [q.v.]. The 15th hindoo lunar mansion.——*Showla* (شوله - shaulah, Ar.). From (shaul, ar. tail). Two stars λ and ν 51 in Scorpio [akrab]; 19th arabian lunar mansion. For λ or ν Scorpii, see Parigham. Compare hindoo mansion Moolam.——*Shravanam* (श्रवण - shravana, San.; திருவோணம் - tiruvónam, Tam.). From (shru, san. to hear). Otherwise Wonam [q.v.] by corruption; also Tirwonam [q.v.]. 22nd hindoo lunar mansion presided over by Vishnoo [q.v.], whence represented by three foot-steps containing three stars, α, β and γ Aquilæ [ookaub]. For α Aquilæ, 60 see Altair and Saudhyam. Compare arabian mansion Boola.——*Shravishtay* (श्रविष्ठा - shravisht'há, San.; அவிட்டம் - avittam, Tam.). Most famous. 23rd hindoo lunar mansion. Same as Dhanishtay.——*Siddham* (सिद्ध - siddha, San.). Means accomplished. Yogam star of 21st hindoo lunar mansion. τ Sagittarii [kows], 59. 3rd magnitude.——*Siddhy* (सिद्धि - siddhi, San.). Means accomplishment. Yogam star of 16th hindoo lunar mansion. Same as Zubenesch [q.v.].——*Simauk ool azal* (سماك الاعزل - simákulazal, Ar.). From (simák, ar. star, arcturus + azal, ar. one without a weapon); so called from its having no stars near it, which is unlike the neighbouring arcturus, 44 [haurs ool samah, vajram]; or from its rising aurorally unaccompanied by cold or wind. Otherwise Sauk ool asad [q.v.], meaning shank of leo [asad], which the arabs had considerably extended; also Spica; also Harshanam [q.v.]. Star of first magnitude. α Virginis [soomboola], 41. Stands for 14th arabian lunar mansion. Compare hindoo mansion Chitta.——*Simauk ool mirzam* (سماك المرزم - simákulmirzam, Hind.). From (simák, ar. star + mirzam, ar. cold); from its rising aurorally with the first of the rains

[mazhay]. Same as Haurs ool samah.——*Simauk ool raumih* (سماك الرامح - simákurrámih, Hind.). From (simák, ar. star + rámih, ar. spear); from its position with η Boötis [awwah], 43 [roomh ool simauk]. Same as Haurs ool samah.——*Simham* (सिंह - simha, San.). Means lion. Fifth sign [raushy] of the zodiac [raushy chuckram]. Leo, ♌ [asad].——*Soocarmam* (सुकर्मन् - sukarman, San.). From (su, san. good + karma, san. action). Otherwise Alzirah, 28 [q.v.]; also Pollux, 28. Yogam star of seventh hindoo lunar mansion. β Geminorum [jowzah, mitoonam], 28. 1st magnitude.——*Sood* (سعد - suud, Ar.). Meaning auspicious; also (sadussood), meaning the most approved of the sad. Two stars, β Aquarii [coombham, dalo] and δ Capricornii [jaddy, macaram], 64 [denebalgedy]; by some β and ξ Aquarii [coombham, dalo]. 24th arabian lunar mansion. Compare hindoo mansion Shatabhishay.——*Soohah* (سہا - suhá, Ar.). A dim star by the side of Alanak [q.v.] by looking at which persons try their powers of sight. 80 Ursæ majoris [doobhe acbar, maharicsham].——*Sooheil* (سہیل - suhail, Ar.). From (sahala, ar. smooth); distinguish from sahely [q.v.]. Otherwise Agastyan [q.v.]; Coombhayony [q.v.], Canopus. Star of first magnitude, α Argûs [safeenah], 25. Known to hindoos only after coming to S. india [agastyan]. Friar Jordanus, the Quilon Bishop of the fourteenth century, has the following:— "From the place aforesaid, namely Indran [ashtadic], is seen "continually between the south and the east a star of great size "and ruddy splendour, which is called Canopus, and which from "these parts of the world is never visible." See also Ghoomeisah, Shira and Shiriyaun.——*Soomboola* (سنبله - sumbulah, Ar.). From (sumbula, ar. ear of wheat); figure being a girl having a ear of corn in her right hand raised to the level of shoulder while the left hand hangs down. Virgo [canyay]. Sixth constellation of ancient zodiac [raushy chuckram]. Contains one very conspicuous star, α Virginis, 41, or Spica [chitta, harshanam, simauk ool azal], with no other near it. α Virginis, 41 or Spica, is distant from β Leonis [asad], 37, or Denebola [q.v.], about 35° in a south-easterly direction, and may be recognised by forming the southern angle of an equilateral triangle, of which Arcturus, 44 [haurs ool samah, vajram] and Denebola, 37 [q.v.] or Dhroovam, 37 [q.v.] are the northern angles. Again Arcturus, 44, Regulus, 32 [gandam, kalb ool asad], and Spica, 41 form a right-angled triangle, having Spica at the right angle. Spica passes the meridian at midnight about the beginning of April. ϵ Virginis, or Vindemiatrix, is a star of the third magnitude within the triangle just mentioned; this star is south of Cor caroli [doobhe acbar], and on a line drawn from γ to β Leonis [asad], 37 and produced half their distance. γ Virginis is a double star with 174 year period 15° to the N.W. of Spica, 41; or, it is a little to the south of a line drawn from Spica, 41 to Denebola, 37 or β Leonis, 37, but nearer the former star; γ Virginis, Spica, and Vindemiatrix form an obtuse angled triangle, γ being at the obtuse angle. For δ Virginis, 40 see Aupas. For the claw of soomboola see Zubenesch. See also Awwah, Ghafr, Simauk ool azal.——*Sooreiyah* (ثریا - suraiyá, Ar.; پروین - parvín, Pers.). Means beneficent or plentiful; on account of its influence on weather [monsoon] of all the mansions of the moon [chundran]; hence called also (annajm) or the asterism. Six or seven conspicuous stars together with many small ones altogether twenty-four constituting the Pleiades in the shoulder of the Bull [sowr, vrishabham]. See also Alfoorood and Arsh ool sooreiyah. Compare Taulyoon najm. Third arabian lunar mansion. Compare hindoo mansion Kritticay.——*Sowbhaugyam* (सौभाग्य - saubhágya, San.). From (su, san. good + bhágya, san. fortune). Otherwise Aldeberan [q.v.]; also Ayeen ool sowr [q.v.]. Yogam star of fourth hindoo lunar mansion. α Tauri [sowr], 16. 1st magnitude.——*Sowr* (ثور - saur, Ar.). Means a bull. Taurus [vrishbham]. Second constellation of the ancient zodiac [raushy chuckram], to southward of Perseus [haumiliraus ool ghowl] and Auriga [mausik ool inaun], and north-westward of **Orion** [jabbaur]. Contains two principal stars, α, 16 [aldebaran, sowbhaugyam] and β, 20 Tauri [agny, nath]. Taurus is also recognised by the two clusters of small stars called the Pleiades [kritticay, sooreiyah], and Hyades [aldebaran], in the latter of which is the bright ruddy star α Tauri, 16 or Aldebaran [q.v.]. A line drawn from Polaris, 6 [al rooccabah, dhroovam], and passing between Capella, 17 [bramhahridayam, oyook] and α Persei [haumiliraus-oolghowl], 13 [mirfak], will lead to no conspicuous star until it reaches Aldebaran, 16. β Tauri, 20, or Nath [q.v.] or Agny [q.v.] is also γ Aurigæ [mausik ool inaun]; it bisects a line drawn from Capella, 17 to Betelgeux, 23 [q.v.], the principal star of Orion [jabbaur]. It is at the extremity of the Bull's horn. The Pleiades [kritticay, sooreiyah], in the Bull's shoulder, are generally said to be seven in number, but only six stars are visible to the naked eye; the telescope reveals multitudes more; with Aldebaran, 16 and β Tauri, 20, they form an isosceles triangle, having Aldebaran at the apex. η Tauri, 14 or Alcyone or Ayooshmat [q.v.] is the brightest of the Pleiades, and is the star around which, as their common centre, the whole firmament revolves. The Hyades [aldebaran, rohiny] form the forehead and Aldebaran the eye of the Bull [ayeen ool sowr], while γ Tauri, 15 [nautih] is near the nose; they are arranged like the letter V, of which γ is the angular point, α and ϵ Tauri being at the extremities; θ between α and γ Tauri; and δ between ϵ and γ. Aldebaran, 16 [q.v.] passes the meridian at midnight towards the end of November. For Kalb ool sowr or heart of bull see Aldebaran. For others see Kalbaun.——*Swauty* (स्वाति - sváti, San.; ചോതി - chóti, Mal.; சுவாதி - shuváthi, Tam.). From (su, san. well + at, san. to walk). Otherwise Shothy [q.v.], by corruption. 15th hindoo lunar mansion. Represented by a coral bead, ruby, or small brinjaul. Contains a single star of first magnitude, Arcturus, 44 [haurs ool samah, vajram]. Swauty yogam is the period of a day when the moon [chundran] passes through the asterism of swauty in the month of jyeshtam [q.v.] or june [rohiny, yogam]. Compare arabian mansion Ghafr.——*Tarafa* (طرفہ - tarafah, Ar.). Means the eyes; being regarded as two eyes of Leo [asad, simham]. λ Leonis in the face of the lion and α Cancri [sartaun], 30 [shoolam]. Ninth arabian lunar mansion. Compare hindoo mansion Aushlaisham.——*Tauj ool jowzah* (تاج الجوزا - tájuljauzá, Ar.). Meaning crown of orion [jabbaur]. Otherwise Zawauyib ool jowzah [q.v.], or hanging forelock of orion. Nine stars disposed in a curved form in the sleeve of orion.——*Tauly oon najm* (تالی النجم - tálíunnajm, Hind.). From (tálí, ar. follower + najm, ar. pleiades). Aldebaran, 16 [q.v.], or following or rising later than the pleiades [kritticay, sooreiyah]. See also Sowr.——*Tawauby ool oyook* (توابع العیوق - tawábiulaiyyúk, Hind.). From (tawábi, ar. follower + aiyyúk, ar. capella); β, θ, ϵ Aurigæ [mausik ool inaun]. For Capella, 17 see Oyook.——*Thuban* (ثعبان - subán, Ar.). Means a dragon. Star, α Draconis [tinneen]. Aroondhaty of the hindoos [maharicsham]. Once the brightest in the constellation now of 3rd magnitude. 4,200 years ago it was the pole star being then about 10′ near the pole [dhroovam]. For more details see under Doobhe asghar.——*Tinneen* (تنین - tinnín, Ar.). Means a dragon. Constellation. Thirty-seven stars. Draco, winding constellation, commences between Ursa major [doobhe acbar, maharicsham] and Ursa minor [cshoodraricsham, doobhe asghar], runs almost half way round the latter, and then turns towards Lyra [shalyauk]. Contains three principal stars, α, β, and γ. To find β [alwaida] and γ Draconis, 56 [etenin]; a line through the guards [farghdaun], from β, 47 to γ Ursæ minoris [doobhe asghar], passes through the head of the Dragon, in which they are placed; or a line from Polaris, 6 [al rooccabah, dhroovam], produced through δ Ursæ minoris [doobhe asghar] and extended 38°, leads to them, nearly; they are also nearly on a line joining α Ursæ majoris, 35 [doobhe] and Vega, α Lyræ [shalyauk], 58 [abhijit, nasr ool wauky], but not far from the latter. A line drawn from ζ Ursæ majoris [doobhe acbar], the last star but one in the tail, to the nearest star in δ Ursæ minoris will be bisected by α Draconis [aroondhaty, thuban]. If a line be drawn from λ Draconis to Polaris, 6, the pole [dhroovam] of the ecliptic [craunty mundalam, sauyanam] will be on this line at about the same distance from γ Draconis, 56 [etenin] that this star is from Vega, α Lyræ [shalyauk], 58. For μ Draconis, 53 see Rauks. For other stars in the group see Alrooba, Asaufy, Awoyiz and Zeebaun.——*Tirvauthiray* (திருவாதிரை - tiruváthirai, Tam.). Means holy ardray. Same as Ardray.——*Tirwonam* (திருவோணம் - tiruvónam, Tam.). Means holy Wonam [q.v.]. Same as Shravanam.——*Tisyham* (तिष्य - tishya, San.). Same as Pooshyam.——*Toolaum* (तुला - tulá, San.). Means balance. Seventh sign [raushy] of the zodiac [raushy chuckram]. Libra, ♎ [meezaun].——*Towbee* (توبیع - taubí, Hind.). Means follower. Aldebaran [q.v.] is so called from following or rising later than the pleiades [kritticay, sooreiyah]. See also Sowr.——*Trishunkoo* (त्रिशंकु - trishanku, San.). From (tri, san. three + shanku, san. spoke of a wheel). A modern name, not in the shastrams. The southern cross in the southern hemisphere [golam]. Crux or the Cross is a remarkably well defined constellation, about 30° from the South pole [dacshina dhroovam], and due south from Corvus [ghooraub, hastam]; a line from Arcturus, 44 [haurs ool samah, vajram] through spica, 41 [harshanam, simauk ool azal] also leads to it. The four principal stars are α, β, γ and δ Crucis, of which α is the brightest and most southern star; at a distance of 6° to the north of α is γ Crucis which is also 47° S. by W. from spica, 41 [harshanam, simauk ool azal]; about $4\frac{1}{2}$° N.E. of α is β Crucis, the eastern arm of the Cross, and δ the western arm is $4\frac{1}{2}$° from β. All the stars of the Southern cross are within the Milky way [kahkashaun]. None of them recognized either in Hindoo or in Arabian system [achernar, agastyan]. The northernmost and southernmost stars are pointers to the S. pole [dacshina dhroovam]. For pointers of north pole [oottara dhroovam] see Alanak and Doobhe and Doobhe asghar.——*Tyaujyam* (त्याज्य - tyájya, San.). See sep. title.——*Vajram* (वज्र - vajra, San.). Means a cross. Otherwise Haurs ool samah [q.v.]; also Arcturus. Yogam [q.v.] star of swauty [q.v.], the 15th hindoo lunar mansion. α Boötis [awwah], 44. 1st magnitude.——*Vareeyas* (वरीयस् - varíyas, San.). Means more excellent. Otherwise Alkalb, 52 [q.v.]; also Antares, 52. Yogam star of 18th hindoo lunar mansion. α Scorpii [akrab], 52. 1st magnitude.——*Varjyam* (वर्ज्य - varjya, San.). From (vrij, san. to abandon). The unlucky portion of a nacshatram. See Tyaujyam.——*Vasishtan* (वसिष्ठ - vasisht'ha, San.). Means most patient. One of the seven stars [sapta rishy] of Maharicsham [q.v.]; at arch of tail; ζ Ursæ majoris [doobhe acbar].
